"(C) the sums which are transferred by the Secretary of the Treasury to the Fund out of funds appropriated to the Department of Defense for the purpose of paying the costs relating to the creditable military service of Foreign Service members who become participants during any year.

"(c) At least every 5 years, the Secretary of the Treasury shall prepare periodic valuations of the Foreign Service Pension System and shall advise the Secretary of State of (1) the normal cost of the System, without regard to the cost of disability payments, (2) the supplemental liability of the System, and (3) the amounts necessary to finance the costs of the System.

"SEC. 856. DISABILITY.—The Secretary of State (in consultation with the Medical Director of the Department of State and the Foreign Service), instead of an administrator of benefits (as defined in section 8441(1) of title 5, United States Code), shall determine whether a participant or former participant is unfit for overseas duty (within the meaning of section 808 of this Act) for the purposes of subchapter V of chapter 84 of such title.

"SEC. 857. GENERAL AND ADMINISTRATIVE PROVISIONS.—(a) The Secretary of State shall administer the Foreign Service Pension System except for matters relating to the Thrift Savings Plan provided in subchapters III and VIII of chapter 84 of title 5, United States Code, and disability benefits under subchapter V of such chapter (other than matters to which section 856 applies). The Secretary of State shall, with respect to the Foreign Service Pension System, perform the functions and exercise the authority vested in the Office of Personnel Management or the Director of such Office by such chapter 84, and may issue regulations for such purposes.

"(b) Determinations of the Secretary of State under the Foreign Service Pension System which, if made by the Office of Personnel Management under chapter 84 of title 5, United States Code, the Director of such Office, or an administrator of benefits (as defined in section 8441(1) of such title), would be appealable to the Merit Systems Protection Board, to such Office, or to the Director of such Office shall, instead, be appealable to the Foreign Service Grievance Board.

"SEC. 858. TRANSITION PROVISIONS.—The Secretary of State shall issue regulations providing for the transition from the Foreign Service Retirement and Disability System to the Foreign Service Pension System. For this purpose, the provisions of sections 8471, 8472, and 8473 of title 5, United States Code, relating to the Civil Service Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement under such system shall be deemed to refer in like manner to the Foreign Service Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement thereunder.

"SEC. 859. REFERENCES IN OTHER LAWS.—References made to participants in the Federal Retirement System in sections 8113(c), 8475, 8704(a)(2), and 8705(e) of title 5, United States Code, section 210(a)(5)(H) of the Social Security Act, and section 3121(b)(5)(H) of the Internal Revenue Code of 1954 shall be deemed to refer to participation in the Foreign Service Pension System.".

(b) The table of contents in section 2 of such Act is amended—

(1) by striking out the item relating to chapter 8 and inserting in lieu thereof the following:

"CHAPTER 8—FOREIGN SERVICE RETIREMENT AND DISABILITY

"SUBCHAPTER I—FOREIGN SERVICE RETIREMENT AND DISABILITY SYSTEM"

(2) by inserting after the item relating to section 827 the following:

"SUBCHAPTER II—FOREIGN SERVICE PENSION SYSTEM

"Sec. 851. Establishment.
"Sec. 852. Definitions.
"Sec. 853. Participants.
"Sec. 854. Entitlement to annuity.
"Sec. 855. Funding.
"Sec. 856. Disability.
"Sec. 857. General and administrative provisions.
"Sec. 858. Transition provisions.
"Sec. 859. References in other laws.".

Redesignate the succeeding title and sections accordingly.

Mr. LUGAR. Mr. President, this amendment adds a new title IV to S. 1527 to establish a FS pension system [FSPS]. The new system would provide retirement benefits for members appointed after 1983, and is very similar to the Federal retirement system [FRS] established by the bill for new appointees in the civil service after 1983. All FS members who become participants in the FSPS would be subject to all provisions of the comparable FRS unless specifically provided otherwise by law. All the exceptions are stated in this proposed amendment to S. 1527. Essentially, this amendment will bring new foreign service employees into conformity with the new Stevens-Roth structure.

The FS has always had its own retirement system separate from the CS retirement system. The basic reason for this is that the FS needs special provisions for early retirement to permit operation of its up-or-out personnel system. A number of FS members are mandatorily retired every year to permit advancement of the more competitive personnel. This system was endorsed and expanded by the FS Act Amendments of 1980. The special provisions are also necessary to permit the early retirement of members who, for various reasons, are no longer able to serve abroad.

The FSPS proposed in this amendment would preserve the early retirement and other special features needed by the FS. It would permit members to retire voluntarily at age 50 with 20 or more years of service with the same benefit as provided by the bill, as eventually enacted, for special category personnel such as law enforcement, firefighter, and air traffic controller personnel. Like the bill, the system would permit FS members who are retired mandatorily at an early age to receive the midtier benefit based on high-five salary without penalty for early retirement. Again, like the bill, the third basic special provision would provide an annuity supplement equivalent to a Social Security benefit from the date of retirement to age 62 when the annuitant would be eligible for the actual Social Security benefit. This annuity supplement would be based on all creditable service.

Mr. President, this amendment is acceptable to the managers of the bill, the administration, the foreign service employees, and the ranking members of the Foreign Relations Committee. I recommend its adoption.

Mr. STEVENS. Mr. President, this amendment has been cosponsored by my good friend from Missouri and myself.

Mr. EAGLETON. No objection, Mr. President.

Mr. STEVENS. I yield back the remainder of my time.

Mr. EAGLETON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time being yielding back, the question is on agreeing to the amendment of the Senator from Indiana.

The amendment (No. 980) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 981

(Purpose: To require certain employees of nonappropriated funds instrumentalities of the Federal Government to be participants in the Federal Retirement System)

Mr. EAGLETON. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. EAGLETON] proposes an amendment numbered 981.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 133, line 11, after "Service", insert ", and including an employee referred to in section 2105(c) of this title who was first employed by the Government after December 31, 1983".

On page 292, strike out lines 7 through 11.

On page 292, line 14, strike out "Sec. 306." and insert in lieu thereof "Sec. 305.".

On page 293, line 12, strike out "Sec. 307." and insert in lieu thereof "Sec. 306.".

On page 293, line 25, strike out "Sec. 308." and insert in lieu thereof "Sec. 307.".

On page 296, line 25, strike out "Sec. 309." and insert in lieu thereof "Sec. 308.".

Mr. EAGLETON. Mr. President, the purpose of this amendment is to include in the new retirement plan employees of nonappropriated fund instrumentalities of the Departments of Defense and Transportation who were first hired after December 31, 1983. These Federal instrumentalities operate morale, recreation, and welfare activities for the benefit of military and Coast Guard personnel. This includes activities such as PX's, bowling centers, and gas stations. Depending upon the availability of the appropriated funds, in some years the NAF employees are placed in civil service positions, where they are covered under the civil service retirement system. However, in other years, when no appropriated funds are available for such activities, the very same employees are placed in a NAF personnel system under a NAF retirement plan. The problem is that service in one position is not creditable as service in the other position for retirement purposes. My amendment would rectify this problem.

Mr. STEVENS. Mr. President, it is my understanding from the amendment of the distinguished Senator from Missouri that nonappropriated funds will pay the total cost for this amendment, that it is not an increased burden on the taxpayers, rather it is a recognition of the mobility and portability of the fund which is essential to the basic bill, and therefore I support the Senator's amendment.

Mr. EAGLETON. The Senator is correct in his assumption. I yield back the remainder of my time.

Mr. STEVENS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Missouri.

The amendment (No. 981) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 982

(Purpose: To improve the disability benefits plan under the Federal Retirement System)

Mr. EAGLETON. Mr. President, I have an amendment I send to the desk on behalf of Senator Chiles.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. EAGLETON], for Mr. CHILES, proposes an amendment numbered 982.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 210, line 22, strike out "increased," and all that follows through page 211, line 1, and insert in lieu thereof the following: "increased on January 1 of each year after such date by the same percent by which annuities referred to in section 8462(b)(1) of this title are increased under section 8462(b)(2)(D) of this title in December of the preceding year, and".

On page 212, line 20, strike out "paragraph (3)" and insert in lieu thereof "paragraphs (3) and (4)".

On page 214, between lines 23 and 24, insert the following:

"(4) If an eligible participant has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title, the amount of the annuity which the participant is entitled to receive under subchapter II of this chapter by reason of the application of paragraph (1) of this subsection—

"(A) while the participant is at least 55 years of age and under 62 years of age may not be less than the amount equal to 30 percent of the participant's final average pay computed on the date the participant becomes 55 years of age; and

"(B) on and after the date the participant becomes 62 years of age may not be less than the amount equal to 10 percent of the participants final average pay computed on the date the participant becomes 55 years of age.".

On page 216, between lines 13 and 14, insert the following:

"(c)(1) Under regulations prescribed by the Office, the level benefits option provided under regulations prescribed pursuant to section 8417 of this title may be extended to cover the disability benefits payable to a participant under this subchapter.

"(2) The actuarial present value of the benefits expected to be paid to a participant under this subchapter and subchapter II of this chapter as provided under paragraph (1) of this subsection may not exceed the actuarial present value of the benefits that would be expected to be paid to such participant under this subchapter and such subchapter II if the adjustments authorized by such paragraph were not made, as determined under regulations prescribed by the Office.

On page 220, line 5, strike out "60" and insert in lieu thereof "50".

Mr. CHILES. Mr. President, I rise today to offer an amendment which would improve disability protection for many Federal workers who are covered under the new retirement system. My amendment would not raise the cost of the bill.

My amendment affects those individuals who elect option B under this retirement program. This option provides full cost-of-living increases for all retirees over the age of 62 and generally provides for more generous survivor and disability benefits than option A.

As currently constituted, a worker who had elected option B, and whose disability prevents him from doing any job at his grade level, might receive no disability benefits at all between the ages of 55 and 62. Other disabled workers might receive less than 10 percent of their previous salary between the ages of 55 and 62. At age 62, all those workers would be eligible to receive Social Security retirement benefits. But even this addition could still leave many of these individuals with low benefits for the rest of their lives. My amendment would increase disability benefits for individuals in these situations.

More specifically the bill now provides that a disabled worker who had elected option B, but who is not sufficiently disabled to meet the strict Social Security definition of being permanently and totally disabled, would receive 60 percent of the average of his highest 5 years of salary, during the first year of his disability. Thereafter, he would receive 40 percent of this average salary until he reached age 55 and his benefit amount would be indexed to the CPI during this period.

After age 55, his situation changes, however. The individual would no longer receive 40 percent of his "high-5" salary but would instead receive a benefit generally based upon what he would have been eligible for if he had retired at age 55. Of course, many of these workers would have worked past age 55, thereby enhancing their retirement benefits if they had not become disabled. In particular, individuals who joined the Government late in their careers would have accrued only relatively small retirement benefits by age 55 and therefore would have a strong incentive to work past that age.

As a result of all of these provisions now in the bill, the disabled worker can experience a dramatic drop in his benefit at age 55. His benefit could decline from 40 percent of his previous salary to less than 10 percent or even zero. At age 62, the combination of his benefit plus Social Security could still easily be well below 40 percent of his salary.

My amendment would improve the disability benefits for individuals in these situations. The disabled worker, who does not meet the Social Security disability definition would receive a minimum of 30 percent of his "high 5" salary between the ages of 55 and 62, rather than as little as zero percent under the bill as it has been reported. The worker would receive a minimum of 10 percent after age 62 plus the Social Security retirement benefit for which he is eligible at that age. The individual receiving this minimum would then be better off than he would be under the bill as now reported.

I might add that option A provides even less generous disability benefits than option B, but my amendment addresses only option B. Option A was designed for individuals who consciously elect to have a pension program that contains more generous thrift plan opportunities in exchange for less generous retirement, disability, and survivors benefits.

In order to make my amendment cost-neutral and keep the total cost of each option at 21.9 percent of payroll, I have made one change to benefits for disabled workers under option B. under the bill as now reported, the "high-5" salary is indexed to the growth in federal wages for purposes of determining the retirement benefit which the individual receives at age 55 or 62. My amendment would change this index to be equal to the growth in the CPI rather than the growth in Federal wages. Nonetheless, option B will provide more generous indexing than option A, even after option B has been altered by my amendment. Option A would index the high-5 to only the "CPI-minus-2," rather than the full CPI. I might have preferred not to make any change in the indexing in option B, but it was necessary to do so in order to keep the cost of option B at 21.9 percent of payroll.

My amendment also makes two other changes. Under both options A and B, a disabled worker may receive different benefit amounts at different ages. The bill presents the distinct possibility that decreases in benefits will occur at various ages. My amendment would provide an opportunity for the recipient to elect a leveling of his benefits throughout the remaining years of his life. The new benefits would of course, have the same actuarial value as the benefits he would otherwise be entitled to. Through this mechanism, the recipient's benefits would not rise or fall over time. A similar leveling mechanism is available for nondisabled retirees under the provisions of the bill. I think that providing opportunities for a stable income for the recipient could be very helpful.

Finally, my bill changes the limitation on the amount of income which a disability annuitant may earn while still retaining his benefits. Under the bill as now reported, the annuitant cannot earn more than 60 percent of the income earned at his previous job. My amendment would change this figure to 50 percent. I do not think that we should be providing disability benefits to individuals who are working and who are able to earn money at or near their previous potentials. My amendment would tighten the restriction which limits such possibilities.

Mr. EAGLETON. Mr. President, let me briefly explain the Chiles amendment. This amendment would increase disability protection for employees under option B at the point they convert from disability rolls to the retirement rolls. Currently, the occupationally disabled—that is not Social Security disabled—face a significant reduction of benefits at age 55, only to increase at age 62. This amendment will ease the transition at no cost.

Mr. STEVENS. Mr. President, emphasizing the last statement of the Senator from Missouri, that it is a transition at no additional cost, I am prepared to accept the amendment.

Mr. EAGLETON. I yield back the remainder of my time.

Mr. STEVENS. I yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back. the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 982) was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 983

(Purpose: To facilitate transfers among certain Government retirement systems)

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 983.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the chapter analysis of chapter 84 of title 5, United States Code, as set out in section 101(a), insert after the item relating to section 8476 the following:

"8477. Treatment of individuals transferring among certain Government retirement systems.".

On page 256, between lines 14 and 15, insert the following:

"§ 8477. Treatment of individuals transferring among certain Government retirement systems

"(a)(1) The President shall prescribe regulations to assure that individuals who commence participation in the Federal Retirement System, the Foreign Service Pension System, or the Central Intelligence Agency Pension System after participating in any other such retirement system is given credit for (A) all service performed while participating in any such retirement system for the purposes described in paragraph (2) of this subsection, and (B) rates of pay paid to such individual for any such service in computing an annuity under any such retirement system.

"(2) Service credit shall be given as provided in paragraph (1) of this subsection for—

"(A) the purpose of determining eligibility to retire entitled to an annuity under any retirement system referred to in such paragraph;

"(B) the purpose of satisfying vesting requirements under any such retirement system; and

"(C) the purpose of applying any applicable formula with respect to such service in computing an annuity under any such retirement system.

"(b) Under regulations prescribed by the President, any individual who commences participation in the Federal Retirement System, the Foreign Service Pension System, or the Central Intelligence Agency Pension System under circumstances similar to the circumstances described in subsection (b) or (c) of section 8471 of this title after having participated in another Federal Government retirement system established before January 1, 1984, shall be treated in the same manner as is provided in such subsection and section 8472 of this title.".

Mr. STEVENS. Mr. President, the purpose of this amendment is to facilitate transfers among Government retirement systems. I call attention to the Senate that now we have had the interplay of the Foreign Relations Committee, the Intelligence Committee and other committees in terms of

bringing before us now a total retirement package for all Government employees other than military. This would provide a consistency in the transfer provisions for all of these retirement systems covered under this bill. The amendment would enable an employee who becomes a participant in the Federal retirement system to be given credit for prior service under another Government retirement system. The service credit would continue toward retirement eligibility vesting requirements and applying the applicable formula in computing an annuity.

Mr. President, I hope that this is just the forerunner of future work to provide the kind of portability and transferability between Government systems and private systems which we will tackle at a later date.

Mr. EAGLETON. Mr. President, I believe this to be an excellent amendment. I yield back the remainder of my time.

Mr. STEVENS. I yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 983) was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 984

(Purpose: To make technical and clarifying amendments)

Mr. STEVENS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS] proposes an amendment numbered 984.

Mr. STEVENS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. STAFFORD). Without objection, it is so ordered.

The amendment is as follows:

On page 133, strike out line 6 and all that follows through page 134, line 4, and insert in lieu thereof the following:

"(12) the term 'employee'—

"(A) except as provided in subparagraph (B) of this paragraph, means—

"(i) each individual referred to in subparagraphs (A), (E), (F), (H), (I), and (J) of section 8331(1) of this title, including an employee of the United States Park Police and an employee of the United States Secret Service, and including an employee referred to in section 2105(c) of this title who was first employed by the Government after December 31, 1983, and

"(ii) a Congressional employee as defined in section 2107 of this title, including a temporary Congressional employee,

any of whose employment by the Government after December 31, 1983, is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954; and

"(B) does not include any individual who—

"(i) is referred to in clause (i), (v), (vi), or (ix) of paragraph (1) of section 8331 of this title or in the undesignated material after clause (ix) or such paragraph;

"(ii) is subject to another retirement system for Government employees, except in the case of an individual—

"(I) who is an employee of the United States Park Police or the United States Secret Service, or is an employee referred to in section 2105(c) of this title who was first employed by the Government after December 31, 1983; or

"(II) who, without regard to this chapter, would be subject to subchapter III of chapter 83 of this title or would be eligible to be subject to such subchapter;

"(iii) is excluded under section 8402(b)(2) of this title; or

"(iv) was subject to subchapter III of chapter 83 of this title on December 31, 1983, has not had a break in service with the Government described in section 210(a)(5)(A) of the Social Security Act for a period of more than 1 year beginning after such date, and has not commenced participation in the System pursuant to section 8471 of this title;".

On page 150, line 24, strike out "A" and insert in lieu thereof "Except as provided in section 8436(c)(1) of this title, a".

On page 164, strike out lines 4 through 7 and insert in lieu thereof the following:

"(5) Under regulations prescribed by the Executive Director, at least once each year a participant may modify the amount contributed pursuant to paragraph (1) or (2) of this subsection, as the case may be, or may terminate an election to make contributions under such paragraph.".

On page 183, line 24, strike out "notwithstanding" and insert in lieu thereof "subject to".

On page 191, line 13, strike out "the reduced" and all that follows through "computed," on page 191, line 16, and insert in lieu thereof the following: "an annuity computed with respect to such participant as of the day before the date of death".

On page 191, line 19, strike out "reduced".

On page 192, line 8, strike out "the annuity" and all that follows through "computed" on line 11, and insert in lieu therof "an annuity computed with respect to the participant as of the day before the date of death".

On page 236, line 6, insert a comma after "annuitant".

On page 236, line 8, insert a comma after "subsection".

On page 238, strike out lines 7 through 15, and insert in lieu thereof the following:

"(B)(i) the number of months, not to exceed 12 months, for which the annuity was payable before the effective date of the increase, counting any portion of a month as a month, or

"(ii) in the case of a survivor annuity payable to a surviving spouse or surviving former spouse of a deceased annuitant whose annuity has never been so increased, the number of months, not to exceed 12 months, since the annuity was first payable to the deceased annuitant, counting any portion of a month as a month.

On page 246, line 21, strike out "before" and all that follows through "1984," on line 22.

On page 248, line 2, insert "and" after "title,".

On page 248, line 4, strike out "and" and all that follows through line 6.

On page 248, line 8, insert "before January 1, 1984," after "performed".

On page 248, line 14, insert "and" after "title,".

On page 248, line 16, strike out "and" and all that follows through line 18.

On page 248, line 20, strike out "1987," and insert in lieu thereof "1984,".

On page 262, line 9, insert "subject to section 8495 of this title," after "(1)".

On page 262, line 16, insert "subject to section 8495 of this title," after "(2)".

On page 266, line 2, insert "and" after the semicolon.

On page 266, line 3, strike out "; and" and all that follows through line 6, and insert in lieu thereof a period.

Mr. STEVENS. Mr. President, these are technical amendments that are required, as I will explain. As can be expected in a bill as complex as this one, there are a number of technical amendments.

First. The definition of an "employee" is reworded to make clear that the new plan covers employees hired during 1984–85, and to accommodate the amendment just approved regarding coverage of employees of nonappropriated fund instrumentalities.

Second. The wording regarding election of an option at retirement is amended to make clear that a new option can be elected by a married annuitant upon the termination of entitlement of a former spouse.

Third. The thrift plan contribution language is amended to make clear that an employee's right to change the amount contributed at least once a year includes the right to stop contributing. I think that must be emphasized—that the right to change includes the right to stop contribution to a thrift plan.

Fourth. The wording regarding possible employee input into the definition of the stock index fund is amended to assure that this will not conflict with the fiduciary standards and investment policies which apply.

Fifth. The wording regarding surviving spouse benefits payable at death of an employee before retirement is amended to clarify that benefits are payable in cases where the employee was not yet eligible to retire.

Sixth. The wording regarding cost-of-living adjustments is amended to make clear that all classes of survivor annuitants are eligible for COLA's, and to correct the formula for prorating the initial COLA payable.

Seventh. The wording regarding transition from the existing program is clarified regarding its application to employees hired both before and after 1984, including participants in the interim plan that became effective January 1984.

Eighth. The wording regarding investment policies is amended to eliminate the reference to criteria other than prodent investments and low administrative costs.

Mr. EAGLETON. Mr. President, I support the amendments as submitted by Senator STEVENS, and I yield back the remainder of my time.

Mr. STEVENS. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 984) was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, we are awaiting the arrival of the Senator from Virginia. I suggest the absence of a quorum until his arrival.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TRIBLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I yield to the Senator from Virginia such time as he and his colleague may need.

Mr. TRIBLE. I thank my distinguished friend from Alaska.

AMENDMENT NO. 985

(Purpose: To amend title 5, United States Code, to increase the opportunity to provide a survivor annuity under subchapter III of chapter 83 of such title, and to improve retirement counseling for Federal Government employees)

Mr. TRIBLE. Mr. President, at this time I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Virginia [Mr. TRIBLE] for himself and Mr. WARNER purposes an amendment numbered 985.

Mr. TRIBLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 151, between lines 9 and 10, insert the following:

"(c)(1) A participant or former participant—

"(A) who, at the time of retirement, is married, and

"(B) who elects at such time (in accordance with subsection (b) of this section) a method of payment other than the method described in subsection (a)(2)(B) of this section,

may, during the 18-month period beginning on the date or which the participant or former participant may first make an election under subsection (b) of this section, elect the method of payment described in subsection (b)(2) of this section.

"(2)(A) An election under paragraph (1) of this subsection shall not be considered effective unless—

"(i) the spouse of the participant or former participant is provided advance notice of the election in accordance with such regulations as the Office shall prescribe; and

"(ii) the amount specified in subparagraph (B) of this paragraph is deposited into the Fund before the expiration of the applicable 18-month period under such paragraph (1).

"(B) The amount to be deposited with respect to an election under this subsection is an amount equal to the sum of—

"(i) the additional cost to the System which is associated with providing a survivor annuity under subsection (b)(2) of this section and results from such election taking into account (I) the difference (for the period between the date on which the annuity of the participant or former participant commences and the date of the election) between the amount paid to such participant or former participant under this subchapter and the amount which would have been paid if such election had been made at the time the participant or former participant applied for the annuity, and (II) the costs associated with providing for the later election; and

"(ii) interest on the additional cost determined under clause (i) of this subparagraph computed using the average annual interest rate earned during such period by securities held by the Fund.

"(3) An election by a participant or former participant under this subsection voids prospectively any election previously made in the case of such employee or Member under subsection (b) of this section.

"(4) The annuity of a participant or former participant which is reduced in connection with an election under this subsection shall be reduced by the same percentage reductions as were in effect on the date on which the annuity of the participant or former participant commenced.

"(5) Rights and obligations resulting from the election under this subsection shall be the same as the rights and obligations which would have resulted had the participant or former participant made such election at the time of applying for an annuity.

"(6) The Office shall, on an annual basis, inform each participant and each former participant who has accrued entitlement under this subchapter of the right of election under this subsection, including the procedures and deadlines applicable in making any such election.".

At the end of title III, insert the following:

18-MONTH PERIOD TO ELECT A SURVIVOR ANNUITY

SEC. 310. (a) Section 8339 of title 5, United States Code, is amended by adding at the end thereof the following:

"(o)(1)(A) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who notifies the Office at such time (in accordance with subsection (j)) that a survivor annuity under section 8341(b) of this title is not desired,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a reduction under subsection (j) made in the annuity of the employee or Member (or in such portion thereof as the employee or Member may designate) in order to provide a survivor annuity for the spouse of such employee or Member.

"(B) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who at such time designates (in accordance with subsection (j)) that a limited portion of the annuity of such employee or Member is to be used as the base for a survivor annuity under section 8341(b) of this title,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a greater portion of the annuity of such employee or Member so used.

"(2)(A) An election under subparagraph (A) or (B) of paragraph (1) shall not be considered effective unless—

"(i) the spouse of the employee or Member is provided advance notice of the election in accordance with such regulations as the Office shall prescribe; and

"(ii) the amount specified in subparagraph (B) of this paragraph is deposited into the Fund before the expiration of the applicable 18-month period under paragraph (1).

"(B) The amount to be deposited with respect to an election under this subsection is an amount equal to the sum of—

"(i) the additional cost to the System which is associated with providing a survivor annuity under subsection (b)(2) of this section and results from such election taking into account (I) the difference (for the period between the date on which the annuity of the participant or former participant commences and the date of the election) between the amount paid to such participant or former participant under this subchapter and the amount which would have been paid if such election had been made at the time the participant or former participant applied for the annuity, and (II) the costs associated with providing for the later election; and

"(ii) interest on the additional cost determined under clause (i) of this subparagraph computed using the average annual interest rate earned during such period by securities held by the Fund.

"(3) An election by an employee or Member under this subsection voids prospectively any election previously made in the case of such employee or Member under subsection (j).

"(4) An annuity which is reduced in connection with an election under this subsection shall be reduced by the same percentage reductions as were in effect at the time of the retirement of the employee or Member whose annuity is so reduced.

"(5) Rights and obligations resulting from the election of a reduced annuity under this subsection shall be the same as the rights and obligations which would have resulted had the employee or Member involved elected such annuity at the time of retiring.

"(6) The Office shall, on an annual basis, inform each employee and Member of the right of election under this subsection, including the procedure and deadlines applicable in making any such election.".

(b)(1) Notwithstanding section 404 of this Act, the amendment made by subsection (a) shall take effect 3 months after the date of the enactment of this Act.

(2)(A) Subject to subparagraph (B), the amendment made by subsection (a) shall apply with respect to employees and Members retiring before, on, or after such amendment first takes effect.

(B) For purposes of applying the provisions of paragraph (1) of section 8339(c) of title 5, United States Code (as added by this Act) to employees and Members retiring before the date on which the amendment made by subsection (a) first takes effect—

(i) the period referred to in subparagraph (A) or (B) of such paragraph (as the case may be) shall be considered to being on the date as of which such amendment first becomes effective; and

(ii) the amount referred to in paragraph (2) of such section 8339(o) shall be computed without regard to the provisions of subparagraph (B)(ii) of such paragraph, relating to interest.

(3) For purposes of this subsection, the terms "employee" and "Member" each has the meaning given that term in sections 8331(1) and 8331(2) of title 5, United States Code, respectively.

RETIREMENT COUNSELING

SEC. 311. (a)(1) Subchapter III of chapter 83 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 8349. Retirement counseling

"(a) For the purposes of this section, the term 'retirement counselor', when used with respect to an agency, means an employee of the agency who is designated by the head of the agency to furnish information on benefits under this subchapter and chapter 84 of this title and counseling services relating to such benefits to other employees of the agency.

"(b) The Director of the Office of Personnel Management shall—

"(1) establish a training program for all retirement counselors of agencies of the Federal Government; and

"(2) designate and publicize a telephone number at the Office which annuitants under this subchapter or chapter 84 of this title may call to obtain answers to questions relating to retirement benefits under this subchapter or such chapter and which is to be used exclusively for such purpose.

"(c)(1) The training program established under subsection (b)(1) of this section shall provide for comprehensive training in the provisions and administration of this subchapter and chapter 84 of this title, shall be designed to promote fully informed retirement decisions by employees and Members under this subchapter and participants under chapter 84 of this title, and shall be revised as necessary to assure that the information furnished to retirement counselors of agencies under the program is current.

"(2) The Director shall conduct a training session under the training program once each quarter-year.

"(3) Once each year, each retirement counselor of an agency shall successfully complete a training session conducted under the training program.

"(c) The Director shall assign the responsibility of receiving and responding to calls made to the telephone number designated under subsection (b)(2) of this section to a sufficient number of employees who are knowledgeable about the provisions and administration of this subchapter and chapter 84 of this title to assure that prompt and effective assistance is furnished to annuitants.".

(2) The chapter analysis at the beginning of such chapter is amended by inserting after the item relating to section 8348 the following new item: "8349. Retirement counseling.".

(b) Notwithstanding section 404 of this Act, the amendments made by subsection (a) shall take effect on the date of enactment of this Act.

Mr. TRIBLE. Mr. President, the amendment that I am offering today along with my colleague from Virginia, Senator WARNER, ensures that Federal retirees are provided with an adequate opportunity to elect a survivor annuity under this new civil service retirement plan.

As many of my colleagues know, under the existing civil service retirement law, Federal employees must make a decision regarding survivor benefits prior to retirement. If a retiree does not elect survivor benefits for his or her spouse at that time, that decision is irrevocable.

Unfortunately, far too many Federal employees make a decision regarding survivor benefits based upon incorrect or incomplete information and advice provided by the employee's personnel retirement counselor. The result is that, despite the retiree's wishes, some survivors are left unprotected and without any source of income upon the death of their spouse.

My amendment will ensure that this unfortunate situation does not arise under the new retirement program. The amendment would provide Federal retirees who have not already elected survivor benefits, with a second chance.

Federal retirees who have not chosen a survivor annuity will be given 18 months after retirement to change their decision. If a Federal retiree opts for survivor benefits during this time, he or she will be required to make all necessary deposits to the retirement fund in order to cover this selection.

In addition, this amendment will ensure that agency retirement counselors provide Federal employees with accurate information and advice regarding survivor benefit decisions. Counselors will be required to complete a training program on the changes in civil service retirement law. This training program will be annual and will enable retirement counselors to gain the understanding of retirement law essential to counsel future retirees.

Mr. President, the legislation now before us creates a new retirement and disability plan for Federal employees. Federal employees covered by this new system must have accurate information in order to make critical decisions affecting the financial security of their spouses. And, I believe that retirees under this new system should have a second opportunity after retirement to elect survivor benefits if they did not make this designation prior to retirement.

I commend my colleagues, Senator ROTH and Senator STEVENS, for their leadership on this important retirement legislation. And, I also want to acknowledge the contributions made by Senators EAGLETON and GORE in developing legislation which has broad bipartisan support.

Mr. President, I believe that my amendment adds an important element to the legislation developed by these distinguished colleagues and I urge all of my colleagues to support this amendment.

Mr. WARNER. Mr. President, I commend my distinguished Virginia colleague, Mr. TRIBLE, for having initiated this important amendment.

Civil service survivor benefits are an essential means of support for thousands of surviving spouses, and an 18-month period for determining the provision of the benefit is certainly justifiable.

I believe in many cases, Federal employees upon reaching retirement would greatly appreciate an extended timeframe for making the survivor benefit designation.

With the greatly reduced level of compensation available through a retirement annuity, it is already difficult for Federal retirees to revise their lifestyles and household budgets.

You might say that this is a "good housekeeping" amendment, giving new Federal retirees an appropriate period of time in which to examine retirement and long-term spousal income needs and to reach what would hopefully be a joint decision, fully understood and thought out by the retiree and his or her spouse.

The preretirement counseling services provided in the bill would further enhance current services and assist in the overall survivor benefit designation.

I express my strong appreciation to Senators STEVENS and ROTH for their support of the amendment.

I am hopeful that all of our colleagues will give us their unanimous consent.

Mr. TRIBLE. Mr. President, I simply add that this amendment has been drafted with the help of the majority and minority leaders of this legislation and their staffs, and I appreciate their help.

It is my understanding that it will be agreed upon by both sides.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, I think the Trible amendment is an excellent amendment.

Mr. STEVENS. Mr. President, the Trible amendment, giving a second election to choose survivor benefits within 18 months after retirement, is a good idea. The retiree must redeposit funds to pay for the benefit.

We are prepared to accept that amendment.

Mr. EAGLETON. Mr. President, I yield back the remainder of my time.

Mr. STEVENS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. STEVENS. All time is yielded back.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Virginia.

The amendment (No. 985) was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CHILES. Mr. President, I rise to indicate my support for this bill which creates a new supplemental pension plan for those Federal workers covered under Social Security. This plan was promised to new Federal workers at the time we brought such employees under the Social Security system and I am glad that we are finally on the road toward delivering on that commitment.

I want to congratulate Senators STEVENS, EAGLETON, ROTH, and GORE and all the other Senators on the Governmental Affairs Committee on the successful completion of this very complicated bill. The amount of work that went into its creation was monumental and they deserve an enormous amount of credit for their efforts.

I think that this plan accomplishes the objective of providing adequate and fair retirement, disability, and survivors benefits for Federal workers. Such benefits should be helpful in attracting and maintaining workers in the Federal work force. At the same time, the bill keeps the cost of this new system within reasonable bounds.

The bill provides for the worker to choose between two options for his retirement, survivor, and disability benefits. I am very pleased that one of these options provides for full cost-of-living increases for all retirement benefits after the age of 62 and for all disability and survivor benefits at any age. Once a worker has reached a normal age for retirement, it makes little sense to provide for a benefit which will erode over time as a result of inflation. There is little justification for providing that a person has a lower standard of living at age 80 than at an earlier age. Similarly, the benefits received by disabled workers or by survivors of workers should not be allowed to erode over time either.

Under the reported bill, the worker must choose the plan he wants within a short period of time after he begins employment; this choice is then irrevocable. There are compromises which will be made in conference with the House. I hope that the conference will consider the possibility of having one option in the final plan which includes the full cost-of-living protection described above.

Both options in the new plan contain three tiers: Social Security, a "defined-benefit" pension plan, and a thrift plan to which employees can make voluntary contributions. I think this three-tiered approach is a solid one and provides an appropriate degree of balance. I look forward to the successful completion of the entire supplemental pension plan this year.

Mr. MATHIAS. Mr. President, I support S. 1527, legislation to establish a retirement system for postal and Federal employees hired beginning January 1, 1984. This bill represents the best efforts of the Governmental Affairs Committee and I am proud to be a cosponsor. I would also like to extend special recognition to my distinguished colleagues—Senators ROTH, EAGLETON, and STEVENS—for their leadership in this endeavor. Their perseverence and dedication are the reason we can stand here today to discuss S. 1527.

As my colleagues are already well aware, the committee opted for a three-tier approach to the new retirement system. Social Security provides the basic benefit, which will be supplemented by a defined benefit portion—paid for by the Government—and a thrift plan which is a combination of employee and employer contributions. Under this three-tier scheme, employees will be able to choose between two options. One option A is geared to employees who want to take advantage of the flexible, more portable thrift plan. The other option B is weighted more toward the defined benefit plan, which will be attractive to employees seeking security and stronger inflation protection with respect to cost-of-living adjustments [COLA's]. In addition, the disability, survivor and life insurance benefits offered under S. 1527 are more generous than those provided in the present retirement system.

As the committee worked on developing the new retirement system, it had to keep several competing goals in mind. One of the most important considerations was to make sure that retirees under the present system and future retirees under the proposed system receive comparable retirement benefits. Indeed, it would be difficult to justify disparate treatment in this area when one considers the value of retirement in recruiting and retaining qualified employees in Government service. The present retirement system is a generous one and it serves as an enticement to prospective employees who recognize the limitations of Federal pay. It keeps the Federal Government in the running when it competes with the private sector for the talented and experienced people our Government needs to properly serve the American people. It is important, then, that the new retirement system retain this same quality.

Another very important consideration in creating a new system was ensuring that we keep our promise to current employees and retirees that there will be no tampering with their retirement benefits. It is my intent that present benefits not be affected by S. 1527, and I am certain that this is the intent of the entire Governmental Affairs Committee.

Naturally, in any undertaking of this magnitude, cost is a significant factor. With budget deficits and taxpayer burdens much in everyone's mind, there was great pressure on the committee to devise a system that will be less costly to the Government than the existing system. Thus, arguments to have Federal pensions achieve greater parity with less costly private sector pensions gathered more credence; and we spent a great deal of time applying private pension ideas to the new pension system for Federal employees. Our work was done in the hope of creating a viable, cost-effective pension system for the future. And it was a further hope that the yearly attacks on the present civil service retirement system—attacks made in the name of erasing benefit differences between Federal and private pensions and saving the taxpayers' money—would abate if the new pension plan moved closer to private sector practice.

S. 1527 does a good job balancing the rival objectives of cost containment and providing a workable pension plan. The new plan offers employees more choices, greater flexibility and, in some cases, better benefits. At the same time it saves the Government money, which will help reduce the deficit. Clearly, the legislation is not perfect. I would be the first to offer that there is room for improvement. But I am confident that a conference with the House will iron out the kinks and resolve areas of disagreement.

Mr. President, the basic tenets underlying the Senate's work on S. 1527 are sound, and as long as they continue to guide our deliberations on this matter, there is every reason to believe that we will create a retirement system that is good, viable, and less costly than the present one. I urge the Senate to join the Governmental Affairs Committee in giving this bill its resounding approval and in moving the Federal pension system into the future.

Mr. GLENN. Mr. President, I am pleased to be a cosponsor of S. 1527, the Federal Retirement Reform Act of 1985, and to urge its adoption by the Senate.

This legislation establishes a civil service pension program for new Federal employees hired after December 31, 1983, who were brought under Social Security as part of the Social Security Amendments of 1983. The pension legislation designed by the Governmental Affairs Committee supplements this Social Security coverage and provides Federal retirees with a retirement plan which is comparable to good private sector retirement plans.

I have always been supportive of legislation to strengthen the retirement system of civil service employees. I believe the Federal Government has a responsibility to provide an adequate and fair pension program for its employees, and one that helps recruit and maintain an excellent and skilled work force. The plan proposed today provides retirement benefit protection that meets the needs of both long-term career service employees and short-term Government employees. For some workers, including women and short-term employees, this plan offers more comprehensive protection than the current civil service retirement system.

This legislation is necessary because new Federal employees do not know what retirement protection they will receive when they are hired by the Government. During debate on the Social Security Amendments in 1983, I cosponsored an amendment by Senator LONG to delay Social Security coverage of new Federal employees until a supplemental pension plan was enacted. I felt it was unfair to include new Federal employees under Social Security without spelling out in advance how their pension benefits would be provided. Unfortunately, that amendment was defeated, and Social Security coverage took effect on January 1, 1984. Interim legislation was enacted to provide some disability and survivor coverage for new Federal employees until a supplemental pension program was enacted. This interim legislation expires December 31 of this year, and I am pleased that we will meet that deadline.

The retirement program proposed today includes three tiers. The first tier is Social Security coverage. Advantages of Social Security include full indexing of benefits to inflation and portability of coverage from job to job. The second tier is a Government-paid defined benefit pension plan designed as an "add-on" to Social Security. The third tier is a thrift plan that provides employees with a tax-deferred savings plan similar to that provided by section 401(k) of the Tax Code. As part of a compromise necessary in order to reach agreement on this legislation, new employees will have the choice between two options that provide different features for the defined benefit and thrift savings plan. Under option B, the employee may choose to supplement the Government contribution to the defined benefit portion in order to be eligible for early retirement, and improved inflation protection. Under the thrift savings plan, employees under option A could contribute up to 10 percent of their pay, and the Government would match this contribution dollar for dollar up to 5 percent. Employees under option B could also contribute up to 10 percent of pay, but the Government match would be lower in order to pay for the bigger defined benefit.

Mr. President, this is not a perfect bill, and I will work for improvements in it before final passage. I am concerned about the level of inflation protection provided to retirees under this legislation. We should ensure that retirees are able to maintain their standard of living through their retirement years, especially as they get older and may have greater medical and other living expenses. I also have serious reservations about the "option" provision, and consider it unworkable administratively. The option plan would force new employees to make a one-time irrevocable choice on their retirement plan. It would be difficult if not impossible for employees to make an informed decision on such a complicated matter. However, I understand that this option proposal was necessary in order to reach agreement on the bill, and I look forward to improving the option plan and other provisions during the conference committee with the House.

I would like to emphasize that this legislation in no way affects the benefits for employees under the old civil service retirement system. The good faith and credit of the U.S. Government stands behind the civil service retirement program. We must continue to protect the earned retirement benefits for those who have in good faith placed their trust in the Federal Government.

The legislation we consider today will provide new Federal employees with a fair and adequate retirement benefits plan. It will assist in building and keeping a quality career work force in the Federal Government. It will enhance portability of retirement credits for employees moving between Government service and private sector employment. The legislation will also encourage Federal employees to increase their personal savings for retirement. I am pleased to be a cosponsor of S. 1527, and I urge its passage by the Senate.

Mr. CRANSTON. Mr. President, I wish to speak in support of the bill, S. 1527, the Federal Retirement Reform Act of 1985, which establishes a supplemental retirement plan for Federal and postal new hires.

I first want to commend my colleagues on the Governmental Affairs Committee for doing an outstanding job with an extremely complex and sensitive issue. Theirs has not been an easy task. Many competing interests are involved. And it is to the committee's credit that the job has been accomplished as well as it has been.

In particular, we owe a special debt of recognition to our colleague from Alaska, TED STEVENS. He has been at work on this matter since 1981 and during the years has had to accommodate a range of concerns of groups representing employees, retirees, and others. Also, during those years, the 28 member organizations of the fund for assuring an independent retirement have been actively involved in the development of a supplemental retirement program, including active consultation of legislative details and full participation in all discussion, forums, and public hearings.

The final product approved by the committee does not meet the test of perfect comparability with the present civil service system. But given the constraints, few expected the committee's work to attain that goal. It does, however, represent a sincerely sought after compromise on very difficult issues that was achieved through the hard work and tireless commitment of Senators STEVENS, ROTH, EAGLETON, and GORE.

That this bill is on the floor of the Senate moving without controversy toward enactment is, indeed, itself the best tribute to the fine work of the Committee on Governmental Affairs.

I would like to detail my caveats, however.

We cannot compromise on fairness and equity between employees hired before 1984 and those after.

We cannot compromise on the promise of equal inflation protection for all of our Nation's elderly.

We cannot compromise on a dignified and liveable retirement income for career employees who perform the Nation's services.

We cannot compromise the security of those currently or soon to be retired.

The bill before us does not completely meet those criteria.

It fails to provide full inflation protection for the defined benefit supplement that is equal to that given to Social Security recipients. By not requiring a mandatory employee contribution to the defined benefit supplement, the bill breaks the traditional bond between workers who have a financial stake in their retirement and retirees who rely on the system for their financial security. It does not recognize career progression through an accrual formula based on the highest level of achievement.

However, Mr. President, it does represent genuine progress. I urge all my colleagues, especially those who will

serve as conferees, to keep the above principles in mind to seek to correct the shortcomings in the legislation before us.

RECOGNITION OF MICHAEL MC DERMOTT PLACE

Mr. BRADLEY. Mr. President, I am pleased today to note that with the passage of H.R. 2672, a portion of the road leading to the redesignated New Jersey International and Bulk Mail Center will be dedicated as "Michael McDermott Place," In 1981, I introduced legislation to commemorate this young postal worker who died in a conveyor belt accident at the postal center during the 1979 holiday season. Safety devices that should have averted this tragedy were not in place due to the rush of holiday mail. The dedication of Michael McDermott Place will serve a dual purpose: It will remind us of the public service and sacrifice of this one individual. It will also remind us of the need to constantly monitor workplace safety. Naming this street in honor of Michael McDermott cannot erase the tragedy of several years ago. It may help to increase our vigilance so that other postal employees are spared such accidents as they strive to serve the public.

Mr. STEVENS. Mr. President, it is my understanding we have now completed the list of amendments that were in order under the time agreement.

Pursuant to that agreement I ask for a third reading.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Do Senators managing the bill yield back their time?

Mr. STEVENS. Mr. President, I yield back my time.

Mr. EAGLETON. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House bill 2672 to redesignate the New Jersey International and Bulk Mail Center.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 2672) to redesignate the New York International and Bulk Mail Center in Jersey City, New Jersey, as the "New Jersey International and Bulk Mail Center", and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, New Jersey, as "Michael McDermott Place".

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Governmental Affairs, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REDESIGNATION OF BUILDING.

(a) REDESIGNATION.—The New York [International and Bulk] *Bulk and Foreign* Mail Center in Jersey City, New Jersey, shall hereafter be known and designated as the "New Jersey International and Bulk Mail Center". Any reference to such building in any law, map, regulation, document, record, or other paper of the United States shall be considered to be a reference to the New Jersey International and Bulk Mail Center.

(b) EFFECTIVE DATE.—This section shall take effect 6 months after the date of the enactment of this Act.

SEC. 2. DEDICATION OF MICHAEL McDERMOTT PLACE.

(a) ERECTION OF SIGN.—The United States Postal Service shall erect a suitable sign bearing the inscription "Michael McDermott Place", anywhere on its property adjacent to the street and parking area located immediately to the east of the New York [International and Bulk] *Bulk and Foreign* Mail Center building in Jersey City, New Jersey, so as to dedicate such portion of such street in memory of former postal employee Michael McDermott.

(b) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this Act.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments en bloc.

The committee amendments were agreed to en bloc.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the committee amendments were agreed to.

Mr. EAGLETON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that this bill now be amended to insert the complete text of S. 1527, as amended, and that it be advanced to third reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, pursuant to the unanimous-consent agreement following adoption of those two amendments, the Senate should now proceed to third reading and final passage of H.R. 2672 without any intervening action.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. STEVENS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania. [Mr. HEINZ] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from West Virginia [Mr. ROCKEFELLER] is necessarily absent. I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

I further announce that, if present and voting, the Senator from West Virginia [Mr. ROCKEFELLER] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

So the result was announced—yeas 96, nays 1, as follows:

[Rollcall Vote No. 289 Leg.]

YEAS—96

Abdnor	Garn	McConnell

NOT VOTING—3

Heinz	Rockefeller	Zorinsky

So the bill (H.R. 2672), as amended, was passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. GORE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask for immediate consideration of the

amendment to the title which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

Amend the title so as to read: "An Act to redesignate the New York Bulk and Foreign Mail Center in Jersey City, New Jersey, as the 'New Jersey International and Bulk Mail Center', and to honor the memory of a former postal employee by dedicating a portion of a street at the New York Bulk and Foreign Mail Center in Jersey City, New Jersey, as 'Michael McDermott Place'.".

The amendment was agreed to.

Mr. STEVENS. I move to reconsider the vote.

Mr. GORE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that S. 1527 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I thank the distinguished managers of the bill, Senator STEVENS and Senator GORE, for their expeditious handling of this matter. We are grateful to them and to all Senators who agreed to the overall time agreement on bills and on specific amendments. It has made it possible to dispose of two major pieces of legislation so far today, the military construction bill and the Federal Retirement Act of 1985.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, we are now hoping we can move to Calendar No. 284, H.R. 2867, the D.C. appropriations bill. I shall make that request in just a moment.

There is some discussion about certain amendments that may be offered. I am advised by the chairman of that subcommittee that this bill would not consume a lot of time. There will be one or maybe two amendments that could take maybe a total of an hour.

If we could conclude action on this bill, the only remaining item—I think there are a couple of conference reports and then, hopefully, some agreement on reconciliation, the textile bill, which we have been discussing with a number of Senators, particularly Senators DOMENICI and CHILES, HOLLINGS, EVANS, THURMOND, and HELMS on the textile question.

Mr. METZENBAUM. Mr. President, would the majority leader yield for a question?

Mr. DOLE. Yes; I yield.

Mr. METZENBAUM. The majority leader understands what are the facts concerning the D.C. bill. There is no objection to the D.C. bill as it comes to the floor. It contains some antiabortion language as provided in the present law. There are indications that certain Members of this body, acting within their rights, intend to offer certain amendments having to do with the subject of abortion. The majority leader knows that I stood on this floor just a week or two ago and indicated that I thought this body had dealt with that subject long enough and often enough and that there is no need to go farther than the present law on the subject.

As I understand the majority leader and the contemplated scenario, there would be a motion to table the abortion amendments if offered and if those tabling motions do not succeed, we would then not be faced with the prospect of a long, drawn-out debate in connection with the D.C. appropriations bill.

Is the Senator from Ohio correct?

Mr. DOLE. Mr. President, the Senator from Ohio is correct. I have made it clear to the distinguished chairman of the Appropriations Committee, Mr. HATFIELD, and also the chairman of the D.C. Appropriations Subcommittee, Mr. SPECTER, that I know the issue and I know it is a very controversial, very sensitive issue. I did indicate to the chairman of the Appropriations Committee that we would bring up the bill. Depending on the outcome of the abortion language, if I am confronted or we are confronted with extensive debate, the bill comes down.

Mr. METZENBAUM. I thank the majority leader. I shall have no objection to the motion to proceed.

Mr. WEICKER. Mr. President, I have no problems with the motion to proceed. I think that I would also like an assurance that immediately upon the conclusion of the Helms amendment, if indeed there is to be a Helms amendment or a Helms motion to table, the leader would immediately put in a quorum call.

Mr. DOLE. I believe we would do that. I understand there may be an additional amendment depending on the outcome of the Helms amendment. At that point, I would be on the floor and would suggest the absence of a quorum at that time.

DISTRICT OF COLUMBIA APPROPRIATIONS, 1986

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to Calendar No. 204, H.R. 3067, the D.C. appropriations bill.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 3067) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes.

Without objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

H.R. 3067

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the District of Columbia for the fiscal year ending September 30, 1986, and for other purposes, namely:

TITLE I

FISCAL YEAR 1986 APPROPRIATIONS

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

For payment to the District of Columbia for the fiscal year ending September 30, 1986, $425,000,000, as authorized by the District of Columbia Self-Government and Governmental Reorganization Act, Public Law 93-198, as amended (D.C. Code, sec. 47-3406): *Provided,* That none of these funds shall be made available to the District of Columbia until the number of full-time uniformed officers in permanent positions in the Metropolitan Police Department is at least 3,880, excluding any such officer appointed after August 19, 1982, under qualification standards other than those in effect on such date.

For payment to the District of Columbia for the fiscal year ending September 30, 1986, in lieu of reimbursement for charges for water and water services and sanitary sewer services furnished to facilities of the United States Government, $30,100,000, as authorized by the Act of May 18, 1954, as amended (D.C. Code, secs. 43-1552 and 43-1612).

For the Federal contribution to the Police Officers and Fire Fighters', Teachers' and Judges' Retirement Funds as authorized by the District of Columbia Retirement Reform Act, approved November 17, 1979 (93 Stat. 866; Public Law 96-122), $52,070,000.

TRANSITIONAL PAYMENT FOR SAINT ELIZABETHS HOSPITAL

For a Federal contribution to the District of Columbia, as authorized by the Saint Elizabeths Hospital and District of Columbia Mental Health Services Act, approved November 8, 1984 (98 Stat. 3369; Public Law 98-621), $25,000,000.

CRIMINAL JUSTICE INITIATIVE

For a Federal contribution to the District of Columbia, $17,200,000, of which $10,000,000 shall be for the design and construction of a prison facility within the District of Columbia and shall remain available until expended, together with $20,000,000 which shall become available on October 1, 1986, and shall remain available until expended.

JOB TRAINING INITIATIVE

For a Federal contribution to the District of Columbia, $500,000.

DIVISION OF EXPENSES

The following amounts are appropriated for the District of Columbia for the current fiscal year out of the general fund of the District of Columbia, except as otherwise specifically provided.

GOVERNMENTAL DIRECTION AND SUPPORT

Governmental direction and support, $99,342,000: *Provided,* That not to exceed $2,500 for the Mayor, $2,500 for the Chair-

man of the Council of the District of Columbia, and $2,500 for the City Administrator shall be available from this appropriation for expenditures for official purposes: *Provided further,* That any program fees collected from the issuance of debt shall be available for the payment of expenses of the debt management program of the District of Columbia: *Provided further,* That not less than $320,000 shall be used by the Office of Personnel exclusively for the administration of programs for the training of District of Columbia government employees: *Provided further,* That notwithstanding any other provision of law, there is hereby appropriated $3,480,000 to pay legal, management, investment, and other fees and administrative expenses of the District of Columbia Retirement Board, of which $700,000 shall be derived from the general fund and not to exceed $2,780,000 shall be derived from the earnings of the applicable retirement funds: *Provided further,* That the District of Columbia Retirement Board shall provide to the Congress and the Council of the District of Columbia a quarterly report of the allocations of charges by fund and of expenditures of all funds: *Provided further,* That the District of Columbia Retirement Board shall provide the Mayor for transmittal to the Council of the District of Columbia an item accounting of the planned use of appropriated funds in time for each annual budget submission and the actual use of such funds in time for each annual audited financial report: *Provided further,* That of the $100,000 appropriated for fiscal year 1986 for Admission to Statehood, $50,000 shall be for the Statehood Commission and $50,000 shall be for the Statehood Compact Commission.

ECONOMIC DEVELOPMENT AND REGULATION

Economic development and regulation, [$99,525,000] *$100,035,000*: *Provided,* That the District of Columbia Housing Finance Agency, established by section 201 of the District of Columbia Housing Finance Agency Act, effective March 3, 1979 (D.C. Law 2-135; D.C. Code, sec. 45-2111), based upon its capability of repayments as determined each year by the Council of the District of Columbia from the Agency's annual audited financial statements to the Council of the District of Columbia, shall repay to the general fund an amount equal to the appropriated administrative costs plus interest at a rate of four percent per annum for a term of 15 years, with a deferral of payments for the first three years: *Provided further,* That notwithstanding the foregoing provision, the obligation to repay all or part of the amounts due shall be subject to the rights of the holders of any bonds or notes issued by the Agency and shall be repaid to the District of Columbia only from available operating revenues of the Agency that are in excess of the amounts required for debt service, reserve funds, and operating expenses: *Provided further,* That upon commencement of the debt service payments, such payments shall be deposited into the general fund of the District of Columbia: *Provided further,* That the Director of the Department of Housing and Community Development shall report every six months to the Council of the District of Columbia on collections of rent from public housing stock.

PUBLIC SAFETY AND JUSTICE

Public safety and justice, including purchase of not to exceed 135 passenger-carrying vehicles for replacement only (including 130 for police-type use and five for fire-type use) and four additional passenger-carrying vehicles for fire-type use without regard to the general purchase price limitation for the current fiscal year, [$535,416,000] *$552,106,000*, of which $3,339,000 shall be payable from the revenue sharing trust fund: *Provided,* That the Metropolitan Police Department is authorized to replace not to exceed 25 passenger-carrying vehicles, and the Fire Department is authorized to replace not to exceed five passenger-carrying vehicles, annually whenever the cost of repair to any damaged vehicle exceeds three-fourths of the cost of the replacement: *Provided further,* That not to exceed [$320,000] *$500,000* shall be available from this appropriation for the Chief of Police for the prevention and detection of crime: *Provided further,* That notwithstanding any other provisions of law, in the case of each employee who retired from the Fire Department of the District of Columbia before February 15, 1980, and who is receiving on the date of the enactment of this Act an annuity based on service in the Fire Department, the District of Columbia Retirement Board shall cause to be paid not later than September 30, 1985, to each such employee a lump-sum payment equal to three percent of his or her annuity: *Provided further,* That funds appropriated for expenses under the District of Columbia Criminal Justice Act, approved September 3, 1974 (88 Stat. 1090; Public Law 93-412; D.C. Code, sec. 11-2601 et seq.), for the fiscal year ending September 30, 1986, shall be available for obligations incurred under that Act in each fiscal year since inception in fiscal year 1975: *Provided further,* That funds appropriated for expenses under the District of Columbia Neglect Representation Equity Act of 1984, effective March 13, 1985 (D.C. Law 5-129; D.C. Code, sec. 16-2304), for the fiscal year ending September 30, 1986, shall be available for obligations incurred under that Act in each fiscal year since inception in fiscal year 1985: *Provided further,* That $50,000 of any appropriation available to the District of Columbia may be used to match financial contributions from the Department of Defense to the District of Columbia Office of Emergency Preparedness for the purchase of civil defense equipment and supplies approved by the Department of Defense, when authorized by the Mayor: *Provided further,* That not to exceed $1,500 for the Chief Judge of the District of Columbia Court of Appeals, $1,500 for the Chief Judge of the Superior Court of the District of Columbia, and $1,500 for the Executive Officer of the District of Columbia Courts shall be available from this appropriation for official purposes: *Provided further,* That D.C. Code, sec. 11-1732(d), is amended by striking out "1985" and inserting in lieu thereof ["1986"] *"1987"*.

PUBLIC EDUCATION SYSTEM

Public education system, including the development of national defense education programs, [$515,005,000] *$515,505,000*, of which $6,000,000 shall be payable from the revenue sharing trust fund, to be allocated as follows: [$359,500,000] *$360,000,000* for the public schools of the District of Columbia; $70,905,000 for the District of Columbia Teachers' Retirement Fund; $67,715,000 for the University of the District of Columbia; $15,002,000 for the Public Library; $1,673,000 for the Commission on the Arts and Humanities; and $210,000 for the Educational Institution Licensure Commission: *Provided,* That the public schools of the District of Columbia are authorized to accept not to exceed 31 motor vehicles for exclusive use in the driver education program: *Provided further,* That not to exceed $2,500 for the Superintendent of Schools, $2,500 for the President of the University of the District of Columbia, and $2,000 for the Public Librarian shall be available from this appropriation for expenditures for official purposes: *Provided further,* That this appropriation shall not be available to subsidize the education of nonresidents of the District of Columbia at the University of the District of Columbia, unless the Board of Trustees of the University of the District of Columbia adopts, for the fiscal year ending September 30, 1986, a tuition rate schedule which will establish the tuition rate for nonresident students at a level no lower than the nonresident tuition rate charged at comparable public institutions of higher education in the metropolitan area.

HUMAN SUPPORT SERVICES

Human support services, $614,347,000, of which $5,857,000 shall be payable from the revenue sharing trust fund: *Provided,* That the inpatient rate (excluding the proportionate share for repairs and construction) for services rendered by Saint Elizabeths Hospital for patient care shall be at the per diem rate established pursuant to section 2 of an Act to authorize certain expenditures from the appropriation of Saint Elizabeths Hospital, and for other purposes, approved August 4, 1947 (61 Stat. 751; Public Law 80-353; 24 U.S.C. 168(a)): *Provided further,* That total funds paid by the District of Columbia as reimbursements for operating costs of Saint Elizabeths Hospital, including any District of Columbia payments (but excluding the Federal matching share of payments) associated with title XIX of the Social Security Act, approved July 30, 1965 (79 Stat. 343; Public Law 89-97; 42 U.S.C. 1396 et seq.), shall not exceed $62,970,000: *Provided further,* That $11,000,000 of this appropriation, to remain available until expended, shall be available solely for District of Columbia employees' disability compensation.

PUBLIC WORKS

Public works, including rental of one passenger-carrying vehicle for use by the Mayor and three passenger-carrying vehicles for use by the Council of the District of Columbia and purchase of passenger-carrying vehicles for replacement only, $193,741,000, of which $2,500,000 shall be payable from the revenue sharing trust fund and not to exceed $4,000,000 shall be available for the School Transit Subsidy: *Provided,* That this appropriation shall not be available for collecting ashes or miscellaneous refuse from hotels and places of business or from apartment houses with four or more apartments, or from any building or connected group of buildings operating as a rooming or boarding house as defined in the housing regulations of the District of Columbia.

WASHINGTON CONVENTION CENTER FUND

For the Washington Convention Center Fund, $8,371,000: *Provided,* That the Convention Center Board of Directors, established by section 3 of the Washington Convention Center Management Act of 1979, effective November 3, 1979 (D.C. Law 3-36; D.C. Code, sec. 9-602), shall reimburse the Auditor of the District of Columbia for all reasonable costs for performance of the annual convention center audit.

REPAYMENT OF LOANS AND INTEREST

For reimbursement to the United States of funds loaned in compliance with an Act

to provide for the establishment of a modern, adequate, and efficient hospital center in the District of Columbia, approved August 7, 1946 (60 Stat. 896; Public Law 79-648); the Departments of Labor, and Health, Education and Welfare Appropriation Act of 1955, approved July 2, 1954 (68 Stat. 443; Public Law 83-472); section 1 of an Act to authorize the Commissioners of the District of Columbia to borrow funds for capital improvement programs and to amend provisions of law relating to Federal Government participation in meeting costs of maintaining the Nation's Capital City, approved June 6, 1958 (72 Stat. 183; Public Law 85-451; D.C. Code, sec. 9-219); section 4 of an Act to authorize the Commissioners of the District of Columbia to plan, construct, operate, and maintain a sanitary sewer to connect the Dulles International Airport with the District of Columbia system, approved June 12, 1960 (74 Stat. 211; Public Law 86-515); and section 723 of the District of Columbia Self-Government and Governmental Reorganization Act, approved December 24, 1973 (87 Stat. 821; Public Law 93-198; D.C. Code, sec. 47-321, note); and section 743(f) of the District of Columbia Self-Government and Governmental Reorganization Act, approved October 13, 1977 (91 Stat. 1156; Public Law 95-131; D.C. Code, sec. 9-219, note), including interest as required thereby, $198,409,000.

REPAYMENT OF GENERAL FUND DEFICIT

For the purpose of eliminating the cash portion of the $269,860,000 general fund accumulated deficit as of September 30, 1984, [$20,000,000, of which not less than $15,000,000 shall be funded and apportioned by the Mayor from amounts otherwise available to the District of Columbia government (including amounts appropriated by this Act or revenues otherwise available, or both] *$5,000,000.*)

SHORT-TERM BORROWINGS

For the purpose of funding interest related to borrowing funds for short-term cash needs, $3,750,000.

CAPITAL OUTLAY

For construction projects, $229,148,000, as authorized by an Act authorizing the laying of water mains and service sewers in the District of Columbia, the levying of assessments therefor, and for other purposes, approved April 22, 1904 (33 Stat. 244; Public Law 58-140; D.C. Code, secs. 43-1512 to 43-1519); the District of Columbia Public Works Act of 1954, approved May 18, 1954 (68 Stat. 101; Public Law 83-364); an Act to authorize the Commissioners of the District of Columbia to borrow funds for capital improvement programs and to amend provisions of law relating to Federal Government participation in meeting costs of maintaining the Nation's Capital City, approved June 6, 1958 (72 Stat. 183; Public Law 85-451; D.C. Code, secs. 9-219 and 47-3402); section 3(g) of the District of Columbia Motor Vehicle Parking Facility Act of 1942, approved August 20, 1958 (72 Stat. 686; Public Law 85-692; D.C. Code, sec. 40-805(7)); and the National Capital Transportation Act of 1969, approved December 9, 1969 (83 Stat. 320; Public Law 91-143; D.C. Code, secs. 1-2451, 1-2452, 1-2454, 1-2456, and 1-2457); including acquisition of sites, preparation of plans and specifications, conducting preliminary surveys, erection of structures, including building improvement and alteration and treatment of grounds, to remain available until expended: *Provided,* That $14,591,000 shall be available for project management and $11,239,000 for design by the Director of the Department of Public Works or by contract for architectural engineering services, as may be determined by the Mayor, and that the funds for use of each capital project implementing agency shall be managed and controlled in accordance with all procedures and limitations established under the Financial Management System: *Provided further,* That all such funds shall be available only for the specific projects and purposes intended: *Provided further,* That notwithstanding the foregoing, all authorizations for capital outlay projects, except those projects covered by the first sentence of section 23(a) of the Federal-Aid Highway Act of 1968, approved August 23, 1968 (82 Stat. 827; Public Law 90-495; D.C. Code, sec. 7-134, note), for which funds are provided by this appropriation title, shall expire on September 30, 1987, except authorizations for projects as to which funds have been obligated in whole or in part prior to September 30, 1987: *Provided further,* That upon expiration of any such project authorization the funds provided herein for the project shall lapse.

WATER AND SEWER ENTERPRISE FUND

For the Water and Sewer Enterprise Fund, $162,987,000, of which $31,065,000 shall be apportioned and payable to the debt service fund for repayment of loans and interest incurred for capital improvement projects.

For construction projects, $19,635,000, as authorized by an Act authorizing the laying of water mains and service sewers in the District of Columbia, the levying of assessments therefor, and for other purposes, approved April 22, 1904 (33 Stat. 244; D.C. Code, sec. 43-1512 et seq.): *Provided,* That the requirements and restrictions which are applicable to general fund capital improvement projects and which are set forth in this Act under the Capital Outlay appropriation title shall apply to projects approved under this appropriation title.

LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND

For the Lottery and Charitable Games Enterprise Fund established by the District of Columbia Appropriation Act for fiscal year 1982, approved December 4, 1981 (95 Stat. 1174, 1175, Public Law 97-91, as amended), for the purpose of implementing the Law to Legalize Lotteries, Daily Numbers Games, and Bingo and Raffles for Charitable Purposes in the District of Columbia, effective March 10, 1981 (D.C. Law 3-172; D.C. Code, secs. 2-2501 et seq. and 22-1516 et seq.), $4,151,000, to be derived from non-Federal District of Columbia revenues: *Provided,* That the District of Columbia shall identify the sources of funding for this appropriation title from its own locally-generated revenues: *Provided further,* That no revenues from Federal sources shall be used to support the operations or activities of the Lottery and Charitable Games Control Board.

CABLE TELEVISION ENTERPRISE FUND

For the Cable Television Enterprise Fund established by the Cable Television Communications Act of 1981, effective October 22, 1983 (D.C. Law 5-36; D.C. Code, sec. 43-1801 et seq.), $250,000.

GENERAL PROVISIONS

SEC. 101. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 102. Except as otherwise provided in this Act, all vouchers covering expenditures of appropriations contained in this Act shall be audited before payment by the designated certifying official and the vouchers as approved shall be paid by checks issued by the designated disbursing official.

SEC. 103. Whenever in this Act an amount is specified within an appropriation for particular purposes or objects of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor, except for those funds and programs for the Metropolitan Police Department under the heading "Public Safety and Justice" which shall be considered as the amounts set apart exclusively for and shall be expended solely by that Department; and the appropriation under the heading "Repayment of General Fund Deficit" which shall be considered as the amount set apart exclusively for and shall be expended solely for that purpose.

SEC. 104. Appropriations in this Act shall be available, when authorized by the Mayor, for allowances for privately owned automobiles and motorcycles used for the performance of official duties at rates established by the Mayor: *Provided,* That such rates shall not exceed the maximum prevailing rates for such vehicles as prescribed in the Federal Property Management Regulations 101-7 (Federal Travel Regulations).

SEC. 105. Appropriations in this Act shall be available for expenses of travel and for the payment of dues of organizations concerned with the work of the District of Columbia government, when authorized by the Mayor: *Provided,* That the Council of the District of Columbia and the District of Columbia Courts may expend such funds without authorization by the Mayor.

SEC. 106. Appropriations in this Act shall not be used for or in connection with the preparation, issuance, publication, or enforcement of any regulation or order of the Public Service Commission requiring the installation of meters in taxicabs, or for or in connection with the licensing of any vehicle to be operated as a taxicab except for operation in accordance with such system of uniform zones and rates and regulations applicable thereto as shall have been prescribed by the Public Service Commission.

SEC. 107. There are appropriated from the applicable funds of the District of Columbia such sums as may be necessary for making refunds and for the payment of judgments that have been entered against the District of Columbia government: *Provided,* That nothing contained in this section shall be construed as modifying or affecting the provisions of section 11(c)(3) of title XII of the District of Columbia Income and Franchise Tax Act of 1947, approved March 31, 1956 (70 Stat. 78; Public Law 84-460; D.C. Code, sec. 47-1812.11(c)(3)).

SEC. 108. Appropriations in this Act shall be available for the payment of public assistance without reference to the requirement of section 544 of the District of Columbia Public Assistance Act of 1982, effective April 6, 1982 (D.C. Law 4-101; D.C Code, sec. 3-205(b)), and for the non-Federal share of funds necessary to qualify for Federal assistance under the Juvenile Delinquency Prevention and Control Act of 1968, ap-

proved July 31, 1968 (82 Stat. 462; Public Law 90-445; 42 U.S.C. 3801 et seq.).

SEC. 109. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 110. Not to exceed 4½ per centum of the total of all funds appropriated by this Act for personal compensation may be used to pay the cost of overtime or temporary positions.

SEC. 111. Appropriations in this Act shall not be available, during the fiscal year ending September 30, 1986, for the compensation of any person appointed to a permanent position in the District of Columbia government during any month in which the number of employees exceeds [32,082] *32,511*, the number of positions authorized by this Act.

SEC. 112. No funds appropriated in this Act for the District of Columbia government for the operation of educational institutions, the compensation of personnel, or for other educational purposes may be used to permit, encourage, facilitate, or further partisan political activities. Nothing herein is intended to prohibit the availability of school buildings for the use of any community or partisan political group during non-school hours.

SEC. 113. The annual budget for the District of Columbia government for the fiscal year ending September 30, 1987, shall be transmitted to the Congress by no later than April 15, 1986.

SEC. 114. None of the funds appropriated in this Act shall be made available to pay the salary of any employee of the District of Columbia government whose name, title, grade, salary, past work experience, and salary history are not available for inspection by the House and Senate Committees on Appropriations, the House Committee on the District of Columbia, the Subcommittee on Governmental Efficiency and the District of Columbia of the Senate Committee on Governmental Affairs and the Council of the District of Columbia or their duly authorized representative.

SEC.115. There are appropriated from the applicable funds of the District of Columbia such sums as may be necessary for making payments authorized by the District of Columbia Revenue Recovery Act of 1977, effective September 23, 1977 (D.C. Law 2-20; D.C. Code, sec. 47-421 et seq.).

SEC. 116. None of the funds contained in this Act shall be made available to pay the salary of any employee of the District of Columbia government whose name and salary are not available for public inspection.

SEC. 117. No part of this appropriation shall be used for publicity or propaganda purposes or implementation of any policy including boycott designed to support or defeat legislation pending before Congress or any State legislature.

[SEC. 118. None of the funds provided in this Act shall be used to perform abortions.]

SEC. 118. None of the Federal funds provided in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported promptly to a law enforcement agency or public health service. Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

SEC. 119. At the start of the fiscal year, the Mayor shall develop an annual plan, by quarter and by project, for capital outlay borrowings: *Provided*, That within a reasonable time after the close of each quarter, the Mayor shall report to the Council of the District of Columbia and the Congress the actual borrowing and spending progress compared with projections.

SEC. 120. The Mayor shall not borrow any funds for capital projects unless he has obtained prior approval from the Council of the District of Columbia, by resolution, identifying the projects and amounts to be financed with such borrowings.

SEC. 121. The Mayor shall not expend any moneys borrowed for capital projects for the operating expenses of the District of Columbia government.

SEC. 122. None of the funds appropriated in this Act may be used for the implementation of a personnel lottery with respect to the hiring of fire fighters or police officers.

SEC. 123. None of the funds appropriated by this Act may be obligated or expended by reprogramming except pursuant to advance approval of the reprogramming granted according to the procedure set forth in the Joint Explanatory Statement of the Committee of Conference (House Report No. 96-443) which accompanied the District of Columbia Appropriation Act, 1980, approved October 30, 1979 (93 Stat. 713; Public Law 96-93), as modified in House Report No. 98-265, and in accordance with the Reprogramming Policy Act of 1980, effective September 16, 1980 (D.C. Law 3-100; D.C. Code, sec. 47-361 et seq.).

SEC. 124. None of the Federal funds provided in this Act shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of the District of Columbia.

SEC. 125. None of the Federal funds provided in this Act shall be obligated or expended to procure passenger automobiles as defined in the Automobile Fuel Efficiency Act of 1980, approved October 10, 1980 (94 Stat. 1824; Public Law 96-425; 15 U.S.C. 2001(2)), with an Environmental Protection Agency estimated miles per gallon average of less than 22 miles per gallon: *Provided*, That this section shall not apply to security, emergency rescue, or armored vehicles.

SEC. 126. (a) Notwithstanding section 422(7) of the District of Columbia Self-Government and Governmental Reorganization Act, approved December 24, 1973 (87 Stat. 790; Public Law 93-198; D.C. Code, sec. 1-242(7)), the City Administrator shall be paid, during any fiscal year, a salary at a rate established by the Mayor, not to exceed the rate established for level IV of the Executive Schedule under 5 U.S.C. 5315.

(b) For purposes of applying any provision of law limiting the availability of funds for payment of salary or pay in any fiscal year, the highest rate of pay established by the Mayor under subsection (a) for any position for any period during the last quarter of calendar year 1985 shall be deemed to be the rate of pay payable for that position for September 30, 1985.

(c) Notwithstanding section 4(a) of the District of Columbia Redevelopment Act of 1945, approved August 2, 1946 (60 Stat. 793; Public Law 79-592; D.C. Code, sec. 5-803(a)), the Board of Directors of the District of Columbia Redevelopment Land Agency shall be paid, during any fiscal year, a per diem compensation at a rate established by the Mayor.

SEC. 127. Notwithstanding any other provisions of law, the provisions of the District of Columbia Government Comprehensive Merit Personnel Act of 1978, effective March 3, 1979 (D.C. Law 2-139; D.C. Code, sec. 1-601.1 et seq.), enacted pursuant to section 422(3) of the District of Columbia Self-Government and Governmental Reorganization Act, approved December 24, 1973 (87 Stat. 790; Public Law 93-198; D.C. Code, sec. 1-242(3)), shall apply with respect to the compensation of District of Columbia employees: *Provided*, That for pay purposes, employees of the District of Columbia government shall not be subject to the provisions of title 5 of the United States Code.

SEC. 128. None of the funds appropriated by this Act may be used to transport any output of the municipal waste system of the District of Columbia for disposal at any public or private landfill located in any State, excepting currently utilized landfills in Maryland and Virginia, until the appropriate State agency has issued the required permits.

SEC. 129. The Director of the Department of Administrative Services may pay rentals and repair, alter, and improve rented premises, without regard to the provisions of section 322 of the Economy Act of 1932 (Public Law 72-212; 40 U.S.C. 278a), upon a determination by the Director, that by reason of circumstances set forth in such determination, the payment of these rents and the execution of this work, without reference to the limitations of section 322, is advantageous to the District in terms of economy, efficiency and the District's best interest.

SEC. 130. The Public Service Commission is hereby authorized to order and to approve the deregulation of streetlighting service to the District of Columbia as provided in its opinion and order in Formal Case No. 813, dated July 12, 1984 (Order No. 8056), notwithstanding the provisions of section 493(a) of the District of Columbia Self-Government and Governmental Reorganization Act, approved December 24, 1973 (87 Stat. 811; Public Law 93-198; D.C. Code, sec. 43-402), section 8, paragraph 2 of an Act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June thirtieth, nineteen hundred and fourteen, and for other purposes, approved March 4, 1913 (37 Stat. 977; Public Law 67-435; D.C. Code, sec. 43-501), and section 1 of an Act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June thirtieth, nineteen hundred, and for other purposes, approved March 3, 1899 (30 Stat. 1053; D.C. Code, sec. 43-1207): *Provided*, That the provisions of this opinion and order regarding deregulation of streetlighting service are hereby ratified and declared to be in effect as of July 12, 1984, and shall continue to be in effect until revoked or rescinded.

[SEC. 131. (a) No State, or political subdivision thereof, in which a Member of Congress maintains a place of abode for purposes of attending sessions of Congress may impose a personal property tax with respect to the motor vehicle owned by such Member (or by the spouse of such Member) that is used for purposes of attending sessions of Congress unless such Member represents such State or a district in such State.

[(b) For purposes of this section—

[(1) the term "Member of Congress" includes the delegates from the District of Columbia, Guam, and the Virgin Islands, and the Resident Commissioner from Puerto Rico;

[(2) the term "State" includes the District of Columbia; and

[(3) the term "personal property tax" means any tax imposed on an annual basis and levied on, with respect to, or measured by, the market value or assessed value of an item of personal property.

[(c) This section shall apply to all taxable periods beginning on or after January 1, 1985.]

SEC. [132] *131.* The portion of 15th Street, Southwest, Washington, District of Columbia, located between Maine and Independence Avenues shall hereafter be known and designated as "Raoul Wallenberg Place". Any law, regulation, map, document, or other record of the United States and the District of Columbia which refers to that portion of such street shall be deemed to refer to "Raoul Wallenberg Place".

[SEC. 133. The expenditure of any appropriation under this Act for any contract shall be limited to those contracts awarded on a competitive basis.]

SEC. 132. None of the funds appropriated under this Act may be used to award any contract that is not in compliance with District of Columbia laws and regulations governing the awarding of such contracts on competitive basis.

SEC. 133. No later than 60 days after the beginning of Fiscal Year 1986, the Mayor of the District of Columbia shall submit to the Council of the District of Columbia an official revised revenue estimate and shall use this estimate or a more recent revised revenue estimate in the fiscal year 1987 annual budget request.

TITLE II

FISCAL YEAR 1985 SUPPLEMENTAL

FEDERAL FUNDS

For a Federal contribution to the District of Columbia $14,180,000: Provided, That $8,777,000 shall be made available for capital projects and shall remain available until expended: Provided further, That funds for capital projects may be drawn only to the extent that outstanding obligations become due and payable.

DISTRICT OF COLUMBIA FUNDS

GOVERNMENTAL DIRECTION AND SUPPORT

For an additional amount for "Governmental direction and support", $4,553,000: Provided, That $170,000 of this additional amount shall be allocated exclusively to the Commercial Assessment Division of the Department of Finance and Revenue to fund six new commercial assessor positions: Provided further, That of the $100,000 appropriated for fiscal year 1985 for the Statehood Constitutional Convention, $50,000 shall be for the Statehood Commission and $50,000 shall be for the Statehood Compact Commission: Provided further, That the cash and/or budget authority balance available to the Statehood Constitutional Convention on the date of expiration of the terms of its members, as distinguished from that allocated for the Statehood Commission and the Statehood Compact Commission, shall revert to the general fund of the District of Columbia.

ECONOMIC DEVELOPMENT AND REGULATION

For an additional amount for "Economic development and regulation", $9,873,000.

PUBLIC SAFETY AND JUSTICE

(INCLUDING RESCISSION)

For an additional amount for "Public safety and justice", $26,680,000: Provided, That $2,300,000 of this amount shall be allocated to the Metropolitan Police Department for the sole purpose of paying additional wages and fringe benefits of the Fraternal Order of Police arbitration award should that award not be disapproved according to law: Provided further, That if the arbitration award is disapproved, the $2,300,000 shall be used solely for repayment of the general fund deficit: Provided further, That notwithstanding any other provision of law, in the case of each employee who retired from the Fire Department of the District of Columbia before February 15, 1980, and who is receiving on the date of the enactment of this Act an annuity based on service in the Fire Department, the District of Columbia Retirement Board shall cause to be paid not later than September 30, 1985, to each such employee a lump-sum payment equal to three percent of his or her annuity: Provided further, That of available funds under this head for fiscal year 1985, $300,000 are rescinded.

PUBLIC EDUCATION SYSTEM

(INCLUDING RESCISSION)

For an additional amount for "Public education system", $6,835,000, to be allocated as follows: $5,000,000 additional for the public schools of the District of Columbia; $1,324,000 additional for the University of the District of Columbia; $4,000 additional for the Educational Institution Licensure Commission; $356,000 additional for the Public Library; and $151,000 additional for the Commission on the Arts and Humanities; Provided, That of the funds available under this head for fiscal year 1985, $11,794,000 of the amount allocated to the District of Columbia Teachers' Retirement Fund are rescinded.

HUMAN SUPPORT SERVICES

(INCLUDING RECISSION)

For an additional amount for "Human support services", $9,598,000: Provided, That of the amount available from the revenue sharing trust fund for fiscal year 1985, $698,000 are rescinded.

PUBLIC WORKS

(RESCISSION)

Of available funds under this head for fiscal year 1985, $875,000 are rescinded.

WASHINGTON CONVENTION CENTER FUND

For an additional amount for "Washington Convention Center Fund", $324,000.

REPAYMENT OF LOANS AND INTEREST

(RESCISSION)

Of the available funds under this head for fiscal year 1985, $1,473,000 as rescinded.

REPAYMENT OF GENERAL FUND DEFICIT

For an additional amount for "Repayment of general fund deficit", $3,500,000.

SHORT-TERM BORROWINGS

(RESCISSION)

Of available funds under this head for fiscal year 1985, $1,250,000 are rescinded.

CAPITAL OUTLAY

For an additional amount for "Capital outlay", $23,400,000.

WATER AND SEWER ENTERPRISE FUND

For an additional amount for "Water and sewer enterprise fund", $10,801,000.

GENERAL PROVISION

The Public Service Commission is hereby authorized to order and to approve the deregulation of streetlighting service to the District of Columbia as provided in its opinion and order in Formal Case No. 813, dated July 12, 1984 (Order No. 8056), notwithstanding the provisions of section 493(a) of the District of Columbia Self-Government and Governmental Reorganizational Act, approved December 24, 1973 (87 Stat. 811; Public Law 93-198; D.C. Code, sec. 43-402), section 8, paragraph 2 of An Act Making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June thirtieth, nineteen hundred and fourteen, and for other purposes, approved March 4, 1913 (37 Stat. 977; Public Law 67-435; D.C. Code, sec. 43-501), and section 1 of An Act Making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June thirtieth, nineteen hundred, and for other purposes, approved March 3, 1899 (30 Stat. 1053; D.C. Code, sec. 43-1207): Provided, That the provisions of this opinion and order regarding deregulation of streetlighting service are hereby ratified and declared to be in effect as of July 12, 1984, and shall continue to be in effect until revoked or rescinded.

This Act may be cited as the "District of Columbia Appropriation Act, 1986".

Mr. SPECTER. Mr. President, the District of Columbia appropriations bill for fiscal year 1986, presented here today, is a balanced budget. The bill includes $549 million in Federal funds, which is within the assumptions made in the Senate budget resolution and the conference report.

This amount includes: $425 million for the Federal payment to the District; $82 million for reimbursements to the city for services provided to the Federal Government; $25 million for a transitional payment for St. Elizabeths Hospital, which will come under city control on October 1, 1987; $17.2 million for the criminal justice initiative; and $500,000 for a job training initiative.

This last item, the job training initiative, will provide for the startup year of an innovative job training program to reach those who are currently slipping through the cracks of Federal and local programs nationwide.

The board of trade reported in June 1985, that job training programs in the local area were not operating in areas of high unemployment nor serving job seekers with limited education and job skills who are trying to enter the job market.

A national study of the State and local response to Federal job training programs concluded that the private sector is becoming more involved in training programs and that the number of those being served that have educational deficiencies is decreasing.

This appropriation will establish a model local program that will use the resources of the public and private sectors as well as community groups to train those disadvantaged job seekers that are now underserved.

The criminal justice initiative includes $17.2 million in Federal funds for several important programs.

The bill includes a total of $30 million for the design and construction of a new prison facility within the District of Columbia. $10 million will be available in fiscal year 1986 and $20

million will become available, hopefully, in fiscal year 1987. The D.C. Subcommittee has held several hearings on the prison overcrowding problem in the District. On January 2, 1985, the U.S. attorney testified that felony indictments have continued to rise steadily over the past 4 years, increasing by 26 percent in 1984 alone, and according to information available through August of this year, indictments in 1985 are 5 percent ahead of last year's record pace.

History has also taught us that the prison population will continue to grow. The District's incarcerated population has increased by more than 100 percent in the past decade and 13 percent since January 1, of this year. On September 15, 1985, the Bureau of Justice Statistics released information showing the growth in prison populations nationwide. The increase in the first half of 1985 was almost equal the total increase for all of last year. This report also shows that from June 1984 to June 1985, the District had the greatest percentage increase in prison population in the Nation, up 25 percent.

The need for prison capacity in the District is acute. It is under court order to reduce overcrowding at the downtown jail. Mayor Marion Barry stated at our January 2, hearing that he supported the construction of a prison in the District on Federal property. The mayor and his staff are currently reviewing voluminous material and analyzing data and will soon make decisions concerning the size, security level, and location of this new facility. We are assured by the Mayor that that will be done relatively soon. It is critically important to public safety that this project move ahead without delay. I am convinced that judges may not be sentencing dangerous criminals due to a lack of adequate jail space.

Also, included in the initiative is $6.7 million to continue the vocational and basic education programs begun in 1984 in the District's prison facilities. These programs use innovative training techniques such as computer assisted instruction for basic education and are training inmates for jobs in the rapidly expanding field of computer repair. The most striking success in the job training program has been the culinary arts program where 60 inmates have been trained and placed in jobs upon release over the past 2 years. To date, not a single graduate has returned to jail.

These programs offer the prospect to reduce recidivism by ensuring that those released have a marketable trade or skill and will not return to a life of crime.

Included is $500,000 to expand the truancy prevention programs in the D.C. public schools. In the 1985 bill, we included funds to purchase calling machines, expand staff, and establish a truancy center. Such a center was in operation during the second semester of the 1984-85 school year, along with a pilot truant pickup program in the first police district.

Yesterday I had occasion to visit the truancy center with Mayor Barry and it is proceeding along at a good rate, although the final results are yet to be demonstrated.

Through June 10, 1985, 357 students had been referred to the center. This group included 59 elementary students, 251 junior high students, and 47 senior high students.

In addition to encouraging students to stay in school, this program has also had an impact on daytime crime in the first police district. Data concerning burglaries and larcenies, offenses most often associated with youth, during the hours of 8:30 a.m. to 4:30 p.m. for the month of March and April 1985, show that reductions in these reported crimes are down in the first district and in citywide figures, by similar percentages. However, in May 1985, citywide crime reports were down 9 percent and in the first district they dropped 22 percent. This experience is similar to other cities that have tried this approach and demonstrates that truancy programs have an impact on crime.

In addition to the Federal funds just mentioned, the District of Columbia raises $1.9 billion in local revenues for a total operating budget of $2.4 billion in fiscal year 1986. Also, the District will issue $249 million in municipal bonds to finance capital projects.

GOVERNMENT DIRECTION AND SUPPORT

For the departments and agencies under this appropriations account the committee recommends $99,342,000, the same as the budget request and House allowance.

Included in this amount is an increase of $109,000 and three positions for the D.C. Auditor's office. This will permit the office to expand his audit capacity. An increase of $143,000 for the Department of Finance and Revenue will permit them to begin new revenue-generating enforcement initiatives.

ECONOMIC DEVELOPMENT AND REGULATION

The committee recommends $100,035,000 for the activities under this appropriation account, this is $500,000 above the budget request and $510,000 above the House allowance.

These increases represent $500,000 for the job training initiative described earlier and the restoration of a $10,000 reduction by the House within the Office of Business and Economic Development.

Also, included is an increase of $7.9 million in the Department of Housing and Community Development. This increase will fund expansions of rent supplement programs, Home Purchase Assistance Program, and low-rent housing support services.

PUBLIC SAFETY AND JUSTICE

For the public safety and justice appropriations account the committee is recommending $542,106,000. This is an increase of $16,690,000 above the House and $16,700,000 above the budget estimate.

These increases are made up of $10 million for the construction of a new prison in the District of Columbia, $6.7 million to continue the vocational and educational program in District correctional facilities, and the reduction of the $10,000 added by the House for the National Guard.

A total of $148.1 million is included for the Metropolitan Police Department. For the Fire Department, the committee is recommending an increase of $4.2 to $59.9 million for the coming fiscal year. The committee is informed that the 1-hour breathing masks are ordered and will soon be in operation. The committee report also includes language directing that Engine Company 3, located at 439 New Jersey Avenue, N.W. remain open at that location during fiscal year 1986. The engine company is the first call to the U.S. Capitol and was on the scene moments after the recent bomb blast just outside this Chamber.

PUBLIC EDUCATION SYSTEM

For the public education system the committee recomendation is $515,505,000, this is $500,000 more than budget request and the House allowance.

This increase is due to the expanded truancy programs of the D.C. Public Schools as discussed earlier in my statement. The committee shares the sentiments expressed by the House over the District's dropout rate. These same concerns led me to recommend and the Senate adopted an innovative truancy program in last years' bill and to recommend its expansion citywide based on its successes previously noted.

Also, included is a $1 million increase for the Public Library and a $500,000 increase for the Commission on Arts and Humanities.

HUMAN SUPPORT SERVICES

The committee recommends $614,347,000 for the activities under this account in fiscal year 1986. Included in this amount is $511.6 million for the Department of Human Services, including an increase of $2.2 million in city aid to the homeless. This will provide for additional shelter beds through contracts with private providers.

PUBLIC WORKS

For the public works appropriations account the committee recommends $193,741,000 for the activities relating to maintaining the infrastructure of the Nation's Capital.

WASHINGTON CONVENTION CENTER FUND

a total of $8,371,000 is recommended including $2.1 million to purchase the food service equipment from the contractor. This will increase concession revenue to the center by 100 percent.

REPAYMENT OF LOANS AND INTEREST

The committee recommends $198.4 million as the 1986 payment on $2 billion in outstanding loans from U.S. Treasury.

REPAYMENT OF THE GENERAL FUND DEFICIT

The committee recommends $5 million for repayment of the general fund deficit in fiscal year 1986. This amount is the same as the budget request and the House allowance. The committee has stricken language included by the House which would require the Mayor to identify $15 million in additional funds to further reduce this deficit. The committee notes that the District government has reduced this deficit, which stood at $269,860,000 at the end of fiscal year 1984, by nearly $40 million over the last 4 years and expects that as additional revenues or savings are realized that some portion of this will be applied to deficit reduction.

SHORT-TERM BORROWINGS

For net interest on short-term borrowings the committee recommends $3,750,000. These are funds borrowed to meet the seasonal cash-flow financing needs of the District.

PAY-AS-YOU-GO CAPITAL PROJECTS

The committee concurs with the House recommendation of $3.5 million in small capital projects; those less than $1 million be paid from operating funds. This is consistent with last year's bill.

ENTERPRISE FUNDS

The bill includes $167,388,000 for the four activities funded with enterprise funds. A total of $148,083,000 is included for the Utility Administration of the Department of Public Works. This allowance is $23,973,000 above last year's appropriation and includes increases of $3,373,000 for debt-service costs, $5,034,000 for sludge disposal, and $3,793,000 to hire additional personnel and purchase spare parts in order to comply with a consent decree entered into with the Environmental Protection Agency on the operation of the Blue Plains Wastewater Treatment plant.

The bill includes the budget request of $14,904,000 for the Washington Aqueduct which collects, purifies, and pumps potable water. This allowance is $904,000 above the fiscal year 1985 appropriation and includes an increase of $587,000 to cover two rate increases for energy costs.

The committee recommends $4,151,000 in District funds for the Lottery and Charitable Games Control Board which is responsible for regulating charitable games and conducting legalized lotteries in the District. The board testified that the increase of $620,000 and 15 positions above the fiscal year 1985 allowance will be used to increase sales which will ultimately result in additional operating revenues for the District. The board expects to transfer $34.8 million to the District's general fund during fiscal year 1986.

For the Office of Cable Television $250,000 is recommended for fiscal year 1986. This office will oversee the day-to-day construction and operations of the District's cable television system. Construction is anticipated to start some time in early 1986 with cable service expected in late 1986.

GENERAL PROVISIONS

Mr. President, the bill carries a number of general provisions on pages 15 through 26. I will cover them briefly.

Language under section 130 authorizes and ratifies action taken by the Public Service Commission in July 1984 to deregulate streetlighting. Funds in the amounts of $14,850,000 are included in the Supplemental Appropriations Act of 1985 (H.R. 2577) to purchase the streetlight plant from manhole to light from the Potomac Electric Power Co. The price was determined in the course of a depreciation study conducted by a national accounting firm.

The bill also contains a provision, section 131, which designates that portion of 15th Street SW between Maine and Independence Avenues as Raoul Wallenberg Place. I want to note the work of the Senator from Michigan [Mr. Levin] has done on this matter.

Senator LEVIN has taken the lead on this issue in the Senate. Earlier this year he introduced legislation to rename this area in honor of Wallenberg (S. 1371). That bill currently has 23 cosponsors.

The area of 15th street to be designated as "Raoul Wallenberg Place" runs in front of the future U.S. Holocaust Museum. This is a fitting tribute to a man responsible for saving the lives of tens of thousands of Hungarian Jews during War II.

Before closing, Mr. President, I thank the members of the subcommittee and particularly our ranking minority member, the Senator from New Jersey [Mr. LAUTENBERG], for his time, interest and knowledge in developing this bill. I also express my appreciation to the chairman of the Appropriations Committee, the Senator from Oregon [Mr. HATFIELD], for his support in bringing this bill to the floor.

I also thank the distinguished majority leader, the Senator from Kansas [Mr. DOLE], for bringing this bill to the floor. I yield now to Senator LAUTENBERG.

The PRESIDING OFFICER (Mr. MATHIAS). The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I am pleased to join my friend from Pennsylvania, Senator SPECTER, in recommending the District of Columbia Appropriation bill for fiscal year 1986 (H.R. 3067) to the Senate. This bill establishes a sound, fiscally responsible framework for the operation of the District government for the next fiscal year. It provides for a balanced budget for the District, as is required under the Self Government Act. It is also within the assumptions of the first budget resolution for fiscal year 1986.

The bill contains a total of $549,870,000 in Federal funds. This is an increase of $16,527,000 over the fiscal 1985 appropriation and is $17,700,000 more than the budget estimate and the House allowance.

The bill also appropriates a total of $2,706,777,000 in District funds. This is $343,649,000 more than last year and reflects the additional $17,700,000 in Federal funds approved by the committee for special initiatives in criminal justice, school truancy, and employment training programs. With these exceptions, the bill provides funding for the budget requested by the District. In this respect, it is consistent with the spirit of home rule, which most of us agree should govern relations between the District and the Federal Government.

The chairman has already described in considerable detail the substance of these appropriations. I will not go over that same ground again. I do, however, call attention to a matter which I regard as especially important—the drinking age issue.

The District has yet to raise the drinking age for wine and beer to 21. Both Virginia and Maryland have adopted a uniform drinking age of 21 for all types of alcoholic beverages. As a result, the District, and especially Georgetown, has become a mecca for underage drinkers from surrounding jurisdictions. Teenagers by the hundreds drive from suburban Maryland and Virginia to bars and cabarets in the District. After a few hours and several beers or glasses of wine with their friends, they try to drive home—often with tragic consequences.

Both the House and Senate Appropriations Committees in their respective reports, urge the District to adopt a uniform drinking age of 21. That is why it was so disturbing to me to learn that a committee of the District City Council last September voted against raising the minimum drinking age. The vote was bad enough, but the attitude expressed toward the Uniform Minimum Drinking Age law, which was adopted on the floor of the Senate by a vote of 82 to 16, was especially objectionable. Responsible people may disagree on this issue but there is no justification for impugning the motives of those who take a contrary position.

I am entirely familiar with all the arguments against 21 as a minimum

drinking age. But when all is said and done, the question comes down to a single hard fact: Raising the drinking age saves lives. So the real issue is whether or not we have the courage to stand up to the political power of those with an economic interest in teenage drinking.

I might also note that under the Uniform Minimum Drinking Age Act of 1984—legislation I was proud to sponsor—the District stands to lose $2.5 million in Federal highway funds in fiscal 1986 and another $5 million the next year. So, Mr. President, I believe the District would be well advised to move as promptly as possible to enact the needed changes in its drinking laws.

Now, Mr. President, this year the World Series was marked by a surprising, unprecedented come back by the Kansas City Royals. Never before has a team that lost the first two home games of the series been able to overcome the odds and win the series. Before the memory of this historic series and the season it capped off fades, I think a baseball amendment is in order. Senator HART and I just happen to have one which we have been working on. He will offer it a little later.

The amendment is designed to assure the impartiality of the Federal Government in the competition for baseball franchises. This, after all, is a much bigger baseball contest than the World Series. Besides, Senator HART and I both have home teams in the competition for franchises. His is Denver. Mine is the whole State of New Jersey with a population of 7½ million people barren of its own baseball team.

The amendment is necessary, Mr. President, because both the Senate and the House reports contain some language which could be misinterpreted as a congressional endorsement of the District's particular bid for a baseball franchise. The amendment simply states that Congress is neutral in this regard and forbids the use of Federal funds for the District's baseball commission. Now while most of us in Congress wish the District well and have no objections to its efforts to get a major league baseball franchise, we do not believe it is appropriate or fair for Congress to show any favoritism toward the District—or any other city or State, for that matter.

Before concluding, Mr. President, I want to say what a pleasure it has been for me to work with the distinguished junior Senator from Pennsylvania on this bill. Coming from neighboring States, we share a concern with the challenges facing our region and, indeed, all of urban America. The District, of course, mirrors many of these challenges. So I think Senator SPECTER and I have a common appreciation for the problems facing the District as a metropolitan community and in many cases it is a microcosm of the problems we face daily in our States. I also commend the Senator from Pennsylvania for his hard work in developing this bill and guiding it through the committee. He has done an excellent job, and he deserves the Senate's gratitude.

Finally, Mr. President, I wish to express my appreciation to the committee staff for their help in putting this bill together. The unsung hero in the process is B. Timothy Leeth, the majority clerk. Tim's experience and knowledge for the District's budget are invaluable. I would commend our minority clerk, Jerry Bonham, as well as Dorothy Douglas and Lula Joyce for their capable assistance.

I know of no further opening statements on this side, Mr. President, and I yield the floor.

Mr. SPECTER. Mr. President, if the distinguished Senator from North Carolina [Mr. HELMS] has arrived on the floor, and I think all parties are now present so that we can move to the consideration of H.R. 3067.

Mr. President, at this time I send an amendment to the desk on behalf of Senator TRIBLE and ask for its immediate consideration.

The PRESIDING OFFICER. Are there committee amendments?

Mr. SPECTER. There are committee amendments, but we are deferring those.

The PRESIDING OFFICER. The Chair advises the Senator we should dispose of the committee amendments prior to calling up a floor amendment.

Mr. SPECTER. Mr. President, I ask unanimous consent that we lay aside the committee amendments for consideration of this amendment which I have sent to the desk.

Mr. WEICKER. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will state the first committee amendment.

The assistant legislative clerk read as follows:

Page 2, line 1, insert "title I, fiscal year 1986 appropriations."

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading on this amendment by the clerk be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, I will now propound a unanimous-consent request which will eliminate from consideration that committee amendment on the issue of abortion which will be raised, as I understand it, by a motion to table. I ask unanimous consent that the committee amendments be agreed to en bloc with the exception of the amendment at page 20, beginning on line 14 down through line 25, and that the bill as thus amended be regarded for purposes of amendment as original text, providing further that no point of order shall have been considered to have been waived if the request is agreed to.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

Mr. HUMPHREY. Mr. President, reserving the right to object, I wish to square with the floor manager his intention in the context of treating the committee amendments as original text, if he means explicitly to exclude section 118, that is, the proposed committee amendment dealing with abortion.

Mr. SPECTER. I do intend to omit section 118, that beginning on page 20, line 14 through line 25 and as the specific provision excluding——

Mr. HUMPHREY. Excluded, including the excluded in the context of treating it as original text.

Mr. SPECTER. Excluded, including the context of being included as original text.

Mr. HUMPHREY. So when we get to section 118 the Senator is not proposing to consider the committee amendment as original text.

Mr. SPECTER. The Senator is correct.

Mr. HUMPHREY. I thank the manager.

Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, the issue which is to be placed before this body relates to a committee amendment which can be most succinctly put forth by reading it.

It is section 118, which reads as follows:

None of the Federal funds provided in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported promptly to a law enforcement agency or public health service. Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

Mr. President, that is the committee amendment to insert that language in section 118 in place of the language of the other body:

None of the funds provided in this act shall be used to perform abortions.

Mr. President, the reason for this substitution is to structure a provision which while, not acceptable to all parties, is deemed to be a provision which may be acceptable to a majority of the Members of this body and would be passed on this highly controversial subject. It seeks to eliminate the provision that the District of Columbia would be precluded from using its own funds, which it gathers from taxation,

for whatever purposes it sees fit, subject to the language of section 118.

The subject of abortion is, obviously, a highly controversial subject and has been subject to debate on this floor on many occasions and subject to debate in this country in many fora on many, many occasions.

One important consideration behind this provision is that the District of Columbia ought to have latitude to use its funds in a certain matter as it deems appropriate. To that extent, the District of Columbia would be treated as if it were a State for that purpose. There has never been any effort by the Congress, to my knowledge, to prohibit any State in the United States from using its own funds which it raises subject to the dictate of the Congress on the abortion issue. And, as a matter of local home rule and as a matter of fundamental separation of powers under our Federal system, it seems to this Senator that the District of Columbia ought not to be treated differently.

Even where there have been proposed constitutional amendments on Wade against Roe, some of those amendments have sought to leave to the States to decide, on an individual State-by-State basis, its own provisions with respect to the abortion issue. And that logic would suggest that the States ought to have discretion to use their own funds as they choose and, analogously, the District of Columbia ought to have leeway to use the funds which it raises itself, even though those funds are technically subject to the appropriation of the Congress of the United States.

While the Federal Government no longer pays for abortions for indigent women in most cases, I am advised that some 15 States and the District of Columbia choose to do differently, according to information which is set forth in the Congressional Quarterly on November 17, 1984 at page 2954; identifying those States as Alaska, California, Colorado, Connecticut, Hawaii, Maryland, Massachusetts, Michigan, New Jersey, New York, North Carolina, Oregon, Pennsylvania, Washington, and West Virginia.

I yield the floor, Mr. President.

Mr. HELMS. Mr. President, I am going to address myself to the committee amendment beginning on line 14 on page 20 and concluding with line 25.

Mr. President, since 1979, Congress has been playing a smoke-and-mirrors game with the abortion restrictions on funds appropriated by Congress for the District of Columbia.

Now here is the way the game goes: Congress puts abortion restrictions on so-called Federal funds in the D.C. Appropriations Act but leaves the so-called District funds totally unencumbered. So, what happens? The District of Columbia then funds abortions on demand out of the so-called District moneys. The restrictions on the Federal funds thus become nothing more than a figleaf to cover wide-open funding of abortion on demand.

Now, the trouble with this little scheme is it does not comply with the law. All moneys, Mr. President, all moneys available to the District of Columbia are in fact and in law appropriated by Congress. Of course, the smoke-and-mirrors game denominates Federal funds and District funds. And, while there may be some advantages, from a bookkeeping standpoint, in this distinction, it is Congress that appropriates all moneys for the District of Columbia.

Now, what result has the current scheme produced, Mr. President? In short, it has helped make the District of Columbia the abortion capital of the United States.

Listen to these figures: According to the most recent Census Bureau report, the District of Columbia has the highest abortion rate in the country—1,517 abortions for every 1,000 live births. In other words, 1½ to 1.

In addition, according to the National Right to Life Committee, the District has the most permissive policy on tax funding of abortion in the entire country, not merely paying for abortion on demand for Medicaid-eligible women, but also paying for abortion for women who do not qualify for Medicaid but have no private health insurance. Thus, the District has achieved for itself the grisly distinction of leading this Nation in the deliberate termination of innocent human life. It is time for us in Congress to eliminate this blight on the reputation of the Capital of the United States of America.

Mr. President, as much as many in Congress would prefer to ignore, or minimize, or cover up the abortion issue, the fact is that it will not go away. Those innocent babies being destroyed here in the District of Columbia, and throughout the country, keep making a silent but unmistakable claim on our conscience. They deserve the right to survive their mothers' womb and to live the life that God Himself has given them.

Thomas Jefferson in the Declaration of Independence said:

> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness.

Mr. President, the abortion issue presents squarely the question of whether we will secure the right to life for all human beings in this country, including those in the womb. Will we give these small but precious creatures their due, will we secure them justice, will we protect them through law from the mortal violence of abortion?

Mr. President, I wish we were today voting directly on this question. I wish we were voting on whether Roe versus Wade will stand, or whether, on the other hand, the right to life for unborn human beings will once again be recognized in our law. The reason I wish we were voting on this issue, Mr. President, is because some 30,000 innocent unborn babies are being killed every week in the United States by surgical abortion.

Mr. President, fortunately, the House of Representatives took the just and forthright approach in this matter. The House put an end to the charade—and that is what it is—the charade of congressional abortion restrictions only on so-called Federal moneys but not on so-called District moneys. The House simply put a flat-out ban on any abortion funding with moneys appropriated by Congress, Federal or District, for the District of Columbia.

Mr. President, that is the straightforward way. That is honest. It recognizes the humanity of the unborn and that, I believe, is an approach worthy of the Congress of the United States.

Now, what did the Senate Appropriations Committee do? It decided otherwise. It went in the direction of that fig leaf, the dual standard, the charade. It put back in place the familiar language restricting funding of abortions in the District with Federal moneys, but leaving wide open the funding of abortion with District moneys.

Thus, the Senate Appropriations Committee, once you get through all of the technicalities and the doubletalk, opted in favor of funding abortion on demand in the District of Columbia using the money of the taxpayers.

Mr. President, I shortly will move to table the committee amendment. The vote on this motion to table will put squarely before the Senate the question of whether we support taxpayer funding of abortion on demand or whether we do not.

Some have argued that the issue there is a matter of home rule for the local government of the District of Columbia. They say that Congress does not dictate to the States about local funding of abortion and, therefore, it should not dictate to the District of Columbia.

Very well, Mr. President; there are at least two answers to that point. First of all, of course, the District of Columbia is not a State, and the constitutional amendment necessary to make it a State was recently rejected by the States of this country.

The fact is that while Congress has permitted a degree of home rule, the District of Columbia ultimately remains under the control of Congress by virtue of article I, section 8, clause

17, of the U.S. Constitution. And unless and until this provision is changed, complete home rule will be no more than wishful thinking on the part of some who advocate it.

Second—and I think more important—D.C. home rule, such as it is, cannot properly be used to cover what I consider to be the crime of abortion. Given a choice between saving the lives of the unborn babies or acquiescing in extravagant claims of home rule, this Senator will choose saving the babies every time, and I have the hope that my colleagues will take the same position.

Mr. President, unless there are other Senators who wish to speak——

Mr. METZENBAUM. Mr. President, before the Senator makes his motion to table, would he be good enough to give us a chance to be heard?

Mr. HELMS. Mr. President, I suppose I will yield the floor. When all Senators have spoken, I will move to table.

Mr. METZENBAUM. I appreciate the courtesy of the Senator from North Carolina.

Mr. President, would the manager of the bill be good enough to yield for a question?

Mr. SPECTER. I do.

Mr. METZENBAUM. As I understand the effect of the motion of the Senator from North Carolina, which would be to table the committee amendment, and thereby reassert or make operative the House amendment, is it not the fact that if that were to be the case, we would not alone be prohibiting expenditure of Federal funds for abortions, but in effect we would be prohibiting the use of the city's own funds—that is, those that they have raised by their own taxes—for such actions as they may deem advisable in connection with abortions?

Mr. SPECTER. Yes.

Mr. METZENBAUM. I thank the Senator from Pennsylvania.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I want my colleagues to understand the significance of the response of the manager of the bill. What this amendment does is it says to the city of Washington you may have raised $10, $50, $200 million by taxes which you have levied, sales taxes, whatever kind of taxes you may have. But by reason of the provisions of the law, which give us in the Congress authority in connection with their expenditures—that authority can be found under Public Law 93-198, dated December 24, 1973, section 446.

Because of that, no matter how much they raised, how many millions they may raise by taxing their own constituents or those who use city facilities, we would be saying if we were to adopt the Helms motion to table—which in effect would reinstate the House amendment—the impact of that is that the District of Columbia would receive no Federal funds if the District of Columbia were to see fit to use its own funds in connection with this issue of abortion.

How far can we carry this issue? It is not alone enough to say that we will not expend Federal funds to pay the cost of abortions, but this amendment would go beyond that by far. It would not alone limit the expenditure of Federal funds. It would limit the expenditure of funds of the District of Columbia itself.

That carries it to an extreme that hardly anyone, no matter how strongly they felt about the issue, could consider to be reasonable.

I stood on the floor a week or two ago and indicated that this Senator felt we had had enough abortion amendments—431 over a period of 9 years, an average of 1 a week—and that we need not go any further than the present law. I want to point out the present amendment that is in the bill does deal with this subject, but it deals with it within the context of the presently existing law.

I am not standing on the floor indicating that I am opposing to change that. But I think that the committee's action indicated what is a reasonable approach to this very sensitive issue. But for us to go beyond that and to adopt the Helms motion to table, thereby reinstating the effectiveness of the House amendment, in my opinion is a point to which we should not go.

I have no reservations in saying that if the Helms motion to table is adopted, I hope to educate my colleagues at some length on the matters concerning abortion that have come up during the past 9 years.

I see my colleague from Connecticut on the floor.

I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I will be very brief with my remarks. We have plowed this ground many times.

There are some very brief points that I care to make. Then I hope the Senator from North Carolina will pursue his tabling motion.

No. 1, as has been pointed out, if you leave the House language in, then indeed you have a total prohibition insofar as abortion is concerned even including those that would take place in an effort to save the life of the mother. We do not have any such restrictive language in any Federal legislation.

That really is the most important part. There is no point in getting into debate again about the District of Columbia, its rights, privileges, and all the rest of it. They ought to stand on their own. But that is another argument for another day.

The fact is the language that would come into play if indeed the tabling motion of the Senator from North Carolina is agreed to, would be the most restrictive abortion language that we have on any legislation either proposed or enacted into law.

Point No. 2, the distinguished Senator from North Carolina made the statement as to what he considers a crime. Fortunately, for the Nation, what he considers to be a crime is no more relevant than what the Senator from Connecticut deems to be a crime. What is or what is not a crime in the United States is a matter of law and is determined in the ultimate by the Supreme Court of the United States. The Supreme Court of the United States is very clear on the matter of abortion in the case of Roe versus Wade. That is the law of the land.

Abortions that take place within the structures set forth by Roe versus Wade are legal. That is the law of the land. They are not crimes.

So I hope in both those regards we would go ahead and reject the tabling motion of the distinguished Senator from North Carolina. It is my understanding that the Senator from New Hampshire will be taking up the baton at that stage of the game with his own version of what should be done.

I can only say this: The time that has been expended on this matter on abortion, as pointed out by the distinguished Senator from Ohio, is keeping us from those duties which are far more pressing. It is not a matter—again I might add—of what the morality is or the thoughts are of those in this body. Everybody is entitled to give them full expression in whatever way they deem fit. There comes a point where the line has to be drawn.

Indeed, I might point out parenthetically that this being Thursday, 2 days past election day, the issue in the State of Connecticut was clearly put on the ballot: Should Roe versus Wade be overturned?

The issue was presented to a group of voters, who I would say as a matter of demographics probably would clearly lean toward the positions advocated by the distinguished Senators from North Carolina, New Hampshire, and others.

It was rejected. The voters said no. Roe versus Wade should not be overturned.

I am not here to go ahead and represent any sort of popularity contest on any issue. I think my colleagues know that well. I think enough time has been afforded the issue. Everybody has had a fair cut at the ball.

Now the time has come to not only dispose of this, but get on to those

issues that are the real issues of concern to the people of this Nation.

Again, I repeat, I respect the articles of faith and the morality of any one of my colleagues, my own included.

However, that is not sufficient to be the law of the land. That is determined in a very precise constitutional process. The law of the land says that abortion is legal, legal, as I say, within the parameters set forth in Roe versus Wade. I would hope that the amendment of the Senator from North Carolina, when it comes, is defeated.

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, it should be clearly understood that the House language, which would be reinstated if the committee amendment is tabled, would impose a categorical prohibition on the use of any funds, including funds the District raises on its own.

Frankly, I cannot understand the logic that says we should impose an even more stringent restriction than exists in Federal law on the District with respect to the use of its own revenues. This community raises over 80 percent of its funding, roughly $2 billion, from local sources. The taxes and fees that provide its revenues are levied by its taxing bodies, where its citizens have the right to decide what laws they apply under the umbrella of the Constitution to single out the District in this way is patently unfair, and abusive. I think it raises a serious question regarding relationships in our federal system. Suppose it was Charlotte, NC, and we disagreed with a law that was on their books. Should we because Charlotte receives revenue sharing, demand that they change their law to conform to what we here who authorize and appropriate revenue sharing funds might think is right for the community.

I see the same thing here. Without discussing abortion, per se, this is a community like any other. Its structure is different because it has not yet achieved its rightful place as the 51st State. But the money appropriated by the Federal Government is money that is given in lieu of taxes. We occupy a great deal of the ratable portions of this city and we are, therefore, obligated to fund some of their city operations. But the House language, to reiterate, goes far beyond the Federal funds we provide. It would tell the city what it can and cannot do with the money provided by its taxpayers. In my view, these are decisions better left to the local taxpayers and their elected representatives.

Mr. President, I would urge that my colleagues vote against tabling this amendment consistent with the principle of home rule and the right of communities all across this country to make their own laws, and to enforce their own laws, under the rights given them by the Constitution.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. Mr. President, the Senator from New Jersey raises concern about the interference by the Congress in the affairs of the District, if I correctly understand him.

The point is, as the Senator acknowledges, that the District of Columbia is not a State. It is, instead, a Federal enclave, a Federal entity, over which the Federal Government still retains not only authority but responsibility. The responsibility, of course, was originally ordained by the Constitution, article I, section 8, which empowers the Congress to exercise exclusive jurisdiction in all cases whatsoever over such District.

Senators may then say, "Well, what about home rule? Did not Congress, by statute, give limited home rule to the District some years back?"

Yes, the Congress did. But, in capital letters, the Congress in extending limited home rule by statute explicitly reserved powers of appropriation to the Congress. That reservation was stated in Public Law 93-198, the pertinent part of which reads, with respect to the Mayor and the city council, that:

No amount may be obligated or expended by any officer or employee of the District of Columbia government unless such amount has been approved by an act of Congress, and then only according to such act.

So clearly, under the Constitution and the statute, Congress has not only the authority but the responsibility, and with that responsibility comes the parallel responsibility of exercising judgment about proposed appropriations for the District, irrespective of how the funds to be appropriated are raised.

Every penny, I remind my colleagues, spent by the District of Columbia, irrespective of whether raised by the IRS or by local taxing authorities, must first be appropriated by Congress. We appropriate every penny that is spent by the District of Columbia.

Are we to appropriate without passing judgment about the purposes for which that money is to be appropriated? Of course not. That would be silly, not only silly but a violation of our responsibility of appropriating for the District.

Mr. President, some might argue the District ought to be a State, but that is an argument for another day with respect to the pending business. But nobody can argue that Congress lacks the constitutional and statutory authority to appropriate as it sees fit all funds expended by the District of Columbia. It is inarguable.

What about the advisability of doing so? That is a somewhat different question. Let me point out to my colleagues that the Appropriations Committee had no compunctions in this very bill, not to mention appropriations bills for the District in past years, about inserting many restrictions on spending not only of Federal funds but of locally generated funds as well.

When we get to the point where the Senator from New Hampshire might offer his amendment, I intend to enumerate those in detail.

Let me cite one because of its absurdity.

I refer to section 106 of the bill now before us, on page 17. It reads as follows:

Appropriations by this act—

It does not say Federal or local funds but appropriations, which means all of them—

shall not be used for or in connection with the preparation, issuance, publication or enforcement of any regulation or order of the Public Service Commission requiring the installation of meters in taxicabs.

Mr. President, the Appropriations Committee has no compunctions about limiting the expenditure of public funds whether locally raised or federally raised, even in the matter of installing meters in taxicabs.

So, clearly, by Constitution, by precedent, by law, by examples in this very bill, they do preclude the expenditure of Federal or local funds, and the law is well within its authority to prohibit the expenditure of any public funds for purposes of abortion.

Mr. President, the matter before us is this, very simply, and I know we are anxious to move on: The committee amendment is now before the Senate. It proposes to strike House language in the bill. The House language in the bill prohibits the expenditure of all public funds to perform abortions. If the anticipated tabling motion is agreed to, then the House language stands and both Houses of Congress are on record as legislating a prohibition on the expenditure of public funds for abortion.

If the tabling motion fails, then the committee amendment is still the pending business and Senators will have opportunities to offer amendments to it. I intend to offer an amendment to it myself, an amendment to accomplish the same purpose by amending instead of by a tabling motion.

I hope Senators, irrespective of their feeling about the fundamental issue of abortion, will recall that by a majority vote many times in recent years, since 1976, the Senate has gone on record as making a distinction between the issue of abortion itself and the issue of obligating the taxpayers to pay for these

operations which take the life of prenatal children.

Mr. SYMMS. Mr. President, I rise in support of Senator HELMS' motion to table the committee amendment on abortion. The effect of the amendment is to prohibit the use of tax dollars for abortions in the District of Columbia.

Mr. President, I would call my colleagues' attention to the following fact: There are more abortions per live birth in the District of Columbia than in any other city in the country; 1,517 abortions are performed for every 1,000 live births in this city. I repeat, 1,517 abortions for every 1,000 live births. Those statistics are staggering.

As passed by the House of Representatives, this appropriations bill was amended to prohibit the D.C. government from funding abortions. The House-passed bill, however, was amended by the Senate Appropriations Committee to merely forbid the District of Columbia from using Federal funds for abortions except to save the mother's life; or in cases of rape or incest.

This Senate amendment is defective and inadequate. Language such as that placed in H.R. 3067 by the Senate Appropriations Committee has been in effect for 5 years and has failed to stop a single tax-funded abortion in the District of Columbia.

We are not talking about a "mere" few hundred publicly funded abortions in our Nation's Capital. In 1983, according to D.C. government statistical note 67—July 1984—taxpayers funded 4,393 abortions in the District of Columbia.

The central issue in the abortion debate is whether abortion should be sanctioned as a legal and accepted practice. This issue is complicated by the fact that some who seek abortions demand and expect that their abortions be paid for with public funds. I do not believe the widespread use of tax dollars to pay for abortions can be justified on moral or constitutional grounds.

The controversy over when the fetus becomes a human being continues to rage. Even now the Supreme Court is preparing to review two cases on this question during the upcoming fall session. In the meantime, elected officials cannot properly require that taxpayers continue to fund these operations. As President Reagan says, "until we know for sure, we should err in favor of life."

As the Nation's Capital, Washington, DC, represents the Federal Government in the minds of many Americans. Over the years, the city has become associated with the waste, fraud, and abuse which sometimes seem to be inherent in the operations of Government. Now, statistics indicate, there is a new and equally serious problem in Washington, DC—our National Capital has become the Nation's abortion capital, as well.

The House of Representatives has acted to correct this deplorable situation by adopting the language which was included in this bill when it reached the Senate. The Senate should reaffirm the House action by adopting this motion to table. Anything less would be a disservice to the American people and the many innocent lives at stake in the District of Columbia.

I urge my colleagues to support Senator HELM's motion and restore this bill to the form in which it passed the House of Representatives.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I move to table the committee amendment which appears on page 20 of the bill, line 14-25, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Carolina. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EAGLETON (when his name was called). Mr. President, on this vote I have a live pair with the distinguished junior Senator from Massachusetts [Mr. KERRY]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." I withhold my vote.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ], is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KERRY], and the Senator from West Virginia [Mr. ROCKEFELLER], are necessarily absent.

I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 35, nays 60, as follows:

[Rollcall Vote No. 290 Leg.]

YEAS—35

Abdnor	Grassley	McClure
Armstrong	Hatch	McConnell
Boschwitz	Hatfield	Nickles
D'Amato	Hawkins	Pressler
Danforth	Hecht	Proxmire
Denton	Helms	Quayle
Domenici	Humphrey	Stennis
Durenberger	Johnston	Symms
East	Kasten	Thurmond
Ford	Laxalt	Trible
Garn	Lugar	Wallop
Gramm	Mattingly	

NAYS—60

Andrews	Exon	Mitchell
Baucus	Glenn	Moynihan
Bentsen	Goldwater	Murkowski
Biden	Gore	Nunn
Bingaman	Gorton	Packwood
Boren	Harkin	Pell
Bradley	Hart	Pryor
Bumpers	Heflin	Riegle
Burdick	Hollings	Roth
Byrd	Inouye	Rudman
Chafee	Kassebaum	Sarbanes
Chiles	Kennedy	Sasser
Cochran	Lautenberg	Simon
Cohen	Leahy	Simpson
Cranston	Levin	Specter
DeConcini	Long	Stafford
Dixon	Mathias	Stevens
Dodd	Matsunaga	Warner
Dole	Melcher	Weicker
Evans	Metzenbaum	Wilson

PRESENT AND GIVING A LIVE PAIR AS PREVIOUSLY RECORDED—1

Eagleton, for.

NOT VOTING—4

Heinz	Rockefeller
Kerry	Zorinsky

So the motion to lay on the table was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SCHEDULE

Mr. DOLE. Mr. President, the distinguished minority leader asked me earlier if I could give him some indication of the program for the remainder of the evening. It is my understanding that, at most, there might be one additional vote.

I also indicated earlier today that we will not be in session tomorrow. We have made a lot of progress today. We believe than the last thing we will do today, which will not require the attendance of all Senators, will be to get a unanimous-consent agreement on reconciliation and the textile bill and start that moving early next week, on Tuesday.

I think it is fair to say that if reconciliation is before the Senate on Tuesday, there could be votes as early as 10 o'clock Tuesday morning, if I correctly understand Senator CHILES and Senator DOMENICI.

That is where we are. When we will leave here tonight depends on what happens to the amendment to be offered by Senator HUMPHREY.

Mr. BYRD. I thank the distinguished majority leader.

I am getting calls from Senators, and I am sure the majority leader is, who have airplanes to catch, and so on, and the waters are getting muddy.

Mr. DOLE. I have been advised that it takes 2 hours to get to National Airport.

Mr. BYRD. I appreciate the majority leader considering the situation, in

order to help Senators get home or get to the airport.

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BUMPERS. Mr. President, I want to make this point: We have known for a long time that we were not going to be in session on Monday, and most of us have engagements for Monday afternoon or Monday evening. I do not mind catching a 7 o'clock flight back on Tuesday morning. That would not get me here—and I suspect that I speak for others—for a 10 o'clock vote. I hope that the votes could be held a little later than 10 o'clock on Tuesday morning.

I do not want to impede the progress of the Senate, but I say that anybody who has a Monday engagement and who is at least a thousand miles from here would find it impossible to get back that early.

Mr. DECONCINI. Mr. President, does the majority leader contemplate taking up the Treasury-Post Office conference report tonight?

Mr. DOLE. We hope to do that without a rollcall vote. Does the Senator want a rollcall vote?

Mr. DECONCINI. No.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA APPROPRIATION BILL, 1986

The Senate continued with the consideration of H.R. 3067.

AMENDMENT NO. 988

(Purpose: To modify the provision relating to the use of funds to pay for abortions)

Mr. HUMPHREY. Mr. President, on behalf of myself and Mr. ARMSTRONG, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Hampshire [Mr. HUMPHREY], for himself and Mr. ARMSTRONG, proposes an amendment numbered 988:

On page 20, strike out lines 16 through 25 and insert in lieu thereof the following:

SEC. 118. None of the funds appropriated under this Act shall be used to pay for abortions for which Federal funds are not available under the Medicaid program (title XIX of the Social Security Act).

Mr. HUMPHREY. Mr. President, this is a followup effort to the effort which just preceded it relative to abortion.

Many Senators voting expressed concern that the language excepting the life of the mother was not in the measure before us just a moment ago.

So I propose and have offered this amendment that would exempt in the usual way that we have in Medicaid and many other programs the life of the mother in the matter of abortion.

That is by now a well-accepted approach by the Senate, indeed by both Houses of Congress.

Apparently many Senators and Congressmen make a distinction between the fundamental issue of abortion, on the one hand, and, on the other, the matter of forcing taxpayers to pay for abortion.

On another point that seems to be a matter of concern to Senators, I will confess it is not addressed in this amendment. Some Senators feel that it is an unwarranted interference with the business of the District of Columbia for the Senate to apply restrictions to the District in the manner and in the ways in which it can spend its own money.

I suggest with all sincerity, and I invite anyone to refute my argument on this, that Congress has not only the authority but the responsibility to pass judgment on expenditures by the District.

In my earlier debate remarks, I cited the provisions of the Constitution that reserved unto Congress legislative powers over the District and likewise read into the RECORD the relevant portion of Public Law 93-198 by which the District was granted limited home rule. I reiterate, relative to the Mayor and city council, no amount may be obligated or expended by any officer or employee of the District unless such amount has been approved by an act of Congress.

In other words, the statute granting the District limited home rule explicitly restricted and reserved to Congress all powers of appropriation.

So we have that power and with it goes the responsibility to review the purposes to which these appropriated funds are put.

Senators might not like that, but that is our responsibility.

So I confess and acknowledge that my amendment does not address that point because in the view of this Senator that point does not need to be addressed, but it does address the point relative to excepting the life of the mother.

Mr. President, also I think Senators are well aware with all of the arguments in this matter.

Mr. President, I especially want to solicit the attention of Senators who are opposed to abortion, and I especially want to solicit the attention of Senators who are opposed to taxpayer funding of abortion.

The purpose of the amendment I have offered is to ensure that funds appropriated by Congress will not be used by the government of the District of Columbia to pay for abortions, except when the life of the mother is threatened. If that language sounds familiar to Senators and staff, it refers to the perennial Hyde amendment to Medicaid, which the Senate has voted to attach to various bills since 1976.

Mr. President, I would point out that the fiscal year 1986 District of Columbia appropriations bill already passed by the House contains such a provision. The House of Representatives by vote of 221 to 199, attached to its version of the fiscal year 1986 District of Columbia appropriations bill language which forbids the District of Columbia to pay for abortions with funds appropriated by Congress. In other words, the House included in its bill language similar to the amendment which I have offered. It's important to note the language the House included is not exactly the same as the amendment now before the Senate. The difference is, where the amendment now before the Senate would permit the funding of abortion where the life of the mother is threatened, the House bill does not permit that exception. The point is, the language in the House bill is stricter than the language which I have offered. As a matter of fact, there was an effort in the House to include language making an exception in the case of a threat to the mother's life, but that effort was blocked by parliamentary maneuver.

Some who are listening to my remarks may be confused at this point. They may be saying, "But I thought we have always included language forbidding the District of Columbia to use Federal funds to pay for abortions." So we have. The problem is, the District has found another avenue to fund abortion using money appropriated by Congress. The purpose of my amendment is to block that avenue as well, so that the taxpayers are not forced to pay for abortion, a procedure which many find highly repugnant, to say the least.

Mr. President, the District of Columbia has a shameful, shocking record in the matter of abortion. For every 10 babies who are born alive in the Nation's capital, 15 were killed by abortion. No city in the country has such an awful ratio of abortion to childbirth.

In 1983, 4,393 unborn babies were killed by abortions paid for by the taxpayers. Within a few miles of where the Senate of the United States sits, 4,393 unborn babies were killed by abortions paid for with funds appropriated by the Congress.

To make matters worse, Mr. President, officials of the District of Columbia government have recently admitted their procedures in the area of abortion are lax. The District govern-

ment admits that it will pay for all abortions regardless of the circumstances or trivial nature of the pregnancy. A Philiadelphia Inquirer article—August 1, 1985—quotes Elizabeth Reveal, the District's budget director, as stating "We don't make the distinction" with respect to which abortions the District will fund. The article goes on to say, "Reveal * * * confirmed that the District's government has a policy of funding abortion on demand, and does not attempt to determine the circumstances of the pregnancy." This same government official also stated in the article that the District government pays for abortions for women who don't qualify for Medicaid funds. In addition, the District has no reporting requirements of abortion funding recipients. Also, the District, as stated in a letter to my office, notes "the District of Columbia Medicaid Program does not restrict abortion services furnished by providers." That means no restriction on gestational period of the pregnancy, the method used, et cetera. And, incredibly, the District screens recipient doctors only perfunctorily, if at all. One doctor, for example, in 1983, received $30,000, and in fiscal year 1984, $42,000, in taxpayer funds—money appropriated by this Congress—for performing abortions in the District. This year, that very doctor's license was surrendered to the District of Columbia government for various health violations after a woman died as a result of an abortion he performed on her.

Mr. President, I have noted several times already in my remarks that the District of Columbia has been using funds appropriated by Congress to pay for abortion. It's important for Senators to recall that the Congress has full powers of appropriation for the District of Columbia. Every penny the District government spends, irrespective of whether the funds come from the Federal Treasury or from the general fund of the District, must first be appropriated by the Congress. Federal authority over the District derives from the fact that the District is not a State, it is a Federal enclave. Article I, section 8 of the Constitution empowers the Congress to "exercise exclusive legislation in all cases whatsoever, over such District."

To be sure, Mr. President, the Congress granted the District of Columbia limited home rule in 1973. But, it is important to note that the powers of appropriation were reserved exclusively to the Congress. Public Law 93-198 states the following:

No amount may be obligated or expended by any officer or employee of the District of Columbia government unless such amount has been approved by act of Congress, and then only according to such act.

Therefore, the Congress in matters of appropriation is in effect and in reality the legislature for the District. There is no question of where the powers of appropriation lie with respect to the District. And there can be no question the Congress has a responsibility to discharge that power diligently.

I know the argument that will be raised against the amendment now pending. Opponents will say it interferes in home rule. That argument is a red herring, because as I have just outlined, the Federal Congress retained the responsibility to appropriate for the Federal city, the Federal enclave, the District of Columbia. Congress has never relinquished that responsibility. To suggest we are interfering in home rule by exercising the appropriations power which is our responsibility under the Constitution to exercise, is to make a hollow argument.

Or, perhaps, the argument will be made that somehow placing a restriction on the District in the expenditure of funds appropriated by Congress is something new. It isn't at all. We have been doing it for years. In fact, if Senators will take another look at the fiscal year 1986 District of Columbia appropriations bill now before the Senate they will see a number of instances where the Senate places restrictions on the District in the expenditure of funds appropriated under this bill.

Mr. President, I will list several examples of restrictions in this bill placed on the expenditure of funds under this bill. Section 109 states:

No part of any appropriation contained in this act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein. In section 109, the Congress restricts the District to spending the funds only in fiscal year 1986.

Section 110 reads:

Not to exceed 4½ per centum of the total of all funds appropriated by this act for personal compensation may be used to pay the cost of overtime or temporary positions.

Here the Senate places restrictions on the use of funds in this act to pay overtime or to pay for temporary help. Again, Mr. President, a clear-cut case of restrictions imposed by the Senate on the District of Columbia in the expenditure of funds appropriated by this act.

Section 111 reads:

Appropriations in this act shall not be available * * * for the compensation of any person appointed to a permanent position in the District of Columbia Government during any month in which the number of employees exceeds 32,511 * * *.

Here the Senate limits the total number of permanent employment positions in the District government by restricting the expenditure of funds for the hiring of persons beyond a monthly cap.

Section 112 reads:

No funds appropriated in this act for the District of Columbia Government for the operation of educational institutions, the compensation of personnel, or for other educational purposes may be used to permit, encourage, facilitate, or further partisan political activities.

Again, Mr. President, a clear example of the legitimate exercise by the Congress of its appropriations responsibility regarding the Federal city.

Section 114 reads:

None of the funds appropriated in this act shall be made available to pay the salary of any employee of the District of Columbia Government whose name, title, grade, salary, past work experience, and salary history are not available for inspection by the House and Senate committees on appropriations * * * the Senate Committee on Governmental Affairs * * *.

Another example of a congressional restriction on spending funds appropriated by the Congress.

Section 116:

None of the funds contained in this act shall be made available to pay the salary of any employee of the District of Columbia Government whose name and salary are not available for public inspection.

Section 117:

No part of this appropriation shall be used for publicity or propaganda purposes or implementation of any policy including boycott designed to support or defeat legislation pending before Congress or any State legislature.

Section 122:

None of the funds appropriated in this act may be used for implementation of a personnel lottery with respect to the hiring of fire fighters or police officers.

Section 123:

None of the funds appropriated by this act may be obligated or expended by reprogramming except pursuant to advance approval * * *.

Section 128:

None of the funds appropriated by this act may be used to transport any output of the municipal waste system of the District of Columbia for disposal at any public or private landfill * * * until the appropriate State agency has issued the required permits.

Section 132:

None of the funds appropriated under this act may be used to award any contract that is not in compliance with the District of Columbia laws and regulations * * *.

Those are 10 examples, Mr. President, of the use by Congress of restrictions on the expenditure of funds appropriated by this act, restrictions placed on expenditure of funds irrespective of whether those funds come from the Treasury or from the general fund of the District of Columbia.

I have one more, Mr. President. I have saved the best for the last. If Senators will refer back to section 106 on page 17, here is what it says:

Appropriations in this act shall not be used for or in connection with the preparation, issuance, publication, or enforcement of any regulation or order of the Public Service Commission requiring the installation of meters in taxicabs * * *.

That means, Mr. President, that the District of Columbia may not use any

of the funds appropriated in this act to bring about the installation of meters in taxicabs. Meters in taxicabs, Mr. President!

My colleagues, to return to my amendment, the Senator from New Hampshire seeks to block the expenditure of public funds appropriated by this act to pay for abortions in the District of Columbia. there is an exception, in cases where the life of the mother is threatened by continuing the pregnancy to term.

I hope Senators will not argue that somehow the effort of the Senator from New Hampshire to restrict the way the District spends funds appropriated by this act represents something new. I hope Senators will not argue that in seeking to restrict the District of Columbia from using funds in this bill to pay for abortions, that the Senator from New Hampshire is seeking to establish a new precedent, that we are breaking new ground by interfering in the affairs of the District. It just is not so. And I hope Senators will not argue that blocking the installation of meters in taxicabs, or blocking the transport of municipal wastes outside the District until the receiving State has authorized it, are matters more important than abortion. Surely, Senators will not argue that point.

Mr. President, to sum up, the Senator from New Hampshire has offered an amendment which prohibits the District of Columbia Government from paying for abortions with funds appropriated by this Act. Restrictions on the manner in which the District may spend money are nothing new. This bill is replete with them.

The Congress has a clear responsibility under article I, section 8 to legislate for the Federal district known as the District of Columbia. Even in granting limited home rule to the District in 1973, the Congress explicitly retained complete powers of appropriation for the District, and the Congress has continually exercised those powers.

So, Mr. President, Congress clearly has a responsibility under the Constitution, under statute and under precedent to appropriate every penny spent by the District of Columbia.

The question now is, does the Senate want to permit the District of Columbia to pay for abortions with funds appropriated by this act, or does the Senate want to prohibit such expenditures?

Mr. President, Senators are split on the fundamental matter of abortion. But, inasmuch as the Senate has repeatedly refused to permit the Medicaid Program to pay for abortions and the Senate has refused to permit Federal employees health insurance to pay for abortions, one would assume that a majority of Senators are opposed to taxpayer funding of abortions. In other words, some Senators have drawn a distinction between their position on abortion itself and their position on funding of abortion.

I assume, Mr. President, based on the action of this body in the past, that a majority of Senators do not wish to force the taxpayers to pay for abortions. That very issue is before us now, and I urge the Senate to support the pending amendment. I urge the Senate to prohibit the expenditure for abortion of funds appropriated by the Congress for the District of Columbia.

Finally, Mr. President, I point out again that the House by a recorded vote attached similar language to its bill. The language which the Senator from New Hampshire has laid before the Senate is less strict than the House language, inasmuch as my amendment would permit the funding of abortion where the life of the mother were threatened by carrying the pregnancy to term.

I know the other side has a few remarks to make and then we anticipate a tabling motion.

I hope that if the Senator from New Hampshire prevails we will not have a filibuster. I hope that if we win that does not mean we lose because certain Senators propose to restrict our rights in this body.

I myself have used the filibuster for selective purposes. But may I say that not since the great civil rights debates of the 1960's, I guess it was, has the filibuster as a tactic been so broadly applied as the Senator from Ohio proposes to apply it and the manner in which he proposes to apply it constitutes a gag rule. I think if the Senator reflects upon that he will not want to be associated with such a tactic.

Mr. President, I yield the floor at this time.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. WEICKER. Mr. President, I have not seen the right of debate abused by any Senator on this floor, the Senator from Ohio included. From time to time we have all used extended debate in getting our point across.

I wish to make clear that since I have stood shoulder to shoulder with him usually on many of the same issues, he has been a voice of great conscience, and I wish the record to show that.

I do not think in any way that he has exercised his rights so as to apply a gag on anyone.

It could be argued, I suppose, that the whole issue of abortion has been a gag on any sort of legislative progress in any other area at all around here. We seem to be voting and talking about abortion all day long, and believe me it is not the Senator from Ohio or the Senator from Connecticut who raises the issue.

I am not going to go ahead and imply that to anyone else. Everyone has the right to go ahead and raise anything he deems to be important.

So I wish to make clear in light of the comments that were made relative to the Senator from Ohio. Let me tell the Senate that he is considered a gadfly around this body just as I am considered that also when it comes to many issues. But sometimes it makes us all stop and think, and there have been some pretty odorous items of legislation he prevented from going through in the dead of night in the last minute.

I think the record should state that as far as the Senator from Ohio is concerned.

Let us get on with the vote on this. I hope the amendment of the Senator from New Hampshire will be defeated, defeated in the sense that it again raises this issue vis-a-vis the residents of the District of Columbia.

Does the Senate know what is going to happen next year? We are going to have an amendment on the Interior appropriations bill trying to go ahead and put abortion language vis-a-vis the territories. Is that going to be the next one?

We have had the prisons and we now have in the District. Now we are going to have the territories.

I always thought, at least it was one of the reasons I considered at one time when I supported our friend, the Senator from Arizona when he ran for President, that conservative Republicans believed in local autonomy and let people make their own decisions right down to an individual being able to make his own decision or a city being able to make its decision or a State. I am a States' righter in that sense.

But all of a sudden we have a Federal Government that as far as everyone, from the individual to the city, now to the territories, to States, we are going to tell them what to do insofar as their morality is concerned.

I do not worry about the morality of this Nation. It usually shakes out pretty darn well. It is only when someone tries to impose on everyone else that we end up with a consensus morality which is usually the worst type of morality in this country.

I hope the amendment will be defeated in the sense, first, of being a trespass on local autonomy of the District of Columbia. The language in the bill as it is now written is perfectly adequate insofar as abortions are concerned.

I do not feel that an amendment in any way is necessary to accomplish again the ends cited by my distinguished colleague from New Hampshire.

Mr. METZENBAUM and Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. METZENBAUM. Mr. President, let me say that this makes 436 opportunities. I said before in the debate 411. I was wrong. It was 431. This makes 436 times that this body or the other body has been called upon to act in connection with this issue. We get a little bit more off base each time we do.

What the Senator from New Hampshire is proposing is in my opinion hard to comprehend.

How can you possibly be saying to the people of the District of Columbia that, "You raise 80 percent of all the money that you spend, and we are going to deny you any Federal funds, if you spend any of your own money for a purpose with which we do not agree"?

The Senator from Connecticut says it so well. What kind of concept of home rule is that?

I believe that if we are going to do that the day is not far distant, as some previous speaker has indicated, and I think it was the distinguished Senator from New Jersey, when we will be denying revenue sharing funds, or there will be those proposing it, if any State has any laws on its books having anything to do with the right to have an abortion which, as we all know, has already been determined by the Supreme Court of the United States as a legal and lawful one.

The Senator from Ohio just thinks that there are times when you should call a halt in the legislative Halls. But some people around here do not seem to get any fun out of participating in the legislative process unless they get an opportunity to call up another antiabortion amendment.

Enough is enough.

I have said previously I am not going to try to change the present law. The present law is that which it is and I do not believe there is a sentiment in Congress to change it, although I believe it should be changed. I believe it is too restrictive at the moment.

But I am not prepared to try to make that effort, but I believe that we should have an opportunity. The other day we got into the State, Commerce, and Justice Department bill. We had to have an amendment on that.

Now we have the District of Columbia bill, and I am sure when we get foreign aid or when we get the Department of Defense legislation or we get any other kind of legislation, we always have to have an amendment on abortion.

There are people out there in the countryside who are concerned about this issue on both sides of it.

But if they do not know where we in the Senate now stand, it is because they have not had any interest in looking at the record. Each of us has made his or her record over a number of times. I believe that this amendment, which would deny the District of Columbia the right to expend its own funds, just goes too far. It is my understanding some Member of this body is at some point going to offer a motion to table. I would hope that that would be the case.

So I just hope that when the issue is brought before this body, if there is a motion to table made, that the body will see fit to do just that and then we might go on about the business of enacting the legislation.

Mr. ARMSTRONG. Mr. President, I rise to congratulate my colleague from New Hampshire for drawing attention to the Senate on this matter and to ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ARMSTRONG. Mr. President, if I could have the attention of the Senator from New Hampshire, I wish to be absolutely clear that we have a clear understanding of the amendment, which I am proud to sponsor with him. It is my understanding, I say to the Senator, that this is simply the Hyde language. It is the usual formulation. It is the exact same concept and approach which appears in other appropriations and other authorizing statutes. Could the Senator inform me if I am correct about that?

Mr. HUMPHREY. The Senator is correct. The amendment reads:

> None of the funds appropriated under this Act shall be used to pay for abortions for which Federal funds are not available under the Medicaid Program.

That is the standard, boilerplate language used over and over again, which has been accepted many times by the Senate. It means, in plain English, that if the life of the mother is threatened by the carriage of the fetus to term, then the abortion prohibition is lifted in that case.

Mr. ARMSTRONG. Am I correct in recalling—and I do so for the record only and for Senators who may be listening, or others who may study the record of these proceedings—that that language, so-called usual formulation, as I believe the Senator has described it properly, is, in fact, language which was hammered out over the course of many, many debates, after the consideration of many different versions of the amendment in amendments which were debated and voted on in this Chamber and in the other body, that went through conference, and that has been, in fact, the subject of a great national debate stretching over a number of years? In other words, this is not just something somebody thought up but, in fact, is the evolving policy of the U.S. Government, and these words have become the expression of the present state of the will of the Congress as it has been applied over and over again in other pieces of legislation.

Mr. HUMPHREY. The Senator is correct. And that has been so since 1976.

Mr. ARMSTRONG. Am I correct, also, that this is, in effect, the same formulation which has not only been agreed to on previous occasions, but which was quite recently agreed to by unanimous consent on the Labor-HHS bill as it went through this Chamber?

Mr. HUMPHREY. The Senator is correct, although there might have been some other considerations involved in that particular arrangement.

Mr. ARMSTRONG. The reason I want to raise that is twofold: First, we have just had a vote on a novel form of an antiabortion amendment. I voted for that. I thought the Senator from North Carolina was correct, but I can well understand why other Senators would not be disposed to plow new ground. I hope, in due course, that others will feel, as I do, that the Senator from North Carolina was on the right track.

But that is not what we are voting on now. What we are voting on now is to apply a well-established principle of law, a principle which has been worked out and hammered out over a number of years through many debates, as the Senator from Ohio has pointed out, and which has come to represent the consensus opinion in this evolving area of the law. All we are doing is saying that what applies elsewhere ought to apply also in the District of Columbia.

Now, the Senator from Ohio has made the point—and perhaps others feel deep down inside the same sense of exasperation which he expresses—that we have debated this before, that this has been raised by prolife members of this body and by prolife organizations throughout the country over and over and over again. And, in some sense, the Senator is correct. And I do not want to treat lightly his exasperation.

But I do want to keep the record straight. It was not the Senator from North Carolina, the Senator from New Hampshire, or the Senator from Colorado that raised this issue and made it a national issue and that caused this issue to be debated and voted on in the U.S. Senate. It was the Supreme Court. In the decision of Roe versus Wade, the Supreme Court unexpectedly and, in the opinion of many legal scholars, improvidently overturned the legal status which had prevailed in this country for a couple hundred years.

Abortion policy had never previously been thought to be a national issue. Indeed, the state of the law on abortion was quite different in Colorado than it was in Mississippi or New

Hampshire or other places. We are a nation of different cultural and ethical values. There are different distinctions for many statutes, many day-to-day aspects which regulate our lives. And one of these which was always a State issue, not a national issue, was abortion, until the fateful decision of Roe versus Wade. And it is that case and the implications of it which suddenly nationalized this matter and brought it into the national legislative body.

No one regrets that more, I judge, than the Senator from Colorado, and maybe others. It certainly is not a matter that I seek to raise. I want to dispose of it. I would dispose of it by a single vote here tonight so that we never had to come back to it again.

But what has happened is this: When Roe versus Wade became the law of the land, then those of us who think it is important to protect the lives of unborn children had to begin to look around and scramble around and find a legal theory which would stand the constitutional test by which we could, to the extent permitted by the court, defend the lives of these unborn children. That is why this has taken years to evolve and that is why it has taken lots of amendments.

Let me say to my friend from Ohio, for whom I have the greatest respect, particularly because he is a Senator who stands up and fights for what he believes in, I am confident if the Senator from Ohio believed as I do and, as I am convinced, a majority of the Members of this body believe, that what we are dealing with is an innocent human life, that he would be on our side. I think that is where the dividing line is.

Some people have thoughtfully considered this matter and have come to the conclusion that the unborn fetus is not a human life; that it is not a little baby. I do not know of even one person—there may be such an individual—who thinks that that is a real person, a real little baby, and yet who, nonetheless, takes a permissive attitude on abortion.

By and large—now, there might be an exception to this, but, if so, I would judge it to be a very rare exception—if you think that is a human baby, then you are prepared to vote for perhaps almost any reasonable measure to discourage or restrict or confine or prohibit resorting to abortion. Maybe not absolutely everybody, but most of us who have that feeling are prepared to go a long ways, and yet we recognize that it does involve a serious invasion of the rights and privacy of the mother and the father and others who may be involved, and we could not justify such an invasion did we not think that that was an innocent human life, an innocent baby for whom we feel a need of protection.

Mr. METZENBAUM. Will the Senator from Colorado yield for a question?

Mr. ARMSTRONG. Mr. President, I am very reluctant to be discourteous to my friend from Ohio, but I am about to conclude my statment. If I could finish my thought, I will yield the floor.

Mr. METZENBAUM. I would like to ask a question when the Senator concludes.

Mr. ARMSTRONG. That will be in just a moment, and at that time I will be happy to yield.

So, the issue, in the opinion of those of us who will vote for the Humphrey amendment, is life. The issue is not appropriations policy. The issue is not how many times it is brought up. It is not how many times we have had to think about this issue and vote on it; although it is not surprising, let me say to Senators, that it takes a lot of votes to get this issue across. I say that as one who came to this city to be a Member of the Congress with a very different attitude toward abortion than the one I now hold. When I was a member of the State legislature, I was one of those who voted for what was then regarded as a very liberal abortion policy. Honestly, I just did not know what the issue was and, as a consequence, like many, perhaps many in this Chamber, I was persuaded that the overriding issue was the privacy and the rights of the mother.

What caused me to change, and what I judge is causing many Senators to change, and an enormous change in sentiment throughout this country in the last decade, is the growing body of medical evidence, of scientific evidence, and the testimony in the lives of people who are most directly affected who have spoken up over and over again that that is not a blob within the pregnant mother, that it is not an "it" or a something, that it is a little baby, a little baby who deserves our compassion and our care and concern. That is what is at stake.

Should we have to vote on this 400 times? I hope we do not have to vote on it again. But I will just say to the Senator from Ohio and others that this is the slavery issue of the 20th century. This is the preeminent civil rights of issue of the 1980's. This is, in my opinion, the human rights issue of our time. And if we turn our backs on it because we want to go home when it is 5:30 or 6 o'clock in the afternoon, or because we voted on it a lot of times, then we are doing an injustice, I believe, to our laws and our beliefs.

I believe this amendment is going to carry today because it is similar to amendments that have previously been adopted on other bills.

But if it does not, it still is performing an educational function.

My final point is this: The Senator from Connecticut makes the point that this could be perceived as a States' right issue. I want to associate myself with him not only in support of the Senator from Arizona in his Presidential bid, but also in support of States' rights. By God, I am a States' righter. I am a guy who thinks this issue, and a lot of others that we handle around here, ought to be settled in the State legislatures, and not in the U.S. Senate.

That is exactly where this issue is lodged prior to Roe versus Wade. It was Roe versus Wade which improvidently federalized this issue. If I could figure out how to defederalize it I would be glad to do that, and leave to the conscience of State legislatures to wrestle with it. But we cannot do that. The Court has put this in our lap.

Even if, however, we were in a States' rights mood the amendment of the Senator from New Hampshire would be proper, and in order because with respect to the District of Columbia, the Congress unavoidably exercises many of the same functions with respect to the District of Columbia that the State legislature would exercise within the territory or jurisdiction of a State.

We in effect have that kind of responsibility for the District of Columbia.

So my friend, I want to sum it up this way. The issue here tonight is simple. It is the same issue we voted on on many occasions in the past. It is life. It is whether or not Government money ought to be used to finance abortion. If you think Government money should not be so used in the District of Columbia, if you think we should apply in effect the Hyde amendment to the District of Columbia as we have in so many other areas of the law, then I urge you to vote yes on the Humphrey amendment.

Mr. WEICKER. Mr. President, I ask a simple question to put it in the context to be responded to by the Senators from Colorado and New Hampshire.

If indeed the issue is solely life on the amendment by the Senator from New Hampshire, then would the Senator from New Hampshire be willing to take out of his amendment those moneys that are raised by the District of Columbia?

In other words, there is more than just life is what I am trying to point out to my colleagues. There is the issue of life fairly stated by the Senator from Colorado. There is also the issue here that this amendment applies to 80 percent of the revenues of the District of Columbia which are raised by the District of Columbia.

So there is brandnew ground being plowed here in the sense of the second part of this amendment. If you want to leave it just as a vote up and down on the Hyde amendment, then I would

suggest a modification of the amendment to exclude revenues raised by the District of Columbia.

Mr. ARMSTRONG. Mr. President, if the Senator will yield, I will defer, of course, to the principal sponsor of the amendment.

If I may, my answer is very simple. It seems to me that with respect to Government money—that is, money raised through the D.C. government, through the revenue process of the District—that we cannot escape our responsibility. It is not similar to the State Legislatures of Colorado, Connecticut, or Virginia. The D.C. government is our creature. We have a responsibility to make a policy decision.

I want to stress, however, that this amendment does not take the next step and say that abortions are per se illegal within the District of Columbia. It does not outlaw them. It simply says Government money may not be used for this purpose.

Mr. DENTON. Mr. President, I rise in strong support of the amendment offered by the distinguished Senator from New Hamspshire. For nearly a decade, the Congress has adhered to a policy that prohibits the use of taxpayer funds to pay for human abortions, except when the life of the mother is threatened. The policy has the support of the great majority of Americans because it recognizes the inherent wisdom in not forcing taxpayers to support a procedure that leads to the destruction of innocent human life.

In recent years, the Congress has extended the policy to prohibit the use of taxpayer funds to provide nontherapeutic abortions through Federal employee benefit plans. In other words, Congress has refused to pay for abortions obtained by those dependent upon Medicaid or by those on the Federal payroll. One glaring inconsistency remains, however.

The District of Columbia continues to use so-called local funds appropriated by the Congress to provide taxpayer-funded abortions on demand. According to the Alan Guttmacher Institute, there were some 4,393 tax-funded abortions in the District of Columbia in fiscal year 1983. The high rate of taxpayer-funded abortions no doubt helped the District achieve the terrible distinction of having the highest abortion rate in the country. In the District, the number of abortions now regularly exceed the number of live births. Some people might say that the decision by the District to pay for abortions is simply a byproduct of the autonomy given the District under "home rule." The argument is that the Congress has no right to prohibit the District from using "local funds," generated by various taxes and fees levied by the District and appropriated by the Congress to be used by the District.

In remedying the injustice created by the use of public funds to destroy innocent human life, Congress cannot hide behind "home rule." As the national Right to Life Committee has pointed out, the appropriations bill contains restrictions on matters far less important than protecting innocent human life. If Congress can, in this bill, change the name of a District street, regulate the use of taxi meters, and set policy for overtime compensation and hiring lotteries, then we can stop funding the destruction of innocent lives.

Under section 601 of the District of Columbia Self-Government and Self-Government Reorganization Act, Congress specifically reserved the right to exercise its constitutional authority as the Legislature for the District of Columbia. I can think of no more pressing circumstances demanding the use of that congressional authority than the need to address the use of public funds for nontherapeutic abortions.

I strongly urge all of my colleagues to support Senator HUMPHREY'S amendment.

Thank you, Mr. President.

Mrs. KASSEBAUM. Mr. President, I want to explain briefly my reasons for opposing the amendment offered by the Senator from New Hampshire, as I do not as a general rule support Federal funding of abortion. I do believe there are some instances, such as cases of rape or incest, where assistance is appropriate. The failure of the Humphrey amendment to include these exceptions weighs heavily in my decision to oppose it.

What troubles me more about the amendment, however, is its attempt to extend the prohibition against abortion funding beyond Federal dollars. One reason that I do not generally support Federal funding of abortion is that I sympathize with the concerns of taxpayers who do not want their income taxes spent for this purpose. But, this amendment is not limited to Federal funds; it extends as well to the use of tax dollars raised by the District of Columbia from D.C. residents. The District raises local revenues just as our various State governments raise funds through State income and property taxes. It is true that the District has a unique relationship with the Federal Government, such that all of its funds must be appropriated by Congress. This does not, however, change the fact that we are talking about local—not Federal—tax dollars. Because we can dictate the use of local D.C. moneys does not mean that we should.

More and more, we are being presented with proposals which are described as Federal abortion funding limitations, but which in fact have quite different effects. Earlier this year, the Senate debated international family planning policy. Although we heard a great deal about Federal funding of abortion abroad, that never was the issue. The use of U.S. funds for abortion in international family planning programs has been flatly prohibited for over a decade. The real issue in that debate was the viability of our international family planning programs and the extent to which we should dictate to private organizations how they spend private, non-U.S. funds.

By the same token, the debate over this amendment is not about Federal funding of abortion. The bill reported by the Appropriations Committee prohibits the use of Federal funds for abortion in the District of Columbia except in cases of rape or incest or where the life of the mother would be endangered. Rather, this debate is about the extent to which Congress should dictate how the District of Columbia spends its own money.

Our tendency to move further and further afield from the real issues at stake results in bad public policy and a deterioration of public debate. I hope that my colleagues will join me in opposing this amendment.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I move to table—excuse me.

Mr. SPECTER. Mr. President, will the Senator withhold the motion for just a moment?

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Very briefly, I think it important to note that the District of Columbia raises some $2 billion a year in taxes from District residents, and this factor is very significant in terms of what ought to be the District's right to make a determination of its own as to how it uses its funds.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wyoming to lay on the table the amendment of the Senator from New Hampshire. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. EAGLETON. Mr. President, on this vote, I have a live pair with the junior Senator from Massachusetts [Mr. KERRY]. If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KERRY] and the Senator from West Virginia [Mr. ROCKEFELLER] are necessarily absent.

I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

The PRESIDING OFFICER (Mr. GOLDWATER). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 54, nays 41, as follows:

[Rollcall Vote No. 291 Leg.]

YEAS—54

Baucus	Glenn	Moynihan
Bentsen	Goldwater	Nunn
Biden	Gore	Packwood
Bingaman	Gorton	Pell
Boren	Harkin	Pryor
Bradley	Hart	Riegle
Bumpers	Heflin	Roth
Burdick	Hollings	Rudman
Byrd	Inouye	Sarbanes
Chafee	Kassebaum	Sasser
Chiles	Kennedy	Simon
Cochran	Lautenberg	Simpson
Cohen	Leahy	Specter
Cranston	Levin	Stafford
DeConcini	Mathias	Stevens
Dixon	Matsunaga	Warner
Dodd	Metzenbaum	Weicker
Evans	Mitchell	Wilson

NAYS—41

Abdnor	Gramm	McClure
Andrews	Grassley	McConnell
Armstrong	Hatch	Melcher
Boschwitz	Hatfield	Murkowski
D'Amato	Hawkins	Nickles
Danforth	Hecht	Pressler
Denton	Helms	Proxmire
Dole	Humphrey	Quayle
Domenici	Johnston	Stennis
Durenberger	Kasten	Symms
East	Laxalt	Thurmond
Exon	Long	Trible
Ford	Lugar	Wallop
Garn	Mattingly	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Eagleton, against.

NOT VOTING—4

Heinz	Rockefeller
Kerry	Zorinsky

So the motion to table was agreed to.

Mr. METZENBAUM. I move to reconsider the vote by which the motion was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I understand there are a couple of amendments that can be accepted. I am wondering if anybody is going to insist on a rollcall vote on passage? I have just been advised that there has been a request for the yeas and nays.

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. President, I ask unanimous consent that the committee amendment be laid aside.

Mr. METZENBAUM. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MATTINGLY. Mr. President, I suggest the absence of a quorum.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia has called for a quorum.

Mr. MATTINGLY. Mr. President, I do not suggest the absence of a quorum.

EXCEPTED COMMITTEE AMENDMENT

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment on page 20, lines 14 to 25 was agreed to.

Mr. SPECTER. I move to reconsider the vote.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 989

(Purpose: To freeze sums available to the District of Columbia Government for fiscal year 1986 contractual and related professional services at the 1985 level for such services)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask of its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY] proposes an amendment numbered 989.

At the proper place in the bill, add the following new section as follows:

"SEC. ——. Notwithstanding any other provision contained herein, none of the funds appropriated under this Act may be used to advertise for or award, retain, or otherwise obligate payment for contractual and related professional services for District agencies at any level which would directly or indirectly exceed the level of expenditure or obligation for such services for fiscal year 1985, or the sum of twenty-one million, seven hundred eighty thousand dollars ($21,780,000), whichever is the lesser.".

Mr. MATTINGLY. Mr. President, the amendment that I am offering would freeze the funds available in the bill for consultant services at fiscal year 1985 levels, or $21.78 million. A savings of $5.2 million.

It is my understanding that the District had requested about $27 million in fiscal year 1986 for these so-called consultant services but the exact figure is apparently unknown, because repeated requests to D.C. officials for the information have not produced the requested data. As many of my colleagues are aware, I have for some years been studying the area of consultants and studies. It is nothing new to me to find bureaucrats either unwilling or unable to tell me how much money they are spending on studies and consultants. These contracts are subject to a multitude of abuses because of a general lack of controls. But the bureaucrats love them for that very reason. They have so much discretion in spending this money. Usually, there is no competitive bidding to worry about. The result is that too often the taxpayers' money goes to somebody's friend or political supporter.

Recent news stories illustrate some of the problems in this area. I ask unanimous consent that at the appropriate place in the RECORD, the article "D.C. Official Hired Friend in Minnesota as Consultant" from the Washington Post September 10, 1985 be printed.

The PRESIDING OFFICER. Without objection, it is so ordered. [See exhibit 1.]

Mr. MATTINGLY. This article concerns a consulting contract given by the District's Public Health Commissioner to an old college friend. The friend was paid $245 a day as a full-time consultant despite the fact that he continued in his full-time job in Minnesota. Under this contract awarded on a noncompetitive basis, over $38,788 was paid to the consultant over 7 months. The result was a four-page report that recommended that the Commissioner not work so hard. This ludicrous contract may not be completely representative of the way the District Government spends the money we give it for consulting services. But the fact that it was awarded, and the money paid out, no questions asked, is a clear sign that proper controls are not there.

I am not singling out the District Government. The problem with identifying and controlling these types of expenditures is not limited to the budget of the District. The same problems exist in every area of the Federal Government. The only difference is in scale. The Defense Department wastes hundreds of millions of dollars on useless consultants and outside studies. I have spent many hours trying to unravel that maze in the Pentagon. As my colleagues might recall, last year an amendment of mine similar to the one I am offering today cut $1 billion from the Defense Appropriations bill.

The distinguished chairman of the subcommittee has recommended that certain efforts be undertaken to obtain more information on exactly how the D.C. government awards such contracts. Pending that full review, I believe that it is prudent and justified to freeze the money available for such services.

I urge the adoption of the amendment.

EXHIBIT 1

[From the Washington Post, Sept. 10, 1985]

D.C. OFFICIAL HIRED FRIEND IN MINNESOTA AS CONSULTANT

(By Sandra Evans)

Soon after becoming the District's public health commissioner last year, Dr. Andrew D. McBride hired an old college friend as a $245-a-day, full-time consultant—even though the man lives in Minnesota and maintained his full-time job there at Carleton College.

Charles E. Dickerson was awarded a consultant's contract on a noncompetitive basis

and was paid a total of $38,788 for seven months of work from last September to early April, according to city records and officials. During most of that period, records show, Dickerson billed the District for 40-hour work weeks.

In addition, according to a Department of Human Services audit, McBride ran up $4,800 in bills on his government car phone in the first six months of this year, mainly because of 202 calls made to Dickerson's Minnesota home and office. McBride sometimes called Dickerson on the car phone two or three times a day, records show.

Dickerson, who has a PhD in history, submitted a four-page "final consultative report" that tells McBride not to work so hard and gives 21 general recommendations, including "the possible phasing out of selected programs" without stating which ones.

The contract and documents submitted under it were obtained by the Washington Post through the Freedom of Information Act.

The report, sprinkled with sayings and mottoes such as "Physician heal thyself," warns at one point that bureaucracies are "doubled-edged swords."

"Therefore, consider adopting a patient but tenacious, a tolerant but determined, a sympathetic but not empathetic posture toward the CPH [Commission of Public Health] bureaucracy," Dickerson advised. "Realize that while the structure may sap your energy in order to do, it is conversely very likely to consume the energy of another in order to undo."

In a later report summarizing his consulting work, prepared in response to inquiries from The Post, Dickerson said that in advising McBride on bureaucratic reform "there was major consideration of the tenets of Confucianism."

He also quotes a number of other philosophers—as well as former baseball player Yogi Berra—in the highly theoretical 35-page supplemental report he has entitled "A Tiger by the Tail or a Ship by the Helm."

Dickerson also developed a proposal for the Kuwaiti government to invest in economic development in the District. The plan was submitted unofficially to the Kuwait Embassy here.

An embassy spokeswoman said it was not seriously considered and city officials say it is not being pursued.

McBride said in a recent interview that he relied on Dickerson for "an outside perspective" and as a "sounding board" in the early days of his administration. "He has a proclivity for getting into a topic from all angles," McBride said, adding that Dickerson is "familiar with issues of minorities."

McBride and Dickerson knew each other at Lincoln University in Pennsylvania, where they were both members of the class of 1965. Dickerson said that the commissioner chose him for the job because McBride knew him and his work.

"It's part of a network. Some of the guys who went to school with us went into public management," he said. McBride "asked if I'd help him get started," saying he wanted a fresh view, Dickerson said.

"I consider him a colleague. I can't deny he is a friend as well," McBride said. "We got out money's worth from Charles Dickerson."

However, David Rivers, director of the D.C. Department of Human Services and McBride's boss, said he was concerned to learn that Dickerson was still working at Carleton while he was submitting bills to the District for 40-hour work weeks.

"I could not say the city got $38,000 worth of work" from Dickerson, Rivers said, based on his review of what was submitted under the contract before The Post's inquiries. Rivers added, however, that he had not yet reviewed the summation Dickerson wrote subsequently and so had not made a final judgment.

Rivers also said he was "alarmed" at the calls to Minnesota on McBride's car phone and that he has ordered McBride to stop making long distance calls from his car. Rivers ordered an audit of the car phone records and said he would "take additional action" once it is completed.

City Council member Polly Shackleton (D-Ward 3), chair of the council's Human Services Committee, said after being shown the Dickerson contract file that she has "great concerns" about it and intends to pursue it further.

The Dickerson contract is just one of $1.06 million in personal services service contracts let by the public health commission in the first 10½ months of this fiscal year, according to a list compiled by DHS. Most are for specialized medical services, but some are for consulting work.

A "Determination and Findings" document required to justify the Dickerson contract was signed by Vallie D. Byrdsong, DHS contracting offcer, last Nov. 1—nearly two months after the start of the contract period. Byrdsong said that the city had signed a "letter contract" with Dickerson earlier stating its intention to contract with him.

"We do that on an ongoing basis," Byrdsong said. "We just have a paper mill going over here and the contract has to go through a number of processes." The document states that advertising the contract for bids would be "impracticable" and that the services could not be performed by the D.C. government.

The contract was for $24,000, but Dickerson eventually was paid $38,788 without the contract being modified, said Byron Marshall, DHS deputy controller. McBride felt that "he received more services than he negotiated for," Marshall said.

Dickerson billed the District for a final payment of $16,000 for the last two months of consultant work. The bill stated the payment was for planning and evaluating a health commission summer education program and a citywide youth health institute. Under this part of the contract, Dickerson produced a five-page report outlining how participants in the youth program could be divided up, listing general areas of activity and stating 10 purposes of the program.

He also submitted a five-page evaluation and elaboration of a proposal McBride had made to the Board of Education to establish a youth drug abuse institute. This included a cover sheet, a one-page introduction, a page of definitions and a two-page outline and summary of the idea.

Dickerson is Carleton College's director of Third World Affairs and an assistant professor of history, and is involved with minority student recruitment and retention. James Shoop, Carleton director of college relations, said Dickerson goes to Washington for Carleton frequently to deal with college business but that he generally is on campus. "He's putting in his full time here," Shoop said.

Asked if he had worked a full work week for the District of Columbia, Dickerson said in an interview, "I wouldn't say it that way," but added that he had spent about 50 percent of his time in the District and 50 percent at Carleton. He put in invoices for 40-hour work weeks because "that was the way I was instructed to make out the invoices to . . . take care of expenses and travel," he said.

The contract specifies that the billing is supposed to be on a "when actually employed" basis. McBride, who as the contract administrator signed off on the contract vouchers, said he did not know about the specific billing procedures but that "I knew we were getting our money's worth."

About the frequent car phone calls, McBride said this reflected his management style because he was often in the field and would consult with Dickerson when crises arose. McBride called Dickerson's summary report "brilliant."

"Washington D.C. is not a quiet lake nor an easy flowing river; instead it is the high seas—an ocean," Dickerson wrote in the summary report. "The man at the helm of an administrative flotilla must be a skilled, trained and experienced navigator. He must not only know the compass, the sextant and the astrolabe, he must also know the currents, the winds and the stars. He must know the sailors, know his ship and know his cargo."

While Dickerson no longer is under contract directly with the District government, he works indirectly for the city. Another city contractor, Decision Information Systems Corp. (DISC), previously Granville Corp., has hired him to work on another management study for the public health commission, Dickerson said.

McBride said he had introduced Dickerson to the Granville group but did not think Dickerson was hired on as a favor to him.

Mr. MATTINGLY. Mr. President, I believe this amendment has been cleared by both the chairman and the ranking member. I ask for its favorable consideration.

Mr. SPECTER. Mr. President, the proposed amendment establishing a freeze on consultants' fees has been taken up with the managers of the bill and it is agreeable.

Mr. LAUTENBERG. Mr. President, the amendment is agreeable on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 989) was agreed to.

Mr. MATTINGLY. I move to reconsider the vote.

Mr. SPECTER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 990

(Purpose: To provide that no Federal funds be used to obtain a major league baseball franchise for the District of Columbia and to express the neutrality of the Congress with respect to awarding of any such franchise)

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

51-059 O-87-32 (Pt. 22)

The Senator from Colorado [Mr. HART] for himself, Mr. LAUTENBERG, and Mr. LUGAR, proposes an amendment numbered 990:

On page 27, between lines 8 and 9, insert the following:

SEC. 134. (a) None of the Federal funds provided in this Act shall be used by the District of Columbia to obtain a major league baseball franchise to be located in the District of Columbia.

(b) The Congress expresses no preference with respect to the activities of any municipality to obtain a major league baseball franchise.

Mr. HART. Mr. President, I offer this amendment on behalf of myself, the Senator from New Jersey, [Mr. LAUTENBERG] and the Senator from Indiana, [Mr. LUGAR], whose cooperation I appreciate.

The Senior Senator from Colorado, during his tenure in this body, has always tried to demonstrate sensitivity to the unique situation which confronts this Nation's seat of government. Obviously, there is no municipality in this country other than the District which must submit its budget for ratification by the Congress. The outcry in Denver, or in Philadelphia, or in South Orange, would be deafening if local governments in those communities had to suffer this particular indignity.

This Senator has tried to respond on issues involving home rule, voting rights and the like. In essence, each of us in this Chamber have representational duties not only for our home constituencies but for D.C. residents as well. It is often difficult for us to find an effective balance between the interests of our own constituencies and those of the people of Washington, DC.

That said, Mr. President, I was very concerned in July when the report of the House Appropriation Committee on the D.C. funding measure was published. It contained language which, in the judgment of this Senator, disturbed the balance I spoke of a moment ago.

The issue involves efforts on the part of a great number of communities across the country to bring home a baseball franchise when the league announces its expansion decisions at the end of this year. Cities such as Buffalo, Denver, Indianapolis, New Orleans, Phoenix, Tampa-St. Petersburg, Vancouver, and Washington are working toward this end.

In this instance, the District government was able to convert the disadvantage of congressional approval of its budget into a competitive edge. In a "General Statement" contained in the Appropriations Committee report, the following passage appears:

The committee congratulates the District government for the aggressive manner in which it is pursuing the acquisition of a major league baseball team for the nation's Capital * * *. The Mayor and Council are to be commended for their leadership and foresight in creating the DC Baseball Commission to market the Washington area as the ideal location for the next expansion major league baseball team.

Were we to do nothing, this language in the House report would stand as a congressional endorsement of one city's campaign to win a baseball franchise. I think that would be unfair to the other communities interested in baseball. They are not in a position to use the resources of the House and Senate to assist their own efforts to secure a team.

There is also the collateral issue of funding. The bill contains $55,000 in locally generated revenues to fund the DC Baseball Commission. If this was Federal money—and I am satisfied at this point it is not—I would be offering an amendment to delete these funds. As inappropriate as the endorsement language is, it would be doubly wrong for taxpayers in Denver, Buffalo, Tampa, Phoenix, and elsewhere, to be funding one city's efforts to get a team.

On this issue, Mr. President, I confess to being a partisan. The people of Denver would be delighted to have a major league team in our community. We estimate that a franchise would bring $75 million in direct and indirect economic benefits. In Denver alone, tax receipts would rise $3.3 million. An additional 1,200 jobs would be created. The economic advantage would, I am sure, be equally welcome in the other cities which are competing for the two expansion franchises.

But this is a decision which must be left to the cities, to major league baseball, and to the market.

My amendment contains two basic statements: First, it establishes the requirement that only local funds contained in the appropriation be used by the District government to fund the baseball commission. This should provoke no controversy; the DC government intends to use local funds for this purpose. Second, it contains a policy statement intended to supersede the House committee report language. It states that:

The Congress expresses no preference with respect to the activities of any municipality to obtain a major league baseball franchise.

Essentially, I am asking for a "level playing field." Any community which wants a team should try for one. Having a baseball team is a matter of civic pride and economic development. As baseball moves toward expansion, it should proceed without unnecessary or inappropriate congressional endorsements, but on the basis of the kind of friendly competition which naturally ensues between cities which love the national pasttime.

Mr. President, I urge adoption of the amendment.

Mr. LAUTENBERG. Mr. President, I rise in support of the amendment of the Senator from Colorado. We have been working on this since the bill was reported out of committee.

I can understand the strong desire on the part of Washingtonians to bring baseball back to DC. I understand the feelings of Washington baseball fans, because feelings run just as strong in New Jersey, which is also seeking a baseball franchise.

In fact, delegations from a number of cities are making their pitch—so to speak—for expansion franchises in meetings with major league baseball in New York today and tomorrow. I understand that the Washington delegation is in New York today. The New Jersey delegation will make its presentation tomorrow.

From this Senator's point of view, New Jersey's case is a strong one. New Jersey's northern counties comprise a market bigger than any other area that now seeks a team. In fact, there are roughly 5 million New Jerseyans in the greater New York, New Jersey, and Connecticut metropolitan area. That is 5 million people, plus the rest of the State's residents, who do not have a baseball team to call their own. With its Meadowlands complex, New Jersey has proved that it's a big league State, and it ought to be in the big leagues in baseball.

On the other hand, Mr. President, I would suspect that the Senator from Colorado would argue that Denver has a strong claim, too.

The point is, we are not about to resolve the issue fairly in the context of this bill, nor should Federal funds be used to favor the District over other areas. The District should compete with New Jersey and other places on a level playing field—so to speak.

The amendment is acceptable on our side, and I understand is acceptable to the manager for the majority [Mr. SPECTER]. I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

The amendment (No. 990) was agreed to.

Mr. HART. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SPECTER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 991

Mr. SPECTER. Mr. President, I send two amendments to the desk and ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 991.

Mr. SPECTER. Mr. President, I ask unanimous consent that further read-

ing of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

STUDENT LOANS

At page 32, after line 4, insert:

SEC. . There are authorized to be expended from amounts otherwise available to the District of Columbia government (including amounts appropriated by this Act or revenues otherwise available, or both) such sums as may be necessary to finance the District's participation in a student loan revenue bond program. Sums authorized to be expended by this section shall remain available without limitation as to fiscal year until such student loan revenue bonds have been paid or payment has been provided for.

At page 3, after line 16, insert:

COURT STUDY

For a Federal contribution to the District of Columbia $100,000.

Mr. SPECTER. Mr. President, I ask favorable consideration of the technical amendments. In certain student loans, the District, in cooperation with the consortium of universities in the Washington area, will soon issue $50 million in revenue bonds. I am told that the District's maximum exposure and the worst case assumption is to be $1.5 million.

Mr. President, the second amendment will add $100,000 in Federal funds to the District court system to move ahead with a study of ways to expedite court dispositions.

I ask unanimous consent that these two amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment.

The amendment (No. 991) was agreed to.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 992

Mr. SPECTER. Mr. President, I now send an amendment to the desk on behalf of Senator TRIBLE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER], for Mr. TRIBLE, proposes an amendment numbered 992.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

H.R. 3067 is amended by adding at page 8 after line 5:

Provided further, That not to exceed $50,000 of this appropriation shall be used to reimburse Fairfax County, Virginia, for expenses incurred by the County during fiscal year 1986 in relation to the Lorton prison complex. Such reimbursement shall be paid in all instances in which the District requests that the County provide police, fire, rescue, and related services to help deal with escapes, riots, and similar disturbances involving the prison.

The District shall make a quarterly report to the Chairman of the Senate Appropriations Subcommittee on the District of Columbia regarding the amount and purpose of reimbursements made to the County, and the amount of the authorization remaining for such reimbursements.

Mr. TRIBLE. Mr. President, this amendment will help to offset the cost to Fairfax County citizens of providing police, fire, and other emergency services at the District's Lorton prison complex.

For many years, the county has served as a reluctant host to the Lorton prison. Its presence has been a source of concern to the residents of the county, who are quite naturally troubled over escapes, riots, and similar occurrences.

Lorton prison has also imposed a financial burden on the county, which is often called upon to provide emergency services at the prison. Last year, the county spent approximately $50,000 to provide police and fire assistance for events related to the Lorton facility.

My amendment will bring a measure of fairness to this situation by earmarking up to $50,000 in the D.C. appropriations bill to reimburse the county for costs incurred as a result of the Lorton prison.

Mr. President, this amendment is acceptable to the distinguished chairman of the D.C. Appropriations Subcommittee, Senator SPECTER. I want to thank the Senator for his guidance and cooperation in this matter.

Mr. SPECTER. Mr. President, I do intend to accept the amendment offered by my colleague from Virginia. I would like to take a moment and ask Senator TRIBLE to clarify exactly the situations which will be eligible for reimbursement.

Mr. TRIBLE. I will be happy to. As I have mentioned, I believe the county ought to be reimbursed for the cost of providing police, fire, rescue, and similar services to the Lorton prison in the event of escapes, riots, fires, and similar disturbances. It is my intent that the county be promptly reimbursed in all instances in which the District requests the county's assistance. Furthermore, I believe that, in cases in which the District notifies the county of an emergency and the county then provides such services of its own volition, reimbursement should be provided as mutually agreed between the county and the District.

Mr. SPECTER. Those guidelines are agreeable to the committee. I would also ask my distinguished colleague from Virginia what effect his amendment might have on the existing police mutual aid agreement between the District and several of the surrounding jurisdictions.

Mr. TRIBLE. It is not my intent to conflict with the police mutual aid compact in any way. This amendment is necessary because of the peculiar nature of the relationship between Fairfax County and the Lorton prison, which differs significantly from the other scenarios which might fall under the mutual aid compact. For example, it involves far more than occasional ventures into a neighboring jurisdiction. Rather, it involves a long-term, fixed presence in one jurisdiction of a facility belonging to another. My proposal for reimbursement arises out of this extraordinary relationship.

Mr. SPECTER. I also note that the amendment requires periodic reports to the D.C. Appropriations Subcommittee about the manner in which the funds authorized for reimbursement are spent.

Mr. TRIBLE. That is correct. The amendment requires that the District of Columbia report quarterly on the amount and purpose of reimbursements made to Fairfax County during that quarter, as well as on the amount of earmarked funds remaining for reimbursement. It is my hope that this reporting requirement will provide the Congress with sufficient time to replenish the earmark should $50,000 prove inadequate during the coming fiscal year.

I want to again express my appreciation to my distinguished colleague from Pennsylvania. He has been most helpful in addressing my concerns about the Lorton facility, and I thank him for his cooperation. At this time, I ask unanimous consent that a copy of a letter I recently received from the chairman of the Fairfax County Board of Supervisors in support of this amendment be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COUNTY OF FAIRFAX,
BOARD OF SUPERVISORS,
Fairfax, VA, August 8, 1985.

Senator PAUL TRIBLE,
Hart Senate Office Building,
Washington, DC.

DEAR PAUL: At its meeting on August 5, the Fairfax County Board of Supervisors unanimously expressed its support for your efforts on behalf of the County to recoup expenditures related to the Lorton Correctional Facility.

As you are fully aware, the County has expended considerable financial resources to ensure the safety of its citizens on various occasions when incidents at Lorton have posed a threat. These resources amounted to approximately $50,000 last year for services by County police and fire units. In addition to this financial drain, attention to Lorton problems requires considerable staff effort.

It remains the County's goal to have the Lorton facility eventually closed, but you are familiar with the obstacles to accomplishing that goal. In the meantime, Fairfax County is committed to continuing to work with the District of Columbia and the Lorton staff to protect our citizens. Your efforts to earmark funds in the District's budget for future reimbursement to the county when police or fire units are required at Lorton are heartily appreciated and supported. I join the Board members in the hope that your move to provide such reimbursement will be successful.

Fairfax County stands ready to support you. Please feel free to call upon us.

Sincerely,

JOHN F. HERRITY,
Chairman, Board of Supervisors.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 992) was agreed to.

AMENDMENT NO. 993

Mr. SPECTER. Mr. President, I send an amendment to the desk of behalf of Senator GRASSLEY and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER], on behalf of Mr. GRASSLEY, proposes an amendment numbered 993.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. HART. Mr. President, reserving the right to object, I think the manager ought to at least tell us what the amendment is.

Mr. SPECTER. I have and I shall.

Mr. HART. No. We passed about two there and there was no description of whatever.

Mr. SPECTER. I announced, as the RECORD will show, what each amendment was. I will be glad to go back over it, if the Senator wishes.

The PRESIDING OFFICER. Is there objection to dispensing with the reading of the amendment?

The Chair hears none, and it is so ordered.

The amendment is as follows:

On page 32, line 5, add the following new section:

SEC. 134. The District of Columbia shall construct three signs which contain the words, "Sakharov Plaza." These signs shall be placed immediately above existing signs on the corners of 16th and L and 16th and M Streets, Northwest. These should be similar to signs used by the city to designate the location of METRO stations. In addition, a sign shall be placed on city property directly adjacent to, or directly in front of, 1125 16th Street designating the actual location of Sakharov Plaza.

Mr. SPECTER. Mr. President, the amendment submitted on behalf of Senator GRASSLEY relates to the placement of signs surrounding the Soviet Embassy at Andrei Sakharov Plaza.

Mr. MATHIAS. Will the clerk state the amendment?

The PRESIDING OFFICER. May we have order, please. The Chair cannot hear the Senator.

Will the Senator from Pennsylvania send the amendment to the desk?

The clerk will report.

The assistant legislative clerk read as follows:

The District of Columbia shall construct three signs which contain the words, "Sakharov Plaza." These signs shall be placed immediately above existing signs on the corners of 16th and L and 16th and M Streets, Northwest. These should be similar to signs used by the city to designate the location of METRO stations. In addition, a sign shall be placed on city property directly adjacent to, or directly in front of, 1125 16th Street designating the actual location of Sakharov Plaza.

Mr. SPECTER. Mr. President, there has been enacted into law section 133 of Public Law 98-455, a provision that the property located on square numbered 197, lot numbered 841 at 1125 16th Street, NW., Washington, DC, shall be designated as "Andrei Sakharov Plaza." Senator GRASSLEY has asked for this amendment in order that the designation be clear, with the requirement that these signs be placed there. The matter has been considered before and enacted into law.

Mr. MATHIAS. Mr. President, will the manager of the bill yield for a question?

Mr. SPECTER. I do.

Mr. MATHIAS. Has the municipal government of the city of Washington been consulted with respect to this amendment?

Mr. SPECTER. The city government of the District of Columbia has been consulted.

Mr. MATHIAS. Can the manager of the bill advise the Senate as to what the reaction of the city government was?

Mr. SPECTER. Yes, I can advise the Senator as to what the reaction was.

Mr. MATHIAS. Will the manager of the bill please advise the Senator what that reaction was?

[Laughter.]

Mr. SPECTER. They are willing to do it if they are directed to do so. They do not have any great concern about this. They are not the moving party, however, but they are not disagreeing.

Mr. MATHIAS. Mr. President, I have some concern about this amendment. It seems to me that we are acting not like the Senate of the United States of America but like some small town debate group trying to make points. Is this a serious body? Are we serious about our relationships with the great powers of the world? Do we think that it is going to be of any real significance in the history of the relationship of the United States and the Soviet Union if we try this kind of petty pin prick? Why not raise our sights and talk about the things that are significant in the relationship between the United States and the Soviet Union. There is plenty to talk about. The President of the United States is on his way to Geneva to talk about it. But these little petty pin pricks are evidence of the lack of civility in our relationship, and it will show lack of civility on our part if we allow this amendment to pass. I do not want to cut off debate on the subject, but at the appropriate moment, Mr. President, I will offer a motion to table.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I do not see the Senator from Iowa on the floor, and I hope someone will summon him since it is his amendment. Like most Senators, I never heard of it until this moment.

With great respect, let me say, for my colleague from Maryland, while this is not the most important or the largest amendment we will consider this month, neither is it by any means a pin prick.

By this action we say that the name of Andrei Sakharov is remembered in this country; that his fight is not forgotten; that we regard him as a symbol of human rights violations in the Soviet Union; that by remembering him we express our eternal kinship with the hundreds of thousands, indeed with the millions, who are suffering political and religious repression within that country.

Does it add something to the civility of our relationship with the Soviet Union? No, of course not, but it adds something much more substantial and serious. I do not want to make more of the amendment than it is. It is the intention of the Senator from Iowa to just go ahead and put up the signs and not have a debate on it. In due course, we will have amendments on whether we will send aid to the rebels in Angola. That is a big and serious issue. We will have amendments on defense. They are big and serious issues. This is a serious issue as well, let me say to the Senator from Maryland, and I urge him to withhold his motion. It is an issue of symbolism, not for the three signs but what they represent in terms of our commitment, our recognition that this man who as a symbol has not been forgotten. So I hope the Senator will not move to table.

Mr. MATHIAS. Mr. President, I say to the Senator from Colorado that I yield to no Member of the Senate in my recognition of the rights of Andrei Sakharov and the injustice that has been done to him, but I think that there are other ways to honor him. Let us take a different street corner. I am happy to go along with that. But this particular location at this particu-

lar moment, as the President of the United States is literally packing his bags to go to Geneva, is not worthy of the United States Senate.

Mr. LUGAR. Mr. President, the issue has come before the Senate once before, as has been noted by the distinguished manager of the bill. My understanding is that last year the issue was resolved in favor of the Senator from Iowa and the signs were in fact erected in the general area of the Soviet Embassy to witness our belief in the desirability of freedom for Andrei Sakharov. As I understand the current situation, the Senator from Iowa went to the embassy area, examined the signs and their location and was distressed that he felt they were not sufficiently prominent.

Apparently, the desire tonight is to remedy that by putting additional signs which would be more prominent.

I share the feelings of both distinguished Senators who have spoken—first of all, as to Senator ARMSTONG's thought that this is a serious issue. As the Senator knows, it has been met by the Senate before.

However, I also concur with the thoughts of the Senator from Maryland, that to attempt to do something which I fear is trivial in this case, tacking additional signs on top of signs, demeans the original action.

I hope the Senator from Iowa will be willing to withdraw this amendment and allow the action of the Senate to stand as it is. We have expressed ourselves. The additional situation, I think, would be redundant.

Mr. SPECTER. Mr. President, the Senator from Iowa is out of the Chamber now, and he should be heard on this subject.

Mr. CHAFEE. Mr. President, I find it kind of embarrassing that at 6:20 in the evening, in the U.S. Senate, in the so-called greatest deliberative in the world, we are deciding where the city of Washington should place its street signs. I think we can devote ourselves to something greater than that.

I share the views expressed by the Senator from Maryland that this is not the kind of dignified action we should take, particularly at this time, as the President is going to Geneva. I hope we will restrain oursevles.

Yes, we get a sense of vengeance, if you will, or triumph, but I do not think that is the way we want to act in this body.

I hope the amendment will be withdrawn, or, if it is pressed, that the amendment will be tabled.

Mr. MATHIAS. Mr. President, will the Senator from Pennsylvania yield for a further question?

Mr. SPECTER. I yield.

Mr. MATHIAS. As we all know, the Embassy of the Soviet Union is about to move from the location which has been designated "Andrei Sakharov Plaza." Would it be the intention of the Senator from Pennsylvania to entertain a further amendment that we move Andrei Sakharov Plaza when the Soviet Embassy moves?

Mr. SPECTER. In response, having gotten into this difficulty by offering the amendment on behalf of Senator GRASSLEY, I would not express any further intention at all.

[Laughter.]

Mr. MATHIAS. It seems to me that the fact they are about to move might be a further reason that we could defer action on this matter and deliberate on it at greater length.

Mr. ARMSTRONG. Mr. President, while we are awaiting the arrival of the Senator from Iowa, are there other amendents that could be taken up?

Mr. SPECTER. Mr. President, I ask unanimous consent that the Grassley amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, there will be a rollcall vote on final passage of this measure. We hope to be able to resolve this critical issue and avoid a vote on this one. Somebody has asked if there will be a rollcall vote on final passage and the answer is yes.

The only other business to follow that will be a couple of conference reports, and we hope to have an agreement which will help us break the logjam on textiles, reconciliation, and the farm bill.

It does not involve the farm bill but it will give us time to take up the farm bill. We are checking with the distinguished Senator from Iowa to see what his disposition is.

Mr. SYMMS. Mr. President, while we are waiting for the Senator from Iowa, I should like to make some comments with respect to what has been said thus far.

I do not think we should make light of the fact that Andrei Sakharov has been incarcerated by the Soviet Union. All we are asking for is an accountability of where Andrei Sakharov is.

Somehow, the United States thinks we have to do everything not to make the Russians mad. They shot down KAL-7 in the last 2 years, murdered 269 people. They have murdered Major Nicholson in the last couple of years. I believe I read in a column by George Will that they have averaged murdering 500 people a day, so the day they shot down KAL-7, they actually were below their average.

They are in Afghanistan, exploiting the civilian population there.

Somehow, we in the U.S. Senate think it is trivia to speak up for the human rights and freedom of a very distinguished citizen of this world, Andrei Sakharov.

I think the Senate should accept the amendment. We do not want to tie up the Senate and have a vote on it. I, for one, would not vote to table this amendment. It is the amendment of the Senator from Iowa, and he can do with it what he chooses. I would vote for this amendment and be proud to do so, in the name of human rights and the spirit in which the President should be going to the summit. The President has the responsibility to do it. But the record of the Soviets is replete with lying, with breaking the contracts they have signed with other nations, with using force and tyranny to get their way, bully their way. Yet we say, "Don't bother the guards. It makes them mad as they are marching us off into the chambers."

This is not necessarily trivia, for us to make some kind of statement that the United States citizens and the United States Senate care about the human rights of people being incarcerated in that slave camp, the Soviet Union.

The PRESIDING OFFICER. The amendment has been temporarily withdrawn.

Mr. WILSON. Mr. President, while we are waiting for the distinguished Senator from Iowa, I say, with the greatest respect, that I do not think the focus of this should be whether or not we are sitting as a city council, directing the city of Washington where to place street signs. I think that what the Senator from Iowa has sought to do here is to find an appropriate vehicle to say something to the Soviet Union that needs to be said. We are dealing in symbolic gestures. I think the Senator is to be commended.

I assume that we would all agree that the violation of human rights which the plight of Andrei Sakharov has made so poignant to all the world is a good deal more than a matter of civility or the lack of civility.

So it is my intention to offer next week a resolution addressing this subject I think in a responsible way, and I will look forward for cosponsors from those who think the subject of Soviet repression of rights is a serious matter and one that needs to be addressed by a serious body, the U.S. Senate.

I thank the Chair.

Mr. MATHIAS. Mr. President, I am very reluctant to take any action on this matter in the absence of the Senator from Iowa. But I think the Senate has to move forward.

I will withhold my motion to table.

Mr. SYMMS. Mr. President, if it will help the Chamber, and I do not want to impose on the rights of my dear colleague from Iowa either, and I have great respect for the Senator from Maryland, I ask a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SYMMS. What is the regular order? And I call for the regular order.

The PRESIDING OFFICER. The Senator asked the question. The regu-

lar order is the amendment offered by the Senator from Pennsylvania for the Senator from Iowa.

Mr. MATHIAS. Mr. President, if the Senator from Idaho is asking for the regular order, then I have no further option but to make a point of order that this is legislation on an appropriations bill and it is not in order.

The PRESIDING OFFICER. The Parliamentarian informs me that the Senator from Maryland is correct. The point of order is well taken.

Mr. DOMENICI. Mr. President, the Senate now has before it the fiscal year 1986 District of Columbia appropriation bill as reported by the Senate Appropriations Committee.

I would like to commend my distinguished colleague, Senator SPECTER, for all of his hard work on this bill.

H.R. 3067 provides one-half billion dollars in both budget authority and outlays for fiscal year 1986 for programs and services in the District of Columbia.

The bill is consistent with the subcommittee's 302(b) allocation under the fiscal year 1986 budget resolution.

Mr. President, I ask unanimous consent that two tables showing the relationship of the reported bill to the congressional budget, the House-passed bill, and the President's budget request, and a summary of total appropriations action to date, be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

DISTRICT OF COLUMBIA SUBCOMMITTEE SPENDING TOTALS—SENATE-REPORTED BILL

[In billions of dollars]

	Fiscal year 1986—	
	Budget authority	Outlay
Outlays from prior year budget authority and other actions completed		
H.R. 3067, as reported in the Senate	0.5	0.5
Subcommittee total	.5	.5

RAOUL WALLENBERG PLACE

Mr. LEVIN. Mr. President, I am pleased that the D.C. appropriations bill under consideration by the Senate includes a provision which will designate part of 15th Street in Washington, DC, as "Raoul Wallenberg Place." The language is virtually identical to my bill, S. 1371, which has 23 cosponsors. The same language is in the House D.C. appropriations bill.

I am grateful for the assistance of Senator SPECTER, chairman of the Appropriations Subcommittee for the District of Columbia, who agreed to include this language in the bill. I also appreciate the leading role played by the original sponsors of this proposal, Representatives BILL LOWERY and TOM LANTOS.

The area that this proposal will designate is the block of 15th Street, SW., which runs in front of the future U.S. Holocaust Memorial Museum. It is worth reiterating that no address other than the museum's will be affected, and that no residences or businesses will be inconvenienced.

Raoul Wallenberg is one of this century's greatest and most courageous humanitarians. He risked his life to set up an organization in Nazi Budapest which saved the lives of tens of thousands of Jews from the Holocaust. This is an achievement almost beyond our comprehension.

Today, we do not even know where this heroic man is. Arrested by the Soviets at the end of the war, we have heard reports of Wallenberg which contradict the claim of the Soviet Government that he died in prison many years ago.

The Holocaust Museum will help to ensure that those who perished in the Holocaust are not forgotten. It is appropriate that the street in front of this museum will be named in honor of a man who saved so many from the horror of the Holocaust, a man who is a symbol of commitment, passion, and bravery. This commemoration will also serve as a reminder that the United States will not cease our efforts to seek definitive information on Raoul Wallenberg's current whereabouts.

Mr. LAUTENBERG. Mr. President, in July 1984, the Senate adopted legislation withholding Federal highway assistance to States with minimum drinking ages below 21. Eighty-one Senators supported this initiative to reduce the loss of young lives on our Nation's highways. The President signed the bill into law shortly thereafter.

Since the passage of the Uniform Minimum Drinking Age Act, 14 States have raised their minimum drinking ages, joining the 23 States which had 21 as their minimum drinking age prior to July 1984. Indeed, the legislation, for the most part, has worked in exactly the way Congress envisioned.

Among the jurisdictions which stand to have Federal highway funds withheld under this measure is the District of Columbia. If the District fails to raise its drinking age to 21 by October 1, 1986, $2.5 million in Federal highway assistance will be withheld. If, by October 1, 1987, it has not acted, another $5 million will be withheld.

Supporters of the 21-year-old drinking age have long questioned whether the provisions of the Uniform Minimum Drinking Age Act would be adequate to cause the District to move on this issue. This concern is shared by

both the House and Senate Appropriations Committees, which have included language in their reports on this year's D.C. appropriations bill, urging the District to act positively and soon.

In the face of the pleas of the Congress, particularly those Members from nearby Virginia and Maryland, to raise its drinking age to 21, in late September, a D.C. City Council Committee voted 4 to 1 against raising the District's drinking age.

The District of Columbia is fast becoming an island amidst a sea of heartfelt concern over the death and injury of young people involved in drunk driving accidents. The District is attracting underage drinkers from surrounded communities like a magnet.

The Metropolitan Washington Council of Governments, on two occasions, has urged the District to raise its minimum drinking age. The result: nothing. The Washington Regional Alcohol Program has urged the District to act, citing an 18-percent increase in alcohol-related accidents involving young drivers on regional highways. The result: nothing.

Mr. President, I considered offering an amendment to this bill to further encourage the District to act. However, I would propose instead that the District of Columbia Appropriations Subcommittee examine this issue first through hearings on the Minimum Drinking Age Act and its efficacy in the District. The lower drinking age in the District has implications for District residents, Maryland and Virginia, and military installations located in the Washington, DC, area. The subcommittee needs to examine if the existing law serves its intended purpose in the District of Columbia, given the District's limited stake in the Federal Highway Program.

Therefore, Mr. President, I inquire of my chairman, the Senator from Pennsylvania, if he would be amenable to the subcommittee holding hearings as soon as possible to examine this important issue?

Mr. SPECTER. Mr. President, I share the Senator's support for a uniform minimum drinking age of 21 nationwide. Our States share a border with New York State, where the drinking age has been lower than 21. We've seen firsthand how differing minimum drinking ages in the two States provide incentives for young people to drive across the border to drink. Fortunately, New York has voted to raise its minimum drinking age. Maryland and Virginia, however, continue to face a border problem with the District.

The Senator's suggestion of a hearing on this matter is a good one. The District has until October 1, 1986, to decide what to do about its minimum drinking age, before facing the withholding of highway funds. The subcommittee should monitor the District's progress over the next year and see if the District's small size and limited stake in the highway program represents a unique situation, requiring a different approach.

Mr. LAUTENBERG. Mr. President, I thank the Senator and look forward to working with him to plan these hearings. Should the provisions of the Uniform Minimum Drinking Age Act prove ineffective in the District, we may be advised to take further action to address the blood borders in the Washington metropolitan area.

Mr. MATHIAS. Third reading.

Mr. SPECTER. Mr. President, I ask for third reading.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. SPECTER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Delaware [Mr. ROTH], and the Senator from Pennsylvania [Mr. HEINZ] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KERRY], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

I further announce that, if present and voting, the Senator from Massachusetts [Mr. KERRY], and the Senator from West Virginia [Mr. ROCKEFELLER] would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 80, nays 14, as follows:

[Rollcall Vote No. 292 Leg.]

YEAS—80

Abdnor	Byrd	Dodd
Andrews	Chafee	Dole
Bentsen	Chiles	Domenici
Biden	Cochran	Durenberger

NOT VOTING—6

Heinz	Rockefeller	Stennis
Kerry	Roth	Zorinsky

So the bill (H.R. 3067), as amended, was passed.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SPECTER. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer [Mr. GOLDWATER] appointed Mr. SPECTER, Mr. HATFIELD, Mr. MATTINGLY, Mr. DOMENICI, Mr. LAUTENBERG, Mr. STENNIS, and Mr. HARKIN conferees on the part of the Senate.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, I want to thank the distinguished managers of the bill, Senator SPECTER and Senator LAUTENBERG.

Again, we have had I think a fairly good day with two major appropriation bills, the civil service retirement bill, and a nominee. We still hope to get a unanimous consent request on reconciliation, and the textile bill. I have grave doubts that will happen.

TREASURY, POST OFFICE, EXECUTIVE OFFICE OF THE PRESIDENT, AND CERTAIN INDEPENDENT AGENCIES APPROPRIATION—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on H.R. 3036 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3036) making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, certain Independent agencies, for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 31, 1985.)

Mr. ABDNOR. Mr. President, I want to say that this conference report provides funding for the Department of Treasury, the Executive Office of the President, several Government agencies, and the revenue foregone postal subsidy.

The conference report totaled $13,154,375,000.

I remind one and all that for the most part this funding will provide for continued collection of revenues for this Nation, and operate many crucial Government functions. We have been able to work this agreement out. We think it is a good one.

Let me briefly outline the highlights. The conferees have approved restoration of the 887 positions the administration proposed to cut from the Customs Service. Because of the recurring drug problems and the problems facing delays in processing cargo and passengers, the conferees agreed to add 473 positions to Customs. The conferees have also provided funding for the revenue forgone subsidy for recipients of reduced rate mail and taken steps to insure rates remain constant until January 1, 1986. Provisions have also been maintained which continue 6-day and rural delivery, as well as prohibiting wholesale closure of small post offices.

The conferees also agreed to a funding level for the Internal Revenue Service which exceeds the Senate level by nearly $200 million. Now I must say that I have always tried to hold down spending and no one can call my record liberal when it comes to spending. However, if we are to face up to the growing tax gap problem and continue to strengthen our resolve to reduce the deficit, this bill is certainly not the one to cut. It makes no sense to reduce revenue collection agencies like the IRS, Customs and the Bureau of Alcohol, Firearms and Tobacco.

Mr. President, much has been said about how this bill exceeds the budget allocation. It does. However, I must note that it does for the reasons I have previously stated. I should note for the record that this bill is a virtual freeze when compared to fiscal year 1985. It exceeds the fiscal year 1985 spending level by $48 million, and is actually below the fiscal year 1985 budget in discretionary spending.

Mr. President, I ask unanimous consent that the conference table be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	Fiscal year—		House	Senate	Conference	Conference compared with

Mr. ABDNOR. Mr. President, this table gives the complete results of the conference in tabular form, and shows a comparison of the conference action with new budget authority made available in fiscal year 1986. The budget estimates for fiscal year 1986, the House bill and the Senate bill.

Mr. President, amendment No. 36 provided funding totaling $294,000,000 for the U.S. Secret Service in fiscal year 1986. This includes $283,805,000 as approved by the House, a full restoration of $6,535,000 for the 5-percent pay reduction, and an additional $3,660,000 to be used for new positions and equipment.

In fiscal year 1986, the Service is presently authorized 4,325 permanent positions. This total consists of 1,965 special agents, 1,008 uniformed division officers, and 1,352 in all other support categories.

Of the additional amount appropriated, the Service would not increase its special agent or uniformed division ranks. However, the Secret Service is in need of approximately 45 new support positions which can be acquired with $1,830,000. The Service is especially in need of technicians in the ADP and communications areas. Some of these positions include communications specialists, telecommunications operators, intelligence research specialists, computer equipment analysts, and cryptographic equipment support technicians, as well as professional and clerical personnel to offset the relative shortage of administrative positions.

In addition, the remaining $1,830,000 will enhance the Service's Protective Program as mounting terrorist activity in recent years poses additional threats to their protectees. These funds will enable the Service to purchase new equipment/services for endeavors in counterterrorism.

Mr. President, I would also like to correct the record with regard to a printing error which occurs in amendment No. 79. The statement of the managers states that of the total number of personnel in the Federal labor relations authority that 191 positions should be assigned to the Office of General Counsel. That figure is in error and should read 152. I wanted to take this time to set the record clear.

Mr. President, I wish to thank everyone on the subcommittee for their help, especially the Senator from Arizona, my good friend Senator DECONCINI. He is an invaluable member and without a doubt as knowledgeable about this bill as anyone.

Mr. President, a special thanks should also go to the staff of the committee for their work in seeing this conference report to its conclusion. Of course that is Bobby Mills and Marilyn Washington of the minority staff and Chuck Parkinson and Dorothy Pastis of the majority staff. I truly want to thank them for the professional manner in which they assisted us in the completion of the legislative process.

I yield to the ranking Democratic member, a member of this committee, the Senator from Arizona.

Mr. DECONCINI. Mr. President, it is with mixed emotions that I rise in support of the conference report on the Treasury, Postal Service, and general Government appropriation bill for fiscal year 1986. Let me try to explain.

First, Mr. President, it is with great pride that I rise to support the conference agreement that the House and Senate have worked out on the Treasury appropriation bill for fiscal year 1986. By any yardstick, this conference report is good for the country and fiscally restrained. It contains funding for some of the most important agencies and programs in the Government, including the Internal Revenue Service; the U.S. Customs Service; the Federal Law Enforcement Training Center; the General Services Administration; and most of the offices within the Executive Office of the President. It provides the backbone funding for our national drug interdiction effort to combat drug trafficking. It contains Secret Service protection for our President and Vice President. It contains funding to begin counterterrorist training among all Treasury and other law enforcement agencies. And it includes some of the Government's most important housekeeping functions at GSA.

Mr. President, at the same time, this bill is a responsible answer to our growing national concern over the deficit. The conference report funding level is within the Senate Appropriations Committee's section 302(b) allocation for outlays and is only $4.4 million over in budget authority, according to the latest computer run by the committee and the Congressional Budget Office. Of the approximately 60 accounts in the bill, 31 are funded at or below fiscal year 1985 levels. This conference report brings a House-passed bill that was $379 million more than the Senate-passed bill, into virtual compliance with the Senate committee's more rigid 302(b) budget allocation ceiling. That is a major accomplishment for which my distinguished subcommittee chairman deserves tremendous credit. This conference report has responded to the specific requests of the administration and the majority leader of the Senate to restore funding for IRS to essentially the higher House level—frankly, over my strong objections. We have responded in part to a specific request by the Office of Management and Budget to restore funding to that beleaguered budget shop. And we have made a valiant effort to salvage the Postal Service subsidy for charities, veterans groups, churches, and other nonprofit groups in the face of administration efforts to eliminate the Postal subsidy entirely in fiscal year 1986.

So, Mr. President, this is a good bill and it deserves the support of this body, including its most ardent defenders of the Treasury. Before closing, I want to take one more shot at what I believe is one of the saddest periods in the history of the budget process. For the past 3 months this body has been reporting out and passing appropriation bills in order to keep the Government's important activities going. During this period, the Appropriations Committee and other members of the Senate have been subjected to a continuously shifting budget target ceiling, compliments of the Senate Budget Committee. When we brought this appropriation bill to the floor back in September, we were subjected to an across-the-board cut to bring the bill totals into the Budget Committee's latest scorekeeping ceiling. Subsequent deliberations with CBO and other staff indicated clearly that the Treasury bill did not receive appropriate credit for a number of actions it had taken in the bill. Then, we went to conference with the House with the understanding that if we brought the conference back to the House and Senate within the Senate Appropriations Committee section 302(b) allocation of $13.1 billion in both budget authority and outlays, we stood a good chance of having an acceptable bill. We did that. This conference report hits our section 302(b) allocation ceiling right on the head. Yet, in keeping with the Budget Commit-

tee's shifting game of "here-today-gone-tomorrow" budget scoring, the chairman and ranking member of the Budget Committee have now sent the majority leader a letter, indicating that "today's tally" shows the Treasury bill as being $300 million over in budget authority and $200 million over in outlays.

Mr. President, I admit that I gave up in trying to keep up with the Budget Committee's floating targets and scorekeeping. Being from a Western State with a proud tradition of pioneers and cowboys, I pride myself on being able to hit a moving target from 40 yards most of the time. But this is one moving target that I cannot keep up with.

Mr. President, this bill will probably be vetoed if it is sent to the White House. In fact, the conference report might not pass this body intact. But before we dispose of the conference report, I want to put three letters into the RECORD that are indicative of the inconsistencies that are swirling around this bill with regard to the funding levels. The first is a letter from the head of congressional affairs for OMB outlining why OMB should get special treatment with its budget when other agencies are taking it on the chin. Another is a letter from Assistant Secretary of the Treasury, John Rogers, urging me to restore all of the funding cut by the Senate for IRS. And, finally, a letter from the majority leader outlining the draconian things that would happen to revenues if we did not restore the $135 million to the IRS budget.

I ask unanimous consent that the letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 11, 1985.

Hon. DENNIS DECONCINI,
U.S. Senate, Hart Office Building, Washington, DC.

DEAR SENATOR DECONCINI: When I spoke to you on the phone about FY 1986 funding for the Office of Management and Budget, I promised that I would write to describe the impact of reducing OMB's funding to $36.9 million (the Senate Committee level). At the time you indicated that we did not need to worry about your requesting a roll call vote on the Abdnor amendment because you had not worked the vote. Under that scenario, it was reassuring to receive only twenty-four votes.

With adoption of the two percent across-the-board cut, OMB funding in the Senate bill is $36,171,000, eight percent below our request of $39,420,000 and seven percent below the FY 1985 enacted level. Last May, during the Treasury/Postal Subcommittee hearing on the OMB budget request, you asked David Stockman what the impact would be of a ten percent cut in OMB funding. I have attached a copy of his response.

I want to underscore that such a reduction would significantly reduce the ability of the agency to serve the President. Similarly, I would imagine that if such a reduction were imposed on CBO, it would reduce the ability of that Office to serve the Congress. I note with interest that the Senate-passed Legislative Branch Appropriations bill freezes, but does not reduce, funding for the CBO.

Funding of $36,171,000 will require a freeze on OMB hiring resulting in a reduction of approximately 53 positions or nine percent of current staffing. This reduction comes on top of a reduction of 88 positions or thirteen percent since the late 1970's.

The reason that significant funding reductions are difficult to absorb is that 88 percent of our budget is for personnel and associated costs. 79 percent of funding is for employee pay, benefits and space costs and 9 percent covers the cost of printing the budget and related documents. We simply do not have the overhead costs that many agencies have that allow them to absorb large reductions. I believe that the attached hearing statement provides ample evidence of our commitment to reducing costs wherever possible.

The House-passed Treasury/postal bill, which also included an across-the-board reduction (2.65%), provides $36,690,000 for OMB. At the upcoming conference we would appreciate your support to keep OMB's funding at an 1985 enacted rate of $38,852,000.

If you have any further questions, let me know.

Sincerely,

FRED UPTON,
Assistant Director for Legislative Affairs.

DEPARTMENT OF THE TREASURY,
Washington, DC.

Hon. JAMES ABDNOR,
Chairman, Subcommittee on Treasury, Postal Service and General Government, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: As you consider final action on the FY 1986 budget for the Department of the Treasury, I strongly urge that funding levels requested in the President's budget be adopted in conference for all Treasury bureaus, except for the Internal Revenue Service. I am requesting that the $3.689 billion level approved by the House be adopted for the Internal Revenue Service. This level has the approval of the Administration.

For bureaus other than the Internal Revenue Service, the Department's FY 1986 budget submitted to the Congress earlier this year was, in our judgment, the amount necessary to carry out our diverse responsibilities. It included only those items that were fully justifiable and essential to the accomplishment of our missions, and reflected substantial savings in productivity and streamlined administrative operations. Accordingly, we continue to support the President's budget request for all these bureaus. In total, the President's budget for these bureaus is below both the House and Senate approved levels.

We believe the $3.689 billion level approved by the House for the Internal Revenue Service is vital to provide for adequate tax administration in FY 1986. These resources are needed to restore a high level of quality in the Service and to assure an effective tax filing season. The $206 million reduction from the House allowance proposed by the Senate would jeopardize on-going efforts to revitalize tax processing capabilities and would reduce revenues at a time when they are critically needed. We encourage the conferees to identify reductions elsewhere in the bill to offset this increase for the Internal Revenue Service.

I greatly appreciate the continuing support provided by you and your Committee for Treasury programs during these difficult fiscal times. I ask that you give careful consideration to these issues.

Sincerely,

JOHN F.W. ROGERS,
Assistant Secretary of the Treasury (Management).

U.S. SENATE,
OFFICE OF THE MAJORITY LEADER,
Washington, DC, October 28, 1985.

Hon. JAMES ABDNOR,
U.S. Senate,
Washington, DC.

DEAR JIM: I am writing to urge you to adopt the funding level for the Internal Revenue Service provided for in the House-passed version of the Treasury Department, Postal Service, and General Government Appropriation Bill. As Chairman of the Finance Subcommittee on Oversight of the Internal Revenue Service, I am very concerned that, if the funding level provided for in the Senate bill is adopted, taxpayers may again suffer from a breakdown in the processing of tax returns similar to the one that occurred this year. I am unsure whether our tax system can withstand another year in which the taxpayers' faith in the system is severely challenged.

Perhaps even more important is that the Senate funding level would make impossible the $2 billion increase in revenues from enhanced tax compliance assumed by the budget resolution. Instead, the funding level provided for in the Senate would result in a revenue loss of more than $750 million in fiscal year 1986 and $3 billion over four years.

We have enacted reforms in the compliance provisions of the Internal Revenue Code designed to make the cost of noncompliance higher and to make the possibility that the IRS will discover noncompliance more likely. But, in my judgment, we are reaching the point of significantly diminished returns from further substantive law changes in this area.

If we are going to reduce noncompliance, which costs the Government more than $90 billion per year in lost revenues, the most cost-efficient way to go about it is to provide the IRS with sufficient funds to administer the laws we have enacted. I might add that we have appropriated only about one-third of the funds necessary to cover the fixed costs of implementing the tax bills enacted in 1981, 1982, and 1984. These costs, such as revised and additional forms, new manuals, and new computer programs cannot be avoided. All that happens is that the IRS must reallocate available resources and can provide assistance to fewer taxpayers and examine fewer returns for accuracy. This, of course, allows compliance to deteriorate further.

The Administration's proposed budget for the IRS would have required a decrease of 4,800 positions according to the IRS. The Senate bill would require 4,000 additional positions to be cut. On the other hand, the House bill would require a decrease of 4,200 positions, compared with 1985 staffing levels. We should expect some gains in the efficiency of IRS computer systems, but we should be careful not to cut personnel more quickly than mechanical processing can be

substituted. The processing disaster of 1985 should make this very clear.

I know that we all have heard the refrain that additional spending in one program or another will save many times the amount expended. I have been as cynical about this type of claim as anyone. However, I believe that if this argument has any validity anywhere, it certainly applies to the increased tax revenues derived from providing the IRS sufficient funds to administer the laws that we have enacted in an efficient and effective manner.

Sincerely yours,

BOB DOLE,
Majority Leader.

Mr. DECONCINI. Mr. President, my colleagues and the administration cannot have it both ways. Either OMB and the administration and the majority in the Senate want to save money or they do not. I am prepared to vote this conference report up or down and send it to the President. I am also prepared to offer a package of cuts to several accounts in the bill, totaling $213.8 million as a substitute to any across-the-board reduction that may be proposed by the chairman and ranking member of the Budget Committee. I also want to say that I intend to vote against my own amendment, because I do not believe it is necessary in order to send a good bill to the White House. But I want all of my colleagues to have the opportunity to escape the easy vote of an across-the-board cut and really take a bite out of IRS, the Postal subsidy, and the Executive Office of the President accounts. We will soon know which way my colleagues want to go on these hard choices.

Mr. President, I urge the adoption of the conference report as reported.

Mr. President, I want to take a moment to pay tribute to the chairman of the subcommittee, Mr. ABDNOR, for outstanding leadership which he has put forward in getting this bill on to the floor and passed.

I believe it is the first time in recent years that we sent a bill to the White House. I truly hope the President will sign it.

Mr. President, I also want to thank the chairman, Chairman HATFIELD, and Senator STENNIS for their outstanding support of this bill.

Mr. President, I want to thank the Senator from Arizona and his staff, and also my staff for a fine job.

Mr. DOMENICI. Mr. President, I rise in opposition to the bill. While I commend those who worked diligently, it is still over $300 million in budget authority and $200 million in outlays.

Mr. President, I am compelled to rise in opposition to the Treasury, Postal Service, and general Government appropriation conference agreement as reported by the conference committee.

Mr. President, the conference agreement on H.R. 3036 provides $13.2 billion in budget authority and $12.2 billion in outlays for fiscal year 1986 for the Department of Treasury, including the Customs Service and Internal Revenue Service, as well as for the Postal Service, the Executive Office of the President, and several independent agencies.

With outlays from prior-year budget authority and other adjustments taken into account, the conference agreement is over the Senate subcommittee's 302(b) allocation by $0.3 billion in budget authority and $0.2 billion in outlays.

Mr. President, it is because this conference agreement exceeds the subcommittee's 302(b) allocations for both budget authority and outlays by such a great margin that I must oppose the conference report.

Only a few short weeks ago, this body swallowed hard and adopted a 2 percent across-the-board reduction to the Treasury, Postal Service, and general Government appropriation bill to bring the bill into compliance with the Senate Appropriations Committee's section 302(b) allocation.

The Senate made its intention clear. It is no longer business as usual. Appropriation bills must meet the budget authority and outlay levels provided by the Senate Appropriation Committee's own section 302(b) allocations. This commitment was reaffirmed with similar across-the-board reductions on the HUD-independent agencies and Transportation appropriation bills.

Yet, Mr. President, we are being asked, with this conference report, not only to ignore the 302(b) allocations and the courageous votes taken by the Senate, but to add even more to the deficit, to the tune of over $200 million in outlays above the 302(b) allocation.

Mr. President, I fail to see how this conference report can be acceptable to the Senate while Congress is pressing for significant deficit reduction under the Gramm-Rudman process. I also believe this conference report when presented to the President will be unacceptable.

Therefore, I oppose this conference report, and I urge my colleagues to do the same.

Mr. President, I ask unanimous consent that tables showing the relationship of the reported bill to the subcommittee's section 302(b) allocation, the President's request, the House-passed level, and the Senate-passed level, and a summary of total appropriations action to date, be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Source: Senate Budget Committee staff.

Mr. DOMENICI. Mr. President, I do not object to this being taken up, nor do I insist on a rollcall vote. I just oppose it.

Mr. CHILES. Mr. President, we have put a considerable amount of effort into seeing that this year's appropriations bills were within the limits of the budget resolution we passed here in the Senate earlier this year.

When the Treasury-Postal appropriations bill came to the Senate floor, it exceeded its own 302(b) allocation and it exceeded the budget limit.

Senator DOMENICI and I were forced to take floor action to bring the bill within the budget limits. We offered an amendment to reduce all items in the bill by 2 percent, and the Senate responded. The bill passed by the Senate was within the budget limits approved by the Senate earlier.

Mr. President, now we have the conference report—and the Treasury-Postal appropriations bill exceeds its budget allocation by $238 million in outlays, and by $300 million in budget authority. The conferees did not include the effect of our amendment here in the Senate—nor did they find more appropriate ways to keep the bill within budget targets.

It was not pleasant, or easy, for anyone here in the Senate to do what we did before and vote to cut every item in the bill to keep it within our budget targets. But we did, and we therefore said we believed it was important that we enforce our budget resolution limits.

Mr. President, I have to oppose this conference report. To support it would be to ignore our earlier action and to ignore the 302(b) allocation for the bill.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ABDNOR. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. DECONCINI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ABDNOR. Mr. President, I ask unanimous consent that the Senate recede on amendment No. 3, and that the amendments of the House to the amendments of the Senate in disagreement be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I thank Senators ABDNOR and DECONCINI. From what I can find out, I think that there is probably a disposition at the White House to veto this matter.

I would like to make the same observation as Senators DOMENICI AND CHILES. They indicated that this bill is over the budget. I hope there will be a veto.

Mr. ABDNOR. Mr. President, I would like to make this comment. This is a great day. This is the first time in 6 years that we have passed this bill through the Congress.

Thank you.

Mr. DOLE. I thank the distinguished manager of the bill. I think that is a tribute to his leadership, and to the leadership of the distinguished Senator from Arizona, Senator DECONCINI.

FAIR LABOR STANDARDS AMENDMENTS—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on S. 1570 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1570) to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that Act to volunteers, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 1, 1985.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE 20TH ANNIVERSARY OF THE HIGHER EDUCATION ACT OF 1965

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Concurrent Resolution 207, a concurrent resolution to recognize the 20th anniversary of the Higher Education Act of 1965.

The PRESIDING OFFICER. The Clerk will report.

The legislative clerk read as follows:

A bill (H. Con. Res. 207) to recognize the 20th anniversary of the Higher Education Act of 1965, and to reaffirm its purpose.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 207) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to table was agreed to.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I understand we can now take up matters on the Executive Calendar.

I ask unanimous consent that the Senate go into executive session to consider the following nominations: Calendar No. 506, Richard N. Holwill, of the District of Columbia, to be a

Member of the Board of the Panama Canal Commission; Calendar No. 507, M. Alan Woods, of the District of Columbia, to be a Deputy U.S. Trade Representative; and Calendar No. 508, Ronald E. Robertson, of Virginia, to be General Counsel of the Department of Health and Human Services.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, all of these items have been cleared on this side.

Mr. DOLE. Mr. President, I ask unanimous consent that the nominations just identified be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc.

The nominations confirmed en bloc are as follows:

PANAMA CANAL COMMISSION

Richard N. Holwill, of the District of Columbia, to be a member of the board of the Panama Canal Commission.

EXECUTIVE OFFICE OF THE PRESIDENT

M. Alan Woods, of the District of Columbia, to be a Deputy U.S. Trade Representative, with the rank of Ambassador.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Ronald E. Robertson, of Virginia, to be General Counsel of the Department of Health and Human Services.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I further ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, I understand there is still some discussion on the unanimous-consent request to be considered in the wrap-up. I know the distinguished Senator from Tennessee would like to speak for 10 minutes. Perhaps the Chair could recognize the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. GORE. I thank the majority leader.

THE CONCEPT OF PRICE TO ATTACK

Mr. GORE. Mr. President, earlier this year, on June 27, I placed in the RECORD with some introductory comments, the text of a two-part study by the Congressional Research Service on the concept of "price to attack" in strategic nuclear planning and arms control.

With approval, I shall ask for my earlier statement and the text of the two CRS papers to be reproduced in the RECORD once again at the conclusion of these remarks. I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GORE. Mr. President, this concept of "price to attack" is so central to what I have been attempting to convey in this series of speeches, and to the points I have in mind to make in the future, that I feel it is necessary to present the concept and its ramifications as clearly as possible. On the next day we are in session, Tuesday, I will apply this methodology to variants of the pending Soviet arms control proposals to show the possibilities for achieving stability.

As a necessary prelude, however, I want to describe the methodology.

Simply put, price to attack is a way to measure the size of an attack the Soviet Union must expect to mount, if it wishes to produce a certain level of destruction amid U.S. nuclear delivery systems.

In principle, one can do a kind of budget-for-nuclear-war calculation, parsed out either in warheads or throw-weight. So many warheads to deal with silos, so many to go for bomber bases, so many for submarine bases, and so on.

That is the basic idea. Now let me shift for a moment to the history of our troubled national policy in nuclear affairs in order to demonstrate the relevance of this methodology to our problems in nuclear strategy.

As we all know, the focus of the strategic debate in our country for almost 20 years has been the vulnerability of our ICBM force.

I am referring to the so-called "first-strike scenario" which has obsessed many strategic thinkers with the possibility that the Soviets might destroy all our land-based missiles in one swoop, while holding in reserve a large force of unexpended weapons. The President of the United States would have the means to strike back, but essentially just at Soviet cities—our most accurate weapons having been decimated in the Soviet first strike. But he would know that if he does this, then Soviet retaliation against our own thus far spared cities would be certain. Therefore, he would be under great pressure to sue for peace.

Mr. President, this scenario is irrational, but it has persisted for three important reasons:

First of all, nuclear weapons have always been political instruments as well as military instruments, and the possession of even theoretical advantages produce certain geopolitical implications that are important to both countries.

Second, there was a philosophical shift in the doctrine of the United States when we began to question the credibility of a deterrent which was targeted on civilian targets.

And third, the nature of fear itself is that it is often made up of two elements: Real fear and illusory fear. And by its nature, a small kernel of real fear can produce a large cloud of illusory fear—much as youthful jealousy sometimes consists of a single bare fact which generates wild imaginings that are virtually impossible to dispel until the single bare fact is explained satisfactorily.

In this case, the kernel of real fear is that the Soviet Union has acquired at great expense and effort the means to carry out a theoretical first strike against U.S. land-based missiles. The cloud of illusion is that they really intend to do so. But the illusion is difficult to dispel so long as they can theoretically gain an advantage from such an attack. And, as already mentioned, the geopolitical implications of such an advantage are feared by both sides.

In any event, for these three reasons, this nightmare scenario penetrated deep into our national dialog about nuclear weapons. It became the task of weapons designers to find a way to rebase ballistic missiles in a way that could make them survivable once again. And it became the task of arms controllers to somehow secure an agreement with the Soviets that would, in and of itself, eliminate their ability to conduct such a strike.

Neither task proved doable in any way that the Nation would support. The closest we came was SALT II. In that treaty, we confined Soviet warhead totals to certain limits. Outside the treaty, but consistent with it, our plan was to deploy MX in multiple protective shelters—an enormous and costly task. The number of shelters would have been in balance with the number of Soviet warheads. Which meant that the Soviets could not have designed a first strike they could carry off with advantage to themselves, at least in theory.

In effect, and this brings me back to my main theme, SALT II was an effort to raise the price to attack our missiles, while simultaneously constraining—through arms control—the Soviet Union's ability to pay that price. It was an effort to integrate arms control and force posture decisions in a way

that would improve nuclear stability by destroying the theoretical basis of the first strike scenario.

One might justly say that the first issue of the Reagan campaign was SALT II, and the form this issue took was to try to convince the country that this particular solution was fatally flawed. Upon taking office, the President spent the next 3 years in a fruitless effort to solve this same problem—running through more than 30 basing modes for the MX on the one hand, while making extraordinary demands of the Soviets in arms control, on the other.

The continued failure of both efforts during this period led to a virtual crisis of confidence in the President's leadership, in the midst of which he turned to the Scowcroft Commission for advice. The Commission's findings, which the President embraced wholeheartedly, helped prevent what might have been a truly damaging blow to the Reagan administration's credibility in dealing with the Soviet Union. At the core of those findings, as my colleagues know, was the recommendation for the development of a single warhead ICBM, most likely to be mobile.

The introduction of a mobile missile required a new look at the question of how to think about strategic stability with some precision. Price-to-attack analysis fits this need beautifully.

Using standard weapons effects equations, one may determine how much overpressure a nuclear weapon can create, if detonated for maximum coverage over ground. By using estimates of Soviet weapons loadings one can then determine how much of an area they can barrage at any given pressure, if they are determined to destroy a mobile missile located somewhere within. If desired, it is possible to make this calculation in terms of throw-weight, using the concept of a standard SS-18, as a unit, and thereafter describe the Soviet missile force in terms of so many real SS-18's or SS-18 equivalents.

What enters next into the calculation is the ability of our mobile launcher to withstand overpressure. The design of the Midgetman calls for a launcher able to absorb 30-pounds-per square-inch—vastly more than any vehicle ever built before. There is nothing magic in that number it was selected in order to make possible the deployment of Midgetman in a relatively constrained area, preferably on land owned by the Department of Defense.

If you can build such a vehicle, and make it sufficiently mobile, it can force the Soviet planner to allocate enough weapons to barrage the entire area in which it is based. What finally comes into balance, at 30-pounds-per-square-inch is this: We can easily deploy such a system on enough DOD land, to force the Soviet Union to recognize the need for immense numbers of warheads—or, if you will, a huge amount of throw-weight, to do the job. At some point, this price-to-attack becomes patently absurd to pay, because it would leave the attacker worse off in theory than the attacked. He would have to expend much more of his missile force than he would be able to destroy of ours. The first-strike scenario would be resolved.

The CRS studies I referred to at the beginning of this speech demonstrated that the price to attack Midgetman thus deployed would be on the order of 10 Soviet warheads for each Midgetman: 10 to 1. Arguably, the figures may be even higher than that, because CRS was working with assumptions about the area that Midgetman could generate which are on the conservative side. But even this conservative calculation was enough to abundantly illustrate something even I found surprising. Midgetman could do quite well with existing Soviet forces as limited by SALT II. If arms control could bring about smaller Soviet ICBM forces, so much the better—since at some point they would absolutely lack the means even to attack Midgetman alone, not to speak of other parts of the U.S. nuclear deterrent.

Those who have been following this series of speeches will recall that I have mentioned with great frustration, the Department of Defense's unconscionable delay in answering Congress' requirement for a detailed report on the status of the Midgetman Program. In particular, I have drawn attention to a report submitted to the Air Force by the Ballistic Missile Office, as a major input to the study mandated by the Congress.

The reason for this impatience is simple. The Department of Defense—for whatever reason—has failed to tell us the vital facts. And those facts are, without violating security, as follows: First, it is indeed possible to build a small missile at 30,000 pounds; second, it is indeed possible to build a highly mobile launcher for that missile that can absorb at least 30-pounds-per square-inch in overpressure from a nuclear blast; third, and it is indeed possible to deploy such launchers on enough land, owned by the Government, to raise the price-to-attack for the Soviet Union to levels that are very high even under conditions of total surprise, or within minutes to levels that would be madness for the Soviets even to consider expending.

This characteristic vastly aids crisis stability, since it means that in a dire circumstance, the President can order the fullest dispersal of a portion of our ICBM force, rather than order the force to be launched. It also enormously aids the problem of negotiating a workable arms control agreement with the Soviet Union, by neutralizing the value of such residual advantages in ICBM's as the Soviets are likely to retain.

Moreover, the ability of this system to raise high the threshold for a successful Soviet first-strike could eliminate any need to deploy limited defenses for ICBM's—defenses, which, as the President recently told the Soviet public, are destabilizing. As for the question of a perfected defensive system for every hamlet in the Nation, such as the little girl on TV has in mind, Midgetman could theoretically, make possible an agreement with the Soviets on reductions deep enough to make such a development a little less fanciful than those crayon drawings of hers.

Mr. President, mobile missiles raise the price to attack and thereby sharply diminish the credibility of a nuclear first-strike against the ICBM forces of either side. They are capable of resolving the two issues which have torn us apart for so long: the problem of designing a first strike resistant ICBM force, and the problem of achieving a reductions agreement with the Soviets that is also stablizing.

There is not much more that one can ask of an idea, other than that it have a solid base of political support as well. Midgetman has that, too. So it is indeed a shame that this concept is apparently so poorly understood by the very administration that called it into existence.

EXHIBIT 1

COST TO ATTACK

Mr. GORE. Mr. President, the sheer complexity of decisions we must make in funding strategic nuclear weapons contributes to the political devisiveness of this subject. As it now stands, we debate strategic issues in isolation from each other, even though we know that legislative choices affecting any one element of the nuclear capabilities of the United States inevitably have consequences for the system as a whole. What we need is a way to understand and evaluate these interactions.

Last fall, I asked the Congressional Research Service to engage this problem by focusing on the concept of "cost to attack:" That is, the cost to the Soviet Union, measured in nuclear warheads expended, to destroy a given number of U.S. nuclear warheads, under conditions that could be varied at will in order to permit study and comparative analysis.

It was my hope that the cost-to-attack approach would lead to insights concerning a whole series of questions. For example, we could look at the effect of varying the number of MX missiles in silos; at the implications of deploying Midgetman missiles; at the consequences of increased Soviet ICBM accuracy for superhardened silos; at the impact of strategic defenses on ICBM vulnerability—all on a common scale of measurement.

If such things could be done, we could go beyond merely talking about strategic stability to defining it in precise terms, so that it could be studied under changing assumptions about forces on both sides, including not only their number, but their perform-

ance characteristics. We could also ask questions and get answers about the impact of arms control agreements of any kind we might like to examine.

As this work proceeded, even partial products greatly aided my own efforts to come to terms with strategic issues. Now, however, the project has been concluded—in my opinion with great success and promise—and I would like to share it with my colleagues and the concerned public. Therefore, I take this occasion to draw your attention to two companion-piece CRS studies: "Cost To Attack: Measuring How Strategic Forces Affect U.S. Security, A Methodology for Assessing Crisis Stability" and "Cost To Attack U.S. and Soviet Strategic Forces Under Three Alternative Arms Control Approaches."

I also wish, Mr. President, to briefly summarize the first-order conclusions and implications of these papers.

What they tell us is that the strategic development or event which promises to have the most profound implications for strategic stability is the small ICBM. The cost to attack Midgetman as presently conceived is on the order of 10 Soviet warheads to destroy one of ours: A vast improvement over silo-based missiles, which are lucrative targets.

A force of 500 Midgetman missiles—on mobile-hardened launchers, able to withstand on the order of 35 psi overpressure, located on 10,000 square miles of existing U.S. military property—could indeed be destroyed by the Soviet Union—but the price would be a very large portion of their ICBM force. The total cost to attack our silo based weapons and Midgetman would approximate the entire inventory of Soviet counterforce weapons. In the aftermath of such an attack, the United States would not only be left with a massive bomber force, but—once the Trident D-5 force is deployed at sea—a very large and invulnerable second strike force with counterforce capabilities of its own.

With respect to arms control, the implications of the Midgetman are similarly far reaching. If current numerical subceilings and MIRV limits are carried over from SALT, and combined with the Midgetman's ability to charge the Soviet Union an exorbitant cost-to-attack, the resulting combination is arguably resistant to a first strike, and therefore crisis-stable.

CRS's computations do show that the Soviet advantage in throw-weight is potentially meaningful, if the Soviets were to break out of existing agreements and convert that throw-weight into additional warheads. But the same computations also suggest how arms control should be employed to bound this possibility, and also how various U.S. countermeasures could offset it.

Mr. President, I highly commend the CRS and its analysts for their creativity and diligence. My comments today do only partial justice to the value of their work. For that reason, I urge those of my colleagues whose interest in strategic matters runs deep to make themselves familiar with the cost-to-attack methodology, and its potential as a means for leading us towards a more systematic, insightful and productive debate over strategic weapons and policy.

The CRS studies follow, except for the charts contained therein, which are not reproducible in the RECORD:

[Report No. 85-64F]

COST TO ATTACK: MEASURING HOW STRATEGIC FORCES AFFECT U.S. SECURITY, A METHODOLOGY FOR ASSESSING CRISIS STABILITY

(By Lou Finch, Specialist in International Affairs and Al Tinajero, Specialist in National Defense, Foreign Affairs and National Defense Division)

ABSTRACT

This report illustrates a technique to measure how changes in nuclear forces effect crisis stability (a condition where neither we nor a potential enemy has strong reason to expect to gain a decisive military advantage through a nuclear attack). It lays out a method to quantify some aspects of crisis stability and, through a series of examples and charts, it gives the reader a basic understanding of how the method works, what some of its uses and shortcomings are, and what types of issues on the congressional agenda it can address. This report, however, does not provide results related to actual current force issues and options. Rather, it gives background so that the reader can understand the method and interpret any future reports using this method.

NOTE

This report was originally prepared in response to a request by Senator Albert Gore and it is reproduced for general congressional availability by CRS with Senator Gore's permission.

PURPOSE

This report presents a method to help Congress understand how changes in U.S. strategic nuclear forces and arms control policies could effect a basic goal of our security—crisis stability (a condition where neither we nor our enemies have a strong incentive to gain a decisive military advantage through a nuclear attack). Through a series of examples and charts, it gives the reader a basic understanding of how the method works, what some of its uses and shortcomings are, and what type of issues on the congressional agenda it can address. This report, however, does not provide results related to these issues. Rather, it gives background so that the reader can correctly understand and interpret future reports using this method.

ANALYTICAL STRATEGY

The method discussed in this report look directly at the question of crisis ability. It does so by simulating nuclear attacks by the strategic nuclear forces of the United States and Soviet Union against each other. By analyzing the results of these simulated first strikes, it may be possible to see whether the leadership of one side would have confidence that they could gain a decisive military advantage from a preemptive nuclear attack. If leaders think they can get a decisive military advantage in these simulated attacks, one might conclude that the situation would be unstable. Alternatively if leaders of both sides see no clear advantage, one might conclude that the forces on both sides would produce a stable situation.

This report first describes how these attacks might be simulated. Given the results of these simulations, the report also suggests how the results might be interpreted—whether the outcome is stable or unstable—from two perspectives. First, it looks at the cost-to-attack for an aggressor in terms of the forces it might use in executing an attack, and compares these with the forces that it would destroy on the other side. The idea is to compare the costs of an attack (measured in forces used) with the gains from an attack (measured in forces destroyed) to see if the attacker would realize a net benefit. Second, the report considers the level of forces surviving an attack to evaluate their potential for retaliation—the potential for counter attacks that would deter an aggressor from launching strikes in the first place.

If, for a particular set of U.S. and Soviet forces, the results of this analysis seem unstable, the method described here can then be useful in two ways. First, it can help uncover the sources of instability. Second, it can analyze ways that the forces might be changed in order to produce a more stable outcome. Thus this approach could provide guidelines to shape policies for the United States for future force modernization and arms control negotiations in order to push toward improved crisis stability, and thus improved deterrence and security.

SIMULATING A NUCLEAR ATTACK

The discussion which follows goes through an example to show what is involved in simulating a nuclear attack. It provides a simple overview of how the methodology works. More elaborate details of this methodology are described in appendix A. In addition, CRS has developed a software package to apply this methodology on its microcomputers. This features the ability to see promptly the graphic results of simulated nuclear attacks for differing assumptions on force composition and effectiveness.

To simulate a nuclear attack, we first need to postulate composition and characteristics of forces for both the side doing the attacking and the side being attacked. To simplify things, let us suppose that the Soviets are considering launching an attack against U.S. intercontinental ballistic missile forces. (Later on, we will consider U.S. attacks on Soviet ICBMs and attacks on other strategic forces.) Table 1 describes a U.S. ICBM force that might be typical some time in the future.

TABLE 1.—ILLUSTRATIVE U.S. ICBM FORCE [1]

ICBM type	Basing posture	Number of missiles	Warheads per missile
Minuteman III	Silo	450	3
MX	Silo	100	10
Midgetman	Mobile	450	1

[1] The basis for these forces is as follows. Once the current program to retire Titan II missiles is complete, the U.S. will have 1000 ICBMs all based in silos. If the U.S. modernized its ICBM force, but maintained the level of 1000 ICBMs, it plausibly would deploy 100 MX (in accordance with current Administration plans) in 100 of the 550 existing Minuteman III silos, replace the existing 450 Minuteman II single warhead ICBMs with Midgetman ICBMs, and retain the remaining 450 Minuteman IIIs in silos.

The ICBMs described in table 1 are postured in basically two ways. Some of them (Minuteman III, and MX) are based in silos. Other ICBMs (Midgetman) are based in a mobile mode. (Mobile basing basically involves mounting ICBMs on trucks that are designed to resist to some extent the effects of nuclear explosions. These trucks are deployed throughout a wide area, presumably making their location unknown to the enemy, and thus requiring the enemy to saturate the whole area with nuclear explosions in order to assure that the missiles deployed in that area are destroyed.)

In order to compute how many U.S. ICBMs are destroyed for a Soviet attack, we first need some data that define the vulnerability of these forces. For ICBMs in silos, the commonly used measure of vulnerability is the "hardness" of the silos. (This is a measure of how resistant silos are to the ef-

fects of nuclear explosions. It is measured in units of pounds per square inch of overpressure, PSI, that a silo can take before the missile inside it is destroyed.) For the purposes of this example, let us assume that the hardness of U.S. ICBM silos is 2,000 PSI. This is typical of that for current U.S. forces.[1]

For mobile ICBMs their vulnerability is a function of two factors:

1. Hardness of the mobile launcher. An estimate for Midgetman hardness is 45 PSI.[2]

2. Area in which the mobile ICBMs are deployed. One estimate is 10,000 square miles for Midgetman.[3]

To compute results of an attack, we also need data on the effectiveness of the attacker's warheads. This effectiveness is measured in terms of a combination of the explosive power of these warheads (the "yield," measured in kiloton equivalents of ordinary, chemically based explosives) and accuracy (measured in circular error probable, CEP, which is the distance from the target within which a warhead directed at that target would have a 50% chance of falling). To make some illustrative calculations, let us suppose that Soviet warhead yield is 550 kilotons and an accuracy of .14[4] nautical miles CEP. (These values are commonly associated with the Soviet SS-18 ICBM.)

Another factor needed to determine the effectiveness of Soviet attacks is the reliability of their ICBMs. (Reliability is the probability, given a decision to launch, that an ICBM will indeed be launched successfully and follow a normal course, carry its warheads to the vicinity of the target.) An arbitrary value for Soviet ICBM reliability chosen for purposes of this illustration is .90.

Finally, we need to know how many Soviet warheads are available to attack U.S. ICBMs. In launching an attack, the Soviets may choose to use some number less than all they have available. (For example, they may cut short their attack because they can destroy most U.S. ICBMs with a number less than their total inventory, and/or they may want to hold some warheads in reserve for future strikes.) Nevertheless, the total Soviet warheads available form a bound on the biggest attack the Soviets could launch. For the purpose of illustration, we have assumed the Soviets will have about 9,000 warheads available.

Given the data just described (and a number of assumptions described in appendix A), one can compute then the ability of one Soviet warhead to destroy U.S. ICBMs. There is, however, one additional factor to consider. Since the Soviets have 9,000 warheads in our example, if they were to attack the ICBM force described in table 1, they would need to decide how best to allocate their warheads against targets in this force. They need to decide what emphasis they should place on attacking Minutemen versus MXs versus Midgetmen in order to destroy as many U.S. warheads as possible.

To determine how they might reach this allocation decision, the discussion below considers allocating warheads to targets for a whole range of Soviet attacks. It begins with very small ones and works up to very large scale strikes using the whole inventory of warheads. While the allocation process is built up by assigning a sequence of groups of warheads to targets, in an attack, all groups of warheads would be launched toward their targets simultaneously.

ALLOCATION OF WARHEADS TO TARGETS

To understand how the Soviets might allocate their forces, suppose we begin by considering what the Soviets would do if they only had one warhead to attack our ICBMs. (Of course the Soviets, in reality, would never attack us with only one warhead. This is just a starting point to describe how the Soviets might do planning for large scale attacks.) If they only had one warhead, presumably they would attack that target which gave them the biggest return in terms of forces destroyed.

Let us assume for the moment that this return is measured in terms of number of U.S. warheads destroyed. In the example in table 1, the Soviets could use this one warhead to attack either a Minuteman III silo, an MX silo, or Midgetmen dispersed in their deployment area. It turns out that the Soviets can do the best (destroy the most U.S. warheads) with one warhead by directing it against one MX silo. This is because, for each MX that they destroy, they are able to destroy ten warheads. If they attacked a Minuteman III silo, however, they would destroy only 3 warheads for every Minuteman III destroyed. Compared with attacking an MX silo, attacking a Midgetman dispersal area gives relatively low returns. This is first because Midgetmen, being widely dispersed, are a lot more difficult to destroy than an MX silo. Also, if the Soviets were indeed able to destroy a Midgetman, they would only kill one warhead as opposed to ten warheads for each MX destroyed.

If the Soviets expanded their attack to two warheads, the best thing that they could do is to allocate the second warhead against a second MX silo based on the same reasoning described above. If the size of their attack continues to grow, they could continue to get the best return for their attack by allocating one warhead for each MX silo up to the point where they have one warhead targeted against each of the 100 MX silos.

Calculations based on assumed CEP, yield, reliability, and silo hardness suggest that each Soviet warhead aimed at an MX in a silo would have .544 probability of destroying it. Thus, a Soviet warhead aimed at an MX silo would destroy an average 5.44 warheads. (i.e. Probability of destruction of an MX of .544 times 10 warheads on an MX equals 5.44 warheads destroyed.) Figure 1 shows the returns the Soviets would get (measured in U.S. warheads destroyed) as a function of the warheads they might use for attacks up to a level of 100 Soviet warheads. For this example, the Soviets use 100 warheads to destroy 544 U.S. warheads.

If the Soviets considered an attack larger than one using 100 warheads against 100 MX silos, they would still plan to use 100 warheads against 100 MX silos. For warheads in excess of 100, however, they would look for the next best target to attack, in order to give them the greatest return for the warheads that they were using. Their choices are to start allocating warheads against Minutemen III silos, the Midgetmen dispersal area, or directing a second warhead against each of the MX silos. It turns out that the best thing that they can do to maximize the return from their investment is to put a second warhead on each of the MX silos. Even though the second warhead would provide less additional gain than the first, because MX has so many warheads on each missile in each silo, the Soviets are better off accepting diminished returns from the second warhead against MX than placing the first warhead on other targets.

Figure 2 shows the results in terms of U.S. warheads destroyed as a function of Soviet warheads used if the Soviets were to allocate two warheads each against 100 MX silos.

It shows that the Soviets might expect on the average to destroy 544 MX warheads (54.5 MX) for the first 100 warheads in the attack, and pick up an additional 248 MX warheads (24.8 MX) destroyed for the second 100 warheads used.

At this stage the Soviets have used 200 warheads to kill 792 U.S. warheads. Thus their average return is 3.96 warheads destroyed for each warhead used.

If the Soviets thought about an attack using more than 200 warheads, they would continue to allocate 200 warheads against MX silos, but look for the next best target to attack for warheads over 200. For these added warheads, it now turns out that they would be better off allocating one warhead against each of the 450 Minuteman III silos in the U.S. ICBM force. Figure 3 illustrates what would happen if, in addition to allocating two warheads against each MX silo, the Soviets with a larger scale attack covered each Minuteman III silo with one warhead.

As the size of the Soviet attack grows up to a level of about 2,400 warheads, in order for them to maximize the effects of their attack, they should keep allocating against targets that give the best return. This turns out to be successive allocations against MX and Minuteman III. Figure 4 shows the results of this allocation scheme.

For Soviet attacks above 2,400 warheads, an interesting shift occurs in their best allocation scheme. The next best thing for the Soviets to do is to barrage the area in which the mobile Midgetmen are located. They would continue allocating more and more warheads to attack this area until they had totally saturated the it, and consequently killed off all of the Midgetmen.[5] In the example we are using, this would take, 4,830, Soviet warheads to destroy 450 Midgetmen warheads. Figure 5 shows the results of this allocation.

After attacking and destroying all of the Midgetmen, if the Soviets contemplated even larger attacks, they would do best of go back to attacking silo-based ICBMs, directing large number of warheads against each of the U.S. ICBM silos. The Soviets could continue to do this until they used up all of the warheads in their inventory. If the Soviets had an inventory of 9,000 warheads, Figure 6 shows the range of possible outcomes if the Soviets attacked up to that level.

In summary, figure 6, shows the Soviets cost-to-attack (measured in Soviet warheads used) for any level of attack up to 9000 warheads, and the corresponding returns for

[5] The methodology presented here assumes a "perfect" barrage of the Midgetman deployment area (i.e. there is no overlap of the destructive effects of nuclear weapons). Under this assumption, it is possible to destroy all Midgetmen in a deployment area. Under an actual attack, some Midgetmen might survive since they might fall between the cracks of multiple nuclear explosions. The assumption of "perfect" barrage, however, does give a conservative estimate of Midgetman survivability.

such and attack (measured in U.S. warheads destroyed). (Of course the Soviets may not have 9000 warheads available for an attack. For Soviet warhead inventory levels less than 9000, the curve would be cut off at that level.)

INTERPRETATION OF RESULTS

Given the results show in figure 6, there is next the question of what the implications are for stability and U.S. security. Specifically, is there some level of attack that the Soviets would find particularly attractive, at least in terms of a military outcome, and perhaps so attractive that in a crisis they would be tempted to launch a first-strike nuclear attack?

To answer this question, it is useful to develop some notions of stability that can be represented graphically on the results of figure 6. One possible notion is as follows: The Soviets might view potential nuclear attack as a classic problem in economics. If they got greater returns for an attack (U.S. warheads killed) than they invested in an attack (Soviet warheads used), they might view an attack as being worthwhile. Conversely, if they got fewer returns than they invested for an attack, they might find such an attack unattractive.

A way to portray this returns versus investment notion on figure 6 is to plot a line that shows where a Soviet attack would exactly break even in terms of warheads used versus warheads destroyed. Figure 7 has such a break even line.

For any attack whose result lies along this line, the Soviets would destroy exactly the same number of warheads as they used in their attack. For any attack whose result lies above this line, the Soviets would kill more warheads than they would use. Below the line, Soviets kill fewer warheads than they would use. Thus, comparing the results of nuclear attacks in figure 7 with a break-even line shows that the Soviets would gain more than they lose from an attack up to a level of about 2,300 warheads. Above this level of attack, the Soviets use up more warheads in an attack than they can destroy on the U.S. side.

If one used this break-even notion alone, lower levels of attacks (i.e. below 2,300 warheads) would seem desirable. If the Soviets viewed nuclear attacks simply as returns on investment, they would choose lower level attacks to maximize their "profits." But it is at these lower level attacks where, for stability and deterrence, the return on investment analogy breaks down.

In figure 7, while Soviet gains exceed Soviet losses, attacks at these levels destroy only part of the U.S. force and leave large number of U.S. weapons surviving. The Soviets may well find the threat of retaliation from these weapons (and thus these lower level attacks) as undesirable. Thus, attacks in this region may be deterred and stability preserved because of the threat to the Soviets of large-scale retaliation from U.S. surviving ICBMs.

This concern over forces available for retaliation leads to another measure of stability—the level of forces surviving an attack. To portray this notion graphically, we can superimpose on figure 7 a line that shows the starting U.S. inventory—the total number of warheads in the U.S. ICBM force before a Soviet attack occurred. Figure 8 shows this line.

U.S. surviving ICBM warheads are simply the number of warheads before the attack minus those that are destroyed. To visualize this in figure 8, one should look at the distance between the U.S. warheads destroyed curve (the "cost-to-attack" curve) and the upper horizontal line which describes how many warheads the U.S. had before an attack. If there is a great distance between these two lines (e.g. at the left portion of the graph), then a large number of U.S. ICBM warheads survive. As these lines merge together (e.g. at the right portion of the graph), U.S. surviving ICBM warheads become small (but at great expense in Soviet assets).

COST-TO-ATTACK RESULTS AND STABILITY

The discussion above and the results in figure 8 suggest that there are at least two measures from this cost-to-attack analysis that are relevant for stability—relevant in considering whether an attacker would find nuclear strikes desirable. These are:

1. Does an attack provide greater returns (forces killed) than forces invested (forces used in the attack). Graphically, attack returns are greater than the investments when the cost-to-attack curve lies above the 45 degree break-even line. If the cost-to-attack curve lies above the break-even line (i.e. the curve has a big hump above this line), then more warheads are destroyed than are used up. This might imply instability. If the cost-to-attack curve lies close to, or below the break-even line, then fewer warheads are destroyed per warhead used in an attack, indicating that the attack was not very efficient (an attack where the results might leave the enemy worse off than where he started). This may imply a stable situation.

2. Do enough forces survive so that the damage from a possible retaliation would be so great as to discourage an attack in the first place? Addressing this question graphically in figure 8, if the cost-to-attack curve rises close to the total prewar inventory of U.S. ICBM warheads, then few U.S. warheads survive. This suggests that a massive attack might be desirable in the minds of the Soviets since it would reduce the amount of military force available for U.S. retaliation, and thus potential damage to the Soviet Union. This in turn would seem bad for stability. Alternatively, if the cost-to-attack curve lies well below the initial U.S. warhead inventory line, then a large number of U.S. forces survive Soviet attacks and would be available for retaliation. Presumably the greater the size of the U.S. surviving force, the greater the threat of retaliation, and thus the better for stability.

EXAMPLE APPLICATION

To see how these measures of stability can be used for insights into how changes and forces might affect our security, consider the following examples. First suppose we altered the forces used to generate the results in figure 8 in two ways. Assume that the Soviets improve the accuracy of their ICBMs from the current level of .14 nautical miles CEP to .05 nautical miles CEP. (The .05 figure is that often attributed to the accuracy of our MX.)[6] Also suppose that the U.S. does not deploy mobile Midgetmen, but keeps older Minuteman II ICBMs. Figure 9 shows how the results might change in our stability analysis as a consequence of these force changes.

Looking over figure 9 and comparing it with figure 8, one sees that the Soviets get a great improvement in U.S. weapons destroyed for a given number of Soviet weapons used in an attack. (This can be seen by the rather large hump in the cost-to-attack curve that rises above the 45 degree break-even line.) Furthermore, the cost-to-attack curve rises sharply and approaches close to the line that depicts the initial inventory of U.S. ICBM warheads. This means that the U.S. would have few surviving ICBM warheads for relatively low level Soviet attacks. These results suggest that, at least in military terms, the Soviets could see an attack as leaving them with a considerable advantage, at least with respect to ICBM forces. This perception implies that an unstable situation might arise in a crisis, where the Soviets would have strong incentives to launch an attack against our ICBMs.

As an alternative example which shows quite another effect, suppose we take the basic forces used to generate results in figure 8 but alter them somewhat. In particular, suppose that the U.S. beefs up the hardness of its ICBM silos (a process often called "superhardening") to 50,000 PSI, which is a figure cited as technically feasible for silo hardness improvement.[7] Also, let us assume that the Soviets do not improve their accuracy above the current .14 nautical miles CEP level. Figure 10 shows the cost-to-attack results for this possible situation.

For the results shown in figure 10, the Soviets use more warheads in their attacks than they can destroy on the U.S. side. This is indicated by the absence of a hump between the cost-to-attack curve and the 45 degree break-even line. In addition, the results show that the United States has generally large numbers of surviving warheads throughout the range of possible Soviet attacks. This particular case suggests that the Soviets might find much less advantage from an attack than under our initial conditions. From their perspective, the attacks would be inefficient and also leave substantially more U.S. force available for retaliation. Thus one might conclude from these results that stability had been improved, at least in comparison with the results shown in figure 8.

While the results in figure 10 suggest improvements in silo hardening will improve stability, they assume that the Soviets do not improve the accuracy of their ballistic missiles. Suppose we take the same case in figure 10 (U.S. silos superhardened) but assume that the Soviets improve their ballistic missile accuracy to that of MX. Figure 11 shows what might happen. The shape of the cost-to-attack curve returns to one quite similar to that for our initial conditions shown in figure 8. This suggests that, in terms of stability, improvements from U.S. silo superhardening could be offset by Soviet accuracy improvements.

ATTACKER INVENTORY

A final factor to consider in stability analysis is size of the forces available for the attacker to use in the nuclear strike. This is important because if one side has an overwhelmingly large force, it may not be all that concerned about the efficiency of an attack. If one side can destroy a high percentage of its opponent's force and still have a large residual force left over for other purposes (e.g. coercion of an enemy in order to achieve concessions in a peace settlement), then that side may still find an attack worthwhile, even though it might be terribly inefficient.

To illustrate the effects of the size of an attacking force, figure 12 repeats the results illustrated earlier in figure 8, but superimposes on its various levels of Soviet forces

[6] Robinson, Clarence A., Jr. Parallel Programs Advance Small ICBM. Aviation Week and Space Technology, Mar. 4, 1984, p. 17.

that might be available to conduct an attack.

If the Soviets have very high levels of forces available to attack U.S. ICBMs (e.g. level 3 in figure 12), the Soviets could destroy most of the U.S. ICBM force, even though these attacks, especially those to take out the last few U.S. surviving warheads, would be highly inefficient. The Soviets, however, with very large numbers of warheads available, might be tempted to launch a very inefficient attack in order to wipe out U.S. capability, knowing that they would escape retaliation from U.S. ICBMs and that they would still have additional forces left over to further threaten the United States. Thus, under these circumstances, conditions of instability might still exist.

Alternatively, if the Soviets only had lower levels of forces available for attack, (perhaps as a result of arms control restraints), this might guarantee that the U.S. would have some number of forces that would survive a Soviet attack. This then would seem to create a condition of improved stability.

USING RESULTS TO ADDRESS ISSUES

Results produced by the methodology described above are sensitive to a number of factors related to future U.S. and Soviet forces. These include the size of the forces, the mix of various types of weapon systems, force vulnerability characteristics, and the effectiveness of attacking forces in destroying targets. Thus the method described here can be used to address how stability might be affected by: Size and composition of current U.S. and Soviet strategic forces; Proposals to modernize U.S. and Soviet forces that would change the size and mix of these forces; use of new technology to improve in ICBM survivability (e.g. silo hardness, dispersal of mobile ICBMs); improvements in the effectiveness of attacking forces (e.g. warhead yield and accuracy).

EXTENSION OF THE METHODOLOGY

To this point, the examples shown involve only Soviet attack of U.S. ICBMs. The methods described, however, can be easily extended to consider a number of other situations of interest in analyzing the effects of U.S. and Soviet force changes on stability. Some are listed below.

U.S. attacks on Soviet ICBMs

In the methodology described, the roles of the U.S. as the defender and the Soviet as the attacker can be reversed. Analysis of the U.S. attacking Soviet forces is important for stability in the following respect. If the U.S. can attack and destroy a substantial portion of the Soviet forces (a situation that this methodology might uncover), then the Soviets may be tempted to launch a preemptive attack, knowing that a U.S. first strike would leave them at a considerable military disadvantage. Thus a U.S. capability that threatens large-scale destruction of Soviet forces is a potential source of instability.

Attacks on nuclear triads

The results above consider only attacks on ICBMs. Since, even if most ICBMs are destroyed, other forces may survive. It is a matter of debate as to whether looking at ICBM attacks alone is an adequate basis for analyzing stability. In any event, this methodology can easily be extended to consider situations where the full triad of forces on either side (ICBMs, SLBMs, and bombers) are subject to attack. This extension of the methodology would allow one to look at cases where, while ICBMs may have problems for survivability and thus stability, the remaining parts of the strategic forces may not be so vulnerable and thus be sufficient to deter an attack and preserve stability.

Ballistic missile defense

The results shown earlier assume that, after ICBM reliability is accounted for, all warheads launched at a target would get through to their targets without interference. The number of warheads that get through to targets, however, can be degraded to account for possible defenses against ballistic missiles. One could do this first by specifying a probability that an incoming warhead would be intercepted by these defenses, and second to specify capacity for defenses such that attacks above this capacity would saturate defenses and allow additional warheads to get through unscathed.

Nuclear winter

For simulated attacks considered earlier, a very large number of warheads might be used. Recent analysis, however, suggests that an attacker might want to be cautious about the overall level of destructiveness unleashed on an opponent. Very high level attacks might result in fundamental changes to the environment (e.g. the Nuclear Winter phenomenon). This might form a practical constraint on the size of an attack that an aggressor might contemplate. If one knew the threshold at which decisionmakers on both sides thought the environment would be endangered from attacks, one could easily reflect that in this methodology by specifying that attacks should not occur above this threshold level.

Alternative measures of costs and benefits

The examples described earlier depict costs to the attacker in terms of numbers of warheads used and benefits to the attacker in terms of enemy warheads destroyed. The methodology can easily be changed to consider other measures. For example, throw weight (payload capacity of missiles) used versus throw weight destroyed could be used for assessing stability.

Limiting multiple attacks on a target

An important assumption used in the illustrative example is that it is feasible to attack one ICBM silo with a number of warheads. In practice, such attacks may be difficult to execute. Specifically, the timing of when each of these warheads would reach their target has to be carefully worked out so that the explosion of one warhead does not render other warheads ineffective. (i.e., What is known as fratricide effects needs to be avoided.) If one believes that multiple attacks on a target above a certain level are impractical, the methodology can easily handle this by simply not allowing allocation of warheads against a target above a certain level.

Attacks by different types of weapons

The example given earlier assumed that the attacking force had only one type of weapon. (The example postulated attacks using warheads with characteristics of the Soviet SS-18 ICBM.) In cases where the lethality characteristics of attacking warheads are similar (e.g. warheads from SS-18s and SS-19s are quite close in effectiveness), then using one estimate of lethality to represent different types of weapons does not affect results very much. When the attacking force consists of weapons of diverse characteristics, attack effectiveness can be approximated by computing a warhead lethality that is the average of the attacking force. Alternatively, the scheme in appendix A that allocates warheads to targets can be modified so that different types of attacking warheads are allocated optimally against different types of targets.

LIMITATIONS

As in inevitably the situation, the methods described above provide only a simple model of reality. As a result they have several shortcomings including the following:

1. *Measuring Deterrence.*—What constitutes necessary conditions for deterrence is not easily amenable to the type of calculations presented here. Even when a high degree of crisis stability exists, other factors may dominate decision-making. Such things as the overall state of political relationships between countries, the ability of the leadership on both sides to make rational decisions and avoid miscalculations, and other intangible factors may have a dominant influence on the decision of whether to launch a nuclear strike.

2. *Simple Modeling Versus Operational Planning.*—The methodology in this report makes a number of simplifying assumptions that may or may not be an accurate reflection of reality. For example it makes an assumption that multiple attacks on a number of diverse targets is something that is possible to execute in practice. In fact, it may be that the complexities of working out the timing and execution of such attacks would be extremely complicated, perhaps to the point of being infeasible.

3. *Technical Uncertainties.*—The data and equations used to represent the interaction of forces in a nuclear attack are subject to high levels of uncertainty. In all cases, the data and equations used in our initial calculations are those made available from unclassified sources. As such, they generally do not provide rigorous backup that describes what information and sources they are based on. In many cases, this information provides only rough estimates that can never be validated without extensive nuclear testing in the atmosphere (a practice currently prohibited by treaty) or perhaps even experience gain from an actual nuclear conflict. The model does allow for an assumption to be varied in order to determine how results might change. It cannot, however, compensate for the significant uncertainty that pervades such calculations.

4. *Other Nuclear Forces.*—The methodology considers only intercontinental nuclear forces possessed by the United States and the Soviet Union. Left out are so-called theater nuclear forces (e.g. ground launched cruise missiles and Pershing missiles stationed in Western Europe, and SS-20 missiles stationed in the Soviet Union) which could be used for attacks on the two superpowers or their allies. These forces would have profound effects on each other's security. Also not included are British, French, and Chinese nuclear forces which are also designed to strike targets in the Soviet Union.

APPENDIX A

INTRODUCTION

This appendix shows the details of how cost-to-attack curves are produced. It lays out what characteristics are needed to describe forces, how destruction of forces attacked is computed and how attacking forces are allocated to targets. The methodology describes attacks on ICBMs. The basic approach can be extended to cover the full strategic triad of ICBMs, SLBMs, and bombers.

FORCE CHARACTERISTICS

Following force characteristics need to be specified before computations begin:

Forces Being Attacked

Si = number of silo-based ICBMs of type i.

M = number of mobile ICBMs (this assumes there is only one type of mobile ICBM).

Wi = number of warheads per missile for silo-based ICBM of type i.

V = number of warheads per mobile ICBM.

Hi = hardness of ICBM silo of type i (in PSI).

G = hardness of a mobile ICBM launcher (in PSI).

D = area in which mobile ICBMs are deployed (in square statute miles).

N = total number of warheads available for an attack.

Y = yield of attacking warhead (in magatons).

C=accuracy of attacking warheads measured in CEP (in nautical miles)

R=the reliability of an attacking warhead (probability, given a command to launch a missile, that it is successfully launched and warheads from the missile arrive in the vicinity of the target)

FORCE DESTRUCTION CALCULATIONS

For silo-based ICBMs, the probability that a single warhead destroys a silo is estimated to be:

$pi = R(1-2^{-(F/C)^2})$

Where $F = Y^{2/3} 6.08 ((Hi/3152)^{12} - .038)^{-2/3}$

pi=probability of an ICBM silo of type i is destroyed by a single attacking warhead

Source: Equation provided to CRS by U.S. Air Force

If several warheads are used to attack a silo, and the effects of each warhead are independent of all other warheads, then:

$Pi,n = 1-(1-pi)^n$

When Pi,n=probability that an ICBM silo of type i is destroyed by n warheads

For computing mobile ICBMs destroyed, one first needs to determine the lethal area of an attacker's warhead directed against a mobile ICBM launcher. (Lethal area is the area around the point where an attacking nuclear warhead detonates such that, if a mobile launcher is located in that area, it will be destroyed.) A formula for lethal area estimates (which assumes optimal height of burst) is:

$A = (((3.04903 \times 10^7/G)^{1/2} - 300)Y^{1/3}/528)^2$

Where A=lethal area

Note: equation valid only for $10 < G < 50$

Source: Based on data from Department of Defense and Department of Energy, The Effects of Nuclear Weapons, Third Edition, 1977. pp. 112-113.

If one assumes that mobile launchers are randomly distributed thoughout their deployment area and that the attacker executes a "perfect" barrage of the dispersal area (i.e. the lethal area of no two attacking warheads overlap), then:

$Q = mA/D$ for $mA < D$

$= 1.0$ for $mA > D$

Where: Q=probability that mobile ICBM launcher is destroyed by an attacking warhead

ALLOCATION OF ATTACKING WARHEADS

Given the force characteristics and force destruction relationships above, there remains the problem of allocating attacking warheads against a variety of ICBM targets. Assume that the attacker wanted to maximize the number of opposing ICBM warheads destroyed. Then the following strategy can be used to produce such an optimal allocation.

Suppose the attacker had only one warhead to allocate against a set of targets. To maximize the number of opposing warheads destroyed, he would allocate it against the target that produces the greatest marginal increase in warheads destroyed per attacker warhead used. If the attacker had a second warhead, he would then allocate it against the target that had the second best marginal increase in warheads destroyed per attacker warhead used in order to maximize his gains.

More generally, if the attacker has already allocated N-1 warheads optimally, then allocating the Nth warhead against the target that will produce the best marginal warhead destroyed per warhead used will give an optimal allocation for N warheads. By induction, this strategy of building up one-by-one attacker warhead allocations will produce allocations of warheads at any level of attack that is optimal.

In order to put this strategy into practice, one first needs to compute the marginal number of warheads killed per attacker warhead used. For silo-based ICBMs, this can be computed as follows:

Suppose $n-1$ attacking warheads are already allocated against a silo of type i. Then from an equation discussed earlier:

$Pi,n-1 = 1-pi)^{n-1}$

and $Ki,n-1 = WiPi,N-1$

Where Ki, n−1=number of warheads killed from n−1 warheads used to attack a particular silo.

Suppose that one additional warhead were allocated against a silo of type i, giving a total of n warhead attacking that silo. Then the marginal increase in warheads of type i killed for the addition of one more attacking warhead:

$\Delta Ki,n/\Delta n = Ki,n - Ki,n-1$

$= Wi(1-(1-pi)^n) - Wi(1-(1-pi)^{N-1})$

$= Wipi(1-pi)^{n-1}$

When $\Delta Ki/\Delta n$=marginal increase in number of ICBM warheads of type i destroyed for the nth warhead allocated against a silo of type i.

For mobile ICBMs, suppose $m-1$ warheads are already allocated to attack the mobile ICBM dispersal area. Then from an earlier equation:

$Q = (m-1)\,A/D$ for $m-1 < A/D$

$= 1.0$ for $m-1 > A/D$

Suppose one additional warhead were allocated to attack while ICBMs of type i area in their deployment area, giving a total of m warheads allocated. Then the marginal increase in mobile ICBM warheads of type I destroyed per additional warhead used in an attack is:

$\Delta L/\Delta m = A/D$ for $m < A/D$

$\Delta L/\Delta m = O$ for $m > A/D$

Where

$\Delta L/\Delta m$=marginal increase in number of ICBM warheads for the mth warhead allocated against mobile ICBMs.

Given the formulae for the marginal increase in warheads destroyed for attacking a silo, $\Delta Ki,n/\Delta n$, and for attacking mobile ICBM, $\Delta L/\Delta m$, there is next the problem of using these to optimally allocate attacking warheads against targets. The following steps are used to do this:

1. Calculate values for $\Delta Ki,n/\Delta n$ and $\Delta L/\Delta m$.

In the case of $\Delta Ki,n/\Delta n$, attacking a silo with too many warheads becomes impractical past a certain point and also gives generally very small returns. Therefore limiting n to a maximum of 6 puts a practical bound on the number of calculations needed.

2. Order the set of marginal warheads killed per warhead used, ($\Delta Ki,n/\Delta n$, $\Delta L/\Delta m$) from greatest to least.

3. Go through the ordered set of marginal warheads killed per warhead used from step 2 (i.e. consider the largest value first, the next largest second, etc.). For each of these:

a. If the marginal warheads destroyed per warhead used is that for an ICBM silo, assign one additional attacking warhead to each of the Si silos of type i. If the attacker warhead inventory is exhausted at this stage in the allocation, assign only those warheads available to a portion of the Si targets and stop the allocation process. If not, return to step 3 to consider the next greatest marginal warhead destroyed per warhead used.

b. If the marginal warhead killed per warhead used is that for a mobile ICBM, assign enough warheads to totally cover the dispersal area for these ICBMs. This is D/A warheads. If the attacker warhead inventory is exhausted, assign only those warheads available to attack a portion of mobile ICBMs deployment area and stop the allocation process. Otherwise, return to Step 3 to consider the next greatest marginal warhead destroyed per warhead used.

As the assignments of warheads of targets in step 3 takes place, it is easy to calculate the incremental number of ICBM warheads destroyed for each group of attacker warheads assigned. Cumulative number of warheads used and cumulative warheads destroyed can also be easily computed at each stage in the iterative allocation process in step 3. This data (cumulative warheads used versus warheads destroyed) then defines the cost-to-attack curve for the forces being considered and can be used for crisis stability analysis.

EXTENSION TO ATTACK OTHER STRATEGIC FORCES

The method just described considers attacks on ICBMs only. A simple assumption to compute results of attacks for bombers and ballistic missile launching submarines is as follows. A certain percentage of the bomber force is postured on alert so that it will be able to take off before attacking warheads can explode. Thus this portion of the bomber force can survive, but those nonalert bombers that remain on the ground would be quite vulnerable to attack and easy to destroy. In the case of SSBNs, a certain percentage of them are at sea at a given time, and again might be reasonably presumed to survive an enemy attack. However, those SSBNs not at sea would be quite vulnerable and easily subject to destruction from an attack. Thus, the way this method estimates the effects of attack on these forces is to assume that all bombers on alert and submarines at sea escape attack, and that these forces not in those postures could easily be destroyed with a few warheads allocated against each bomber base and submarine port. (In applications, two warheads are assumed sufficient to destroy one of these facilities.)

Given this means of computing forces destroyed, allocation of attacking warheads to bomber bases and SSBN ports is integrated into the ICBM attack allocation scheme above by considering the marginal bomber weapons and SLBM warheads destroyed for attacking warheads used.

[Report No. 85-117 F]

COST TO ATTACK U.S. AND SOVIET STRATEGIC FORCES UNDER THREE ALTERNATIVE ARMS CONTROL APPROACHES

(By Anibal A. Tinajero, Specialist in National Defense, and Louis C. Finch, Specialist in International Affairs)

ABSTRACT

This report analyzes three arms control approaches—the U.S. build-down proposal, the July 1983 Soviet negotiating position, and a modified version of SALT II—with respect to their effect on stability. As used in this study, "stability" is defined as a condition where neither the United States or the Soviet Union has a strong incentive—securing a decisive military advantage—to launch a strategic nuclear attack. The analysis first projects the strategic nuclear forces that each side might deploy through the year 2000 under each of the three arms control approaches. Based on the alternative forces deployed, simulated attack scenarios are used to analyze the implications of each arms control approach on crisis stability, but it is expressed in terms of overall reductions of and limitations on somehthing called "destructive potential" (presumably involving the throw-weight or carrying capacity of ballistic missiles, combined with an analogous measure for bombers). In the absence of a more specific formulation, this analysis assumes that bomber limitations would be that of an earlier and separate U.S. negotiating position, namely limiting bombers to a level of 400, with a maximum of 20 air launched cruise missiles (ALCMs) for each bomber.

Soviet Proposal

This analysis uses the last publicly known proposal offered by the Soviets during the START negotiations. (As of this writing, it is understood that in the current Geneva talks the Soviets have not offered a proposal for reducing strategic nuclear arms.) The July 1983 proposal would have brought each side into full compliance with SALT II by the end of 1985, and by 1990 would have required each side to be at the following limits: 1,800 Strategic Nuclear Delivery Vehicles (SNDVs); 1,200 MIRVed ballistic missiles plus ALCM-carrying bombers; 1,080 MIRVed ballistic missiles; 680 MIRVed ICBMs.

They have also expressed a willingness to accept equal limits on "nuclear charges" (i.e., nuclear warheads).

SALT II

Both the United States and the Soviet Union are currently following a policy of "not undercutting" the provisions of SALT II. In practice, this has come to mean something other than complete adherence to the SALT II agreement. In particular, the Soviets are already in excess of the 2,250 SNDVs allowed under SALT II. In addition, the United States plans to deploy two new types of ICBMs, MX, and the Midgetman mobile ICBM. The Soviets may also be planning to deploy two new types of ICBMs, the SS-24 MIRVed ICBM, and the SS-25 small mobile ICBM. These potential U.S. and Soviet deployments would not be consistent with the SALT II provision limiting each side to one new ICBM.

ANALYTICAL APPROACH

To analyze selected arms control approaches, this report:

1. Projects strategic nuclear forces under the various approaches that might be typical of those deployed by the United States and the Soviet Union through the year 2000.

2. Assesses changes in U.S. and Soviet strategic nuclear forces over time in order to gain some insights as to how easy or difficult it might be to accept each approach from the prospective of a force planner.

3. Uses simulated attack scenarios to analyze the implications of each arms control approach on crisis stability. This analysis is based on the kinds of strategic nuclear forces that might evolve on both sides under each approach.

4. Varies certain key assumptions made in the analysis of steps 1-3 in order to determine whether changes in these assumptions might affect the basic conclusions drawn.

The data and calculations made in this report are drawn entirely from unclassified sources. These are identified at appendix A. Readers are also encouraged to see CRS report 85-64F, Cost-to-Attack: Measuring How Strategic Forces Affect U.S. Security, which presents the methodology used to assess the crisis stability of various alternative arms control approaches.

Two further explanatory notes: First, the results of the various attack scenarios used in this analysis are expressed in terms of warheads surviving or destroyed. For convenience, "warheads" includes not only those on ICBMs, SLBMs, and air-launched cruise missiles (ALCMs) but gravity bombs as well. Second, the various attack scenarios assume that neither side's strategic nuclear forces are on "generated alert" that might be caused by increased tension between the two sides. In other words, each side's strategic nuclear forces are in their normal peacetime alert status. In this sense the analysis assumes worst case attack scenarios.

FINDINGS

Current Forces

For current forces, Soviet ICBMs can, with great inefficiency, destroy about 97 percent of U.S. ICBM warheads but their ICBMs and SLBMs together can destroy only about 40% of all U.S. strategic warheads, (ICBMs, submarines carrying SLBMs, and strategic bombers).

In comparison, U.S. ICBMs can destroy only about half (52%) of the Soviet's ICBM warheads, and U.S. ICBM and SLBM attacks on the Soviet triad (ICBMs, SLBMs, and bombers) could destroy about 52% of all Soviet strategic warheads.

Forces in the Year 2000 Under Alternative Arms Control Approaches

The U.S. build-down proposal forces much greater shifts in the size and composition of strategic forces than do the other two approaches. If one believes that the greater the shift in the basic composition of forces the greater will be the resistance to these shifts by force planners, then build-down would appear to be more difficult to accept by both sides than the other two approaches.

The Soviet proposal would require a substantial (about 28%) reduction in Soviet SNDVs while having virtually no effect on the number of U.S. SNDVs. It caps warheads at a very high level, allowing the Soviets to retain their large number of ICBM warheads. The SALT II approach would be the most generous of the three approaches both for SNDVs and warheads.

None of the three approaches significantly constrains modernization plans of the United States. The extent of Soviet modernization plans is unknown, but even build-down, the most restrictive approach, allows the Soviets substantial opportunities to modernize. The build-down proposal as described in this report encourages growth in the bomber forces of both sides. (Limits on destructive potential which encompass both bomber and ballistic missile forces might change this outcome had such limits been included in the report's formulation of the build-down proposal.)

None of the approaches forces "deep cuts" in overall strategic weapons. The build-down proposal forces substantial reduction in ballistic missile warheads (about 35% for the U.S., about 45% for the Soviets), but these reductions could be compensated for by increases in bomber weapons (again assuming that limits on destructive potential were not in effect). Although the Soviet proposal requires large cuts in delivery vehicles on the part of the Soviet Union (about 29%), it does not force reductions in overall numbers of warheads.

None of the approaches would produce big reductions in procurement costs because each one permits substantial modernization. The build-down proposal might possibly reduce operating costs of the ballistic missile forces of both the United States and the Soviet Union, but the larger bomber forces allowed under the formulation of build-down as used in this report could offset those savings. The Soviet proposal suggests that operating costs for the Soviet Union would be reduced more than they would for the United States because the proposal substantially cuts the number of Soviet delivery vehicles without requiring similar reductions in U.S. delivery vehicles.

Stability analysis

All three approaches share some common characteristics for crisis stability associated with forces estimated to be in place in the year 2000. In all proposals, ICBMs in silos are quite vulnerable.

All three approaches assume that the United States and the Soviet Union deploy small single-warhead mobile ICBMs in substantial numbers (about 500). In all cases, mobile ICBMs seem to make a substantial contribution to crisis stability. Under all three approaches mobile ICBMs are subject to attack, but they can be destroyed only at great expense to the attacking side. (The results of the cost-to-attack analyses indicate that it requires about ten attacking warheads to destroy one mobile ICBM.)

Of the three approaches, the build-down proposal places the lowest limits on numbers of ICBM warheads. This would tend to improve stability since each side would have fewer ICBM warheads available to attack ICBMs, in particular, to barrage the dispersal areas of mobile ICBMs. Although some portion of the mobile ICBM dispersal areas could be barraged, a significant portion of mobile ICBMs would survive (about 63 percent for the United States, about 83 percent for the Soviet Union). The Soviet proposal and SALT II allow sufficient numbers of warheads so that the total mobile ICBM dispersal area might be barraged. Such attacks, however, would be highly inefficient, requiring about ten warheads for each mobile ICBM warhead destroyed. This inefficiency may be sufficient to discourage such attacks and thus bolster crisis stability.

For ballistic missile (ICBMs and SLBMs) attacks on strategic triads (ICBMs, SLBMs, bombers), substantial numbers of warheads on each side survive under each approach. A lesser proportion of the Soviet Union's warheads survive because of its greater emphasis on silo-based ICBMs, which are more vulnerable to attack than mobile ICBMs, sub-

marines, or bombers. At the same time, U.S. advantages in surviving bomber forces may be offset by the prolific Soviet air defenses.

Sensitivity Analysis

A concern often raised about Soviet ICBMs is their large throw-weight (payload capacity) relative to U.S. ICBMs. The worry is that the Soviets could exploit this throw-weight advantage by rapidly increasing the number of their ICBM warheads. Assuming that the Soviets had the technology to exploit the throw-weight of the ICBMs (SS-17, SS-18, SS-19, SS-24, SS-25) at the same level of efficiency as that reported for MX, it could have a much larger number of warheads available for attack (an increase from 6,420 to about 14,000 under the launcher constraints of the SALT II proposal, for example). Though this larger number of warheads would violate the terms of all three approaches, it is important to consider because the Soviets might be able to realize this boost in numbers of warheads in approximately five to ten years if they chose to break out of the provisions of any of the approaches.

In terms of crisis stability, more Soviet ICBM warheads would not increase the vulnerability of U.S. silo-based ICBMs. The Soviets need only a relatively small number of ICBM warheads to destroy MX and Minuteman silos and that number is well within the warhead limits of each arms control approach. The advantage of more warheads is that it would allow the Soviets to saturate Midgetman deployment areas, and under the Soviet proposal and the SALT II approach they would have many thousands of warheads. Although such a capability may worsen stability, large scale attacks of the magnitude needed to destroy Midgetman missiles may not be practical or desirable (e.g., they might trigger major changes in the world environment). It is not clear however, how much attention the Soviets might pay to such concerns.

In other areas considered, the findings in the stability analysis above do not change significantly under the following assumptions:

Lowering the alert rates of Soviet bombers and ballistic missiles and submarines (SSBNs) from the higher equivalent U.S. rates used in most of the analyses to those given in unclassified estimates. This is because the Soviets have a relatively small capability in their bomber force (thus, changes in its vulnerability do not affect overall results very much) and because in actual practice a significant portion (about 50%) of their SSBNs are at ready alert in port or deployed at sea.

Limiting attacks on ICBM silos to no more than two warheads per silo to reduce the possibility of fratricide and to alleviate difficulties in planning and conducting larger scale attacks. This is because under the assumed high accuracies used in the analysis, two warheads have a very high probability of destroying a target. Thus, adding more warheads per target does not affect the outcome very much.

Giving the Soviets their currently estimated ICBM accuracy, which is lower than that used in the section on stability analysis for strategic forces in the year 2000. (This analysis used accuracies equivalent to the MX.) This is because Soviet accuracies are sufficient to give them substantial capability to destroy U.S. ICBMs. They can therefore compensate for lower accuracy by allocating more warheads to ICBM targets, these additional warheads being generally available under all three approaches considered.

FORCES UNDER ALTERNATIVE ARMS CONTROL APPROACHES

As a point of departure, Table 1 shows estimates of the strategic nuclear forces currently deployed by the United States and the Soviet Union. Over time, of course, the size and mix of these forces will change, depending in part on the plans each side has for retiring, and modernizing particular elements in the forces. One influence on these plans would be possible constraints from arms control agreements. Table 2 lays out the general constraints that would affect the structures of both sides' strategic forces under the three arms control approaches. Some key assumptions that this analysis uses to interpret the provisions of these proposals are as follows:

Build-down

The formulation used in this analysis considers only limits on ballistic missile warheads, numbers of bombers, and bomber weapons. The United States also has publicly stated its intention to propose additional limits on something called "destructive potential." Although destructive potential probably entails some quantitative measue of throw-weight for ballistic missiles and payload capacity for bombers, the term has not been clearly defined publicly. For this reason, this analysis does not consider limits on destructive potential. As an alternative means of dealing with limitations on bomber armaments that are inherent in the destructive potential formulation, this report assumes on overall limit of 400 bombers on both sides with a maximum of 20 air launched cruise missiles for each bomber. (The projection of Soviet and U.S. forces in the year 2000 credits each side with 400 bombers: of the Soviet total, 60% carry ALCMs; of the U.S. total, 50% are equipped with ALCMs.)

TABLE 2.—SNDV'S AND WARHEAD CEILINGS UNDER THE ARMS CONTROL APPROACHES ANALYZED

Ceilings	Build down	Soviet proposal	SALT II mod
MIRV'd ICBM's	Not stated	680	820.
Heavy ICBM's	do	Not stated	308.
MIRV'd ICBM's/SLBM's	do	1,080	1,200.
Total ICBM's/SLBM's	Approximately 1,250	Not stated	Not stated.
MIRV'd ICBM's/SLBM's plus CMC bombers.	Not stated	1,200	1,320.
Delivery vehicles	do	1,800	Not applied.
Modern SSBN's	do	Not stated	62.
SLBM RV's plus ICBM RV's	5,000	do	Not stated.
Total warheads	Not stated	Approximately 10,000	Do.
Reduction schedule used in projections.	[1]	[2]	[3].

[1] Projected that the reductions would begin in 1986. 2 older ballistic missile warheads are retired for every warhead introduced with a new MIRV'd ICBM. 3 older SLBM/ICBM warheads are retired for every 2 warheads introduced with a new MIRV'd SLBM. the total inventory of ICBM/SLBM warheads is reduced by no less than about 5 percent per annum.

[2] Projected that the reductions would begin in 1986 and be completed by the end of 1990. The annual reductions in delivery vehicles to be no less than 20 percent of the difference between the 1985 inventory and the ceiling. The warhead ceiling would enter into effect starting in 1986.

[3] Projected that the United States and U.S.S.R. would continue to adhere to all SALT II ceilings except for the ceiling on total delivery vehicles.

Soviet Proposal

As reported in the press, the Soviet proposal involves limits on strategic nuclear delivery vehicles. It also includes broad limits on warheads. For this study, the limit was set at 10,000 warheads based on public statements by the Soviet Union that it would be willing to accept "limits on nuclear charges at levels equal to or below those of the current U.S. forces."

SALT II

The SALT II proposal used in this analysis accepts the provisions of the SALT II treaty with two exceptions. First, the overall limit of 2,250 delivery vehicles is not enforced. (The Soviets now have about 2,500 delivery vehicles and probably would not take reductions unless the treaty were in force.) Second, both sides are allowed to deploy two new ICBM types—one MIRVED and one single-warhead mobile. This is at variance with the SALT II proposal limiting each side to one new type of ICBM.

Figures 1, 2, and 3 show estimates of U.S. and Soviet forces projected through the year 2000 under each proposal. The results are displayed both in terms of deployed strategic nuclear delivery vehicles (i.e., ICBMs in silos or on mobile launchers, SLBMs in tubes on submarines, and bombers) and strategic warheads on ICBMs and SLBMs, and gravity bombs and ALCMs on bombers).

Observations

The build-down proposal shows a modest decline in U.S. strategic delivery vehicles (about 19%) compared with a larger decline in Soviet delivery vehicles (about 39%). Soviet warheads also decline more than U.S. warheads (about 24% versus about 10%). The number of U.S. and Soviet bomber warheads could grow under this proposal; the projection used in this report reflects about a 70% increase for the United States and about a 138% increase for the Soviet Union. U.S. and Soviet ballistic missile warheads decline to a level of 5,000 a piece (a decline of about 38% for the United States and about 44% for the Soviet Union). The projection suggests a major decrease in Soviet ICBM warheads (from 6,012 to 2,600, or about 57%). On the U.S. side, the projections indicate a major decrease in SLBM warheads (from to 6,112 to 3,072, or about 50%).

Under the Soviet proposal, the number of U.S. delivery vehicles declines only about 7%; Soviet SNDVs decrease about 29% (from 2,523 to 1,800). Projected U.S. warheads under the Soviet proposal show an initial drop from 11,505 to 9,914 due primarily to SLBM retirements. Soviet warhead inventories remain almost constant throughout the period of the projections.

Under SALT II, numbers of delivery vehicles remain almost constant over the period of the projections. The projection of U.S. warheads show some small shifts, including more bomber weapons (2,472 to 3,816) and ICBM warheads (2,121 to 2,800) and fewer SLBM warheads (6,912 to 5,120). On the Soviet side, warheads increase some 22% (10,228 to 12,487). Most of this growth is in ICBM warheads and bomber weapons.

STABILITY ANALYSIS

An important question is how forces projected under each arms control agreement would affect crisis stability. In other words, would these forces increase or decrease incentives to one or both sides to gain a decisive military advantage through a preemptive nuclear attack? To help address these questions, the following analysis presents the results of simulated attacks by the strategic nuclear forces of one side against the forces of the other. These results are potentially useful in analyzing crisis stability from two perspectives:

They provide a measure of the cost-to-attack for the aggressor—that is, the military force used in an attack relative to the size of opposing forces destroyed. By comparing forces used versus forces destroyed one can derive a measure of the extent to which an attack by an aggressor would be "profitable."

They show the forces surviving a particular level of an aggressor's attack. Presumably, if the size of the surviving force is increased by an option, the threat of retaliation by those forces would increase, thereby strengthening deterrence and enhancing crisis stability. Conversely, if the number of survivors declines as a result of selection of an option, the incentives for the opposing side to attack increase, and crisis stability is degraded.

The results of simulated attacks are shown in a series of graphs. They present numbers of one side's warheads destroyed as a function of the other side's warheads used in an attack. Attacks are simulated on each side's ICBM forces alone as well as on each side's strategic triads (ICBMs, SLBMs, and bombers). These attack scenarios are constructed so that ICBMs attack ICBMs, and ICBMs plus SLBMs attack triads.

Each graph has a diagonal line that cuts through it middle. This is a "break-even" line. For any result that lies on it, the number of warheads used by the attacker are exactly equal to the number destroyed of the side attacked. Results above the break-even line indicate situations where the number of warheads destroyed is greater than the number of warheads used, indicating that the aggressor might find such attacks "profitable." Results below the break-even line suggest situations where the number of warheads destroyed is less than the number of warheads used, indicating that the attacker might find such attacks inefficient or "unprofitable."

Also shown on each graph is a horizontal line indicating the starting inventory of warheads for the side attacked. The number of surviving warheads is the vertical distance (gap) between the starting inventory line and the curve that shows the number of warheads destroyed for the side attacked. Presumably, the larger the level of survivors at a given level of attack, the more unprofitable for an aggressor to attack because of the increased potential for retaliation.

Finally, the curve that shows the number of warheads required for an attack versus warheads killed stops at a point where either there are no more warheads available for the attack or there are no more targets left to attack.

Current forces

Figures 4a, b, c, and d show results of simulated nuclear attacks using current U.S. and Soviet strategic forces. From these results the following observations can be made:

The Soviets, with an ICBM attack, can destroy almost all U.S. ICBMs. These attacks, however, are very inefficient, because many more Soviet warheads are used than are destroyed on the U.S. side. This inefficiency is due in large measure to the relatively low accuracy of Soviet ICBMs.

U.S. ICBM attacks are able to destroy a significant number of Soviet ICBMs, and do so more efficiently than Soviet ICBM attacks on U.S. ICBMs. Nonetheless, if the objective is to destroy a high percentage of Soviet ICBMs, the United States would need more ICBM warheads that it has deployed.

A major portion of the U.S. triad would survive Soviet ballistic missile (ICBM and SLBM) attacks. The numbers of U.S. bombers on alert and SSBNs at sea provides much of this margin of security.

U.S. ballistic missile attacks on the Soviet triad could destroy about half of the Soviet strategic capability. This is because the majority of Soviet warheads are mounted on ICBMs in silos, which are relatively vulnerable to U.S. attacks.

Forces in the year 2000

Figures 5 a, b, and c show results for Soviet ICBMs attacking U.S. ICBMs under the three approaches. U.S. silo-based ICBMs are quite vulnerable under all approaches. Most of them are destroyed with no more than 500 Soviet ICBM warheads (or about four U.S. warheads killed for each Soviet warhead used). From this perspective each approach has about the same result with respect to crisis stability.

Midgetman ICBMs can also be destroyed, but at high cost. To destroy one Midgetman takes about ten Soviet warheads if the disperal area is 20 square miles per missile as assumed in this analysis. Under the Soviet proposal and SALT II, the Soviets have enough warheads to attack silo-based ICBMs and to barrage the total Midgetman deployment area (10,000 square miles) but this would require their entire ICBM force. Furthermore, Midgetman survivability could be improved by expanding the dispersal area.

Under all approaches when only attacks on ICBMs are considered, Midgetman is the principal hope for stability. That hope rests, however, on the possibility that the Soviets would be dissuaded from barraging Midgetman deployment areas because of the great inefficiency of such attacks. Where they dissuaded from doing so, Midgetman would provide from 450 to 500 surviving warheads, depending on the arms control approach.

Figures 6a, b, and c results under all three approaches for the case of U.S. ICBMs attack on Soviet ICBMs. The results are similar to those in Figure 5a, b, and c with respect to very high returns for the attacker (5–6 warheads destroyed for each warhead used) for attacks on ICBM silos. In these cases, however, the United States does not have enough ICBM warheads under any of the approaches to successfully attack both silo-based and mobile ICBMs. Thus, under all approaches, the Soviets would have approximately 500 surviving warheads on mobile systems. The stability attributes of all approaches thus seems to be about the same for the results shown in Figure 6, though the measure of stability provided by Soviet mobile ICBMs is greater since the U.S. lacks the ICBM force necessary to barrage them.

Figures 7a, b, and c show the results of a Soviet ballistic missile attack on the U.S. triad. It suggests that relatively small attacks destroy all U.S. bombers not on alert, SLBM launching submarines that are in port, and ICBMs in silos. This situation applies for each approach. Under each approach, the United States still has 4,000–5,000 warheads (principally Midgetman, bombers on alert, and SLBMs on submarines at sea) available for retaliation. This would seem to provide a substantial retaliatory capability, and a strong deterrent of Soviet attacks, and thus a positive attribute for stability. Again, the results in terms of

crisis stability do not appear to vary significantly among the approaches considered.

Figures 8a, b, and c show the results of U.S. attacks on the Soviet triad. In each case, about 2,000-3,000 warheads would survive, suggesting that each arms control approach has roughly the same characteristics with respect to crisis stability.

SENSITIVITY ANALYSIS

The results above are dependent on a number of assumptions. Some of the critical ones are investigated below. The procedure followed is to modify the assumption to see if the modification changes the basic conclusions concerning the effects the alternative arms control approaches have on crisis stability.

Effects of Throw-weight

None of the approaches as described limit throw-weight (the payload carrying capacity of ballistic missiles), although, as mentioned before, the most recent U.S. negotiating position includes a limitation on "destructive potential," which could include throw-weight. An important question is how throw-weight would affect crisis stability under each approach?

The basic concern is that the Soviets could use the rather large throw-weight of their ICBMs to deploy substantially more warheads for attacking U.S. forces. They could do this by more efficiently packaging their ballistic missile warheads. Adding more warheads would, of course, violate the warhead limits imposed by each of the three arms control approaches.

To see to what extent the Soviets could proliferate warheads through the more efficient use of throw-weight, consider the following: One benchmark for packaging efficiency might be the MX ICBM. The throw-weight for the MX is estimated to be approximately 7,000 pounds. With this throw-weight, the MX is able to deliver ten warheads, or 700 pounds of throw-weight per warhead. If the Soviets were able to utilize their ICBM throw-weight as efficiently, the SS-17 would be able to carry 9 warheads, (versus 4 now), the SS-18, 24 warheads (versus 10), the SS-19, 11 warheads (versus 6), the SS-24, 11 warheads (versus 10), and the SS-25, 2 warheads (versus 1).

Figures 9a, b, and c show the results of Soviet ICBM attacks on U.S. ICBMs assuming that the Soviet Union would be able to (and chose to) equip its ICBMs with more warheads. In this case, the numbers of Soviet ICBMs are the same as those shown in Figures 4a, b, and c for the year 2000. Each type of ICBM is armed with the number of warheads indicated in the preceding paragraph. It appears as though proliferation of warheads has little effect on U.S. ICBM silo survivability. This is because U.S. silos are quite vulnerable to attack from relatively small numbers of Soviet warheads as shown in earlier results. Assuming that the Soviet Union had the number of ICBMs projected under the build-down proposal, it appears that there would be only marginal gain in capability to destroy Midgetman ICBMs. But if the Soviet Union had the number of ICBMs permitted under the Soviet proposal or the SALT II approach, it could destroy the Midgetman force and have 1,000-4,000 ICBM warheads left, again assuming that the U.S. would not increase Midgetman's dispersal area. Results of Soviet attacks on the U.S. triad differ somewhat from those analyzed earlier, in that the Midgetman force becomes vulnerable to a massive barrage on the part of the Soviets; bombers that are on alert and SLBM-launching submarines at sea are assumed to continue to survive.

Despite the possibility that the Soviets could effectively destroy all U.S. mobile and silo-based ICBMs, they still might be deterred from an attack because, under the assumptions made, large numbers of SLBMs and bomber weapons would survive and be available for retaliation. Also, the Soviets might be inhibited from launching such large-scale attacks because these attacks might trigger fundamental changes in the world's environment (the so-called "nuclear winter" effect). Nevertheless, the Soviet ability to destroy virtually all of the U.S. ICBM force and still have substantial ICBM capability remaining will be viewed with concern by some observers, especially those who argue that the Soviets would not view the remaining U.S. forces (SLBMs and bombers) as an effective retaliatory force.

Soviet Ballistic Missile Accuracy

All the results shown this far assume that by the year 2000 the accuracy of Soviet ballistic missiles will equal that of the MX (attributed by public sources to be .05 nautical mile CEP). There is no assurance, however, that they can achieve this degree of accuracy. Currently, Soviet modern ICBMs are estimated to have a CEP of about .14 nautical mile. An interesting excursion in analysis is to see what happens if the Soviets do not improve accuracy. Comparing the results of this excursion (Figures 10a, b, and c) to the results shown in Figures 5a, b, and c, which assumed Soviet ICBM accuracies of .05 nautical mile CEP, it can be seen that the attacks would be somewhat less efficient. This seems, however, to have little or no effect on stability. The reason is that even with lower accuracy a Soviet ICBM has a substantial probability (i.e., 54% of destroying a U.S. ICBM silo). By using a few more warheads the results are not markedly different from those shown in Figure 5.

Assumptions Regarding Fratricide

To this point, all the results are based on the assumptions that targeting decisions derive from a calculus in which targets for every additional warhead are chosen to maximize the probability of disabling remaining enemy warheads. This has produced attacks in which several warheads would be targeted against high value (i.e. multiple warhead) missiles in silos. In practice, however, attacks by more than two warheads are widely believed to be impracticable because of fratricide effects (when the explosions of nuclear warheads render ineffective other warheads directed at the same target). Attacks by more than two warheads on the same target are theoretically feasible, but would require feats of such extraordinary accuracy in the timing of thousands of warhead explosions that few believe them to be sensible bases for targeting strategies.

Two analyses were conducted to take fratricide constraints into account. Both analyses permit no more than two warheads to be targeted on a single silo. In the first analysis (Figures 11a, b and c), the assumption that Soviet ICBM accuracy is equal to that of the MX (.05 nautical mile CEP) is retained. In the second analysis, that assumption is relaxed and it is assumed that the Soviets do not improve their ICBM accuracy beyond our estimates of the capabilities of their modern systems (.14 nautical mile CEP).

The first analysis yields results that are almost indistinguishable from those of analyses in which there is no limit to the number of warheads that can be targeted on a single silo. In this case, the advantages—ignoring any fratricide considerations—of targeting a third or fourth warhead on a silo rather than some other target, are so small as to appear inconsequential in our analysis.

The second analysis (Figures 12a, b and c)—incorporating targeting restraints to account for fratricide in which it is assumed that the accuracy of Soviet ICBMs is .14 nautical mile CEP—in contrast, does show a significant less effective attack than the analysis in which there is no limit on the number of warheads that can be targeted on a single silo. In this analysis, however, the effects of the three different arms control proposals are, indistinguishable.

Readiness of Soviet Strategic Forces

The analysis presented above assumes that the alert rate of Soviet bombers is equal to that for U.S. bombers. It also assumes that the alert rate for their SSBNs is somewhat lower than for U.S. SSBNs. Publicly available estimates of readiness rates for Soviet bombers and submarines, however, are well below U.S. rates. (Normally Soviet bombers are not on alert while 30% of U.S. bombers are on alert continually. Soviet SSBN alert rates are about 50% versus 55% and 67% for U.S. Lafayette and Ohio class-SSBNs respectively.)

Figures 13a, b, and c show results of U.S. attacks on Soviet strategic triad forces using the publicly available estimates of current Soviet readiness rates. These lower readiness rates for bombers show some decrease in the overall Soviet warheads surviving the U.S. attack. The results are not remarkably different than the results shown in Figure 8 for bomber readiness rates of 30%. The reason is that bombers constitute a relatively small portion of the overall Soviet force capability.

APPENDIX A

ASSUMPTIONS AND REFERENCES

The following assumptions and references were used to project the inventories of strategic offensive weapons for the United States and the Soviet Union under three arm control approaches: (1) SALT II Mod Case; (2) Build Down Proposal; and (3) Soviet START Proposal. References are cited as follows: (12:31). The first number refers to the reference in the list of references printed at the end of this appendix. The second number is the specific page number of the cited reference.

Projections for the United States

SALT II Mod Case

ICBMs.—CRS projects the United States would have 100 M-X (each equipped with 10 warheads), 450 Minuteman IIIs (each with 3 warheads), and 450 mobile Midgetman ICBMs (each equipped with one warhead) by the end of calendar year 2000.

Titan II: By mid-1984, the United States will have 33 Titans (12:31), all of which will be retired by the end of 1987 (10:187).

Minuteman II: The United States has 450 of these single-warhead missiles (12:23).

Minuteman III: The United States has 550 Minuteman IIIs, 300 of which were converted to carry the MK 12A reentry vehicle by the end of FY83 (5:74). Because the MK 12A has about twice the yield of the MK 12 (15:17), CRS assumes that the U.S. would deploy MX in Minuteman III (MK 12) silos rather than Minuteman III (MK 12A) silos.

M-X/Peacekeeper: DOD announced that the first M-Xs will be deployed in late 1986 (10:186). The Air Force originally planned to deploy 10 M-X by the end of 1986, 40 by the end of 1987, 70 by the end of 1988, and 100 by the end of 1989 (verbal communication in with U.S. Air Force representatives, July 1983). CRS has followed this schedule although congressional cuts in M-X procurement may change it.

Midgetman: DOD indicates that this missile will be first deployed in 1992 (8: 25). Because deployment rates typically start low and increase over time, CRS assumes that 20 would be deployed in 1992, 50 more in 1993, and 60 thereafter until 450 are deployed in the year 2000. CRS also assumes that this missile would be mobile and that for each one deployed a Minuteman II would be retired.

SSBNs/SLBMs.—CRS projects the United States would have 24 Ohio-class SSBNs (each carrying 24 Trident II SLBMs equipped with 8 warheads apiece) and four Lafayette-class SSBNs (each carrying 16 Trident I SLBMs equipped with 8 warheads) by the end of calendar year 2000.

Lafayette-class: The United States has deployed 31 Lafayette-class SSBNs, 12 with Trident I SLBMs and 19 with Poseidon SLBMs (5: 7). To comply with SALT limits on MIRVed systems, CRS assumes that as the eighth Ohio-class SSBN begins sea trials, Poseidon-equipped SSBNs rather than Minuteman IIIs would be retired. Nonetheless, even if some Minuteman III silos were dismantled, some of the older SLBM launchers would have to be scrapped (in order to remain within the SALT I limit of 710 SLBM launchers) when the ninth and following Ohio-class SSBNs begin sea trials.

Ohio-class SSBNs: Ohio-class SSBNs will be deployed at the rate of about one a year. These boats become SALT-accountable when they start sea trials even though they do not begin operational missions until about 12 months later. Sea trials begin about four months before the boat is delivered to the Navy. The sea trial date for each Ohio-class boat was furnished by the Navy. As of the end of 1985, seven Ohio-class boats will have completed sea trials (14). CRS assumes that 24-25 of these boats could be acquired under SALT II.

The first eight Ohio-class SSBNs are to be equipped initially with Trident I SLBMs. Each boat will be subsequently converted to carry Trident II SLBMs when it undergoes major overhaul, which occurs about ten years after delivery (verbal communication with U.S. Navy representative, June 1984).

The ninth and subsequent Ohio-class SSBNs will be deployed with Trident II SLBMs (10: 188).

The number of warheads each Trident II SLBM will carry is classified, but most unclassified sources estimate eight warheads (7: 63). The missile's initial deployment is scheduled for 1989 (14: 17).

Bombers.—CRS projects the United States would have 96 B-52Hs and 34 B-1Bs (each equipped with 20 ALCMs), 86 additional B-1Bs (each equipped with eight bombs/SRAMs), and 132 "Stealth" bombers (each equipped with four bombs/SRAMs) by the end of calendar year 2000.

The current operational inventory of heavy bombers is 168 B-52Gs and 96 B-52Hs (9: 21). According to Air Force plans, B-52s will have three strategic missions: (1) penetrate, in which they would attack targets inside Soviet borders with bombs and short-range missiles; (2) standoff/penetrate, in which they would launch ALCMs from beyond the range of Soviet air defenses, then penetrate; and (3) standoff, in which they would only launch ALCMs.

In projecting the U.S. bomber force under SALT II, CRS assumes that: (1) The United States will maintain 550 MIRVed ICBMs and just under 650 MIRVed SLBMs, leaving room for 120 ALCM-equipped bombers under the SALT II limit of 1,320 "MIRVed" delivery vehicles; (2) the Air Force tries to minimize fluctuations in the bomber inventory; (3) the Air Force would try to maintain a balance between standoff and penetration capability in its bomber force; and, (4) all the B-52G bombers would be retired by the end of 1996.

B-1B: "The B-1B initial operational capability is projected for September 1986 when 15 B-1Bs are to have been delivered to the Strategic Air Command. Full operational capability is scheduled for June 1988, when the 100th aircraft is delivered" (5: 46). CRS projects that 20 additional B-1Bs (for a total of 120) would be acquired by 1989 to replace retiring B-52Gs in the standoff role.

ATB: While details of the ATB ("Stealth") program are classified, published reports indicate a possible buy of 132 aircraft and initial availability in 1991 or 1992 (3; 4: 16).

BUILD DOWN CASE

ICBMs.—CRS projects the United States would have 100 M-X (each equipped with 10 warheads), 159 Minuteman IIIs (each equipped with 3 warheads), and 451 Midgetman mobile ICBMs (each equipped with one warhead) by the end of calendar year 2000. The total number of ICBMs and their types to provide about two fifths of the 5,000 ballistic missile warheads allowed in the Build Down Proposal.

SSBNs/SLBMs.—CRS projects the United States would have 16 Ohio-class SSNBs (each carrying 24 Trident II SLBMs equipped with 8 warheads) by the end of calendar year 2000.

Lafayette-class SSBNs would be retired as M-X ICBMs and/or new Ohio-class submarines are introduced. The number of submarines required is estimated to provide about three fifths of the 5,000 ballistic missile warheads allowed in the Build Down Proposal.

Bombers.—CRS projects the United States would have 200 B-1Bs (each equipped with 20 ALCMs) and 200 "Stealth" bombers (each equipped with four bombs/SRAMs) by the end of calendar year 2000.

It is assumed that the number of ALCM-carrying bombers would rise above 120 projected in the SALT II Case. CRS assumes that all FB-111 bombers would be counted under Build Down, and that all B-52 bombers would be retired by the end of 1998, after 200 B-1Bs and 200 "Stealth" bombers would be operational.

SOVIET PROPOSAL CASE

ICBMs.—CRS projects the United States would have 100 M-Xs (each equipped with 10 warheads), 450 Minuteman IIIs (each equipped with 3 warheads), and 500 Midgetman mobile ICBMs (each equipped with one warhead) by the end of calendar year 2000.

CRS assumes that 500 Midgetman, rather than 450 under the SALT II Case, would be deployed to attain the proposed ceilings on delivery vehicles, MIRVed ballistic missiles, and warheads.

SSBNs/SLBMs.—CRS projects the United States would have 22 Ohio-class SSBNs (each carrying 24 Trident II SLBMs equipped with 8 warheads) by the end of calendar year 2000.

Lafayette-class SSBNs: CRS assumes that Lafayette-class boats would be retired as new Ohio-class SSBNs are delivered.

Ohio-class SSBNs: A total of 22 Ohio-class boats would be required to attain the proposed ceilings. Conversion of eight Ohio-class boats from Trident I carriers to Trident II carriers would proceed as in the SALT II Case.

Bombers.—CRS projects the United States would have 122 B-1Bs (each equipped with 20 ALCMs) and 100 "Stealth" bombers (each equipped with four bombs/SRAMs) by the end of calendar year 2000.

B-52s: CRS assumes that all the B-52s would be retired by the end of 1995.

B-1B and ATB: Given the ceilings of the Soviet Proposal, CRS projects that 122 B-1B and 100 "Stealth" bombers would be acquired, versus 120 B-1Bs and 132 ATBs projected for the SALT II Case.

Projections for the Soviet Union

SALT II Mod Case

ICBMs.—CRS projects the Soviet Union would have 308 SS-18s (each equipped with 10 warheads), 360 SS-19s (each equipped with 6 warheads), 150 SS-24s (each equipped with 10 warheads), and 580 SS-25 mobile ICBMs (each equipped with one warhead) by the end of calendar year 2000.

The number of ICBMs deployed and number of warheads per missile are from 12: 21-23. (The SS-11 mod 3 carries 3 warheads, but since each missile can attack only one target CRS counts one warhead per missile.)

DOD estimates initial deployment of the SS-24 will be in 1985 (12: 24). CRS assumes deployment after 1985 at the same rate as the Reagan Administration plans for M-X, 30 a year.

CRS assumes initial deployment of the SS-25 as 1985 for two reasons: (1) The Soviet Union conducted the first flight tests of the SS-24 and SS-25 at about the same time—October 1982 for the SS-24 and February 1983 for the SS-25 (2: 1; and 1: 20). (2) The SS-25 is smaller than the SS-24 (12: 23) and should be easier to develop.

CRS assumes a deployment rate of 60 a year for the SS-25. The rate should be higher than for the SS-24 because the SS-25 is smaller than the SS-24 and carries one warhead (12: 24) versus 10 for the SS-24 (7: 64).

CRS assumes that: (1) MIRVed SS-24s will be deployed in silos now occupied by SS-17s, the least capable Soviet MIRVed ICBM; and (2) SS-25s, although mobile ICBMs, replace SS-11s and SS-13s, single-warhead silo-based ICBMs, on a one-for-one basis.

Ballistic Missile Submarines/SLBMs

CRS projects the Soviet Union would have six TYPHOONs (each carrying 20 new SLBMs equipped with 9 warheads), 13 units of a new SSBN (each carrying 16 single-warhead SLBMs of a new type), 16 DELTA IIIs (each carrying 16 SS-N-23 SLBMs equipped with 7 warheads), four DELTA IIs (each carrying 16 SS-N-8 single-warhead SLBMs), 18 DELTA Is (each carrying 12 SS-N-8 SLBMs, one HOTEL III (carrying six SS-N-8 SLBMs), one YANKEE II (carrying 12 single-warhead SS-N-17 SLBMs), and four YANKEE Is (carrying 16 single-warhead SS-N-6 SLBMs) by the end of calendar year 2000.

SALT I limits the Soviet Union to 62 modern ballistic missile submarines, i.e., YANKEE class or newer (6: 8). It also limits the Soviet Union to 950 SLBM launchers, counting all launchers on SSBNs and

"modern launchers on older submarines (G[OLF]-class diesel-powered submarines)" (ibid.). SALT II also counts SLBM launchers on SSBNs and launchers of modern SLBMs on any submarine (13: 11). Modern SLBMs are those operational or flight tested after 1965, i.e., SS-N-6 or newer (ibid.). The SS-N-4 and SS-N-5 were flight tested before 1965. As of 1979, all SS-N-4s and some SS-N-5s were deployed on existing diesel-powered submarines (GOLF I and GOLF II class), so do not count (ibid.).

Basis of Submarine/SLBM Projections: In 1983, DOD said that the "Delta-III program is nearing completion. Thus far, 14 of these SSBNs have been launched; a few more will probably be built" (11: 22). CRS assumes 16 boats will be operational in 1986.

According to DOD, "by the early 1990s, the Soviets could have as many as eight [TYPHOONs] in their operational force" (12: 25). However, if the Soviets are not to violate the SALT II ceiling on MIRVed ballistic missiles (1,200), retain 818 MIRVed ICBMs, and have 16 DELTA IIIs, as CRS assumes, then they could have only six TYPHOONs. A delivery rate of one TYPHOON every two years is assumed.

CRS counts SS-N-18s (carried by DELTA IIIs) and SS-N-20s (carried by TYPHOONS) at the highest level of "MIRVing" indicated for each, 7 and 9 warheads, respectively (12: 26).

Projected future SSBN and SLBMs: Flight testing of the SS-N-23 started in 1983. (11: 23 and 12: 25). The SS-N-23 will probably replace the SS-N-18. (Ibid.) The maximum number of warheads on the SS-N-18 is 7 (12: 26); CRS assumes the SS-N-23 will have 7 warheads, the same number carried by the SS-N-18.

CRS projects the Soviets would introduce a new SSBN with a new SLBM in 1988 to replace retiring YANKEE-class SSBNs. This new SLBM would have to be equipped with only a single warhead, not to exceed the SALT II ceiling of 1,200 MIRVed ballistic missiles.

CRS also projects that in 1988 the Soviets would begin to replace SS-N-20 SLBMs on TYPHOONs with a missile equivalent to the U.S. Trident II. This new SLBM is projected to carry the same number of warheads currently carried by the SS-N-20.

Bombers.—CRS projects the Soviet Union would have 60 BEAR Hs (each equipped with 8 ALCMs), 60 BLACKJACKs (each equipped with 12 ALCMs), and also 105 BLACKJACKs (each equipped with four bombs and one SRAM) by the end of calendar year 2000.

Current inventory: The Joint Chiefs of Staff credit the Soviet Union with 100 BEAR and 45 BISON as of January 1, 1984 (9: 21). DOD notes that the Soviets "Strategic aviation assets include some 170 BEAR and BISON bombers . . ." (12: 27). DOD does not indicate, however, if all these are strike forces or if some are for other purposes (tankers, antisubmarine warfare). It notes that "An entirely new variant of the BEAR bomber (BEAR H), probably designed to carry long-range cruise missiles, is now in production . . . With the new BEAR H in series production, the decline in the inventory of BEAR and BISON aircraft characteristic of recent years has been reversed. The Soviets today have more bombers operational than just a few years ago" (12: 28). Collins lists 100 BEAR and 45 BISON as of the end of 1983, but notes that the BEAR H "is now in production but is not counted in 1983 totals. As of January 1, 1984, 10 BEAR H bombers had been built; four were at operational installations for flight training and 6 were being used for research and development." (16: 23-24). CRS counts the 100 BEAR and 45 BISON listed by Collins and estimates a total of 34 BEAR Hs by the end of 1985.

Bomber weapon load: CRS counts BEARs and BISONs as carrying four bombs, BEAR H (standoff) with 8 ALCMs, BLACKJACK (penetrator) with 5 bombs, and BLACKJACK (standoff with 12 ALCMs. DOD notes that BEAR H is "probably designed to carry long-range cruise missiles" (12: 28). Collins notes, "Soviet figures for 1983 reflect average loadings of 2 bombs plus 2 ASMs [air-to-surface missiles] per BEAR and BISON." And, "BEAR H reportedly will carry an average of 8 long-range cruise missiles" (16: 24). CBO counts BEAR and BISON as carrying 4 weapons, the BEAR H cruise missile carrier with 20 weapons, and BLACKJACK with 12-20 weapons (7: 64).

Future force levels and rates of change: CRS assumes the BEAR A/G and BISON will be retired. They were first deployed in 1955 and 1956, respectively (15: 25) and they are assigned a modest role (11: 23-24).

DOD notes that BLACKJACK "could reach operational status in 1987" (12: 28). CRS estimates that 15 BLACKJACKs will be deployed in 1987 and 30 BLACKJACKs deployed per year thereafter. The 30 units per year is the rate that BACKFIREs are being deployed (12: 28). Also, CRS projects that by the end of 1993 60 BEAR Hs and 60 BLACKJACKs will provide the Soviet bomber force with a standoff capability and 105 additional BLACKJACKs a penetration capability.

Build Down Case

ICMBs.—CRS projects the Soviets Union would have 50 SS-18s (each with 10 warheads), 100 SS-19s (each with 6 warheads), 100 SS-24s (each with 10 warheads) and 500 SS-25s (each with one warhead by the end of calendar year 2000.

SSBNs/SLBMs.—CRS projects the Soviet Union would have 4 TYPHOON SSBNs (each equipped with 20 new advanced SLBMs equivalent to the U.S. Trident II SLBM and armed with 9 warheads), and 15 DELTA III SSBNs (each equipped with 16 SS-N-23 SLBMs armed with 7 warheads) by the end of calendar year 2000.

Bombers.—CRS projects the Soviet Union would have 120 BEAR Hs (each carrying 8 ALCMs), 160 BACKFIREs (each carrying 2 bombs), and 120 BLACKJACKs (each carrying 12 ALCMs) by the end of calendar year 2000.

Soviet Proposal Case

ICBMs.—CRS projects the Soviet Union would have 250 SS-18s (each equipped with 10 warheads), 230 SS-19s (each equipped with 6 warheads), 150 SS-17s (each equipped with 4 warheads), 50 SS-24s (each equipped with 10 warheads), and 520 mobile SS-25s (each equipped with one warhead) by the end of calendar year 2000.

SSBNs/SLBMs.—CRS projects the Soviet Union would have 8 TYPHOON SSBNs (each carrying 20 advanced SLBMs equivalent to the U.S. Trident II and equipped with 9 RVs), and 15 DELTA III SSBNs (each carrying 16 SS-N-23 SLBMs equipped with 7 RVs) by the end of calendar year 2000.

Bombers.—CRS projects the Soviet Union would have 120 BEAR Hs (each carrying 8 ALCMs) and 80 BLACKJACKs (each carrying four bombs and one short range attack missile).

Mr. President, I shall continue my analysis of this subject of strategic stability when the Senate next meets on Tuesday.

Mr. GORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on the Judiciary.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:18 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. BOLAND, Mr. TRAXLER, Mr. STOKES, Mrs. BOGGS, Mr. SABO, Mr. BONER of Tennessee, Mr. WHITTEN, Mr. GREEN, Mr. COUGHLIN, Mr. LEWIS of California, and Mr. CONTE as managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 3424) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. NATCHER, Mr. SMITH of Iowa, Mr. OBEY, Mr. ROYBAL, Mr. STOKES, Mr. EARLY, Mr. DWYER of New Jersey, Mr. HOYER, Mr. WHITTEN, Mr. CONTE, Mr. O'BRIEN, Mr. PURSELL, Mr. PORTER, and Mr. YOUNG of Florida as managers of the conference on the part of the House.

At 12:45 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 47. Joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week";

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week"; and

S.J. Res. 130. Joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

The message also announced that the House agrees to the amendment of the Senate to the amendments of the House to the Joint resolution (S.J. Res. 29) to designate the week of November 11, 1985, through November 17, 1985, as "National Reye's Syndrome Week."

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1570) to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that act to volunteers, and for other purposes.

The message also announced that the House has passed the following joint resolution, with amendments, in which it requests the concurrence of the Senate:

S.J. Res. 195. Joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week."

The message further announced that the House disagrees to the amendments of the Senate to the amendments of the House to the amendments of the Senate to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; it asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House:

From the Committee on Ways and Means: Mr. ROSTENKOWSKI, Mr. GIBBONS, Mr. PICKLE, Mr. RANGEL, Mr. STARK, Mr. JONES of Oklahoma, Mr. JENKINS, Mr. GEPHARDT, Mr. RUSSO, Mr. DUNCAN, Mr. ARCHER, Mr. VANDER JAGT, Mr. CRANE, and Mr. FRENZEL.

From the Committee on Appropriations: Mr. WHITTEN, Mr. BOLAND, Mr. NATCHER, Mr. SMITH of Iowa, Mr. PURSELL, and Mr. LOEFFLER.

From the Committee on Rules: Mr. PEPPER, Mr. MOAKLEY, Mr. DERRICK, Mr. BEILENSON, Mr. FROST, Mr. LATTA, and Mr. LOTT.

From the Committee on Government Operations: Mr. BROOKS, Mr. FUQUA, Mr. WAXMAN, Mr. SYNAR, Mr. HORTON, and Mr. KINDNESS.

From the Committee on the Budget: Mr. GRAY of Pennsylvania, Mr. DOWNEY of New York, Mr. MILLER of California, Mr. LEATH of Texas, Mr. KEMP, and Mr. GRADISON.

Appointed as additional conferees: Mr. FOLEY, Mr. FORD of Michigan, Mr. OBEY, Mr. ASPIN, Mr. MINETA, Ms. OAKAR, Mr. PANETTA, Mr. FAZIO, Mr. MICHEL, Mr. DICKINSON, Mr. CHENEY, Mr. LEWIS of California, Mrs. MARTIN of Illinois, and Mr. MACK.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3036) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1986, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 20, 42, 47, 51, 52, 55, 61, 64, and 76 to the bill, and agrees thereto; it recedes from its disagreement to the amendments of the Senate numbered 19, 68, 71, 97, and 98 to the bill, and agrees thereto, each with an amendment in which it requests the concurrence of the Senate; and that it insists upon its disagreement to the amendment of the Senate numbered 3 to the bill.

The message further announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 2205. An act to authorize the American Battle Monuments Commission to establish a memorial to honor members of the Armed Forces of the United States who served in the Korean conflict;

H.R. 3128. An act to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process;

H.J. Res. 36. Joint resolution authorizing establishment of a memorial to honor women who have served in or with the Armed Forces of the United States; and

H.J. Res. 142. Joint resolution authorizing establishment of a memorial to honor the estimated 5,000 courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom.

ENROLLED JOINT RESOLUTIONS SIGNED

At 1:35 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res 29. Joint resolution designating the week of November 11 through November 17, 1985, as "National Reye's Syndrome Week";

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week"; and

S.J. Res. 130. Joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

The enrolled joint resolutions were subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2205. An act to authorize the American Battle Monuments Commission to establish a memorial to honor members of the Armed Forces of the United States who served in the Korean conflict; to the Committee on Energy and Natural Resources.

H.R. 3128. An act to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process; to the Committee on Finance.

H.J. Res. 36. Joint resolution authorizing establishment of a memorial to honor women who have served in or with the Armed Forces of the United States; to the Committee on Energy and Natural Resources.

H.J. Res. 142. Joint resolution authorizing establishment of a memorial to honor the estimated 5,000 courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom; to the Committee on Energy and Natural Resources.

ENROLLED JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, November 7, 1985, she had presented to the President of the United States the following enrolled joint resolutions:

S.J. Res. 29. Joint resolution designating the week of November 11 through November 17, 1985, as "National Reye's Syndrome Week";

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week"; and

S.J. Res. 130. Joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1974. A communication from the Secretary of Energy transmitting, pursuant to law, the 1984 annual report on Federal Government energy management; to the Committee on Energy and Natural Resources.

EC-1975. A communication from the Assistant Secretary of the Interior transmitting a draft of proposed legislation to authorize modification of certain reclamation project contracts; to the Committee on Energy and Natural Resources.

EC-1976. A communication from the Assistant Secretary of Defense transmitting, pursuant to law, the audit report of the American Red Cross for 1985; to the Committee on Labor and Human Resources.

EC-1977. A communication from the Executive Secretary of Defense transmitting, pursuant to law, a report on DOD procurement from small and other business firms for October 1984 through July 1985; to the Committee on Small Business.

EC-1978. A communication from the Administrator of the Federal Aviation Administration transmitting, pursuant to law, a report on the effectiveness of the civil aviation security program; to the Committee on Commerce, Science, and Transportation.

EC-1979. A communication from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a report on a new and an altered system of Privacy Act records; to the Committee on Governmental Affairs.

EC-1980. A communication from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-518. A resolution adopted by the City Council of Newman, CA, favoring the retention of the deductibility of State and local income taxes in any revision of Federal income tax law that is enacted; to the Committee on Finance.

POM-519. A resolution adopted by the Hawaii State Association of Counties opposing the aerial spraying of toxic herbicides in the Federal Drug Enforcement Administration's efforts to eradicate marijuana cultivation in the State of Hawaii; to the Committee on the Judiciary.

POM-520. Resolutions adopted by AMVETS at their 41st National Convention on subjects of interest to the members; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 173: A bill to settle and adjust the claim of the Tehran American School for $13,333.94 (Rept. No. 99-177).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 247: A resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to S. 1527 as reported by the Committee on Governmental Affairs.

S. Res. 248: A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1527.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ANDREWS, from the Select Committee on Indian Affairs:

Ross O. Swimmer, of Oklahoma, to be an Assistant Secretary of the Interior.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MITCHELL (for himself, Mr. BAUCUS, Mr. BENTSEN, Mr. BURDICK, Mr. MOYNIHAN, Mr. LAUTENBERG, and Mr. HART):

S. 1836. A bill to provide the protection of ground water through State standards, planning, and protection programs; to the Committee on Environment and Public Works.

By Mr. BENTSEN (for himself, Mr. BYRD, Mr. LONG, Mr. BAUCUS, Mr. BINGAMAN, Mr. BURDICK, Mr. DIXON, Mr. EAGLETON, Mr. HARKIN, Mr. HOLLINGS, Mr. LAUTENBERG, Mr. MATSUNAGA, Mr. RIEGLE, Mr. MITCHELL, Mr. FORD, Mr. HART, Mr. DODD, Mr. EXON, Mr. HEFLIN, Mr. INOUYE, Mr. KERRY, Mr. BRADLEY, Mr. ROCKEFELLER, Mr. MELCHER, Mr. JOHNSTON, Mr. GORE, Mr. GLENN, Mr. PRYOR, Mr. BUMPERS, Mr. PELL, Mr. STENNIS, Mr. DECONCINI, Mr. CHILES, Mr. SIMON, Mr. LEVIN, Mr. SARBANES, Mr. KENNEDY, Mr. NUNN, Mr. BOREN, Mr. LEAHY, Mr. ZORINSKY, Mr. BIDEN, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. SASSER, Mr. CRANSTON, and Mr. PROXMIRE):

S. 1837. A bill to establish a National Trade Data Bank, to provide authority to revise certain trade and financial agreements, and for other purposes; to the Committee on Finance.

By Mr. LAUTENBERG (for himself and Mr. BRADLEY):

S. 1838. A bill to restrict the dumping of sewage sludge in the ocean site off the coast of New York and New Jersey known as the "106-Mile Ocean Waste Dump Site" to certain authorities currently authorized to dump sewage sludge in the New York Bight Apex; to the Committee on Environment and Public Works.

By Mr. CHAFEE:

S. 1839. A bill to amend the Internal Revenue Code of 1954 to provide that certain deductions and credits not be allowed for expenditures within an environmental zone, and for other purposes; to the Committee on Finance.

By Mr. STEVENS:

S. 1840. A bill to amend titles 5 and 39, United States Code, to revise the authority relating to the payment of subsistence allowances to Government employees for periods of official travel, and for other purposes; to the Committee on Governmental Affairs.

By Mr. DODD (for himself, Mr. D'AMATO, Mr. PROXMIRE, Mr. CRANSTON, and Mr. GORTON):

S. 1841. A bill to require depository institutions to disclose to their customers their practices relating to the availability of funds in connection with check deposits, to

require the timely payment of interest on deposits to interest bearing accounts, to improve the check clearing system, and for other puposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. PROXMIRE:

S. 1842. A bill to reduce the use of limousines by Government officials; to the Committee on Governmental Affairs.

By Mr. KENNEDY:

S. 1843. A bill to establish a commission to monitor and evaluate elections in the Philippines; to the Committee on Foreign Relations.

By Mr. CHAFEE:

S. 1844. A bill to amend the Consolidated Farm and Rural Development Act to improve the disposition of real property acquired under such Act, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated.

By Mr. NICKLES (for himself, Mr. DOMENICI, Mr. DOLE, Mr. BOREN, and Mr. GRAMM):

S. Res. 255. A resolution to call upon the Federal Energy Regulatory Commission to make needed changes to the voluntary natural gas transportation program established by order No. 436, and to urge natural gas pipelines to participate in voluntary transportation of natural gas; to the Committee on Energy and Natural Resources.

By Mr. DOLE:

S. Res. 256. A resolution to establish an Ad Hoc Committee of the Senate; to the Committee on Rules and Administration.

By Mr. HUMPHREY (for himself and Mr. RUDMAN):

S. Con. Res. 86. A concurrent resolution congratulating Sharon Christa McAuliffe on her selection as the first teacher in space, and for other purposes; to the Committee on Commerce, Science, and Transportation.

STATEMENT ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MITCHELL (for himself, Mr. BAUCUS, Mr. BENTSEN, Mr. BURDICK, Mr. MOYNIHAN, Mr. LAUTENBERG, and Mr. HART):

S. 1836. A bill to provide for the protection of ground water through State standards, planning, and protection programs; to the Committee on Environment and Public Works.

GROUND WATER PROTECTION ACT

Mr. MITCHELL. Mr. President, I am introducing today a bill to provide for the protection of our ground water resources.

Senator BAUCUS, the ranking minority member of the Subcommittee on Toxic Substances and Environmental Oversight, worked closely with me in drafting this legislation and is an original cosponsor of this bill. I am also pleased to have Senators BENTSON, BURDICK, MOYNIHAN, LAUTENBERG, and HART as original cosponsors of this legislation.

Ground water is a natural resource of tremendous value. More than half of all Americans rely on it for drinking water. Three-quarters of our cities get their water supplies, totally or in part, from ground water.

Ninety percent of rural households have no source other than ground water for drinking water. In my home State of Maine, fully one-third of the entire population is served by private wells drawing on ground water.

Nationally, the demand for ground water is growing. Between 1950 and 1980, Americans increased their use of ground water from 34 to 89 billion gallons a day. In 1980, that amounted to a quarter of our Nation's total water use. And the trend continues. Ground water use is expected to reach 100 billion gallons a day this year.

This crucial resource is threatened with contamination on a wide scale. Ground water pollution problems have been documented by a number of recent, major studies from both public and private sources.

One study, conducted by the nonpartisan Congressional Office of Technology Assessment, found that ground water contamination "has occurred in every State and is being detected with increasing frequency." It concluded that, "the potential effects of contamination are significant and warrant national attention."

The Academy of Natural Sciences, in a report called "Ground Water Contamination in the United States," cited a wide range of contamination sources. It warned of threats to public health from both microbial and chemical contamination.

The Environmental Protection Agency's recent major review of ground water pollution concluded that "sufficient information is available to raise concerns that a widespread problem may exist."

The State of Maine has not escaped ground water pollution. Throughout the State, there are an increasing number of reports of ground water pollution problems associated with leaking underground storage tanks, waste disposal sites, and subsurface sewage disposal.

These are serious warnings. They ought not to be disregarded. Given the enormous importance of the resource, we have a duty to act before the problem is out of control.

Despite the importance of ground water, despite the clear and growing evidence of serious problems, no single, comprehensive Federal statute protects this resource.

The bill we are introducing is intended to foster debate. It does not answer all the questions that can be raised; nor does it seek to preempt alternative approaches.

Our bill would establish a comprehensive framework within which ground water could be protected from pollution. While existing Federal and State programs provide needed protection of ground water from specific sources of pollution, they offer only limited and uncoordindated protection of the overall resource.

The bill gives State governments the primary responsibility for ground water protection. They would define the ground water resources of their State. They would adopt standards for contaminants found in ground water. They would identify sources of contamination and monitor ground water quality. And, they would develop the various pollution control programs needed to assure that standards are met.

The Federal Government would conduct research, oversee State programs, and provide grant assistance to States.

The bill does not attempt to install the Federal Government as the central factor in a new pollution control program. It does seek to coordinate and focus the existing efforts of the Federal Government and the States.

Whether or not this partnership of Federal and State agencies is the best way to proceed is part of the debate I hope this legislation will encourage.

While part of the debate will focus on who should protect ground water, we will also need to consider how to protect it.

One suggested approach is to establish national or State programs containing performance standards for a series of specific pollution sources. Another approach is to establish ground water quality standards at the national or State level, much as we have done under the Clean Water Act.

Our legislation includes elements of both these approaches. The bill would provide for expansion of exisiting pollution source specific controls where needed, while setting out a procedure for development and adoption of scientifically sound standards for ground water contaminants.

A major issue associated with the concept of ground water quality standards is whether such standards should be established at the national or State level. The bill provides that States make the final decisions about the level of protection offered by ground water standards.

In addition, the bill provides that standards adopted by States would establish the level of cleanup or control under Federal programs relating to protection of ground water quality. My colleagues and others may have varying perspectives on this issue. I look forward to discussion and development of this aspect of the bill.

Will States set standards which are sufficiently protective of ground water quality? I believe they will. The bill provides that EPA will assist States in setting standards.

Under the structure of this legislation, State decisions on standards would be based on a common set of Federal information documents for each ground water contaminant.

The bill would also require that most State standards be at least as stringent as Federal standards for public water systems. States would revise and upgrade standards periodically.

And the bill provides that the Environmental Protection Agency review, but not be required to approve, State standards, and provides for public participation in the process.

Once States establish ground water standards, they would develop an overall ground water program designed to assure that those standards are met.

The existing ground water programs, addressing several specific sources of contamination, would form the core of the overall State program. States would develop additional programs addressing other pollution sources as necessary to achieve ground water standards.

In addition, our bill recognizes that some sources of ground water pollution are of national concern. These sources include hazardous waste sites, underground injection, solid waste disposal, subsurface sewage disposal, and pesticide use. Some of these sources, such as hazardous waste sites and underground injection, are already regulated under Federal statutes.

Most of the others are not. Our bill would require each State to establish programs addressing these sources within 4 years, unless it can demonstrate that ground-water quality standards can be reached without a program for that specific source.

In developing an overall control program, a State would have the flexibility to tailor its program to the most serious pollution sources in that State. And States would have the flexibility to balance the level of protection provided by standards, the effectiveness of programs, and the cost of programs. This provision for State flexibility is an essential element of our approach to protection of ground water.

Flexibility is especially important for States which have already taken some steps to assure the high quality of ground water. The State of Maine, for example, recently established a State ground-water policy and has adopted innovative programs addressing ground water pollution from leaking underground storage tanks and disposal of pesticide containers.

Nothing in the legislation I am proposing would override such State initiatives. Indeed, this legislation is intended to foster and support individual State responses to ground-water pollution.

Finally, States can not take on major new responsibilities for groundwater protection without assistance from the Federal Government. My bill includes a basic grant to provide States with $50 million a year to carry out ground-water programs. This is about the level of assistance we provide to States under clean air and clean water programs.

Also, States would get short-term assistance to help support ground-water mapping and related work.

Mr. President, I believe this bill includes all the necessary building blocks of a comprehensive approach to protecting ground water. It sets up a workable partnership of Federal and State Governments. And it offers a balance between the flexibility States need to tailor programs to their needs and the minimum standards and programs necessary to adequate protection of ground water throughout the country.

This bill is a beginning and the time to begin is now. The outlines of a serious problem are already darkly seen. Ground-water pollution is an emerging problem on which we can not turn our backs.

I look forward to working with my colleagues in the development of this legislation.

Mr. President, I ask unanimous consent that the bill and a section-by-section analysis of the legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1836

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Ground Water Protection Act of 1985".

DECLARATION OF POLICY

SEC. 2. It is the policy of the United States to protect the quality of ground water resources for drinking and other uses.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) the term "Administrator" means the Administrator of the Environmental Protection Agency;

(2) the term "contaminant" means any manmade or natural physical, chemical, biological, or radiological substance or matter in ground water; and

(3) the term "State" means the 50 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, American Samoa, and the Trust Territory of the Pacific Islands.

GROUND WATER QUALITY CRITERIA

SEC. 4. (a) ESTABLISHMENT OF CRITERIA.—(1) The Administrator shall establish criteria for ground water quality with respect to those contaminants found in ground water. Such criteria shall reflect the latest scientific knowledge on—

(A) the physical, chemical, biological, and radiological properties of the contaminant;

(B) the association of the contaminant with various sources of ground water contamination; and

(C) existing and needed research relating to the contaminant.

(2) The criteria established under this subsection shall include an analysis of the risk posed by the contaminant to human health and the environment at various concentrations in ground water and with respect to various uses of the water. Such analysis for each contaminant shall include a comparison of the risks posed by such contaminant to risks posed by other ground water contaminants.

(b) FORMAT.—The Administrator shall establish and utilize a standard format for presentation of ground water criteria. The format shall be designed to facilitate State development of ground water quality standards under section 5. The format shall include a summary of the research and analysis of the contaminant which shall be understandable to public health professionals who lack training in toxicology.

(c) USE OF AVAILABLE DATA AND ADDITIONAL STUDIES.—(1) In establishing criteria under this section, the Administrator shall use, to the fullest extent practicable, any data or analysis developed, or planned to be developed, by the Agency for Toxic Substances and Disease Registry.

(2) In establishing the criteria under this section the Administrator shall consider criteria, data, and analyses developed pursuant to the Federal Water Pollution Control Act, title XIV of the Public Health Service Act (commonly referred to as the Safe Drinking Water Act), and the Toxic Substances Control Act.

(3) The Administrator shall conduct studies to the extent necessary to establish criteria under this section. Such studies may be conducted in conjunction with the Agency for Toxic Substances and Disease Registry. The Administrator may use the authorities of sections 4 and 8 of the Toxic Substances Control Act to gather data necessary to establish criteria under this section.

(d) TIMETABLE FOR ESTABLISHING CRITERIA.—(1) The Administrator shall establish criteria under this section for not less than 50 high priority contaminants within 18 months after the date of the enactment of this Act.

(2) The Administrator shall establish criteria under this section for not less than 50 additional high priority contaminants within 30 months after the date of the enactment of this Act.

(3) The Administrator shall establish criteria under this section for additional contaminants on an ongoing basis and at a rate which is consistent with the needs of the States in developing ground water quality standards under section 5.

(e) ADVISORY PANEL.—(1) The Administrator shall, within 6 months after the date of the enactment of this Act, appoint a panel to advise him with respect to the implementation of this section, including (but not limited to) the contaminants for which criteria should be established, the rate at which the criteria should be established, and the quality and format of the criteria documents.

(2) The panel shall be chaired jointly by a senior official of the Environmental Protection Agency, to be selected by the Administrator, and a senior official of the Agency for Toxic Substances and Disease Registry, to be selected by the Secretary of Health and Human Services.

(3) The panel shall include not less than 5 representatives of State agencies involved with ground water protection, and representatives of other Federal agencies involved with ground water protection, as selected by the Administrator, with the con-

currence of the Secretary of Health and Human Services.

(f) RESEARCH ACTIVITIES.—The Administrator shall provide for such additional research activities as he deems necessary to support the effective development and implementation of ground water standards and protection programs. The Administrator shall provide for effective coordination of ground water-related research within the Environmental Protection Agency and among other Federal agencies.

STATE GROUND WATER PROTECTION STANDARDS

SEC. 5. (a) AMBIENT GROUND WATER STANDARDS.—(1) Each State shall establish numerical standards for contaminants found in the ambient ground water. States may establish nondegradation standards for any contaminant or contaminants in the ambient ground water.

(2) Ambient ground water quality standards shall apply uniformly to all geographic areas in the State and all geological structures, unless the area or structure is designated by the State as a special ground water system under subsection (b).

(3) Ambient ground water quality standards shall, except as otherwise provided in subsection (b) for special ground water systems, be at least as stringent as the primary drinking water standards established under title XIV of the Public Health Service Act (commonly preferred to as the Safe Drinking Water Act) for the particular contaminant (if such a standard has been established under such Act).

(b) STANDARDS FOR SPECIAL GROUND WATER SYSTEMS.—(1) The State may identify discrete and defined ground water systems within the State and establish special ground water quality standards for such systems.

(2) Special ground water systems may be defined, to the extent possible, by a specific geographic area or geologic structure. The definition of such system shall be a part of the standard.

(3) Standards for special ground water systems may vary according to the specific use of the special ground water system. Such standards shall be numerical and shall be based on an assessment of the risks to human health and the environment inherent in such uses.

(4) Special ground water systems may include geographic areas or geologic structures associated with uses which may require more stringent standards than those established under subsection (a) (such as recharge of a valuable ecosystem) and uses which may require less stringent standards than those established under subsection (a) (such as agriculture, waste disposal, industrial processes, and mining).

(c) ESTABLISHMENT OF STANDARDS.—(1) In establishing standards under subsections (a) and (b), the State shall utilize the criteria established by the Administrator under section 4, and any other data which the State determines to be appropriate.

(2) The State shall establish standards under subsections (a) and (b) for the high priority contaminants for which the Administrator has established criteria under paragraphs (1) and (2) of section 4(d), unless the State determines that such contaminant is not found in such State, and may establish standards for any other contaminants found in the State.

(d) COMPLIANCE.—(1) In establishing standards under subsections (a) and (b), the State shall establish specific procedures and methods for determining compliance with such standards.

(2) The Administrator shall publish guidance and information describing procedures and methods for determining compliance with such standards within 12 months after the date of the enactment of this Act.

(e) TIMETABLE FOR ESTABLISHING STANDARDS.—(1) The State shall propose standards for ambient ground water and for any special systems for those contaminants for which criteria have been established under section 4(d)(1) within 30 months after the date of the enactment of this Act.

(2) The State shall propose standards for ambient ground water and for any special systems for those contaminants for which criteria have been established under section 4(d)(2) within 42 months after the date of the enactment of this Act.

(3) Any ground water standards proposed by the State shall be made available for comment to the Administrator and the public for a period of 6 months. The State shall establish final standards within 12 months after the close of such 6-month comment period.

(4) The State shall review, revise, if necessary, and expand, if appropriate, the standards established under this section not less often than every 3 years. Any proposed revisions or additions to State standards shall be made available for comment to the Administrator and the public for a period of 6 months.

(f) STATE STANDARDS TO APPLY UNDER FEDERAL PROGRAMS.—Any standard established by the State under this section shall apply as the standard of cleanup or control under any Federal program relating to protection of ground water, including (but not limited to) the Solid Waste Disposal Act and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

GROUND WATER RESOURCE ASSESSMENT

SEC. 6. (a) REQUIREMENTS.—The State shall develop an assessment of ground water resources within such State. Such assessment shall—

(1) be sufficient to characterize ground water resources for management and protection purposes;

(2) provide a baseline for future monitoring of ground water;

(3) provide a basis for identification of special use ground water systems for purposes of section 5(b), and determination of contaminants present in such systems;

(4) focus on ground water quality, but may address ground water quantity if quantity will have a substantial impact on the design of programs to protect ground water quality; and

(5) be developed in consultation with the United States Geological Survey.

(b) TIMETABLE FOR ASSESSMENT.—(1) The Administrator and the Director of the United States Geological Survey shall, after consultation with the States, jointly issue guidance to the States describing the appropriate content and format for assessments under subsection (a) within 12 months after the date of the enactment of this Act.

(2) The State shall complete the assessment under subsection (a) within 30 months after the date of the enactment of this Act.

(3) Upon completion of the assessment under subsection (a), the State shall certify to the Administrator that such assessment meets the requirements of this section, and shall provide copies of the assessment to the Administrator and the Director of the United States Geological Survey.

GROUND WATER MANAGEMENT STRATEGY

SEC. 7. (a) REQUIREMENTS.—The State shall develop a management strategy with respect to ground water resources within such State. Such management strategy shall—

(1) identify a lead agency and provide an institutional framework for protection of ground water quality;

(2) identify major sources of ground water contamination and the contaminants associated with each such source;

(3) assure coordination among Federal, State, and local agencies involved in ground water protection; and

(4) assure coordination of ground water protection programs with surface water protection programs and with the activities of public water supply systems.

(b) TIMETABLE FOR MANAGEMENT STRATEGY.—(1) The State shall complete the development of an initial ground water management strategy under subsection (a) within 24 months after the date of the enactment of this Act.

(2) Upon completion of such strategy development, the State shall certify to the Administrator that such strategy meets the requirements of this section, and shall provide a description of the strategy to the Administrator.

(3) The State shall annually review and, if necessary, revise the management strategy to reflect any relevant change in conditions, and shall provide a description of any revised strategy to the Administrator.

GROUND WATER MONITORING

SEC. 8. (a) REQUIREMENTS.—The State shall establish a program of monitoring with respect to ground water resources within such State, such monitoring program shall—

(1) be capable of assessing compliance with the standards established by the State under section 5, including standards for special systems established under section 5(b);

(2) be designed to provide periodic assessments of ground water quality trends and to identify emerging or future ground water contaminants and contamination sources;

(3) establish the institutional and agency responsibilities for monitoring; and

(4) establish the methods and procedures for monitoring.

(b) TIMETABLE FOR MONITORING PROGRAM.—(1) The Administrator and the Director of the United States Geological Survey shall jointly prepare a report to Congress evaluating alternative designs for a national ground water quality data management system within 18 months after the date of the enactment of this Act.

(2) The Administrator and the Director of the United States Geological Survey shall jointly, and in consultation with the States, prepare a guidance document for use by States in developing ground water monitoring programs under subsection (a) within 24 months after the date of the enactment of this Act.

(3) The State shall establish a ground water monitoring program under subsection (a) within 36 months after the date of the enactment of this Act.

(4) Upon the establishment of such program, the State shall certify to the Administrator that such program meets the requirements of this section, and shall provide a description of such program to the Administrator and to the Director of the United States Geological Survey.

(c) REPORTS ON GROUND WATER QUALITY.—(1) The State shall submit to the Administrator a report which provides a summary of ground water quality and trends in the State, and which describes the status of

compliance with the standards established under section 5, including the standards for special systems established under section 5(b), within 30 months after the date of the enactment of this Act, and biennially thereafter. The State may use the ground water resource assessment submitted under section 6 in lieu of the first report otherwise required under this subsection.

(2) The Administrator may establish reasonable requirements regarding the content and format of reports required under paragraph (1) in order to assure compatability of data at the national level.

GROUND WATER PROTECTION PROGRAM

SEC. 9. (a) REQUIREMENTS.—(1) The State shall establish a ground water protection program which is capable of assuring compliance with the State ground water standards established under section 5.

(2) The State ground water protection program shall include individual elements addressing each source of ground water contamination identified in the management strategy pursuant to section 7(a)(2).

(3) The State ground water protection program shall include program elements addressing the following sources of ground water contamination that are of national concern:

(A) solid waste disposal;
(B) hazardous waste disposal;
(C) underground storage tanks and pipes;
(D) subsurface sewage disposal;
(E) pesticide use; and
(F) underground injection.

States shall, to the extent practicable, review and assess the interactive effects of such source.

(4) The State may waive the requirement to develop ground water protection program elements identified in paragraph (3) by an affirmative demonstration to the Administrator that the source of contamination is not significant in that State and that ground water quality standards may be attained without establishment of a program for the identified source of contamination.

(5) The State ground water protection program may include programs established under other Federal laws, including the Solid Waste Disposal Act, title XIV of the Public Health Service Act (commonly referred to as the Safe Drinking Water Act), the Federal Insecticide, Fungicide, and Rodenticide Act, and the Federal Water Pollution Control Act.

(6) The ground water protection program elements may utilize regulations, voluntary controls, education, and any other measures which the State deems necessary and appropriate to assure compliance with ground water standards pursuant to section 5.

(7) The Administrator shall, after consultation with the States, provide States with guidance concerning the design, structure, and format of State ground water protection programs within 12 months after the date of the enactment of this Act.

(b) TIMETABLE FOR ESTABLISHING PROTECTION PROGRAM.—(1) The State shall propose a ground water protection program addressing sources of contamination identified in section 7(a)(2) within 36 months after the date of enactment of this Act.

(2) The State shall propose a ground water protection program addressing sources of contamination identified in section 9(a)(3) within 48 months after the date of the enactment of this Act.

(3) Proposed ground water protection plans shall be made available for comment to the Administrator and the public for a period of 6 months. The State shall establish a final ground water protection program within 6 months after the close of the 6-month comment period.

(4) The State shall annually review and, if necessary, revise the final ground water program to reflect any relevant change in conditions, and shall provide a description of any such revision to the Administrator.

(c) EPA ASSESSMENT OF STATE PROGRAM.—The Administrator may conduct an assessment of a State program (or any program element thereof) developed under this section if the Administrator has reason to believe that the State program (or element) does not comply with the requirements of this section. Such assessment may include public hearings. The Administrator shall report the results of any such assessment, together with recommendations for needed actions, to the State within 6 months after initiation such assessment.

GRANTS TO STATES

SEC. 10. (a) GRANTS FOR GROUND WATER RESOURCE ASSESSMENTS.—(1) The Director of the United States Geological Survey shall make grants to States for the purpose of assisting the States in carrying out ground water resource assessments under section 6.

(2) There are authorized to be appropriated for grants under this subsection $25,000,000 for each of the first 3 fiscal years beginning after the date of enactment of this Act.

(3) The amount appropriated for each such fiscal year for grants under this subsection shall be apportioned among the States by the Director on the basis of the geographic area of the State, the percentage of the population of the State relying on ground water for drinking water, and the need for development of ground water resource data in the State.

(4) Grants made under this subsection shall not exceed 75 percent of the costs of implementing the assessment in any fiscal year, and shall be made on the condition that non-Federal sources provide at least 25 percent of the costs of the activities receiving funding under this section.

(b) GRANTS FOR PLANNING AND PROGRAM MANAGEMENT.—(1) The Administrator shall make grants to States for the purpose of assisting the States in the implementation of sections 5, 7, 8, and 9 of this Act.

(2) There are authorized to be appropriated for grants under this subsection $50,000,000 for each of the first 5 fiscal years beginning after the date of the enactment of this Act.

(3) The amount appropriated for each such fiscal year for grants under this subsection shall be apportioned among the States by the Administrator on the basis of the geographic area of the State, the percentage of the population relying on ground water for drinking water, and the extent and seriousness of ground water contamination in such State. The Administrator shall establish a minimum grant amount in order to assure that each State has sufficient grant assistance to develop an adequate ground water program.

(4) Grants made under this subsection must be matched by the State on a dollar-for-dollar basis with State funds to be used in carrying out sections 5, 7, 8, and 9.

(c) LIMITATIONS ON GRANTS.—(1) States may use funds from grants made pursuant to this section for financial assistance to persons only to the extent that such assistance is related to the costs of demonstration projects.

(2) No grant shall be made to a State under this section unless the Administrator determines, on the basis of information provided by the State and from other relevant sources, that the State is implementing the provisions of this Act satisfactorily.

(3) The Administrator may request such information, data, and reports as he may deem necessary to make the determination of continuing eligibility for grants under this section.

GENERAL AUTHORIZATION

SEC. 11. (a) GRANTS.—There are authorized to be appropriated for grants under section 10—

(1) $75,000,000 for each of the first 3 fiscal years beginning after the date of the enactment of this Act; and

(2) $50,000,000 for each of the following 2 fiscal years.

(b) ADMINISTRATIVE COSTS.—There are authorized to be appropriated for administrative costs of implementing this Act $25,000,000 for each of the first 5 fiscal years beginning after the date of the enactment of this Act.

SECTION-BY-SECTION ANALYSIS—GROUND WATER PROTECTION ACT OF 1985

SECTION 1—SHORT TITLE

This Act may be cited as the "Ground Water Protection Act of 1985".

SECTION 2—DECLARATION OF POLICY

It is the policy of the United States to protect the quality of ground water resources for drinking and other uses.

SECTION 3—DEFINITIONS

Definitions of the terms "Administrator", "contaminant", and "state".

SECTION 4—GROUND WATER QUALITY CRITERIA

The federal government is to conduct research on ground water contaminants and publish information concerning these contaminants which will assist States in development of ground water standards.

Ground water contaminant criteria documents are to describe the properties of the contaminant, the association of the contaminant with pollution sources, needed research, and the risk posed by the contaminant to human health and the environment.

EPA is to establish criteria for 50 high priority contaminants within 18 months after the date of this Act, establish criteria for an additional 50 contaminants within 30 months, and establish additional criteria on an ongoing basis. An advisory panel will oversee the development of contaminant criteria.

SECTION 5—STATE GROUND WATER PROTECTION STANDARD

States are to use criteria documents and other data to develop and adopt standards for contaminants in ground water. Standards would apply generally to all ambient ground water, except in special cases defined by the State as part of the standard setting process.

Ambient ground water standards are to be at least as stringent as the primary drinking water standards established under the Safe Drinking Water Act.

States may identify special ground water systems and establish standards for such systems. Standards for special ground water systems may be more stringent or less stringent than ambient standards.

States shall establish standards for the 100 contaminants for which the Administrator establishes criteria under section 4 of this Act and may establish standards for additional contaminants. States need not es-

tablish standards for contaminants not found in that State.

States shall propose standards for the first group of 50 contaminants within 30 months after the date of this Act and propose standards for the additional 50 contaminants within 42 months. The public and EPA are to review proposed standards within 6 months after proposal and final standards are to be established within an additional 12 months. States are to review and revise standards as needed every three years.

States are to establish procedures for determining compliance with standards. EPA will publish guidance describing procedures and methods for assessing compliance with standards within 12 months after the date of this Act.

Final State standards are to apply as the standard of clean-up or control under Federal progams relating to the protection of ground water.

SECTION 6—GROUND WATER RESOURCE ASSESSMENT

States are to develop basic data about the ground water resource, in conjunction with the U.S. Geological Survey.

Within 30 months after the date of this Act, States are to prepare a resource assessment which characterizes the ground water resource, establishes a baseline for future monitoring, and provides a basis for identification of special ground water systems.

The USGS and the EPA are to issue guidance to States describing the appropriate format and content of assessments within 12 months after the date of this Act.

SECTION 7—GROUND WATER MANAGEMENT STRATEGY

States are to develop a management strategy which establishes an institutional framework for ground water protection programs, identifies major sources of contamination, assures coordination of Federal, State and local agencies, and assures coordination of ground water and surface water programs.

The State shall develop an initial management strategy within 24 months after the date of this Act and shall review and revise the strategy annually.

SECTION 8—GROUND WATER MONITORING

States are to establish monitoring programs to assure that protection programs result in the attainment of standards and to identify trends in water quality. States are to establish monitoring programs within 36 months after the date of this Act. EPA and USGS are to provide guidance to States within 24 months.

States are to submit to the EPA Administrator a report which describes ground water quality trends and the status of compliance with standards within 30 months after the date of this Act and biennially thereafter. The resource assessment provided for in section 6 of this Act may be used in lieu of the first report.

Within 18 months after the date of this Act, the EPA and the USGS are to prepare a report to Congress evaluating alternative designs for a national ground water data management system.

SECTION 9—GROUND WATER PROTECTION PROGRAM

States are to develop programs to control specific sources of contamination as needed to assure that ground water standards are met. State control programs are to address the sources of contamination identified in the management strategy and may utilize regulations, voluntary controls, education, and other measures which the State deems appropriate.

EPA is to provide guidance to States concerning the design and structure of ground water programs within 12 months after the date of this Act. States are to propose ground water protection programs within 36 months, provide 6 months for public review, and establish final programs within an additional 6 months.

Within 48 months after the date of enactment of this Act, each State shall propose for inclusion in its ground water program specific program elements addressing selected ground water pollution sources of national concern. These sources include solid waste disposal, hazardous waste disposal, underground storage tanks and pipes, subsurface sewage disposal, pesticide use, and underground injection.

States may waive the requirement to develop programs addressing these sources by demonstrating to the EPA Administrator that the source is not significant in that State. States are to review and revise ground water protection programs annually.

The EPA Administrator may conduct an assessment of any element of a State ground water program, may hold a public hearing as part of the assessment, and shall report the results of the assessment, along with recommendations for needed actions, to the State within 6 months.

SECTION 10—GRANTS TO STATES

The USGS is authorized to make grants to States to assist in the development of ground water resource assessments. $25 million is authorized for each of the first three fiscal years after the date of this Act. Funds are to be allocated to States on the basis of geographic area, percent of State population relying on ground water for drinking water, and the need for ground water resource data. Grants require a 25% match.

The EPA is authorized to make grants to States to support the development and implementation of State ground water protection programs. $50 million is authorized for each of the first 5 years after the date of enactment of this Act. Funds are to be allocataed on the basis of geographic area, the percent of the State population relying on ground water for drinking water, and the extent and seriousness of ground water contamination in the State. Funds are to be matched on a dollar for dollar basis.

SECTION 11—GENERAL AUTHORIZATION

$25 million is authorized for the administrative costs of implementing this Act for the next five fiscal years.

Mr. BAUCUS. Mr. President, today I join my colleagues, Senators MITCHELL, BENTSEN, BURDICK, HART, LAUTENBERG, and MOYNIHAN in introducing the Gound Water Protection Act of 1985.

Ground water is water located underground that is tapped for use by wells. Ground water is simply water that has percolated down through the soil from rain and melting snow.

There is 50 times more ground water than surface water in the United States. Over half the population of the United States relies upon ground water as their primary source of drinking water.

For many rural Montanans, ground water is the only source of water for household use.

Yet, despite its importance, there is no overall national policy that prevents contamination of ground water resources.

EXTENT OF GROUND WATER POLLUTION PROBLEM

Ground water contamination has been detected in every State in the United States, and contamination is becoming more and more frequent.

A recent nationwide survey identified over 200 natural and synthetic substances in ground water.

The Congressional Office of Technology Assessment reports that:

Contaminants found in ground water—particularly organic chemicals—are associated with adverse health, social, environmental, and economic impacts. Although only a small portion of the Nation's total ground water resource is thought to be contaminated, the potential effects of this contamination are significant and warrant national attention.

Montana does not face the extreme health hazards posed by the exotic chemicals found in heavily industrialized States, but ground water pollution still poses a serious health hazard.

Rural communities use fuel oil, pesticides, cleaning solvents, chemical preservatives, and numerous other toxic substances. Many of these organic contaminations are not cleansed as they percolate through the soil.

Thus they remain toxic for long periods of time and contaminate acquifers.

These contaminated water reservoirs are monuments to our failure to learn that the cost of clean up can be enormously greater than the cost of preventing contamination.

FEDERAL GROUND WATER STRATEGY

Up to now, the Federal Government's response to this threat has been confusing. At least 16 statutes authorize programs relevant to ground water protection.

The Environmental Protection Agency attempted to lay the groundwork for centralized control over ground water protection in a strategy it adopted August 30, 1984.

The EPA established criteria for determining the seriousness of a ground water pollution threat. They also set forth protection levels for three classes of ground water, based on their respective value and vulnerability to contamination.

The problem with EPA's strategy is that these special ground waters are primarily located near urban areas.

Rural areas—where hazardous pollutants are just as serious a concern—are given less importance. Thus degradation of water quality in these areas could be a result of the EPA classification system.

A second problem with the EPA strategy is that EPA is using its three classifications as standards. Granted, we need standards. But EPA's classifications should not be standards.

51-059 O-87-33 (Pt. 22)

I am concerned that EPA is going to supplant the role of States, who have traditionally had the primary responsibility for protecting ground water.

STATE GROUND WATER PROGRAMS

I commend EPA for attempting to come to grips with the threat of ground water contamination.

Clearly, a Federal/State partnership is needed.

But instead of a program like the EPA strategy that stymies State efforts, we need a national ground water protection policy that enhances State programs.

States must play a major role in detecting, correcting and preventing ground water contamination.

All 50 States have expressed concern about ground water contamination. Each has a program at some stage of development to protect ground water. Twenty-two States have adopted programs that could be considered comprehensive.

Each of these programs addresses site specific problems. Each is designed to respond to local circumstances.

The proper role of the Federal Government is to sustain these State efforts by providing a concerted research and development program, increased technical assistance and adequate funding for protection efforts.

The intent of EPA's ground water protection strategy was to integrate the State ground water protection programs with existing Federal programs.

But the way EPA structured its program, it is more likely to lead to renewed tensions between two levels of government.

This would come at a time when EPA and State officials should be moving forward in tandem to ensure protection of ground water.

My own State of Montana is a good example of potential conflicts between the State and Federal governments.

Montana has adopted a comprehensive ground water protection program that, through statutory directive, established a nondegradation policy for any ground water where existing quality is higher than the established water quality standards.

Under EPA's strategy, our water quality will not have to meet such stringent standards.

The situation in Montana, plus the wide variety of ground water problems we face in the United States, underscore the need for flexibility.

PROVISIONS OF THE BILL

The Ground Water Protection Act of 1985 is designed to provide a national ground-water protection program.

The act is based upon four key components:

The Environmental Protection Agency is to establish criteria for 50 high priority contaminants within 18 months and 50 additional contaminants within 30 months.

These criteria would describe the properties of the contaminants, the association of the contaminant with pollution sources, needed research, and the risk posed by the contaminant to human health and the environment.

States will then use these criteria and other data to develop and adopt standards for ground water contaminants within each State.

Standards would apply generally to all ambient ground water, except in special cases defined by the State as part of the standard setting process.

State standards, once adopted, would then become the standard of clean up or control under any Federal program relating to the protection of ground water.

As part of the development of an overall ground water protection strategy, the States, relying upon guidance from the U.S. Geological Survey and the Environmental Protection Agency, are to prepare a resource assessment.

This assessment will characterize the ground water resource, establish a baseline for future monitoring, and provide a basis for identification of special ground water systems.

Based upon this assessment, States are to develop a management strategy which establishes an institutional framework for ground water protection programs, identifies major sources of contaminations; and assures coordination of Federal, State, and local levels of government including coordination of ground and surface water programs.

Ground water protection programs will address controls needed to address contamination identified in the management strategy and may utilize regulations, voluntary controls, education, and other measures which the State deems appropriate.

Mr. HART. Mr. President, I am pleased to join the other Democratic Members of the Senate Environment and Public Works Committee today in offering legislation to protect the Nation's ground water resources.

In Colorado, as elsewhere in the Nation, contamination of our underground sources of drinking water has emerged as a particularly insidious and frightening form of pollution. Any threat to the water we drink sounds an alarm we cannot ignore.

Mr. President, such alarms have begun to be heard in Colorado, where four out of five water systems rely at least partially on ground supplies.

To some degree, recent increases in awareness are attributable to scientific advances. We now can detect and analyze contaminants in amounts as minute as four or five parts per billion. But some of the contamination recently brought to light has been detectable for decades.

It was recently reported that water experts found traces of metals in a Denver water department well in southern Jefferson County 20 years ago. Yet health officials apparently did not conduct a study of the well until last year. The well in question, downhill from a major industrial complex, was subsequently closed.

The recent study of this well found traces of the compound trichloroethylene [T-C-E], a strong industrial solvent used to remove grease from metal and in manufacturing a variety of products from paints to pesticides. T-C-E is believed to damage the human nervous system, liver, and kidneys. It may also cause cancer.

Yet even in 1966, a study of the same well had found traces of the metal chromium, which in high dosages has induced tumors in laboratory animals. But in 1966, the Federal Government had set no limits on chromium, so the matter ended there.

Today, we have limits for chromium—but not for scores of other elements and compounds that may be leaking from storage tanks, landfills, and waste disposal systems.

We have no standard, for example, for T-C-E, which was also one of the nine known or suspected carcinogens found recently in the drinking water of Commerce City, CO.

Commerce City relies on the South Adams water district, which borders on the Army's Rocky Mountain Arsenal. The arsenal grounds include some of the worst examples of toxic waste disposal in the country. South Adams district officials say potentially deadly chemicals may have been entering their water supply for two or three decades.

Two South Adams wells have been closed at the suggestion of the State Health Department. You will note I said "suggestion"—the department lacks authority to shut a well or to set limits for a contaminant.

The State even lacks sufficient authority and resources to assess the ground water pollution problem and determine what degree of protection Coloradans need. That's why we need this legislation, Mr. President.

This bill assigns proper roles to Federal and State officials. Federal resources would enable States to set enforceable standards. States would be responsible for their own assessment and cleanup programs. Federal agencies would assist, coordinate, and help finance those programs.

In my State, the health department and the water quality control commission have shown they want to do the job. They have not been deterred by those who would wish the problem away—or by those who want Government to look the other way rather than look too closely at their activities.

Our job here, Mr. President, is to give such State officials, in Colorado and in every State, the tools to do

their job and protect their own residents.

Mr. LAUTENBERG. Mr. President, I am pleased to join as an original cosponsor of the Groundwater Protection Act of 1985. This bill would establish a comprehensive program to protect the quality of the Nation's ground water resources.

Ground water pollution is a significant national problem. Toxic contamination of ground water has occurred in every State in the Nation and increasingly is being detected. Yet there is a paucity of information on ground water pollution. This contamination has adverse health, social, environmental, and economic impacts, and these impacts are likely to increase. Ground water pollution is often found near heavily populated industrial areas, which are increasingly dependent on ground water for their water supplies. Withdrawals of ground water increased from 35 to 90 billions of gallons per day between 1950 and 1980. Ground water now serves as a source of drinking water for about half of the Nation's residents. Ground water also is used for irrigation, livestock, and industrial purposes.

Ground water contamination is a problem of growing dimensions in New Jersey. Over 60 percent of the drinking water in the State scomes from ground water supplies. In southern New Jersey, that rises to 90 percent. And these reserves become even more important during droughts. The spreading contamination of this resource is sobering. Organic compounds, pesticides, and heavy metals are found in virtually all areas of the State. Hundreds of wells in New Jersey have been restricted or closed because of chemical contamination. New Jersey's efforts to respond to this contamination have been hampered partially by the lack of Federal standards for toxic contaminants.

Mr. President, there are numerous Federal and State programs for detecting, correcting, and preventing ground water contamination, but these efforts are limited in their ability to protect against contamination. They typically have a narrow focus, concentrating on sources of pollution, contaminants, or users. What is needed is a national mandate for comprehensive approach to coordinate and protect the quality of our ground water resources. The Office of Technology Assessment recently recommended that the Federal Government provide sustained financial and technical assistance to the States for detecting, correcting, and preventing ground water contamination.

The Ground Water Protection Act of 1985 would establish such a comprehensive program to address pollution of our water resources and it is consistent with OTA's recommendations. Under this bill, EPA would be required to establish ground water quality criteria for ground water contaminant. States would then use their criteria to establish ground water contaminant standards. States also would develop ground water resource assessments, monitoring programs, and protection strategies, and programs. EPA and the U.S.A. Geological Survey would be required to provide guidance to the States for these activities. EPA is directed to assess State programs to assure they are consistent with the act, and to issue grants to States to carry out the purposes of the act.

Mr. President, the Ground Water Protection Act is the first in a series of bills that are likely to be introduced in the Senate and considered by the Environment and Public Works Committee. Senator DURENBERGER, chairman of the Toxic Substance and Environmental Oversight Subcommittee, has provided leadership on the committee in scheduling hearings on this issue. Our bill is meant to contribute to this process. As the committee reviews it, it will undoubtedly be refined and strengthened. Areas that need attention include the allocation formula for grants, the criteria to be used in setting water quality contaminant standards, and the extent to which the ground water-program should be enforceable. However, Mr. President, the general thrust of the bill is sound. I look forward to working with Senators DURENBERGER, STAFFORD, BAUCUS, BENTSEN, MITCHELL, and others in the Environment and Public Works Committee to enact comprehensive legislation in the 99th Congress to address the problem of ground-water pollution.

Mr. BURDICK. Mr. President, nearly 100 quadrillion gallons of water are located underground throughout the United States, 50 percent of which has the potential to be used for drinking water. Every day, 89 billion gallons of water is pumped out of underground aquifers for a variety of potable, agricultural, and industrial purposes. Of that amount, nearly 116 million people use 15 billion gallons per day for drinking water.

On a national scale, few data on ground-water contamination exist. Some experts estimate that less than 1 percent of the Nation's ground water is currently contaminated. Although such a low value seems encouraging, it still is only an educated guess and must be balanced against estimates that certain areas of the country—specifically New York, New Jersey, and New England—probably have groundwater contamination greater than 1 percent.

Currently, the Federal ground-water protection policy is dispersed among six programs administered by the Environmental Protection Agency (EPA). Only 12 States have enacted specific ground-water protection statutes which serve various purposes including the prevention of further groundwater degradation, the establishment of pollutant discharge permits, designation of specific protection areas, and the establishment of land controls. Most of the remaining States have developed ground-water protection policies and rely on existing administrative authorities for implementation.

States lack comprehensive programs because more technical expertise and stable funding is required before they would feel comfortable in establishing detailed policy. Information is lacking on standard-setting for drinking water, methodologies for ground-water monitoring and sampling, and collecting and disseminating information on new technology on remedial cleanup. This proposal would require EPA and the U.S. Geological Survey (USGS) to develop such information and provide guidance.

The proposal allows State and local authorities necessary flexibility to manage ground water. Aquifer characteristics and adverse impact of contamination depend in part on geologic and hydrologic factors which vary from State to State and from aquifer to aquifer. As a result, the Federal Government cannot devise a uniform classification or regulatory scheme to cover each unique circumstance. Effective management requires recognition of these various factors such as geologic, climatic, and biotic conditions which impact both ground water quality and required ground water use.

Once more information is available on ground water, States and local authorities will be able to make more informed decisions on land-based activities. According to EPA, most contamination is occurring as the result of activities on the land surface rather than from the actual use of the aquifer. The State management strategy required by this bill would establish an institutional framework for groundwater protection plans. The strategy would include the identification of major sources of contamination, coordination of Federal, State, and local agencies, and coordination of groundwater and surface-water programs.

In addition to technical aspects of ground water protection, the Federal Government needs to be aware of the fact that State laws and regulations govern both the allocation of surface- and ground-water supplies. Western States have generally adopted the prior appropriation system. This system allows the first in time user or the first to apply for the water the first in right to use it.

Under this western water doctrine, ground-water quantity and quality cannot be separated because ground water related management decisions necessarily affect the quantity of water that is available for specific use.

In the West, much of the population relies on ground water for drinking water purposes, yet the majority of ground water is used for agricultural purposes with an increasing amount being used by industry. North Dakota, as an example, relies on ground water for 62 percent of the population's drinking water supply. Irrigation of crops with ground water has increased steadily since about 1960 when probably fewer than six irrigation wells existed in the State. During 1982, nearly 1,500 wells pumped a total of 50 million gallons per day during the irrigation season covering 100,000 acres.

Often uses of large aquifers are multipurpose. Western States, in particular, would be required to balance appropriated water uses against the need to establish any uniform or minimum drinking water standard to assure its potential use as a drinking water source. The balancing act between competing or conflicting use is delicate and complex. States are best suited to resolving any differences in ground water quantity versus quality.

States are best able to plan for future uses and to manage each aquifer based on their water rights process. Local knowledge on resource variability can be incorporated in their plans. This is important because many aquifers exist which could fall into a variety of categories and classes depending on the water quality at a particular location.

I would urge my colleagues to review this bill and share it with their State officials. This bill offers the best of both worlds. It maintains the Federal interest in protecting ground-water supplies from contamination while at the same time expands information and funding to States to continue their primary role in protecting this Nation's ground water.

Mr. MOYNIHAN. Mr. President, I rise today to join my distinguished colleagues from the Environment and Public Works Committee, sponsoring the "Groundwater Protection Act of 1985." This legislation represents a responsible approach to coordinating State and Federal programs in groundwater management. I share my colleagues' hope that this bill will focus greater attention on ground-water resources, a subject which I have been interested in for many years.

May I note, the sponsors of this bill represent the East, Midwest, and West. I trust that this broad support portends a national consensus on the need to address ground-water problems. I first introduced the Sole Source Aquifer Protection Act, designed to protect underground sources for drinking water, in 1982. Many provisions of that aquifer protection bill are now incorporated in the Safe Drinking Water Act Amendments, which, I am happy to report, are about to be considered in conference.

In addition to the Safe Drinking Water Act, a number of Federal laws affect ground-water management, including the Clean Water Act, Superfund, and the Resource Conservation and Recovery Act (RCRA). These laws overlay a complex of State statutes, which differ markedly in their treatments of ground-water resources. The Groundwater Protection Act would define the role of Federal Government, in terms that will most help the States develop ground-water strategies tailored to their individual needs. For example, many Eastern States have shallow aquifers with indistinct boundaries, while in the West, many States have deep and distinct aquifers. Some States rely heavily on ground water for drinking supplies, others less so.

On Long Island, 3 million New Yorkers rely on one aquifer for their drinking water, and this aquifer is now threatened by toxic chemicals. In Nassau County alone, 119 of 389 public wells have detectable levels of synthetic organic chemicals. These chemicals come from diverse sources—solvents from industries and residents' homes, pesticides from farms, nitrates from lawn fertilizers, and numerous chemicals which have leached from landfills. Officials of the State of New York and of Long Island have made significant progress in protecting this ground water resource. In 1978, the New York State Legislature stated that preventing the pollution of ground waters and protecting ground waters for use as potable water, would be the State's ground-water quality goals, to guide the department of environmental conservation in establishing and updating water quality standards and classifications. Long Island has since been designated a sole source aquifer by the U.S. Environmental Protection Agency, and is developing a groundwater management plan.

This bill would recognize that different States have different needs and find themselves at different stages in ground-water planning and management. We have heard repeatedly from State officials, asking that EPA provide basic research into ground-water contaminants, so States can determine how to classify their waters. Our bill would direct EPA to establish criteria for 100 contaminants and provide States with documents specifying the physical, chemical, biological and radiological properties of contaminants, as well as analyses of the contaminants risk to human health at various concentrations in ground water. Our bill directs the EPA Administrator, whenever possible, to make use of research developed under other environmental statutes and cooperate with other agencies that hold toxicological data.

Armed with a common set of federally developed data, the States will set their own ambient ground-water standards. In general, ambient groundwater standards must be at least as stringent as those for drinking water in the Safe Drinking Water Act. But the States are free to designate "special ground-water systems" with standards more or less stringent, depending on the use of the water and the threat to human health and the environment.

The bill also would require that States develop an assessment or inventory of ground-water resources, in consultation with the U.S. Geological Survey. And finally, the Groundwater Protection Act would mandate that States develop management strategies to ensure Federal, State, and local coordination to protect ground-water resources and guarantee compliance with State regulations.

This legislation would authorize $25 million a year for 3 fiscal years, on a 75-percent Federal, 25-percent State cost-sharing basis, for States to undertake ground-water assessment. In addition, the bill would provide $50 million over 5 fiscal years, on a 50-percent matching basis, to assist States in setting States standards, developing State management strategies, and operating protection and monitoring programs.

I enthusiastically support this legislation, as a reasoned balance of Federal and State roles in ground-water management. I urge my colleagues to support this bill.

By Mr. BENTSEN (for himself, Mr. BYRD, Mr. LONG, Mr. BAUCUS, Mr. BINGAMAN, Mr. BURDICK, Mr. DIXON, Mr. EAGLETON, Mr. HARKIN, Mr. HOLLINGS, Mr. LAUTENBERG, Mr. MATSUNAGA, Mr. RIEGLE, Mr. MITCHELL, Mr. FORD, Mr. HART, Mr. DODD, Mr. EXON, Mr. HEFLIN, Mr. INOUYE, Mr. KERRY, Mr. BRADLEY, Mr. ROCKEFELLER, Mr. MELCHER, Mr. JOHNSTON, Mr. GORE, Mr. GLENN, Mr. PRYOR, Mr. BUMPERS, Mr. PELL, Mr. STENNIS, Mr. DECONCINI, Mr. CHILES, Mr. SIMON, Mr. LEVIN, Mr. SARBANES, Mr. KENNEDY, Mr. NUNN, Mr. BOREN, Mr. LEAHY, Mr. ZORINSKY, Mr. BIDEN, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. SASSER, Mr. CRANSTON, and Mr. PROXMIRE):

S. 1837. A bill to establish a national trade data bank, to provide authority to revise certain trade and financial agreements, and for other purposes; to the Committee on Finance.

TRADE POLICY ACT

Mr. BENTSEN. Mr. President, today I am pleased to introduce the Trade Policy Act of 1985, cosponsored by Senators BYRD, LONG, BAUCUS, BINGAMAN, BURDICK, DIXON, EAGLETON, HARKIN, HOLLINGS, LAUTENBERG, MATSUNAGA, RIEGLE, MITCHELL, FORD, HART,

DODD, EXON, HEFLIN, INOUYE, KERRY, BRADLEY, ROCKEFELLER, MELCHER, JOHNSTON, GORE, GLENN, PRYOR, BUMPERS, PELL, STENNIS, DECONCINI, CHILES, SIMON, LEVIN, SARBANES, KENNEDY, NUNN, BOREN, LEAHY, ZORINSKY, BIDEN, METZENBAUM, MOYNIHAN, SASSER, CRANSTON, and PROXMIRE.

Mr. President, this legislation is based upon the preliminary report of the Senate Democratic Working Group on Trade Policy issued last April, and it is the first piece of trade legislation approved by the entire Democratic caucus.

It also represents what I believe will become a broad consensus among both Republicans and Democrats on the American trade policymaking process.

The working group, of which I am chairman, met throughout the summer and fall in response to the national and worldwide trade emergency, and in particular to frame legislation to confront two fundamental problems we now face in U.S. trade policy.

I refer to an almost total lack of coordination and preparation for trade negotiation, and the formulation of a U.S. policy for the new round of multilateral trade negotiations proposed by the President.

The legislation does not purport to be comprehensive. It is aimed at reforming the international trade and financial rules to make them effective, and it requires important preparation by the administration in advance of trade negotiations. Much work remains to be done, and the working group has already begun efforts on such problems as improving U.S. exports, correcting unfair foreign trade practices, and controlling large trade deficits.

The Trade Policy Act of 1985 represents the firm foundation of efforts to build a strong and healthy system, and I thank my colleagues on the working group for their diligent efforts in framing this bill: Senators BYRD, LONG, BURDICK, HOLLINGS, EAGLETON, RIEGLE, MATSUNAGA, BAUCUS, DIXON, LAUTENBERG, BINGAMAN, and HARKIN.

THE NEW ROUND

A major part of this bill provides authority for the President to undertake a new round of trade negotiations.

The President cannot succeed in new international trade and finance negotiations without this authority. Without a legislative mandate, other countries will question whether the United States will implement trade agreements the President enters into. Trade agreements are executive agreements, which under our Constitution can only be implemented through a separate law enacted by Congress or under an authority delegated by Congress. Foreign governments well remember that in 1968 Congress refused to implement an international trade agreement entered into by President Johnson, and those governments are unlikely to take the new round seriously if the President acts without the cooperation of Congress.

Since the President has not asked for trade and finance negotiating authority, we might have taken the approach that we would simply wait for him to ask. However, we have concluded that limited authority for a new round is absolutely necessary to build a new and effective international trade and financial system.

The current system, the General Agreement on Tariffs and Trade [GATT] and our system of various financial arrangements is in serious disrepair. GATT rules do not effectively apply to, or cannot effectively be enforced in, the areas of agricultural trade, petroleum trade, or trade with developing countries, even though those matters are subject to the letter of the GATT.

Therefore, we found consensus within the Democratic Caucus that reform of the GATT and of existing international financial arrangements is a primary national objective.

Mr. President, there has been much discussion of expanding the GATT to cover new areas, such as trade in services and trade-related investment. As a major exporter of services, it is clearly in the interest of the United States to expand the coverage if possible. But we must not disregard the fact that we are also the world's largest exporter of goods, so our primary interest is to make the existing rules—rules which are supposed to apply to goods—work and work effectively. If GATT does not work, it makes little difference what it covers. In 1974, when Congress gave its mandate for the Tokyo round in the Trade Act of 1974, it specifically enacted section 121, and entitled it "Steps to be Taken Toward GATT Revision." Yet here we are, 11 years later, with no action taken on many of the subjects listed. It is not surprising that there is consensus for GATT reform today.

In this bill, we have proposed a revision of section 121, outlining a few basic principles for any agreements proposed to replace or improve existing rules of trade and finance. As an example, this bill requires that such agreements be reciprocal and that they be enforceable. That would constitute a needed and welcome change from our current state of affairs.

SPECIAL PROCEDURES ON TRADE AGREEMENTS

This legislation is not specific on negotiation objectives. Instead, we provided a special role in which Congress will consult with the President on his plans for a new round before it begins.

At least 60 days before serious negotiations begin, the President will tell Congress just exactly what agreements he wants, what he expects to have to give up for those agreements, what the American private sector thinks about his proposals, and how other countries view them.

If his proposed notification is disapproved as to any particular agreement, the fast track of legislative trade procedures would not be available to the President when he returned later asking Congress to implement that agreement.

Fast track procedures were used successfully to implement the agreements negotiated in the Tokyo round, and they were used last year to implement the free trade area agreement with Israel. Access to these procedures is important, and will play an effective role in assuring proper consultation between the executive branch and Congress.

Preclearance of trade negotiating objectives is not new. A 60-day disapproval provision was added to U.S. trade law last year. But under that law, the procedure applies only to bilateral trade agreements. Moreover, current law does not require the President to set out his plans or his efforts to consult with concerned citizen groups. This bill applies the 60-day preclearance procedure to all trade and finance agreements.

Nothing in his procedure will delay the new round. In fact, it will surely speed up the process. To this point, the administration has kept its plans to itself, neither proposing new round legislation to Congress nor opening itself to comments of American business, labor, and agriculture.

The procedures outlined in this bill will ultimately produce a united American position on trade negotiations.

It is important to note that the bill also provides that if the President is unable to accomplish a trade reform agreement with all countries, he is authorized to work bilaterally, regionally, or with any like-minded group of countries to achieve responsible reform. We would rather have tough, effective rules with a few countries than the weak rules we now have with all countries.

NATIONAL HOMEWORK ON TRADE

A second concern addressed by this bill is the lack of preparation within the administration. Last May, the working group pleaded with the President not to begin the new round until he had done his homework. This has not been done.

In this bill, we call for creation of a National Trade Data Bank to draw together the information needed to make informed decisions. Today, one of the most useful computer programs available compares U.S. trade data and exports country-by-country. It was written by a Government analyst working in his spare time. This bill makes organization of U.S. trade data a full-time activity, and assigns an interagency committee to make recommendations to improve the system.

For example, we expect this committee to tell us how we got 6 years behind the Government of Japan in updating critical trade data.

The security of business confidential information and information derived in investigations is strictly protected.

Next, we call for a clean sweep of White House committees on trade. This bill replaces all of them with a National Trade Council—at the same level as the National Security Council. The National Trade Council will be chaired by the President or, in his absence, the U.S. Trade Representative, and it would be the central coordinating body of U.S. trade policy.

We would also create a Commission on Trade in the 1990's to provide advice and counsel on how our trade policies should be changed to reflect the problems we will face in the near future.

If the new round follows the form of previous rounds, it will consume more time than the preceding round—perhaps 10 years—and by then we will surely face many different and difficult trade problems. This bipartisan Commission, with strong representation from Congress, as well as business, labor, and agriculture, will report not later than July 1985—and earlier if necessary—on how to prepare for the coming changes.

Mr. President, the purpose of the international economic and financial system is to cause world trade to expand effectively and beneficially. For the past 5 years, the system has not accomplished that job.

From 1980 to 1984, world trade did not grow. In fact, it declined badly in 1982 and has only just recovered. According to the Economic Report of the President released last February, world trade in 1980 was slightly over $2 trillion. By 1984 it had climbed back up to $1.9 trillion. It will probably reach $2 trillion in 1985, in large part due to the huge increases in imports in the United States.

We have in a new round what we must regard as an opportunity, and we must seize it to build a new international trade and financial system that will cause total world trade to grow. This effort should be a national priority of the highest order.

We will fail if we do not give this authority to the President and do everything in our power to make sure it is used effectively. Even then, if other nations refuse to submit to rules requiring market-oriented policies that will increase total trade, we must be prepared to assure that we are not victims of continued mercantilist, beggar-thy-neighbor economic policies. Preventing that outcome must be the subject of other legislation.

I ask my colleagues to study this bill carefully and to support it. It is a consensus bill on a matter of the utmost national importance.

Mr. President, I ask that the text of the bill and a section-by-section description be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1837

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Trade Policy Act of 1985".

SEC. 2. PURPOSE.

The purpose of this Act is to—

(1) provide authority and standards for the President to negotiate a new international system of agreements on tariffs, trade, and finance, and

(2) require thorough preparations for such negotiations.

SEC. 3. FINDINGS.

The Congress finds that—

(1) the existing system of international trade, tariff and finance agreements does not apply, or does not apply with full force, to most of the world trade, to most of United States export trade, or even to substantial segments of United States import trade, which effectively denies the benefits of such agreements to the people of the United States and has, in particular, nullified the benefits the people of the United States anticipated from the most recent round of multilateral trade negotiations, the Tokyo Round, which the Congress of the United States overwhelmingly approved and implemented in domestic law;

(2) under the existing system of international trade, tariff and finance agreements, international trade and financial policies are poorly coordinated, major industrialized countries do not share the burdens and benefits of the world trading system equally with the United States, and central principles of these agreements are not enforced, such as the principles of most-favored-nation treatment and national treatment;

(3) current United States plans for a new round of trade negotiations are vague, have not been based upon the detailed and comprehensive consultation with the private sector contemplated by the Trade Act of 1974 or upon any detailed knowledge or study of the United States potential to compete in the existing or future global economy, and do not purport to remedy most of the problems of the current international system or to recognize the realities of the existing global economy; and

(4) therefore, the United States should undertake to—

(A) coordinate activities of the Federal Government in order to formulate a systematic trade policy upon which consensus can build,

(B) provide for the collection, analysis, and distribution of data and advice necessary to formulating such a policy, and

(C) build a new system of international trade and financial agreements, reflecting the current and anticipated realities of the world economy.

SEC. 4. NATIONAL TRADE DATA BANK.

(a) NATIONAL TRADE DATA COMMITTEE.—

(1) There is hereby established the "National Trade Data Committee" (hereafter in this section referred to as the "Committee").

(2) The Committee shall consist of—

(A) the United States Trade Representative,

(B) the Commissioners of the United States International Trade Commission,

(C) the Secretary of Commerce,

(D) the Secretary of Agriculture,

(E) the Secretary of State, and

(F) the Director of Central Intelligence.

(3) The United States Trade Representative shall be Chairman of the Committee.

(b) FUNCTIONS.—

(1) The Committee shall, through coordination of the actions of the agencies of the Federal Government—

(A) establish and maintain a National Trade Data Bank, and

(B) provide for the analysis and effective dissemination of information in the National Trade Data Bank.

(2) The National Trade Data Bank which is required to be established under paragraph (1) shall consist of economic and trade data collected by the Federal Government, including (but not limited to)—

(A) general import and export data;

(B) industry specific import and export data for each foreign nation;

(C) product and service specific import and export data for the United States;

(D) market penetration ratios and country of origin for imports;

(E) rank ordered national destinations for exports;

(F) exchange rates of all foreign currencies;

(G) market research, including industry and demographic trends for each nation with lists of marketing contacts and lists of foreign firms;

(H) product and process patent, copyright, trademark, and mask work (within the meaning of section 901 of title 17, United States Code) information for each nation for at least the 2 most recent years;

(I) general labor market information;

(J) internationally comparable wage rates;

(K) foreign and domestic—

(i) unemployment rates;

(ii) availability of skilled and professional workers;

(iii) hiring and firing restrictions; and

(iv) labor productivity trends;

(L) comparative international tax rate information;

(M) export financing information, including the availability of funds for United States exporters and foreign competitors;

(N) information regarding the trade actions of foreign governments;

(O) information concerning capital markets, interest rates, and the cost and availability of capital;

(P) National Input and Output Tables compiled by the Department of Commerce for the United States and other nations; and

(Q) any other information that the Committee determines to be useful in carrying out the purposes of this section.

(3) The National Trade Data Bank which is required to be established under paragraph (1) shall—

(A) use the most effective and meaningful means of making such information available to United States—

(i) business concerns,

(ii) workers,

(iii) industry associations,

(iv) agricultural interests,

(v) State and local economic development agencies, and

(vi) other interested persons who could benefit from such information, and

(B) be of such quality and in such form as to form the basis of coordinated trade strategies for the United States.

(4) The National Trade Data Bank established pursuant to paragraph (1) shall not include any information—

(A) which is collected by the Federal Government in connection with any investigation, and

(B) the disclosure of which to the public is prohibited under any other provision of law.

(5) In carrying out the provisions of this section, the Committee shall consult with—

(A) advisory committees established under section 135 of the Trade Act of 1974 (19 U.S.C. 2155), and

(B) other representatives of the private sector.

(c) COOPERATION.—Each Federal department and agency shall cooperate with the Committee by making information available for assimilation into the National Trade Data Bank.

(d) REPORTS.—By no later than December 31 of each calendar year, the Committee shall submit a report to Congress—

(A) assessing the current quality, comprehensiveness, and public and private accessibility of trade data;

(B) describing actions taken pursuant to this section;

(C) describing actions planned to be taken pursuant to this section;

(D) recommending executive and legislative actions which would ensure that United States citizens and firms obtain access to the data banks of foreign countries that is similar to the access provided foreign citizens and firms to the National Trade Data Bank established pursuant to subsection (b)(1); and

(E) recommending other legislative actions which further the purposes of this section.

(e) COORDINATION WITH OFFICE OF INFORMATION.—Section 3518 of title 44, United States Code, is amended by adding at the end thereof the following new subsection:

"(f) The provisions of this chapter shall not apply with respect to—

"(1) economic and trade data described in section 4(b)(2) of the Trade Policy Act of 1985 and any other economic or trade data which the National Trade Data Committee determines to include in the National Trade Data Bank established under section 4(b)(1) of such Act,

"(2) any actions taken by the National Trade Data Committee under the authority of section 4 of such Act, and

"(3) any actions taken by any officers or employees of the Federal Government in cooperating with requests made by the National Trade Data Committee for the purposes of carrying out the provisions of section 4 of such Act.".

SEC. 5. NATIONAL TRADE COUNCIL.

(a) IN GENERAL.—Section 242 of the Trade Expansion Act of 1962 (19 U.S.C. 1872) is amended to read as follows:

"SEC. 242. NATIONAL TRADE COUNCIL.

"(a) ESTABLISHMENT.—There is hereby established in the Executive Office of the President a council to be known as the National Trade Council (hereafter referred to in this section as the 'Council').

"(b) MEMBERSHIP.—The Council shall be composed of—

"(1) the President;

"(2) the Vice President;

"(3) the Secretary of State;

"(4) the Secretary of the Treasury;

"(5) the Secretary of Defense;

"(6) the Secretary of Agriculture;

"(7) the Secretary of Commerce;

"(8) the Secretary of Labor; and

"(9) the United States Trade Representative.

"(c) PRESIDING OFFICER.—The President shall preside over meetings of the Council. In the President's absence, the United States Trade Representative shall preside over meetings of the Council.

"(d) FUNCTIONS.—

"(1) The Council shall advise the President with respect to the integration of national and international policies relating to trade so as to enable the President and the departments and agencies of the Federal Government to cooperate more effectively in matters involving international trade.

"(2) In addition to performing such other functions as the President may direct, for the purposes of more effectively coordinating the policies and functions of the departments and agencies of the Federal Government relating to international trade and making recommendations to the President, the Council shall, subject to the direction of the President—

"(A) assess and appraise the international trade policies (including commodity and direct investment matters) and international trade objectives of the United States,

"(B) consider policies on matters of common interest to the departments and agencies of the Federal Government concerned with international trade,

"(C) consider the relationship between the standard of living in the United States and the international trade policies of the United States, and

"(D) evaluate the effects of the international trade policies and objectives of the United States on the national security.

"(e) STAFF.—The Council shall maintain a staff which shall be headed by an Executive Secretary appointed by the President. The Executive Secretary, subject to the direction of the Council and in accordance with the provisions of title 5, United States Code, may appoint and fix the compensation of such personnel as may be necessary to perform such coordination duties as may be prescribed by the Council in connection with the performance of the duties of the Council.

"(f) CONSULTATION.—In carrying out the duties of the Council, each member of the Council shall consult with—

"(1) committees established to advise the department, agency, or office of which such member is the head,

"(2) advisory committees established under section 135 of the Trade Act of 1974 (19 U.S.C. 2155), and

"(3) other representatives of the private sector.

"(g) RECOMMENDATIONS AND REPORTS.—The Council shall, from time to time, make such recommendations and such reports to the President as the Council considers to be appropriate or as the President may request.".

(b) TRADE POLICY COMMITTEE.—The Trade Policy Committee shall terminate on the date of enactment of this Act.

SEC. 6. COMMISSION ON UNITED STATES TRADE IN THE 1990's.

(a) ESTABLISHMENT.—There is hereby established the Commission on United States Trade in the 1990's (hereafter in this section referred to as the "Commission").

(b) MEMBERSHIP.—

(1) The Commission shall be composed of 18 members as follows:

(A) 6 members appointed by the President in accordance with paragraph (2)(A),

(B) 6 members appointed by the President pro tempore of the Senate from Members of the Senate in accordance with paragraph (2)(B), upon the recommendation of the majority leader or the minority leader of the Senate with respect to members appointed from the political party of that leader, and

(C) 6 Members of the House of Representatives appointed by the Speaker of the House of Representatives in accordance with paragraph (2)(B).

(2)(A) The President shall appoint as members of the Commission under paragraph (1)(A) individuals who are especially qualified to serve on the Commission due to the education, training, or experience of such individuals. Of the members appointed by the President under such paragraph—

(i) at least 5 members shall be individuals who are not officers or employees of the United States,

(ii) at least 1 member shall be a representative of business,

(iii) at least 1 member shall be a representative of a labor organization,

(iv) at least 1 member shall be a representative of agricultural interests, and

(v) not more than 3 members shall be members of the same political party.

(B)(i) In appointing members to the Commission, the President pro tempore of the Senate and the Speaker of the House of Representatives shall give special consideration to the appointment of Members of the Senate or the House of Representatives, as the case may be, who are members of the committees of their respective Houses which have legislative jurisdiction over, or special concerns with respect to, matters relating to international trade.

(ii) Not more than 3 members of the Commission appointed under paragraph (1)(B) shall be members of the same political party, and not more than 3 members of the Commission appointed under paragraph (1)(C) shall be members of the same political party.

(3) The first 18 appointments to the Commission shall be made before the later of—

(A) the date which is 30 days after the date of enactment of this Act, or

(B) January 1, 1986.

(4) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(5) Members of the Commission shall be appointed to serve for the life of the Commission.

(6)(A) Each member of the Commission appointed under paragraph (1)(A) who is not an officer or employee of the United States shall be compensated at a rate equal to the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day (including traveltime) during which such member is engaged in the actual performance of the duties of the Commission. All members of the Commission who are officers or employees of the United States shall serve without additional compensation.

(B) While away from their homes or regular places of business in the performance of services for the Commission, all members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under section 5702 of title 5, United States Code.

(c) MEETINGS; CHAIRMAN.—

(1) Nine members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(2) The Chairman and Vice Chairman of the Commission shall be elected by and

from the members of the Commission for the life of the Commission.

(3) The Commission shall meet at the call of the Chairman or a majority of its members.

(d) STAFF.—

(1) The Chairman of the Commission, in consultation with the Vice Chairman, and without regard to the civil service laws, rules, and regulations, is authorized to appoint and fix the compensation of a staff director and such other additional personnel as may be necessary to enable the Commission to carry out its functions.

(2) Any Federal employee may be detailed to the Commission without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

(3) The Commission may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, at daily rates of compensation for individuals which do not exceed the daily equivalent of the annual rate of basic pay prescribed for GS-18 of the General Schedule under section 5332 of such title.

(e) GENERAL POWERS.—

(1) The Commission may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(2) The Commission may secure directly from any department or agency of the United States information necessary to enable the Commission to carry out the provisions of this section. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(3) The Commission may accept, use, and dispose of gifts or donations of services or property.

(4) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(5) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative and support services as the Commission may request.

(f) DUTIES.—The Commission shall study and make recommendations concerning international trade and export policies and practices of the United States, including recommendations for such changes in laws and regulations as may be required in order to—

(1) facilitate the administration of the trade and export functions of the Federal Government;

(2) enhance export growth;

(3) provide for removal of trade barriers;

(4) provide for common understanding of international trade by businesses;

(5) develop expertise on foreign business practices and trade issues; and

(6) accomplish such other purposes as the Commission considers appropriate.

(g) REVIEW AND RECOMMENDATIONS.—In conducting the study required under subsection (f), the Commission shall review and make recommendations concerning—

(1) likely impediments to exporting by United States industries in the 1990's, including—

(A) regulations, paperwork requirements, and procedures imposed by the United States Government, especially export controls,

(B) the impact of the antitrust laws on exports,

(C) insufficient financing, Government credits, and incentives for export expansion, and the lack of Export-Import Bank and the Foreign Credit Insurance Association support and responsiveness,

(D) the lack of a unified, coherent, and clearly enunciated United States Government policy which supports the export community and which is carried out by all Federal agencies, and

(E) the lack of research and development capabilities to help improve the ability of American industries to compete with foreign industries;

(2) the likely propensity of the United States to import goods and services in the 1990's, and the impact of those importations upon American economic life and economic security;

(3) the competitiveness of firms manufacturing products in the United States in the 1990's, and ways and means of enhancing that competitiveness;

(4) the likely relationships between trade and international monetary policy in the 1990's, including the need to relieve trade policy of major burdens created by the recurrence of currency exchange rate misalignments;

(5) the likely state of vitality in the United States economy during the 1990's;

(6) the role for international trade activities by State and local governments in the 1990's; and

(7) the organizational structures under which other industrial nations, such as Japan, Great Britain, Canada, and West Germany, carry out the international trade activities of those nations.

(h) REPORT.—By no later than July 1, 1987, the Commission shall transmit to the President and to the Congress a report containing a detailed statement of the study conducted by the Commission under this section and the recommendations of the Commission with respect to the matters specified in subsections (f) and (g), including any other recommendations for legislation the Commission considers appropriate. The Commission may issue such interim reports as the Commission considers appropriate.

(i) TERMINATION.—The Commission shall terminate on July 1, 1987.

(j) AUTHORIZATION.—For fiscal years 1986 and 1987, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section.

SEC. 7. AUTHORITY FOR A NEW SYSTEM FOR INTERNATIONAL TRADE AND FINANCIAL AGREEMENTS.

(a) IN GENERAL.—Section 121 of the Trade Act of 1974 (19 U.S.C. 2131) is amended to read as follows:

"SEC. 121. REVISION OR REPLACEMENT OF EXISTING TRADE AND FINANCIAL AGREEMENTS.

"(a)(1) As soon as practicable, but by no later than December 31, 1995, the President shall take such action as may be necessary—

"(A) to revise all trade and financial agreements to which the United States is a party in order to meet the objectives described in subsection (b), or

"(B) to replace such agreements with new agreements that meet such objectives.

"(2) Subject to the requirements of this section, the President is authorized to enter into such agreements as may be necessary to meet the requirements of paragraph (1).

"(b) Any international trade or financial agreements to which the United States is a party shall—

"(1) provide for the reciprocal exchange of obligations that are likely to be mutually economically advantageous to the United States and the other signatories to such agreement;

"(2) provide a reasonable likelihood that the United States can enforce the obligations of such agreements notwithstanding differences between the culture, legal system, and commercial practices of the United States and the culture, legal system, and commercial practices of any other country or instrumentality that is, or may become, a signatory to such agreement;

"(3) complement and reinforce, insofar as practicable—

"(A) existing agreements with countries or instrumentalities that are not signatories to such agreement, and

"(B) existing United States agreements on related economic subjects; and

"(4) be subject to the withdrawal provisions of section 125 and fulfill the objectives set forth in sections 103, 104, 106, and 108.

"(c)(1) An agreement may be entered into under subsection (a)(2) only if the President, prior to commencement of formal negotiation of such agreement—

"(A) provided written notice of such formal negotiations to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives, and

"(B) consulted with each of such Committees regarding such formal negotiations.

"(2)(A) The notice required under paragraph (1)(A) with respect to formal negotiation of any agreement shall include—

"(i) the subject of such negotiations,

"(ii) a detailed description of—

"(I) the preparations (including consultations with advisory committees established under section 135 and other representatives of the private sector) for such negotiations that have been made by the President, and

"(II) the preparations the President plans to make for such negotiations,

"(iii) the advantages and disadvantages that the President anticipates from any agreement that may arise from such negotiations, including (but not limited to) the advantages and disadvantages to United States—

"(I) employment,

"(II) consumers,

"(III) manufacturing,

"(IV) agriculture,

"(V) service industries,

"(VI) current account balance, and

"(VII) general economic growth, and

"(iv) the positions that the President knows, or anticipates, will be taken by foreign countries and instrumentalities with regard to such negotiations.

"(B) If the notice provided under paragraph (1)(A) is classified, or contains information which is classified, the President shall, at the same time such notice is provided, submit to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives a copy of such notice which is not classified and does not contain any classified information.

"(3)(A) As an exercise of the rulemaking power of the House of Representatives and the Senate, the provisions of section 151 shall not apply to any implementing bill (within the meaning of section 151(b)) that approves an agreement entered into under subsection (a)(2) if—

"(i) the requirements of this subsection have not been met with respect to the formal negotiation of such agreement, or

"(ii) the Committee on Finance of the Senate or the Committee on Ways and Means of the House of Representatives disapproved of the formal negotiation of such agreement before the close of the 60-day

period which began on the date notice was provided under paragraph (1)(A) with respect to the formal negotiation of such agreement.

"(B) The 60-day period described in subparagraph (A)(ii) shall be computed in accordance with the provisions of section 102(b)(4)(C).

"(4) For purposes of this subsection, the term 'formal negotiation' means exchanges of offers on matters of substance. Such term does not include international discussions in preparation for negotiations of trade agreements, discussions of subjects to be negotiated, times and places for negotiations, or other formal matters preceding negotiations.

"(d)(1) For purposes of section 151 and subsections (c), (d), (e), and (f) of section 102, any agreement entered into under subsection (a)(2) shall be treated as an agreement entered into under section 102(b).

"(2) Any implementing bill (within the meaning of section 151) that is submitted under section 102(e)(2)(A) with respect to any agreement entered into under subsection (a)(2)—

"(A) shall contain—

"(i) provisions withdrawing approval of the agreement that is being replaced by such agreement entered into under subsection (a)(2), or

"(ii) if no approval was given to the agreement that is being replaced, provisions disapproving such agreement being replaced, and

"(B) may contain—

"(i) provisions withdrawing approval of any portion of an agreement that is being revised by such agreement entered into under subsection (a)(2), or

"(ii) provisions disapproving, or conditioning the continued approval, of any portion of such agreement being revised.

"(e) Nothing in this section shall be construed—

"(1) to require that all signatories to any agreement that is revised or replaced by any agreement entered into under subsection (a)(2) be signatories to such agreement entered into under subsection (a)(2),

"(2) to prevent or require the addition of any country or instrumentality to any agreement entered into under subsection (a)(2), or

"(3) to preclude the President from entering into bilateral agreements under subsection (a)(2).".

(b) NOTICE OF NEGOTIATIONS UNDER SECTION 102.—

(1) Paragraph (4) of section 102(b) of the Trade Act of 1974 (19 U.S.C. 2112(b)(4)) is amended—

(A) by redesignating subparagraph (C) as subparagraph (D),

(B) by striking out "at least 60 days prior to the date notice is provided under subsection (e)(1)" in subparagraph (A)(ii) and inserting in lieu thereof "prior to the commencement of formal negotiation of such agreement",

(C) by striking out "the negotiation of such agreement" in subparagraph (A)(ii)(II) and inserting in lieu thereof "such negotiations",

(D) by striking out "the negotiation" each place it appears in subparagraph (B)(ii) and inserting in lieu thereof "the formal negotiation",

(E) by striking out "subsection (A)(ii)(I)" in subparagraph (B)(ii)(II) and inserting in lieu thereof "subparagraph (A)(ii)(I)", and

(F) by inserting after subparagraph (B) the following new subparagraph:

"(C) The notice required under subparagraph (A)(ii)(I) with respect to formal negotiation of any agreement shall include—

"(i) the subject of such negotiations,

"(ii) a summary of—

"(I) the preparations that have been made by the President for such negotiations, and

"(II) the preparations the President plans to make for such negotiations,

"(iii) the advantages and disadvantages that the President anticipates from any agreement that may arise from such negotiations, including (but not limited to) the advantages and disadvantages to United States—

"(I) employment,

"(II) consumers,

"(III) manufacturing,

"(IV) agriculture,

"(V) service industries,

"(VI) current account balance, and

"(VII) general economic growth, and

"(iv) the positions that the President knows, or anticipates, will be taken by foreign countries and instrumentalities with regard to such negotiations.".

(2) Subsection (g) of section 102 of the Trade Act of 1974 (19 U.S.C. 2111(g)) is amended—

(A) by striking out "and" at the end of paragraph (2),

(B) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and", and

(C) by adding at the end thereof the following new paragraph:

"(4) The term 'formal negotiation' means exchanges of offers on matters of substance. Such term does not include international discussions in preparation for negotiations of trade agreements, discussions of subjects to be negotiated, times and places for negotiations, or other formal matters preceding negotiations.".

(c) CONFORMING AMENDMENTS.—

(1) The table of contents of the Trade Act of 1974 is amended by striking out the item relating to section 121 and inserting in lieu thereof the following:

"Sec. 121. Revision or replacement of trade and financial agreements.".

(2) Section 131 of the Trade Act of 1974 (19 U.S.C. 2151) is amended by adding at the end thereof the following new subsection:

"(e) In preparing the notice required under sections 102(b)(4)(A)(ii)(I) and 121(c)(1)(A), the President shall request, and the Commission shall conduct, such investigations as are necessary to make a full and complete notification to the Congress.".

(3) Subsection (a) of section 135 of the Trade Act of 1975 (19 U.S.C. 2155(a)) is amended by striking out "section 101 or 102" and inserting in lieu thereof "section 101, 102, or 121".

SECTION-BY-SECTION DESCRIPTION OF THE TRADE POLICY ACT OF 1985

The Trade Policy Act of 1985 is intended to establish two basic ground rules for American trade policy: Reform the international trade and financial rules to make them effective, and requrie that the Administration do its homework before entering into trade negotiations. Without these two changes, American international economic policy will not be effective.

Section 1—Short Title.—The Act would be cited as the Trade Policy Act of 1985.

Section 2—Purposes.—The purposes of the Act include authority to reform international agreements on tariffs, trade, and finance and to require thorough preparation for international trade and finance negotiations.

Section 3—Findings.—There are four major findings concerning American trade policy, including the findings that the existing system of international trade, tariff, and finance agreements is not working properly; that current U.S. planning for the new round is inadequate; and that, therefore, the United States should undertake various efforts to prepare for the new round with the principal purpose of fixing the problems with the current international system.

Section 4—National Trade Data Bank.—Current U.S. trade policy proceeds for the most part by anecdote. Companies that have trade problems bring those problems to the attention of the Government, and the Government decides whether to aid the companies in resolving the problems. The problems may relate to the struggle to compete with imports or the effort to penetrate foreign barriers to U.S. exports. While American trade policy has always been directed toward answering these complaints, it is now necessary to go beyond isolated anecdotal evidence of trade problems because trade has become a national emergency.

Yet in 1983, the General Accounting Office reported that the Office of Management and Budget had reduced staff devoted to coordinating and overseeing the Federal Government's decentralized statistical system to the point that statistical policy coordination was put on the back burner. Many monthly statistical reports, such as the valuable "International Economic Indicators," have been discontinued, and in July 1985, Secretary of Commerce Baldrige reported to the Chairman of the Senate Democratic Working Group on Trade Policy, Senator Lloyd M. Bentsen, that U.S. input-output tables are six years behind the Japanese input-output tables.

This section creates a National Trade Data Committee built on an existing interagency statistical review Committee. The U.S. Trade Representative would be chairman of the Committee, and the Committee would consist of heads of agencies that collect and use data relevant to trade. Its duties would include surveying and recommending changes in the current system of collecting, analyzing, and distributing data on international trade. For example, where data are not maintained on a timely basis for lack of staff and funding, as in the case of U.S. input-output tables, the Committee could and should recommend appropriate changes in law and practice. The Committee, in making its studies and recommendations, would be required to consult with the concerned private sector advisory committees.

Moreover, the Committee would be required to create and supervise a National Trade Data Bank using existing data. No data collected for special purposes, such as investigations, would be included in the National Trade Data Bank. Protection from disclosure of business confidential information would follow all data into the National Trade Data Bank. The Committee would be required to recommend actions to achieve reciprocity of access to similar data from foreign governments. Certain provisions of the Paperwork Reduction Act (Public Law 96-511) that are not being carried out are repealed insofar as they relate to data in the National Trade Data Bank.

Section 5—National Trade Council.—This section creates a National Trade Council in the Executive Office of the President at the same level as the National Security Council, consisting of Members of the Cabinet and chaired by the President, or in his absence,

the U.S. Trade Representative. The Council would have a small staff engaged exclusively in coordination of U.S. trade policy. Its purpose would be to take over the existing functions of the Trade Policy Committee, the Economic Policy Committee, and any ad hoc committees set up by the Administration with a role in international trade policymaking.

All existing agency functions would continue to exist, but greater coordination would be achieved by creating this focal point within the Administration. The U.S. Trade Representative would continue to be the President's principal adviser on trade, the chief negotiator on trade matters and would preside over meetings of the National Trade Council in the President's absence.

The section requires consultations with the appropriate advisory committees by the Council on all major trade policy decisions. The bill also requires consultations with these committees in formulating U.S. policy in trade negotiations under section 7. These are some eight policy advisory committees and 41 technical advisory committees covering all sectors of U.S. business, labor, agriculture and State concerns, as well as the Advisory Committee on Trade Negotiations with representation of all business sectors. These committees have not been used fully or effectively since 1979.

Section 6—Commission on United States Trade in the 1990's.—This section creates a Commission on United States Trade policy in the 1990's consisting of 18 members, including six appointed from private industry; six appointed from the Senate; and six appointed from the House of Representatives, the latter two divided evenly between the two political parties. The private individuals appointed to the Commission would be qualified by reason of education training, and experience to serve, and at least three of them must represent respectively, business, labor, and agricultural interests.

The Commission would be expected to study medium-range trade policy for the 1990's and report on July 1, 1987 (earlier preliminary reports could be made as necessary and appropriate). Short-range studies are already carried out by the statutory Advisory Committee on Trade Negtotiations and the Policy and Technical Advisory Committees created under the Trade Act of 1974. The requirement for annual National Trade Estimates, included in the Omnibus Trade and Tariff Act of 1984, also enhances short-range trade policy decisionmaking. The first National Trade Estimate was submitted by the Administration at the end of October 1985.

The section sets forth in some detail various matters to be studied, including the impact of regulation, antitrust laws, financing mechanisms, coordination of policy, research and development capabilities, propensities to import, and many other subjects. It is intended the Commission Report will serve as a basis for U.S. trade policy positions in trade negotiations by focusing on the strengths and weaknesses the economy is likely to have in the next decade.

Section 7—Authority for a New System for International Trade and Financial Agreements.—This section provides authority for reforming the international trading system. It neither extends nor repeals current trade negotiating authorities on either tariff or nontariff barriers (sections 101 and 102 of the Trade Act of 1974). If extension of such authority is needed, the President can always ask for it. Rather, this section amends section 121 of the Trade Act of 1974, which required the Administration to negotiate various reforms of the General Agreement on Tariffs and Trade (GATT). As the last six years show, the 1979 Round was not successful in fixing what was, and still is, wrong with the GATT.

This provision would authorize the President to undertake negotiations as soon as practicable but not later than 10 years following enactment of this Act to replace or improve upon existing agreements on tariffs, trade, and financial matters. The new agreements must meet certain standards set forth in the bill. These standards include a requirement that all U.S. trade agreements and international financial agreements provide for reciprocal exchanges of obligations reasonably likely to be to the mutual economic advantage of the United States and other signatories; that they provide a reasonable likelihood that the United States can enforce the obligations of the agreements notwithstanding differences in the culture, legal system, and commercial practices of the signatories; that they complement and reinforce existing agreements to the extent they remain in force; and that it be possible for the United States to withdraw from such agreements at regular intervals. The section explicitly provides that if it will help to reform the international trading system, the United States should proceed with bilateral or regional arrangements or arrangements between countries that are willing to accept higher levels of international obligation.

GATT reform means fundamental reform, as the standards for agreements suggest. Adding subjects to the GATT, such as trade in services, will not improve U.S. export opportunities or the U.S. trade deficit unless the GATT itself works, which it does not now do.

The bill would also authorize negotiations to reform the international financial system, in disrepair since the advent of floating exchange rates in 1971. It is intended the talks to reform the trading system and the financial system proceed in concert, and preferably, simultaneously.

Finally, the section provides a procedure for assuring adequate study of any such negotiation before it begins. The bill defines a stage of negotiations known as formal negotiations, which consists of the formal exchange of offers between two countries. Before this point occurs—but presumably after the United States and other countries have agreed on the subjects and timing of such negotiations, the President is required to submit a notice to Congress describing in detail his preparation for the negotiations, including a digest of all the preparations (especially his consultations with the private sector) that have occurred or are planned; the anticipated advantages arising out of such a negotiation and the disadvantages, including but not limited to the advantages and disadvantages in terms of U.S. employment, consumers, manufacturing, agricultural businesses and industries, service businesses and industries, and overall macroeconomic economic measures of the United States; and anticipated or known positions of other governments with regard to such negotiations.

Consistent with provisions added to the law in the Omnibus Trade and Tariff Act of 1984, this notice would be submitted to the House Committee on Ways and Means and the Senate Committee on Finance, which could within 60 working days after the notice was submitted disapprove the negotiation, in which case (as a matter of each House of Congress administering its own rules), the so-called trade fast-track would not be available for agreements arising out of such negotiations. The "trade fast-track" currently provides and would continue under this legislation to provide that legislation to approve and implement international trade agreements is not subject to delay or amendment.

Mr. BYRD. Mr. President, the September trade data, released last week, show the largest trade shortfall in any one month in our history. In fact, the $15.5 billion trade deficit in the month of September is greater than the entire trade deficit for 1976. The September shortfall brings the year-to-date total to more than $106 billion—$11 billion more than the deficit at this time last year.

These statistics are alarming, but the data for some individual country and product deficits are even more disturbing. After some half dozen market opening packages and a highly publicized drive to increase imports, Japan's year-to-date trade deficit with the United States as of September of this year was at the same level as at the end of last year—a $37 billion deficit. When the date for the last quarter of this year are in, the United States/Japan deficit could exceed $50 billion. In fact, for all the administration's talk about opening the Japanese markets for American goods, our exports to Japan are actually declining this year, as against 1984.

Significantly, manufactured goods imports are running 9 percent ahead of 1984, more than twice the 4-percent level of increase for all imports. This particular impact on manufacturing means that America's traditional leadership in manufacturing industries is threatened—even in our own market. In September, steel imports accounted for almost one-third of the American market. The Commerce Department describes substantial increases in September imports on autos, clothing, telecommunications equipment, and other manufactured goods. At the same time, another traditional strength—agriculture—showed a decline as agricultural exports dropped 23 percent against last year.

On September 23, 1985, I was invited by the President to attend his first speech on trade policy. I went to the White House to hear what he had to say. There had been a clear change of direction in administration thinking, and it was reflected in the President's statement. As I told my colleagues, most of the President's statement amounted to an endorsement of Democratic initiatives previously rejected by the administration. The administration had discovered the political potency of the trade issue, and had come to realize that it could not be ignored.

But the President's speech did nothing more than pick a few trade initia-

tives previously offered by Democrats without accepting the fundamental premise on which those ideas were based. In its preliminary report this past April, the Senate Democratic trade policy working group, which I appointed, identified the challenges of a changing global market. Senator BENTSEN, who chairs that group, and his colleagues stressed the need for a comprehensive trade strategy that accepted and responded to the new realities of international trade. The working group pointed out the role of the dollar and the importance of currency fluctuation in the world trade. Its report called for increased world trade, a fresh look at the rules of trade, and committed leadership to assure that America has a world-class economy.

The President's program did not acknowledge this need for a tough, realistic trade strategy. Each of our trading partners evaluates its trade trade strategy on the basis of how it contributes to the competitiveness and economic security of that particular nation. But this administration is still weighing trade policy on a scale that measures free trade versus protectionism. Those terms have little meaning in a world dominated by huge currency flows, Government subsidies, and hidden trade barriers, as the preliminary report of the working group explains.

Building on the recommendations of the April report, Senator BENTSEN and his colleagues brought a series of principles to the Senate Democratic conference for approval. Those principles—adopted by the conference—became the basis for the Trade Policy Act of 1985, which I am pleased to join in introducing today. Senator BENTSEN has described the basic elements of this impotant legislation. It is not, by itself, intended to be a comprehensive trade law reform bill. Senate Democrats have offered a broad range of ideas that address the need for improvement in trade law. I have offered the National Security Trade Act to maintain our defense production base, the Fair Trade Act to assure reciprocity in trade, and other measures to address specific shortcomings in our trade law. Many of my colleagues have addressed trade law shortcomings in legislative proposals of their own.

This legislation takes a more fundamental approach. It points out the need for a strategic approach to trade, and provides a context for trade law reforms. In creating a national trade council, it addresses the problem of lack of coordination among the more than 25 Government agencies responsible for trade policy. The dangers of the uncoordinated trade policy of this administration have been seen time and again. The Departments of Defense and Commerce bicker over export control responsibility while—by those agencies' own estimates—the Soviet military saves more than $10 billion over the next dozen years as the result of technologies stolen from the West. During Senate action on the Export Administration Act, I introduced a successful amendment to promote greater cooperation on export controls. But this cannot be accomplished when interagency rivalries result in duplication of activity or wasteful bureaucratic redtape. We need to give trade policy a higher priority, and a national trade council is an important step in that direction.

The bill also helps to shape trade policy by getting our house in order through creation of a National Trade Data Bank to provide us with current information on our economy, and a commission—similar to the so-called Young Commission, which was officially called the President's Commission on Industrial Competitiveness—that will look at trade problems and opportunities in the 1990's. We need to have the facts if we are to be able to plot our course for the future with any precision and thereby survive and prosper as a great trading nation.

I commend Senator BENTSEN and the members of the working group for their creative and far-reaching proposal, and I encourage our colleagues on both sides of the aisle to give this bill serious consideration. The lesson of 5 years of administration indifference on trade is that no changes in trade law can substitute for a realistic, aggressive trade strategy. This legislation, I believe, will make it more difficult for the administration to continue to avoid devising such a strategy.

Despite the current crisis in trade, the United States remains the greatest exporting Nation in the world. We must not allow this distinction to be lost through Government indifference. This legislation is an important step in the right direction; I am pleased to cosponsor it, and I urge all Senators to support it.

Mr. BINGAMAN. Mr. President, I am pleased to join my colleagues in the introduction of the Trade Policy Act of 1985. This legislation realistically deals with our serious trade problems, and in the result of over 10 months of effort by the Democratic Trade Working Group, of which I am a member.

BACKGROUND

The Trade Working Group was appointed by the distinguished minority leader and is chaired by my distinguish colleague from Texas, Senator BENTSEN. We have worked closely as a group to develop this bill, which not only represents our thinking, but also has the endorsement of the Democratic caucus.

Mr. President, the essence of this bill is that it treats our trade difficulties as serious economic problems, not as a temporary political embarrassment that can be dealt with by short-term stopgap measures. Although I am pleased to see the administration finally giving some attention to our trade situation, I believe the steps recently announced are too little and too late to realistically deal with the deep problems of the weakening position of the American economy in the world marketplace. Furthermore, the President's response frankly reflects an attempt to treat our trade problem as a political problem rather than the fundamental international economic problem that it is.

The Trade Policy Act, on the other hand, addresses some of the basic issues dealing with our trade policy and our international economic relations with other countries. Its two main purposes are to reform the international trade and financial rules to make them more effective, and to require the administration to adequately prepare before entering into trade negotiations.

One of the major impediments to free and fair trade is that the present system of international trade and finance is antiquated and functions very poorly. Most of the rules were laid down at a time when trade consisted mainly of goods and the developing nations were content to sell their raw materials to the industrialized world at relatively low prices.

Today, however, we are competing in a world economy characterized by enormous trade in services, agriculture, and currency itself. On a typical day, the trade in currency may be 10 times more than the trade in goods. In addition, the last 20 years have brought new, aggressive players to the world economic stage—the so-called newly industrialized countries [NIC's], who are becoming major competitors of the traditional industrialized countries of North America and Western Europe.

DESCRIPTION OF LEGISLATION

Mr. President, the legislation we are introducing today recognizes this changed world trading system and provides the means for reforming the international "rules of the road" and making American participation in the formulation of those rules more effective.

Specifically, the legislation would:

Create a national trade date system to expand and coordinate the information-collecting functions of the U.S. Government, placing more emphasis on data relating to the competitiveness of American industry. The data would also be used to enhance the export capability of U.S. businesses;

Create the National Trade Council in the Executive Office of the President at the same level as the National Security Council. The Trade Council would be chaired by the President, or in his absence, by the U.S. Trade Representative. The purpose of the Coun-

cil would be to coordinate trade policymaking within the administration;

Create a Commission on U.S. Trade Policy in the 1990's. The Commission would consist of 18 members, including 6 from private industry, 6 from the Senate, and 6 from the House, the latter two divided evenly between the two political parties;

Provide authority for reforming the international trading system, by authorizing the President to undertake negotiations directed toward modernizing the GATT [General Agreements on Tariffs and Trade]. It would require that all trade agreements provide for reciprocal exchanges of obligations. The United States would proceed with bilateral or regional agreements between countries that are willing to accept higher levels of international obligation; and

Provide a procedure for assuring adequate study of any trade negotiation before it begins, and require the President to submit to Congress a detailed description of his preparations.

CAUSES AND EFFECT OF OUR DECLINING POSITION

Mr. President, our trade difficulties are a symptom of our declining competitiveness in the global economy. The reasons for this decline are not hard to find. They are the result of an overvalued dollar, propped up by large and continuing budget deficits; a decline in productivity over a 20-year period, relative to our major trading partners; the lowest savings rate in the industrialized world resulting in a shortage of investment capital; and a tax system that rewards consumption and, unproductive uses of capital and discourages savings.

The results of our lack of competitiveness are tragically apparent: 3 million jobs lost in the last 5 years to foreign competition; the near collapse of whole industries, such as the mining industry in my home State of New Mexico, and the recent layoffs in our once proud semiconductor and computer industries; and more.

MINING

The trade deficit hasn't spared New Mexico. Three of the State's key mining industries—copper, potash, and uranium—have been devastated by unfair and subsidized foreign competition.

At its peak in 1979 the uranium industry in the State employed 7,750; today it employs 150. The copper industry, at its peak in 1981-82, employed 3,185; today it employs 2,200. Potash industry employment is down from 3,000 at its peak in 1980 to fewer than 1,800 today.

These three extractive industries, historically so important to the New Mexico economy, are stark examples of industries threatened with extinction by unfair, subsidized foreign competition and targeted dumping practices. The uranium industry is on the edge of extinction. The potash industry continues to be hurt by potash flowing into the American market from many countries including East Germany and the Soviet Union. Our copper industry nationally, despite rising demand worldwide, has watched its production fall to 59 percent of capacity while other producers, notably Chile, Canada, Zambia, and Zaire, continue to operate at 100 percent.

SEMICONDUCTORS

In New Mexico and throughout the entire Nation our budding, new semiconductor industry is threatened. The industry has been plagued by the same maladies of our other industries that face unfair foreign competition—unemployment, slowdowns, plant closings, and the economic disruption that results. Lay offs have occurred at all of our major companies, including Intel, Signetics, National Semiconductor and others that have plants in New Mexico, and elsewhere.

These layoffs are a direct result of foreign competition, particularly from Japan, which has "targeted" our market and hopes to put our companies out of business. Seven of ten high-tech industries have lost world market shares since 1965. In 1984, our bilateral trade deficit with Japan in electronics was greater than in automobiles.

Recently an unfair trade case, under section 301 of the Trade Act, was filed by the Semiconductor Industry Association and several unfair dumping cases have been filed by individual companies. I personally encourage the President, if he is serious about improving our trade policies, to aggressively eliminate unfair trade by acting quickly on these cases. If we don't act we may not have a semiconductor industry.

OTHER INDUSTRIES

None of our industries have been spared from trade setbacks, not steel, automobiles, electronics, or others. Fully 70 percent of all products in our domestic market now face stiff foreign competition. In addition, our passage from international creditor to debtor status has serious consequences for our long-term economic independence.

I am not suggesting that all our economic ills are caused by foreign competition. What I am saying is that we must recognize the true nature of the global economy and prepare ourselves to compete in that economy.

STRATEGY TO COMPETE

I believe that any successful competitive strategy must revolve around developing a broad consensus that we have a serious problem; that our domestic deficit is at the root of many of our trade problems; that we must find ways to increase productivity of our industries; that our tax laws need to be restructured to encourage productive investment; and that our trade laws need to be vigorously enforced.

Since the beginning of the year, I have introduced or cosponsored legislation to deal with these problems. My bill S. 450, would create an International Trade and Export Policy Commission to develop the consensus needed to effectively develop trade policy. S. 1476, introduced with my distinguished colleague from Maine, Senator MITCHELL, would strengthen the mechanisms to combat unfair trade practices that have so dramatically hurt the U.S. copper, potash, and uranium industries and now threaten the semiconductors industry. S. 1672 would create an Export Promotion and Information Center to assist more American businesses to enter the export market and supply needed services to companies in the export business.

I am pleased, Mr. President, that some of these ideas have been incorporated into the legislation we are introducing today.

TRADE DATA

We need a trade data system in the Federal Government and the Trade Policy Act of 1985 recognizes this need. The Young Commission on Industrial Competitiveness, created by the President, stated that there is a need "to improve the capacity of the Federal Government to collect and distribute relevant market information."

There are now at least 15 agencies that collect trade information. Yet this information is not now collected or disseminated in an organized, helpful way. An effort to collect, organize, and disseminate useful trade information would do much to enhance exporting, among other things.

There are more than 11,000 small U.S. firms that are capable of exporting if given the proper help. These companies could be exporting more than $4 billion a year. A major road block is simply the lack of information about export markets or the export process. My bill and the provisions of my bill included in the Trade Policy Act of 1985, would help to meet this need.

The bill calls for surveying and recommending changes in the current system of collecting, analyzing, and distributing data on international trade. It calls for a coordinated effort by all agencies of the Federal Government. Information collected would include general import and export data, industry-specific data for each foreign nation, product and service specific information, market penetration information, and much more. The bill also calls for coordination with the private sector, for distribution to business concerns and workers, including State and local development agencies, small businesses, and others.

STUDY COMMISSION

The Trade Policy Act of 1985, also includes a modified form of my legisla-

tion to create a temporary bipartisan, National Study Commission on Trade. The Commission on Trade in the 1990's recognizes that we are in a changing global economy. It recognizes that we do not now have a coordinated, cohesive trade policy in this country. And, it provides a framework for creating a trade policy and preparing us for the changing world trade situation. It provides for necessary coordination with the private sector. And it calls for recommended changes in laws and regulations intended to facilitate the administration of the trade and export functions of the Federal Government, enhance export growth, remove trade barriers, enhance common understanding of international trade by businesses, develop expertise on foreign business practices and trade issues, and other purposes.

CONCLUSION

Our competitive position in the world economy will not improve until we take a comprehensive and long-term approach to address its underlying causes. The Trade Policy Act of 1985 is a big step in that direction. I strongly urge my colleagues to support the bill.

By Mr. LAUTENBERG (for himself and Mr. BRADLEY):

S. 1838. A bill to restrict the dumping of sewage sludge in the ocean site off the coast of New York and New Jersey known as the "106-Mile Ocean Waste Dump Site" to certain authorities currently authorized to dump sewage sludge in the New York Bight Apex; to the Committee on Environment and Public Works.

RESTRICTING OCEAN DUMPING OF SEWAGE SLUDGE

● Mr. LAUTENBERG. Mr. President, I am introducing legislation today to prohibit the Environmental Protection Agency from authorizing sewage sludge dumping by new entrants at the so-called 106-mile sewage sludge dumpsite. This bill is a companion measure to H.R. 3569, legislation introduced in the House of Representatives by Congressmen HOWARD, HUGHES, SAXTON, ATKINS, ROE, GALLO, and FLORIO.

Mr. President, earlier this year, EPA announced its final decision to close the site 12 miles off New Jersey's shores, which is currently used as a dumpsite for sewage sludge, and to move dumping further out to sea, at the 106-mile site until current dumpers develop permanent, land-based alternatives. This action was taken only after years of regulatory delay and litigation. The Ocean Dumping Act was enacted over a decade ago. It was intended by Congress to put an end, once and for all, to continued degradation of our oceans. This intent was reaffirmed in 1977 when the Congress adopted an amendment to the act to halt harmful dumping of sewage sludge. EPA's action in closing the 12-mile site was an indication that it finally intended to take seriously its goal of ending the ocean dumping of sewage sludge.

Fortunately, Mr. President, EPA's decision was not challenged. EPA and the existing ocean dumpers have negotiated schedules which project an end to dumping at the 12-mile site by the end of 1987. And EPA designated the 106-mile site for use for only 5 years. At that time, EPA would evaluate whether ocean dumping of sewage sludge could end.

I was shocked, then, to learn that Boston will soon submit an application to EPA to dump its sewage sludge at the 106-mile dumpsite off New Jersey. The draft application Boston has submitted to EPA indicates that the city plans to dump at the 106-mile site from 1988-96, when a composting plant is supposed to be brought on line. So Boston is planning to ocean dump its sewage sludge in the waters off New Jersey's coast for at least 8 years, well into the 1990's.

Mr. President, Boston's proposed action is not acceptable. Additional sewage authorities should not be permitted to begin to use the ocean to dispose of sewage sludge. Boston's action is a step backward from achieving the goal of ending ocean dumping of sewage sludge.

The New Jersey coastline is the only place on the east coast where it is permissible to dump sewage sludge. If EPA grants Boston a permit to dump sewage sludge off New Jersey, other cities may attempt to dump their sludge at the 106-mile site. New Jersey's coast should not be the dumping ground for sludge generated on the east coast.

Boston's proposed dumping could pose an obstacle to closure of the 12-mile site as scheduled. The existing dumpers at the 12-mile site are supposed to end dumping at that site by the end of 1987. The dumpers convinced EPA that they need this time to build additional barges because the existing barge fleet is inadequate to make the transition to the 106-mile site. If Boston were allowed to dump at the 106-mile site, it might use barges the existing dumpers are planning to use to move the dumping to the 106-mile site. EPA is concerned that this could prevent the closure of the 12-mile site by the end of 1987.

Mr. President, any additional delay in closing the 12-mile site is simply intolerable.

Mr. President, Boston's action is symbolic of the inadequate effort of the Environmental Protection Agency to develop safe, cost-effective, land-based alternatives for disposing of sewage sludge. Unless EPA expands its efforts to develop such alternatives, I fear that more cities will begin to view the ocean as a viable means of disposing of sewage sludge.

Mr. President, Boston should not be allowed to dump its sewage sludge in New Jersey's offshore waters. My bill will prevent Boston or any other city not now dumping sewage sludge in the ocean, from dumping at the 106-mile dumpsite.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1838

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Administrator of the Environmental Protection Agency may not issue or renew any permit under title I of the Marine Protection, Research, and Sanctuaries Act of 1972 which authorizes any person, other than an eligible authority, to dump, or to transport for the purpose of dumping, municipal sludge within the site designated by the Administrator and known as the "106-Mile Ocean Waste Dump Site" (as described in 49 Federal Register 19005).

(b) For the purposes of this section—

(1) The term "eligible authority" means any sewage authority or other unit of State or local government that on November 2, 1983, was authorized under court order to dump municipal sludge at the Apex site.

(2) The term "Apex site" means the site within the Apex at which the dumping of municipal sludge occurred before October 1, 1983.

(3) The term "Apex" means the New York Bight Apex consisting of the ocean waters of the Atlantic Ocean westward of 73 degrees 30 minutes west longitude and northward of 40 degrees 10 minutes north latitude.●

● Mr. BRADLEY. Mr. President, it is with great pleasure that I join my colleague from New Jersey in introducing this legislation.

Mr. President, as a coastal State, our 160-plus miles of shoreline are extremely precious to the people of New Jersey. The Jersey shore sustains a vigorous tourist industry, providing millions of visitors with recreation and relaxation. Our coastal waters also support one of the Nation's most vigorous commercial and recreational fishing industries. Moreover, Mr. President, these same waters and ocean currents are, in fact, an important resource for many States in the region.

For these and other reasons, we in New Jersey have fought long and hard to protect our ocean environment. My distinguished colleague from New Jersey and I have worked side-by-side on many occasions to ensure the integrity of our shorelines.

The spirit of compromise was well exhibited during debate on the Clean Water Act. At that time the New York and New Jersey delegations agreed to establish a schedule for New York City to comply with the standards of

the Clean Water Act, as it pertains to the dumping of raw sewage in the Hudson River.

We have also prevailed upon EPA to close a sewage sludge site 12 miles off the New Jersey coast. The nine New York and New Jersey municipalities and sewage districts presently dumping there have been placed on a strict time schedule by EPA to phaseout operations and switch to a site 106 miles off the coast. While the 12-mile site occupied an area of 6.6 square nautical miles with a water depth of 27 meters, the 106-mile site occupies an area of 100 square nautical miles with a water depth of 2,750 meters.

So, we operated for many years on the assumption that if we dump the same amount of sludge into a greater volume of water we risk less environmental damage. While this seems logical, it has not been demonstrated to be true! In fact, we know very little about the transportation of contaminants in the ocean. Where does sludge dumped at one place in the ocean end up? Despite these and other uncertainties we are resigned to the continued dumping by these 9 municipalities and sewage districts at the 106-mile site. However, we will not stand by idly and watch as others seek to join in and add additional sludge—that is, environmental insult—to our oceans. This would undermine the entire purpose of moving from 12 to 106 miles. Yes, we will have gained additional water volume to dilute the sludge but then we would add substantially greater sludge and undo the benefits we attempt to gain.

Mr. President, that is why I am joining my distinguished colleague from New Jersey in introducing this legislation to prohibit any additional municipalities from dumping sewage sludge at the 106-mile site other than those which have already been designated to use it.

Mr. President, perhaps the most illogical aspect about dumping sewage sludge in the oceans is that we are risking potential environmental harm when there are, in most cases alternative, safe methods of disposal. If we expand the use of ocean dumping to permit new sources of sludge, we effectively remove all incentives for municipalities to use composting or incineration.

Mr. President, this legislation sends a clear signal to would-be-dumpers; New Jersey has always been and will continue to be adamant in preserving the beauty of its shoreline.●

By Mr. CHAFEE:

S. 1839. A bill to amend the Internal Revenue Code of 1954 to provide that certain deductions and credits not be allowed for expenditures within an environmental zone, and for other purposes; to the Committee on Finance.

ENVIRONMENTAL ZONE DEDUCTIONS

Mr. CHAFEE. Mr. President, I am today introducing a bill which will make our tax policies and a number of the tax incentives that we have enacted in our Tax Code, consistent with some of our environmental policies.

Since I sit on both the Finance Committee and the Environment and Public Works Committee, I am involved in debate on both of these issues, and I fear that sometimes the right hand does not know what the left hand is doing in these matters. The legislation I am introducing today is designed to make our policies more consistent in these two areas.

It seems only logical that we should not allow tax incentives which encourage unwanted development in areas we are seeking to protect through other nontax related legislation. The bill I am introducing today would therefore eliminate various tax incentives that subsidize activities which harm certain designated natural areas of ecological significance. I have called these areas "Environmental Zones."

Important natural ecosystems are being degraded by development in many areas of the United States. For example, several hundred thousand acres of wetlands are lost each year. Approximately 80 percent of this loss is attributable to agriculture, often in the form of cattle raising or forestry, and much of the remainder is linked to urban development.

Some of the activities which are posing a threat to these ecosystems are encouraged and/or underwritten by tax credits and deductions. With regard to wetlands, for example, the Office of Technology Assessment has concluded that:

> Tax deductions and credits for all types of general development activities provide the most significant Federal incentive for farmers to clear and drain wetlands.

The bill I am introducing today would selectively deny special tax deductions and credits for activities in the designated "Environmental Zones." The bill would not eliminate deductions for ordinary and necessary business expenses that are incurred in connection with activities carried on within these zones, nor would it eliminate the ability of businesses to recover their capital expenditures in an unaccelerated manner for projects within these zones. Further, it would not limit deductions for interest or State and local taxes for businesses in the zones.

The bill is targeted to eliminate only the accelerated methods of cost recovery and the other special tax incentives, such as tax credits, for activities within the zones. You could say that I am proposing the purest form of tax reform for these zones. Many of the deductions and credits I am proposing to eliminate in the zones may be cutback or eliminated as part of tax reform. If that happens, portions of this legislation may become unnecessary. However, I suspect that any major tax reform bill will be unable to accomplish the pure reform which I am suggesting for these zones, so the basic plan proposed by this legislation will be necessary even if we pass a major tax reform plan.

In this bill, I am saying to would-be developers, "Proceed if you wish, but you will get no encouragement from the Federal Government in the way of tax breaks." There will be no tax incentives for development in these zones because such incentives run directly counter to our efforts to preserve these natural areas.

The areas covered by this bill are those that have already been clearly identified as important natural areas either by Congress or, pursuant to other laws, by the Secretaries of the Interior or Agriculture. Another criteria that was used to define "environmental zones" is the lack of existing authorities to manage a particular area in such a way as to assure that incompatible private activities are precluded. For example, areas designated for addition to the National Wildlife Refuge System are included as "environmental zones" unless such areas have been added to the system and are subject to the National Wildlife Refuge Administration Act. Once such areas are subject to the laws governing management of the system, we have solved the problem of incompatible private activity being unknowingly encouraged and allowed to go forward. In that instance, the special treatment provided by the bill would not be necessary.

Other areas that are included under similar conditions and for similar reasons are lands designated for addition to the National Park, Forest, or Wild and Scenic River Systems. The rationale for special treatment and the definition of "environmental zones" includes units of the Coastal Barrier Resources Act, critical habitat designated under the Endangered Species Act, and national natural landmarks under the Historic Sites, Building, and Antiquities Act.

There will be no investment tax credit, no accelerated depreciation, no percentage depletion, no immediate expensing of intangible drilling costs, no special treatment for land clearing expenditures or soil and water conservation expenditures, no capital gains treatment for timber, coal or iron ore, and no exceptions to the at risk rule for activities in the zones. All these special tax benefits will simply be unavailable to those seeking to develop these protected areas.

I look forward to holding a hearing on the bill and receiving comments from all interested parties. For example, is the definition of "environmen-

tal zone" clear enough? Is it broad enough or too broad? It is time we looked at our environmental policies and tax policies together and tried to more carefully reconcile and coordinate the goals of each. I welcome the support and participation of my colleagues in this effort.

I ask that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1839

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT OF 1954 CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. REDUCTION OR DENIAL OF CERTAIN DEDUCTIONS FOR PROPERTY AND ACTIVITIES WITHIN ENVIRONMENTAL ZONES.

(a) IN GENERAL.—Part IX of subchapter B of chapter 1 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"SEC. 280H. EXPENDITURES WITHIN ENVIRONMENTAL ZONES.

(a) GENERAL RULE.—If a designation as an environmental zone is in effect under subsection (d) for any period, the provisions of subsections (b) and (c) shall apply to amounts paid or incurred in connection with such zone during such period.

"(b) COMPUTATION OF DEPRECIATION, AMORTIZATION, AND DEPLETION DEDUCTIONS.—

"(1) DEPRECIATION AND AMORTIZATION.—Any deduction allowable under this chapter for depreciation or amortization for amounts paid or incurred for property used predominantly within the environmental zone shall be computed in the same manner as the deduction for depreciation under section 168(f)(2) for property used predominantly outside the United States.

"(2) DEPLETION.—The deduction for depletion with respect to any mining activity (within the meaning of section 613(c)(2)) within, or oil or gas well, mine, or geothermal or other deposit located in, the environmental zone shall be computed—

"(A) under section 611, and

"(B) without regard to sections 613, 613A, 616, and 617.

"(c) CERTAIN DEDUCTIONS DISALLOWED.—None of the following deductions shall be allowed:

"(1) EXPENSING OF DEPRECIABLE ASSETS.—Any deduction allowable under section 179 for property used predominantly within the environmental zone.

"(2) SOIL AND WATER CONSERVATION AND LAND CLEARING.—Any deduction allowable under section 175 or 182 with respect to land located in the environmental zone.

"(3) PROVISIONS RELATING TO NATURAL RESOURCES.—ANY DEDUCTION ALLOWABLE UNDER—

"(A) INTANGIBLE DRILLING AND DEVELOPMENT COSTS.—Section 263(c) with respect to any oil and gas well located within the environmental zone.

"(B) TERTIARY INJECTANTS.—Section 193 with respect to any oil or gas well located within the environmental zone.

"(d) ENVIRONMENTAL ZONE DEFINED.—For purposes of this section, the term 'environmental zone' means any area or portion thereof which is located within the boundaries of an area—

"(1) which is designated by the Secretary of the Interior as critical habitat under the Endangered Species Act;

"(2) which—

"(A) is authorized by an Act of Congress to be included, or designated by the Secretary of the Interior or the Secretary of Agriculture for inclusion, within the National Wildlife Refuge System, the National Park System, or the National Forest System; and

"(B) has not yet been included within and become subject to the laws governing management of such systems;

"(3) which is a unit of the Coastal Barrier Resources System;

"(4) which has been designated by the Secretary of the Interior as a national natural landmark under the Historic Sites, Buildings, and Antiquities Act; or

"(5) which has been authorized by an Act of Congress for study as a potential unit of the Wild and Scenic Rivers System, unless such area has been found by the Secretary of the Interior, after completion of such study, to not qualify for designation under the Wild and Scenic Rivers Act.

"(e) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the provisions of this section, including regulations for the application of this section in any case in which the period for computation of any deduction includes a period during which an area is designated as an environmental zone and a period during which it is not.".

(b) CONFORMING AMENDMENT.—The table of sections for part IX of subchapter B of chapter 1 is amended by adding after the item relating to section 280G the following new item:

"Sec. 280H. Expenditures within environmental zones.".

(c) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in this subsection, the amendments made by this section shall apply to amounts paid or incurred after June 30, 1986, in taxable years ending after such date.

(2) DEPRECIABLE PROPERTY.—Subsections (b)(1) and (c)(1) of section 280H of the Internal Revenue Code of 1954 (as added by this section) shall not apply to property—

(A) the construction or reconstruction of which began before November 7, 1985, or

(B) which was acquired pursuant to a binding contract between the taxpayer and an unrelated person which was in effect on November 7, 1985, and at all times thereafter.

(3) CERTAIN ACTIVITIES EXEMPT.—Paragraphs (2) and (3) of section 280H(b) of such Code (as so added) shall not apply to amounts paid or incurred before July 1, 1987, pursuant to a binding contract with an unrelated person which was in effect on November 7, 1985, and at all times thereafter.

SEC. 3. DISALLOWANCE OF CREDITS FOR EXPENDITURES WITHIN AN ENVIRONMENTAL ZONE.

(a) INVESTMENT TAX CREDIT.—Section 48(a) (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(11) ENVIRONMENTAL ZONE PROPERTY.—The term 'section 38 property' does not include any property which is used predominantly within an environmental zone (within the meaning of section 280H(d)).".

(b) CREDIT FOR PRODUCTION OF NONCONVENTIONAL FUELS.—Section 29(d) (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(10) SALES FROM FUELS PRODUCED IN ENVIRONMENTAL ZONE.—Sales shall not be taken into account under this section with respect to qualified fuels the production of which is within, or which are produced from any property extracted or removed from, an environmental zone (within the meaning of section 280H(d)).".

(c) EFFECTIVE DATES.—

(1) INVESTMENT TAX CREDIT.—The amendment made by subsection (a) shall apply to periods after June 30, 1986, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954, except that such amendment shall not apply to property to which paragraph (2) of section 2(c) applies.

(2) NONCONVENTIONAL FUELS CREDIT.—The amendment made by subsection (b) shall apply to sales after June 30, 1986, other than sales pursuant to a binding contract in effect between the taxpayer and an unrelated person on November 7, 1985, and at all times thereafter.

SEC. 4. APPLICATION OF AT-RISK RULES.

(a) IN GENERAL.—Section 465(c) (relating to activities to which at-risk limitations apply) is amended by adding at the end thereof the following new paragraph:

"(8) SPECIAL RULES FOR PROPERTY LOCATED, OR USED, IN AN ENVIRONMENTAL ZONE.—In the case of an area designated as an environmental zone under section 280H(d)—

"(A) paragraph (3)(D) shall not apply to real property located within such zone,

"(B) for purposes of paragraphs (4) and (5), the term 'equipment leasing' shall not include the leasing of property to be predominantly used within such zone, and

"(C) for purposes of paragraph (7), the term 'excluded business' shall not include any activity which is conducted within such zone.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to losses occurring after June 30, 1986.

SEC. 5. DENIAL OF TAX-EXEMPT STATUS FOR CERTAIN GOVERNMENTAL OBLIGATIONS.

(a) IN GENERAL.—Section 103(b) (relating to industrial development bonds) is amended by adding at the end thereof the following new paragraph:

"(19) BONDS USED TO FINANCE FACILITIES IN AN ENVIRONMENTAL ZONE.—Paragraphs (4), (5), and (6) shall not apply to any obligation issued as part of an issue any portion of which is to be used for any facility within an environmental zone (within the meaning of section 280H(d)).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to obligations issued after June 30, 1986, unless issued pursuant to an inducement resolution adopted on or before November 7, 1985.

SEC. 6. TREATMENT FROM GAIN OR LOSS FROM SALE OR EXCHANGE OF TIMBER, COAL, OR IRON ORE.

(a) IN GENERAL.—Section 631 (relating to gain or loss in the case of timber, coal, or domestic iron ore) is amended by adding at the end thereof the following new subsection:

"(d) SECTION NOT TO APPLY TO PROPERTY WITHIN ENVIRONMENTAL ZONE.—This section shall not apply to any timber located within, or coal or iron ore extracted from, an environmental zone (within the meaning of section 280H(d)).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to sales or exchanges after June 30, 1986, unless pursuant to a binding contract in effect between the taxpayer and an unrelated person on November 7, 1985, and at all times thereafter.

By Mr. STEVENS:

S. 1840. A bill to amend titles 5 and 39, United States Code, to revise the authority relating to the payment of subsistence allowances to Government employees for periods of official travel, and for other purposes; to the Committee on Governmental Affairs.

CIVILIAN TRAVEL EXPENSES ACT

● Mr. STEVENS. Mr. President, today I am introducing the Civilian Travel Expense Amendments Act of 1985. This bill revises certain provisions of title 5 relating to subsistence allowances by removing the statutory ceilings and changing reimbursement methods for official travel. It reduces administrative costs and provides more equitable reimbursement to the Federal traveler. I believe the changes provide needed improvements in the travel area.

Under our current system, per diem rates for Federal travelers are set by the Congress. At the present time, the maximum rate for high-cost areas is $75 per day and the maximum rate for other areas is $50 per day. These rates have not changed since 1980. The present per diem rates are woefully inadequate. In a September 24, 1985 periodic report to the Congress, the GSA Administrator indicated that the number of high-cost localities increased from 197 to 405 based on a November 1984 survey of 470 localities. Most of official travel now is what are considered high cost areas. The term has lost its meaning and the $75 its value.

Because of the inadequate reimbursement rates, many Federal employees who travel are required to pay for some official travel expenses out of their own pockets. It is simply unfair to expect Federal workers to continually absorb these costs for official travel. This is especially so in light of the fact that we have asked Federal employees to help us fight the budget deficit by maintaining their current pay.

Another problem with the current system is the actual expense method of reimbursement to high cost areas which, as stated before, accounts for much of official travel. Under this system, employees must submit a detailed account, item by item, of each day's expenses along with receipts. This is a time consuming process for employees to prepare these vouchers. Reviewing and auditing the travel vouchers is likewise time consuming and costly to administer.

This bill would address these problems. It would remove the $50 and $75 statutory per diem ceilings and allow the Administrator of GSA to set reimbursement rates administratively. These rates would be based on periodic surveys of travel costs conducted by and data collected by GSA. Because the travel costs vary considerably from city to city, the per diem rates would be locally based.

This legislation would also eliminate the required actual expense reimbursement method for travel to high cost areas. It would enable the GSA Administrator to prescribe reimbursement methods. This change could produce substantial savings. The General Accounting Office in a 1981 report stated that processing costs for the actual expense travel vouchers were 76 percent higher than for the per diem method. GSA has estimated a $54 million annual reduction in administrative costs by moving from an actual expense reimbursement method to the lodgings plus per diem method favored by GSA. This method would require only a lodgings receipt.

GSA estimates that the additional cost for increasing the reimbursement rates will be around $150 million in additional travel costs or about a 5-percent increase in total travel costs assuming existing levels of travel. Agencies could control their costs by improvements in travel management.

Under this bill, the Administrator of GSA may prescribe conditions under which a special per diem allowance may be paid under certain circumstances. Travel expense reimbursement could be authorized from an employee's temporary duty station to his/her home or official work station under certain emergency conditions such as illness of the employee or his/her family or a crisis involving home or property. Currently Federal employees must assume the cost of such emergency travel.

The bill would also authorize payment of travel and subsistence expenses for certain law enforcement employees and their families who have to be evacuated from their homes because of threat to life or property related to the employee's work assignment.

In addition, under this bill the Administrator of GSA would be authorized to set a special per diem allowance for travel outside the continental United States when the regular per diem allowance is inadequate. This would provide consistency between civilian employee and uniformed service personnel.

This bill also includes a provision which affects U.S. Postal Service employees traveling outside of the continental United States. It would allow payment of a locality-based flat rate per diem for these employees. This provision would be particularly important for employees who must travel to remote areas under rather undesirable and sometimes dangerous conditions. For example, Postal Service employees are required to travel to areas in Alaska where there are no appropriate dining or lodging facilities. In such situations, the postal employees often have no choice but to sleep on the floors of post offices and carry their own food with them. With no facilities, these employees cannot provide receipts and, therefore, cannot receive any reimbursement. I believe it is unfair not to provide any compensation to these employees in view of the significant inconvenienced and hardship they experience while on official travel. This bill would address that problem.

The GSA Administrator would be required to review at least every 2 years agency travel and transportation expenses, on a sample basis when possible. The intent is to collect needed data but not impose routine, burdensome reporting requirements on the agencies.

The bill also makes a change in the payment of relocation expenses for employees who transfer from the Postal Service to other Federal agencies which is not permitted under current law. The prohibition is somewhat misunderstood by Federal agencies who tell transferring Postal Service employees they are entitled to reimbursement only to have the claim disallowed. This change is both desirable and necessary.

In summary, I believe the changes proposed in this bill are long overdue. They are much fairer to the Federal work force, greatly simplify administrative processes, and provide a much more flexible travel reimbursement program.

I ask for unanimous consent that the bill and sectional analysis be inserted into the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Civilian Travel Expenses Act of 1985".

SEC. 2. Section 5702 of title 5, United States Code, is amended—

(1) by striking out subsections (a), (b), (c), and (d);

(2) by redesignating subsection (e) as subsection (f); and

(3) by inserting before subsection (f), as redesignated by clause (2), the following:

"(a) Under regulations prescribed under section 5707 of this title, the Administrator of General Services, or his designee, shall prescribe conditions under which an employee while traveling on official business away from his designated post of duty or, in the case of an individual described under section 5703 of this title, his home or regular place of business, is entitled to receive—

"(1) a per diem allowance for travel inside the continental United States at a rate not in excess of the rate established by the Ad-

ministrator or his designee (which may be established by locality), and

"(2) a per diem allowance for travel outside the continental United States at a rate not in excess of the rate established by the President, or his designee, for each locality where the travel is performed.

For travel consuming less than a full day, such rate may be allocated in a manner prescribed by the Administrator.

"(b) Under regulations prescribed under section 5707 of this title, the Administrator of General Services, or his designee, shall prescribe conditions under which an employee who, while traveling on official business away from his designated post of duty or, in the case of an individual described under section 5703 of this title, his home or regular place of business—

"(1) becomes incapacitated by illness or injury not due to his own misconduct, or

"(2) returns, before completing his assignment and with the approval of the agency concerned, to his designated post of duty, home, or regular place of business because of a serious illness, injury, death of a member of his family, or other personal emergency, or because of a fire, flood, act of God, or other similar emergency,

is entitled to receive the per diem allowance and appropriate transportation expenses to his designated post of duty, home, or regular place of business, as the case may be. The per diem and appropriate transportation expenses allowable under this subsection may also be authorized for an alternate destination in an amount not to exceed the cost of return travel and transportation to the designated post of duty, home, or regular place of business, as the case may be.

"(c) Under regulations prescribed under section 5707 of this title, the Administrator of General Services, or his designee, may prescribe conditions under which an employee may be reimbursed for the actual and necessary expenses of official travel inside the United States when—

"(1) the per diem allowance otherwise allowable for such travel under subsection (a)(1) of this section is determined to be inadequate to cover such expenses, or

"(2) payment of a per diem allowance is determined to be otherwise inappropriate.

The amount of any reimbursement under this subsection may not exceed the maximum rate prescribed by the Administrator, or his designee.

"(d) Under regulations prescribed under section 5707 of this title, the Administrator of General Services, or his designee, may prescribe conditions under which an employee may be reimbursed for the actual and necessary expenses of official travel outside the continental United States when—

"(1) the per diem allowance otherwise allowable for such travel under subsection (a)(2) of this section is determined to be inadequate to cover these expenses, or

"(2) payment of a per diem allowance is determined to be otherwise inappropriate.

The amount of any reimbursement under this subsection may not exceed the amount equal to one and one-half times the maximum per diem rate presecibed for the locality in which the travel is performed.

"(e) Under regulations prescribed under section 5707 of this title, the Administrator of General Services, or his designee, may prescribe conditions under which an employee who serves in a law enforcement, investigative, or other similar capacity, and members of his immediate family, may be paid (1) a per diem allowance by the head of the agency concerned (under the provisions of subsection (a) of this section) when necessarily occupying temporary living accommodations at or away from the employee's designated post of duty because of threat to life or property resulting from the employee's assigned duties, and (2) transportation expenses to and from the location of such accommodations.".

SEC. 3. Section 5707 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(c)(1) The Administrator of General Services (A) shall periodically estimate the total amount paid annually under this subchapter by all agencies for such items as travel and transportation of people, compute the average costs of trips, and determine the duration of trips and the purposes of official travel, and (B) shall analyze the experience determined for such items.

"(2) In order to make the estimates, computations, determinations, and analysis required by paragraph (1) of this subsection, the Administrator of General Services, at least every 2 years, shall collect information on travel and transportation payments made by each agency which spends more than $5,000,000 annually on such payments. The Administrator may also collect information on employee relocation expense payments for the purpose of this subsection. The Administrator may collect information for the purpose of this subsection by a sampling survey, if feasible.".

SEC. 4. (a) Subchapter II of chapter 57 of title 5, United States Code is amended by adding at the end thereof the following new section:

"§ 5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service

"Notwithstanding any other provision of law, officers and employees of the United States Postal Service who, under section 1006 of title 39, are promoted or transferred from the Postal Service to an agency for permanent duty may be paid travel, transportation, and relocation expenses and allowances under the same conditions and to the same extent as is authorized by the provisions of this subchapter for other employees (as defined in section 5721(2) of this title).".

(b) The analysis at the beginning of chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5733 the following new item:

"5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service.".

SEC. 5. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect 180 days after the date of the enactment of this Act.

(b) Notwithstanding subsection (a), if regulations to implement the amendments made by this Act are prescribed to take effect before the effective date provided in subsection (a), such amendments shall take effect on the effective date of such regulations.

SEC. 6. Section 1003 of title 39, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Under appropriate conditions determined by the Board, the Postal Service shall pay an employee a special per diem allowance for official travel in a locality outside the continental United States (as defined in section 5701(6) of title 5) when a per diem allowance equal to the amount prescribed under section 5702(a)(1)(B) of such title for travel in the same locality is inadequate to cover the actual and necessary expenses incurred by the employee for such travel. The rate of special per diem allowance payable under the first sentence may not exceed the sum of $33 and the amount of the locality per diem rate prescribed under such section 5702(a)(1)(B).".

SECTION-BY-SECTION ANALYSIS

SECTION 1

This section provides the short title of the bill. It may be cited as the "Civilian Travel Expenses Act of 1985."

SECTION 2

Subsection 2(a) of the draft bill proposes to revise 5 U.S.C. 5702(a), (b), (c) and (d) as follows:

a. The proposed revision to subsection 5702(a) would provide the authority to establish a per diem allowance payment system for all official travel within the continental United States (domestic travel). The current $50 and $75 statutory maximum rates would be eliminated and the Administrator of General Services (Administrator) would be authorized to establish maximum rates administratively for the domestic travel of civilian employees. As currently provided by executive order, the Secretary of Defense will prescribe maximum locality per diem rates for civilian employee travel in nonforeign areas (outside the continental United States) and the Secretary of State will prescribe maximum locality per diem rates for civilian employee travel in foreign areas. As currently authorized, the Administrator would retain full flexibility to prescribe the methodology for computing and applying per diem rates for civilian travel domestically as well as to, from, between and within overseas localities.

The new proposed per diem authority would replace the actual expense authority for travel in high rate geographical areas currently provided in 5 U.S.C. 5702(c)(2). Although the provisions of proposed subsection 5702(a) would accommodate a variety of computation methods, (i.e., lodgings-plus, flat-rate, etc.), GSA intends, at least initially, to implement a lodgings-plus per diem system whereby the actual per diem rate payable to the traveler would be based on the cost of lodging actually incurred by the traveler plus an appropriate flat-rate prescribed for meals and miscellaneous expenses. The total of these amounts would be limited to an administratively set locality ceiling preestablished by the Administrator.

b. The proposed revision to subsection 5702(b) would authorize the Administrator to provide by regulation for payment of travel and transportation expenses under certain emergency situations. The law, 5 U.S.C. 5702(b), currently authorizes payment of travel and transportation expenses from a temporary duty (TDY) point to the employee's home or official station when the employee becomes incapacitated by illness or injury not due to his own misconduct.

Proposed subsection 5702(b) would also authorize payment of an employee's travel and transportation expenses from a TDY point to his/her home or official station when, prior to completion of the employee's TDY assignment, a personal emergency situation occurs, such as serious illness, injury, or death of a member of the employee's family or a crisis involving home or proper-

ty such as fire (regardless of origin), flood, or act of God.

If after returning an individual to his/her official duty station because of an emergency situation described, the agency determines it is in the best interest of the Government to send the employee back to TDY station, such travel would be considered a new travel assignment at Government expense. The bill further provides that the travel and transportation expenses authorized under this subsection may also be authorized to an alternate location in an amount not to exceed the cost of return travel and transportation to the designated post of duty, or home or regular place of business, as the case may be.

The term "family" as used in the draft bill is intended to be a generic term which would be further defined by regulation and could include family members outside the immediate household such as parents and brothers and sisters of either the employee or spouse, depending on circumstances. The regulations also would define the terms "personal emergency" and "act of God" for purposes of this section.

c. The proposed revision to subsection 5702(c) would authorize the Administrator to prescribe conditions under which an employee may be reimbursed for the actual and necessary subsistence expenses of official travel in instances when the administratively established per diem rate is inadequate or payment of a per diem allowance is inappropriate. It also would eliminate the current statutory limitations on subsistence reimbursements and authorize the Administrator to set maximum daily rates. It is intended that this authority would be similar to the current authority for reimbursement of actual and necessary expenses of travel due to the unusual circumstances of the travel assignment and used only on an exception basis.

The concept of actual expense reimbursement for travel to high rate geographical areas would be eliminated since subsistence expense reimbursement for such travel would be included under the proposed per diem allowance system. The term "unusual circumstances of the travel assignment" has been eliminated as unnecessary under the provisions of the draft bill.

d. The proposed revision to subsection 5702(d) would authorize the Administrator to prescribe conditions under which an employee may be reimbursed for actual and necessary subsistence expenses for overseas travel (outside the continental United States) when the regular per diem allowance established under 5 U.S.C. 5702(a)(2) is inadequate to cover these expenses or when a per diem allowance would otherwise be inappropriate. This proposed authority would parallel the authority in proposed section 5702(c) for domestic travel. The current statutory maximum which is based on the appropriate locality per diem rate plus $33 would be removed and replaced with a similar but more flexible ceiling. Reimbursement under the proposed authority would be limited to the sum of the appropriate overseas locality per diem rate where the travel is performed plus 50 percent of that rate.

Subsection 2(b) of the draft bill proposed to redesignate the current 5 U.S.C. 5702(e) as subsection 5702(f) and to add a new subsection 5702(e) to permit the Administrator to authorize payment of transportation and subsistence expenses for an employee and/or immediate family under certain crisis conditions. This proposed authority would authorize the payment of subsistence expenses for the employee and/or immediate family when they must be evacuated from their home to another location usually within the official station vicinity, because of threat to life or property resulting from the employee's assigned duties. This would be a special provision applying only to employees serving in a law enforcement, investigative, or other capacity involving organized crime or other criminal activity. It has been requested by the Department of Justice. However, this authority would be applicable to employees of any agency in similar situations. It is expected that regulations implementing this new authority would require the agency head to review the circumstances surrounding the need to temporarily move an employee and/or family from their home and to authorize or approve payment of these subsistence and transportation expenses on an individual case basis.

SECTION 3

This section provides for a new subsection 5707(c) which will provide authority for the Administrator to collect transportation and travel payments data on a continuing but not regular basis. The requirements of the new subsection are a modification of the now expired congressional reporting requirement imposed on the Administrator by Public Law 96-346 but less detailed and restrictive so as not to impose an undue burden on GSA or the reporting agencies. The information would be collected at least every 2 years, on a sampling basis to the extent feasible, from those agencies spending $5,000,000 or more annually on travel. This would give GSA the flexibility to collect mileage data one time, and per diem data 2 years later, without burdening its staff and the staffs of the reporting agencies with the necessity to amass all categories of spending data every time.

GSA does not contemplate seeking information more often than every 2 years, but an annual collection for special purposes would not be precluded. Information on the use of discount fares probably would not be collected from the agencies, inasmuch as that information can be provided at least partially through other sources such as the travel management centers. Information on the use of first-class air accommodations will not be collected on a regular basis, because GSA found in past reports that such usage is not a significant problem. However, information on that practice could be developed as needed from time to time. The proposed reporting requirement would also include collection of data on employee relocation payments but only on an as needed basis.

SECTION 4

This section of the bill corrects on oversight in existing law by adding a proposed new section 5734 to subchapter II of chapter 57, title 5, United States Code. The new section provides authority for agencies to reimburse employees transferring from the Postal Service for their travel, transportation and relocation expenses under the same conditions and to the same extent as any other employee covered by title 5 when transferring in the interest of the Government. Section 5734 would restore the entitlement that Postal Service employees held prior to 1970. This entitlement was lost through an apparent oversight when the Postal Reorganization Act of 1970 was enacted specifically excluding Postal Service from coverage under title 5. In connection with this exclusion section 1006 of title 39, United States Code, provides that Postal Service employees shall be eligible for promotion or transfer to any other position in the Postal Service or executive branch of the Government for which they are qualified. However, section 1006 makes no reference to eligibility for relocation allowances in connection with transfers.

The Comptroller General of the United States, General Accounting Office (GAO), has ruled that both the losing and gaining agency must be included as an agency under title 5 for the transferred employee to be eligible for the travel, transportation and relocation entitlements. Many agencies unaware of the change in status of the Postal Service have erroneously authorized these entitlements. Several employees acting in good faith have accepted transfers and incurred relocation expenses, later to be denied reimbursement. The only remedy for this situation has been private relief measures. Section 5734 would correct the oversight and allow employees being transferred from the Postal Service to be treated the same as other transferred employees. It would also eliminate the need for private relief measures.

SECTION 5

This section provides for a delayed effective date to allow time for regulatory implementation.

SECTION 6

This section proposed to amend section 1003 of title 39 of the United States Code to allow for payment of a special per diem allowance to Postal Service employees for official travel in a locality outside the continental United States when the per diem allowance prescribed under section 5702(a)(B) for travel to the same locality is inadequate to cover the actual and necessary expenses incurred.●

By Mr. DODD:

S. 1841. A bill to require depository institutions to disclose to their customers their practices relating to the availability of funds in connection with check deposits, to require the timely payment of interest on deposits to interest bearing accounts, to improve the check clearing system, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

FAIR DEPOSIT AVAILABILITY ACT

● Mr. DODD. Mr. President, today I am reintroducing the Fair Deposit Availability Act, a bill that would reduce the long hold times bank customers must endure when they wish to withdraw funds based on check deposits.

This legislation is the product of 3 years of consideration by the Banking Committee. At the first hearing on the subject, which was conducted by the Consumer Affairs Subcommittee on March 10, 1982, evidence was presented that confirmed the fact that a large number of depository institutions were imposing long hold periods on their customers' checks—averaging about 5 business days on checks drawn on institutions in the same State and 12 business days on checks drawn on out-of-state institutions. In addition, the

hearings revealed that a significant number of bank customers experienced problems with check holds—ranging from annoyance to store and bank charges for bounced checks because the banks had yet to make available funds based on completely legitimate deposited checks.

The hearing also focused on a 1979 study of the problem conducted by a joint task force of the American Bankers Association and the Federal Reserve Board which, after outlining the kinds of problems described above, concluded that banks should differentiate between established customers and new ones and "retain the flexibility to provide established, financially responsible customers with funds availability on a schedule at least equal to the receipt of 'provisional credit' (usually 1 or 2 days after a check is deposited) by the bank without extending similar funds availability in situations that involve crime or financially irresponsible individuals." Despite this study, both the ABA and the Fed felt that there was no need for legislation and the Fed asked for a short time to do another study. While I was skeptical of the need for another study, I was willing to give them the time and I expressed my hope that the industry would solve the problem on its own.

Eleven months later, when the Fed had not done another study, partly because they were not able to arrange meetings with the ABA, and the industry had taken no action to resolve the problems, I introduced S. 573, the Fair Deposit Availability Act of 1983.

Even then, we were not able to get the industry's attention until hearings were scheduled on my bill for September 1983. One month before those hearings, the ABA sent out a letter to all its members urging them to adopt general hold practice policies and disclose them to their customers in order to head off any congressional action.

Since that time, the banking industry has been making a good faith effort to inform their customers of banks' hold policies. However, disclosure is only half the solution. The other half is an actual reduction in the number of days people have to wait to get their money. The best way to achieve that end has been widely debated within and without the banking industry. My original bill addressed the problem by mandating an expedited system for returning bad checks. The banks were split on the best way to solve the problem. Some argued that the return system had to be automated but were fearful of the costs involved in the approach I suggested. Others felt that most of the problem could be cured simply by having banks evaluate the dangers involved with particular customers and particular types of checks. In fact, the Bank of America testified that it places holds on less than 1 percent of all its checks. Those holds are placed only on the checks that cause the greatest problems—those in new accounts, of high dollar amounts, and those drawn on accounts with historical difficulties.

These different views convinced me and other members of the Banking Committee to amend S. 573 to give the Fed time to decide which approach was better. Thus, the amendment bill—which was incorporated into the Financial Services Competitive Equity Act—gave the Fed 3 years to promulgate a final regulation to reach a goal of reducing hold times to no more than 2 or 3 days for all checks that do not represent a "serious risk of loss" to depository institutions. In addition, the bill requires all depository institution to disclose their hold periods to their customers. Unfortunately, although the Financial Services Competitive Equity Act passed the Senate in September 1984, it and the delayed funds title died when the House of Representatives did not pass any banking legislation.

In this Congress, House Banking Committee Chairman FERNAND ST GERMAIN has introduced similar legislation with 145 co-sponsors and recently held hearings on the bill. I anticipate speedy House action and so I decided to reintroduce basically the same bill that our Banking Committee reported last year so that we can act expeditiously as soon as the House has completed action. I am delighted that Senators D'AMATO, PROXMIRE, CRANSTON, and GORTON have joined me as original cosponsors.

While I am optimistic that we will be able to relieve the American consumer of this unfair burden shortly, I recognize that the Congress has been known to act as slowly in passing banking legislation as banks have been in giving customers access to their funds. Therefore, I have pragmatically titled the new bill the Delayed Funds Availability Act of 1986!●

By Mr. PROXMIRE:

S. 1842. A bill to reduce the use of limousines by Government officials; to the Committee on Governmental Affairs.

REDUCING THE USE OF LIMOUSINES BY GOVERNMENTAL OFFICIALS

Mr. PROXMIRE. Mr. President, it is time to put the breaks on chauffeur service for Federal employees and that is why I am introducing the Chauffeur Limitation Act of 1985.

My bill strengthens current law in three ways. First, it limits the number of Federal officials eligible for home-to-work transportation by establishing a "cap" on each branch of Government—a reduction of one-third from current practice. Second, my bill requires full disclosure of all individuals eligible for home-to-work transportation and annual reporting of all violations. Third, it establishes mandatory penalties and vests enforcement authority with the inspector general of each agency.

EXISTING LAW

Since 1946, Federal law has prohibited the use of Federal vehicles for home-to-work transportation for all Government employees. Exemptions were established in the statute for the President, the Cabinet, and principal diplomatic and consular officials.

In other legislation, the Congress also exempted the Vice President, the Chief Justice, and the elected leadership of the House and Senate. If the basic law and these few exemptions had been strictly observed, there would be no need for my bill.

But over the last 40 years, there has been a virtual caravan of Federal officials seeking chauffeur service.

After all, there is nothing—but nothing—a bureaucrat treasures like having his own limousine and chauffeur. Why? Because the limousine is the ultimate ego trip. The supreme sign of success.

For those less fortunate, the right to summon a car and driver from the motor pool was highly treasured. And, if all else failed, a Federal employee could try to get a car assigned for his or her exclusive use, even though it came without a driver.

No wonder that my 1982 survey found at least 190 Federal officials could summon a car and driver to take them home.

THE COMPTROLLER GENERAL'S 1983 RULING

The practice became so blatant that the Comptroller General issued a warning in 1983 that Federal officials could no longer cavalierly ignore the law. He put Federal officials on notice that they would be held liable for any violations beginning this year.

But even the Comptroller General's ruling has not deterred Federal bureaucrats. They either sought additional legislative exemptions, such as the Defense Department which secured 10 exemptions, or they simply ignored the law.

A study released by the General Accounting Office just 2 months ago found 128 Federal officials receiving home-to-work transportation—79 of whom were not authorized.

And now we find the Reagan administration's fiscal watchdog, the Office of Management and Budget, proposing legislation that could increase the number of eligible officials still further under the guise of "clarifying" the law.

THE REFORM BILL

Mr. President, it is time to strengthen the law, not weaken it, and that is just what my bill would do.

First, the bill establishes a firm cap on each branch of Government and cuts the executive and the legislative branch each by one-third.

The executive branch would be cut from approximately 40 individuals to 28 officials: the President, Vice President, 13 Cabinet officers and provides the President with the flexibility to designate another 13 executive branch officials.

The Congress and its staffs would also be cut by one-third from the current level of 21 to 14: limiting each Chamber to no more than seven vehicles for this purpose.

And the eligibility of the Chief Justice is retained.

Second, the bill requires the inspector general of each agency to report yearly on the compliance of their agency with the provisions of this law as well as report on the remedial actions taken. In addition, each agency's budget would be required to disclose the names of individuals designated to receive home-to-work transportation.

And, finally, the penalties would be strengthened. Full repayment to the Federal Government of all expenses involved, and a minimum 3-day suspension without pay, would be mandatory—not optional—for all individuals in violation of the law as well as the supervisor who authorized it. In addition, the bill retains the provision in current law that for egregious cases an individual can be dismissed from Federal service completely.

By establishing a firm "cap" on each branch of Government, requiring full public disclosure and mandatory financial penalties, my bill will finally give the law the teeth it needs.

I am delighted that Congressman LEE HAMILTON (D-Ind.), is introducing a similar measure in the House of Representatives and I hope that our colleagues in both Houses will join us in seeking enactment of this long-needed legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1842

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1344 of title 31 is amended to read as follows:

"§ 1344. Passenger motor vehicle and aircraft use

"(a) Notwithstanding any other provision of law unless enacted in specific contravention of this section, an appropriation may be expended to maintain, operate, and repair passenger motor vehicles or aircraft of the United States Government only to the extent that such vehicle or aircraft is used to provide transportation for official purposes. An official purpose does not include transporting officers and employees of the Government between their residences and places of employment except—

"(1) medical officers on out-patient medical service; and

"(2) officers and employees performing field work requiring transportation between their residences and places of employment when the transportation is approved by the head of the agency.

"(b) A motor vehicle or aircraft may be used to transport between residence and place of employment the following officers and employees of the Government:

"(1) the President or the Vice President;

"(2) the heads of executive departments listed in section 101 of title 5;

"(3) principal diplomatic and consular officials;

"(4) as many as 13 employees of the executive branch, not otherwise exempted under this subsection, to be designated by the President;

"(5) members or employees of Congress, provided that each house may not employ more than 7 vehicles to provide transportation under this paragraph; and

"(6) the Chief Justice of the United States.

"(c)(1) The President shall include in the budget justification for each agency submitted each year to both Houses of Congress a complete listing of employees of such agency who receive transportation between their residence and place of employment under this section.

"(2) The Inspector General or comparable official of each agency shall submit to the Committees on Appropriations of both Houses of Congress each year, an evaluation of the agency's compliance with this section, including a complete listing of all known violations for this section and remedial action taken.

"(d) An officer or employee who uses or authorizes the use of a motor vehicle or aircraft in violation of this section shall be suspended without pay by the head of the agency and shall be required to reimburse the Government for all expenses improperly incurred. Such suspension and reimbursement shall be effected by the agency Inspector General or comparable official of the agency. The officer or employee shall be suspended for not fewer than three days, and when circumstances warrant, for a longer period or summarily removed from office.".

By Mr. KENNEDY:

S. 1843. A bill to establish a commission to monitor and evaluate elections in the Philippines; to the Committee on Foreign Relations.

COMMISSION TO MONITOR AND EVALUATE ELECTIONS IN THE PHILIPPINES

Mr. KENNEDY. Mr. President, over the weekend, President Ferdinand Marcos announced his intention to hold Presidential elections in the Philippines some time in early 1986. President Marcos' decision to move the Presidential election date up 2 years—from the originally scheduled time in 1987—comes as a welcome surprise to all who care about the future of democracy in the Philippines. The Filipinos clearly want and should have the opportunity to decide for themselves who should lead them through what may be some of the most critical years in Philippine history.

In the course of making his announcement, President Marcos also extended an invitation to the Congress to monitor these elections for the purpose of guaranteeing that they are free, fair, and honest. This too was a welcome announcement, for at this turning point in Philippine history, it is absolutely imperative that the democratic processes and democratic institutions inside the Philippines be strengthened and protected, and that these elections, whatever their result, not be rendered meaningless by widespread allegations of fraud or intimidation. The future of democracy in the Philippines rests in the balance.

As Americans, we have at least three special reasons for the United States to monitor these upcoming elections.

First, the American people and the Filipinos have a special relationship and share a special history. We fought together—and many Americans and Filipinos died together—during the Second World War in the cause of freedom and democracy. The Filipinos have proven their commitment to democratic values and principles over and over again. The American people share that commitment. But we also have a very special obligation—not only to defend those same values and principles but also to stand with and support those individuals inside the Philippine nation who are working to translate those values and principles into reality.

Second, the nation of the Philippines is at a moment of real crisis in its history. It is in need of strong, confident, legitimate leadership. The economy is in a shambles, and a guerrilla insurgency seems to be gaining strength with every passing day. The faith of the Filipinos in their Government appears to be an all-time low. There is little reason to wonder at that: The Philippine military's complicity in the murder of Benigno Aquino gives the appearance that that bloody crime was ordered or at least sanctioned at the very highest levels of Government; President Marcos continues to highest levels of Government; President Marcos continues to exercise absolute power, ruling by decree when necessary and suppressing internal dissent when needed; the activities of the Philippine military continue to give rise to reports of gross abuse of human rights as the Armed Forces combat the insurgents with excessive and indiscriminate violence that leaves hundreds of embittered and innocent victims in its wake; and continuing and increasingly well documented reports of corruption and self-dealing at the very highest levels of the Philippine Government give good cause to wonder whether Philippine public servants are really serving the people or are, in fact, serving themselves first, last, and always.

So the time is right to test President Marcos' mandate to govern.

Finally, the United States has its own special concerns about the future of the Philippines. We provide hundreds of millions of dollars in economic and military assistance to the Phil-

ippines each year, and we rely upon Clark Air Field and Subic Bay Naval Station as integral parts of our national defense. It is critical for us to know—as we determine future levels of United States aid to the Philippines and as we evaluate the prospects of our military bases there—whether the 1986 elections for President will provide the people of the Philippines the opportunity to campaign and vote in legitimate free and fair Presidential elections.

I am therefore introducing legislation today to establish a Commission to monitor and report back to the Congress on the 1986 elections in the Philippines. I propose that we accept President Marcos' invitation and make a serious, concerted effort to observe these upcoming elections.

The concept is simple. In this legislation, I propose that a six-member Commission be appointed by Congress and the administration. The members of the Commission will be expected to travel to the Philippines and—on a full-time basis—to establish a visible and active presence and investigation and reporting back to Congress on the electoral process underway in that country. This Commission would assess the process on the basis of internationally recognized guidelines and would submit an interim report to Congress—before the election itself is held—evaluating the openness and fairness of the election process.

It may come to pass that the legitimacy and credibility of this historic election will depend on the legitimacy and credibility of this Commission. For that reason, I believe that the members of the Commission should be composed of distinguished, experienced, and prominent American citizens, well-known and well-respected for their fair-mindedness and proven impartiality. And I also believe that the members of this Commission should spend full time—between now and election day in the Philippines—on the task of monitoring the electoral process inside that country. For that reason, this legislation includes a prohibition that forbids any Member of Congress or any official in the executive branch from serving on this Commission.

No additional authorization is needed to fund this Commission. The financing for this Commission will come from the $3 million that has already been appropriated and made available in the Foreign Assistance Act of 1961 to promote increased adherence to civil and political rights in countries currently eligible for U.S. assistance.

There are numerous precedents for observer delegations to observe the elections in foreign countries. Two of the most well known are the cases of the 1980 Zimbabwe elections and the recent elections in El Salvador.

In the case of the Zimbabwe election, the British Commonwealth full-time observers, each with 2 staff members to monitor the elections for a total of 6 weeks; 33 more observers were flown in to observe the election day proceedings. That historic election brought an end to a bitter civil war and by all accounts was both free and fair.

In many instances, where less extensive monitoring delegations were sent to observe elections, the results of the elections are more controversial. In the recent elections in El Salvador, the United States Congress has sent delegations to observe those elections, yet they arrived just a few days before and left shortly after those elections. Because of their limited visits, such missions are often only capable of producing a description and brief analysis of the technical aspects of the voting process. As a report recently produced by the International Human Rights Law Group, funded in part by the administration, has observed, while the presence of short-term observers in the country on election day deters manipulation and fraud by the electoral authorities, their primary purpose often is to signify support for the electoral process.

I have attempted to fashion this Commission in a manner which will avoid any advance endorsement of the Philippine elections. Rather, it is structured to provide a method for the fullest and most objective way for Congress to determine if the Philippine Presidential elections are indeed free, fair, and honest.

By arriving in the Philippines sufficiently prior to the election, the Commission's members will be able to establish a presence and to meet with a wide cross-section of the population. They will be in position to judge the conditions for free participation by all citizens in the election, free access to the media by all citizens in the election, free access to the media by all parties, the existence of an objective and honest official election committee to oversee and direct the elections as well as the capacity and willingness of the Armed Forces to enforce the election process in an honest, objective, and fair manner.

There are many obstacles that exist to a free and fair election in the Philippines. In past elections, there have been numerous reports of election fraud, including denial of access to the press, illegal ballot counting, and intimidation of opposition parties and candidates.

The role of NAMFREL, the National Organization of Poll Watchers, in the 1984 Philippine elections has been highly praised for its role in ensuring a surprisingly honest election. Yet Marcos has since revoked NAMFREL's accreditation despite U.S. pressure against such a move. It is my hope that recent reports that Marcos may reaccredit this important organization are true and that Marcos will allow the Philippine citizens a role in monitoring their own election.

The Commission I am proposing will provide a much needed incentive to the Marcos regime to hold as free and as fair elections as possible. And this Commission's findings will provide the United States Congress with a sound basis on which to determine the future of the United States Government to the Government of the Philippines.

I urge the Senate to act favorably and promptly on this important piece of legislation.

In addition, I am also writing today to the Comptroller General in connection with the increasing number of disturbing reports of corruption at the highest levels of the Philippine Government. Many of these reports suggest that United States' aid to the Philippines has been diverted by individuals at the highest level of the Philippine Government, including President and Mrs. Marcos or others acting in the behalf.

I believe it is of the utmost importance to the American people to determine whether such allegations are true. I am therefore requesting the General Accounting Office to conduct an independent study of United States and multilateral assistance to the Philippines to determine whether there has been any diversion of United States funds to purposes other than those intended.

I have asked the study to investigate United States economic and security assistance since 1978 as well as multilateral assistance to the Philippines to which the United States has been a contributor. In instances where diversion of United States funds has occurred, I have asked for the fullest possible accounting of who is responsible and for what purpose the funds were actually used.

In addition to exploring the possibility of corruption in the Philippines, this report will be a test of our Government's ability to monitor how United States tax dollars are spent. I believe the U.S. Government should be able to account fully for the millions of dollars we invest in foreign assistance, either through our bilateral aid programs or through multilateral institutions.

At a time when the economy of the Philippines is in serious trouble with severe shortages of foreign exchange and high unemployment, for prominent Philippine citizens to be exporting hundreds of millions of dollars outside of their country for investment abroad, raises the most serious questions about that Government's commitment to the welfare of its citizens.

It is my hope that this investigation will provide valuable and timely information for the current debate of United States foreign policy toward the Philippines and especially with respect to the appropriate levels of United States economic and military aid to the Philippines for the future.

Mr. President, I ask unanimous consent that the full text of the bill may be printed in the RECORD, as well as the text of my letter to GAO and related articles.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1843

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS

SEC. 1. (a) The Congress finds that:

(1) The Government of the Republic of the Philippines has announced its intention to hold elections in early 1986.

(2) It is in the security interests of the United States as well as in the interests of the people of the Philippines to encourage free and fair elections and a return to democracy in that country;

(3) It is essential for the Congress, determining future aid levels to the Philippines, to know whether these elections are free, fair, open, and honest;

(4) Section 116(e) of the Foreign Assistance Act of 1961 authorizes and encourages the President to use not less than $3,000,000 for openly carrying out programs and activities to encourage or promote increased adherence to civil and political rights, as set forth in the Universal Declaration of Human rights, in countries currently eligible for assistance.

ESTABLISHMENT OF ELECTION COMMISSION

SEC. 2. (a) There is established a United States Commission on Elections in the Philippines (hereafter in this bill referred to as the "commission") to observe and monitor elections in the Philippines. The commission shall be composed of members having experience in the monitoring of elections, knowledge and understanding of international human rights, and knowledge of the Philippines;

(b) No member of the Commission shall be a member of the Congress or the Executive Branch of the Federal Government.

(c) The commission shall consist of six members appointed as follows:

(1) 2 individuals appointed by the Senate in consultation with the Majority and Minority Leaders of the Senate;

(2) 2 individuals appointed by the House of Representatives in consultation with the Speaker and Minority Leader of the House of Representatives;

(3) 2 individuals appointed by the President, one of whom shall be designated by the President as chairperson of the Commission;

(d) The members of the Commission are encouraged to monitor as many polling places as feasible on the day of any election.

(e) The Commission may employ and fix the compensation of such staff as it may require. Funds authorized to be available under section 116(e)(1) of the Foreign Assistance Act of 1961 may be available for the necessary expenses of the commission.

REPORTS OF THE COMMISSION

SEC. 3. (a) Not later than 30 days after the appointment of its members, the commission shall submit to the Congress a report setting forth its preliminary findings regarding the electoral process in the Philippines and assessing:

(1) the existence of an objective election committee accredited by the Government of the Philippines to oversee and direct the elections;

(2) the capacity and willingness of the Philippine armed forces to enforce the election process in a fair and objective manner;

(3) the access of all political parties and candidates to the media, including print, radio, and television; and

(4) an assessment of the ability of parties and nonpartisan groups to monitor the balloting in all regions of the country.

(b) Not later than 30 days after the date of any election in the Philippines, the commission shall submit to the Congress a report evaluating, with respect to such election—

(1) the integrity of the ballot process, including whether the candidate or party that received the proportion of the vote prescribed by law was permitted to assume office and power;

(2) the ability of all the citizens of the Philippines to participate in the political process, including their right to a secret vote and their right to be elected to office;

(3) the respect for the rights of freedom of expression, freedom of association, and freedom of assembly during the campaign, including—

(A) whether the campaign period was adequate to permit political organizing and campaigning and to inform citizens about the candidates and issues; and

(B) the access of all parties to the media, including print, radio, and television, and citizens' ability to receive such information from the media;

(4) the role of the accredited election committee and its performance in overseeing and directing the elections; and

(5) the effectiveness and fairness of the role of the armed forces in the electoral process.

U.S. SENATE,
Washington, DC, November 7, 1985.

CHARLES A. BOWSHER,
Comptroller General U.S. General Accounting Office, Washington, DC.

DEAR SIR: I am deeply concerned about the deteriorating political and economic situation in the Philippines and particularly whether United States military and economic assistance is being used for its intended purpose.

There have been an increasing number of reports of corruption at the highest levels of the Filipino government leading to my concern that United States aid to the Philippines has been diverted by President and Mrs. Marcos or by individuals acting on their behalf.

I am, therefore, requesting the General Accounting Office to conduct an independent study of the total assistance program to the Philippines, including: a) U.S. Economic Support Funds; b) U.S. security assistance programs; and c) to the fullest extent possible, multilateral assistance to the Philippines.

I would like the study to identify and evaluate for each of these areas the total amount and purpose of assistance authorized and appropriated since 1978 and the amount and recipient of final expenditures for each program.

In instances where diversion of funds for purposes other than those originally intended by the U.S. government has occurred, I request the fullest possible accounting of who is responsible for the diversion and for what purposes the funds were actually used.

I believe it is important to establish to what extent the United States is able to monitor its expenditure of U.S. tax dollars. I would therefore also request an investigation of existing controls and monitoring mechanisms with respect to U.S. assistance to the Philippines, and your recommendations of ways in which those controls and mechanisms should be improved.

I am aware of the difficulties your office may face in investigating the U.S. supported multilateral assistance provided to the Philippines through institutions such as the World Bank, the International Monetary Fund and others. However, as the United States is a major contributor to these institutions, it is important for the Congress to be able to monitor the use of these funds.

I hope that you will expedite this investigation. Your findings will play an important role in the current debate about U.S. policy toward the Philippines—e.g., how much military and economic assistance should the United States be providing to the Marcos government. I request that the report be unclassified to the fullest extent possible. If portions of the findings are classified, I would request a classified and unclassified version of the report.

It is my hope that the report will be available for use in next Spring's budget debate. If the full report is not completed by the end of February, 1986, I would appreciate an interim report of your findings at that time.

Your assistance in this matter is greatly appreciated, and I will be glad to cooperate with your office in further defining the scope of this study. Thank you for your assistance and I look forward to the results of your investigations.

Sincerely,

EDWARD M. KENNEDY.

[From the Village Voice, Oct. 15, 1985]

MARCOS TAKES MANHATTAN—HOW THE FIRST FAMILY OF THE PHILIPPINES AND THEIR FRIENDS ARE BUYING UP NEW YORK

(By William Bastone and Joe Conason)

As the tide of revolt rises in the Philippines, U.S. policymakers are increasingly worried about the stability of Ferdinand Marcos' dictatorial regime and the security of American military bases there. But Marcos and those close to him have other concerns as well. Like his late friend the Shah of Iran, the master of Malacanang Palace seems to be preparing for the end. According to some economists, as much as $10 billion has been secretly invested abroad by Marcos and other prominent Filipinos seeking safe havens for their money.

A *Voice* investigation has uncovered extensive real estate investments by Marcos, his wife, Imelda—who will visit the United Nations next week—and their family and so-called cronies in the New York City metropolitan area. Veiled by lawyers, nominal investors, and offshore corporations, these holdings, according to documents and sources in the Filipino business community, range from individual luxury condominiums to major commercial development projects and office towers, and are conservatively valued in the hundreds of millions of dol-

lars. Over the last few years—especially since the assassination of opposition leader Benigno Aquino in August 1983—the Marcos interests, these sources say, have joined the biggest players in New York real estate with deals ranging from prime midtown properties like the Crown Building on Fifth Avenue at 57th Street to prestigious addresses on Wall Street.

The principal agents for all this Filipino real estate activity in the New York area appear to be Ralph and Joseph Bernstein, founders and co-owners of New York Land Company. According to a former adviser to Ferdinand Marcos, who requested anonymity, the Bernsteins have been handling deals for the Marcoses since 1981. Last summer, New York Land, in conjunction with a Japanese construction company, made an unsuccessful bid of nearly $500 million for the New York Coliseum site and last spring it completed work on the $60 million Herald Center mall.

The flight of capital from the Philippines is an explosive political issue in that impoverished, debt-ridden, and corrupt country. Most of that money has been sent to the United States, in apparent violation of Philippine foreign exchange laws, and most of those sending it are friends, relatives, and employees of the "First Family." The charges of hidden wealth, or "dollar salting" as Filipinos call it, have been the talk of Manila for several years, but the facts have only recently begun to emerge. Last August, after a series of articles in the *San Jose Mercury News* that focused attention on hidden Filipino wealth in California, the parliamentary opposition to Marcos filed an impeachment resolution, which was quickly squashed, accusing him, his family, and cronies of:

". . . plundering the nation's wealth . . . and, in gross violation of Philippine foreign exchange laws, diverting most of such ill-gotten wealth to foreign countries. . . ."

Ferdinand Marcos insists that he and his wife have no foreign investments at all and calls all such allegations "a malicious lie." He has ordered his justice minister, Estelito Mendoza, to look into illegal hidden wealth abroad, but Mendoza has exempted Marcos from his probe.

A report on the Philippines that appeared on ABC's *20/20* last August 22 included an interview with Imelda Marcos in which, stammering and looking flustered, she responded to allegations about her own hidden wealth in the U.S.:

"Well, this is really, this is all a rumor. I am amazed, the many places I have been to or have passed through or been invited to [that have] been [called] mine. Now it looks like everywhere I go, I must use blinders for fear that every place that I look . . . [laughs] is mine. This is a bit unfortunate and this just shows that they must surely be bankrupt of issues. But they can go this low, this is understandable. This is part of the political game."

The first concrete evidence to support these allegations surfaced in a financial dispute between Imelda Marcos and two of her apparent front men, who accused her in separate lawsuits of attempting to swindle them out of millions of dollars in a Long Island resort development. Although both cases were settled this year, one as recently as last month, they exposed a paper trail that led far beyond their original allegations.

THE PAPER TRAIL

On February 1, 1984, attorneys for Augusto M. Camacho, a Filipino architect who worked on two buildings owned by the Philippine government in New York, filed suit in Suffolk County Supreme Court against Imelda Marcos; a Curacao corporation known as Ancor Holdings, N.V.; the Luna 7 Development Corporation; and three close Marcos associates: architect Jorge Y. Ramos; Philippine consular employee Miguel Arguelles; and Antonio Floriendo, a multimillionaire industrialist with large holdings in bananas, sugar, and shipping who belongs to President Marcos' inner circle.

Camacho alleged in his complaint that Imelda Marcos "does business in New York State systematically and continuously . . . [including] extensive real estate purchasing, improving, developing and managing. . . . Among other reasons, Marcos employs agents, representatives and/or nominees to keep hidden her personal direct participation and involvement. . . ."

In 1980, Camacho had become a 10 percent stockholder in the Luna 7 Corporation, set up to develop the Lindenmere, a 10-acre estate in Center Moriches with a mansion designed by Stanford White, into a $19 million luxury resort and condominium. But Camacho was angry, according to his complaint, because six months after the property was purchased, "Marcos decided to make Lindenmere into her private personal estate and discontinued the development of the $19 million resort." He said that Marcos demanded in November 1982 that all Luna 7 shareholders deliver their stock certificates to her, which Camacho refused to do, since he believed his share of the property was worth at least $1 million. At that point, he claimed, Marcos had the property transferred from Luna 7 to Ancor Holdings, a company controlled by her in which Camacho owned no interest.

Camacho felt swindled, and he wasn't the only one. A virtually identical lawsuit was filed in Suffolk last March by Dr. Pablo Figueroa, a close friend of Ernesto Pineda, the Philippine consul general in New York. Figueroa, too, watched helplessly as his 10 percent interest in the fabled Lindenmere was transferred out from under him. Yet neither plaintiff has been talkative. Figueroa could not be reached for comment, and in two brief *Voice* interviews Camacho refused to comment about his dealings with Imelda Marcos.

In their court papers, both Figueroa and Camacho identified Bernstein, Carter and Deyo—Joseph Bernstein's Manhattan law firm, which specializes in offshore tax havens for foreign investors in New York real estate—as the attorneys for Luna 7 and Ancor Holdings. Initial purchase documents in the Suffolk County Register's office showed another firm as the lawyers for Luna 7. But on deed papers transferring Lindenmere from Luna 7 to Ancor Holdings, the notary is listed as William Deyo, a partner in the Bernstein firm, and the documents were returnable to Bernstein, Carter and Deyo at their West 57th street offices.

Deyo's partner, Joseph Bernstein, and his brother Ralph have, over the past five years, come out of nowhere to achieve a prominent position in the local real estate world. Their umbrella company, New York Land, and related corporations have developed the Herald Center vertical mall, renovated the Crown Building at 730 Fifth Avenue, and bought the second-largest office tower in lower Manhattan, at 40 Wall Street. Last July, a subsidiary joint venture, the New York Coliseum Land Company, came in second to Boston Properties with a bid of $477 million for the Coliseum site at Columbus Circle.

Documentary evidence, as well as sources in the Filipino business community, point to the Bernsteins as the primary investment arm of the Marcos interests in New York. Although Bernstein denied in an interview with the *Voice* that his firm had ever represented Imelda Marcos, or that he had ever met her, his former chauffeur, a Filipino named Reuel Alger, and Alger's wife, have both said that he drove Bernstein to a meeting with Mrs. Marcos at the Waldorf-Astoria in 1982.

Few Filipinos not openly identified with the opposition are willing to speak publicly about the U.S. investments of the Marcos family and their cronies. Many Philippine citizens living in New York still have family back home and fear reprisals if they talk. But when assured of anonymity, even some associates of Mrs. Marcos talk about her dealings with the Bernstein firm. Her presence at the Herald Center before it opened last year, for example, was a staple of Filipino community gossip.

The Bernstein connection with the Philippines dates back to the early childhood of both brothers. Ralph Bernstein, 27, was born in Manila, and Joseph, 36, says he learned to speak the Philippine language Tagalog before he learned English. Their uncle, Jack Nasser, a textile manufacturer and importer with offices in Manila and New York, knows the Marcos family well, and employed the Bernsteins' father, Victor, until 1962, when the family left for California. They eventually moved to Hillsborough, a wealthy San Francisco suburb where many prominent Filipinos maintain their West Coast homes.

After obtaining degrees in law and finance, Joseph Bernstein entered the graduate tax law program at New York University, where he began to specialize in offshore tax havens. Before starting his own firm, he was an associate at Rosenman, Colin, Freund, Lewis & Cohen, a top New York firm where he worked closely with Irwin Jay Robinson.

Robinson, who filed notices of appearance in the Camacho and Figueroa lawsuits on behalf of Imelda Marcos, is an officer in the Philippine-American Chamber of Commerce and, according to the *San Jose Mercury News*, virtually ran the crony-connected Redwood National Bank in San Francisco. He has also represented Antonio Floirendo, the banana and sugar millionaire, whose New York real estate holdings have been handled by Bernstein, Carter and Deyo.

While working at the Rosenman firm, Joseph Bernstein represented his brother Ralph, who had gone into the real estate business, in an unsuccessful 1980 bid to purchase the Pan Am building for $369 million in cash. Bernstein says the two brothers were then working for the Gaon family, Swiss multimillionaires who are related to the Bernsteins by marriage. In late 1980, the Bernsteins incorporated their own real estate firm, and the law firm was founded around the same time.

When interviewed by the Voice last week, Bernstein denied any connection with the Marcoses. He also denied knowing Barry Knox, an individual listed on the Crown Building's deed as being authorized by a subsidiary of New York Land to borrow $57 million for its renovation. Otherwise he refused comment on clients represented by his firm or deals in which his company was involved, although he did say that many of his clients are foreign investors.

"My law firm is involved in a lot of different things for a lot of different people," he said. The Marcos allegations have "been haunting us for quite a few years. I suppose people think that because of my uncle being over there. My uncle does know [the Marcos family]. You know, Filipinos take pride in the doings of the First Family. I remember when there was a promotion of Philipine products at Bloomingdale's, people were saying that they own Bloomingdale's."

The Bernsteins don't seem to socialize with their real estate colleagues, who wonder where these young men obtained so much capital so rapidly. Some say they have heard rumors about the Marcos connection. Others compliment the Bernsteins skill and tenacity but say they are not well liked.

New York Land has been involved in two joint ventures this year with Kumagai Gumi, a giant multinational construction firm based in Japan; one was their unsuccessful bid for the Coliseum site, owned by the Metropolitan Transportation Authority. According to documents filed with the MTA, Kumagai would have put up the entire $477 million acquisition cost, plus the cost of constructing an 80-story development—but New York Land would have shared 30 percent of the profit. It's difficult to understand why a Japanese construction company would offer such a generous deal to a New York firm that has never put up a building. Bernstein says the two companies were brought together by Sonnenblick-Goldman, a real estate equity broker.

But possibly more significant is Kumagai's connection to the Philippines, where, according to Filipino and Japanese sources, they have done business for two decades as Suma Kumagai. These sources report that Suma Kumagai operates in partnership with Herminio Disini a relative of Imelda Marcos who has also been a member of the Marcos inner circle. Disini has held many government contracts to build highways and other public works, including a controversial nuclear power plant.

Bernstein is aware that Kumagai does business in the Philippines, but says he knows little about it. "I don't think they do business with the Philippine government," he added.

New York Land is also currently involved with Kumagai in a planned 55-story, $150 million project at 46th Street and Sixth Avenue called Americas Towers. Having assembled the site through purchases from Seymour Durst, the Bernsteins are not negotiating with the city's Division of Real Property for the air rights over the old High School of Performing Arts, which abuts the site. Assistant Commissioner Terrence Moan indicated that the size of Americas Tower would be considerably reduced if the Bernsteins and the city fail to agree on an air rights deal.

The city's sale of 270,000 square feet of transferable air rights would have to be approved by the Board of Estimate. The Bernsteins may have friends at City Hall, since in addition to providing financing for the Off-Broadway musical based on Ed Koch's book *Mayor* (see sidebar), the Bernsteins and their companies contributed $18,500 to Kock's 1985 campaign. They have never contributed to Koch before. They also gave $25,000 to Comptroller Harrison Goldin, $7500 to Andrew Stein, the Democratic candidate for City Council president who is likely to have two votes on the board, as well as $10,000 to Ken Lipper, who lost to Stein in the primary.

FROM PRINCETON TO CENTER MORICHES

A tour of the properties connected to the Bernsteins, and in some cases directly to Imelda Marcos, would lead from a mansion in Princeton, New Jersey, to the Lindenmere estate on Long Island, with at least a dozen stops at impressive Manhattan sites along the way. The Marcoses are never named in any mortgage or sale documents, and it is possible that some of the properties developed by New York Land may involve other investors. Joseph Bernstein refused to identify any of the foreign investors whose money he acknowledges is behind his firm's activities. What follows is a chronological list of properties, beginning in 1981, that are connected to New York Land, to the Bernstein law firm, or directly to Marcos and Marcos cronies:

The Lindenmere (Center Moriches).—Purchased in 1981 and renovated the following year for approximately $3 million, the Lindenmere's acquisition by Imelda Marcos is described above. Although Marcos has officially denied owning any U.S. property, Ernest Hoffstaetter, the general contractor who renovated the 10-acre estate, told the *Voice* he was introduced to her by Augusto Camacho and saw her there at least five times during the renovation. The last time he saw her was at a party to celebrate the completed rebuilding. Hoffstaetter said he was usually paid by Luna 7 Corporation, but sometimes received personal checks from Vilma Bautista, a secretary to Mrs. Marcos who resides in New York. He also was hired to renovate a mansion at 13-15 East 66th Street owned by the Republic of the Philippines and was paid for this work as well by Luna 7. He showed a *Voice* photographer pictures of himself posing with Mrs. Marcos on the porch of the Lindenmere.

John Sprague, a Center Moriches broker who showed the property to Camacho, recalled having tea with the Philippine first lady in his own home to discuss the estate. As noted above, the Bernstein law firm handled the transfer of the Lindenmere from Luna 7 Corporation to Ancor Holdings.

The Crown Building (730 Fifth Avenue).—The September 1981 purchase of the Hecksher Building (later renamed the Crown Building) for $51 million, with $15 million planned for renovations, was the Bernsteins' first foray into Manhattan real estate. Mortgage and deed records on file with the New York City Register's office list the building's owner as the Canadian Land Company, whose sole directors are Ralph and Joseph Bernstein, while the law firm handling the purchase was Bernstein, Carter and Deyo. The building was originally bought by a Curacao company called Lastura N.V., which, according to sources in the Filipino business community, belongs to Imelda Marcos. Lastura's name was later changed to Canadian Land Company, a New York Land subsidiary.

Herald Center (34th Street & Broadway).—Five months later, in February 1982, an outfit called Voloby Ltd., a British Virgin Islands corporation that listed Joseph Bernstein as its sole director, purchased the leasehold on the old E.J. Korvettes site at Herald Square. In 1983 the name Voloby was changed to Herald Center Ltd., with offices at the New York Land Company, and in 1984 the company took out a $29 million mortgage from Security Pacific Mortgage Company, subsidiary of a California bank with significant Philippine business. The total cost of the vertical shopping mall was $60 million. The impeachment resolution filed by the opposition in August lists this property as being a Marcos investment, and Filipino sources report that Imelda Marcos made a quiet appearance at the nine-story mall before its official opening last March 29.

New York Realty Building (29 West 57th Street).—This is the headquarters of New York Land and its related companies, including Bernstein, Carter, and Deyo. It was purchased in March 1982 and renovated for a total cost of $9.4 million. It is owned by Shalimar Ltd., a British Virgin Islands corporation whose law firm at the time of the sale was Rosenman, Colin, Freund, et al., attorneys for Imelda Marcos and Antonio Floirendo. Shalimar's address is c/o New York Land.

30 Wall Street.—NYLAND Ltd., a Curaçao corporation whose managing director is Joseph Bernstein, bought the leasehold on this building, but not the land beneath it, in September 1982, although Bernstein said last week that he never bought this building. Tax records show Bernstein as the billable party for city real estate assessments.

2650 Princeton Pike, Princeton, New Jersey.—Even local police chief William Seabridge knows, as he told the Voice, that this 13-acre estate and mansion are owned by the Marcos family. The deed shows Faylin Ltd., a British Virgin Islands corporation, purchased the property on October 26, 1982, but did not list the price. The sale documents list William Deyo as the notary, with all papers returnable to Bernstein, Carter and Deyo. The October 2-8, 1985, issue of Philippine News, published in San Francisco, reports that Marcos's children Imee and Ferdinand Jr. stayed here while studying in the U.S.; this property is also listed in the Marcos impeachment resolution.

St. James Tower (415 East 54th Street).—Kashgar Holdings Corp. N.V. of Curaçao with offices c/o New York Land, paid $887,000 on November 1, 1982, for apartment 17-M in this condominium. On November 17, Aderito Yujuico, a business partnet of Marcos's son-in-law Gregory Araneta, bought apartment 16-C for $485,000. Three months later, Kashgar paid $680,000 for aprtment 17-D. Bernstein said he knew nothing about Kashgar of these condos. In December, Sugarbush Corporation, owned by Marcos crony Antonio Floirendo, also purchased two apartments in this building—both on the 11th floor—for $716,500 and $460,000. These purchases took place two months after Ferdinand and Imelda Marcos paid an official state visit to Washington in September. Following a White House reception both Marcoses flow to New York for a short visit.

There were no recorded purchases by New York Land or its affiliates between the end of 1982 and August 21, 1983, when former senator Benigno S. Aquino, the exiled opposition leader, was assasinated upon his arrival at Manila Airport. But the buying began again a few months after Aquino's murder.

84 William Street.—This financial district building was purchased by 84 NYL Partners, affiliated with New York Land, for $10.5 million in November 1983. Renovation is expected to cost $5 million and will include the exterior goldleafing that has become a New York Land trademark.

200 Madison Avenue.—The Glockhurst Corp. N.V., another Curacao company with offices c/o New York Land, bought this commercial building from Harry Helmsley and his partners for $50 million on November 22, 1983. Again, the authorized signator was Barry D. Knox. But Bernstein claimed

to know nothing about Knox or the 200 Madison deal.

40 Wall Street.—The second tallest building downtown, this 70-story office tower has over a million square feet of office space. It was bought December 20, 1983, for $71 million by NYLAND Ltd., the Curacao corporation that also owns the leasehold on 30 Wall Street. Renovation costs are estimated at $15 million, with projected completion in 1986.

56 West 57th Street.—This four-story building, now mostly vacant, was purchased earlier this year by 57 NYL Partners, a limited partnership of two Bernstein-connected firms, for $2.2 million. Incorporation documents for one of the firms—CNY, Inc.—indicate that it is in the nightclub business.

In February 1984, two months after the purchase of 40 Wall Street, Augusto Camacho filed his lawsuit against Imelda Marcos, Antonio Floirendo, and their partners in Luna 7 Corporation, publicly linking these individuals to the Bernstein complex for the first time. No deals are recorded between the filing of the suit and the reemergence of the Bernsteins' joint ventures with Kumagai Gumi—the Coliseum and Americas Tower deals.

THE CRONIES IN NEW YORK

Connections among the Marcos family, their relatives and friends are exploited so widely and blatantly for economic gains that even *The Wall Street Journal* has referred to the system of "crony capitalism" in the Philippines. Naturally, many of the Marcos relatives, friends, and employees have followed their leader and his wife to the New York real estate market—sometimes for themselves and sometimes, it appears, as nominees for the Marcoses.

Perhaps the most obvious case of an apparent straw is Vilma Bautista, a personal secretary to Mrs. Marcos who works out of the New York Consulate. Bautista's salary is not public information, but it is hard to understand how, after living for years in an efficiency hotel on the West Side, she could suddenly begin to buy superluxury condominiums on Fifth Avenue.

Her first condo purchase occurred back in September 1976, when she paid $270,000 for apartment 29-H in Olympic Tower, across from St. Patrick's Cathdral. The sale documents list Bautista as the "authorized agent" for United Motors, a "Philippine corporation with an office at 210 West 70th Street," the efficiency hotel where Bautista lived and which she still uses as her address. According to the *San Jose Mercury News* series, United Motors is owned by Antonio Floirendo, who hid not return calls from the *Voice*.

Sometime early in 1977, Bautista bought three adjoining condos on the 43rd floor of Olympic Tower, this time as the agent of Thetaventure, N.V., a Curacao corporation. None of the sale documents on these purchases list an attorney; all papers are returnable to Bautista's apartment. The total price came to $688,000.

Around the same time, she bought a fifth Olympic Tower apartment, which she resold last February for $1.1 million.

On April 6, 1984, Bautista and Leonor Hernandez, her sister, bought an apartment at the Kingsley condominium, 400 East 70th Street, for $335,000. Bautista failed to return numerous calls from the Voice, but told the San Jose Mercury News that she knew nothing about these apartments. "This could be another Vilma Bautista," she explained.

Even more intriguing in some respects is Edna Guiyab Camcam, reportedly a close friend of General Fabian Ver, who is currently on trial in Manila, along with 25 other defendants, for conspiracy in the murder of Benigno Aquino. Until his indictment, Ver was the chief of staff of the Philippine Armed Forces and head of the nation's intelligence service.

Before Aquino's assassination, in August 1983, only one property in the New York area could be linked to Ver: a $90,000 home at 4 Capshire Road in Cherry Hill, New Jersey, purchased by Ver's son Irwin, who heads the Philippine Presidential Security Command. Irwin Ver bought the Cherry Hill house from Julian Antolin, an attaché to the New York consulate in December 1979, four months after the then-head of the Philippine-American Chamber of Commerce, Tristan Beplat, bought a nearby house at 19 Pendleton Drive for $119,000. Captain Hal Mathiesen of the Cherry Hill police said that the Pendleton address was used by Ferdinand Marcos Jr. and one of his sisters, while the place on Capshire Road was used by "servants and security." Mathiesen kept in contact with the State Department regarding the presence of Marcos family members in Cherry Hill, he added.

But seven weeks after the Aquino killing, Camcam, the Voice has learned, went on a condo-buying spree, spending $441,500 on three East Side apartments. On October 19, she bought a unit at 80 Park Avenue, where Augusto Camacho had purchased an apartment 17 days earlier. Five days later, she bought two apartments in a single day; another at 80 Park Avenue, and one at 402 East 90th Street.

Ver was immediately suspected in the death of Aquino and was charged with conspiracy by a board of inquiry convened by Marcos and headed by Andres Narvasa, a law school dean. There was considerable speculation in the Philippines that the president might sacrifice Ver, but the Marcos-controlled prosecution, which rested its case last week, is believed by independent observers to be insincere, incompetent, or both in seeking a conviction.

Other Marcos cronies, according to Filipino sources and real estate documents, include:

The wife of Marcos' immigration commissioner Eduardo Reyes, who bought a condominium at the Galleria, a superluxury building on East 57th Street in September 1977. Carmen Reyes paid $159,000 for the apartment and sold it last December for $600,000 in cash. She is a member of Parliament in Marcos's party and a close associate of Imelda Marcos.

Miguel Arguelles, a partner of Mrs. Marcos in the Lindenmere deal, was an employee of the New York consulate until last year. His brother Romeo is currently serving as consul general in San Francisco. Arguelles has also been active in the condo market. In September 1981, Arguelles bought apartment 6-F in the Elysabeth at 35-41 East 38th Street for $70,000, and sold it July 31, 1984, for $120,000. On October 14, 1982, he bought apartment 14-F in the Beaumont at 30 West 61st Street for $92,000. On the sale documents Arguelles lists his home address at 119 Continental Avenue in Forest Hills Gardens. A title search revealed that this house, in Queen's richest neighborhood, is owned by Jorge Y. Ramos, another Lindenmere defendant, who brought it in 1979 for $202,000.

Lydia Nicasio, whose family owns the pro-Marcos Manila Times-Journal, paid $950,000 on March 1, 1982, for a four-story commercial building at 304 East 55th Street. The building is currently for sale.

Aderito Yujuico, as noted above, bought a St. James Tower condo in 1982. Yujuico also bought an apartment at 900 Park Avenue in December 1979 for $320,000, and a few months later, in January 1980, paid $286,000 for another unit there. In April 1980, he bought still another unit at 900 Park Avenue for $178,200.

Penetrating the secrecy of these and other Marcos-tied investments in the United States has until recently been almost impossible. But the exiled opponents of Marcos here say that they are aware of many of the properties described in this account, as well as more hidden wealth. They speak of jewel collections and priceless art, of real estate in other cities and numbered bank accounts in other countries. When Marcos is finally removed, they predict, the new government will use this information to recover wealth the opposition believes was stolen from the people of the Philippines.

COLONEL GATAN: THE LIQUIDATING LANDLORD

Compared to luxury condominiums and office towers on the East Side, the dilapidated Webster Hotel on West 45th Street near Sixth Avenue did not appear to be a property that would interest the Marcos family or their cronies. However, an examination of the 1980 purchase of this building and the subsequent conversion attempt reveals that this nondescript 13-story transient hotel may be the prototype of "crony capitalism" in New York.

The Webster was purchased on June 23, 1980, for $1,577,000 by Consolidated Equities, which then transferred the hotel to 40 West 45th Street Associates, a limited partnership. Incorporation papers for both companies reveal the Webster's Marcos connections.

Consolidated Equities is owned by Augusto Camacho and Pablo Figueroa, formerly two of Imelda Marcos's principal front men in New York. Incorporation papers of 40 West 45th Street Associates list Consolidated Equities as the company's general partner and 10 other limited partners. The limited partners include:

Thelma Figueroa. The wife of Pablo Figueroa, she paid $261,350 for 10 percent of the company and agreed to invest another $255,150 if the partnership needed it.

Bernadette Reyes. The daughter of Eduardo Reyes, the Philippine Commissioner of Immigration, Reyes kicked in $32,166 and agreed to a second $64,000 installment. Reyes listed her address as 117 East 57th Street, the 47th-floor Galeria condominium her mother Carmen bought for $159,000 in 1977.

Avenilo Aventura. The director of the Philippine Heart Center, a pet project of Imelda Marcos, he paid $24,666 for a 1.4 percent share in the Webster. He agreed to an additional payment of $49,333.

Six of the other seven limited partners are doctors who, sources said, are close to Pablo and Thelma Figueroa, who are also doctors. The remaining limited partner, however, has direct ties to Fabian Ver—who is currently on trial for conspiring to killed Benigno Aquino—and Ferdinand Marcos:

Romeo Gatan. On the eve of the declaration of martial law in September 1972, Ferdinand Marcos decided to have Aquino arrested. The president dispatched one of his most trusted military officers, then Colonel Romeo Gatan, to head the unit that would

arrest the opposition leader at the Manila Hilton. Gatan, who recently retired with the rank of Major General, is also a close associate of Fabian Ver. Last February, a former Philippine army officer testified that Gatan was one of two military middlemen who paid him to "execute or liquidate certain persons whom the military establishment wants to be executed or liquidated for various reasons." In testimony submitted to the House's Committee on Foreign Affairs, the officer, Jose Fronda Santos, admitted to participating in the murders of 50 Marcos opponents, some of whom were identified as members of the communist New People's Army, or their sympathizers. Gatan invested $169,000 for 4.2 percent of the Webster deal. Camacho, in a Voice interview, said that Figueroa brought Gatan and the other limited partners into the deal. Asked how a military officer could afford to invest $169,000 in New York real estate, Camacho said, "I'm not in the position to question where his money came from."

According to deed records, 40 West 45th Street Associates held the Webster for almost five years, an ownership that was marred by scores of building code violations that went ignored, apparently in an attempt to force the remaining tenants to vacate the building. After failing to convert the hotel, they sold the building last April for $5.5 million to developer Robert McFarlane. On paper, this would represent a $4 million profit, but Camacho claimed that the partnership lost money on the Webster.—W.B. and J.C.

MARCOS'S NEST EGG

As the Philippines sink deeper into poverty, foreign debt, and political unrest, many of their most prominent citizens are systematically draining vast amounts of wealth from their nation and hiding it overseas. These political and business leaders, who largely determine the Philippines' economic destiny, have poured their personal fortunes into investments in the United States, including condominiums, luxury homes, office buildings, businesses, and banks in California and New York.

Overseas investments have emerged as a potent political issue in the Philippines. President Ferdinand Marcos and his so-called "cronies" have used their leadership position to accumulate large fortunes in the 20 years Marcos has been in power. Some opposition leaders abroad have made it their bitter vocation to track the holdings of the Marcos circle. Our articles last June in the San Jose, California, *Mercury News* about the extensive U.S. investments of Marcos and his associates were reprinted in major opposition newspapers and discussed in radio broadcasts and sermons. More than 50 members of Parliament signed a resolution calling for impeachment hearings. Marcos countered the resolution with a threat to dissolve Parliament and hold presidential elections in November, Marcos has now apparently dropped the idea of early elections, but the political fallout continues.

At the center of the controversy are Marcos and his wife, Imelda. Like many Filipinos who have invested overseas, they use holding corporations or business associates to handle their transactions. The complex system makes it difficult to identify the real owners and to identify the relationships between businesses involved in the investments. But Pablo Figueroa, a former business partner of Mrs. Marcos, charged in a lawsuit filed in March 1984 that Mrs. Marcos "does business in New York State systematically and continuously" and that her activities included "extensive real estate purchasing, improving, developing and managing." Figueroa also said that Mrs. Marcos used agents and nominees "to keep hidden her personal . . . involvement" in the transactions.

Figueroa said that in 1981 Mrs. Marcos and several partners, using a Curacao corporation called Ancor Holdings N.V., bought as estate on several acres of property in suburban Long Island known as Lindenmere, planning to expand it into a $19 million resort. But Mrs. Marcos abandoned those plans and converted Lindenmere into a private estate. In the process, Figueroa said that she failed to pay him one million dollars she had promised as his share in the deal.

Figueroa has since agreed to drop his lawsuit, according to his attorney. (Mrs Marcos's attorney refused to comment on the suit.) But Figueroa's suit was identical in its allegations to one filed in 1984 by a partner of Figueroa, August M. Camacho. That suit, which also named Mrs. Marcos as defendant, ended with a substantial settlement for Camacho.

There is also evidence to support allegations that the Marcoses own other properties in the United States. A home in Princeton, New Jersey, is owned by an offshore corporation that is represented by the same law firm that represents Ancor Holdings. Police officials in Princeton say the home is used by Marcos family members.

The Marcoses are also linked to three condominiums in a Fifth Avenue apartment building in Manhattan. According to real estate records, the adjoining condominiums are owned by a Hong Kong corporation whose agent is a woman named Vilma Bautista. Bautista is also Mrs. Marcos's personal secretary in New York and a staff member for the Philippines U.N. delegation. She denies knowing anything about the condominiums. "There are so many names, there are so many numbers," she told us. "This could be another Vilma Bautista."

Other prominent Filipino government officials also often employed surrogates or offshore corporations for their overseas investments. Defense Minister Juan Ponce Enrile and his wife, for example, purchased a $1.8 million mansion in San Francisco through a company called Renatsac Inc., which is Enrile's wife's maiden name spelled backward. Enrile claims the mansion "was bought by a company and has been sold. We—my wife—was acting for someone. I won't tell you who it was. It's since been sold." Geronimo Velasco, Marcos's energy minister, occasionally resides at a $925,000 estate in a suburb of San Francisco, whose registered owner is a Hong Kong company called Decision Research Management Ltd.

Businessmen intimate with Marcos rely on the same methods. Antonio Floirendo is the banana baron of Philippines. His business has thrived since Marcos came to power in 1972. Floirendo is also a director of Ancor Holdings. N.V. Floirendo's own properties in the United States include three sugar refineries in Boston, Chicago, and Brooklyn, for which he paid $11.7 million, according to U.S. Securities Exchange Commission documents. He owns a one-million-dollar mansion in the Makaki Heights area of Honolulu and maintains a residence in the same Fifth Avenue apartment building where the three condominiums linked to Mrs. Marcos are located. A company called United Motors is listed as the owner of the condominium; Philippine records shows that United Motors & Equipment is owned by Floirendo. Jose Y. Campos, a businessman said to be a close financial adviser to Marcos, used a firm called UNAM Investment Corp., registered in the Netherlands Antilles, to buy nine million dollars in property in downtown Seattle.

In other cases, real estate is held in the name of trusted American lawyers or agents. "I 'own' more goddamn property," said one American lawyer in San Francisco who has invested for prominent Filipinos for 15 years. "Tomorrow, if I wanted, I could sell $50 million worth of real property, get the money, and abscond. I could go to Rio and just say, 'Bye-bye, baby.' I just wouldn't, 'cause they trust me."

Capital flight from the Philippines surged shortly after the assassination of opposition leader Benigno S. Aquino Jr. in 1983, according to a special study last year by the Northern California Interfaith Committee on Corporate Responsibility in San Francisco. The study found, "Out of fear of political and economic turbulence, over a billion dollars left the Philippines" in three months after the Aquino assassination. Marcos has issued a decree making it illegal for Filipinos to export large sums of cash or hold foreign exchange accounts without approval from the nation's Central Bank. But even Philippine government officials acknowledge deficiencies in the laws, which do not forbid overseas investments per se.

In fact, U.S. real estate agents relate instances in which their Filipino clients have plopped shopping bags stuffed with cash on their desks, no questions asked, to be used for investment in property. "It is illegal, and every once in a while, there'll be fines and confiscations," said the San Francisco lawyer who represents Filipinos and who insisted on anonymity. "But if the Philippine government really did anything about this, they'd be indicting all their own officials. They're the biggest offenders."

In the view of the opposition, extravagant foreign purchases compound the injustice of a regime that has favored a loyal few at the expense of millions of others. As reports of corruption proliferated between 1971 and 1979, the Philippines' large income-distribution gap widened even further. According to a study released last year by economists at the University of the Philippines, the poorest 60 percent of the households, which had received only 25 percent of total income in 1971, saw their share drop to 22.5 percent in 1979. The richest ten percent of the population, on the other hand, increased their share of total income to 41.7 percent from 37.1 percent in the same period.

Capital flight has probably made matters worse. According to Verne Dickey, an economist at the State Department, some Philippine factories have laid off workers or closed because there were no foreign currency reserves with which to buy raw materials and spare parts. U.S. Ambassador Stephen Bosworth relayed official American concern over the problem at a news conference in Manila in August 1984. Citing a leading Filipino economist's estimate that residents had removed more than ten billion dollars in recent years, Bosworth said, "Now, if even half of that would return to the Philippines for private investment, it would make a considerable difference here."

Some Filipino officials, including the Marcoses, denied that they owned any property in the United States. But the Marcos's statement added that the government's policy is to allow overseas investment: "So long as

the acquisitions are legal, nobody can question the owners' right to these properties."

Energy Minister Velasco also flatly denied owning any property abroad, although his nephew Patrick de Borja told us that the Woodside mansion is a "family house," and that Velasco stays there when he is in the area. Soon after the *Mercury News* series was published, Velasco offered to resign, but was reportedly persuaded to stay on by Marcos.

Defense Minister Enrile said that the propriety of U.S. investment "depends on the magnitude of money." In the past Enrile and his wife have owned three San Francisco properties, and Enrile acknowledged currently owning one condominium there. "If the holdings are of such a magnitude as billions of dollars, I'd say it would be just to get it out of the Philippines and I'd agree that it was harmful. But when I acquired mine, the economy of the Philippines was not what it is today. It was stable and strong," he said.

One Filipino leader who spoke freely was Nemesio I. Yabut, mayor of Makati, the financial district of Manila. A former policeman and cargo handler, Yabut has served as mayor of Makati since 1971 and is a strong supporter of Marcos. He comes to the Bay Area twice a year for medical checkups at Stanford University Medical Center.

Early one evening in May, Yabut answered the door of his $520,000 pink-stucco home in San Francisco's exclusive St. Francis Woods in pajamas and a bathrobe, and agreed to discuss his properties. He confirmed real estate records indicating he has owned, over the past few years, not only the two-story home, in his wife's name, but a $900,000 apartment building, at least two condominiums, and a San Francisco seafood restaurant called the Old Clam House. "But I'm only a lowly mayor," Yabut said. "I have very little money. . . . I'm small-fry."

Yabut confessed that he worried about publicity concerning his U.S. holdings, most of which have been in his own name, but insisted he had done nothing illegal. Although he has taken money out of the Philippines, he said, he also has brought money back. Nor, he said, has he illegally traded currency or neglected to pay U.S. taxes. "I remember the story of Al Capone," he said. "Al Capone was never convicted of anything but tax evasion."

U.S. real estate investments by Marcos' inner circle are merely the "tip of the iceberg," according to a senior executive with one of the largest banks in the Philippines. "You're not seeing the securities, the Swiss bank vaults," he said in an interview in Manila. "The important thing is, it's unlikely that any of this money will return to the Philippines when transition is complete and we have stability. When their patron saint [Marcos] goes, most of them will go overseas to stay; most of them already hold green cards. These people have not bought U.S. real estate as a financial investment; it's for their retirement when they can no longer stay in the Philippines."—PETE CAREY, KATHERINE ELLISON, AND LEWIS M. SIMONS

[From the San Jose Mercury News, a reprint of a series of articles published June 23-25, 1985]

HIDDEN BILLIONS—THE DRAINING OF THE PHILIPPINES

HIGHLIGHTS OF THIS SERIES

As much as $30 billion has left the Philippines since the 1950s. Millions of dollars have been used for investment in the United States.

The Philippines' top political and business leaders, including President Ferdinand E. Marcos and his wife, Imelda, participate in this capital flight.

Many of the investments are cloaked in secrecy, and principals use offshore corporations or surrogates to hide their ownership.

Key American conduits frequently are used to facilitate transactions or represent Filipino investors.

Banks are favored places for investment by Filipinos.

Overseas investment is not limited to top associates of President Marcos. Many mid-level businessmen and politicians participate.

Some Filipino investments have run into legal or financial troubles.

U.S. officials worry that continued capital flight could lead to further unrest in the Philippines and eventually lead to a government takeover by the communists.

Reaction in the Philippines is swift: Marcos orders an investigation, while the opposition prepares an impeachment resolution.

ANALYSTS FEAR EXPORT OF DOLLARS FUELS PHILIPPINE REBEL INSURGENCY

(By Lewis M. Simons)

MANILA, PHILIPPINES.—The Philippine economy has been gouged so deeply and for so long that most people here have grown apathetic about the practice they call "dollar-salting."

To the man and woman on the street, reports that their impoverished nation's political and business leaders are sending billions of dollars abroad to establish nest eggs are met with acceptance.

"I guess it's one of the main advantages of being in power," Afredo San Angelo, an unemployed electrician, said in a conversation that was typical of several held in the Metro Manila area. "Why else be in power if you can't enrich yourself and your family?"

SECURITY THREATENED

But there is less apathy among a number of Filipino and Western experts, who say that the flow of funds out of the country—estimated as high as $30 billion since the 1950s—has done enormous damage to the economy of the country and threatens its security.

The Philippines now is plagued by an increasingly challenging communist insurgency. To some analysts, the connection between the drainage of dollars and the rising tide of guerrilla war is not coincidental.

"There is not the slightest doubt that the mind-boggling manipulation of the economy by less than 1 percent of the population has created fertile ground for the communists' appeal among the 99 percent who are have-nots," said a Western diplomat here.

The spreading insurgency is of grave concern to the United States, which views it as a direct threat to its vital military bases in the Philippines—bases that most U.S. officers believe are irreplaceable in the Pacific.

Western diplomats in Manila and political opponents of the Marcos regime trace a direct line from peasants exploited by those with wealth and power in such traditional Philippine economic fields as sugar and logging to the spreading insurgency.

"The exploitation of the vast underclass by the handful of rich with political and military connections—the very people who are investing huge fortunes overseas—must be viewed as a fundamental contributing factor to the insurgency," a Western economic analyst said.

A senior Filipino corporate executive put it this way: "The poor have lost all hope. They're ripe for anything that offers change. The insurgency is a direct reflection of the maldistribution of wealth, and the salting of dollars overseas is but one example of how horribly twisted things are.

"Unfortunately, we have no one to blame but ourselves. We've slept too long, lulled by a corrupt judiciary and a shackled press. I don't know if we're waking up yet. But, even if we are, it may be too late."

Defense Minister Juan Ponce Enrile dismisses such claims.

"Drainage of dollars out of the country has not been raised as an issue by opponents of the regime," Enrile said. "We cannot yet say whether or not this supposed drain contributes in any way to the rising strength of the communists."

According to a number of political and economic analysts, the system of sending money out of the country revolves around President Ferdinand E. Marcos and his wife, Imelda, herself a powerful force in the national government.

In the 20 years of their rule, the Marcoses, these analysts allege, have surrounded themselves with a coterie of Cabinet ministers and business people who have amassed huge fortunes through privileges and favors granted them by the first couple.

VISIBLE WEALTH

In Manila, their stunning wealth is seen in vast mansions, superb art collections, huge staffs of servants, fleets of imported cars and private aircraft. Hedging against the day when all this falls apart, these same people also invest their wealth in the United States and elsewhere.

In return for their gain, the privileged few have contributed to the Marcoses' own personal fortunes as well as their political war chests.

"The main characteristic distinguishing the Marcos years from other periods in our economic history has been the trend towards the concentration of power in the hands of the government, and the use of governmental functions to dispense economic privileges to some small factions in the private sector," stated a controversial report published last year by the University of the Philippines.

So common and widespread has capital flight become, particularly in the past few years, that, President Marcos last year appointed a commission headed by Trade and Industry Mininster Roberto V. Ongpin to investigate the dollar-salting.

The commission has reported that an estimated $1 billion was drained out of the Philippines in 1983 and about $2 billion last year. But because Marcos and his so-called cronies are widely believed to profit most from the system, few Filipinos have confidence that the commission's net will catch any big fish.

SMALL OPERATORS

"The commission was appointed by the president, and it will concentrate only on small operators," said a consultant to one of the country's leading banks. "To expect otherwise would be silly self-deception."

Beyond the presidential commission, several of Marcos' opponents have mounted their own investigations into overseas investments by the regime.

STEPS TO PANEL

Opposition member of parliament Eva Kalaw has taken preliminary steps toward forming a panel similar to the one that probed the August 1983 assassination of former Sen. Benigno S. Aquino Jr.

The political trauma triggered by the Aquino killing heightened the torrent of dollars and altered the character of overseas investments.

"Ever since the 1950s, dollars would ebb and flow in and out of the Philippines," said an internationally respected Manila banker. "But, after the assassination, the money has stayed overseas and there's little or no hope that it will ever return."

OPPOSITION QUIETLY TRACKS TRANSACTIONS LEAVING COUNTRY

(By Katherine Ellison and Pete Carey)

NEW YORK.—They compile files with fervor, trade rumors and hoard rare facts, swear each other to secrecy and wait for the day they know will come: the day that President Ferdinand E. Marcos no longer is in power.

Among anti-Marcos activists in the United States, there is a self-appointed group of investigators dedicated to tracking foreign investments by those they call the "cronies"—the powerful political and financial allies of the Philippine president.

Most boast intimate knowledge of the well-concealed business transactions. Several show a clear desire to be thought of as the most in the know. But for now, almost all of the activists are holding their cards close to their vests, claiming that the time isn't ripe for revelations.

"We are keeping tabs on everybody," said New York tax attorney Pompeyo Realuyo, 51, a Filipino who claims he has "worldwide contacts" and files full of details on bank accounts and real estate held by wealthy Filipinos. "But I don't want to let the cat out of the bag. No way I'll give it to anyone, not even Uncle Sam."

Realuyo said the purpose of his search, which he claims has lasted more than a decade, is twofold:

"One—the recovery of the stolen wealth that has driven the Philippines to penury. And, two—the punishment of those malefactors. But until we know who will be in power—and unless he is absolutely untainted—it would do no good to let it out."

Realuyo hopes for the day when a new government with no ties to Marcos comes to power. Then, he said, he will file suit on behalf of his homeland to seize the overseas assets of Marcos and his wealthy associates.

In the meantime, the investigating goes on, with a passion mixing patriotic indignation and competitive zeal.

Marcos' allies "have been drumming around," Realuyo said, "trying to find out what has Pompeo got. They know I am the only guy capable of getting hold of these things."

On the opposite side of the country, however, San Francisco anti-Marcos activist Steve Psinakis is equally sure of the value of his information.

"I have a lot of documentation," said the 54-year-old Greek-born businessman. "Verified official documentation from insiders . . . taped interviews, personal notes kept on microfilms in bank vaults.

"A lot of people are doing the same thing. In my case, of course, I feel I have the most valuable information."

Psinakis began his anti-Marcos activities after his marriage to Presy Lopez, whose wealthy and prominent Manila family for years has been locked in economic rivalry with the president and his first lady, Imelda.

Psinakis said his information includes not only business dealings of Marcos' allies, but details of "corruption, crimes and murders and tortures," Like Realuyo, however, Psinakis insists that release of his findings must be properly timed.

"For now, if this information got out, it would identify those who gave it, including people in the Philippines," he said. "If I had a file disappear, I'd be dead."

Also in San Francisco 69-year-old Juan G. Frivaldo describes himself as the "boss" of a half-dozen part-time Bay Area probers into Philippine foreign investment. Governor for 18 years of the Sorsogon province in the Philippines, Frivaldo now lives in self-imposed exile, teaching humanities at San Francisco City College.

"As soon as martial law is kicked out," Frivaldo once wrote of the "cronies" in an article, "those smugglers and hoarders will have to be rounded up and explain to the people how they suddenly acquired that wealth."

Psinakis, Frivaldo and Realuyo have legions of comrades. In Los Angeles; Washington; San Antonio, Texas; and even De Funiak Springs, Fla., Philippine exiles say they are filling notebooks with bits of rumor and fact about the "crony" purchases.

"Any right-thinking Filipino would do something similar," said Buddy Gomez, a Philippine corporate executive-turned-opositionist now living in De Funiak Springs. "All those people are enemies of the Philippine republic. We have to know who they are and what they've stolen. We have to hope there'll be a way someday to try to convince them at least to give some of it back."

[From *Newsweek*, Aug. 19, 1985]

MARCOS'S NEW GAMBLE—IN A BID TO UPSTAGE AN IMPEACHMENT MOTION, THE FILIPINO LEADER MAY CALL SNAP ELECTIONS

Day after day, hundreds of Filipinos filed into a high-rise building in Manila's business district last week. They came to see an exhibit—featuring a blood-splattered, bullet-proof vest—in memory of Philippine opposition leader Benigno Aquino, who was murdered two years ago this month. But many also came to visit the seventh-floor office of "Ninoy's" widow, Corazon Aquino. Their aim: to urge Mrs. Aquino to run for president if Ferdinand Marcos makes good on his threat to call snap elections later this year. No one knew for sure whether Marcos was serious, or whether he was just bluffing out of anger over a new parliamentary move to impeach him. But the election talk had his political rivals scrambling—and his allies from Manila to Washington wondering whether he could salvage his battered regime.

Marcos would have some strong reasons for moving up the presidential contest, which is currently scheduled for 1987. This week opposition leaders are expected to introduce an impeachment motion charging Marcos with misallocation government funds and allowing shady foreign investments by top officials, including his wife, Imelda (NEWSWEEK, July 29). Marcos brushed off the charges, and the resolution doesn't have much of a chance. But it could prove embarrassing—and a quick election would upstage it. Marcos's advisers are eager for a vote before a new round of inflation and a fresh devaluation of the peso add to the nation's economic crisis, and before the divided opposition has a chance to regroup. Marcos's health is also uncertain—he suffers from kidney ailments—and he may want to fill the vacant post of vice president with a handpicked successor while he is still able.

According to sources in Manila, Marcos was also responding to heavy pressure from the Reagan administration. These sources said that when CIA Director William Casey visited Manila last May, he pushed hard for early elections. In a long, testy meeting, Casey reportedly told Marcos that the country's economic mess and the rise of the communist New People's Army (page 34) had left foreign investors with "fear in their hearts." A new mandate, he argued, might help restore the faith of U.S. officials and congressmen. In Washington, however, a senior State Department official denied that Washington had pressed for an early election. The official also responded guardedly to the prospect, saying only that he hoped any ballot would be "reasonably clean by Philippine standards."

Marcos may have been planning an early vote for some time. Last month he appointed a hometown friend to head the Commission on Elections, a supposedly independent body that supervises polling. He also named three new members to the commission, all of whom are described by opposition sources as "rabid partisans" of Marco's New Society Movement (KBL). Marcos recommended that local village leaders—most of whom support the KBL—serve as election inspectors. More ominously, he removed accreditation from the National Citizens Movement for Free Elections, a volunteer poll-watching group that helped prevent shady balloting during parliamentary elections last year.

If Marcos does call an election, everyone will watch his choice of a running mate. One of the most talked about candidates is Deputy Prime Minister José Rono, a longtime Marcos ally. During a luncheon recently, U.S. Ambassador Stephen Bosworth interrogated opposition figures about Rono's credentials. Another possibility is Eduardo Cojuangco Jr., one of the country's most powerful businessmen. Also a tested Marcos loyalist, Cojuangco could be expected to protect the president's family if he does. There is also inevitable speculation about Imelda Marcos, whose frequent denials of political ambition only fuel public suspicion that she hopes to succeed her husband. Most analysts agree, however, that an Imelda candidacy is a long shot.

Marcos may have been holding back in part because under the Philippine Constitution he can't call an election while he is still president. To get around that obstacle, he might turn over his office to a caretaker president—by law, the speaker of the National Assembly, Nicanor Yniguez. He also might try to call a plebiscite, or ask the Assembly to pass a constitutional amendment allowing him to rule and run at the same time. Palace sources said Marcos would want the opposition to support such an amendment—and even propose it. But opposition leaders aren't likely to comply.

"Either he resigns or there will be no takers," said Assemblyman Homobono Adaza. "We won't play with the dice loaded in his favor."

DIVIDED OPPOSITION

On the opposition side, an umbrella group called the National Unification Committee (NUC) met last week to discuss election strategy. But Marcos' rivals are far from united, and ideological differences and personal rivalries could prevent them from

forming a single ticket. The front runner is Salvador Laurel, head of an eight-party group called the United Nationalist Democratic Organization, which has already nominated him for President. But others think that former Sen. Jovito Salonga has more credibility. Many more believe that Corazon Aquino is the only figure who can unite the opposition and mount a serious challenge. However, Mrs. Aquino has said she would prefer that the opposition choose another candidate.

With the prospect of an election looming, opposition leaders were eager to move forward on impeachment. Their motion includes evidence, gathered by the San Jose Mercury News, of "hidden [Marcos] wealth" in the United States. A draft of the resolution charges that Marcos violated the Constitution in naming Banjamin Romualdez, Imelda's brother, as ambassador to the United States. (Elected officials, like Romualdez, are barred from holding appointed positions, except in the cabinet. It also accuses him of diverting government funds for unauthorized purposes; among other things, it says he used money intended for flood control and drainage projects to finance Manila's film center and the publication of books about Marcos. The ruling party has labeled the charges "frivolous."

Nonetheless, when the resolution is introduced in the assembly this week, at least 57 assemblymen are expected to endorse it. "Once we file the resolution," predicted Adaza, "Marcos will consider it total war." The KBL is expected to try to kill the measure while it is still in committee. And with two-thirds of the assembly's 200 members needed to pass, it has little chance of success.

The election talk drew attention away from some embarrassing developments in the Aquino trial. Last month, several U.S. Air Force officers told the San Francisco Examiner that on the day Aquino was shot, two Philippine F-5 fighter jets tried unsuccessfully to intercept his China Air Lines plane and divert it to the Basa Air Base northeast of Manila. According to this report, Philippine Air Force officers seized radar scopes and other equipment at a joint U.S.-Philippines air defense center in Manila and at the U.S. Wallace Air Station north of the city. If true, the report would be doubly damning. It would contradict the military's assertion that it did not know which plane Auqino was flying on. It would also suggest either that some officers wanted to do something to Aquino at Basa—or that another group had uncovered the plot against him and was trying to foil it.

At first Philippine Air Force commander Maj. Gen. Vicente Piccio dismissed the report as "a sensationalized barracks story." Two weeks ago, however, Bosworth sent the foreign ministry a copy of a Wallace Air Station logbook entry. According to the entry, Philippine officers did tell U.S. personnel that they had orders to "scramble and have RPC 1964 (aircraft inbound from Hong Kong) land at Basa AB whether or not that is their intention. (Aquino)." At this point Piccio confirmed the scramble but said it was only "routine." He also charged that Aquino's name had been added later, in a different handwriting. U.S. Embassy officials confirmed that that was apparently true, but they did not explain the discrepancy. They also refused to explain why they had waited so long to release the entry or why they hadn't released more of the logbook.

Barring an unforeseen development, it now seems likely that Armed Forces Chief of Staff Gen. Fabian Ver will be acquitted on charges of covering up the Aquino plot. Last June the special Sandiganbayan court voted to exclude testimony given by Ver and seven other officers during the Agrava inquiry. The Philippine Supreme Court is now reviewing that decision but is expected to uphold it. The ruling would deprive the prosecution of the heart of its case and would set the stage for a Ver acquittal. Marcos has promised to give Ver his job back if he is exonerated—and that, in turn, is sure to upset Washington. "If Ver is reinstated as chief of staff," one senior White House official said last week, "here in Washington it will be construed as a step away from reform."

DIVERSIONARY TACTIC

With so many other problems besetting Marcos, many Filipinos continued to speculate that he might be using the election promises simply as a diversionary tactic. Others suggested that he might call a vote, but demand in exchange that Washington stop pressuring him for other political and military reforms. Still others predicted that he would use the need for a secure ballot as an excuse to impose a new state of emergency. "There's a 50-50 chance that Marcos might declare martial law," said Laurel.

For both Marcos and his allies, however, the dangers of reneging on reform are enormous. Two weeks ago 3,000 protesters held a funeral march for a teen-ager killed in a clash between government troops and Manila squatters. This week students will take to the streets in protests that will climax on Aug. 21, the anniversary of Aquino's death. Marcos may hope to avert a new eruption of protest by playing the election card. But if he doesn't play it carefully, opposition to his strongman rule can only intensify.

[From the New York Times, Aug. 14, 1985]

MARCOS ALLIES BAR IMPEACHMENT BILL—PARLIAMENTARY PANEL REJECTS AN OPPOSITION MOTION ON GRAFT AND CORRUPTION

(By Steve Lohr)

MANILA, August 13.—An attempt to impeach President Ferdinand E. Marcos was defeated tonight when a parliamentary committee rejected an opposition motion charging him with graft and corruption, violating the Constitution and other "high crimes."

The resolution, signed by 56 of the 57 opposition members of the National Assembly, was the first formal impeachment action filed against a Philippine President.

The Committee on Justice, Human Rights, and Good Government rejected the measure, saying it lacked merit. Sixteen of the panel's 25 members belong to the ruling New Society Movement.

The impeachment measure had been referred to the committee by the Assembly, in which the ruling party has a 2-to-1 majority.

GOES BACK TO ASSEMBLY

The committee met in an unusual evening session that lasted late into the night. The resolution and the committee report will now go back to the full Assembly for formal rejection.

Luis Villafuerte, an opposition member of the Assembly, said the opposition would appeal to the Supreme Court.

Before the committee vote, Homobono Adaza, a member of the opposition, said, "If this motion is overruled, it will not be by the merits of the case, but by the tyranny of numbers."

The ruling party also filed its own resolution today, signed by 109 of 183 Assembly members, describing the impeachment effort as "nothing more than a product of unsubstantiated news reports, irresponsible speculations and gossips and baseless conclusions motivated by petty partisan intentions."

The impeachment motion was viewed by political commentators here as an embarrassment to President Marcos and as another attack on his Government's credibility. The move also appeared to increase the chance that Mr. Marcos will call a presidential election this year, well ahead of the next scheduled vote in 1987.

Two weeks ago, President Marcos announced he was "seriously considering" calling early elections. Since then, senior Government officials have said the impeachment resolution raised doubts about the Government, undermining efforts at economic recovery and the fight against a growing Communist insurgency.

"The filing of this impeachment motion should increase the likelihood of an early election," said Blas Ople, a Cabinet minister.

REASON FOR ELECTIONS

Government officials contend a snap election may be needed to clear the political air and re-establish the President's mandate.

The impeachment complaint charged President Marcos with "taking undue advantage of his office and his authoritarian powers" to enrich himself, family members and close associates. It called on the Assembly to charge, try, convict and remove Mr. Marcos from the presidency and to ban him from holding public office for life.

Among the abuses of power, the complaint charged, were the creation of commodity marketing monopolies, which the President "placed in the hands of trusted cronies," and the confiscation of the businesses of political opponents.

The resulting "ill-gotten wealth," the complaint said, was taken out of the country, often in violation of Philippine foreign exchange laws, and invested overseas, especially in the United States.

A DOZEN PROPERTIES LISTED

The complaint listed a dozen properties that, the opposition says, are owned by the Marcos family, either directly or by proxies. The property list was a mixture of previous allegations and new ones. The Government has denied that President Marcos and his wife, Imelda, have any sizable investments outside the Philippines.

The complaint charged, for example, that in 1981, Mrs. Marcos bought the Crown Building in Manhattan, an office tower on Fifth Avenue and 57th Street, valued at $51 million under the name of a Netherlands Antilles holding company, Lastura N.V. Later the compliant states, the property was transferred to another holding company owned by Mrs. Marcos, the Canadian Land Company.

Also in 1981, the complaint said, Mrs. Marcos bought property on Long Island known as the Lindenmere Estate.

Among other properties, the complaint said, Mrs. Marcos owns a six story townhouse in Manhattan at 13 East 66th Street, a $104 million highrise commercial building at Seventh Avenue and 57th Street, an $18 million mansion in London and a $20 million estate in Rome. In some cases, the document said, close friends of the Marcos family made the purchases on her behalf.

The purported violations of the Philippine Constitution included the naming of Benjamin T. Romualdez, Mrs. Marcos's brother, as Ambassador to the United States in May 1982, while he was also serving as the Governor of Leyte. Mr. Romualdez still holds both posts.

The Constitution says that "unless otherwise provided by law, no elective official shall be eligible for appointment to any office or position during his tenure except as member of the Cabinet."

A Government spokesman said Mr. Romualdez could legally hold both positions because President Marcos issued an executive order allowing it.

Like other senior Government officials, Jose Rono, Deputy Prime Minister, was sharply critical of the impeachment motion, describing it as "merely political propaganda."

EFFORT TO IMPEACH MARCOS QUASHED

(By William Branigin)

MANILA, August 13—Opposition legislators formally called for the impeachment of Philippine President Ferdinand Marcos today on corruption charges principally connected to his family's alleged acquisition of overseas property said to be worth more than $400 million.

Members of Marcos' ruling party quickly killed the impeachment effort in an extraordinary parliamentary committee session tonight and filed a counterresolution amid signs of great distress over the issue in government ranks.

Today's submission marked the first time that a legal impeachment resolution and supporting "verified complaint" have been filed against any Philippine president.

While the governing party succeeded in bottling the resolution up in a committee and then killing it after opposition members walked out, senior government officials said the impeachment resolution increased the likelihood that Marcos will call an early presidential election to seek a new mandate before his current six-year term expires in 1987.

The impeachment measure expanded on a draft resolution distributed by opposition legislators on July 22, when Marcos opened the current parliamentary session. The legislators stopped short of formally filing the initial resolution then in favor of gathering further documentary evidence against Marcos and collecting more signatures.

The resolution, signed by 56 members of the 200-seat National Assembly, accused Marcos of "graft and corruption, culpable violation of the constitution, gross violation of his oath of office and other high crimes."

An accompanying complaint charged that during his 20 years in power, Marcos has enriched himself, members of his family, high ranking government officials and trusted "cronies" through use of his "authoritarian powers." It said much of this "ill-gotten wealth" was channeled into investments overseas in violation of Philippine foreign-exchange laws.

The complaint listed 17 properties in the United States and Europe allegedly owned or controlled by Marcos and his wife, Imelda.

A presidential spokesman denied that Marcos owned any of the properties and said that none of the overseas investments mentioned were in his name. But he declined to comment on a number of properties that the impeachment complaint said were owned or controlled by Imelda Marcos.

Members of Marcos' New Society Movement party immediately filed a counterresolution, sponsored by 109 assembly members, condemning the impeachment move as "nothing more than a product of unsubstantiated news reports, irresponsible speculations and gossips and baseless conclusions motivated by petty partisan intentions."

[From the Journal of Commerce, July 24, 1985]

ANTI-MARCOS ACTIVISTS TRACK FOREIGN VENTURES

NEW YORK.—They compile files with fervor, trade rumors and board rare facts, swear each other to secrecy and wait for the day they know will come: the day that President Ferdinand E. Marcos no longer is in power.

Among anti-Marcos activists in the United States, there is a self-appointed group of investigators dedicated to tracking foreign investments by those they call the "cronies"—the powerful political and financial allies of the Philippine president.

Most boast intimate knowledge of the well-concealed business transactions. Several show a clear desire to be thought of as the most in the know.

But for now, almost all of the activists are holding their cards close to their vests, claiming that the time isn't ripe for revelations.

"We are keeping tabs on everybody," said New York tax attorney Pompeo Realuyo, 51, a Filipino who claims he has "worldwide contacts" and files full of details on bank accounts and real estate held by wealthy Filipinos.

"But I don't want to let the cat out of the bag. No way I'll give it to anyone, not even Uncle Sam."

Mr. Realuyo said the purpose of his search, which he claims has lasted more than a decade, is twofold:

"One—the recovery of the stolen wealth that has driven the Philippines to penury. And, two—the punishment of those malefactors. But until we know who will be in power—and unless he is absolutely untrained—it would do no good to let it out."

Mr. Realuyo hopes for the day when a new government with no ties to Mr. Marcos comes to power. Then, he said, he will file suit on behalf of his homeland to seize the overseas assets of Mr. Marcos and his wealthy associates.

In the meantime, the investigation goes on, with a passion mixing patriotic indignation and competitive zeal.

Mr. Marcos' allies "have been drumming around," Mr. Realuyo said, "trying to find out what has Pompeo got. They know I am the only guy capable of getting hold of these things."

On the opposite side of the country, however, San Francisco anti-Marcos activist Steve Psinakis is equally sure of the value of his information.

"I have a lot of documentation," said the 54-year-old Greek-born businesman. "Verified official documentation from insiders . . . taped interviews, personal notes kept on microfilms in bank vaults.

"A lot of people are doing the same thing. In my case, of course, I feel I have the most valuable information."

Mr. Psinakis began his anti-Marcos activities after his marriage to Presy Lopez, whose wealthy and prominent Manila family for years has been locked in economic rivalry with the president and his first lady, Imelda.

He said his information includes not only business dealings of Mr. Marcos' allies, but also details of "corruption, crimes and murders and tortures."

Like Mr. Realuyo, however, Mr. Psinakis insists that release of his findings must be properly timed.

"For now, if this information got out, it would identify those who gave it, including people in the Philippines," he said. "If I had a file disappear, I'd be dead."

Also in San Francisco, 69-year-old Juan G. Frivaldo describes himself as the "boss" of a half-dozen, part-time San Francisco Bay area probers into Philippine foreign investment.

Governor for 18 years of the Sorsogon province in the Philippines, Mr. Frivaldo now lives in self-imposed exile, teaching humanities at San Francisco's City College.

"Soon as martial law is kicked out," Mr. Frivaldo once wrote of the "cronies" in an article, "those smugglers and hoarders will have to be rounded up and explain to the people how they suddenly acquired that wealth."

Mr. Psinakis, Mr. Frivaldo and Mr. Realuyo have legions of comrades. In Los Angeles; Washington, D.C.; San Antonio, Texas; and even De Funiak Springs, Fla., Philippine exiles say they are filling notebooks with bits of rumor and fact about the "crony" purchases.

"Any right-thinking Filipino would do something similar," said Buddy Gomez, a Philippine corporate executive-turned-opositionist now living in De Funiak Springs.

"All those people are enemies of the Philippine republic. We have to know who they are and what they've stolen. We have to hope there'll be a way someday to try to convince them at least to give some of it back."

CRITICS CALL IMELDA MARCOS "MATERIAL GIRL"

MANILA.—Filipinos, long known as a tolerant people, seen to be running out of patience with the extravagant life-styles of their leaders.

President Ferdinand Marcos, his wife, Imelda, and their friends and associates known as "the cronies" have been accused repeatedly of lavish spending, conspicious consumption and monumental waste during two decades in power.

A series of financial scandals of late has renewed the attack.

The latest reports by American newspapers of massive private investments in the United States have raised an unexpected public outcry, with opposition calls for Marcos' resignation and demands for an independent investigation.

Even before the outcry this month, there were signs that the threshold of tolerance for profligate spending was being reached. A $27 billion foreign debt has imposed severe austerity measures, and as much as 70 percent of the population lives below the poverty line. Displaced workers in the slumping sugar industry face widespread malnutrition.

Much of the criticism has revolved around Imelda Marcos, 56, who goes by the title of "First Lady" and is constantly referred to in newspaper headlines here as "FL."

In one of the more sarcastic commentaries about her lately, a picketer protesting the overseas investments held up a placard reading: "Imelda—the fierce lady. The origi-

nal material girl," a reference to a hit song by Madonna.

In May, Imelda Marcos aroused considerable public indignation when she proclaimed herself the "godmother" of newly appointed Philippine Cardinal Ricardo Vidal and led 85 nuns and priests, plus a private retinue of 38, on a pilgrimage to Rome for Vidal's investiture.

With great fanfare, Imelda Marcos and her party boarded a commercial Philippine Airlines flight to Dhahran, Saudi Arabia. There, Manila newspapers reported later, they quietly took a special Boeing 747 to fly to Rome in style. Once in the Italian capital, she had a 20-piece orchestra and a dance troupe flown in to give private performances during a lunch and dinner, insiders said.

Imelda Marcos' foreign travels long have been popular with those accompanying her, especially flight crews, to whom she has doled out thousands of dollars in tips, said a former member of her entourage. "Besides," he added, "you can smuggle anything you want."

For the priests and nuns who went on Imelda Marcos' pilgrimage, "the great temptation . . . was to get a 'free ride' to that Mecca of all Roman Catholics, the eternal city of Rome," wrote columnist Max Soliven. "The trouble is, the Filipino taxpayers will be eternally paying for that trip."

Imelda Marcos returned just in time to orchestrate last month's independence day festivities, marked by the first major military parade in the capital since the 1950s.

But even that backfired when, the day before the June 12 celebrations, an unannounced dress rehearsal organized by Imelda Marcos clogged major city arteries with tanks and troops, snarling traffic for hours and provoking a barrage of public complaints.

Opposition leaders gathered at a weekly coffee-shop meeting in a luxury hotel nearly panicked at the prospect that the show of force was a military coup, and a fuming Prime Minister Cesar Virata had to get out of his car and walk to his office.

It took publication in the American press of charges of massive overseas investments to crank up what opposition commentators proclaimed as the most serious financial scandal to hit the Marcos administration. According to an investigation by a Knight-Ridder team, prominent Filipinos including the Marcoses, their friends and government officials have siphoned tens of millions of dollars from this cash-poor country to the United States, often through mysterious holding companies.

After two weeks of silence, President Marcos last week asked his justice minister, Estelito Mendoza, to investigate the allegations of "unexplained wealth" leveled against public and private figures and to "spare no one," Mendoza sent letters to 10 government officials and businessmen and the owners of a private firm asking them whether they owned the properties cited in the news reports and, if so, to explain the acquisitions.

The recipients included Defense Minister Juan Ponce Enrile, Energy Minister Geronimo Velasco, Ambassadors Eduardo Cojuangco Jr. and Roberto Benedicto, Philippine Airlines President Roman Cruz Jr., businessmen Antonio Floirendo, Herminio Disini, Rodolfo Cuenca and Jose Campos and the owners of Ayala International Corp.

Cojuangco, Benedicto and Floirendo, who are known here as cronies of the president, are big in the coconut, sugar and banana industries.

Conspicuously absent from the list were the Marcoses themselves, who had figured most prominently in the allegations.

Concerned that the investigation would be squelched, 14 national business, legal and church associations published a full-page newspaper advertisement calling for a "full and public investigation of these reported overseas investments through an independent panel" and not an "alter ego of the president."

The issue also spawned a new opposition group in this country, where the first order of business for any fledgling organization seems to be to choose a snappy acronym. So it is that protest groups such as ROAR (Run on for Aquino and Resignation, a joggers' movement), WOMB (a women's group), MAD and ATOM have burst onto the scene. The new group is called the Anti-Cronyism Movement, and for short—it had to happen—"ACRONYM."

Imelda Marcos brushes aside charges of indulging in frivolity and opulence. "People say I'm extravagant because I want to be surrounded by beauty," she was quoted as telling the San Francisco Examiner. "But tell me, who wants to be surrounded by garbage?"—WILLIAM BRANIGIN.

FILIPINOS ANGERED BY REPORT OF LEADERS' FOREIGN INVESTMENTS—SCANDAL ELICITS CALLS FOR MARCOS'S IMPEACHMENT

(By Marites Danguilan-Vitug)

MANILA.—The government of President Ferdinand Marcos faces a deepening crisis of confidence following a news exposé on the investments of top Philippine officials in the United States. The investments reportedly total $100 million.

The San Jose (California) Mercury News reported last month that President Marcos, his wife, Imelda, and some of their friends including Cabinet ministers and businessmen have acquired large real estate holdings in the U.S. "draining vast amounts of wealth from their nation and hiding it overseas."

The Philippines is experiencing its worst economic crisis ever. The report that prominent Filipino politicians and businessmen are investing heavily abroad when there is such a financial crunch here has many people up in arms. Public anger is mounting, and some people have taken to the streets to protest. There have been repreated calls for Mr. Marcos to resign.

Following publication of the report, Marcos ordered Justice Minister Estelito Mendoza to conduct a probe and to "spare on one." However, some doubt the investigation will lead anywhere.

Jaime Ongpin, a local businessman, says, "Marcos can assume full control of the investigation. The justice [minister] can delay action on it; he may not even act on it [the order] at all."

Among those named in the San Jose Mercury News report as top investors in the U.S. are Defense Minister Juan Ponce Enrile, Energy Minister Geronimo Velasco, Philippine Air Lines president Roman Cruz, coconut king Eduardo Cojuangco Jr., banana magnate Antonio Floreindo, sugar baron Roberto S. Benedicto, and businessmen Jose Campos and Rodolfo Cuenca. All are said to be close to the President. Most of them have kept quiet about the report.

Mr. Enrile has admitted owning a condominium in San Francisco but denies owning other properties as reported by the Mercury News.

Mr. Velasco sent Marcos a letter of resignation saying the expose "cast doubt" on his integrity as a government official. Marcos refused to accept the resignation.

The strongest reaction came from Mr. Floreindo, who threatened to file a $1.9 million libel suit against any local newspapers writing about or reprinting the three part Mercury News story.

Some here say Floreindo's move must have been instigated by Marcos. One former Cabinet minister said privately. "He [Floreindo] will not do this without the blessing of the President."

Many observers say Floreindo's move will not accomplish much as most of the damage has been done. A source from the President's Malacanang Palace said, "We do not expect to win. We just had to stop the damage at some point."

Some members of Marcos's party admit the foreign-investment issue "spells trouble" and may diminish the party's chances for victory in local elections in 1986 and the presidential polls in 1987.

But Labor Minister Blas Ople disputes this. While he admits that overseas investments by top government officials are no longer rumor but a documented fact, he says, "The issue has not yet crystallized in the provinces. . . . It may not affect our chances at the polls.

Opponents of Marcos are using the report for all the political mileage they can. Salvador Laurel, an opposition leader and presidential candidate, called the reported $100-million investments in the U.S. only the "tip of the iceberg."

Political parties have issued statements of outrage. Some opposition members of the National Assembly have started a compaign to collect a million signatures for a petition calling for the President's resignation. One has made a resolution urging a full investigation of the scandal by the National Assembly. Others have called for Marcos's impeachment and for a vote of no confidence against Prime Minister and Finance Minister César Virata.

All these may be futile steps. The assembly is dominated by Marcos's Movement for a New Society.

Businessmen and civic groups are clamoring for the establishment of an independent probe. Professionals and businessmen have started picketing residences and offices of some of the top investors to protest what they call the "shameless plunder" of the country.

PROPERTY AND PROPRIETY—A U.S. NEWSPAPER REPORT ALLEGING MAJOR INVESTMENTS ABROAD CAUSES A STORM, WITH ONE MINISTER OFFERING TO RESIGN

(By Jose Galang in Manila)

The Philippine Government faces a new political storm spawned by reports of big property holdings and investments overseas by prominent government and business personalities, including some people close to President Ferdinand Marcos.

So far, Marcos has been able to avert a major setback by persuading one minister to take back his offered resignation that was prompted by the controversy. But adverse reaction, particularly from members of the political opposition, continues to build up, with calls for the impeachment or resignation of Marcos.

The turmoil was sparked by a lengthy report in a California newspaper about al-

leged "millions of dollars" poured by certain prominent Filipinos into property and business in the US over the past 10 years. Those named in the *San Jose Mercury-News* report included members of the cabinet and businessmen with known ties to Marcos.

The report drew wide attention in Manila when local newspapers started quoting extensively from it. One vocal opposition-oriented daily, *Malaya*, reprinted the three-part series, carrying it as its lead story for three days.

The general public reaction was critical, especially in view of the fact that the country's economy was going through various difficulties and the government was securing foreign credits in increasing amounts—some of which was used to bail out corporations run by so-called cronies of the president—during the period these alleged investments were supposedly made.

The government has chosen to remain silent about the report, almost ignoring it entirely, but there was no hiding the fact that Energy Minister Geronimo Velasco offered to resign. Although describing the report as "a rehash of old gossip designed for obvious political ends," Velasco nonetheless felt that "my usefulness to your [Marcos'] government and to our people has been adversely eroded, the truth and clear conscience notwithstanding."

After "several" meetings with Marcos, Velasco on 5 July agreed to abide by the president's decision not to accept the resignation. With that out of the way, the administration proceeded to seek various ways to stop the rot. Sources said lawyers' opinions are being sought by most of those named in the reports. At least one libel action has been filed against *Malaya* and others against that and other publications may follow.

Opposition groups are expected to table a resolution calling for the impeachment of Marcos and a vote of no-confidence in Prime Minister Cesar Virata when the National Assembly opens a new regular session on 22 July.

Given the two-thirds majority of Marcos' ruling Kilusang Bagong Lipunan party, however, both moves have virtually no chance of success.

Another opposition move is a campaign for the collection of "a million signatures" for a petition asking Marcos to resign.

The US report is not the only thing worrying the government, however, with a potentially damaging situation on another front in the form of the unrelated resignation on 6 July of Labour Minister Blas Ople from the newly organised Presidential Council for National Economic Recovery.

The council, composed of seven cabinet ministers headed by Virata, was formed to devise measures to meet export targets without disruptions caused by labour strikes. In the first three months of 1985, there were a total of 130 strikes that involved 23,270 workers and resulted in the loss of 626,900 man-days.

But Ople disagreed with the council's preoccupation with industrial unrest as the key obstacle to recovery. The economic managers, he said, should turn their attention to boosting confidence and lowering interest rates "that would release new economic dynamism."

[From the Washington Post, July 17, 1985]

FORMER FILIPINO OFFICIAL CHARGED WITH BRIBERY—COLUMNIST DERIDES USE OF "SMOKESCREEN"

(By William Branigin)

MANILA, July 16—The government of President Ferdinand Marcos today arrested a former information minister-turned-critic on corruption charges. Opposition figures said it was a move aimed at deflecting allegations of massive transfers of money abroad by the Marcos family and political supporters.

Francisco S. Tatad, an information minister under Marcos in the 1970s and now a leading newspaper columnist and president of a small opposition party, was arrested at his home today and briefly detained before posting $1,277 bail. The charges were related to offenses allegedly committed as long as 12 years ago.

The complaints were filed with a government special prosecutor in 1980, shortly after Tatad left Marcos's Cabinet in a dispute over regional politics. There was no official explanation for the five-year delay in proceeding with indictments.

Tatad rejected the charges as false and said in a written statement: "This is character assassination of the worst kind. It is political persecution pure and simple. It is not I, but they whose enormous wealth at home and abroad cannot be explained who should be criminally prosecuted for graft and corruption, economic sabotage and other high crimes."

In an interview shortly before his arrest, Tatad said Marcos was trying to "create a smokescreen" to divert attention from charges that the Marcos family, top government officials and presidential friends have made huge investments in property in the United States, often through mysterious holding companies.

In a series of articles written by a team of reporters for The San Jose Mercury News and distributed by the Knight-Ridder News Service, Filipino political and business leaders were said to be "systematically draining vast amounts of wealth from their nation and hiding it overseas."

The series did not give details of specific illegal transactions but described a shady system in which Filipino investors used holding companies based in Hong Kong, the Caribbean and other places to transfer millions of dollars possibly in violation of Philippine foreign exchange regulations.

The articles said the money was used to purchase real estate, office buildings, banks and businesses in the United States. The series also listed U.S. holdings traced to Marcos' wife, Imelda, government ministers and presidential cronies.

According to a lawsuit filed in March 1984 by Pablo E. Figueros, a former business partner of Imelda Marcos, she has invested heavily in New York real estate through agents and nominees, the series said.

In a statement here, the Marcoses denied owning any property in the United States.

The articles, coming at a time of major economic difficulties in the Philippines, caused an uproar among opposition politicians, who seized on the charges to renew demands for Marcos' resignation.

"Dollar salting," as the practice of transferring money abroad is known here, has long been a sore point. But it is particularly sensitive when a majority of Filipinos are living below the poverty level.

In response to the charges, Marcos last week ordered his justice minister, Estelito Mendoza, to investigate immediately the alleged overseas investments of "public officials and private individuals" and to "spare no one."

Marcos added, however, that the allegations were "apparently based on innuendoes, rumors and gossip."

Information Minister Gregorio Cendana indicated that the Marcoses would not be included in the investigation, since they had already denied having property abroad.

Opposition commentators predicted the investigation would lead nowhere, except possibly to cases against Marcos' opponents and opposition-leaning businessmen. They pointed out that, in any event, Marcos enjoys lifetime immunity from suits under legal provisions enacted when he ruled the country under martial law from 1972 to 1981.

"A whitewash and a farce cannot be avoided," Tatad said in his column published yesterday in the independent Manila daily, Business Day.

Tatad added that "the Marcos regime has lost the moral authority to govern" and that it "has become instead a major cause of the growth of the Communist-led insurgency" being waged in most Philippine provinces by the New People's Army guerrilla organization.

Tatad, who as Marcos' chief spokesman announced the declaration of martial law in 1972, last week called on the 67-year-old president to resign in the wake of U.S. investment charges.

On Friday, Tatad was indicted on five counts of corruption, alleging: failure to file financial disclosure statements for three years when he was in the Marcos Cabinet; receipt of a bribe in 1973 of 125,000 pesos ($6,944 at the present exchange rate) for a government contract, and transferal of ministry funds to a private company headed by his brother-in-law in 1975.

[From the San Jose Mercury News]

MARCOS, TOP ASSOCIATES STASH PERSONAL FORTUNES OVERSEAS

(By Pete Carey, Katherine Ellison and Lewis M. Simons)

As the Philippines sinks deeper into a quagmire of poverty, foreign debt and political unrest, many of its most prominent citizens are systematically draining vast amounts of wealth from their nation and hiding it overseas.

These political and business leaders—who more than any other group hold sway over the Philippines' economic destiny—have poured their personal fortunes into offshore havens such as the United States, a Mercury News investigation has found.

Of the billions of dollars that U.S. and Filipino analysts agree have left the Philippines in the past 20 years, tens of millions have come to the United States, often concealed by holding companies registered in Hong Kong or Curacao. The money has been used to buy condominiums, homes, office buildings, businesses and banks, some of them in Woodside, Hillsborough, San Francisco and elsewhere in the Bay Area.

"If only these people kept their money here and reinvested it in productive enterprises, our problems would be a lot more manageable," said a Filipino senior executive of a multinational oil company operating in the Philippines. "Let's face it, this country has been ruined by the greed of a few people, and what makes me sad is, we can't say enough is enough. We can't seem to bring ourselves to stop them. We're

broke. Where's the money? There's no accountability. It's sickening."

That the rich and powerful in the Philippines, including President Ferdinand E. Marcos and some of his closest associates, have profited from their positions of leadership or ties with the government has been widely reported in Philippine and U.S. studies.

But there is "special outrage," noted a 1984 U.S. Senate committee report, "that the country's leadership, having acquired immense personal fortunes, has reportedly removed badly needed capital permanently from the Philippines economy. People feel doubly robbed."

Several of the top Filipino business and political leaders whose U.S. links were examined in the Mercury News investigation either downplayed the importance of their investments or denied owning overseas property. Others declined to be interviewed or did not respond to written questions submitted to their offices.

The extent of the capital flight is causing increasing concern among U.S. officials. They worry that the faltering Philippine economy could help topple the Marcos government, which plays host to key U.S. military bases.

"Everybody in the (U.S.) government is worried," said Richard Kessler, a specialist on the Philippines with the Carnegie Endowment for International Peace in Washington. "As a crisis, the Philippines is their No. 1 concern. The people that I've talked to say that in comparison, Central America is just a sideshow."

At the forefront of overseas investment, the Mercury News has found, are Marcos and his wife, Imelda. Like many Filipinos who have invested overseas, the Marcoses use holding corporations or business associates to handle their transactions. The complex system makes it difficult to trace ownership or relationships between businesses involved in the investments.

But a March 1984 lawsuit not previously reported in the media has for the first time shed light on millions of dollars of real estate investments in the United States by the Philippines' first family. The suit, filed by a former business partner of Mrs. Marcos, alleges that she "does business in New York state systematically and continuously" and that her activities include "extensive real estate purchasing, improving, developing and managing."

New York investor Pablo E. Figueroa further charges in the suit that she uses agents and nominees "to keep hidden her personal . . . involvement" in the transactions.

Filed in Suffolk, County, Long Island, Figueroa's suit alleges that Mrs. Marcos and several partners, using a Curacao corporation called Ancor Holdings N.V., in 1981 bought an estate on several acres of suburban Long Island property known as Lindenmere, planning to expand it into a $19 million resort.

But Mrs. Marcos abandoned those plans and converted Lindenmere to a private estate, the suit says. In the process, Figueroa claims, she failed to pay him $1 million she had promised as his share in the deal. Attorneys for both Mrs. Marcos and Figueroa refused to comment on the suit.

There also is evidence of other Marcos properties. According to real estate records, Mrs. Marcos' personal secretary in New York is the agent for a Hong Kong corporation that owns three adjoining Manhattan condominiums. And a home in Princeton, N.J., is owned by an offshore corporation that is represented by the same law firm that represents Ancor Holdings. Police officials in the New Jersey town said the home is used by Marcos family members.

The U.S. investments or economic links of eight other prominent Filipino government and business leaders were examined by the Mercury News: Defense Minister Juan Ponce Enrile, Energy Minister Geronimo Velasco, coconut and brewery magnate Eduardo Cojuangco, industrialist Rodolfo Cuenca, banker Roberto Benedicto, airline executive Roman Cruz, businessman Jose Campos and banana baron Antonio Floirendo.

In many cases, surrogates or offshore corporations were used to execute transactions, making it difficult to ascertain the originators of the investments.

Defense Minister Enrile and his wife, for example, purchased property in San Francisco through a company called Renatsac Inc., which is Enrile's wife's maiden name spelled backward. Campos, through an investment company registered in the Netherlands Antilles, bought $9 million in property in downtown Seattle. In other cases, real estate is held in the name of trusted American lawyers or agents.

"I 'own' more goddamn property," said one American lawyer in San Francisco who has invested for prominent Filipinos for 15 years. "Tomorrow, if I wanted, I could sell $50 million worth of real property, get the money and abscond. I could go to Rio and just say, 'Bye-bye, baby.' I just wouldn't 'cause they trust me."

As a result of the use of surrogates or holding companies, U.S. administration and congressional officials who have tried to gather data on investments from the Philippines have come up empty-handed. John Maisto, the State Department's director for Philippine affairs, said he recently tried to collect investment information at the request of Rep. Stephen Solarz, D-New York, a persistent critic of Marcos.

"We found it very difficult as we checked through the U.S. government to find anything that was readily available, without calling together a task force," Maisto said.

Even the most knowledgeable observers can offer only rough estimates of how much money has left the country.

"While it's almost impossible to estimate an accurate figure on the flow of cash abroad, it's possible that it's been about $30 billion since the 1950s," said Jesus P. Estanislao with the Center for Research and Communication, a privately funded think tank in the Philippines. "But there's been a great surge since 1979, when it became clear to Filipinos and foreigners that our finances were in grave danger."

At a Manila news conference last August, U.S. Ambassador Stephen Bosworth relayed official American concern over the problem when he cited a leading Filipino economist's estimate that residents had removed more than $10 billion in recent years.

"Now, if even half of that would return to the Philippines for private investment, it would make a considerable difference here," Bosworth said.

Philippine officials interviewed by the Mercury News offered varied explanations for or denials of their overseas holdings.

"It depends on the magnitude of money," said Enrile, who with his wife has owned three San Francisco properties and who acknowedged currently owning one condominium in San Francisco. "If the holdings are of such a magnitude as billions of dollars, I'd say it would be just to get it out of the Philippines and I'd agree that it was harmful. But when I acquired mine, the economy of the Philippines was not what it is today. It was stable and strong."

Energy Minister Velasco flatly denied owning any property abroad, although his nephew, Patrick de Borja, told the Mercury News that a mansion in Woodside owned by a holding company linked to Velasco is a "family house" and that Velasco stays there when he is in the area.

The Marcoses, in a statement from Manila, denied owning any property in the United States. The statement added that the government's policy on overseas investment is that "so long as the acquisitions are legal, nobody can question the owners' right to these properties."

A spokesman for the Philippine consulate in San Francisco, Prudencia Europa, complained that the Marcoses always are blamed when the issue of capital flight arises.

"I know some friends of the president who own property here," Europa said, "and then the critics say this property is owned by Marcos, and then it's owned by Cuenca, for instance."

Capital flight surged shortly after the assassination of opposition leader Benigno S. Aquino Jr. in 1983, becoming "epidemic in proportion," according to a special study last year by the Northern California Interfaith Committee on Corporate Responsibility in San Francisco. "Out of fear of political and economic turbulence, over a billion dollars left the Philippines," the study said.

Marcos apparently tried to stem the flow in the early 1970s and again in 1983 with decrees that made it illegal for Filipinos to export large sums of cash or hold foreign exchange accounts without approval from the nation's Central Bank.

But even Philippine government officials acknowledge deficiencies in the laws, which do not forbid overseas investments per se. It would be hopeless, the officials say, to try to catch each unauthorized dollar as it flows from the country.

"Somehow, some way, dollars are taken out," said Felipe Sarmiento, the commercial attache at the Philippine consulate in San Francisco. "But you can't police everybody 24 hours a day. You cannot track them."

In fact, U.S. real estate agents relate instances in which their Filipino clients have plopped shopping bags stuffed with cash on their desks, no questions asked, to be used for investment in property.

"It is illegal, and every once in a while, there'll be fines and confiscations," said the San Franciscan lawyer who represents Filipinos and who insisted on anonymity. "But if the Philippine government really did anything about this, they'd be indicting all their own officials. They're the biggest offenders."

Commercial attache Sarmiento said it would even be possible for top government officials to carry cash out of the country in their suitcases, if they wished, because they are immune from routine airport searches. Sarmiento said that Defense Minister Enrile, for example, might easily pass through airport security by virtue of his position.

"They may not only not search him," Sarmiento said, "they may salute him."

There are, of course, more subtle ways to export currency than stuffing it in suitcases. In a series of interviews, attorneys, brokers and Philippine officials detailed what all described as well-established and

often used ways of circumventing the islands' exchange-control laws.

Transactions occur in an air heavy with intrigue. Brokers tell of late-night phone calls from Manila, of secret instructions to send secret papers to secret destinations.

Offshore corporations help get the dollars off the islands and to make purchases abroad. Filipino investors frequently have used corporations based in the Netherlands Antilles, particularly Curacao, which have offered tax advantages for buying and selling real estate.

Other corporations have been based in New Hebrides, Panama, the Cayman Islands, the British Virgin Islands, Hong Kong and even Liberia. Most combine some sort of tax benefit with the equally precious commodity of anonymity.

The desire for secrecy is hardly unwarranted. Overseas investing is a hot political issue in the Philippines, and some opposition leaders abroad have made it their bitter vocation to track foreign investment, particularly those by Marcos and his so-called "cronies."

In the opposition's eyes, extravagant foreign purchases compound the injustice of a regime that has favored a loyal few at the expense of millions of others.

While reports of graft and corruption proliferated, the Philippines' large income-distribution gap widened even further between 1971 and 1979, according to a June 1984 study by economists at the University of the Philippines.

The poorest 60 percent of households, which had received only 25 percent of total income in 1971, saw their share drop to 22.5 percent in 1979, the study said. The richest 10 percent of the population, on the other hand, increased their share of total income to 41.7 percent from 37.1 percent in the same period.

Capital flight, many experts believe, has made matters worse. Some Philippine factories have closed or laid off workers because there were no foreign currency reserves with which to buy raw materials and spare parts, according to Verne Dickey, an economist of the State Department.

William Sullivan, a former U.S. ambassador to both the Philippines and Iran, noted that the Philippine economy is in even worse condition than the economy of Iran was in before the shah fell.

"In the case of Iran, capital flight took place against a background of enormous foreign-exchange earnings from oil," Sullivan said. "But the Philippines can earn damn little. Every main commodity they have (to export) has gone flat. . . . In due course, you get down to the absence of necessities. In the Philippines, for instance, you have to import all the wheat flour."

Nonetheless, reports continue of enormous bank accounts and extravagant overseas purchases by wealthy Filipinos.

And as a senior executive with one of the largest banks in the Philippines put it, U.S. real estate investments by Marcos' inner circle are merely the "tip of the iceberg."

"You're not seeing the securities, the Swiss bank vaults," he said in an interview in Manila. "The important thing is, it's unlikely that any of this money will return to the Philippines when transition is complete and we have stability.

"When their patron saint (Marcos) goes, most of them will go overseas to stay; most of them already hold green cards. These people have not bought U.S. real estate as a financial investment; it's for their retirement when they can no longer stay in the Philippines."

THE MARCOSES

Ferdinand & Imelda Marcos.

Ages 67, 55.

Background and occupations, Marcos has been head of state since 1965. His wife, Imelda, was a Filipino beauty queen. She is active in government and finance.

U.S. links: Imelda Marcos has invested heavily in New York real estate, according to a lawsuit against her by one of her former partners. One holding listed in the suit is an estate known as Lindenmere in Center Moriches, N.Y., purchased in 1980. The estate is held in the name of a Netherlands Antilles corporation, Ancor Holdings N.V. The suit said Ancor is "controlled" by Mrs. Marcos. A home on 13 acres at 3850 Princeton Pike, Princeton, N.J., is used by the Marcos family, according to local police. The home is owned by Faylin Ltd., an offshore corporation represented by the New York law firm of Bernstein, Carter & Deyo, which also represents Ancor Holdings. Real estate records also show that Mrs. Marcos' personal secretary in New York, Vilma H. Bautista, is the authorized agent for a Hong Kong corporation that owns three adjoining condominiums at 641 5th Ave. in New York City. Bautista, a staff member of the Philippine U.N. delegation, denied knowledge of the condominiums, although she was reached at a phone number listed on real-estate records for the units. "There are so many names, there are so many phone numbers," she said. "This could be another Vilma Bautista." The Marcoses deny they own property in the United States.

ROBERTO S. BENEDICTO

Age: 68.

Background and occupation: Banking and sugar were the cornerstones of Benedicto's rapid rise after President Marcos declared martial law in 1972. A close personal friend and former fraternity brother of Marcos. Benedicto owns several banks in the Philippines and once headed the government-owned Philippines National Bank, which finances sugar operations for the Philippine government.

U.S. links: California-Overseas Bank in Los Angeles, with total assets of $133 million, is principally owned by Benedicto. The bank owns real estate worth $7 million, some of it foreclosures on bad loans and some of it bank property, according the the California Superintendent of Banks. More than $30 million in capital has been infused by the bank's owners since it opened in 1976. The bank owns two office buildings in Beverly Hills. The buildings, at 9145 Wilshire Boulevard, were purchased for $3.7 million in 1981, according to Los Angeles County real estate records. A major Philippine newsmagazine, Mr. & Ms., reported Feb. 22 that Benedicto recently bought an unidentified for $63 million, paid in cash. Benedicto did not respond to request for an interview.

ANTONIO O. FLOIRENDO

Age: 70.

Background and occupation: From his start as an obscure Ford dealer on the island of Mindanao, Floirendo rose to become a major banana plantation owner. In 1977, he branched from bananas to sugar. That year, he paid $11.7 million for three refineries—in Boston, Chicago and Brooklyn, N.Y.—that belonged to Sucrest Corp., according to U.S. Securities Exchange Commission documents. Floirendo re-named the company that was thus formed Revere Sugar Corp.

U.S. links: Assets of the Boston sugar refinery were listed in bankruptcy filings at $4.2 million. Assets of the Brooklyn refinery were valued at $16.1 million. Floirendo also is director of Ancor Holdings N.V., identified in a New York law suit as a holding company for property owned by Imelda Marcos. Floirendo also owns a $1 million Mansion in Makaki Heights, Honolulu. According to reports in the Honolulu Advertiser, Floirendo paid $800,000 cash in 1980 and signed a note for the remaining $200,000. Floirendo has a New York address at 641 Fifth Ave., where a company called United Motors is listed as the owner of a condominium. Philippine records show United Motors & Equipment is owned by Floirendo. An employee of Floirendo in the Philippines confirmed that Floirendo owns Revere sugar as an "investment." He said he does not think Floirendo owns a condominium at 641 Fifth Ave., but that "In Honolulu, I understand a couple of years ago he bought a house there."

GERONIMO Z. VELASCO

Age: 58.

Background and occupation: Minister of Energy for eight years, Velasco is the Philippines' energy czar. Trained as a mechanical engineer, Velasco has had no formal education in management. As former president of Dole Philippines, Velasco was the first Filipino to head a major multinational company in the country.

U.S. links: Velasco has been linked to a mansion at 140 Farm Road in Woodside that was purchased in 1979 for $925,000, though he denies he owns it. It technically is owned by Decision Research Management Ltd., a Hong Kong corporation that also bought a condominium in Century Hill in Los Angeles in 1982, assessed in 1984 for $561,000. A senior executive of a multinational oil company in the Philippines said Velasco told him he bought the Woodside home under a Dole executive plan. Alfred De Borja, Velasco's nephew, executed a $675,000 promissory note on the property in 1979. According to a Western diplomatic source in Manila, De Borja manages all of Velasco's offshore funds. De Borja's brother, Patrick, lives in the Woodside home and said the estate is "a family home" and that Velasco stays at the home when he visits the area. "I don't know anything about Decision Research Management Ltd.," Velasco said, "Alfredo de Borja is my nephew, but I don't know anything about his supposedly managing my supposed overseas properties."

EDUARDO COJUANGCO

Age: 50.

Background and occupation: The Philippines' "Coconut King" is one of the nation's wealthiest men. A longtime friend of President Marcos, Cojuangco until recently enjoyed a near-monopoly in the coconut industry. Chairman of the San Miguel Corp. brewery, he owns a multimillion dollar horse farm in Australia.

U.S. links: Cojuangco is former president of United Coconut Mills Inc. (Unicom) of Manila. Unicom, however, is still owned in part by the United Coconut Planters Bank, which Cojuangco controls in San Francisco. Unicom's subsidiary, Granex Corp. U.S.A., refines coconut oil at 1301 Army St. Another company, an import-export firm in Los Angeles, is described as belonging to Cojuangco by Rafael Fernando, a former executive for another Unicom subsidiary. The company, Coastal American Traders Inc., is partly owned by Helenita Soriano, Cojuangco's former personal secretary, who was unavailable for comment. Real estate records show Coastal American Traders owns a

house in Santa Monica valued at $220,000. In Beverly Hills, a jewelry store called Jewelmer International is a branch of a Cojuangco family corporation of the same name, based in Manila, according to Dorothy Reyes, manager of the Manila store. A spokesman for Cojuangco in Manila said, "My boss will not be able to tackle the questions you posed. He was too busy and is now preparing to travel to Barcelona with his San Miguel basketball team."

ROMAN "JUN" CRUZ

Age: 47.

Background and occupation: Cruz, president of Philippine Airlines, also heads the Government Service Insurance System. Harvard educated in public administration, he runs the airline and reports to Imelda Marcos, PAL chairwoman. In his early days, he was an economist for banks in Hong Kong and Manila, and he still is a banker. Cruz is chairman of Century Bank in Los Angeles, a branch of Philippine National Bank, which is owned by the Philippine government.

U.S. links: In 1979, Cruz purchased four lots in a vacation resort called Brooktrails Vacation Village, just outside Wiiits in Mendocino County, according to county real estate records. Their taxable value was $66,014. Cruz, through a spokesman, denied owning property in Mendocino County.

RODOLFO CUENCA

Age: 57.

Background and occupation: Cuenca's Construction and Development Corporation of the Philippines became the major public highway builder under the Marcos administration. He also founded CDCP International in Hong Kong and Galleon Shipping Co., a Philippine shipping line with a U.S. subsidiary, Trans-Asia Marine Corp.

U.S. links: Cuenca has owned several pieces of Bay Area real estate, including a condominium at 1177 California St. in San Francisco; a home at 131 Devonshire in San Francisco; and half-interest in a home at 2741 Berkshire Dr., San Bruno. He also owns a cooperative apartment at 700 Park Ave., in New York City, according to a lawsuit filed against the U.S. subsidiary of Cuenca's shipping firm. Cuenca has sold the Bay Area properties to a Delaware firm called TRA Equities Inc., whose president is Cuenca's attorney, Roger MacKenzie of the San Francisco law firm of Graham & James. Sources said TRA is a Cuenca company, but MacKenzie said he does not know if Cuenca is involved in the firm. TRA Equities bought two San Francisco office buildings, one at 625 Martet St. and its annex at 25 New Montgomery St., for $10.3 million in 1983. The annex later was sold. Cuenca still registered as the occupant of the TRA-owned condominium at 1177 California St. Cuenca's daughter, Marianne, lives at the 131 Devonshire home, according to relatives who were interviewed at the house. Cuenca did not respond to questions submittd to his office.

JUAN PONCE ENRILE

Age: 61

Background and occupation: Formely one of President Marcos' most intimate associates, the Harvard-educated attorney has been minister of defense for the past several years. He also has held an array of government posts, including secretary of finance, secretary of justice and acting chairman of the monetary board of the Central Bank.

U.S. links: Enrile acknowledges that he and his wife, Christina, purchased a condominium at 2190 Broadway in San Fransciso in 1979. Real estate records show the family has owned two condominiums in the same building, and sold one in 1982 to Renatsac Inc., a California corporation. Enrile acknowledged that Renatsac, which is the backward spelling of his wife's maiden name, is a company "my wife used" for business purposes. In 1982, Renatsac bought a house valued at $1.8 million at 2310 Broadway in San Francisco. Enrile claimed that "it was bought by a company and has been sold. We—my wife—was acting for someone. I won't tell you who it was. It's since been sold."

JOSE Y. CAMPOS

Age: 63.

Background and occupation: An ethnic Chinese said to be a close financial adviser to Philippines President Ferdinand E. Marcos, Campos is head of United Laboratories Inc., one of Asia's largest pharmaceutical firms and the largest distributor of drugs to the government's health ministry and all its public hospitals. Canadian records indicate Campos is president of Greenfield Investment Corp., based in Vancouver, British Columbia.

U.S. links: Campos is president of UNAM Investment Corp., registered in the Netherlands Antilles. In 1983, the firm purchased $9 million of buildings on a city block in downtown Seattle, according to Washington state real estate records. The buildings, which include low-income apartment houses, are bordered by Sixth and Seventh avenues and Pike and Pine streets. Real estate records show that Campos' wife, Elizabeth, owns a house in Vancouver, British Columbia, with a 1982 assessed value of $482,300. William Wright, a Vancouver attorney for UNAM Investment, declined to comment. Campos' secretary in Manila said Campos is "out of the country. I don't know where he is; I don't know what country he's in. He's been out of the country since April."

[From the San Jose Mercury News]

OFFSHORE HOLDINGS NOT LIMITED TO PROMINENT FILIPINO LEADERS

(By Katherine Ellison and Pete Carey)

Overseas investment by Filipinos is not limited to the 10 political and business leaders featured in this report. Others—including elected officials and businessmen and women—also have opted to buy American.

One of the Bay Area's most notable Filipino investors is Ricardo C. Silverio, who until a few years ago was ranked among President Ferdinand E. Marcos' closest associates. The Far Eastern Economic Review once called him "the star of crony capitalism" in the Philippines.

Silverio, who began as a small textile merchant, came into his fortune after he founded the Delta Motor Corporation in 1961 and won for it the exclusive rights to assemble and distribute Toyota cars and trucks in the Philippines. But Silverio's heyday ended in 1981, when a no-longer friendly Marcos seized the firm as partial repayment for government loans to the company.

WORKING AT NEW HEADQUARTERS

Of late, Silverio has been working at his new headquarters in Daly City, overseeing the development of a 105-acre housing and shopping project in Lancaster, in Los Angeles County.

Real estate records show Silverio bought more than half a million dollars worth of land in Lancaster in 1974. His Silcor corporation also owns a Hillsborough home purchased four years ago, with a total assessed value of nearly $850,000.

Silverio fell afoul of Marcos shortly after a reporter inquired if he had profited through his friendship with the president.

"I know President Marcos very well and deserve his support," Silverio was quoted as responding. The developer no longer grants interviews with the press and declined through spokesmen to respond to questions for this article.

Three San Francisco condominiums are linked to the family of Herminio Disini, 48, the cousin-in-law of first lady Imelda Marcos and an industrialist who at one time was one of President Marcos' closest associates. Through his giant Herdis Group, Disini then expanded into such fields as textiles, electronics and construction. In the late 1970s, however, Marcos ordered him to give up control of the three companies after he was accused of earning millions of dollars in commissions to build a nuclear power plant near Manila.

Disini now spends much of his time in Europe, but real estate records show that Herminio Disini Jr. owns a $348,340 Nob Hill condominium at 1177 California St. Two other condominiums at the same building are listed on real estate records as belonging to Asia Resources International, a California corporation. The mailing address listed on the condominium in Disini's name is Asia Resources International, which business sources say was Disini Sr.'s trading company. Daniel Sullivan, the registered president of Asia Resources in Menlo Park, was unavailable for comment.

Edna Guiyab Camcam, a Filipina businesswoman who now lives in the United States, owns a Los Angeles apartment building valued at more than $1 million purchased in 1980. Camcam, a former vice president of Equitable Banking Corp. in Manila, is said to be a close associate of Gen. Fabian Ver, who is on leave as army chief of staff. Real estate records show she owns a second property in Los Angeles, a four-plex building bought in 1979. In East Islip, N.Y., Camcam is the registered owner of a home purchased in 1978.

A women reached during repeated calls to an East Islip number for Camcam said the businesswoman was out of the country. She added that she was simply renting the property and did not know Camcam's whereabouts.

CONFIRMED HOLDINGS

Nemesio I. Yabut, mayor of the financial district of Manila, answered the door of this $520,000, pink stucco home in San Francisco's exclusive St. Francis Woods one recent evening in pajamas and a bathrobe. Yabut comes to the Bay Area twice a year for medical checkups at Stanford University Medical Center.

In the course of the next hour, he confirmed real estate records indicating he has owned, over the past few years, not only the two-story home, in his wife's name, but a $900,000 apartment building, at the least two condominiums and a San Francisco seafood restaurant called the Old Clam House.

"But I'm only a lowly mayor," Yabut said. "I have very little money. . . . I'm small fry."

STRONG MARCOS SUPPORTER

A former policeman and cargo handler, Yabut, 59, has been mayor of Makati for the past 14 years. He also is a strong supporter of Marcos, whom he backed financially in 1965.

Yabut said he worries about publicity of his U.S. holdings, most of which have been in his own name, but insisted he has done nothing illegal. While he has taken money out of the Philippines, Yabut said, he also has brought money back. Nor, he said, has he illegally traded currency or neglected to pay U.S. taxes.

"I remember the story of Al Capone," he said. "Al Capone was never convicted of anything but tax evasion."

[From the San Jose Mercury News]

SOME INVESTMENT DEALS HAVE GONE SOUR IN U.S.—LEGAL, FINANCIAL TROUBLES PLAGUE BUSINESS VENTURES

(By Pete Carey and Katherine Ellison)

Although investment by Filipinos in the United States is perfectly legal, a number of Philippine businesses formed in the United States by associates of President Ferdinand E. Marcos nonetheless have met with legal difficulties or prompted government probes in the past several years.

Three Silicon Valley companies became the subject of numerous Philippine Government investigations after they were purchased by Asian Reliability Corporation Inc., a Philippine Holding Company partly owned by the Philippine Ministry of Human settlements, which is run by Imelda Marcos.

At issue in the investigations in the use of a Philippine Government-guaranteed $25 million loan to buy the companies. The money was supposed to have been used for economic development inside the Philippines.

The three Silicon Valley firms, Interlek Inc. and Test International Inc. in San Jose and Tool & Die Master in Santa Clara, were bought by ARCI for about $14 million in 1981. ARCI is run by Vicente Chuidian, 42, a Hillsborough businessman.

According to sources at the company, who asked not to be identified, the purchase had government approval and President Ferdinand E. Marcos was to have put $9.5 million of his own money into the companies in exchange for half the stock, but Marcos later changed his mind.

Publicity about government-backed loans being used for overseas investment embarrassed the Marcos administration, and it ordered the Philippine Central Bank to deny official registrations of loans for ARCI to purchase the three firms. This caused a London-based banking firm that was providing financing to call in its loan, leaving Chuidian and the Marcos administration in a dispute over who is responsible for the debt. Chuidian calls the situation a "Harvard case study;' in what's wrong with the Phillippine economy.

"Marcos equated political power with economic power," Chuidian said. "Correspondingly, the vast machinery of his office operated under this reality. Policies were drawn, laws were enacted, organizations were created, relationships were rearranged, rights and obligations were regulated, always with this thought in mind that 'he who controls the coffers, controls the crown.' "

A Philippine sugar deal was investigated in 1977, when Sucrest Corp., a U.S. corporation, signed a contract to buy Philippine sugar and ultimately was bought out by its Philippine sugar broker, Antonio Floirendo.

The contract was investigated by the Federal Trade Commission because of an alleged agreement, between the Philippine government and Sucrest to sell sugar for a fixed profit over a 5-year period.

Sucrest auditors also investigated more than $1 million in brokerage fees received from Sucrest in 1977 by Marcos intimate Floirendo. Investigators said that while their access to Floirendo was "limited," no evidence was unearthed that showed that corporate funds were used for "illegal or questionable" payments.

The same year, Sucrest sold Floirendo its three U.S. refineries. He paid $11.7 million for the refineries and renamed the company Revere Sugar Corp. Floirendo could not be reached for comment.

In 1981, the U.S. Justice Department investigated alleged attempts by three Filipino-controlled firms in the Bay Area to form a cartel in coconut oil—a scheme then jokingly referred to as "Cocopec." The department's antitrust division alleged that the companies tried to raise and fix prices for the oil.

Defendant corporations in the federal suit were Pan Pacific Commodities, Granex U.S.A. and Crown Oil, all then associated with the Philippine United Coconut Planters Bank, controlled by Marcos intimate Eduardo Cojuangco. In an out-of-court settlement, each was ordered to end the alleged conspiracy.

In another case involving an industrialist close to Marcos, Trans-Asia Marine Corp., the U.S. subsidiary of Galleon Shipping Lines, was sued for $5.5 million in New York. The suit alleges that Philippine construction czar Rodolfo Cuenca, who owns the firms, pocketed $41.8 million through a scheme in which ships purchased by Galleon with loans from the Development Bank of the Philippines were vastly overpriced. The suit was filed by a former president of Trans-Asia Marine.

Cuenca's attorney, Michael J. Silverberg, and there is no merit to the lawsuit.

[From The San Jose Mercury News]

PHILIPPINES AT A GLANCE

Size and population: Only 400 of the nation's 7,000 islands are inhabited, and 95 percent of the country's 52 million people live on the 11 largest islands.

Religion: Eighty-four percent of the people are Roman Catholic, 9 percent are Protestant, 5 percent are Moslems.

Government: President Ferdinand E. Marcos was elected president in 1965, and declared marital law in 1972. He lifted marital law in 1981. Marcos backers dominate the National Assembly.

Economy: Gross national product ($39.2 billion in 1982) dropped by more that 5 percent in 1984. Vicinte Valepenas, economic planning minister, blamed much of the drop on shortage of dollars needed to import raw materials for industry. Per capita income in 1984 was $600. The 1984 inflation rate was about 50 percent, and the unemployment rate was estimated at 23 percent. As much as 80 percent of the population is said to be living below the poverty line. The average monthly wage for a laborer is $60. The nation's foreign debt is $26 billion.

ARTICLES SPARK MASSIVE PROTESTS, CALLS FOR MARCOS' IMPEACHMENT—JULY 12: MARCOS ORDERS INVESTMENTS PROBE

(By Lewis M. Simons)

TOKYO.—After three weeks of silence, Philippine President Ferdinand E. Marcos has responded to a firestorm of criticism by ordering an investigation of private investments by prominent Filipinos in the United States and other foreign countries.

Marcos' order to Justice Minister Estelito Mendoza to "spare no one" in the inquiry came in response to a series of articles in the Mercury News detailing millions of dollars worth of real estate and other overseas investments by Marcos, his wife, Imelda, and a number of government and business leaders.

The series, published in the Mercury News from June 23-25, has been widely reprinted or excerpted by the anti-government press in Manila, capital of the Philippines.

SURGE OF PROTEST

The result has been a surge of protest unlike any in the Philippines since the assassination of opposition leader Benigno S. Aquino in 1983.

Opposition members of Parliament are circulating open letters seeking to amass a million signatures calling for Marcos to resign. They also have called for a rally in the central city of Cebu on July 20 that will demand that Marcos step down.

On Thursday, a number of homes owned by those named in the articles were picketed by protesters.

OPPOSITION FOLLOW-UP

The parliamentary opposition also has dispatched one of its members to the United States to follow up on the Mercury News series, according to an informed source in Manila.

"The series detailed millions of dollars," the source said. "We're looking for billions."

Marcos' order for the investigation was carefully worded, directing that the inquiry focus on "ill-gotten, unexplained wealth or unlawfully transferred foreign exchange from the Philippines to other countries."

The Mecury News articles made no allegations of illegality, however. The stories did detail how many of the investments were made through the use of surrogates or offshore corporations. In a statement printed in the series, the Marcoses responded to the allegations by denying that they owned property overseas and saying that "so long as the acquisitions are legal, nobody can question the owners' right to these properties."

In an interview in the pro-government Daily Express after the announcement of the probe, Information Minister Gregorio Cendenna, when asked if the Marcoses would be included in the investigation, said, "If they have no property, how can they be included?"

By shifting the focus to legalisms, ordering Mendoza to investigate questions of exporters salting dollars abroad through fraudulent business practices, Marcos appeared to be attempting to take the heat off himself and his closest associates, according to critics.

"It's a red herring," former Sen. Jose W. Diokno, a longtime Marcos foe, said in a telephone interview from his home in Manila. "He's including so many other things, not just the assets made public by the San Jose Mecury News, because he wants to create counterpressure to halt the investigation."

According to Diokno, a leader of political forces striving to end Marcos' 20-year rule, the president was forced to respond to the press reports after attempting to wait them out.

"He thought it would die down, but it hasn't," he said. Nevertheless, Diokno has few expectations of an honest investigation.

"Nothing will happen," he predicted. "It will be another whitewash."

According to an article published in the anti-government weekly Mr. and Ms., a group of Filipino bankers and other top financial executives based in the United

States claims that many U.S. and Swiss banks holding deposits by prominent Filipinos are prepared to freeze them—pending the outcome of the investigation—if requested to do so by the Marcos regime."

The group, calling itself "Magdiwang (National Fervor) '83," said that rules of banking secrecy were not meant to hide illegal activities, according to the article. A spokesman for Magdiwang '83 in Manila, Antonio P. Gatmaitan, said that "a low of $16 billion to a high of $20 billion" is retrievable from these bank accounts.

Gatmaitan, a respected ex-banker and economist, said that a number of the banks involved are among the consortium of 485 U.S. and other foreign financial institutions to which the Philippine government owes $26.5 billion.

WARNING LETTER

The same issue of Mr. and Ms. carried a second installment of the Mercury News series. It also published a letter from businessman Antonio Floriendo, a close Marcos associate named in the series, warning the editors not to carry any more of the articles and to publish a retraction and an apology.

Floirendo has threatened to file a $10 million suit against another opposition newspaper, Malaya Free Press, which carried the full series last week. Checks with the public prosecutor revealed, however, that the suit still has not been filed.

OTHERS NAMED

Also named in the series were Defense Minister Juan Ponce Enrile; Energy Minister Geronimo Velasco; businessmen Eduardo Cojuangco, Jose Campos, Roberto Benedicto, Rodolofo Cuenca, Roman Cruz and Edna Camcam, a close associate of Armed Forces Chief Gen. Fabian Ver.

Velasco announced earlier this month that he would resign because his credibility was damaged by the series, but Marcos refused to accent the resignation and Velasco withdrew it.

Political observers in Manila have said that if Velasco had been permitted to resign, it might be viewed as an admission of wrongdoing by the entire government.

[From the San Jose Mercury News]

JULY 23: FOES PLAN IMPEACHMENT STRATEGY

(By Abby Tan)

MANILA, PHILIPPINES.—The Philippine opposition in Parliament has mapped out a three-stage strategy to impeach President Ferdinand E. Marcos in the wake of reports that he and several of his business and political associates hold large investments overseas, particularly in the United States.

At a caucus of 59 opposition members before Parliament opened its regular session Monday, the group decided first to summon Prime Minister and Finance Minister Cesar Virata and two other Cabinet ministers to face a "question hour" in which legislators can query government officials.

The other two Cabinet ministers, Defense Minister Juan Ponce Enrile and Energy Minister Geronimo Velasco, were among 10 prominent government and business leaders named in a Mercury News series last month that documented overseas investment by Filipinos. Holdings by Marcos and his wife, Imelda, also were cited in the series.

"We feel it will be more effective on a one-to-one basis" to begin the process with the question hour, explained opposition member Marcelo Fernan of Cebu. A date for the question sessions has yet to be set.

After the sessions, the opposition plans to file a resolution for an investigation into the holdings of non-Cabinet ministers named in the Mercury News series.

The impeachment resolution will then follow, Fernan said.

The resignation, which will be offered by Antonio Cuenco, another Cebu legislator, cites Marcos' alleged "culpable violation of the constitution and other laws, for gross negligence in the performance of his duties as chief executive in committing and abetting economic sabotage by members of his immediate and official families, other high-ranking government officials and business cronies through massive investments abroad causing untold sufferings to the Filipino people."

The resolution also states: "With vast powers at his command, not only has (Marcos) failed to prevent the systematic looting of the country's finances but on the contrary has permitted and abetted it, which can be deduced by the inclusion of his name and that of his first lady, Imelda Marcos at the head of the list of those identified by the San Jose Mercury News."

In his state of the nation address given as the parliamentary session opened, Marcos briefly mentioned the articles and reiterated his view that the series consisted of rumors, gossip and speculation. However, he ordered Philippine embassies abroad to document all overseas investments by Filipinos.

Marcos assured the nation that his government has turned the corner on its worst economic crisis since World War II and is winning the war against communist guerrillas.

In a nationally televised speech, Marcos called "most critical" the war with the New People's Army, or NPA, the rebel wing of the banned Communist Party of the Philippines.

But the 67-year-old leader dismissed claims that the 12,000-member guerrilla force was winning and contended that the Philippines could win even without foreign aid.

The NPA was "potent enough" to affect peace and order in only 4 percent of the nation's 41,615 villages and its political and military groups were operating in only 9 percent, Marcos said.

"The claim that our country is in danger of a takeover by the subversives has no basis in truth," he said. "The armed forces have taken the initiative and, as you can read in the media, the NPA are beginning to surrender in droves."

The speech was boycotted by some of the opposition assemblymen. Of the 180-member body, 145 members attended the address.

AUGUST 2: MARCOS THREATENS TO CALL ELECTIONS

(By Michael Zielenziger)

MANILA, PHILIPPINES—Philippine President Ferdinand E. Marcos, stung by a growing opposition movement to have him impeached, threatened late Thursday to dissolve Parliament and call new elections for later this year.

The surprise move, if carried out, could cut short opposition efforts to enter a bill of impeachment against the president and would shift attention from a growing controversy over allegations that Marcos and his official family have salted away millions of dollars in an extensive network of investments throughout the United States.

After a late-night caucus of Marcos' ruling party at the presidential palace, the government said in a statement that the possibility of a new election "within the year" had been "seriously discussed."

At the same time, the caucus also considered dissolving the Parliament, with the "distinct possibility" that legislative elections would be held after December, the statement said.

No final decision was made, however, pending indications from the opposition as to whether it would actually file a bill of impeachment including a "specified, verified complaint" against Marcos, the statement added.

The discussion of new elections comes after a series of articles in the Mercury News documented how prominent Filipino political and business leaders have systematically drained millions in assets from the island nation, investing the proceeds in homes and businesses in the United States.

There have since been calls for impeachment, a move Marcos seems eager to avoid even though his party controls enough parliamentary votes—at least 115 out of 183 in the body—to block the impeachment proceeding.

The government has maintained that the allegations in what has become known as the "hidden wealth" scandal are based on "rumors, gossip and speculation."

Marcos told the caucus that he would submit to an early election in order to fight "efforts at harassment and attempts to discredit the presidency." His efforts to build economic recovery and fight a growing communist insurgency might be hampered without a new mandate, he said.

Should Marcos seek an early election before the scheduled end of his term in May 1987, he would have to resign his office.

Under the constitution, the Parliament could be dissolved as early as December, 18 months after the May 1984 parliamentary election.

Homobono Adaza, an opposition member of Parliament, said that 53 signatures had already been obtained on the impeachment resolution, eight more than required, and that a revised impeachment document would be filed next week.

He said that although new elections would be an effort to thwart the impeachment effort, the parliamentary moves would continue.

But Adaza acknowledged that any dissolution of the Parliament would "nip in the bud" any impeachment effort.

"This is designed to frustrate our efforts to have any debate" on the impeachment bill, he said, noting that without a sitting Parliament, an impeachment hearing would be impossible.

Moreover, Adaza said the fact that Marcos is considering new elections stems directly from U.S. pressure on the president to acquire a new mandate in the face of renewed opposition. Adaza based this conclusion, he said, on discussions he had in Washington last week with middle-level officials at the State Department.

"I think Marcos is panicking," Adaza told United Press International. "He is under pressure from the United States to call an election. He is making all the excuses, but he has only himself to blame for all our problems."

Opposition leaders initially had said they would file impeachment papers today in the Parliament against Marcos, but then announced they would defer the matter a week so they could "refine" the document and add more substantive charges, including specific records and other documentation.

They also conceded that new elections would force into the background any discussion of the oveseas assets of the Marcos cabinet and friends, as the two sides jockeyed for electoral advantage.

Opposition leaders acknowledged also that a quick election would leave them at a distinct disadvantage because they have not yet undertaken extensive fund-raising and lack even agreement on whether they can unify behind a single candidate.

"I don't know what to say," opposition leader Jose Diokno told the Associated Press when asked for comment on the palace announcement. "I don't know of any dictator who has lost an election."

[From the San Jose Mercury News, June 27, 1985]

DRAINING THE PHILIPPINES

A communist insurgency is seeping through the Philippines. Should it succeed, and as in years past should the United States begin a chagrined debate over "who lost the Philippines," we need look only to the Philippines' leading citizens.

Ferdinand Marcos and his cronies have perverted the capitalist system in the Philippines to a rapaciousness that resembles a communist caricature of capitalism.

Not only do the Marcoses and leading businessmen enjoy near monopoly control of their industries, but by sequestering their money abroad, they have blocked their unearned wealth from eventually trickling down to benefit the mass of impoverished Filipinos.

As reporters Peter Carey, Katherine Ellison and Lewis M. Simons documented in a Mercury News series, billions of dollars have been taken out off the Philippines and invested around the world, often in the United States.

That wealth, had it been desposited in Philippine banks or invested in Philippine industry, could have provided at least some jobs for Filipinos and at least some support for the Philippine economy.

Instead, economists estimate that $30 billion has been invested overseas since 1950, perhaps $10 billion of that since 1979, when the instability of the Philippine economy became apparent.

While a tiny elite was siphoning the islands' riches, the majority fell deeper into poverty. During the '70s, the poorest 60 percent of the population saw its share of national income slip from 25 percent to 22.5 percent. Factories closed or laid off workers because they lacked the foreign currency to buy parts or raw materials.

The result? "There is not the slightest doubt that the mind-boggling manipulation of the economy by less than 1 percent of the population has created fertile ground for the communists' appeal among the 99 percent who are have-nots," a Western diplomat said.

It is not only spies who betray nations. Those who wring nations of wealth and discard them betray them just as surely.

[From the San Jose News, July 15, 1985]

TRANSFERRING THE WEALTH

In a series published June 23-25, Mercury News writers Peter Carey, Katherine Ellison and Lewis M. Simons reported that Philippine President Ferdinand Marcos had created a system in which politically connected businessmen make fortunes in government-run monopolies and transfer the money to overseas accounts and investments.

Some $10 billion reportedly has been invested overseas since 1979. By way of comparison, the entire GNP of the Philippines is less than $40 billion.

Those articles have brought on mass picketing at the homes of the principals, caused a Cabinet minister to offer his resignation and spawned a drive to obtain a million signatures on a petition for Marcos' resignation.

The people of the Philippines know from daily experience that Marcos runs an authoritarian government, rigging elections, suppressing opposition and controlling all power.

But when the Mercury News series was reprinted and excerpted in opposition papers around the country, Filipinos knew that more than their liberty was being taken.

What Simons called a "surge of protest unlike any in the Philippine since the assassination of opposition leader Benigno Aquino in 1983" has forced Marcos to open an investigation into the investments by his cronies.

Some Filipinos are protesting by leaving. With legal emigration to the United States reaching 35,000 a year, Filipino-Americans should overtake Chinese-Americans in the next five years as the largest Asian-American ethnic group. Filipino visa applications run as high as 1,000 each day.

When a newspaper article from 7,200 miles away can stir this kind of uproar, it must be tapping into deep popular discontent. Unless Marcos hold his cronies to a standard of responsibility in keeping with the privileges he has granted them, his political problems can only increase.

WEALTHY FILIPINOS FIND CALIFORNIA LUCRATIVE TERRITORY FOR INVESTMENT

(By Katherine Ellison and Pete Carey)

When rich and powerful Filipinos invest outside of their debt-ridden homeland, a favored haven for their wealth is California—and particularly the Bay Area—where they have poured millions of dollars into property and businesses in the past 10 years.

For local lawyers and real estate agents who deal with such high-powered Filipino clients, otherwise routine transactions often become filled with intrigue and suspense.

"They come over here with shopping bags full of money—real money," said Palo Alto real estate agent Carl Horvitz, whose clientele includes Filipino investors. "Sometimes it flows through the hands of their attorney or a trusted relative. Sometimes they drop it on my desk. And if a trustworthy relationship can be established, one could expect visits from friends."

The allure of Northern California comes from a combination of close cultural ties and keen interest in the area's hot real estate market.

As a first Pacific Ocean port of entry, San Francisco historically has had familial and financial links to the Philippines. Close to 120,000 Filipinos have settled throughout the Bay Area—including more than 27,000 in Santa Clara County—according to the 1980 U.S. Census. Countless others are frequent visitors.

Residents and visitors alike have brought their investment dollars. At least 25 properties in California are or have been owned in recent years by prominent Filipino government and business leaders, according to the findings of a Mercury News investigation. These include office buildings, homes, condominiums, vacation lots and bank buildings. Several other properties have been linked to prominent Filipinos, but ownership was difficult to ascertain because of the use of surrogates or offshore corporations to handle transactions.

In virtually all cases, Bay Area brokers and lawyers say, Filipinos seeking investments in the region are extremely affluent.

"Everyone who have investments here is in the million-dollar category—they go up from there," said one San Francisco attorney who has worked with wealthy Filipinos for more than a dozen years and who insisted on anonymity.

The attorney, one of several Bay Area lawyers who specialize in representing Filipino investors, pointed to an anteroom at his office where two bookshelves were crammed with boxes of files.

"There they are—all Filipino companies" he said, cheerfully.

Filipino land purchases in the area frequently are characterized by large down-payments and small mortgages, reflective of the desire to move large amounts of money out of the troubled islands and a worry that investors' cash-flow might suddenly dry up.

As an example, a San Francisco insurance agent offered the case of one of his clients, a Filipino physician, who recently bought a house for $550,000. The doctor put down $500,000 in cash, he said, and took out a $50,000 loan.

"It's just the opposite of what you and I would do," said the agent, who asked not to be identified. "It's like a Depression-era psychology."

Notable exceptions to the general fondness for California are President Ferdinand E. Marcos and his wife, Imelda, who apparently perfer New York and the East Coast for both vacations and investments. Sources acquainted with the couple said they avoid the Bay Area because of its particularly high concentration of anti-Marcos activists, thousands of whom turned out for raucous protests during Marcos' last official visit in 1982.

But quite a few other Filipinos—including some of Marcos' closest associates—remain attracted to California and the Bay Area. Instead of staying away, many go to great lengths to disguise their personal involvement in the investments.

"You'll never find out who the principals are," said the San Francisco attorney. "Every time I've ever dealt with these guys, I've never dealt with a document signed by a principal. Ninety-nine percent of the time they just tell me what to do, and I do it."

Indeed, many brokers and lawyers learn quickly that secrecy is prized by their Filipino clients.

"Everybody manages to take money out some way," said San Francisco real estate broker Rene Miranda, whose clients include Nemesio I. Yabut, mayor of Makati—the financial district of Manila. But Miranda said he never asks how investment dollars arrive.

"The less I know," he said, "the better for me."

Other attorneys and brokers managing the investments of Filipino clients become experts in the formation and use of offshore corporations to handle transactions, a favored technique both to disguise owners' identities and to reap tax advantages.

A substantial number of Philippine holdings in California and throughout the United States are registered in the names of Netherlands Antilles corporations—corporations sometimes purchased in Curacao, according to real estate broker Horvitz, who has written a booklet advising foreign investors how to purchase U.S. real estate.

Horvitz said one popular notary in Curacao, Dr. Jacob Schultkamp, oversees 80 em-

ployees and sells "incorporations off the shelf . . . for a couple thousand dollars, with his dummies, his people," as officers and directors. "All you have to do is send him a telex. . . . He'll be the director for you."

Horvitz added that some of his own clients have used one Hong Kong accountant to be managing director of their numerous property-purchasing companies.

"They hire somebody in this country to manage the property, and he puts the money in a trustee account," Horvitz said. Then, when the investors in the Philippines want money sent back from abroad, they simply notify their representatives.

"The attorney over here or the accountant over there (tells the bank), 'Send me $5,000 or $100,000,'" Horvitz said.

The lure of profits in California's real estate market is such that it also has drawn major Filipino land developers, some of whom now live in the Bay Area and have become prominent in the industry.

Among them: Morris G. Carpo, described by relatives as a former tax investigator in the Philippines who now heads a Burlingame-based development company that owns 13 parcels of California land with a combined taxable value of $29.7 million. Carpo's firm, the Carruf Corp. N.V., is incorporated in the Netherlands Antilles but conducts substantial business in the Bay Area. Among its holdings are the Legaspi Towers buildings in Burlingame and the twin Legaspi Towers office complexes in Santa Clara.

Capo was not available for comment. "He can't be bothered," said a secretary, who declined to give her name.

Ricardo Silverio, a former auto parts magnate in Manila and erstwhile intimate of President Ferdinand E. Marcos. Silverio is developing a condominium and shopping project on 105 acres of land he owns in Lancaster in Los Angeles County, according to real estate records and Lancaster planning officials.

Another firm of Philippine origin with substantial interests in California properties is Ayala International Inc., the former international arm of the Ayala Corp. in Manila. Registered in Hong Kong and based in Burlingame, the corporation controls the $33 million Campton Place Hotel in San Francisco's Union Square and the $40 million Mayflower Hotel in Los Angeles, according to company officials. It also developed the Terrace Villa condominium complex in south San Jose, company officials said.

Ayala International is controlled by millionaire banker Enrique Zobel, who retired as chairman of Ayala Corp. and bought the company's international division. Zobel was trained in agronomy at the University of California at Los Angeles.

As instability grows in the Philippines, experts and other observers believe it will continue to push a growing number of Filipino investors to transfer their wealth overseas.

"They have money in Switzerland and money all over," said Hank Kriss, an electronics executive who has worked for Filipino-owned companies in Silicon Valley. "But the really wealthy put their money over here, always with the expectation that something could go wrong. One man told me: 'As long as I can get out of the Philippines and get to a telephone, I'm in no trouble.'"

[From the San Jose News]

AMERICAN CONDUITS HELP FILIPINOS BUY REAL ESTATE

(By Pete Carey and Katherine Ellison)

In the forefront of many transactions involving powerful Filipinos are a handful of real estate agents and several prominent lawyers and law firms in the United States.

Some of them handle sales and manage real estate. Others actually are the owners of record for investment properties, concealing client's identities behind their law offices, brokerage firms and the offshore corporations they form.

Such secretiveness is prized by wealthy Filipino investors, who, for the most part seek out U.S. natives to handle their affairs.

"They don't want to go to Filipinos because they think we talk," said San Francisco broker Sylvia Lichauco, one of the few Filipinos who helps her wealthy countrymen buy real estate. "The big guys go to Americans."

Among those who handle the greatest number of Philippine accounts are:

Irwin Jay Robinson, an attorney with Rosenman, Colin, Freund, Lewis & Cohen in New York City. According to court records, Robinson represents Philippine first lady Imelda Marcos in a suit involving her U.S. real estate holdings. He also has represented Philippine banana king Antonio Floirendo, and for several years was an important source of advice on the operation of Filipino-owned Redwood Bank in San Francisco, according to a former executive of the bank.

A measure of his influence is his role at the Redwood Bank. The former bank official, who worked there after the bank was purchased by three Filipinos close to the government of President Ferdinand E. Marcos, recalled that even though Marcos family intimate Rolando Gapud was made a director, Robinson was the key decision maker.

"He is attorney for them in a whole number of things they do in this country," the official said. "Robinson insisted everything go to him."

In 1983, the bank's legal fees totaled $1.8 million, of which 74 percent was paid to Robinson's law firm, according to records of the Federal Deposit Insurance Corporation.

Robinson declined to be interviewed, citing "client privilege."

Bernstein, Carter & Deyo, a New York law firm that has represented Mrs. Marcos in two documented real estate deals and according to Philippine banking and business sources has handled other purchases of office buildings and a department store in New York City for the Marcoses.

The firm's senior partner is Joseph E. Bernstein, a Hillsborough native and self-described expert on offshore real estate investment in the United States. Bernstein once practiced at Robinson's firm.

Bernstein has family ties to the Philippines and acknowledged that his law firm "from time to time might get somebody with a Philippine connection."

According to New York real estate records, a company Bernstein heads, the New York Land Co., has handled the purchase of several office buildings in New York by Netherlands Antilles corporations. One building in particular, the $51 million Crown Building in Manhattan, has been singled out by several Filipino business and banking sources as having been bought and sold for Imelda Marcos.

The Mercury News found that it was bought in 1981 by Lastura N.V., a Curacao corporation, and later was transferred to another Curacao firm, Canadian Land Co. of America N.V., which is managed by Bernstein. That firm is controlled by a third Curacao firm, Caribbean Management N.V. The offices of Lastura and Canadian Land are in the same suite as the offices of New York Land.

Bernstein denied that he represents Mrs. Marcos.

"I don't know her," he said, declining to discuss the identities of his clients. "I wish I did. Everybody thinks I do. . . . Send her my way.

"I always thought the Marcos rumors were attributable to Stanley Marcus," board chairman emeritus of Neiman-Marcus, who was hired as a consultant by a Bernstein-managed development company.

Bernstein's uncle, Jack Nasser, owns Philippine-American Embroidery Corp., a major garment manufacturer in the Philippines. Nasser said he is a friend of Mrs. Marcos.

Another partner in the firm, William Deyo, has represented a corporation identified in a lawsuit as a holding company for property belonging to Mrs. Marcos. According to Deyo, Robinson now is defending the company in the lawsuit.

In 1982, Deyo also represented Faylin Ltd. in the purchase of a home on 13 acres in Princeton, N.J., according to Mercer County, N.J., real estate records. The home is used by members of the Marcos family, according to interviews with people familiar with the property. Deyo declined to comment.

Alexander "Sandy" Calhoun Jr., an attorney with Graham & James in San Francisco. He said he has helped put together the purchases by Filipinos of Redwood Bank in San Francisco, Oceanic Bank in San Francisco and California-Overseas Bank in Los Angeles. Born in Shanghai and an honors graduate of Harvard Law School, Calhoun speaks Japanese, Chinese, and French.

Roger MacKenzie, an attorney with Graham & James in San Francisco. MacKenzie also declined to discuss his clients, who include Philippine Defense Minister Juan Ponce Enrile and construction magnate Rodolfo M. Cuenca, according to real estate records.

MacKenzie defended Filipinos' investments in the United States as helping to balance the U.S. trade deficit.

"We wouldn't be able to run the trade deficit that we were running unless it were offset by capital invested in this country," he said. "I'm sure there is Filipino money invested abroad, but I think that's more of a political whipping boy than anything else. If you want to look at what happened to the economy and what is wrong with it, all you have to do is look at the big projects of Imelda Marcos, the buildings in downtown Manila and all the money they spent on international film festivals, flying Tony Martin into Manila."

Sylvia Lichauco, president of Edgewood Investments, San Francisco. The daughter of a former Philippine ambassador to England, Lichauco acknowledges handling real estate investments for numerous wealthy Filipinos, although she would not discuss her clients.

Lichauco was the broker for the recent purchase of the Philippine Airlines building at 200 Stockton St. on San Francisco's Union Square, by a California corporation called Jamestown Company Inc. Lichauco is listed on state records as the president of the company, but she declined to name its owners. According to a 1984 U.S. Commerce

Department report, the building was bought in 1983 by an "unidentified investor" from the Philippines.

The acquisition was handled by transferring shares in Jamestown Company from its former owner, Hong Kong jeweler Kevin S. Hsu, to the undisclosed new owners of the company, according to an attorney familiar with the transaction. The attorney also claimed that members of the Marcos family were the purchasers.

G. Alfred Roensch. A San Francisco attorney who represents clients from the Far East and son of a former San Miguel beer executive, Roensch has represented wealthy Filipinos in purchases of several pieces of Bay Area property, real estate records show. Roensch declined to comment on his activities.

[From the San Jose News]

CALIFORNIA BANKS EMERGE AS FAVORED INVESTMENTS

(By Pete Carey and Katherine Ellison)

California's banking system has proved to be fertile investment ground for Philippine businessmen and bankers, sometimes resulting in large amounts of capital leaving the distressed Philippine economy.

The state is home to nine banks that are owned by Filipinos. Some of them have done well. Some have not. In the past decade, deposits in institutionally owned Philippine banks and agencies of Philippine banks have risen from $15 million to $277 million, according to figures from the state Superintendent of Banks. This figure does not include another $165 million in privately owned Redwood Bank of San Francisco.

One reason banks have been a popular investment for Filipinos is a desire to get money out of the country, according to Gerry Findley, publisher of the Findley Reports on California Banking in Brea.

"They want to convert it into dollars. . . . That's a very important factor," he said. "Most of them don't have confidence in their own monies."

Findley said that while this is "a legitimate basis" for investing here, "it would be a big controversy with me if I was running the Philippines. If my economic base were going to some other country, I'd be a little unsettled. Hell, we're unsettled, too, when that happens here."

Alexander Calhoun, a San Francisco attorney who has helped Filipinos buy three California banks, said, "The political situation everywhere in Asia is not quite as stable as here. So people generally like to have something outside of the country in case things change suddenly."

But increased competition caused by deregulation of the banking industry and uncertainties in the real estate loan market has lessened the attractiveness of banks as an investment, he said.

In fact, three of California's Filipino-owned banks had bad years during the 1970s and 1980s. Their owners were forced to pump millions of dollars in fresh capital into their U.S. banks.

California-Overseas, established in 1976 in Los Angeles by Roberto S. Benedicto, sugar baron and a close friend of President Ferdinand E. Marcos, posted combined operating losses of $7.4 million in 1982 and 1983, according to state banking officials. The bank's ownership has infused more than $30 million in capital into the bank since it opened in 1976. Last year, the bank posted a net profit of $475,000 with no increases in capital.

California-Overseas spokesman Saul Soteras said he had no comment on the losses in 1982 and 1983.

Redwood Bank of San Francisco was purchased in 1980 by an offshore holding company owned by three Filipino textile magnates for about $15 million, according to a former bank officer, who asked not to be identified. The holding company's president, Dewey Dee, fled the Philippines in 1981 leaving about $90 million in unpaid loans behind him.

Redwood Bank lost $26 million from 1982 to 1984, according to the state Superintendent of Banks. The owners infused a total of $22 million into the bank's reserves during that period, state records show.

"You got to work at losing money like that," said Findley, the banking expert. "I am not in position to make a statement about why they lost the money, but you don't lose $18 million in operations. You lose it by giving it away to bum loans, or having it taken from you in some way."

Records show that the bank was investigated by the Federal Deposit Insurance Corp. for its management and loan practices after its 1980 purchase. Last year, without admitting or denying improper activities, the bank agreed to FDIC-mandated management changes.

The bank's current senior vice president, Bruce Leppla, said Redwood is now showing a profit of $400,000 so far this year.

The millions pumped into the bank show that the owners "believe in the stability and strength of America," he said. "You've got some Philippine owners who say, 'We believe in that bank.' You call it flight capital. The other side of that is that . . . my owners believe the U.S. is the land of opportunity and have stood by the bank by putting in more than $21 million."

Century Bank of Los Angeles owned by five Philippine government agencies, chalked up an operating loss of $755,000 in 1982, according to state banking officials. Merged the next year with the profitable Philippine Bank of California, it reported a net loss of $490,00 in 1984.

The purchase of Century Bank may have cost the Philippine government millions of dollars unnecessarily, said Gilberto Teodoro, chairman of the bank's holding company. He said he suspects that the Philippine government agencies paid "2½ times" what the bank was worth. The purchase, for $14.75 million from the Financial Corporation of America, now is the focus of an inquiry by the Philippine National Assembly, Teodoro said.

"They're saying it was bankrupt, why put more money into it?" Teodoro said. "There are so many things happening back home that are being investigated. It's open season."

The cash used to cover losses at the struggling banks ultimately had to come from the Philippines, Findley said.

"Whether they borrowed the money from somewhere else (or obtained it directly from the Philippines)—whatever the case might be, it has some impact on the outflow of dollar funds from the Philippines," he said.

Not all Philippine-owned banks in California have had problems. For example, Oceanic Bank of San Francisco, started in 1981 with initial capital of $10 million, has returned profits each year.

Oceanic Bank is held by Allied Banking Corp., which is owned in the Philippines by Lucio Tan, said to be one of President Marcos' closest ties to the islands' Filipino-Chinese business community.

U.S. banks also have been the recipient of capital flight dollars from the Philippines. More than a billion dollar left the Philippines in the three months after the assassination of Benigno S. Aquino Jr., according to a report on Philippine Debt to Foreign Banks by John Lind of the Northern California Interfaith Committee on Corporate Responsibility.

Lind wrote that the money went "primarily to foreign branches of U.S. banks" outside of the Philippines.

Other California banks owned or operated by Filipinos include:

Philippine Commercial & Industrial Bank has an agency in Los Angeles with $16 million in assets, according to state banking records. Chairman of PCIB in the Philippine is Cesar Zalamea, who is a founding director of the Marcos Foundation; International Bank of California, Los Angeles; the Philippine National Bank, Los Angeles; Metropolitan Bank & Trust, San Francisco and ManilaBank California, Los Angeles.

By Mr. CHAFEE:

S. 1844. A bill to amend the Consolidated Farm and Rural Development Act to improve the disposition of real property acquired under such act, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARMLAND CONSERVATION ACT

● Mr. CHAFEE. Mr. President, America's farmlands are disappearing at an alarmingly rapid rate. During the 1970's slightly over 1 million acres of rural land were converted to urban or transportation uses.

The loss of farmlands continues to accelerate, despite steps taken by Congress to slow this process—most notably the passage of the Farmland Protection Policy Act in 1981. This act established the intent of Congress that Federal policies should not contribute to the unnecessary conversion of farmland to other uses.

Although FPPA enjoyed broad bipartisan support in Congress, the administration has given it an exceedingly narrow interpretation. The bill I introduce today would not materially change existing statutes, but would clarify the intent of Congress, as expressed in the Farmland Protection Policy Act.

Specifically, this bill would ensure that the Farmer's Home Administration [FmHA] disposes of farmland which it has acquired through foreclosure in a manner consistent with the FPPA.

Under the bill I am introducing today, FmHA would be required to make a good faith effort to keep land in agricultural use, rather than simply selling it off to the highest bidder.

I cannot overemphasize the importance of clearing up the confusion currently surrounding this question. FmHA how holds about 10 percent of the Nation's $200 billion farm debt. And since it is the lender of last resort for farmers, a greater proportion of those loans are in trouble.

With farm foreclosures on the rise, FmHA stands to acquire a massive amount of farmland in the very near future. It already holds over 1 million acres of land in its inventory, one-third of which was acquired in this year alone. How it disposes of this land will—to a great extent—determine our success in keeping good land in agriculture.

The problem is this: Under current FmHA interpretation of its operating authority, land held in inventory is offered at public auction and sold to the highest bidder.

This policy puts those who wish to preserve the land in farm use into competitive bidding against well-heeled developers and land speculators. Few farmers can afford to win or even fight such a bidding war.

FmHA's current policies are subverting the FPPA, undermining development rights purchasing programs, and hindering conservation efforts. This clearly was not the intent of Congress.

To further aggravate the situation, Farmer's Home has taken the position that current law does not permit the sale of development rights to such property separately from the property itself. This closes off an option which has been invaluable in the preservation of farmland.

That option is this: In the case of land which is not held by FmHA—that is, which is simply offered for sale on the open market—a local government or land trust might step in and offer to purchase the development rights. By purchasing development rights, these entities can bridge the gap between the farm value and the development value of a parcel of land. Six States have enacted purchase-of-development-rights programs, and have established funds for this purpose.

But FmHA's interpretation of current law pits these parties directly against those who would develop the land for commercial purposes.

My bill would address this problem in two ways. First and foremost, it would expressly permit FmHA to sell the development rights to property separately from the property itself. This would clarify a major area of confusion under the current law.

In one particular case, my State wants to purchase such a conservation easement from FmHA before the agency sells the land. The agency is willing to sell, but its lawyers say that current law prevents them from doing so. We are currently at an impasse, even though all the policymakers and administrators seem to agree that the transaction would be in the interests of all concerned.

This bill would make it clear beyond a shadow of doubt that FmHA may grant or sell conservation easements separately from the underlying property, just as it may grant or sell a highway right-of-way.

These rights would be valued at the difference between the farm-use value of the land and its development value. Thus, from the standpoint of revenue to the Federal Government, the effect would be the same as if the land were sold to the highest bidder.

Second, my bill would require FmHA to make a good faith effort to keep farmland in agriculture by offering it as a matter of first priority to eligible farmers. If such a farmer does not purchase the land within 2 years, State and local agencies and nonprofit organizations would also become eligible to buy the land for 1 additional year.

In such a case, the agency or nonprofit buyer would have to agree to keep the land in agriculture and to reconvey it to a farmer at the earliest practicable time. Only after 3 years—the period specified by the current law—could the land be offered for sale on the open market. This would give entities interested in preserving the land a window in which to purchase it.

This is particularly important in areas where the nonfarm value of the land vastly exceeds its farm value because of the pressure of commercial and residential development. In my home State of Rhode Island, farmland totals about 30,000 acres—less than one-third of what it was 40 years ago. And according to a Federal study, Rhode Island may have no farmland at all by the turn of the century, if current trends continue.

On Tuesday, November 5, voters in my state overwhelmingly approved a bond referendum to replenish the fund with which the State purchases conservation easements. This program was established 3 years ago, and thus far, the State has used it to buy the development rights to 1,000 acres of land. This bill would not only buttress similar efforts now underway in many States to preserve quickly disappearing tracts of farmland, but would also ensure that federal policies do not unnecessarily hinder these efforts.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1844

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (c) of section 335 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1985(c)) is amended to read as follows:

"(c)(1) The Secretary shall determine whether real property administered under this title is suitable for disposition to persons eligible for assistance under any law administered by the Farmers Home Administration.

"(2) Real property shall be suitable for disposition to such eligible persons if—

"(A) such property—

"(i) is currently being used for the production of an agricultural commodity; or

"(ii) has been used for the production of an agricultural commodity during at least 3 of the 5 years immediately preceding the determination of suitability; and

"(B) any proposed agricultural use of such property is consistent with local land use requirements.

"(3) If the Secretary determines that such property is suitable for disposition, as expeditiously as possible, the Secretary shall offer such property for sale, in a manner consistent with this section, to eligible persons referred to in paragraph (1).

"(4) If such property has not been purchased by such an eligible person within 2 years after the date of the acquisition of such property, the Secretary shall offer such property for sale to units of State and local government, and private nonprofit organizations, that agree—

"(A) to ensure the agricultural use of such property; and

"(B) to convey such property to such an eligible person at the earliest practicable opportunity.

"(5)(A) If the Secretary determines that such property is not suitable for sale to such eligible persons, units, or organizations, or such property has not been purchased by such persons, units, or organizations within 3 years from the date of acquisition, the Secretary shall offer such property for sale—

"(i) after public notice, at public sale; and

"(ii) if no acceptable bid is received, by negotiated sale.

"(B) Such property shall be sold at the best price obtainable for cash or on secured credit without regard to laws governing the disposition of excess or surplus property of the United States.

"(C) The terms of such sale shall require an initial downpayment and the remainder of the sales price payable in installments with interest paid on the unpaid balance at a rate determined by the Secretary, except that such terms and rates may not be more favorable than terms and rates available to eligible borrowers.

"(6)(A) Except as provided in subparagraph (B), a conveyance under this section shall include all of the interest of the United States, including mineral rights.

"(B) The Secretary may for conservation purposes grant or sell an easement, restriction, development rights, or the equivalent thereof, to a unit of local or State government or a private nonprofit organization separately from the underlying fee or sum of all other rights possessed by the United States.".

"(b) The amendment made by this section shall apply to—

(1) real property acquired by the Secretary of Agriculture under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) on or after the date of enactment of this Act; and

(2) real property acquired by the Secretary under such Act before the date of enactment of this Act that has not been disposed of in accordance with such Act before such date.●

ADDITIONAL COSPONSORS

S. 402

At the request of Mr. PRESSLER, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 402, a bill to amend the

Communications Act of 1934 to provide for specialized equipment for telephone service to certain disabled persons.

S. 670

At the request of Mr. PELL, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 670, a bill to amend the National Labor Relations Act to give employers and performers in the performing arts rights given by section 8(e) of such act to employers and employees in similarly situated industries, and to give to employers and performers in the performing arts the same rights given by section 8(f) of such act to employers and employees in the construction industry, and for other purposes.

S. 994

At the request of Mr. JOHNSTON, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 994, a bill to facilitate the national distribution and utilization of coal.

S. 1017

At the request of Mr. WILSON, his name was added as a cosponsor of S. 1017, a bill to provide for the transfer of the Metropolitan Washington Airports to an independent airport authority.

S. 1107

At the request of Mr. NUNN, the names of the Senator from South Carolina [Mr. HOLLINGS], the Senator from Tennessee [Mr. GORE], and the Senator from Minnesota [Mr. BOSCHWITZ] were added as cosponsors of S. 1107, a bill to authorize the Society of the 3d Infantry Division to erect a memorial in the District of Columbia or its environs.

S. 1209

At the request of Mr. CHILES, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 1209, a bill to establish the National Commission to Prevent Infant Mortality.

S. 1259

At the request of Mr. THURMOND, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 1259, a bill to correct certain inequities by providing Federal civil service credit for retirement purposes and for the purpose of computing length of service to determine entitlement to leave, compensation, life insurance, health benefits, severance pay, tenure, and status in the case of certain individuals who performed service as National Guard technicians before January 1, 1969.

S. 1296

At the request of Mr. MATHIAS, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 1296, a bill to amend the Immigration and Nationality Act to modify the requirement for naturalization of an understanding of the English language.

S. 1439

At the request of Mr. DODD, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1439, a bill to amend title 39, United States Code, to provide that change-of-address order forms submitted to the Postal Service may be furnished to the appropriate State authority for purposes relating to voter registration.

S. 1600

At the request of Mr. HEINZ, the name of the Senator from Vermont [Mr. STAFFORD] was added as a cosponsor of S. 1600, a bill to provide that certain of the Social Security Trust Funds be excluded from the Federal budget process for fiscal years beginning on or after October 1, 1985, and to clarify that specifications and directions with respect to such trust funds may not be included in any concurrent resolution on the budget adopted with respect to fiscal years beginning after such date.

S. 1624

At the request of Mr. DECONCINI, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of S. 1624, a bill to make ineligible for certain agricultural program benefits persons who are convicted under Federal or State law of planting, cultivation, growing, or harvesting of controlled substances.

S. 1672

At the request of Mr. BINGAMAN, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 1672, a bill to establish an Export Promotion and Information Center.

S. 1710

At the request of Mr. HOLLINGS, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 1710, a bill to establish a motor carrier administration in the Department of Transportation, and for other purposes.

S. 1747

At the request of Mr. ROTH, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 1747, a bill to amend the Foreign Assistance Act of 1961 to protect tropical forests in developing countries.

S. 1748

At the request of Mr. ROTH, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 1748, a bill to amend the Foreign Assistance Act of 1961 to protect biological diversity in developing countries.

S. 1824

At the request of Mr. ZORINSKY, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of S. 1824, a bill to amend section 13(e)(3) of the Federal Deposit Insurance Act.

SENATE JOINT RESOLUTION 217

At the request of Mr. HEINZ, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of Senate Joint Resolution 217, a joint resolution to designate the week of December 2, 1985, to December 8, 1985 as "National Emergency Medical Air Transport Week".

SENATE CONCURRENT RESOLUTION 69

At the request of Mr. DANFORTH, the names of the Senator from Michigan [Mr. RIEGLE], and the Senator from Oregon [Mr. PACKWOOD] were added as cosponsors of Senate Congressional Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

SENATE CONCURRENT RESOLUTION 86—CONGRATULATING SHARON CHRISTA McAULIFFE ON HER SELECTION AS THE FIRST TEACHER IN SPACE

Mr. HUMPHREY (for himself and Mr. Rudman) submitted the following concurrent resolution; which was referred to the Committee on Commerce, Science, and Transportation:

S. CON. RES. 86

Whereas a quarter century of the exploration of outer space has opened new frontiers for humanity;

Whereas the quality of life has always been dependent upon human endeavor;

Whereas the talents of all professions will be required in order to expand our presence in outer space;

Whereas education has always prepared our Nation for social and technological advancement;

Whereas tomorrow's space travelers are in today's schools; and

Whereas teachers are the vital link in motivating our Nation's youth to face the challenges of the future: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That—

(1) Sharon Christa McAuliffe is to be congratulated on her outstanding achievement on being selected as the first Teacher in Space;

(2) President Reagan and the National Aeronautics and Space Administration are to be commended on their foresight and wisdom in recognizing the importance of education to our future in outer space; and

(3) the Administrator of the National Aeronautics and Space Administration should make the experience of our Nation's first teacher flight participant available to all of our Nation's people by encouraging Sharon Christa McAuliffe to conduct the world's first lesson from outer space for the benefit of all humanity.

● Mr. HUMPHREY. Mr. President, today I join my distinguished colleague Senator RUDMAN in submitting a concurrent resolution congratulating Sharon Christa McAuliffe on being selected as the first teacher in space.

The entire State of New Hampshire is filled with a deep sense of pride in this outstanding woman, who will be the first private citizen to participate

in space flight. It is especially significant that the first private citizen in space will be a teacher, as tomorrow's explorers are in the schools of today. A teacher's experience can be a great motivating force for our Nation's youth. Christa's experiences in space will reach much further than her own classroom; they will touch students across the country, and indeed, every one of us.

Space exploration has opened new frontiers for humanity; Christa McAuliffe's flight will open new frontiers for all of us. We all look forward to reading Christa's space journal when she returns from outer space to experience this incredible journey through the senses of a fellow private citizen.●

● Mr. RUDMAN. Mr. President, it was terrific news and a step in the right direction when President Reagan announced last year that the first private citizen to be launched into orbit on NASA's space shuttle would be a teacher. What better way to highlight the importance our society places upon education.

But, Mr. President, I was particularly pleased when Vice President Bush announced last month that the teacher will be Christa McAuliffe, an enthusiastic and extremely articulate social studies teacher from Concord High School in New Hampshire.

Those of us from New Hampshire are extremely proud of Christa and are anxiously awaiting her trip into space. But we also recognize that Christa will carry with her the hopes and dreams of millions of Americans who have supported our space program and carefully followed the development of the space shuttle. Christa represents the more than 10,000 teachers who applied, representing elementary and secondary schools throughout the United States and its territories, competing for the honor of being the first "teacher in space."

As a space flight participant on a shuttle to be launched next January, Christa will keep a personal journal detailing her experiences in flight which she plans to share with educators from all disciplines throughout the Nation. She will be a guest speaker at national, regional, and State educational workshops and conferences where she will discuss the realities of the trip and offer her perspectives on space technology in terms of politics, science, defense, art, and as an aid to humanity.

In addition to her role as high school teacher, wife, and mother of two young children, Christa is a board member of the New Hampshire Council for the Social Studies, the Junior Service League, a volunteer for a family planning clinic and is active in fundraising for community projects. She represents the best of the American volunteer spirit.

I am very pleased to congratulate Christa McAuliffe on her selection as the first teacher and first private citizen in space and would like to compliment NASA on its fine decision. One need only meet Christa for 1 minute to recognize that NASA made the right choice in selecting this intelligent, accomplished young woman from New Hampshire. Her selection as a member of the space shuttle crew continues our State's long history of contribution to the Nation's space program which began with Alan Shepard's first solo space shot nearly 25 years ago. It also underscores the important role educators have played in our society toward the development of knowledge and understanding, as well as the ability to instill a sense of curiosity and appreciation for learning in our Nation's youth.

On behalf of my colleagues and the entire Nation, I extend congratulations and best wishes to Christa McAuliffe. We all look forward to that momentous day next January when all systems are "go" for liftoff to her exciting venture into space.●

SENATE RESOLUTION 255—CONCERNING THE FEDERAL ENERGY REGULATORY COMMISSION'S VOLUNTARY NATURAL GAS TRANSPORTATION PROGRAM

Mr. NICKLES (for himself, Mr. DOMENICI, Mr. DOLE, Mr. BOREN, and Mr. GRAMM) submitted the following resolution; which was referred to the Committee on Energy and Natural Resources:

S. RES. 255

Whereas, due to the complexity, uncertainty, disincentives and problems created by the Federal Energy Regulatory Commission's voluntary natural gas transportation program, established by final rule by FERC Order No. 436, few pipelines are willing or able to participate immediately in the program;

Whereas, most of those pipelines that are currently participating have only committed to participate through December 15, 1985;

Whereas, as a result of pipelines' decisions not to participate, numerous natural gas consumers located throughout the Nation have experienced a discontinuance of natural gas transportation services;

Whereas, as a result of pipelines' decisions not to participate certain natural gas transportation programs have ceased to exist and, as a result many natural gas producers are being forced to shut in natural gas production due to lack of available transportation;

Whereas, this situation can only be expected to worsen over time due to the expiration of other existing voluntary natural gas transportation programs;

Whereas, all consumers and producers of natural gas must have access to nondiscriminatory transportation in order to provide competition in the natural gas marketplace, and to assure an adequate and reliable supply of natural gas at the lowest possible cost; and

Whereas, producers of natural gas, both independents and majors, must have access to nondiscriminatory transportation in order to be able to make available natural gas to meet market demand, and to insure continued exploration for new natural gas reserves: Now, therefore be it

Resolved by the Senate of the United States, That it is the sense of the Senate that—

(1) the Federal Energy Regulatory Commission should make such changes to the transportation and certificate regulations implemented by Order No. 436, without going beyond their current scope, as may be necessary to remove the disincentives for natural gas pipelines to provide voluntary transportation of natural gas for others;

(2) such changes should be made as soon as possible so as to insure uninterrupted transportation of natural gas to residential, commercial and industrial gas consumers;

(3) until such changes are made, the Federal Energy Regulatory Commission should immediately take such actions as may be necessary to make available on an expedited basis natural gas transportation pursuant to the Natural Gas Act and the Natural Gas Policy Act so as to preclude further disruption in the natural gas marketplace; and

(4) once such changes are made pipelines will participate in the voluntary natural gas transportation program.

SENATE RESOLUTION 256—TO ESTABLISH AN AD HOC COMMITTEE OF THE SENATE

Mr. DOLE submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 256

(1) There is hereby established an Ad Hoc Committee of the Senate consisting of all members of the Senate duly chosen and sworn. The Majority Leader shall designate a chairman and the Minority Leader shall designate a Vice-chairman. A quorum shall consist of 6 members no more than three of which shall be from one party.

(2) The President Pro Tempore of the Senate or his designee is hereby authorized to issue a subpoena to require the attendance of Miroslav Medvid at a hearing before the Ad Hoc Committee to be held at 9:30 a.m. November 12, 1985, in S. 207 of the U.S. Capitol, Washington, D.C. or at such other time or times and places as the chairman of the Ad Hoc Committee shall designate. The Sergeant of Arms, or his designee, is authorized and directed to serve such subpoena forthwith.

(3) The appropriate agencies are requested to assist the Senate in the service of the subpoena referred to in paragraph one and in obtaining the presence of Mr. Miroslav Medvid before the Ad Hoc Committee.

AMENDMENTS SUBMITTED

MILITARY CONSTRUCTION APPROPRIATION, 1986

THURMOND (AND HATFIELD) AMENDMENT NO. 969

Mr. MATTINGLY (for Mr. THURMOND, for himself and Mr. HATFIELD)

proposed an amendment to the bill (H.R. 3327) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 4, line 1, strike out "$208,350,000" and insert in lieu thereof "$233,290,000".

BINGAMAN (AND GLENN) AMENDMENT NO. 970

Mr. MATTINGLY (for Mr. BINGAMAN, for himself and Mr. GLENN) proposed an amendment to the bill (H.R. 3327), supra; as follows:

On page 2, line 7, strike out "$1,541,190,000" and insert in lieu thereof "$1,545,690,000".

On page 3, line 13, strike out "$1,718,863,000" and insert in lieu thereof "$1,721,763,000".

GORTON AMENDMENT NO. 971

Mr. MATTINGLY (for Mr. GORTON) proposed an amendment to the bill (H.R. 3327), supra; as follows:

On page 3, line 13, add $12,500,000 to the number shown.

MATTINGLY (AND HEFLIN) AMENDMENT NO. 972

Mr. MATTINGLY (for himself and Mr. HEFLIN) proposed an amendment to the bill (H.R. 3327), supra; as follows:

On page 2, line 7, add $2,200,000 to the Senate number.

DECONCINI AMENDMENT NO. 973

Mr. DECONCINI proposed an amendment to the bill H.R. 3327, supra; as follows:

On page 2, line 7, add *$10,820,000.*

On page 3, line 13, add *$2,100,000.*

BUMPERS (AND PRYOR) AMENDMENT NO. 974

Mr. MATTINGLY (for Mr. BUMPERS, for himself and Mr. PRYOR) proposed an amendment to the bill (H.R. 3327), supra; as follows:

On page 3, line 13, add *$4,260,000.*

KENNEDY AMENDMENT NO. 975

Mr. KENNEDY proposed an amendment to the bill (H.R. 3327), supra; as follows:

At page 3, line 13, add $11,000,000 to the figure appearing at the above-cited location in the bill.

MATTINGLY (AND SASSER) AMENDMENT NO. 976

Mr. MATTINGLY (for himself and Mr. SASSER) proposed an amendment to the bill (H.R. 3327), supra; as follows:

At the appropriate place in the bill, add the following: The Senate finds that the U.S. has historically been a haven for those seeking refuge from repression; and

Recent events have focused on the procedures used in handling cases involving foreign merchant seamen who might seek political asylum; and

Serious questions have arisen about the application of those procedures by the INS in the case of Miroslav Medvid.

Therefore, it is the sense of the Senate that all legal and legitimate means should be taken by the U.S. Government in arriving at a just resolution of this incident.

FEDERAL RETIREMENT REFORM ACT

GORE AMENDMENT NO. 977

Mr. GORE proposed an amendment to the bill (S. 1527) to amend title 5, United States Code, to establish a new retirement and disability plan for Federal employees, postal employees, and Members of Congress, and for other purposes; as follows:

On page 176, line 24, beginning with "in", strike out all through "hardship" on line 25.

EAGLETON (AND STEVENS) AMENDMENT NO. 978

Mr. EAGLETON (for himself and Mr. STEVENS) proposed an amendment to the bill S. 1527, supra; as follows:

Immediately following title III, insert the following:

TITLE IV—CENTRAL INTELLIGENCE AGENCY RETIREMENT REFERENCES

SEC. 401. The Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1043; 50 U.S.C. 403 note) is amended—

(1) in section 111, by striking out "When" and inserting in lieu thereof "Except as otherwise provided in section 302 of this Act, when";

(2) by striking out "this Act" each place it appears in title II except in sections 201 and 264, and inserting in lieu thereof "this title"; and

(3) by inserting "under this title" after "payable from the Fund" each place it appears in title II.

CONTRIBUTIONS TO THE CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

SEC. 402. Section 211 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1045; 50 U.S.C. 403 note) is amended—

(1) by inserting "Except as provided in subsection (d)," before "7 percent" in the first sentence of subsection (a); and

(2) by adding at the end thereof the following new subsection (d):

"(d)(1) In the case of a participant who was a participant subject to this Act before January 1,1984, and whose service—

"(A) is employment for the purpose of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, and

"(B) is not creditable service for any purpose under title III of this Act or chapter 84 of title 5, United States Code,

there shall be deducted and withheld from the basic pay of the participant under this subsection during any pay period only the amount computed pursuant to paragraph (2).

"(2) The amount deducted and withheld from the basic pay of a participant during any pay period pursuant to paragraph (1) shall be the excess of—

"(A) the amount determined by multiplying the percent applicable to the participant under subsection (a) by the basic pay payable to the participant for such pay period, over

"(B) the amount of the taxes deducted and withheld from such basic pay under section 3101(a) of the Internal Revenue Code of 1954 for such pay period.".

OFFSET OF ANNUITY BY THE AMOUNT OF SOCIAL SECURITY BENEFITS

SEC. 403. Section 221 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1045; 50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(p)(1) Effective on the first day of the month in which an annuitant, including a survivor, becomes 62 years of age, the annuity computed under the other subsections of this section and payable to the annuitant shall be reduced (but not below zero) by the amount determined by multiplying the amount of the old-age and survivors insurance benefits which the annuitant is entitled to receive under section 202 of the Social Security Act for the such month, if any, by a fraction—

"(A) the numerator of which is the total of the wages (within the meaning of section 209 of the Social Security Act) for service which is referred to in paragraph (2) of this subsection for years before the calendar year in which such month occurs, and

"(B) the denominator of which is the total of all wages (within the meaning of section 209 of the Social Security Act) and all self-employment income (within the meaning of section 211(b) of the Social Security Act)—

"(i) of such annuitant, or

"(ii) in the case of a survivor, of the participant on whose service the annuity is based.

credited for years after 1936 and before the calendar year in which such month occurs.

"(2) The service referred to in paragraph (1)(A) of this subsection is service which is covered by amounts deducted and withheld as provided in section 211(d), is service described in subparagraphs (C) through (G) of section 210(a)(5) of the Social Security Act, and is taken into account for the purpose of computing the annuity to which paragraph (1) of this subsection applies.".

TREATMENT OF CERTAIN RECALL SERVICE

SEC. 404. Section 271 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1052; 50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(c) Subsection (b) shall not apply to an annuitant who becomes subject to title III of this Act by reason of recall service.".

CONFORMITY BETWEEN THE FEDERAL RETIREMENT SYSTEM AND THE CENTRAL INTELLIGENCE AGENCY PENSION SYSTEM

SEC. 405. Section 292 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(c) The President shall maintain, under the same conditions and in the same manner as provided in subsections (a) and (b), existing conformity between the Federal Retirement System provided in chapter 84 of title 5, United States Code, and the Central Intelligence Agency Pension System provided in title III of this Act.".

CENTRAL INTELLIGENCE AGENCY PENSION SYSTEM

SEC. 406. The Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1043; 50 U.S.C. 403 note) is amended by adding at the end thereof the following:

"TITLE III—CENTRAL INTELLIGENCE AGENCY PENSION SYSTEM

"ESTABLISHMENT

"SEC. 301. (a) There is hereby established a Central Intelligence Agency Pension System.

"(b)(1) Except as otherwise specifically provided in this title or any other provision of law, all participants in the Central Intelligence Agency Pension System shall be subject to the provisions of chapter 84 of title 5, United States Code, and shall be treated in all respects as persons whose participation in the Federal Retirement System provided in that chapter is required by section 8402 of such title.

"(2) Participants in the Central Intelligence Agency Pension System may not make an election authorized by section 8418(c) of title 5, United States Code, and shall not be entitled to any benefits under chapter 84 of such title which result from such an election.

"DEFINITIONS

"SEC. 302. As used in this title, unless otherwise specified—

"(1) the term 'annuity' means the annuity which is described in subchapter II of chapter 84 of title 5, United States Code, and is payable to a Pension System participant;

"(2) the term 'dynamic assumptions' has the same meaning as provided in section 8401(9) of title 5, United States Code;

"(3) the term 'Fund' means the Central Intelligence Agency Retirement and Disability Fund maintained by the Director pursuant to section 202;

"(4) the term 'normal cost' means the entry-age normal cost of the provisions of the System which relate to the Fund, computed by the Director in accordance with generally accepted actuarial practice and standards (using dynamic assumptions) and expressed as a level percentage of aggregate basic pay, and shall be used to value the cost of the System for all purposes for which the cost of the System is required to be determined;

"(5) the term 'Pension System participant' means a person who participates in the Central Intelligence Agency Pension System;

"(6) the term 'supplemental liability' means the estimated excess of—

"(A) the actuarial present value of all future benefits payable from the Fund under this title, over

"(B) the sum of—

"(i) the actuarial present value of the future contributions to be made on behalf of participants pursuant to section 305(b)(2)(A) of this Act; and

"(ii) the balance in the Fund attributable to the System on the date the supplemental liability is determined or to contributions made under section 204(b) or 205 of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 Stat. 1106; 5 U.S.C. 8331 note); and

"(7) the term 'System' means the Central Intelligence Agency Pension System.

"PENSION SYSTEM PARTICIPANTS

"SEC. 303. (a) Except for persons excluded by subsection (b), all officers and employees of the Agency, any of whose service after December 31, 1983, is employment for the purpose of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 shall be Pension System participants.

"(b) Participants in the Central Intelligence Agency Retirement and Disability System who were participants in such system on or before December 31, 1983, and who have not had a break in service in excess of 1 year since that date, are not made Pension System participants by this section, without regard to whether they are subject to title II of the Social Security Act.

"SPECIAL RULES RELATING TO THE ENTITLEMENT OF SECTION 203 EMPLOYEES TO ANNUITY

"SEC. 304. (a) Any Pension System participant who is described in section 203 and retires voluntarily or mandatorily under section 102(c) of the National Security Act of 1947 (61 Stat. 498; 50 U.S.C. 403(c)) or section 233 or 235 of this Act under conditions authorizing an immediate annuity for participants in the Central Intelligence Agency Retirement and Disability System shall be entitled to an immediate annuity computed under subsections (a)(2), (a)(3), and (c) of section 8413 of title 5, United States Code. The annuity shall not be subject to reduction under section 8414 of such title.

"(b) A Pension System participant who is entitled to an immediate annuity under subsection (a) shall be entitled to receive an annuity supplement while under 62 years of age. The annuity supplement shall be based on the total creditable service of the participant and shall be computed and increased in accordance with section 8413(b) of title 5, United States Code.

"(c)(1) Any Pension System participant described in section 203 may be retired under the conditions specified in sections 233 and 235(a) and shall be retired under the conditions specified in section 235(b). Each Pension System participant so retired shall receive benefits under this title.

"(2) For the purposes of this subsection—

"(A) the term 'participant', as used in the sections referred to in paragraph (1), means a Pension System participant described in section 203; and

"(B) the term 'system', as used in section 233, means the Central Intelligence Agency Pension System.

"(d) Any Pension System participant described in section 203 who is separated under the conditions specified in section 234(a) shall be entitled to a deferred annuity under section 8412 of title 5, United States Code, unless the Director determines that the separation was based in whole or in part on disloyalty to the United States.

"FUNDING

"SEC. 305. (a) All payments under subchapters II, IV, and VII of chapter 84 of title 5, United States Code, based on the service shall be paid by the Director from the Fund.

"(b)(1) All sums required to finance the payments referred to in subsection (a) shall be credited to the Fund.

"(2) The sums referred to in paragraph (1) are—

"(A) amounts which are determined by the Director to be necessary to defray the normal cost of the benefits, other than disability benefits, payable under this title to Pension System participants;

"(B) The sums which are transferred to the Fund by the Secretary of the Treasury to amortize over 30 years the supplemental liability of the System which is attributable to Pension System participants, as computed at the end of each fiscal year beginning after September 30, 1987; and

"(C) the sums which are transferred by the Secretary of the Treasury to the Fund out of funds appropriated to the Department of Defense for the purpose of paying the costs incurred during any year which relate to the creditable military service of Pension System participants.

"(C) At least every 5 years, the Secretary of the Treasury shall prepare periodic valuations of the Central Intelligence Agency Pension System and shall advise the Director of (1) the normal cost of the System, without regard to the cost of disability payments, (2) the supplemental liability of the System, and (3) the amounts necessary to finance the costs of the System.

"THRIFT SAVINGS PLAN

"SEC. 306. (a) The Director, in consultation with the Executive Director of the Federal Retirement Thrift Investment Board, may—

"(1) maintain exclusive records relating to Pension System participants' elections, contributions, and accounts under the Thrift Savings Plan provided in subchapter III of chapter 84 of title 5, United States Code, and

"(2) provide for investments under the Thrift Savings Plan to be made and accounted for by such Executive Director in aggregate amounts for the Central Intelligence Agency Pension System.

"(b) The Director may make the necessary allocations of earnings, losses, and charges to individual accounts of Pension System participants under the Thrift Savings Plan.

"(c) The Executive Director of the Federal Retirement Thrift Investment Board may not exercise authority under subchapter III or VIII of chapter 84 of title 5, United States Code, in the case of the Central Intelligence Agency Pension System to the extent that the Director exercises authority provided in subsections (a) and (b).

"DISABILITY

"SEC. 307. The Director, instead of the Office of Personnel Management, may contract with an administrator of benefits (as defined in section 8441(1) of title 5, United States Code), for the purpose of administration of benefits under subchapter V of chapter 84 of such title with respect to Pension System participants.

"GENERAL AND ADMINISTRATIVE PROVISIONS

"SEC. 308. (a) The Director shall administer the Central Intelligence Agency Pension System except for matters (other than matters to which section 306 of this Act applies) relating to the Thrift Savings Plan provided in subchapters III and VIII of chapter 84 of title 5, United States Code, and matters (other than matters to which section 307 of this Act applies) relating to disability benefits under subchapter V of such chapter. The Director shall, with respect to the Central Intelligence Agency Pension System, perform the functions and exercise the authority vested in the Office of Personnel Management or the Director of such Office by such chapter 84, and may issue regulations for such purposes.

"(b) Section 201(c) shall apply to determinations of the Director under the Central Intelligence Agency Pension System which, if made by the Office of Personnel Management under chapter 84 of title 5, United States Code, the Director of such Office, or an administrator of benefits (as defined in section 8441(1) of such title), would be appealable to the Merit Systems Protection Board, to such Office, or to the Director of such Office.

"TRANSITION PROVISIONS

"SEC. 309. The Director shall issue regulations providing for the transition from the Central Intelligence Agency Retirement and Disability System to the Central Intelligence Agency Pension System. For this purpose, the provisions of sections 8471, 8472, and 8473 of title 5, United States Code, relating to the Civil Service Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement under such system shall be deemed to refer in like manner to the Central Intelligence Agency Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement thereunder.

"REFERENCES IN OTHER LAWS

"SEC. 310. References made to participation in the Federal Retirement System in section 8113(c), 8475, 8704(a)(2), and 8705(e) of title 5, United States Code, section 210(a)(5)(H) of the Social Security Act, and section 3121(b)(5)(H) of the Internal Revenue Code of 1954 shall be deemed to refer to participation in the Central Intelligence Agency Pension System.".

Redesignate the succeeding title and sections accordingly.

DURENBERGER (AND HOLLINGS) AMENDMENT NO. 979

Mr. DURENBERGER (for himself and Mr. HOLLINGS) proposed an amendment to amendment No. 978 proposed by Mr. EAGLETON (and Mr. STEVENS) to the bill S. 1527, supra; as follows:

On page 14, immediately following line 1, insert the following:

ADMINISTRATION OF THE CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM FOR EMPLOYEES OF THE CENTRAL INTELLIGENCE AGENCY

SEC. 407. Section 8347 of title 5, United States Code, is amended by adding at the end thereof the following new subsection (n):

"(n)(1) Notwithstanding any other provision of this subchapter, the Director of Central Intelligence shall—

"(A) administer the provisions of this subchapter with respect to officers and employees of the Central Intelligence Agency; and

"(B) perform the functions and duties which would otherwise be performed with respect to such officers and employees by the Office of Personnel Management or the Director of such Office under this subchapter.

"(2) The Director of the Office of Personnel Management shall furnish such information and services to the Director of Central Intelligence as the Director of Central Intelligence determines necessary to carry out paragraph (1) of this subsection.".

REPORT ON EXPANSION OF COVERAGE OF THE CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

SEC. 408. (a) The Director of Central Intelligence shall determine whether it would be appropriate to expand the coverage of the Central Intelligence Agency Retirement and Disability System to include any officers and employees of the Central Intelligence Agency who are subject to the Civil Service Retirement and Disability System under subchapter III of chapter 83 of title 5, United States Code.

(b) Not later than 1 year after the date of the enactment of this Act, the Director of Central Intelligence shall transmit to the Congress the Director's determinations under subsection (a) and any recommendations for legislation which the Director considers appropriate and relate to such determinations.

LUGAR (AND OTHERS) AMENDMENT NO. 980

Mr. STEVENS (for Mr. LUGAR, for himself, Mr. STEVENS, Mr. EAGLETON, and Mr. PELL) proposed an amendment to the bill S. 1527, supra; as follows:

Immediately following title III, insert the following:

TITLE IV—FOREIGN SERVICE RETIREMENT

REDESIGNATION OF CERTAIN PROVISIONS OF THE FOREIGN SERVICE ACT OF 1980

SEC. 401. (a) Chapter 8 of title I of the Foreign Service Act of 1980 (94 Stat. 2102; 22 U.S.C. 4041 et seq.) is amended—

(1) by striking out the caption of such chapter and inserting in lieu thereof the following:

"CHAPTER 8—FOREIGN SERVICE RETIREMENT AND DISABILITY

"Subchapter I—Foreign Service Retirement and Disability System";

(2) by striking out "this chapter" each place it appears and inserting in lieu thereof "this subchapter"; and

(3) by inserting "under this subchapter" after "payable from the Fund" each place it appears.

(b)(1) Section 808(d) of such Act (94 Stat. 2110; 22 U.S.C. 4048(d)) is amended—

(A) by stiking out "such subchapter" each place it appears in the second and third sentences and inserting in lieu thereof "subchapter I of such chapter 81"; and

(B) by striking out "Act" each place it appears and inserting in lieu thereof "subchapter".

(2) Section 808(e) of such Act (94 Stat. 2111; 22 U.S.C. 4048(e)) is amended by striking out "Act" each place it appears and inserting in lieu thereof "subchapter".

(c) Section 809(a) (94 Stat. 2111; 22 U.S.C. 4049(a)) is amended by striking out "Act" and inserting in lieu thereof "subchapter".

CONTRIBUTIONS TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY SYSTEM

SEC. 402. Section 805 of the Foreign Service Act of 1980 (94 Stat. 2104; 22 U.S.C. 4045) is amended—

(1) by inserting "Except as provided in subsection (g)," before "7 percent" in the first sentence of subsection (a); and

(2) by adding at the end thereof the following new subsection (g):

"(g)(1) In the case of an employee or member of the Service who was a participant subject to this subchapter before January 1, 1984, and whose service—

"(A) is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, and

"(B) is not creditable service for any purpose under subchapter II of this chapter or chapter 84 of title 5, United States Code,

there shall be deducted and withheld from the basic pay of the employee or member of the Service under this subsection during any pay period only the amount computed pursuant to paragraph (2).

"(2) The amount deducted and withheld from the basic pay of an employee or member of the Service during any pay period pursuant to paragraph (1) shall be the excess of—

"(A) the amount determined by multiplying the percent applicable to the employee or member of the Service under subsection (a) by the basic pay payable to the employee or member of the Service for such pay period, over

"(B) the amount of the taxes deducted and withheld from such basic pay under section 3101(a) of the Internal Revenue Code of 1954 for such pay period.".

OFFSET OF ANNUITY BY THE AMOUNT OF SOCIAL SECURITY BENEFITS

SEC. 403. Section 806 of the Foreign Service Act of 1980 (94 Stat. 2106; 22 U.S.C. 4046) is amended by adding at the end thereof the following new subsection:

"(m)(1) Effective on the first day of the month in which an annuitant, including a survivor, becomes 62 years of age, the annuity computed under the other subsections of this section and payable to the annuitant shall be reduced (but not below zero) by the amount determined by multiplying the amount of the old-age and survivors insurance benefits which the annuitant is entitled to receive under section 202 of the Social Security Act for the such month, if any, by a fraction—

"(A) the numerator of which is the total of the wages (within the meaning of section 209 of the Social Security Act) for service which is referred to in paragraph (2) of this subsection for years before the calendar year in which such month occurs, and

"(B) the denominator of which is the total of all wages (within the meaning of section 209 of the Social Security Act) and all self-employment income (within the meaning of section 211(b) of the Social Security Act)—

"(i) of such annuitant, or

"(ii) in the case of a survivor, of the participant on whose service the annuity is based, credited for years after 1936 and before the calendar year in which such month occurs.

"(2) The service referred to in paragraph (1)(A) of this subsection is service which is covered by amounts deducted and withheld as provided in section 805(g), is service described in subparagraphs (C) through (G) of section 210(a)(5) of the Social Security Act, and is taken into account for the purpose of computing the annuity to which paragraph (1) of this subsection applies.".

TREATMENT OF CERTAIN RECALL SERVICE

SEC. 404. Section 823 of the Foreign Service Act of 1980 (94 Stat. 2122; 22 U.S.C. 4063) is amended by adding at the end thereof the following new subsection:

"(c) If an annuitant becomes subject to subchapter II of this chapter by reason of recall service—

"(1) subsections (a) and (b) shall not apply to such annuitant; and

"(2) section 824 shall apply to the recall service as if such service were reemployment.".

REEMPLOYMENT

SEC. 405. Section 824 of the Foreign Service Act of 1980 (94 Stat. 2122; 22 U.S.C. 4064) is amended to read as follows:

"SEC. 824. Reemployment.—(a)(1)(A) except in the case of an annuitant who makes an election under subsection (b), if any member of the Service who has retired and is receiving an annuity under this subchapter or subchapter II of this chapter becomes employed in an appointive or elective position in the Government, payment of

any annuity under either subchapter to the annuitant terminates effective on the date of the employment.

"(B) If an annuity of an annuitant is terminated under subparagraph (A) by reason of reemployment and—

"(i) the annuitant was not entitled to an annuity under subchapter II of this chapter before the reemployment began, or

"(ii) the reemployment service is subject to the Federal Retirement System under chapter 84 of title 5, United States Code,

the terminated annuity shall resume and the annuitant shall be entitled to an additional annuity under subchapter II of this chapter effective on the date of termination of the reemployment. The additional annuity shall be computed under sections 8413, 8414, and 8415 of title 5, United States Code (as made applicable by subchapter II of this chapter), based on the service during the period of reemployment and the basic salary paid the annuitant for such service.

"(2) A reemployed annuitant who, before reemployment, was entitled to an annuity under subchapter II of this chapter and has been reappointed in a status covered by the System under such subchapter shall be entitled to a redetermination of rights under such subchapter upon termination of the employment. If such annuitant, before reemployment, was also entitled to an annuity under subchapter I of this chapter, that annuity shall be resumed upon termination of the employment.

"(b)(1) A member of the Service who is entitled to an annuity under this subchapter or subchapter II of this chapter and becomes employed in an appointive or elective position in the Government on a part-time or temporary basis may elect to continue to receive either or both annuities as provided in this subsection.

"(2) The total annuity payable under this chapter to an annuitant making an election under paragraph (1) shall be reduced during the part-time or temporary employment referred to in such paragraph as necessary to meet the requirements of paragraph (3).

"(3) The sum of—

"(A) the total annuity payable under this chapter to an annuitant making an election under paragraph (1), and

"(B) the annual rate of pay payable to the annuitant during the part-time or temporary employment referred to in such paragraph.

may not exceed, in any year, the highest annual rate of pay which is payable during such year for full-time employment in the position in which the annuitant is employed.

"(4) Upon termination of the part-time or temporary employment referred to in paragraph (1), payment of the full annuity of an annuitant who has made an election under paragraph (1) of this subsection shall resume.

"(c) The amount of an annuity which has been terminated or reduced under this section by reason of the reemployment of the annuitant and is resumed under this section shall be the amount of the annuity which would have been payable if the annuitant had not accepted the reemployment. The amount of an annuity resulting from a redetermination of rights pursuant to subsection (a) shall not be less than the amount of the terminated annuity plus any increases under section 826 or section 8462 of title 5, United States Code, as appropriate, occurring after the termination of the annuity and before the commencement of the redetermined annuity.

"(d) If an annuitant to whom this section applies dies while reemployed, a survivor annuity payable with respect to the deceased annuitant shall be redetermined as if the employment had terminated on the date of death.

"(e) The annuity rights of any member of the Service who is reemployed in the Federal Government shall be determined under this section instead of section 8468 or 8474 of title 5, United States Code.

"(f) When any such retired member of the Service is reemployed, the employer shall send a notice of such reemployment to the Secretary of State, together with all pertinent information relating to such employment, and shall pay directly to such member the salary of the position in which he or she is serving.

"(g) In the event of any overpayment under this section, such overpayment shall be recovered by withholding the amount involved from the salary payable to such reemployed member of the Service or from any other moneys, including annuity payments, payable under this chapter.".

COMPATIBILITY BETWEEN THE FEDERAL RETIREMENT SYSTEM AND THE FOREIGN SERVICE PENSION SYSTEM

SEC. 406. Section 827 of the Foreign Service Act of 1980 (94 Stat. 2124; 22 U.S.C. 4067) is amended by adding at the end thereof the following new subsection:

"(c) The President shall maintain, under the same conditions and in the same manner as provided in subsections (a) and (b), existing conformity between the Federal Retirement System provided in chapter 84 of title 5, United States Code, and the Foreign Service Pension System provided in subchapter II of this chapter.".

FOREIGN SERVICE PENSION SYSTEM

SEC. 407. (a) Chapter 8 of title I of the Foreign Service Act of 1980 (94 Stat. 2102; 22 U.S.C. 4041 et seq.) is amended by adding at the end thereof the following:

"Subchapter II—Foreign Service Pension System

"SEC. 851. ESTABLISHMENT.—(a) There is hereby established a Foreign Service Pension System.

"(b)(1) Except as otherwise specifically provided in this subchapter or any other provision of law, all participants in the Foreign Service Pension System shall be subject to the provisions of chapter 84 of title 5, United States Code, and shall be treated in all respects as persons whose participation in the Federal Retirement System provided in that chapter is required by section 8402 of such title.

"(2) Participants in the Foreign Service Pension System may not make an election authorized by section 8418(c) of title 5, United States Code, and shall not be entitled to any benefits under chapter 84 of such title which result from such an election.

"SEC. 852. DEFINITIONS.—As used in this subchapter, unless otherwise specified—

"(1) the term 'annuity' means the annuity which is described in subchapter II of chapter 84 of title 5, United States Code, and is payable to a participant;

"(2) the term 'dynamic assumptions' has the same meaning as provided in section 8401(9) of title 5, United States Code;

"(3) the term 'Fund' means the Retirement and Disability Fund maintained by the Secretary of the Treasury pursuant to section 802;

"(4) the term 'normal cost' means the entry-age normal cost of the provisions of the system which relate to the Fund, computed by the Secretary of State in accordance with generally accepted actuarial practice and standards (using dynamic assumptions) and expressed as a level percentage of aggregate basic pay, and shall be used to value the cost of the System for all purposes for which the cost of the System is required to be determined;

"(5) the term 'participant' means a person who participates in the Foreign Service Pension System;

"(6) the term 'supplemental liability' means the estimated excess of—

"(A) the actuarial present value of all future benefits payable from the Fund under this subchapter, over

"(B) the sum of—

"(i) the actuarial present value of the future contributions to be made on behalf of participants pursuant to section 855(b)(2)(A) of this Act; and

"(ii) the balance in the Fund attributable to the System on the date the supplemental liability is determined or to the contributions made under Section 204(b) or 205 of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 stat. 1106; 5 U.S.C. 8331 note); and

"(7) the term 'System' means the Foreign Service Pension System.

"SEC. 853. PARTICIPANTS.—(a) Except for persons excluded by subsection (b), all members of the Foreign Service, any of whose service after December 31, 1983, is employment for the purpose of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, who would, but for this section, be participants in the Foreign Service Retirement and Disability System pursuant to section 803 shall be participants in the Foreign Service Pension System.

"(b) Members of the Service who were participants in the Foreign Service Retirement and Disability System on or before December 31, 1983, and who have not had a break in service in excess of 1 year since that date, are not made participants in the System by this section, without regard to whether they are subject to title II of the Social Security Act.

"SEC. 854. ENTITLEMENT TO ANNUITY.—(a) Any participant who retires voluntarily or mandatorily under section 607, 608, 811, or 813 under conditions authorizing an immediate annuity for participants in the Foreign Service Retirement and Disability System shall be entitled to an immediate annuity computed under subsections (a)(2), (a)(3), and (c) of section 8413 of title 5, United States Code. The annuity shall not be subject to reduction under section 8414 of such title.

"(b) A participant who is entitled to an immediate annuity under subsection (a) shall be entitled to receive an annuity supplement while the annuitant is under 62 years of age. The annuity supplement shall be based on the total creditable service of the annuitant and shall be computed and increased in accordance with section 8413(b) of title 5, United States Code.

"(c)(1) Any participant may be retired under the conditions specified in section 811 and shall be retired under the conditions specified in sections 812 and 813 and receive benefits under this subchapter.

"(2) For the purposes of this subsection—

"(A) the term 'participant', as used in the sections referred to in paragraph (1), means a participant in the Foreign Service Pension System; and

"(B) the term 'System', as used in those sections, means the Foreign Service Pension System.

"(d) Any participant who is separated for cause under section 610 shall be entitled to a deferred annuity under section 8412 of title 5, United States Code, under the conditions specified in such section unless the Secretary determines that the separation was based in whole or in part on disloyalty to the United States.

"SEC. 855. FUNDING.—(a) All payments under this subchapter which are comparable to payments under subchapters II, IV, and VII of chapter 84 of title 5, United States Code, based on the service of participants or former participants shall be paid by the Secretary of State from the Fund.

"(b)(1) All sums required to finance the payments referred to in subsection (a) shall be credited to the Fund.

"(2) The sums referred to in paragraph (1) are—

"(A) amounts which (i) are determined by the Secretary of State to be necessary to defray the normal cost of the benefits, other than disability benefits, payable under this subchapter to participants who are members of the Foreign Service, and (ii) are paid by each agency which employs any such participants;

"(B) the sums which are transferred to the Fund by the Secretary of the Treasury to amortize over 30 years the supplemental liability of the System which is attributable to such participants, as computed at the end of each fiscal year beginning after September 30, 1987; and

"(C) the sums which are transferred by the Secretary of the Treasury to the Fund out of funds appropriated to the Department of Defense for the purposes of paying the costs relating to the creditable military service of Foreign Service members who become participants during any year.

"(c) At least every 5 years, the Secretary of the Treasury shall prepare periodic valuations of the Foreign Service Pension System and shall advise the Secretary of State of (1) the normal cost of the System, without regard to the cost of disability payments, (2) the supplemental liability of the System, and (3) the amounts necessary to finance the costs of the System.

"SEC. 856. DISABILITY.—The Secretary of State (in consultation with the Medical Director of the Department of State and the Foreign Service), instead of an administrator of benefits (as defined in section 8441(1) of title 5, United States Code), shall determine whether a participant or former participant is unfit for overseas duty (within the meaning of section 808 of this Act) for the purposes of subchapter V of chapter 84 of such title.

"SEC. 857. GENERAL AND ADMINISTRATIVE PROVISIONS.—(a) The Secretary of State shall administer the Foreign Service Pension System except for matters relating to the Thrift Savings Plan provided in subchapters III and VIII of chapter 84 of title 5, United States Code, and disability benefits under subchapter V of such chapter (other than matters to which section 856 applies). The Secretary of State shall, with respect to the Foreign Service Pension System, perform the functions and exercise the authority vested in the Office of Personnel Management or the Director of such Office by such chapter 84, and may issue regulations for such purposes.

"(b) Determinations of the Secretary of State under the Foreign Service Pension System which, if made by the Office of Personnel Management under chapter 84 of title 5, United States Code, the Director of such Office, or an administrator of benefits (as defined in section 8441(1) of such title), would be appealable to the Merit systems Protection Board, to such Office, or to the Director of such Office shall, instead, be appealable to the Foreign Service Grievance Board.

"SEC. 858. TRANSITION PROVISIONS.—The Secretary of State shall issue regulations providing for the transition from the Foreign Service Retirement and Disability System to the Foreign Service Pension System. For this purpose, the provisions of sections 8471, 8472, and 8473 of title 5, United States Code, relating to the Civil Service Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement under such system shall be deemed to refer in like manner to the Foreign Service Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement thereunder.

"SEC. 859. REFERENCES IN OTHER LAWS.—References made to participation in the Federal Retirement System in sections 8113(c), 8475, 8704(a)(2), and 8705(e) of title 5, United States Code, section 210(a)(5)(H) of the Social Security Act, and section 3121(b)(5)(H) of the Internal Revenue Code of 1954 shall be deemed to refer to participation in the Foreign Service Pension System.".

(b) The table of contents in section 2 of such Act is amended—

(1) by striking out the item relating to chapter 8 and inserting in lieu thereof the following:

"Chapter 8—Foreign Service Retirement and Disability

"SUBCHAPTER I—Foreign Service Retirement and Disability System"; and

(2) by inserting after the item relating to section 827 the following:

"SUBCHAPTER II—Foreign Service Pension System

"Sec. 851. Establishment.
"Sec. 852. Definitions.
"Sec. 853. Participants.
"Sec. 854. Entitlement to annuity.
"Sec. 855. Funding.
"Sec. 856. Disability.
"Sec. 857. General and administrative provisions.
"Sec. 858. Transition provisions.
"Sec. 859. References in other laws.".

Redesignate the succeeding title and sections accordingly.

EAGLETON AMENDMENT NO. 981

Mr. EAGLETON proposed an amendment to the bill S. 1527, supra; as follows:

On page 133, line 11, after "Service", insert ", and including an employee referred to in section 2105(c) of this title who was first employed by the Government after December 31, 1983".

On page 292, strike out lines 7 through 11.

On page 292, line 14, strike out "SEC. 306." and insert in lieu thereof "SEC. 305.".

On page 293, line 12, strike out "SEC. 307." and insert in lieu thereof "SEC. 306.".

On page 293, line 25, strike out "SEC. 308." and insert in lieu thereof "SEC. 307.".

On page 296, line 25, strike out "SEC. 309." and insert in lieu thereof "SEC. 308.".

CHILES (AND EAGLETON) AMENDMENT NO. 982

Mr. EAGLETON (for Mr. CHILES, for himself, and Mr. EAGLETON) proposed an amendment to the bill S. 1527, supra; as follows:

On page 210, line 22, strike out "increased," and all that follows through page 211, line 1, and insert in lieu thereof the following: "increased on January 1 of each year after such date by the same percent by which annuities referred to in section 8462(b)(1) of this title are increased under section 8462(b)(2)(D) of this title in December of preceding year, and".

On page 212, line 20, strike out "paragraph (3)" and insert in lieu thereof "paragraphs (3) and (4)".

On page 214, between lines 23 and 24, insert the following:

"(4) If an eligible participant has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title, the amount of the annuity which the participant is entitled to receive under subchapter II of this chapter by reason of the application of paragraph (1) of this subsection—

"(A) while the participant is at least 55 years of age and under 62 years of age may not be less than the amount equal to 30 percent of the participant's final average pay computed on the date the participant becomes 55 years of age; and

"(B) on and after the date the participant becomes 62 years of age may not be less than the amount equal to 10 percent of the participant's final average pay computed on the date the participant becomes 55 years of age.".

On page 216, between lines 13 and 14, insert the following:

"(c)(1) Under regulations prescribed by the Office, the level benefits option provided under regulations prescribed pursuant to section 8417 of this title may be extended to cover the disability benefits payable to a participant under this subchapter.

"(2) The actuarial present value of the benefits expected to be paid to a participant under this subchapter and subchapter II of this chapter as provided under paragraph (1) of this subsection may not exceed the actuarial present value of the benefits that would be expected to be paid to such participant under this subchapter and such subchapter II if the adjustments authorized by such paragraph were not made, as determined under regulations by the Office.

On page 220, line 5, strike out "60" and insert in lieu thereof "50".

STEVENS AMENDMENT NO. 983

Mr. STEVENS proposed an amendment to the bill S. 1527, supra; as follows:

In the chapter analysis of chapter 84 of title 5, United States Code, as set out in section 101(a), insert after the item relating to section 8476 the following:

"8477. Treatment of individuals transferring among certain Government retirement systems.".

On page 256, between lines 14 and 15, insert the following:

"§ 8477. Treatment of individuals transferring among certain Government retirement systems

"(a)(1) The President shall prescribe regulations to assure that individuals who com-

mence participation in the Federal Retirement System, the Foreign Service Pension System, or the Central Intelligence Agency Pension System after participating in any other such retirement system is given credit for (A) all service performed while participating in any such retirement system for the purposes described in paragraph (2) of this subsection, and (B) rates of pay paid to such individual for any such service in computing an annuity under any such retirement system.

"(2) Service credit shall be given as provided in paragraph (1) of this subsection for—

"(A) the purpose of determining eligibility to retire entitled to an annuity under any retirement system referred to in such paragraph;

"(B) the purpose of satisfying vesting requirements under any such retirement system; and

"(C) the purpose of applying any applicable formula with respect to such service in computing an annuity under any such retirement system.

"(b) Under regulations prescribed by the President, any individual who commences participating in the Federal Retirement System, the Foreign Service Pension System, or the Central Intelligence Agency Pension System under circumstances similar to the circumstances described in subsection (b) or (c) of section 8471 of this title after having participated in another Federal Government retirement system established before January 1, 1984, shall be treated in the same manner as is provided in such subsection and section 8472 of this title.".

ROTH AMENDMENT NO. 984

Mr. STEVENS (for Mr. ROTH) proposed an amendment to the bill S. 1527, supra; as follows:

On page 133, strike out line 6 and all that follows through page 134, line 4, and insert in lieu thereof the following:

"(12) the term 'employee'—

"(A) except as provided in subparagraph (B) of this paragraph, means—

"(i) each individual referred to in subparagraphs (A), (E), (F), (H), (I), and (J) of section 8331(1) of this title, including an employee of the United States Park Police and an employee of the United States Secret Service, and including an employee referred to in section 2105(c) of this title who was first employed by the Government after December 31, 1983, and

"(ii) a Congressional employee as defined in section 2107 of this title, including a temporary Congressional employee,

any of whose employment by the Government after December 31, 1983, is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954; and

"(B) does not include any individual who—

"(i) is referred to in clause (i), (v), (vi), or (ix) of paragraph (1) of section 8331 of this title or in the undesignated material after clause (ix) of such paragraph;

"(ii) is subject to another retirement system for Government employees, except in the case of an individual—

"(I) who is an employee of the United States Park Police or the United States Secret Service, or is an employee referred to in section 2105(c) of this title who was first employed by the Government after December 31, 1983; or

"(II) who, without regard to this chapter, would be subject to subchapter III of chapter 83 of this title or would be eligible to be subject to such subchapter;

"(iii) is excluded under section 8402(b)(2) of this title; or

"(iv) was subject to subchapter III of chapter 83 of this title on December 31, 1983, has not had a break in service with the Government described in section 210(a)(5)(A) of the Social Security Act for a period of more than 1 year beginning after such date, and has not commenced participation in the System pursuant to section 8471 of this title;

On page 150, line 24, strike out "A" and insert in lieu thereof "Except as provided in section 8436(c)(1) of this title, a".

On page 164, strike out lines 4 through 7 and insert in lieu thereof the following:

"(5) Under regulations prescribed by the Executive Director, at least once each year a participant may modify the amount contributed pursuant to paragraph (1) or (2) of this subsection, as the case may be, or may terminate an election to make contributions under such paragraph.

On page 183, line 24, strike out "notwithstanding" and insert in lieu thereof "subject to".

On page 191, line 13, strike out "the reduced" and all that follows through "computed," on page 191, line 16, and insert in lieu thereof the following: "an annuity computed with respect to such participant as of the day before the date of death".

On page 191, line 19, strike out "reduced".

On page 192, line 8, strike out "the annuity" and all that follows through "computed" on line 11, and insert in lieu thereof "an annuity computed with respect to the participant as of the day before the date of death".

On page 236, line 6, insert a comma after "annuitant".

On page 236, line 8, insert a comma after "subsection".

On page 238, strike out lines 7 through 15, and insert in lieu thereof the following:

"(B)(i) the number of months, not to exceed 12 months, for which the annuity was payable before the effective date of the increase, counting any portion of a month as a month, or

"(ii) in the case of a survivor annuity payable to a surviving spouse or surviving former spouse of a deceased annuitant whose annuity has never been so increased, the number of months, not to exceed 12 months, since the annuity was first payable to the deceased annuitant, counting any portion of a month as a month.

On page 246, line 21, strike out "before" and all that follows through "1984," on line 22.

On page 248, line 2, insert "and" after "title,".

On page 248, line 4, strike out "and" and all that follows through line 6.

On page 248, line 8, insert "before January 1, 1984," after "performed".

On page 248, line 14, insert "and" after "title,".

On page 248, line 16, strike out "and" and all that follows through line 16.

On page 248, line 20, strike out "1987," and insert in lieu thereof "1984,".

On page 262, line 9, insert "subject to section 8495 of this title," after "(1)".

On page 262, line 16, insert "subject to section 8495 of this title," after "(2)".

On page 266, line 2, insert "and" after the semicolon.

On page 266, line 3, strike out "; and" and all that follows through line 6, and insert in lieu thereof a period.

TRIBLE (AND WARNER) AMENDMENT NO. 985

Mr. TRIBLE (for himself and Mr. WARNER) proposed an amendment to the bill S. 1527, supra; as follows:

On page 151, between lines 9 and 10, insert the following:

"(c)(1) A participant or former participant—

"(A) who, at the time of retirement, is married, and

"(B) who elects at such time (in accordance with subsection (b) of this section) a method of payment other than the method described in subsection (a)(2)(B) of this section,

may, during the 18-month period beginning on the date on which the participant or former participant may first make an election under subsection (b) of this section, elect the method of payment described in subsection (b)(2) of this section.

"(2)(A) An election under paragraph (1) of this subsection shall not be considered effective unless—

"(i) the spouse of the participant or former participant is provided advance notice of the election in accordance with such regulations as the Office shall prescribe; and

"(ii) the amount specified in subparagraph (B) of this paragraph is deposited into the Fund before the expiration of applicable 18-month period under such paragraph (1).

"(B) The amount to be deposited with respect to an election under this subsection is an amount equal to the sum of—

"(i) the additional cost to the System which is associated with providing a survivor annuity under subsection (b)(2) of this section and results from such election taking into account (I) the difference (for the period between the date on which the annuity of the participant or former participant commences and the date of the election) between the amount paid to such participant or former participant under this subschapter and the amount which would have been paid if such election had been made at the time the participant or former participant applied for the annuity, and (II) the costs associated with providing for the later election; and

"(ii) interest on the additional cost determined under clause (i) of this subparagraph computed using the average annual interest rate earned during such period by securities held by the Fund.

"(3) An election by a participant or former participant under this subsection voids prospectively any election previously made in the case of such employee or Member under subsection (b) of this section.

"(4) The annuity of a participant or former participant which is reduced in connection with an election under this subsection shall be reduced by the same percentage reductions as were in effect on the date on which the annuity of the participant or former participant commenced.

"(5) Rights and obligations resulting from the election under this subsection shall be the same as the rights and obligations which would have resulted had the participant or former participant made such election at the time of applying for an annuity.

"(6) The Office shall, on an annual basis, inform each participant and each former participant who has accrued entitlement under this subchapter of the right of election under this subsection, including the

procedures and deadlines applicable in making any such election.".

At the end of title III, insert the following:

18-MONTH PERIOD TO ELECT A SURVIVOR ANNUITY

SEC. 310. (a) Section 8339 of title 5, United States Code, is amended by adding at the end thereof the following:

"(o)(1)(A) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who notifies the Office at such time (in accordance with subsection (j)) that a survivor annuity under section 8341(b) of this title is not desired,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a reduction under subsection (j) made in the annuity of the employee or Member (or in such portion thereof as the employee or Member may designate) in order to provide a survivor annuity for the spouse of such employee or Member.

"(B) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who at such time designates (in accordance with subsection (j)) that a limited portion of the annuity of such employee or Member is to be used as the base for a survivor annuity under section 8341(b) of this title.

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a greater portion of the annuity of such employee or Member so used.

"(2)(A) An election under subparagraph (A) or (B) of paragraph (1) shall not be considered effective unless—

"(i) the spouse of the employee or Member is provided advance notice of the election in accordance with such regulations as the Office shall prescribe; and

"(ii) the amount specified in subparagraph (B) of this paragraph is deposited into the Fund before the expiration of the applicable 18-month period under paragraph (1).

"(B) The amount to be deposited with respect to an election under this subsection is an amount equal to the sum of—

"(i) the additional cost to the System which is associated with providing a survivor annuity under subsection (b)(2) of this section and results from such election taking into account (I) the difference (for the period between the date on which the annuity of the participant or former participant commences and the date of the election) between the amount paid to such participant or former participant under this subchapter and the amount which would have been paid if such election had been made at the time the participant or former participant applied for the annuity and (II) the costs associated with providing for the later election; and

"(ii) interest on the additional cost determined under clause (i) of this subparagraph computed using the average annual interest rate earned during such period by securities held by the Fund.

"(3) An election by an employee or Member under this subsection voids prospectively any election previously made in the case of such employee or Member under subsection (j).

"(4) An annuity which is reduced in connection with an election under this subsection shall be reduced by the same percentage reductions as were in effect at the time of the retirement of the employee or Member whose annuity is so reduced.

"(5) Rights and obligations resulting from the election of a reduced annuity under this subsection shall be the same as the rights and obligations which would have resulted had the employee or Member involved elected such annuity at the time of retiring.

"(6) The Office shall, on an annual basis, inform each employee and Member of the right of election under this subsection, including the procedures and deadlines applicable in making any such election.".

(b)(1) Notwithstanding section 404 of this Act, the amendment made by subsection (a) shall take effect 3 months after the date of the enactment of this Act.

(2)(A) Subject to subparagraph (B), the amendment made by subsection (a) shall apply with respect to employees and Members retiring before, on, or after such amendment first takes effect.

(B) For purposes of applying the provisions of paragraph (1) of section 8339(c) of title 5, United States Code (as added by this Act) to employees and Members retiring before the date on which the amendment made by subsection (a) first takes effect—

(i) the period referred to in subparagraph (A) or (B) of such paragraph (as the case may be) shall be considered to begin on the date as of which such amendment first becomes effective; and

(ii) the amount referred to in paragraph (2) of such section 8339(o) shall be computed without regard to the provisions of subparagraph (B)(ii) of such paragraph, relating to interest.

(3) For purposes of this subsection, the terms "employee" and "Member" each has the meaning given that term in sections 8331(1) and 8331(2) of title 5, United States Code, respectively.

RETIREMENT COUNSELING

SEC. 311. (a)(1) Subchapter III of chapter 83 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 8349. Retirement counseling

"(a) For the purposes of this section, the term 'retirement counselor', when used with respect to an agency, means an employee of the agency who is designated by the head of the agency to furnish information on benefits under this subchapter and chapter 84 of this title and counseling services relating to such benefits to other employees of the agency.

"(b) The Director of the Office of Personnel Management shall—

"(1) establish a training program for all retirement counselors of agencies of the Federal Government; and

"(2) designate and publicize a telephone number at the Office which annuitants under this subchapter or chapter 84 of this title may call to obtain answers to questions relating to retirement benefits under this subchapter or such chapter and which is to be used exclusively for such purpose.

"(c)(1) The training program established under subsection (b)(1) of this section shall provide for comprehensive training in the provisions and administration of this subchapter and chapter 84 of this title, shall be designed to promote fully informed retirement decisions by employees and Members under this subchapter and participants under chapter 84 of this title, and shall be revised as necessary to assure that the information furnished to retirement counselors of agencies under the program is current.

"(2) The Director shall conduct a training session under the training program once each quarter-year.

"(3) Once each year, each retirement counselor of an agency shall successfully complete a training session conducted under the training program.

"(c) The Director shall assign the responsibility of receiving and responding to calls made to the telephone number designated under subsection (b)(2) of this section to a sufficient number of employees who are knowledgeable about the provisions and administration of this subchapter and chapter 84 of this title to assure that prompt and effective assistance is furnished to annuitants.".

(2) The chapter analysis at the beginning of such chapter is amended by inserting after the item relating to section 8348 the following new item:

"8349. Retirement counseling.".

(b) Notwithstanding section 404 of this Act, the amendments made by subsection (a) shall take effect on the date of enactment of this Act.

TEXTILE AND APPAREL INDUSTRY RECOVERY

HATFIELD AMENDMENTS NOS. 986 AND 987

(Ordered to lie on the table.)

Mr. HATFIELD submitted two amendments intended to be proposed by him to the bill (H.R. 1562) to achieve the objectives of the Multifiber Arrangement and to promote the economic recovery of the United States textile and apparel industry and its workers; as follows:

AMENDMENT No. 986

In paragraph (1) of section 4 of the matter proposed to be inserted, insert "(except subpart A)" after "schedule 6, part 1".

AMENDMENT No. 987

At the end of the bill, add the following new section:

SEC. ——. Notwithstanding any other provision of this Act, any limitation imposed by this Act on the quantity of textiles and textile products entered, or withdrawn from warehouse, for consumption in the customs territory of the United States shall not apply with respect to any article provided for in subpart A of part 1 of schedule 7 of the Tariff Schedules of the United States.

DISTRICT OF COLUMBIA APPROPRIATION ACT, 1986

HUMPHREY (AND ARMSTRONG) AMENDMENT NO. 988

Mr. HUMPHREY (for himself and Mr. ARMSTRONG) proposed an amendment to the bill (H.R. 3067) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 20, strike out lines 10 through 25 and insert in lieu thereof the following:

SEC. 118. None of the funds appropriated under the Act shall be used to pay for abortions for which Federal funds are not available under the Medicaid program (title XIX of the Social Security Act).

MATTINGLY AMENDMENT NO. 989

Mr. MATTINGLY proposed an amendment to the bill H.R. 3067, supra; as follows:

At the proper place in the bill, add the following new section as follows:

"SEC. ——. Notwithstanding any other provision contained herein, none of the funds appropriated under this Act may be used to advertise for or award, retain or otherwise obligate payment for contractual and related professional services for District agencies at any level which would directly or indirectly exceed the level of expenditure or obligation for such services for fiscal year 1985, or the sum of Twenty-One-Million, Seven - Hundred - Eighty - Thousand - Dollars ($21,780,000), whichever is the lesser.".

HART (AND OTHERS) AMENDMENT NO. 990

Mr. HART (for himself, Mr. LAUTENBERG, and Mr. LUGAR) proposed an amendment to the bill (H.R. 3067), supra; as follows:

On page 27, between lines 8 and 9, insert the following:

SEC. 134. (a) None of the Federal funds provided in this Act shall be used by the District of Columbia to obtain a major league baseball franchise to be located in the District of Columbia.

(b) The Congress expresses no preference with respect to the activities of any municipality to obtain a major league baseball franchise.

SPECTER AMENDMENT NO. 991

Mr. SPECTER proposed an amendment to the bill (H.R. 3067), supra; as follows:

At p. 32 after line 4 insert

SEC. . There are authorized to be expended from amounts otherwise available to the District of Columbia government (including amounts appropriated by this Act or revenues otherwise available, or both) such sums as may be necessary to finance the District's participation in a student loan revenue bond program. Sums authorized to be expended by this section shall remain available without limitation as to fiscal year until such student loan revenue bonds have been paid or payment has been provided for.

At p. 3 after line 16 insert

COURT STUDY

For a Federal Contribution to the District of Columbia $100,000.

TRIBLE AMENDMENT NO. 992

Mr. SPECTER (for Mr. TRIBLE) proposed an amendment to the bill (H.R. 3067), supra; as follows:

H.R. 3067 is amended by adding at p. 8 after line 5:

Provided further, that not to exceed $50,000 of this appropriation shall be used to reimburse Fairfax County, Virginia, for expenses incurred by the County during fiscal year 1986 in relation to the Lorton prison complex. Such reimbursement shall be paid in all instances in which the District requests that the County provide police, fire, rescue, and related services to help deal with escapes, riots, and similar disturbances involving the prison.

The District shall make a quarterly report to the Chairman of the Senate Appropriations Subcommittee on the District of Columbia regarding the amount and purpose of reimbursements made to the County, and the amount of the authorization remaining for such reimbursements.

GRASSLEY AMENDMENT NO. 993

Mr. SPECTER (for Mr. GRASSLEY) proposed an amendment to the bill (H.R. 3067), supra; as follows:

On page 32, line 5, add the following new section;

SEC. 134. The District of Columbia shall construct three signs which contain the words, "Sakharov Plaza." These signs shall be placed immediately above existing signs on the corners of 16th and L and 16th and M Streets, Northwest. These should be similar to signs used by the city to designate the location of METRO stations. In addition, a sign shall be placed on city property directly adjacent to, or directly in front of, 1125 16th Street designating the actual location of Sakharov Plaza.

CONSOLIDATED OMNIBUS BUDGET RECONCILIATION

CRANSTON-BURDICK AMENDMENT NO. 994

(Ordered to lie on the table.)

Mr. CRANSTON (for himself and Mr. BURDICK) submitted an amendment intended to be proposed by them to the bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Congress); as follows:

On page 164, after line 25, insert the following new section:

SEC. 711A. PAYMENTS TO SOLE COMMUNITY HOSPITALS.

(a) ADJUSTMENT TO PAYMENT AMOUNT.—Section 1886(d)(5)(C)(ii) of the Social Security Act is amended by inserting after the second sentence thereof the following: "In the case of a sole community hospital which experiences, in any cost reporting period after the cost reporting period which was used as the base for determining the target amount for payments to such hospital under paragraph (1)(A)(i)(I), a significant increase in operating costs attributable to the addition of new inpatient facilities or services at such hospital (including the opening of a special care unit), the Secretary shall provide for such adjustment to the payment amounts under this subsection for such cost reporting period and subsequent cost reporting periods as may be necessary to reasonably compensate such hospital for such increased costs, corrected as necessary for any change in the hospital's case mix in the cost reporting period for which the payment is being made.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to payments for cost reporting periods beginning on or after October 1, 1983.

Mr. CRANSTON. Mr. President, on behalf of myself and the distinguished Senator from North Dakota [Mr. BURDICK], I am today submitting an amendment, No. 994, to S. 1730, the proposed "Consolidated Omnibus Budget Reconciliation Act of 1985." Our amendment would provide certain sole community hospitals with adjustments in their Medicare payments to account for services instituted after the end of the so-called base-year—the time period from which operating costs are used to determine the hospital's prospective payment rate.

This amendment is intended to rectify a very serious inequity affecting a small community hospital in Clearlake Highlands, CA—and possibly about 10 others—which, if left uncorrected could force the hospital out of business. Redbud Community Hospital is a 40-bed hospital serving a predominantly old and poor population. Redbud is designated under Medicare as a sole community hospital and is the primary source of health services available to many citizens of Clearlake Highlands.

SOLE COMMUNITY HOSPITALS

Mr. President, during consideration of the Social Security amendments of 1983, which established the Medicare prospective payments system [PPS] based on diagnosis related groups [DRG's] Congress recognized the relatively higher unit costs of providing services incurred by sole community hospitals [SCH's] due to the special circumstances, such as remote location and small size, which qualify them for SCH status. Specifically, an SCH's reimbursement rate is based 75 percent on a hospital-specific rate and 25 percent on the regional DRG rate. Unlike other hospitals under PPS which will eventually be paid totally by a national DRG rate, SCH's remain at the 75 to 25 ratio I have just described. Thus, accurate calculation of the hospital-specific portion of that ratio is critical to an SCH's economic survival.

Nevertheless, when Blue Cross of California, under contract with the Health Care Financing Administration calculated the reimbursement rate for Redbud, it did not take into account Redbud's costs of providing three new services that are necessary for it to meet the needs of its community. The target hospital-specific rate was computed using the hospital's costs for its base-year, 1982-83. However, just 7 days after the end of the hospital's base-year, Redbud opened new cardiac care and intensive care units and, 6 months later, it began operating a new pharmacy unit, which had long been under development. With 65 percent of the hospital's patients being Medicare beneficiaries, these added services ensure that the patients have access to a full range of life-saving medical services.

In the 1983 law establishing the PPS, Congress clearly indicated its intention that exceptions and adjustments in Medicare reimbursement for SCH's be provided when special circumstances exist to warrant such consideration. Section 1886(d)(5)(C)(iii) of the Social Security Act, added by section 601(e) of the 1983 amendments, directed the Secretary to provide by regulation for such "exceptions and adjustments" to payment amounts to these hospitals "as the Secretary deems appropriate." In addition, section 1886(b)(4)(A) of the Social Security Act—enacted in section 101(a)(1) of the Tax Equity and Fiscal Responsibility Act of 1982—states in part:

The Secretary shall provide for an exemption from, or an exception and adjustment to, the method . . . for determining the amount of payment to a hospital where events beyond the hospital's control or extraordinary circumstances . . . create a distortion in the increase in costs for a cost reporting period (including any distortion in the costs for the base period against which such increase is measured).

REDBUD HOSPITAL DISTRICT VERSUS HECKLER

From the day the hospital was due to enter the prospective payment system on July 1, 1984, Redbud Community Hospital has struggled with the Department of Health and Human Services to develop a reasonable rate of reimbursement to account for these new services. Without an adjustment in Redbud's base-year target rate, the SCH provision, intended to benefit SCH's would have the effect of unduly penalizing Redbud because the higher proportion of its Medicare reimbursement based on a hospital-specific rate does not reflect its actual operating costs.

Thus, on June 29, 1984, Redbud filed suit against Health and Human Services Secretary Heckler challenging the intermediary's determination of its PPS rate. Because of the lawsuit, Redbud has not entered the PPS and has continued to be reimbursed under the previous method.

The United States District Court for the Northern District of California issued a preliminary injunction on July 30, 1984, which directed the Secretary to issue regulations to take into account the special needs of SCH's, the special needs of hospitals serving disproportionate numbers of Medicare and low-income patients, and unforseen extraordinary and unusual costs incurred by hospitals after the base year, and to provide for a timely review of an intermediary's estimate of a hospital's target rate under PPS.

This injunction was modified on June 14, 1985, to require specifically that the regulations be published by July 1, 1985. Although HCFA did issue those regulations on July 1, Supreme Court Justice William Rehnquist stayed the order on July 24, and, subsequently, HCFA withdrew the regulations on July 31.

Thus, more than one year has now transpired and Redbud is still being reimbursed under the pre-PPS method because HCFA has failed to provide for an adjustment in Redbud's base-year target rate. Redbud estimates that it will lose between $30,000 and $50,000 per month without such an adjustment. This would force the hospital to default on its State-issued bonds and jeopardize the availability of care to the rural community that must depend on Redbud for hospital services.

The amendment we are proposing would enable Redbud Hospital—and any other SCH that has added necessary hospital services—to be reimbursed reasonably and fairly under the PPS system.

DISPROPORTIONATE-SHARE ADJUSTMENT

Mr. President, I would note that HCFA's footdragging in making adjustments for SCH's is not an isolated situation. Under the Social Security amendments of 1983, the Secretary of HHS was required to make adjustments in the PPS for hospitals that serve a disproportionate number of low-income elderly patients. In addition, the Deficit Reduction Act of 1984 required the Secretary, prior to December 1, 1984, to develop and publish a definition "of disproportionate share hospitals" and to provide the Congress with a list of hospitals meeting this criterion. However, at this point, the Secretary remains out of compliance with these requirements under the 1983 and 1984 measures.

In response, the Finance Committee has included in the reconciliation bill a provision to require the Secretary to make additional payments to all PPS hospitals serving a disproportionate share of low-income Medicare patients.

COST ESTIMATE

The Congressional Budget Office has estimated that this amendment would cost $3 million in fiscal year 1986 and $5 million during each of fiscal years 1987 and 1988. This estimate was based on the assumption that 10 SCH's—out of 394 Medicare-qualified SCH's—would be affected.

Mr. President, $13 million over 3 years is a very modest amount. But the survival of 10 hospitals may be at stake. If Redbud Hospital and the other nine hospitals that have either added or will add services are unable to meet their financial obligations, thousands of patients will be denied access to health-care. Congress intended that these hospitals should be fairly compensated, and I believe that $13 million is a reasonable amount to spend to preserve needed health services for thousands of Americans throughout the country.

CONCLUSION

When PPS was developed, Congress recognized that modifications in the system would need to be made in order to ensure that hospitals with special circumstances are treated fairly. When the intended modifications are not made by the Secretary—as in the case of the disproportionate-share hospitals—the Congress must take action to ensure that its intent is carried out through adjustments in the legislation.

Mr. President, the amendment I am offering will help ensure, as I believe Congress has intended all along, that SCH's can continue to provide essential health-care services to the people living in the remote areas the SCH's serve. We must ensure that sole community hospitals, the primary source of health care to citizens throughout rural America, remain economically viable.

Therefore, I urge the support of my colleagues for this amendment.

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that the Committee on Agriculture, Nutrition, and Forestry has scheduled a hearing to examine the marketing, transportation, handling procedures, and inspection of agricultural commodities in connection with grain purchases by foreign nations and to examine incidents pertaining to the loading, handling, and inspection of the Soviet vessel *Marshal Konev*.

The hearing is to be held on Tuesday, November 12, 1985, at 9:30 a.m. in room 328-A Russell Senate Office Building.

Please contact the committee staff at 224-2035 if further information is needed.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, November 7, in order to receive testimony during a closed hearing on the nomination of Stanley Sporkin, of Maryland, to be U.S. district judge for the District of Columbia.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON DEFENSE POLICY ACQUISITION

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Defense Acquisition Policy of the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, November 7, to receive testimony on the implementation of 1984 defense procurement legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the Subcommittee on Science, Technology, and Space of the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Thursday, November 7, to conduct a meeting on insurance and space commercialization.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE FALLACY OF ARMS SALES TO RED CHINA

● Mr. GOLDWATER. Mr. President, by its inaction, the Congress has sanctioned the first direct military sales by our Government to Red China. This is a short-sighted policy that holds no advantages to the United States, other than the immediate gratification of a few contractors, but it does threaten to disturb the peace and security of East Asia.

The United States is placing its reliance upon the wrong government. Instead of cowtowing to Peking, we should be strengthening our ties with the Republic of China on Taiwan and improving the self-defense capabilities of our long-time, trusted ally on that island.

The romance with Red China is nothing new. I recall that certain officials in the Carter administration viewed Communist China as the Pacific anchor on NATO. Unfortunately, the groundwork for a Peking-Washington defense relationship that began in the Carter administration has been expanded by the present administration.

Secretary of State Haig visited Red China in June 1981, and announced that the United States was willing to sell lethal military equipment to Peking. Secretary Shultz held 4 days of talks with Communist officials in February 1983, including the subjects of technology transfer and military cooperation. In May 1983, Secretary of Commerce Baldridge promised Red China's leaders that the United States would allow them to buy advanced technology barred to the Soviet Union. Secretary of Defense Weinberger made a conditional offer in September 1983 to sell the Red Chinese certain defensive weapon systems and negotiated the exchange of working military missions.

Then the August 1984, Secretary of the Navy Lehman issued a statement saying that his visit to Red China had laid a foundation for future military cooperation, a visit that was followed by a meeting in January 1985 between General Vessey, Chairman, Joint Chiefs of Staff, with Red China's Chief of General Staff Yang. Last month, Air Force Chief of Staff General Gabriel was in Peking and it is speculated he discussed how the United States can help modernize Red China's Air Force.

Peking's first major purchase of United States equipment was through the commercial sale last year of 24 S-70C2 Sikorsky helicopters, civilian versions of the military "Black Hawk." Then, in August this year, Red China reportedly signed a contract with General Electric to acquire five GE LM 2500 gas turbine naval engines for destroyers.

The first foreign military sales package, which was included in the administration's recent notice to Congress, covers the design and general layout of an artillery munitions factory and date packages for M-82 primers, M577A1 and M739A1 fuses, and M107 155mm projectiles. There have been scattered reports in the news media of other potential arms sales, including Hawk antiaircraft missiles, improved TOW antitank missiles, with a larger warhead capable of greater armor penetration, Mark 46 antisubmarine torpedoes, General Dynamics's Phalanx close-in weapons system designed to protect surface ships from cruise missiles, modern towed sonars, and avionics to upgrade and modernize Red China's F-8 fighter.

At the same time as these moves toward closer defense cooperation with Communist China have occurred; the administration decided not to sell an advanced fighter aircraft to Taiwan and issued a joint communique with Red China declaring "that the United States intends to reduce gradually its sales of arms to Taiwan." The relevance of the Republic of China to our strategic interests has been lost in the sales rush to penetrate the market in Red China.

Unfortunately, our policymakers have blinded themselves to the fact that the task of modernizing Communist China's military is so enormous she could never realistically become a match for the Soviet Union. James Gregor estimates that the United States would have to give Red China well over $100 billion in military aid in order to build its military capabilities sufficiently to deter a Soviet attack. When the cost of domestic infrastructure is included, the total defense modernization program would be in the area of $300 billion.

Although Red China could not become a military counterweight to the Soviet Union, it can pose a serious threat to United States allies in East Asia. While Red China's effect on the global balance is being exaggerated, its position as a regional power is being overlooked.

In addition to having the potential of destabilizing the position of our true friends in Asia, it appears no thought has been given by the administration to what impact United States arms sales may have on the domestic situation in mainland China. Why American officials have not considered the possibility that Red China's leadership will not remain friendly to the United States is beyond me.

Whatever the efforts of the 81-year-old Deng to name his own successors, no one has any real idea of what group will succeed him. There is little the United States can do to change the politics of a billion people, but what we may unknowingly accomplish by providing military assistance is to significantly alter the internal balance of power on the mainland. Since we cannot predict what the effect will be, this is a risky move that clearly is unwise to pursue any further.

Mr. President, a sensible policy for the United States would emphasize the strategic role of the Republic of China. From a strategic standpoint, Taiwan and the offshore islands stand at pivotal positions between the main sea lanes connecting the Indian and Pacific Oceans through which flows the petroleum from Mideast wells that fuels the economies of Japan and South Korea and which serves as a link with the United States 7th Fleet. Taiwan bridges the surrounding air and sea lanes and provides a valuable strategic asset for the United States. This becomes ever more apparent as the situation in the Philippines deteriorates.

The United States has it within its capacity to improve the position of the Republic of China and thus to strengthen its strategic significance to Western interests. The first priority is to offer Taiwan new, all-weather fighter interceptors to replace its aging inventory. Ideally, a creditable antiblockade defense would also include new helicopters to identify and track submarines, effective countermissile measures, and other enhanced defense capabilities.

Mr. President, I would repeat that instead of seeking a military relationship with Communist China, the interests of the United States will be best served by strengthening existing ties with the pro-Western and private enterprise nations of Asia and the Pacific.

Finally, Mr. President, I wish to share with my colleagues an excellent commentary on the subject of the arms sales relationship between the United States and Red China authored by Martin Lasater, director of the Asian studies center at the Heritage Foundation. Mr. Lasater's article appeared in the November 5 issue of the Washington Times and it provides a realistic analysis of the subject. I ask that it be printed in the RECORD.

The article follows:

[From the Washington Times, Nov. 5, 1985]

SELLING ARMS TO CHINA

On Sept. 30 the administration sent Congress notification of the first U.S. arms sale to the People's Republic of China. The $98 million package included the design and general layout of facilities to produce artillery ammunition, primers, fuzes, and explosives, plus technical data packages for M82 primers, M577A1 and M739A1 fuzes, and M107 155mm projectiles.

The administration justified the sale as a means of further enhancing the U.S.-PRC military technology cooperation and of improving overall Sino-American relations. The sale is designed to enhance the compatibility of U.S. and PRC artillery ammunition.

Although the sale opens the door on direct U.S. military assistance to the People's Liberation Army, neither the Senate Foreign Relations Committee nor the House Foreign Affairs Committee has scheduled hearings on the Foreign Military Sales deal. Significantly, leadership in both Houses decided to postpone hearings until more controversial sales, such as advanced avionics to upgrade PRC figures, are announced in the future.

By bringing China into the FMS program, U.S. military assistance to the PLA will become institutionalized and thus more efficient and wide-ranging. Increased competition among defense manufacturers and among the armed services themselves will push the quality and quantity of sales ever upward.

This may be good news to some, but there are real dangers in opening this Pandora's box. Previous attempts by the PRC to seize Quemoy and Matasu in 1954-1955 and in 1958 were accompanied by intense artillery barrages. In view of the impatience recently displayed by the Chinese over the Taiwan issue, it is not inconceivable that some day the PRC may use U.S. artillery shells to kill Republic of China soldiers on the offshore islands.

But more disturbing is the fact that the artillery package now before Congress is just the tip of the iceberg of planned arms sales to Peking. TOW anti-tank and various surface-to-air missiles have been discussed widely in Washington as appropriate items to sell to the Chinese. Yet anyone familiar with Taiwan's defense capabilities recognizes that tanks are one of the ROC's chief shoreline defenses against a PRC invasion and that fighters are essential to disrupt any invasion attempt.

Also seriously being contemplated by the administration is the sale of weapons and equipment designed to enhance PLA naval and air capabilities. Since the key to Taiwan's security is air and naval superiority over the Taiwan Strait, U.S. military assistance to the PRC in these two categories would contribute directly to Peking's ability to defeat Taiwan. Moreover, air and naval weapons sales would increase PRC force projection capabilities, a fact noted in warnings issued by members of the Association of Southeast Asian Nations (ASEAN), South Korea, and Japan.

Very few Americans oppose friendly relations with China. But direct U.S. military assitance to the PLS crosses a dangerous threshold. Exactly where will the line be drawn on which weapons to sell to Peking? Will appropriate countermeasures be made available to Taiwan, ASEAN, South Korea, and Japan? As PLA capabilities improve with U.S. assistance, will the administration make more firm its defense commitments to the people of Taiwan as mandated by the 1979 Taiwan Relations Act? In helping the PRC counter a perceived Soviet threat, will not the United States also hasten the day when Peking may conclude that it is able to settle the Taiwan issue by force? And in view of rapidly improving Sino-Soviet relations, how appropriate are U.S. arms sales to China?

These are the sort of questions the administration must answer before it submits additional FMS requests for the PRC. The administration needs to issue precise public guidelines on the extent of U.S. arms sales to China. This area of Sino-American relations is far too sensitive to evolve piecemeal.●

B'NAI B'RITH AGAINST DRUNK DRIVING

● Mr. DODD. Mr. President, allow me to pay a tribute to a dedicated group of Connecticut citizens who do us all a great service. On Sunday, November 17, the Connecticut Valley Council B'nai B'rith and B'nai B'rith women are sponsoring "BBADD," or B'nai B'rith Against Drunk Driving. It will be a day of events designed to increase awareness about the dangers of drunk driving and to convince alcohol and drug users to refrain from driving while under the influence.

Drunk driving ranks as one of America's most serious health and safety issues. It accounts for more than 25,000 fatalities and hundreds of thousands of injuries annually. It costs billions of dollars in lost productivity and costs to society. Traffic accidents are the leading cause of violent death among people of all ages, and more than 40 percent of all fatal accidents are drug and/or alcohol related.

I am proud of the strong actions my State of Connecticut has taken recently to rid our streets and highways of drunk drivers. The Governor has appointed a task force on driving while intoxicated and the legislature has mandated more severe penalties for persons found guilty of driving under the influence of alcohol or drugs. Most recently, the drinking age was raised to 21 in order to reduce the incidence of teenage drinking and driving accidents.

However, stronger legislation and stiffer penalties will not, in themselves, solve this critical problem. Each individual citizen must develop an awareness or the dangers we pose, to ourselves and to others, when we operate a motor vehicle under the influence of drugs or alcohol.

B'nai B'rith, an international Jewish service organization committed to promoting health, education and social well-being, has adopted the commendable goal of educating Connecticut citizens about these dangers through B'nai B'rith Against Drunk Driving. In my opinion, they deserve a great deal of credit and thanks. I am proud of their important contribution to my State.●

MEASURING THE SERVICE ECONOMY

● Mr. INOUYE. Mr. President, I request that a New York Times article on the importance of improving our Nation's data on the service sector be printed in the RECORD. As the article clearly and effectively illustrates, our current lack of sufficient data on this dynamic sector of our economy impedes our efforts to reduce services trade barriers and leads to misinterpretations of our domestic economic position and overall trade balance. It also hampers the growth and development of existing service industries by keeping managers in the dark about actual efficiency and potential growth areas.

The Coalition of Service Industries, together with concerned Senators, has been successful in addressing this problem in part through providing more funds to the Departments of Labor and Commerce to upgrade their services data collection efforts. While significant improvements have been made, much more needs to be done. Services should be included in the 1987 quinquennial census, for example, as a major step toward developing a services data base reflective of its importance to employment, GNP, and international trade.

The fact that this important issue and the efforts of the Coalition of Service Industries have been highlighted in the article is encouraging, and I hope the momentum will continue to build.

The article follows:

MEASURING THE SERVICE ECONOMY

(By Eileen Shanahan)

WASHINGTON.—"We've been looking at the economy with one eye; it's time to open the other eye," says Joan E. Spero, senior vice president of the American Express Company.

She is talking about the lack of adequate data on what is widely considered the most dynamic part of the American economy today: the service sector.

Gregory Ross, vice president of planning and development for A.R.A. Services Inc., a diversified commercial food and health service company, puts the same issue another way.

"With the information we have now," he says, "it's like trying to use a 20-year-old road map that doesn't have the interstates to figure out the fastest way to get places."

The shortage of data hurts the economy in diverse and often unpredictable ways. For example, the United States is expected to apply pressure in upcoming trade negotiations for lower import barriers for services such as insurance and banking. But our negotiators will be hamstrung, say many service-company officials, because the Government may know too little about the volume and price of service imports and exports to build an effective case. "We know how to measure all those autos that go out," says Mrs. Spero. "But how do you capture the services flows—banking, insurance and so on?"

While the Government has taken steps in recent years to redress the imbalance, most service-company executives agree that far more needs to be done. They worry that major business and public-policy decisions are being made with inadequate data that distort perceptions of reality.

"We have a hangover of restrictive thinking when it comes to services," says Walter W. Heller, professor of economics at the University of Minnesota and a former chairman of the Council of Economic Advisers. "People still think about the service sector in terms of the Middle Ages—low productivity activities like barber shops. There's all this handwringing about the basic industries, like autos, but computers are just as basic. These obsolete thought patterns are part of what's getting us into our protectionist posture."

The list of statistical pitfalls for business executives and Government policy makers is impressive. It includes the following:

Measuring imprecisely the output of service industries. This may have led to a chronic underestimating of overall economic growth and productivity gains. Nancy Teeters, the former Federal Reserve Board Governor who is now director of economics for the International Business Machines Corporation, feels certain that "there's a lot of productivity gain going on" in the economy that's being missed because of inadequacies in measuring what computers do.

Overstating the nation's trade problems. Harry L. Freeman, executive vice president of American Express, thinks exports of services are considerably bigger than estimated. He notes that the Commerce Department put a figure of $60 billion on service exports a couple of years ago but he thinks it may actually be more like $100 billion, because of unreported business activity.

"The trouble is that a lot of people don't realize they're exporting services," he says. "Americans manage hospitals around the world; that's an export of services. If a U.S. law firm bills a German bank for telling it what Congress is doing on the tax bill, thats an export."

Hampering business efficiency. Most Government statistics track only broad categories of services. This not only makes it hard for service companies to identify their best potential growth areas, but also can prevent service-company managers from comparing their companies' performance, in sales or in efficiency, with the rest of their industry.

For example, Mr. Ross of A.R.A. Services said he would like to know how large a slice home health care services are taking from the market for nursing homes—his company is in both fields but bigger in nursing homes. Since the two lines of business are lumped into one statistical category, he cannot find out.

Traditionally, the Government's statistics gatherers have focused primarily on manufacturing and, to a lesser extent, on the other goods-producing industries—mining, construction and agriculture. Services received short shrift. The goods-producing industries were always considered the heart of the economy, while services were a frill. Manufacturing and the other goods-producing industries were the most vulnerable to cyclical ups and downs, and therefore had to be studied more closely. Only manufactured and agricultural products were significant exports.

There is evidence now that none of these things are as true as they once were. Just how much is hard to say, of course, because of the lack of data.

The goods-producing industries last year accounted for only 32 percent of the dollar value of what the nation produced and 29 percent of the jobs. Services, broadly defined to include everything else—transportation, communication, public utilities, wholesale and retail trade, finance, insurance, real estate, business and personal services and government—accounted for the rest.

Those things that most people think of as services (health care, legal work, barber and beauty shops, repair services and so on) constitute what economists call the "service industries," as opposed to the "service sector." The service industries accounted for 14 percent of domestic production and 22 percent of employment last year. At that, their share of the nation's employment was larger than that of manufacturing, which now employes 19 percent of the work force, though manufacturing still produces about 25 percent of gross domestic product, as it has for the past 25 years.

Yet, beyond the basic measures of employment and income for broad categories, we do not know much about services, many statistical experts say, especially when compared with our detailed knowledge of manufacturing.

Dolls, saws, lace, razors and cigars all are measured in the Government's statistics. Each is what is known as a four-digit industry under the standard industrial classification, whose sales, employment, inventories and capital investment, among other facts, are collected.

By contrast, every type of legal service will be found under just one four-digit industry code and there are no specific data for such relatively new services as cable TV or physical fitness facilities.

Part of the problem is that services are not so easily measured as manufactures. How do you measure a unit of output from a computer when its work can range from a simple piece of word processing to an infinitely complex analysis of a problem in finance or physics?

Walter B. Wriston, the retired chairman of Citicorp, argues that figures on business investment are losing validity because they fail to measure "human capital." Writing a software program, he says, "may require only a relatively trivial sum of money, as compared to the amounts of money we used to think of as capital in entering, say, a heavy manufacturing business. On the other side of the coin, the knowledge-capital accumulated in the software writer's head, or in the documentation, or on disks, is very substantial and very real. A strong argument can be made that information capital is as important, or even more critical, to the future growth of the American economy than money. Despite this perception, this intellectual capital does not show up in the numbers economists customarily look at or quote about capital formation."

All the concern and complaining tends to obscure the steps that have been taken to improve service statistics—an effort that is being led by large service companies, a new trade group, the Coalition of Service Industries Inc. (see box), and the Labor and Commerce Departments.

The Bureau of Labor Statistics has, since June 1984, been collecting and publishing data on earnings and hours worked in 82 service industries that it could not cover separately before, most of them in transportation, public utilities, wholesale and retail trade, and finance, insurance and real estate.

And already, the new information has paid dividends. Janet L. Norwood, the Commissioner of Labor Statistics, points out that the improved B.L.S. surveys showed that companies providing temporary help to other employers were among the fastest growing service businesses. Mrs. Norwood thinks future surveys of companies that supply temporary workers may help identify cyclical swings in the economy.

And with an additional $1.3 million that Congress appears to be ready to add to its finding this year, B.L.S. will look into ways to measure the elusive output of service industries. B.L.S. had hoped to start some of this work two years ago, when Congress also added funds—$750,000 at that time—that had not been requested by the Reagan Administration. But the Office of Management and Budget instead forced the Labor Department to use the money to cover part of the Government-wide pay raise that went into effect that year.

Also in the works is a revision and updating of the standard industrial classification, which will provide the framework for the benchmark economic censuses that will be taken in 1987, as they are every five years. The S.I.C. is also supposed to be updated every five years but the 1982 work was cut off before completion for budgetary reasons.

Trade is another area in which an effort is being made to revise, expand and upgrade the statistics, as policy makers look to the service sector to help lower the nation's trade deficit. Over the last few years, a surplus of trade in services has helped to offset the huge deficit in the balance of trade in goods. That surplus has shrunk, however, to a reported $18.1 billion in 1984 from $41.2 billion in 1961, according to Commerce Department figures.

The United States has already served notice that it will insist that the next round of talks on GATT, the General Agreement on Tariffs and Trade, reduce trade barriers on services. Some less-developed countries—India and Brazil are named by many—are already resisting.

Senator Daniel K. Inouye, Democrat of Hawaii, the principal Congressional advocate of better funding for statistics on services, says he "hears rumblings from all over—Europe, as well as Asia—about closing their doors to our banks, insurance companies and credit cards."

However, the effort to upgrade statistics on trade in services is yielding mixed results. Some of the problems of obtaining this sort of information are at the heart of a battle that is taking shape between the Commerce Department and O.M.B. over a Congressionally mandated survey to establish the benchmark data for international trade in services. O.M.B. just last week rejected the survey form prepared by the Commerce Department's Bureau of Economic Analysis on the ground that it would impose an unwarranted burden on business.

Significantly, even some companies, such as American Express, that have been in the forefront of the fight to get better data on services, agree with O.M.B. that filling out the proposed form would require tens of thousands of hours of staff time. Du Pont, for one, estimated the cost at $100,000. It is not yet clear whether a compromise can be reached.

Complaints like these tend to stir Sidney L. Jones, Under Secretary of Commerce for Economic Affairs, who is about to return to private industry, to "an emotional outburst." After devoting 80 percent of his time the last two years to upgrading economic statistics, he has found that "Corporate

C.E.O.'s go around being statesmen, talking about the need for better data. Then the controllers and accountants who have to do the work get the forms and they sabotage the whole thing."

He added, "Many parts of the business community are pleading for a more aggressive trade policy, yet they have this extreme reaction toward the gathering of statistics. If the business community wants good decisions made, they're going to have to provide the information."

PUSHING CONGRESS FOR BETTER SERVICE

Spearheading the drive to improve the Government's measurement of the service economy is a relatively new and unknown trade association, the Coalition of Service Industries, Inc. It is lobbying Congress for additional funding and giving technical help to the agencies that gather, analyze and publish the statistics.

The coalition, founded in 1982, claims among its accomplishments the enactment of laws giving services as favorable treatment as goods under United States trade laws and extending Export-Import Bank financing to exports of services.

The group has 26 member corporations, most of them well-known public companies. At the top of the list, alphabetically, is the American Express Company. At the bottom, Young & Rubicam Inc., the advertising agency. Other members include major financial corporations (Citibank, Chase Manhattan Bank, the First Boston Corporation and Merrill Lynch & Company, among others); three of the big accounting firms (Peat Marwick, Coopers & Lybrand and Deloitte, Haskins & Sells); a communications giant (CBS Inc.); a financial publisher (the Dun & Bradstreet Corporation) and several large insurance companies.

Today, the group is more urgently interested in Washington's plans to overhaul the tax code than in improving service statistics. Its top priority is to persuade Congress to preserve intact the beneficial tax treatment now afforded income from a company's overseas subsidiaries. The coalition is still trying to hammer out a consensus on other major tax issues, such as retention of the investment tax credit and the tax treatment of research and development.

Officers and board members are mostly chief executives of member companies. The current chairman is Maurice R. Greenberg, chief executive of the American International Group, who was also one of the coalition's founders. Among the other founders was Washington lawyer Robert Strauss, the former Democratic Party chairman.●

SAFE LANDING

● Mr. DOMENICI. Mr. President, I would like to pay tribute today to two Albuquerque pilots, Charles D. Leonard and Robert H. Bennett, whose heroism and quick action on the morning of October 25 saved the life of Nancy Eves of Alamogordo, NM, and prevented what very probably could have been an airplane crash.

To briefly sum up the events of the day, Nancy Eves was a passenger in a single-engine 1940's vintage Globe-Swift aircraft piloted by her husband, Charles Emmett Eves, when he suddenly suffered a heart attack and collapsed. The Albuquerque airport tower responded to her call for help and asked for assistance from pilots in the area to help her land, since she had never flown a plane before.

Two pilots from Cutter Flying Service of Albuquerque, Charles Leonard and Robert Bennett, responded immediately and were in the air within 4 minutes after receiving the call. Positioning themselves next to the stricken aircraft they talked and guided Nancy Eves to a safe landing at Albuquerque International Airport. The aircraft landed safely, thanks to their quick response and brave action.

Such heroism should not go unnoticed by this body, and I would like to pay tribute to Charles Leonard and Robert Bennett. I ask that the detailed accounts of their heroic act, which appeared in the Albuquerque Journal and Albuquerque Tribune, be printed in their entirety in the RECORD.

The articles follow:

TWO PILOTS TALK PLANE DOWN TO SAFE LANDING

(By John Temple)

The call came from the tower, "We've got an incapacitated pilot, can you put up an airplane and help the lady down?"

Within minutes, Chuck Leonard, chief pilot of Cutter Flying Service, and Bob Bennett, a charter pilot for the service, were airborne, embarked on a dramatic rescue mission.

Nancy Eves was alone behind the wheel of a single-engine plane about 12 miles southwest of Albuquerque with her pilot-husband slumped, incapacitated beside her.

"If she flew around out there by herself she would have probably run into the ground someplace," Leonard said.

"The tower had been talking to her and she was having a problem finding the airport. The airport was very difficult to see," he said.

"She did a super job of getting that airplane down," he said. "Even for a good pilot this airplane is difficult to land."

Leonard, 53, and Bennett, 56, caught up with Eves' mid-1940s vintage plane at about 600 feet, six miles southwest of the airport.

It happened fast. The rescue took about 10 minutes, Leonard said.

"Mainly we were just trying to talk to her and keep her busy. We told her she was doing a good job."

"We got on her wing and we could see the pilot slumped over, leaning back in his seat," Leonard said.

"Bob told her, we're on your wing now and everything's looking good."

Although Nancy Eves apparently could hear Bennett, a former military flight instructor, the two pilots could not make out what she was saying to them over the radio.

They were within 50 feet of her and started guiding her back to the airport.

"We were matching everything she did. We were in a sense almost flying her airplane," Leonard said.

Nancy Eves was in the passenger seat of the Globe-Swift airplane. The plane has two wheels to steer the plane and two sets of rudder pedals so she was able to control the plane without having to move her husband.

But she had no brakes for the landing. The only brake pedals were below her husband's feet, Leonard said.

"She knew how to handle the throttle," Leonard said. Although she may have never flown an airplane, she had probably watched her husband fly enough to know the basic procedures, he said.

"She was able to turn the aircraft and roll out whenever we asked her to. Her turns were good. She knew hot to put the landing gear down. But she was pitching up and down," he said.

They guided her to a landing on the airport's longest runway, which at 13,000 feet would give her the best chance for a successful return to earth, Leonard said.

And Nancy Eves handled it beautifully, Leonard said.

"She touched down very nicely," he said.

The plane bounced, and eventually rolled to a stop off the runway, where rescue teams were ready. The landing gear collapsed.

Leonard and Bennett circled the airport and landed. By the time they were down, Nancy Eves was gone and they haven't had a chance yet to talk to her.

This was the first time the two experienced pilots had talked down a novice pilot.

"It was a hell of a good feeling," Leonard said.

It was a difficult day to find the airport because of the haze and glare from the sun. Even Leonard said he couldn't see it until he was a mile away. He used his knowledge of the area to guide him, he said.

Although neither pilot had ever flown a Globe-Swift, Leonard said they knew how to tell Eves what to do because the basic controls of each airplane are similar.

FIRST-TIMER LANDS AIRPLANE AFTER HUSBAND'S HEART ATTACK

(By Patricia Gabbett)

A 54-year-old Alamogordo woman who'd never flown a plane managed to land one just off an Albuquerque International Airport runway Friday after her husband, the pilot, suffered an apparent heart attack and died.

Nancy Eves circled the airport for about 35 minutes under the radio guidance of two veteran pilots.

Hours later, Mrs. Eves downplayed her feat, expressing gratitude for her rescuers and for the fact that her husband, Charles, 63, died quickly.

"I'm glad he went that way," she said. "We were on final approach when he died. I just straightened up the plane, reached over him and pushed the talk button on his controls.

"They started directing me around the traffic pattern so I wouldn't be in anyone's way, and the next thing I knew, another plane was beside me. Those men did a fabulous job."

Her husband was piloting the single-engine Swift aircraft on its final approach around 8 a.m. when he apparently went into cardiac arrest, said Lowell Pratte, city director of aviation.

Control-tower workers noticed Eves' aircraft turn toward the east and radioed to tell him he was heading for the wrong runway, said Bill Halleck, assistant air traffic manager.

"That's when she (Mrs. Eves) got on and said she didn't know how to fly and that the pilot was unconscious," he said.

And that's when the tower sent out a plea for someone to help bring the Eveses down, Halleck said.

Chuck Leonard and Bob Bennett of Cutter Flying Service heeded the call.

Within four minutes, they were in the air. Leonard positioned their Beechcraft Bonanza beside the Eves' plane, and Bennett began instructing Mrs. Eves to gain altitude.

"She was about six miles southwest of the airport and about 600 to 700 feet above ground when we spotted her going south," said Leonard, a 30-year pilot and vice president of operations at Cutter. "We joined on her wing and had her turn to the north because we wanted a longer final (approach.)"

At one point, the plane was so low that Leonard and Bennett thought Mrs. Eves might hit some power lines.

"That frightened me but otherwise, she was doing real well," said Bennett, a charter pilot for 33 years.

As Mrs. Eves' plane hit the runway, it spun around and came to an upright stop in some dirt at the runway's side.

The impromptu coaching team came together so quickly because "we just happened to have a plane out front, and I didn't have a flight scheduled," Bennett said.

Neither pilot had ever coached a plane down before. "I'm just amazed she did so well," said Bennett.

Mrs. Eves said "all passengers in private planes should have a pinch-hitter course in flying."

Both of the airport's commercial runways were shut down during the ordeal, and six outbound flights were delayed, said Pratte.

Halleck said Mrs. Eves was in "an emergency situation" for about 35 minutes, and that the episode was "a commendable example of emergency crews helping an airman in distress."

PILOT DIES, WIFE LANDS PLANE

(By Manuel Franco and Dennis Domrzalski)

An Alamogordo woman with no experience as a pilot was talked through an emergency landing in a small plane at Albuquerque International Airport today as her husband lay slumped in the pilot's seat, dead of an apparent heart attack.

Charles Emmett Eves, 63, of Alamogordo, was dead upon arrival at Lovelace Medical Center, a hospital spokeswoman said, His wife, Nancy Eves, 54, was not seriously injured.

Heroic efforts by two Cutter Flying Service pilots and emergency measures by the Federal Aviation Administration enabled the woman to land the plane.

Eves said her husband became rigid, slumped over, she grabbed the wheel pushed the radio button and asked for help.

"I wasn't scared; I only wanted to get him down," she told *The Tribune.*

"The only thing going through my mind was to get him to safety. "These two men are heroes. They flew the plane, I just held on to the wheel."

She said she was not afraid once she started following their instructions.

Witnesses gathered outside on the ground to shout encouragement as the single-engine craft approached the runway.

"Oh, gosh, I thought she was going to kill herself," recalled pilot Bob Batchelder, who saw the craft come down, bounce at least four times and veer off the side of the runway, losing a wheel.

"They ought to give that woman a medal," he said.

"That plane is real dicey even for an experienced pilot."

Eves, a project engineer for Dynelectron, a defense contractor for Holloman Air Base, and his wife were flying to Albuquerque from Alamogordo in their 1940s vintage Globe-Swift aircraft when the incident began.

The plane is described by pilots as a rare "collector's airplane."

Bob Turner, controller supervisor; Alfred Jaramillo, controller; and Ron Sevin, assistant controller, were in the Federal Aviation Administration control tower when trouble started.

About 8 a.m. the aircraft had filed a normal landing request, they said.

At the time the plane had started its approach, was about 15 miles out and traveling about 60 to 70 mph.

When the plane was 4-5 miles out, Jaramillo noticed that it was veering off course and notified his supervisor. At that time, a woman's voice told the tower that her husband-pilot had passed out.

Jaramillo gave her instructions on how to gain altitude and directed her to an unpopulated area south of the airport. Her elevation at the time was 5,352 feet and she was able to gain an altitude of 6,500 feet, although her inexperienced hand caused the plane to "porpoise," or alternately gain and lose altitude.

Meanwhile, Turner got on the phone to call various private airports to try to find a pilot who knew about the controls on the old-fashioned Globe Swift.

He found immediate response from Cutter Flying Service and two of its pilots took off on the rescue mission.

Two runways were closed down at the airport until the aircraft landed.

Eves, upon leaving the hospital, went to Cutter Flying Service, where she hugged both pilots and told them "You're heroes; without them I wouldn't be here at all."

She said she and her husband were flying into Albuquerque so her husband could get blood transfusions from United Blood Services. She said he needed transfusions for a neurological disorder.

Tower officials cleared the stricken plane for landing on runway 8, the widest and longest of Albuquerque International's runways.

The landing came at 8:40 a.m.

"She did a beautiful landing, but when she came to a stop, she did lose a wheel," said FAA's Turner.

"Everybody involved did a great job of getting her down safety."

Eves later confirmed that she had never had any flying experience, except as a passenger on trips with her husband.●

TRIBUTE TO SPENCER KIMBALL

● Mr. WILSON. Mr. President, the Bible tells us that young men shall dream dreams, and old men shall see visions. Spencer W. Kimball was a man who did both. As a result of his lifelong ministry on this planet, life was enhanced for millions of its people. And, the good news of Jesus Christ was made a living presence in the lives of countless persons, in this country and around the world.

Prophet Kimball presided over the Church of Jesus Christ of Latter-day Saints during a time of unprecedented growth. Under his administration, it went through a period of significant change and historic reforms. It became more than ever reflective of a world barely imaginable to Joseph Smith or Brigham Young. It opened its arms and strengthened its well-earned reputation for social outreach and institutional compassion. It played an important role in the spiritual and temporal lives of the American people.

Mr. President, at a time when our society seems to be rediscovering as never before the bedrock values of faith, family, and community, the influence of Spencer Kimball and his church have been enormous. That in itself has been a blessing bestowed on all of us. Now Prophet Kimball has lived out his days among us. But his example lives on. It will no doubt continue to inspire millions to make God's work their own. For this, as for so much more, every American today should pause and reflect in profound gratitude for this man, and the mission he undertook.●

MODIFYING THE ENGLISH LANGUAGE REQUIREMENT FOR PERSONS OVER 65 SEEKING NATURALIZATION

● Mr. D'AMATO. Mr. President, I am pleased today to join my colleagues on both sides of the aisle who have cosponsored S. 1296, introduced by my distinguished colleague from Maryland. This bill recognizes the fact that there are many elderly people who want to become American citizens with all their hearts, but who, despite their best efforts, simply cannot master the English language.

S. 1296 carefully imposes very precise conditions on applicants for the new exemption. First, candidates must make diligent efforts to learn the English language. Second, they must be over 65 years of age. Third, they must have been lawful permanent resident aliens living in this country for at least 5 years. Applicants must still meet the other educational requirements by demonstrating adequate knowledge of U.S. history and government.

Mr. President, this bill will affect only a few thousand people each year. Yet, in making the difference between whether they will or will not achieve their life-long dreams, it will affect them very greatly indeed. I commend Senator MATHIAS for introducing this humanitarian legislation. I urge my colleagues to cosponsor this bill and to give it their enthusiastic support.●

THE GRAMM-RUDMAN-HOLLINGS PROPOSAL

● Mr. McCONNELL. Mr. President, I would like to bring to my colleagues attention on exchange of views which I recently had with the Louisville Courier-Journal on the Gramm-Rudman-Hollings deficit reduction proposal.

In my mind, Mr. President, we do a disservice to the American public when we reduce the deficit issue to the lowest common denominator of partisan politics. If deficit reduction is to be our goal, then we must resist the temptation to sharpen our political

rhetoric rather than our budget-balancing pencils.

Mr. President, I ask that the Courier-Journal editorial and my response be printed in the RECORD.

The material follows:

[From the Louisville Courier-Journal Oct. 30, 1985]

WHY NOT CUT DEFICIT BEFORE 1986 ELECTION?

Politics, not economics, is at the heart of the Gramm-Rudman-Hollings budget-balancing amendment. So it's entirely fitting that Democratic opponents of the measure are insisting that voters get a taste of its effects before the congressional elections.

In its current form, the amendment—attached to a bill raising the national debt ceiling—would aim for a $180 billion federal deficit for the current fiscal year. That's well below the record $211.9 billion deficit chalked up in fiscal 1985, which ended September 30. But forecasts by the Congressional Budget Office suggest that the $180 billion figure is within easy reach for this year, fiscal '86.

This means that lawmakers (mostly Republicans) who are pushing Gramm-Rudman-Hollings could take credit next year for doing something about the deficit—but without suffering the political consequences of deep cuts in popular federal programs.

The pain would come later, when the amendment requires $36 billion-a-year deficit reductions until the budget is balanced. The measure also stipulates that, if Congress missed an annual deficit target by more than seven percent, the President could unilaterally cut spending—except for Social Security, existing defense contracts and several other items. (In theory, tax increases also could be used to achieve the prescribed deficit reduction, but no one expects Mr. Reagan to do so.)

The Democrats' strategy is simple. They want to lower this year's deficit target to somewhere between $160 billion and $172 billion, instead of $180 billion, so that Congress and/or Mr. Reagan would be forced to start cutting spending right away. Then, in November, 1986, voters would go to the polls armed with some knowledge about how the White House was implementing Gramm-Rudman-Hollings.

Mr. Reagan calls the Democrats' maneuvers, and the continuing debate on the amendment, "inexcusable dithering and delay." He wants quick and favorable action on the Gramm-Rudman-Hollings amendment. Partly, that's because the government can't resume borrowing until the debt ceiling is lifted; but Mr. Reagan also says the amendment is the surest way to put some teeth in the budget process.

Fine—but the dental work should be done this year. Let the voters see what kind of bite Gramm-Rudman-Hollings puts in federal spending. Mr. Reagan himself might benefit from prompt education on the subject. Some observers, including Les Aspin, chairman of the House Armed Services Committee, believe the amendment would do serious damage to the President's cherished military buildup.

If so, don't be surprised to hear Mr. Reagan grumbling, a year from now, about how Congress should have continued dithering and delaying instead of passing that blankety-blank budget-balancing amendment.

[From the Louisville Courier-Journal Nov. 6, 1985]

SENATE BUDGET PROPOSAL'S FOES SHOW POLITICAL HYPOCRISY

(By Mitch McConnell)

The Courier-Journal was right about one issue in its editorial commentary on the Gramm-Rudman-Hollings budget-balancing amendment. Politics is at work in the debate currently raging over this budget proposal.

However, the Courier-Journal is wrong to suggest that politics was the basis for drafting this legislation. Instead, it is politics that is at work to decimate a bill that will bring about a balanced budget in 1991.

Democrats and Republicans—75 in all—in the Senate voted for the Gramm-Rudman-Hollings bill. Democrats and Republicans, together, wrote the bill.

Only when the legislation was sent to the House of Representatives did the debate on the issue deteriorate to a partisan discussion of who is going to get the credit for balancing the federal budget.

Of course, in and of itself, Gramm-Rudman-Hollings does not make the tough choices. Gramm-Rudman-Hollings does, however, create a framework of discipline which requires Congress to change its spending ways. It sets up a procedure to systematically reduce the federal budget deficit—$38 billion per year—until, in 1991, the president will be required to submit, and Congress will be requireed to approve, a balanced federal budget.

Yet the House has cried "foul." They claim (and the Courier-Journal seems to concur) that the bill is drafted to postpone hard decisions until after 1986 congressional elections and was drafted to protect incumbent Republican senators. Nothing could be further from the truth.

Not only will Gramm-Rudman-Hollings force incredibly tough deficit reductions in 1986, but the toughest decisions will come only one month before election day.

The Gramm-Rudman-Hollings process requires the president to submit by Jan. 15, 1986, a budget with a deficit no greater than $144 billion—the leanest of his presidency. Six months before the election, Congress will be required to pass a budget with the same deficit target. If we fail, the president will be mandated to make across-the-board spending reductions. One month later the American public will go to the polls.

For the House Democrats to now oppose the Gramm-Rudman-Hollings bill on the grounds that it does not do enough soon enough represents the height of political hypocrisy. The reality is that Gramm-Rudman-Hollings will force those legislators who have built their political careers out of spending more and more of the taxpayers' money to say no. And that notion has struck fear in their overspending hearts.

Without question, Gramm-Rudman-Hollings represents a dramatic departure from current budgetary procedure. But then we are facing a dramatic debt—more than $2 trillion. We pay more to service that debt every year than we did on the entire budget only two decades ago.

Nearly 40 percent of all revenues collected by the federal government from 1985 personal income taxes will go to pay interest on our national debt. That's more than $300 billion that will not be available for social spending, or education, or transportation, or maintaining a strong defense.

Perhaps the easy solution is to avoid setting budget priorities altogether. Why not increase taxes, reduce the debt and continue spending ad infinitum?

The problem should not be solved by asking Kentuckians to send a greater portion of their paychecks to Washington. In Fiscal Year 1985 federal revenues actually rose by 10.1 percent from FY 1984. Let there be no confusion—we have a deficit because spending climbed 11.3 percent during the same time period. So much for easy solutions.

Time is running out for those in Congress whose political future is dependent on mortgaging the economic future of our country. No matter how much kicking and screaming they do, no matter how far they try to run, there are those of us in both houses and in both political parties who are committed to seeing that deficit-reduction discipline is sure and swift. That's why we support Gramm-Rudman-Hollings.●

THE 10TH ANNIVERSARY OF MACNEIL/LEHRER

● Mr. HOLLINGS. Mr. President, last week I had the pleasure of joining with a few of my colleagues and a number of other distinguished Americans in celebrating the 10th anniversary of a nightly news program hosted by the finest and most accomplished journalistic team on the airwaves—Robert MacNeil and Jim Lehrer.

"The MacNeil/Lehrer NewsHour," watched by some 12 million people on approximately 250 public television stations, represents the very best in public affairs and news programming. No other evening news program offers "MacNeil/Lehrer's" indepth documentary reporting and analysis on topics ranging from the Federal budget to the farm crisis to South Africa and the Philippines. And certainly no other program can match the thoughtful and probing interview format that Robert MacNeil, Jim Lehrer, and their correspondents and staff provide their viewers each weeknight.

To describe this program as quality television simply is not enough. It is superior television. "The MacNeil/Lehrer News Hour" does so much more than just look at the news of the day. It looks behind the news. Each night, "MacNeil/Lehrer" devotes extended coverage to a single story or issue, in addition to its review of breaking news. This hour-long approach to early evening news presentation is unparalleled by the major networks, all of which try to cram the day's news into a series of 2- 3-, and 4-minute segments in a half-hour time period—more like 20 minutes when you subtract for commercials.

I suppose the show's propensity for thoroughness and detail is what I appreciate most about it. We politicians all know that if you want to get your point across to the people on network television, you have to speak in the "20-second bite." Unfortunately, we all know that there are a lot of bad ideas that can sound good in 20 seconds, as well as a lot of good ideas that can sound bad. "MacNeil/Lehrer," thank-

fully, allows us to sit down, get all the facts on the table, and talk things through—perhaps even engage in a little debate. It is always informative. And those who watch it regularly, myself included, can count themselves as among the best-informed people in America.

Robin and Jim's association in television actually goes back further than 10 years. They teamed up in 1973 to produce the "America 1973" series on the Public Broadcasting Service, and millions of television viewers watched them anchor PBS's gavel-to-gavel coverage of the Senate Watergate Hearings in 1973. In October 1975, they moved into nightly news with the half-hour "The Robert MacNeil Report," the name of which was changed the following year to "The MacNeil/Lehrer Report." Perhaps the most satisfying change came 2 years ago, when the show expanded to a 1-hour format and became known as "The MacNeil/Lehrer NewsHour."

Over the years, Robin and Jim have co-anchored more than 2,500 programs, during which they interviewed more than 5,000 guests. Their program has received numerous prestigious awards. In just the past 2 years, "The MacNeil/Lehrer NewsHour" has won four Emmy's, a George Foster Peabody Award, and the George Polk Award.

Crucial to the program's success in recent years is a team of experienced and talented correspondents, producers, editors, and writers. I'd like to make particular mention of chief Washington correspondent Judy Woodruff, who joined the show 2 years ago after several years as an NBC White House reporter and Washington correspondent for the "Today" Show, and Charlayne Hunter-Gault, who has been with "MacNeil/Lehrer" since 1977 as the program's national correspondent. Charlayne, by the way, is a native of the town of Due West, SC, and we in the State are certainly proud of all her accomplishments. Finally, I'd like to commend Executive Producer Les Crystal, another NBC News alumni who joined the show in 1983.

Naturally, a program of the size and scope of the "The MacNeil/Lehrer NewsHour" requires more than human talent—it takes money. Fortunately, AT&T has come through with an extremely generous multiyear commitment to keep the program on the air. In fact, when "MacNeil/Lehrer" expanded to 1 hour, AT&T committed itself to the largest single-year underwriting in PBS history—$10 million. AT&T's ongoing support of "MacNeil/Lehrer"—now at 5 years—has given the show the stability it needs to maintain its high-quality programming. This association between "MacNeil/Lehrer" and AT&T has been an important one for those of us who enjoy watching more than just your standard network newscast, and I am grateful for it.

I congratulate Robin MacNeil and Jim Lehrer on their 10-year association in nightly news. I commend them for their talents and their hard work. And I'm sure I speak for all who faithfully watch "The MacNeil/Lehrer NewsHour" when I express my hope that the program will remain on the air for many years to come.●

NATIONAL SOCIAL STUDIES WEEK

● Mr. D'AMATO. Mr. President, I rise today to cosponsor a resolution, S.J. Res. 232, introduced by my distinguished colleague from Illinois to designate October 6, 1986, through October 10, 1986, as "National Social Studies Week."

Social studies is of great importance to the education of America's young people. It is through instruction in courses of history, geography, civics, and sociology in our Nation's elementary and secondary schools that our students are educated in the tenets of life, welfare, and relations of human beings in a society. In this manner, social studies uniquely contribute to the development of future citizens and leaders in our society.

Well over 100,000 teachers are dedicated to the instruction of our Nation's youth in social studies. In my own State of New York there are approximately 12,000 social studies teachers. Certainly, these professionals deserve recognition for the valuable service they perform for our Nation.

Mr. President, I urge my colleagues to join with me in the adoption of this resolution.●

MIDEAST TERROR

● Mr. HATFIELD. Mr. President, the PLO hijacking of the *Achille Lauro*, with its implications for United States policy toward Egypt and other countries, the proposed sale of United States arms to Jordan and its relationship to the peace process in the Middle East and the recent Israeli attack on a PLO facility in Tunisia all combine to remind us of the complexity and fragility of our relationship to that region. All too often the decisions which confront this Congress are made in an emotional, politically charged atmosphere devoid of balance and diversity.

In an effort to facilitate a more constructive debate, I have asked that a number of articles be placed in the CONGRESSIONAL RECORD. While I do not associate myself with every point of view expressed in these articles, I do believe that each one expresses a perspective worthy of consideration by every Member of this body.

Former President Nixon points out that terrorism directed against any civilized nation should not simply be viewed as the problem of the victim nation, but rather as an act of terrorism against the entire civilized world. Alfred Lilienthal reminds us that we must resist the temptation to interpret acts of terrorism simplisticly. Instead, we must remember that even terrorism has its root causes. Ze'ev Schiff makes a case that the PLO cannot be seen in shades of black and white. There are many factions within that organization, some of which are moderates who oppose violence and are struggling to maintain credibility.

These are all timely arguments that underscore the fact that there is no simple solution to the problems which confront the Middle East. I would urge my colleagues to take time to read the thoughts of these distinguished writers.

The material follows:

[From the New York Times, Oct. 15, 1985]

MIDEAST TERROR—THE PEACE PROCESS IS AGAIN PERILED

(By Ze'ev Schiff)

The recent round of terror and reprisals in the Middle East is threatening to nip the peace process in the bud. Those Israelis, Jordanians and Palestinians who still hope to reach a negotiated settlement must act now before the opportunity slips through their fingers.

The number of people killed and injured by Palestinian terrorism and Israeli reprisals has been rising steadily, and all parties appear to be losing their grip on events. The Israeli raid on Palestine Liberation Organization headquarters in Tunis led Egypt to suspend talks with Israel on the future of Taba, a disputed strip of beachfront in the Sinai, posing a serious threat to the fragile peace between those two countries. Attacks against people carrying American passports, especially those with Jewish names, have become a terrorist pastime, and the United States has been compelled to use force. Other countries, such as Tunisia, that are not directly involved have been drawn into the hostilities, and neighboring countries such as Italy have become incidental targets.

It is hardly the first time that terrorism has caused the situation in the Middle East to get out of hand. Terrorism was one of the causes of the escalation that led to the Six-Day War in 1967. It also played a crucial role in sparking the Lebanon war in 1982. The continued deterioration of the present situation will not only put an end to the peace process but may actually lead to large-scale clashes between countries—in effect, another war. Those who suffer most from this sequence of terror and reprisal are the moderate countries of the region. It is the radicals in both camps—those who oppose peace talks and want to drive a wedge between Israel and Egypt—who benefit.

What does all of this mean for the peace process? It is clear, for one thing, that the Lebanon war has not uprooted terrorism or liquidated the P.L.O. as either a political or a military force. Beyond this, it is evident that the longer it takes for Israel, Jordan and the Palestinians to move toward peace,

the more susceptible the process will be to violent disruptions from outside. Palestinian terrorism is a threat in itself, but as long as it is sure to provoke fierce Israeli reprisals, it is also a threat to peace.

Can the peace process be saved? Yasir Arafat and Shimon Peres still have some small hope of breaking out of the spiraling hostility between their peoples. The task is far from easy, but both know this may be their last chance before they are succeeded by more extreme forces waiting in the wings.

Mr. Arafat must realize that so long as he and his organization keep up their terrorist offensive, his pronouncements that he is prepared to enter the peace process will remain meaningless. For its part, Israel must recognize that it can find no substitute for the P.L.O. as the representative of the Palestinian people. Instead, it must work with the United States to draw those in the P.L.O. who are interested in peace more wholeheartedly into the process. Both parties are in a race against time. This may be the last chance they have before their peoples are plunged into civil war.

What distinguishes the recent upsurge of terror is that today, for the first time, acts of hostility are accompanied by an evident interest in peace both among the P.L.O. and in Israel. Why then, the outbreak of terror? How are we to explain the fact that even as the P.L.O. expresses its readiness to negotiate, it goes on perpetrating terrorist acts that jeopardize the entire peace process?

The official Israeli explanation is that terrorism is the P.L.O.'s raison d'ebe: That is why negotiations with if must be avoided. The problem with this view is that it fails to take account of the differences within the P.L.O. or among various incidents. It also allows Israelis to evade the main issue—negotiations with Palestinians on the future of the West Bank and the Gaza Strip.

There is no doubt that the part of the P.L.O. still led by Yasir Arafat is responsible for much of the recent terrorism. It is most unlikely that all these operations have been carried out without Mr. Arafat's knowledge or contrary to his instructions. There are direct links between some of this terror, including the highjacking of the Achille Lauro, and the Palestinians at his elbow.

But the present wave of terror is in part at least a result of the struggles among different factions of the Palestinian movement and among the factions under Mr. Arafat's control. The Palestinian leader is increasingly interested in joining in the peace process with King Hussein, but he also finds it necessary to demonstrate to his rivals in the Palestinian movement that he has not discarded the principle of armed struggle with Israel.

The recent escalation of terror may also be meant as a prelude to a negotiated ceasefire. That, after all, is precisely what happened in the summer of 1981 after the artillery duel between the P.L.O. and the Israelis on the Lebanese border. The advantage of such an approach for Mr. Arafat is that it would allow him to come to the table with Israel without making broad diplomatic concessions, while obliging Israel to cease military operations against the P.L.O.

[From the USA Today, July 3, 1985]

PRO-ISRAEL POLICY FEEDS VIOLENCE

(Alfred M. Lilienthal)

WASHINGTON.—Two years ago, after the first bombing of the U.S. Embassy in Lebanon, I wrote for USA Today:

"(The) tragedy in Beirut has its roots in Washington's abysmally unsuccessful, unjust, and undemocratic Middle East policy. . . . Unless (our) leadership endows Palestianians with a meaningful right to self-determination, including a two-state—Israel and Palestine—solution, we can only expect a repetition of yesterday's tragedy."

We cannot dismiss the hostage-takings simply as wanton acts by religious fanatics. The bias of our policy has fed the fires of hatred and violence.

Our Middle East chickens have come home to roost.

Israel's invasion and occupation of Lebanon, with Washington's covert support, has inflamed Islam, with its long-simmering resentment against the imposition of Western culture on its world.

The humiliation of seeing a triumphant Israel, maintained largely through U.S. power, dominant in all of Palestine and particularly in the holy city of Jerusalem, has bred a jihad long in the making.

George Washington warned: "The nation which indulges toward another an habitual hatred or an habitual fondness is in some degree a slave."

We have now sadly learned the degree to which we are a slave of our Zionist allies.

Israel ought not to have asked us to request the release of its 766 Shiite prisoners, taken from South Lebanon in a clear contravention of the Geneva Convention. The recipient of unprecedented financial, military, diplomatic, and political U.S. assistance—in fact enjoying the status of a 51st state—Israel ought to have voluntarily released the detainees.

No wonder many people are asking, "What price Israel?"

Through a free and open debate, without irrelevant interjection of the anti-Semitic label and incessant reminders of the Holocaust, we must immedately reassess our Middle East policy. At an international comference, Israel, the Palestine Liberation Organization, the USA, and the USSR could negotiate their differences.

A resolution of the Palestine question would not end the Lebanese devouring one another but would lessen the deep anti-Americanism and the threat to world peace through that area.

[From the Washington Times, September 9, 1985]

DEALING WITH TERRORISM

(BY RICHARD NIXON)

No one can quarrel with the proposition that the United States must not use military force unless we have the means to achieve our goal of victory. But we must recognize that where our interests are clearly involved, we must take risks to protect them.

Every military operation cannot be a sure thing. The United States is a great power with worldwide responsibilities. We will not prevail against an enemy willing to take any risk to achieve victory if we are unwilling to take some risks to prevent defeat.

The same principle applies to international terrorism. Some urge restraint in retaliating against terrorism because of the admittedly significant risk of casualties among civilians, hostages, and military personnel. But while we cannot act in every instance of terrorism, we should always act decisively when we know who is responsible and where they are. Otherwise we give carte blanche to these international outlaws to strike again.

If one group of terrorists succeeds in intimidating the United States, others will be encouraged to try, and more lives will undoubtedly be lost as a result. Swift, timely retaliation, even if there is some risk to innocent people, will mean that other terrorists will be less likely to threaten and kill innocent people in the future. Repeated threats to retaliate that are not followed by action are counterproductive. A president of the United States should warn only once.

Terrorism, whether undertaken by states, political groups, or individuals, is one of the most insidious and deadly aspects of the Third World War. The Soviet Union and its proxies use terrorism to wage covert war against the West and its friends and allies. It is also a tactic that our enemies use to try to drive the United States out of the Third World. We were forced out of Lebanon not by another country but by suicidal terrorist bands whom we could barely identify and whose sponsors remain out of our reach.

Our military forces can only fight an enemy they can see. All the military power in the world is useless against shadows. If the United States wants to continue to play a role in the Third World it must attack terrorism at its source. We must hold those who inspire it and pay for it accountable for their actions.

The most powerful weapon terrorists have is the civilized world's parochial approach to combating them. If Americans are taken hostage, the world considers it solely an American problem. If most of the passengers of a hijacked jet are Kuwaitis, the hijacking is considered primarily Kuwait's problem. When a car bomb explodes in the streets of Paris, we leave it up to France to respond.

By reacting in this narrowminded way, we play into the terrorists hands. Terrorism today is an international challenge to international order, and it requires an international response.

The Soviet Union's record in fueling international terrorism is well-known. But it is not the only nation that does so. The Ayatollah Khomeini's Iran and Muammar Qaddafi's Libya are both international outlaws that openly praise, protect, and incite those who commit terrorist acts. Such state-supported-and-sponsored terrorism is one of the most dangerous threats to peace in the world.

Dealings within and between nations depends on order. Diplomats must be able to travel, and embassies to keep their doors open, without fear of assassinations and attacks, and businessmen must be able to go about their business without being kidnapped. Terrorism breeds fear; fear breeds insularity and suspiciousness; and these inevitably will serve to drive nations apart. When that happens, the whole world will suffer the consequences.

In most cases of state-sponsored terrorism, military reprisals, though tempting, are impractical. But what has been most pathetic about the civilized world's response to terrorism is that it has made so little use of the wide array of choices short of military action available to it. Terrorism is a way to divide and conquer—but only if its victims allow themselves to be divided.

When terrorists act against one nation, other nations should respond as if it were an attack on them all—because, in essence, it is. The first impulse of other nations should not be relief that they were not the victims but outrage that someone was.

The civilized world must develop a unified policy for dealing with terrorism. All nations that are potential victims should pool and share intelligence-gathering and com-

munications resources. When military retaliation is appropriate, they must be prepared to act together.

Most important, they must recognize that even nations that support terrorism depend on their victims. While neither Iran nor Libya could survive without selling oil, the rest of the world could survive without Iranian and Libyan oil. In the past economic and diplomatic sanctions and quarantines have been justifiably criticized for being ineffective. They were ineffective, however, primarily because too few nations participated.

Terrorists will not be deterred by U.N. resolutions or expressions of outrage by leaders or legislatures. But they may be deterred once they realize that by using terror they will spark the wrath of all nations that do not want to exist in a world driven by a tiny minority who have resorted to violence in pursuit of their objectives. We will only eliminate terrorism if we choke it off by drawing the dark curtain of international condemnation around its sponsors.

And actions will speak louder than words. Unless they are willing to live peacefully in the community of nations, we cannot allow them any of the privileges of membership.●

NATIONAL ALZHEIMER'S DISEASE MONTH

● Mr. D'AMATO. Mr. President, I rise today to call the attention of my colleagues to the fact that the month of November 1985 is "National Alzheimer's Disease Month." The current knowledge base for this disease is relatively small. Thus, it is critical that we elevate public awareness and step up our research efforts into the causes of Alzheimer's disease and improvements in the care we provide its victims.

At the present time, the etiology of Alzheimer's disease is obscure, and relatively little is known about its pathogenesis. The diagnosis for this disease is based upon observation of the progressively degenerative mental status of individuals in whom other known causes for cognitive and memory impairment have been excluded. Although the victim's medical history, daily activities, neurological and psychiatric tests are taken into consideration, it is difficult to distinguish the Alzheimer's disease patient, particularly in the early stages, from someone suffering from depression or other functional states.

We do know, however, that Alzheimer's disease is one of the major problems facing our senior citizens. It is the major form of old-age senility. It is the most common cerebral impairment of older people.

In 1983, there were 27.4 million older Americans, 11.7 percent of our population, and the rate of individuals reaching the age of 65 is increasing. In New York State, roughly 12 percent of my 17.7 million constituents are over 65.

While presently there is no known cure for the approximately 2.5 million victims of Alzheimer's, Alzheimer's research has intensified, and developments since 1976 have made me optimistic for long-run success. But much more needs to be done.

I sponsored S. 750, legislation to better direct Federal funds under the Alzheimer's Disease Research Coordination Act of 1985 to improve our utilization of research funds by directing the National Institute on Aging [NIA] to coordinate research not only within the National Institutes of Health [NIH] and the Department of Health and Human Services [HHS], but also within the many other scientific disciplines outside of the usual research efforts on this disease. This bill also proposes to change the name of NIA to the National Institute on Aging and Alzheimer's disease to underscore its role in combating this disease.

Medicare does not financially compensate for Alzheimer's care. This lack of adequate health care for Alzheimer's victims has placed a tremendous financial burden on their families, estimated to be more than $25 million annually. Thus, I have sponsored S. 751, legislation which directs the Secretary of HHS, in consultation with other agencies, to establish 10 demonstration projects to determine the feasibility of providing for alternative benefits for those suffering from Alzheimer's disease or related disorders, who are entitled to Medicare.

Also, while there are Federal home health care programs available to our elderly, many are not useful since many of our senior citizens are unaware of them. Thus, I have sponsored S. 752, legislation to establish within the Department of Health and Human Services a home health clearinghouse to provide for our elderly a centralized computer system to obtain complete information on Federal home health care programs available to them.

Although the Federal Government has responded in large part to the needs of Alzheimer's sufferers, their families are still in large part the primary health care providers. Thus, I also have sponsored S. 753, legislation to promote the establishment of family support groups for victims of Alzheimer's disease and related disorders.

I believe this Nation is starting to understand how dangerous and debilitating Alzheimer's disease is among our older citizens. While Federal funding for research into this disease has significantly increased over the last 5 years—from $13 million in 1980 to over $55 million in 1985—the struggle for Alzheimer's and its victims continues. During this month of November, designated as National Alzheimer's Disease Month, I believe that we, as a nation, must consider additional alternatives to provide for better care for Alzheimer's victims. Public support in this effort plays an integral part in the efforts of the Federal Government to reach this goal.●

THE CENTRAL UTAH PROJECT

● Mr. METZENBAUM. Mr. President, in early October I released several reports prepared by the General Accounting Office which together identified at least $6 billion in subsidies to water users in the West. These reports presented convincing evidence that the Bureau of Reclamation is more interested in making cozy deals with local interests than protecting all Americans from unjustified, budget-busting subsidies.

One of the most egregious examples of the Bureau's mismanagement of its public trust was the Bonneville unit of the central Utah project. Although barely one-third completed, construction costs on this huge water supply project have ballooned to $2.1 billion and existing repayment contracts are woefully inadequate to recover the Federal investment. After years of stalling by the Bureau, taxpayers in 12 Utah counties will soon be asked in a referendum to nearly quadruple their local repayment obligation.

The referendum campaign has produced heated debate within Utah over the wisdom of this major new commitment of local funds to complete the Bonneville unit.

I welcome the repayment contract referendum in Utah, as well as the discussion of cost-saving alternatives for supplying water and modifying the project. The local dialog reflects the growing national realization that the Federal Government can no longer continue to bankroll grandiose water projects without major matching commitments of local funds.

I want to assure my colleagues from Utah and their constituents that regardless of the outcome of the local election, I as a member of the Energy and Natural Resources Committee, will work with them to secure whatever modifications and improvements are required to assure an affordable water supply for the future. I will also do what I can to develop a repayment contract that better protects taxpayers in Utah and the rest of the country. I am confident that a revised plan and contract for the central Utah project can be found that would better match tomorrow's water needs with today's budgetary realities.●

EXPANDED CAPITAL OWNERSHIP AND THE IDEOLOGICAL HIGH GROUND

● Mr. LUGAR. Mr. President, today I am introducing the third of four statements on expanded capital ownership. This is part of a position paper entitled "Project Economic Justice, a Revolutionary Free Enterprise Challenge to Marxism," prepared by Norman G. Kurland and presented for background study by the new Presidential

Task Force on project economic justice.

The concept of economic justice, in America and the rest of the world, pivots around a central idea: restoring and broadening private property ownership in the means of production as a fundamental human right. Private property tools for economic development should continue to be refined in the United States and exported as government and private sector policy.

A new constituency must be created who are for free enterprise and against collective and state ownership of industry and agriculture. To create that new constituency, the fight for freedom and democracy must be reinforced with economic justice, and economic justice must be built on four pillars: free labor, free markets, private property in the means of production, and expanded access to corporate equity ownership and profits. Since future ownership is largely determined by who has access to productive credit, widespread access to credit for expanded capital ownership is key to the future of free enterprise.

Mr. Kurland has prepared a four-pronged agenda for economic justice in Central America and the Caribbean Basin. I invited my colleagues to consider this agenda carefully, and I ask that his statement be printed in the RECORD.

The material follows:

[Project Economic Justice—Part III]

BASIC COMPONENTS OF AN AGENDA FOR ECONOMIC JUSTICE

(By Norman G. Kurland)

To succeed on the ideological front, it would help to organize on a regional basis, perhaps within a regional bank with central banking capabilities, such as the Central American Bank for Economic Integration. From such a base it would be easier to advise on the infrastructural changes that would be necessary within one or more of the developing countries willing to cooperate on the new agenda for stimulating private sector growth linked to broadened ownership.

The strategic objectives would be to maximize growth rates, jobs, and productivity of the private sector within selected countries or target areas, with a zero rate of inflation, and maximum ownership and profit sharing opportunities among all private sector workers as a supplement to free market wage rates.

The four main components of this agenda for economic justice are: (1) a new social contract with workers based on expanded capital ownership; (2) a two-tiered capital credit system for local banks; (3) a regional SDR to establish lower-tier-capital credit; and (4) the multinational corporation as a primary vehicle for accelerating private sector growth linked to expanded ownership. These are explained below in more detail.

A. A NEW SOCIAL CONTRACT WITH WORKERS BASED ON EXPANDED CAPITAL OWNERSHIP

The traditional wage system rests on a "conflict theory" of management-labor relations. The traditional system takes for granted that workers and owners have different interests and therefore assume that they will be in conflict. That assumption vanishes under a system which attempts to maximize the ownership opportunities of working people, whenever possible enabling the management and non-management workers to acquire up to 100% of the firm they work for.

The expanded ownership system assumes a merger of interests among all persons with an ownership stake in the enterprise. If implemented properly, maximum profits and maximum justice go together. Job security is enhanced by everyone agreeing to accept modest base wages, generally set in the freely competitive marketplace. This allows the company to operate with low fixed costs when times are rough. But workers participate in a monthly cash bonus plan and an annual cash bonus plan, both based on a formula linked to productivity and profits. A wage differential may be instituted so that the highest paid manager is paid a multiple of what other full-time workers are paid, with his increases also coming from his proportionate share of productivity and profits of the overall company; in this way all members of the team prosper or tighten their belts together.

The best ESOP models allow employees to vote their ownership stake in the company, normally measured by their shares of stock. An employee-owned company is generally structured to permit delegated powers and responsibilities, with a minimum of formal meetings or group decision-making. Thus, it is a system which must be delicately structured (like a republican form of government) to balance efficiency with justice; a high degree of autonomy for leadership decisions, with high levels of management accountability and disclosure of results; professionalism at the top, with self-management of the workplace. The basic principle of management is that of "subsidiarity," where authority is left as close as possible to those responsible for doing the work.

Workers earn their ownership shares, generally based on credit extended to them individually or jointly and repayable with their share of future profits. Ideally, the tax system would avoid the double tax on corporate profits, so that the capital credit for workers could be repaid with future dividends. In the United States workers are taxed on the bonuses or dividends they receive in cash, but they are not taxed until retirement on the stock they accumulate within an ESOP trust. Tax laws that allow workers to accelerate the rate of their equity accumulations help promote savings and investment within the private sector, while reducing the need for redistributive taxation. (See the "Expanded Ownership Act" introduced by Senator Long for additional tax reforms to encourage employee stock ownership.)

Remember, one of the unique features of an ESOP is that it systematically extends the benefits of capital credit among all workers of a company. This allows the employees to borrow to buy outstanding stock from an existing owner (including the government, where it wishes to denationalize a nationalized enterprise), or to buy newly issued stock directly from the company for meeting the expansion or working capital needs of the company. A properly designed loan to an ESOP is more secure than a straight loan to the company because, in addition to normal security on loan repayment, the workers have a stake in the outcome and there are special tax advantages for all parties.

B. A TWO-TIERED CAPITAL CREDIT SYSTEM FOR LOCAL BANKS

There is one thing that bankers, businessmen, and political leaders in the developing countries can agree on: high interest rates are a major barrier to sustaining a healthy free enterprise system. On the other hand, everyone would agree that nothing would do more to get everyone's attention and to promote a more broadly-owned and more just free enterprise system than to combine it with the carrot of a radically lowered interest rate. There is a logical way to create a differential of 7.5% or more in prime business loans that would be made available through local bankers. This strategy is known as a "Two-Tiered Interest Rate Policy." The rationale for this policy is as follows:

High interest rates are choking the life out of business. Today's interest rates have effectively stifled business expansion and modernization, have depressed innovation and productivity, and have curtailed the absorption into a revitalized private sector of millions of unemployed and underemployed and excess government workers in almost every free enterprise nation.

Much of today's economic malaise stems from the money-creating policies of central banks like the International Monetary Fund (IMF), which reflects the same policies as the Federal Reserve Bank and the central banks of the major Western economies. The IMF is an emergency lending organization to which 146 governments belong. Because of the central role the IMF plays in international finance, the debts of poor countries are expected to reach $650 billion by the end of 1983, nearly $400 billion of which is owed to private banks. Many of these countries cannot afford the interest payments at today's high rates, let alone the principal.

When it issues Special Drawing Rights (SDRs, sometimes called "paper gold"), the IMF "creates money" which can be used for making loans. We call this "pure credit," to contrast it from credit based on already existing savings. However, how "pure credit" is used determines whether it will be inflationary or not and whether or not it will be an asset-backed currency.

The IMF, like all central banks today including our Fed, fails to distinguish between supply-side and demand-side credit, between self-liquidating credit for productive purposes and non-self-liquidating credit for non-productive purposes. Self-liquidating credit is used to buy things intended to produce new wealth or future savings sufficient to pay its own acquisition costs. Non-self-liquidating credit (e.g., loans to cover government waste or consumer credit), by definition, is never used to buy things expected to "pay for themselves." While capital credit creates a healthy demand for the plant and equipment producers need to supply more consumer goods and increase real consumer incomes, non-productive government credit simply pumps new currency into the economy, giving consumers a false sense of their buying power. Productive credit increases the supply of new marketable wealth or is used to acquire new income-producing investments. Non-productive credit, in contrast, merely stimulates demand, creating artificial buying power to purchase existing wealth, commodities, and securities. For example, the IMF monetizes non-productive government deficits when it buys that government's debt paper, instead of allowing market savings rates to disci-

pline government overspending. This fuels inflation.

The discount powers of an international central bank like the IMF could be the key to uniting the workers and owners of developing countries, without taking anything away from present owners, except the dubious "right" to monopolize future access to capital credit. It should not be forgotten that control over capital credit represents control over future ownership patterns.

A more logical and just use of a central bank's credit machinery would be under a two-tiered interest structure. The higher level would be geared to *market-rate* yields on existing savings. This reservoir of credit would remain available for all forms of conventional loans, including loans to governments and state-owned enterprises. The higher interest rates would discourage these less productive and non-productive uses of credit. This works against inflation.

The proposed lower level would create a new reservoir of credit, reserved exclusively for structuring a more just and productive future for free enterprise. Only credit intended for productivity-oriented purposes in the private sector would be eligible.

But there is a hitch. The lower-tier would be reserved exclusively to channel the "magic" of future capital credit in ways that systematically transform wage-earners into an ever-widening base of capital owners, or to save farmers and entrepreneurs from losing their farms and businesses because of today's high interest rates. This combination of reduced credit costs and worker ownership is counter-inflationary by design.

For business reasons, and to underscore the injustice to workers of state-owned enterprises, this lower-tier should never be used, for example, to help refinance the $26 billion in debt like that recently negotiated with the Polish Government by Western bankers. No longer will Western capitalists give their own money to buy the rope to hang themselves. Today they use the savings of Western workers to supply the credit to build State-owned enterprises, at the expense of the capital-starved Western factories which are laying off their own workers. Instead, unsubsidized lower-tier credit would be used to denationalize some of the government-owned enterprises in communist countries and organize them into employee-owned stock corporations, using a "qualified ESOP." In this way, the "magic" of capital credit would become our most powerful weapon in pointing out the ideological contradictions of Marxist-Leninism.

Every dollar saved in interest costs could add a dollar to the bottom-line profits of the borrowing businesses and farms or save a dollar in prices to their customers. But it would also be a dollar for promoting economic justice for working people.

C. A REGIONAL SDR TO ESTABLISH LOWER-TIERED CAPITAL CREDIT

The third major component in the agenda for economic justice is to mobilize friendly countries in a development region like the Caribbean Basin in support of a new unit of international credit. The IMF cannot be expected to play this role. As mentioned earlier, the Central American Bank for Economic Integration might be the ideal place to start this new initiative. CABEI could, with the backing of the United States and countries which might respond positively to these ideas, issue a new currency, a Caribbean Basin SDR, to be used for regional economic development linked to expanded capital ownership and issued exclusively through the lower-tier discount window of the regional central bank as outlined below:

Eligibility for access to the lower-tier discount rate at the regional central bank should be based on the following criteria:

(1) The privilege of discounting "eligible" paper should be limited exclusively to commercial banks declared "eligible" by the regional central bank.

(2) "Eligible" loan paper should be:

(a) Limited to private-sector productive credit instruments;

(b) Issued for any commercial, industrial, or agricultural purposes or ventures determined to be economically feasible by the lending bank. (Credit for speculation in securities or commodities, unfriendly acquisitions, consumer or home purchase credit, public-sector programs, or for other nonproductive purposes should be declared specifically ineligible for lower-tier interest rates.);

(c) Designed to be repaid on a self-liquidating basis, primarily through projected future pre-tax profits of the enterprise guaranteeing the loan's repayment;

(d) Made the direct debt obligation of a capital credit mechanism that is "qualified" for ownership-expanding purposes by the regional bank or some expanded ownership authority approved by the cooperating countries in the region, including an ESOP trust for corporate employees; a general stock ownership corporation (GSOC), a professionally-managed real estate planning and development corporation for spreading equity ownership among residents of development communities; production and marketing cooperatives owned by workers and farmers; and small businesses and family farms which provide all their regular full-time workers with equitable opportunities to share in ownership and profits; consumer stock ownership plans (CSOPs) to spread equity ownership among customers of highly capital-intensive enterprises, like public utilities, cablevision, mass transit systems, etc.; and Village Corporations, for equity participation by rural workers in integrated agro-industrial enterprises.

(e) Collateralized by whatever tangible and intangible assets are to be acquired with the loan proceeds, plus shares of corporate stock to be acquired by an ESOP or other qualified capital diffusion mechanism;

(f) Guaranteed by the general credit of the sponsoring enterprise;

(g) Endorsed for negotiability by the member bank or banks discounting such paper;

(h) Insured to cover the risk of default, when appropriate, by a premium paid by the borrower or the lending banks to a regional central bank-approved public or private capital diffusion insurance company;

(i) Supported, when appropriate, by documented business plans and feasibility studies justifying the need for capital credit; and

(j) Endorsed by every collective bargaining unit representing employees of the sponsoring enterprise whose members are to receive ownership benefits as a result of the loan.

(3) All credit charges (including bank administrative charges and profits, the risk of default, etc.) above the fixed central bank discount rate of 1% or less, would be set by marketplace competition between qualified member banks. While higher-risk loans would naturally cost more, the normal bank mark-up on money to their best business customers would still keep the lower-tier prime rate at about 3%.

(4) The regional central bank could also require that all new currency issued through the lower-tier discount window be matched by "eligible paper," creating an asset-backed currency reflecting the economy's true increases in productive capacity. The central bank could add a 100% reserve requirement for lower-tier participation. This would eliminate the power of member banks under fractional reserve banking to leverage their lending capacity for "non-eligible" purposes with currency supplied at lower-tier rates. The supply of new money would thus be tied closely to real income-producing growth of the economy, thus keeping the region's overall money supply under tightened control of the regional central bank.

WHAT ARE SOME OF THE OTHER ADVANTAGES OF A TWO-TIERED SYSTEM?

The two-tiered interest system would not involve taxpayer dollars. No loan funds or interest rate subsidies would come from the taxpayers or in any way increase government borrowings. (In fact, this radical lowering of the cost of money to local banks and their business borrowers—by accelerating growth in private investment, jobs, and productivity—should quickly begin to cut government deficits.)

Since the two-tiered interest strategy would strike directly at the underlying causes of inflation—by discouraging excessive demand with higher interest rates and by encouraging maximum production with 3% prime rates or lower—an "inflation premium" would not be justified for capital credit linked to broadened ownership.

"Eligible" commercial banks, not the regional central bank itself, would still scrutinize feasibility of each loan before it was made. Approved local banks with access to the discount windows of the regional central bank would make all loans and set interest charges to eligible borrowers. Thus, bank lending practices could continue to insulate the central bank from political pressures to favor one borrower over another.

For both the upper and the lower tiers, the market would still determine the cost of money, including bank charges and profits. Bank markups and differential risk premiums which are normally included in interest rates would not be reduced. Both the volume of loans through the commerical and agricultural departments of local banks would greatly expand, along with bank profits. Once commercial loan officers fully understand their expanded role and new business opportunities under the two-tiered credit system, they can be expected to support it. (Today less than 20% of all U.S. new capital formation is financed through commercial banks.)

D. THE MULTINATIONAL CORPORATION AS A PRIMARY VEHICLE FOR ACCELERATING PRIVATE SECTOR GROWTH LINKED TO EXPANDED OWNERSHIP

American assistance to the developing countries could be vastly expanded, with reduced taxpayer support, if U.S.-based multinational corporations could be encouraged to link their investments overseas with the expanded ownership objectives called for under the Industrial Homestead Act. (See the author's paper "The Future of the Multinational Corporation.") For example, through use of ESOP financing the multinationals would not only convert their foreign employees into capital owners, but in so doing would automatically be creating a broadened political constituency for a global common market based on free enterprise principles. No troops or foreign aid could offer a more effective safeguard against

future expropriations and nationalizations of U.S.-based companies around the world. This would also facilitate the transfer of U.S. knowhow and technology in ways that would further peaceful growth and expanded U.S. markets.●

DEPAUW UNIVERSITY

● Mr. QUAYLE. Mr. President, as a member of the Senate Labor and Human Resources Subcommittee on Education, I take great interest in education and related issues. I believe that citizenry, legislators, parents, students, community, leaders, and educators have to play an important part in developing our education system to its fullest potential. The education system is among our most important institutions. In making a commitment to education, we foster and nourish the development of a people and the future of a nation.

America's educational institutions provide a service to not only their individual students but to entire communities. The absence of knowledge is detrimental to the progress of our Nation and the burden of ignorance is borne by not one, but all. In improving the understanding and knowledge of a people, we benefit from a better future.

DePauw University is one such notable institution that merits recognition. A small liberal arts university in my home State of Indiana, it has excelled in the promotion of quality education and experience at all levels and for all students. It exemplifies the American educational system at its best.

As an alumnus of DePauw University and as a Representative of the people of Indiana, I would like to recognize this institution for its unparalleled progress in its fundraising sesquicentennial campaign. In April of 1983, DePauw University began a campaign designed to raise funds for the development of its endowment fund. Only 2½ years into its campaign, contributions total an astonishing $102,070,000, far exceeding the original goal. Gifts amounting to $42 million have been specifically set aside for academic scholarships at the request of some donors. The campaign continues through June 1987, which marks the university's 150th anniversary celebration.

Mr. President and colleagues, DePauw University is creating history in that never before has a liberal arts college raised so much money in a single fund raising program. I wish to commend the donors—trustees who have collectively given over $200 million, an anonymous DePauw family who made the largest single contribution of $10,000, corporations and foundations who have been longtime supporters of this find institution, alumni, and friends of the university. Without the benevolent support of a great many people, DePauw University could not have surpasssed its expectations as it so obviously has done.

In closing, I congratulate DePauw University on its 150th anniversary. This university has provided a great service to so many alumni as well as to the State of Indiana. I wish the university continued success in its operations, and many more happy and productive years.●

THE 68TH ANNIVERSARY OF SOVIET UNION

● Mr. D'AMATO. Mr. President, I rise today to call the attention of my colleagues to the fact that 68 years ago today, November 7, 1917, the Communist Party of Bolshevik Internationalists brought down the provisional government in Russia and established a Communist dictatorship, IN 1922, as a result of this revolution, the Union of Soviet Socialist Republics was formed. Since that time, the Soviet Union has been a leader of the nations which have blocked progress toward securing and maintaining global freedom and peace.

I am hopeful that the upcoming summit negotiations will be fruitful and will establish a firm foundation of truth upon which we may proceed to negotiate serious, varifiable arms reductions. As always the case when dealing with the Soviets, however, my hopes are tempered with realism. When I consider the history of the Soviet dictatorship, which is filled with crime that are an affront to humanity, my hopes turn to skepticism. When I consider the nature of their system, without getting caught up in its facade of lies and propaganda, I ask myself if the Soviets will ever face facts and confess to their crimes. Progress can never be achieved unless those areas of contention between our two nations are faced honestly and squarely.

The President is serious about the upcoming talks in Geneva, and he has done his homework. But the approach of the Soviets to international talks leaves me doubtful about their sincerity to work toward agreements we both can live with. The Soviets are tough bargainers because they prefer to wait and see how their propaganda campaigns have influenced Western opinion before seriously moving in negotiations. And unless we, as a nation, and in combination with all Western democracies, are united in our resolve for serious negotiations, the Soviet's will consistantly dodge questions about their crimes which need to be remedied before we can address agreements for varifiable arms reductions.

Let us not think for 1 minute that the Soviets lack the ability to use the media to shape Western opinion. We must distinguish between facade and fact. After watching the polished, smiling leader of the Soviet Union in Western dress on television, we must not be fooled into asking the wrong question. The question is not, who is this man Gorbachev? Rather, the question remains, what is the nature of the Soviet Communist dictatorship?

Over the course of its existence, the Soviet Communist dictatorship has extermined more than 60 million of its citizens, mainly laborers and peasants, in whose name their revolution was proclaimed. Its first victims were Russians and other peoples of the former Russian Empire, but it has since expanded to subjugate the peoples of Eastern Europe, Asia, Africa, and Latin America. We must add to this figure the millions of people who are forced to live in the Soviet Union under the pall of perpetual oppression and constant fear for their own and their children's lives.

Today, there are many issues which divide our two nations, and they are of major concern to this Congress and to the American people. Every day, the Soviets are systematically violating the Helsinki accords, continuing their human rights violations of Soviet Jewry. How can we forget the cold murder of Major Nicholson, and the ongoing incidents directed against United States observers in West Germany. What about Korean flight 007 shot down with more than 250 innocent people on board? And what can be done to regain the freedom of the Afghan people? The expression of Soviet agression is not by chance, but by design.

At a minimum, the American people must recognize the true nature of the Soviet Union and realize that Mikhail Gorbachev is the dictator of a system that is bent on undermining and defeating the West. This does not mean, however, that our two nations should not meet in Geneva. Indeed, every effort must be made on both sides to ensure that our dialog continues. Rather, this means that we should not allow ourselves to be psychologically stampeeded by Soviet propaganda into making unwarranted concessions during the talks.

We must recognize the dangers of the Soviet dictatorship. We must hope for a true, meaningful shift in their historical record and, in the meantime, we must proceed with caution—every step of the way●

VETERANS DAY 1985

● Mr. QUAYLE. Mr. President, this November 11, Veterans Day 1985, I am joining with those assembled at ceremonies across our country—from Arlington National Cemetery to Indianapolis' Monument Circle—and those gathered at U.S. military bases and installations around the world to honor the contribution of our Nations veterans.

Our veterans deserve our respect, our thanks, and our prayers. On this special day of recognition, we honor those Americans who made the ulitimate sacrifice and gave their lives for our security and our future. This day also enables us to show our respect for the more than 27 million veterans alive today, men and women who have served and survived to share with us the benefits of their efforts. Because of these veterans who answered their Nation's call to duty, the United States shines forth today as a symbol of freedom, democracy, and opportunity in the world.

Veterans Day was originally a celebration of peace. In 1919, President Wilson proclaimed the first Armistice Day, commemorating the agreement signed the previous November 11 that ended the fighting and bloodshed of World War I. Unfortunately, the veterans of World War I were not the last Americans to be called upon to serve their country in battle. In 1954, Armistice Day was renamed Veterans Day to pay tribute to all those who have served in our Armed Forces.

On this, the 31st Veterans Day since Congress established a national day to honor our veterans, I believe that special recognition is due to two groups.

First, we cannot, must not, and shall not forget all the Americans who served their Nation in the Vietnam war but who are still listed as missing in action or as prisoners of war. We must redouble our efforts to resolve each and every one of the outstanding 2,500 MIA/POW cases, both to honor our national commitment to all those who serve our country and particularly to fulfill our duty to the families who are still uncertain over the fates of their loved ones.

Much remains to be done by the governments of the United States, Vietnam, and Laos before we can consider the cases of these service members closed. We can, however, be greatly encouraged by the recent signs of progress toward the resolution of this regrettably longstanding problem. Just recently, the United States was able to undertake a joint search for some of our missing men in Southeast Asia for the first time since the war. I will continue to urge President Reagan to pursue the search for our MIA's until all the facts are known.

On this Veterans Day 1985, I would also like to pay tribute to today's members of the U.S. armed services, particularly those who took part in the interception last month of the Egyptian jetliner carrying the four Palestinian terrorists who hijacked the Italian cruise ship *Achille Lauro* and then murdered Leon Klinghoffer. The hijacking of the *Achille Lauto* and the murder of an invalid were dastardly acts. For their performance in intercepting the jetliner carrying those terrorists, we are all proud of our military forces, who quickly, valiantly, and successfully managed to capture these murderers and hand them over for justice.

In observing this special day, I hope all Americans and all citizens of Indiana will pause to reflect again on the origins of Veterans Day. Reviewing the international arena today, we cannot mistake the fact that America's values, ideals, and goals will continue to be challenged as they have been in the past. As we have in the past, we must remain vigilant in the defense of our way of life and our free system of government. A solid base of military strength and readiness must be maintained to preserve and secure the gains and benefits our veterans' sacrifices have brought us. But we must also focus our efforts on keeping the peace in order to preserve and strengthen our heritage.

I am sure all Americans and all Hoosiers join me this Veterans Day in honoring those who have fought to preserve our Nation and all it stands for—and in praying that, in the future, we will be granted the peace that will allow us to focus on achieving our goals and dreams.●

NOMDA—MANUFACTURERS VOLUNTARY CODE OF CONDUCT

● Mr. RIEGLE. Mr. President, recently the manufacturers, distributors, and dealers of office equipment in this country concluded an agreement to abide by a voluntary code of conduct. This code will govern the relationships between these groups, and is designed to insure that their dealings will be marked by equity.

This event is noteworthy, Mr. President, because it completely eliminates the need for remedial legislation. For several years, legislation has been pending which would impose statutory standards on the relationships between manufacturers and dealers. I have felt for some time, that the passage of legislation to govern business dealings carries with it the possibility of harm to all those affected by the law. The Congress should rightfully be the last resort in a situation such as this, when parties in good faith can reach understandings and accommodations on their own in face-to-face negotiations.

That is, in a real way, precisely what occurred here, and good business sense took hold, and has produced this agreement.

It is not often that we can avoid legislative relief, but in this case we have done so to the great benefit of the dealers and to this important industry. There is a great deal of interdependence between the dealers and manufacturers, and this agreement recognizes and strengthens that relationship.●

VETERANS DAY AND NATIONAL DISABLED VETERANS WEEK

● Mr. D'AMATO. Mr. President, it gives me great pleasure to rise today to pay tribute to our Nation's veterans. Monday, November 11, 1985, is our Nation's Veterans Day celebration, and from that day through Friday, November 15, 1985, we shall celebrate National Disabled Veterans Week. In this country there are 28 million veterans, many of whom have risked their lives in selfless defense of our Nation, its freedoms and liberties, and our own and our children's future. As a nation, we shall honor our veterans during these celebrations, and we shall demonstrate our gratitude through speeches and parades for these men and women who have sacrificed all that can be asked of anyone in service to their country—life itself.

Along with the many speeches and parades that will take place, special services are held on Veterans Day at the Tomb of the Unknown Soldier in Arlington National Cemetery, just across the Potomac River. These services are held to honor those nameless soldiers who died for their country, but who were never returned home. They are also held to remind Americans of the tragedies of war. For this reason, President Wilson proclaimed November 11 as Armistice Day. A law adopted in 1938 made this day a Federal holiday, but in 1954, Congress changed the name to Veterans Day to honor all U.S. veterans.

Over the years, many veterans organizations have been established in the United States to support our veterans. The very first veterans organization was the Society of Cincinnati. At the suggestion of Maj. Gen. Henry Knox, the Society of Cincinnati was formed in 1783 by the officers of the Continental Army. With George Washington as its first president, the Society of Cincinnati consisted of all veterans who fought in the Revolutionary War.

The veterans groups which were formed after the War of 1812 and the Mexican War were small. However, after the Civil War, because of the large armies that were deployed in battle, powerful veterans organizations were established. The Grand Army of the Republic, an organization of veterans of the Union Army, which began its operations in 1890, had enough influence to play an integral role in politics for over 40 years.

In the late 1890's, attempts were made to organize veterans of foreign military campaigns, and in 1898 the United Spanish War Veterans was formed by the men who fought in the Spanish-American War. In 1913, three different veterans groups of foreign wars joined to form the Veterans of Foreign Wars. Following World War I, the men who fought in France organized in 1919 to form the American

51-059 O-87-35 (Pt. 22)

Legion, and the disabled veterans from this war joined together to form the Disabled American Veterans in 1920. AMVETS was founded in 1944, and the American Veterans Committee began its work in 1944.

Through the years, some of these organizations have grown to play an important function in the lives of our veterans. They seek to foster comradeship among members, assist needy veterans and their families, organize memorial services for deceased veterans, and promote patriotism and community activities. These organizations have done well, and the Federal Government, through the Veterans' Administration, has been doing its part on behalf of the American people to carry out its responsibility to meet the needs of our veterans.

This year, on July 21, the United States Veterans' Administration celebrated its 55th anniversary. It was created in 1930 to centralize the Federal Government's responsibility for providing benefits to our veterans and their dependents. Altogether, 81.5 million individuals—veterans, dependents, and survivors of veterans—are eligible for VA benefits and services. Paralleling the vast increase in the number of veterans over the last 55 years, the VA has grown into this Nation's largest independent Federal agency.

The beneficiaries of the Veterans' Administration constitute approximately one-third of our Nation's population. Thus, the influence of the VA cannot be downplayed. The administration has 172 major medical facilities, 185 outreach centers, the largest direct insurance program, and an educational program which interacts with almost every post-secondary and vocational institution in the United States. For these reasons, I have cosponsored S. 657, legislation to make the VA a full cabinet department. Elevating this administration to a cabinet level department will help make the needs and concerns of our veterans a top priority of our Government.

The Veterans' Administration is by no means perfect or complete, but in the words of its current Administrator, Harry N. Walters, the VA "is more than ever dedicated to serving America's finest." As part of my efforts to ensure that the VA is fully equipped to meet its responsibility to our Nation's veterans, I have recently moved to correct several inequities I have found in their laws.

Last year, Congress enacted a new GI education program. By passing this legislation, we again demonstrated our gratitude to our Nation's veterans, and we recognized the value that education brings to individuals and to our society at large. Under this bill, however, veterans discharged from service before January 1, 1977, are only given 10 years from their date of discharge to use their educational assistance. When this bill expires in 1989, as many as one-third of our veterans will lose the educational opportunities they have earned. Therefore, I have introduced legislation, S. 964 to remove this arbitrary 10-year limitation period. In this way, these benefits would continue to be available for as long as they are needed.

I have also moved to ensure that our Nation's disabled veterans receive the best possible care that we can provide. Since 1971, the Veterans' Administration has limited its mortgage protection to certain categories of 100 percent disabled veterans who obtain VA grants for specially adapted housing. At the present time, however, this protection excludes some of our Nation's most severely disabled veterans who find it extremely difficult, or even impossible, to obtain mortgage protection from commercial sources. To remedy this problem, I have introduced legislation, S. 966, to expand the VA's mortgage protection program to cover veterans who are 80 percent or more disabled.

There is also an inquity under the VA's current Specially Adapted Housing Grant Program. Under this program, $35,000 is provided for certain blinded and disabled veterans to be used toward the purchase of a specially adapted house, or for renovations of a home already owned. A smaller grant of $6,000 is provided to another category of blinded, but less disabled, veterans, but can only be used to make the necessary renovations of a home already owned. I believe this limitation on the second category of veterans is wrong. Therefore, I have introduced legislation, S. 965, to give this second category of blinded veterans the same opportunity to use their grant toward the purchase of a house that we now provide the first category of blinded veterans.

These veterans have suffered the most severe personal losses in defense of our Nation. Quite often, the nature and extent of their disabilities have prevented them from accumulating the savings necessary to insure financial security for themselves and for their families. They, too, need this protection. Veterans need not only our protection, they deserve our praise.

Therefore, on Veterans Day, and throughout the following week, let us all, as individuals and as a Nation, pay tribute to our veterans. They have given their all to defend this great land and to protect liberties and freedoms for ourselves and our children. I urge the American people to join in local celebrations and parades in honor of these men and women, and to hold your heads high. For, if it were not for our veterans, there would be no laughter, no galas, and no smiles on our children. Indeed, if it were not for our veterans, there would be no celebrations this fall. It is because of our veterans, their bravery and their courage, that we have any pride at all.●

100TH ANNIVERSARY OF PET INC.

● Mr. DANFORTH. Mr. President, 1985 is the 100th anniversary of Pet Inc., headquartered in the city of St. Louis, MO.

Pet has long been one of the pillars of the economic community in St. Louis. From humble beginnings as a company formed to develop a canned milk that could be stored indefinitely, it has grown to become a great American success story, employing more than 7,000 people and providing economic growth in communities here and abroad.

Pet Inc. began life as the Helvetia Co. in 1885 and in 1894 began marketing "Our Pet" evaporated milk. That product became a household standard, and was so well known that the Helvetia Co. took the product's name in 1924. Following World War II, Pet began a program of diversification and expansion to serve consumer demand for a wide range of specialty food products.

Today, Pet's growth has made it an industry leader, manufacturing more than 200 food products under the banner of 30 brand names. Many of Pet's products rank at the top of their field in terms of market share.

I commend Pet Inc. on 100 years of service to the St. Louis area and other communities across the Nation, and wish the 7,000 employees of Pet the best on the occasion of the company's 100th anniversary.●

CONSOLIDATED OMNIBUS BUDGET RECONCILIATION

Mr. DOLE. Mr. President, it appears obvious that we are not going to get the unanimous-consent agreement. It is now 10 minutes after 8. I think everyone has been here long enough. Maybe we can work out something on Tuesday or later next week.

As I indicated, we would like to start on the reconciliation bill on Tuesday. All I will propound now is a unanimous-consent request that on Tuesday, November 12, at the hour of 10 a.m., the Senate proceed to the consideration of S. 1730, the reconciliation bill.

Mr. HOLLINGS. Mr. President, reserving the right to object, and it is not my intent to object, but to clarify. Do we start, as the leader sees it, starting where we were and go to textiles directly on Tuesday?

Mr. DOLE. Yes.

Mr. HOLLINGS. I have no objection.

Mr. DOMENICI. Reserving the right to object, Mr. Leader, I am as tired as the leader is and I will not take long, I

would like the Senate to know that we spent more time trying to reduce the deficit in the past 4 or 5 weeks than any time I can remember. Thus far, it has been talk. But while the clock ticks, our best estimate is that $52 million a day in savings is being lost from the reconciliation bill because those are the savings you cannot pick up as time passes. We are now 7 days into the second month of this fiscal year. We probably will need another 10 to 12 days, Mr. President, after we pass it to finish the conference.

So I think probably we are talking about at least 30 days times $52 million a day. That is a pretty nice piece of change.

I am not critical but I am hopeful that everybody understands we have to get the bill completed.

We spent hours of debate, and the House has, as to what level of deficit we ought to have this year. Somebody said it ought to be $180 billion with 7 percent error, somebody said $150 billion with 5 pecent for error, the House thinks $161 billion.

The truth of the matter is we are losing more money by not passing reconciliation and getting it to the President day by day here than any of this talk on deficit reduction proposals.

We stand ready at 10 o'clock on Tuesday if that is the Senate's will to really begin work on the bill. I hope everybody knows there are 45 amendments that people have told us about. There remains 1 hour and 16 minutes somewhat equally divided. The way the statute reads we will move on. Obviously, textiles could use that whole period of time. Then we will have 45 amendments that have something to do with the bill. Everybody will have a chance to vote on them. That is the way we do it here. We will not have much time for debate, and maybe none. But whoever wants their amendments can call them up and we will vote.

We will be here, Mr. Leader, and I hope we can get something done on that day.

I thank you for getting back on the bill. I think that is the way to do it.

Mr. CRANSTON. Mr. President, reserving the right to object, I want to address a question to the majority leader. We have had an understanding that H.R. 505 will come up on Wednesday. I assume we will have that opportunity on Wednesday?

Mr. DOLE. I am told we can dispose of that in 1 hour. If we can keep at that, that would be one thing. Otherwise, we would have real problems.

Mr. CRANSTON. It may be that we can dispose of it in 3 minutes.

Mr. EVANS. Reserving the right to object and I do not intend to object, could I ask the chairman of the Budget Committee a question or two?

I am convinced from meetings today, and I think I have a good right to be convinced, that the textile bill, regardless of what vehicle it is on, will be vetoed.

Could the Budget Committee chairman, the Senator from New Mexico, inform me as to what he believes the stages after that will be in terms of trying to resurrect a reconciliation bill and the cost that might be attached to that?

Mr. DOMENICI. Does the Senator mean that we will go all the way through reconciliation and conference and textiles are still on it and it gets vetoed because of that?

Mr. EVANS. That is right. How much longer will it take and how much will it cost?

Mr. DOMENICI. It seems to me, and this is just my speculation, that that would take so long, because we would still have to go to conference, that my best estimate is that with or without textiles the conference will take 10 days or 2 weeks maybe. That gets us well beyond Thanksgiving and into the first of December.

My best judgment is we will not get a reconciliation bill.

I do not want anyone to think that this reconciliation bill is not vulnerable without textiles. It just makes it a natural target with it. But I think we would not get one. If you would like the numbers there, we will lose in savings in the first year credited to the budget a minimum of $19 billion off this year's deficit in terms of savings, and a maximum of $22 billion, that will either never occur, or if we pass the Gramm-Rudman-Hollings amendment to the debt limit bill we will have to pick up that amount of money from across-the-board cuts on everything evenhanded.

Mr. EVANS. I thank the Senator.

Mr. HOLLINGS. Mr. President, reserving the right to object, we will be ready on Tuesday to vote. I have tried to accommodate the distinguished leader and the entire body by putting it on a two-track basis whereby we would not gain anything and we would not lose anything if we called the bill up and had it considered with a time agreement with some 17 to 20 amendments that we have. We each went around and got time limitations on the 20 amendments. We were ready to agree and set that aside and then as it is disposed of successfully or unsuccessfully in an up-or-down vote we would get off reconciliation. The majority knows that and the record would so show.

What the distinguished Senator from Washington is questioning, as I understand, is that we get off of not only reconcilation, the Micronesian compact and every other thing. I am as determined as I can possibly be that we will have this particular bill even more strongly on textiles and on Micronesia. I did not want to lose any particular position on the Micronesia bill. I am not asking for an advantage but I do not want any disadvantage. I am trying to accommodate. I am confident.

The proposed unanimous-consent agreement that we worked on all day long, which accommodated Senators on both sides, with time limits and everthing else, did not accommodate the Senator from Washington who somehow is trying to read into the record that somehow textiles are causing the cost to the Government. I think it is, if only we could enforce the textile and multifiber agreements that we have.

Mr. MITCHELL. The Senator from Washington is entitled to make the point he desires to make, but I think it should be noted that the chairman of the Budget Committee with tremendous forthrightness stated accurately that the reconciliation bill is subject to veto on grounds other than the textile bill.

The President's chief of staff has stated explicitly on several occasions, identifying numerous other grounds as a potential basis for a veto in the reconciliation bill. So any effort to suggest that there will be some additional cost attributable to the textile maneuver is, of course, inaccurate based upon the clear public record that has existed until this time.

Mr. DOMENICI. Mr. President, I try to be as honest as I can be here. I would like to say that there is a real chance on the part of the Senate as it moves through a day's debate to vote on some of those controversial provisions that the Whie House has identifed. The distinguished leader is concerned about a number of them and clearly, we are going to work the Senate's will, and it will send some kind of message to the White House or we will indeed improve the bill. Then it has to go to conference and even there, we can further clean up that bill.

Obviously, with textiles on it, you cannot clean it up. You might as well put everything on and send it over because it is going to get vetoed.

I say to my friend, the Senator from South Carolina [Mr. HOLLINGS], that he has done very well, he won a great victory. The Senate decided to do something it has only done once before, it waved the Budget Act and put the textile bill on reconciliation. There are many in this body who do not agree, who feel that we are going to vote on textiles not only once, but two times, three times, four times.

Frankly, nobody is taking away any rights to offer it on the continuing resolution if that is what the Senator desires. There will be other appropriations bills coming down. We did not bother to mention those. You might even put it on defense appropriations. I assume sometime or other the President wants to sign one of those. But

frankly, I am not sure the Senate is going to muster up 51 people, as much as they support textiles, to give the Senator, as much as they may feel as he does, two, three, or four shots.

He is right in saying he would like to have it and he may get that right. But frankly, I do not think anybody loses anything if they take this textile bill off the reconciliation bill, get a unanimous-consent agreement to vote with a time certain on a freestanding measure, and send it over to the House on their bill. I think that is about as good an opportunity to get it in the hands of the President and prove what the U.S. House and the U.S. Senate thinks about textile enforcement as anybody is going to get.

Mr. HOLLINGS. Well, Mr. President, that is what we will have, if the distinguished Senator will yield. That is what we have drawn up. I have given him a copy of just that, what he is saying right now. Let us call it up on a freestanding bill and vote it up or down. But you have all these amendments.

Look, I am ready to vote for passage. I have voted, as the Senator said, four times. I am not asking time and time again. I am just asking for final passage up or down. That is all I have been asking.

Mr. DOMENICI. What about the Micronesia bill? Does the Senator agree if he gets it disposed of, he will take it off that?

Mr. HOLLINGS. We will see what we get. If I have to fight all these amendments—is the Senator talking Micronesia, reconcilation, and all the rest? He is not negotiating on the reconciliation bill. That is what we have been talking about all along.

Mr. DOMENICI. The 22 amendments the Senator refers to on the textile bill will have time agreements and everyone will know what they are.

Mr. HOLLINGS. Right.

Mr. DOMENICI. They are all offerable now to the textile bill as it is presently pending on reconciliation.

Mr. HOLLINGS. Exactly.

Mr. DOMENICI. If you do not get them there with a time agreement with everybody knowing what they are, you are going to get them here one at a time on a reconciliation bill with nobody knowing what they are. I do not ask that the Senator give up anything by agreeing to a list that we have 3 days to look at and get to decide which ones properly belong and which ones do not.

Mr. HOLLINGS. What does that have to do with the Micronesia bill? Why is the Senator all of a sudden leading that fight?

Mr. DOMENICI. I was not. I was trying to help the Senator get his bill passed.

Mr. HOLLINGS. That is what I say, let us get going, let us not get off on the Micronesia bill.

Mr. EVANS. If the Senator will yield, I think the Micronesia bill is important. The Senator from South Carolina thought it was important when he put the textile bill on it because the bill is important to this degree: Our agreements in the Micronesia area ran out on October 1. We are facing the potential of very, very large lawsuits. We are facing the potential loss of our leases that are terribly important to the United States in terms of its missile tracking system.

This is not just a simple little bill that has nothing at stake. As the Senator from New Mexico mentioned, this does not prevent using the CR, the defense bill, or anything else if the Senator from South Carolina would like to take the second, third, or fourth bite at the apple.

What it attempts to do—and I worked very hard during this day to try to develop and cut down, I might add, the list of proposed amendments, which was much longer than this to start with, to cut down from original propositions by going to each of these people and attempting to minimize the time limit in order to bring this to a freestanding conclusion. This Senator cannot guarantee any more than the Senator from South Carolina that if the bill ultimately passes, it will wind its way through conference and find its way to the President's desk. I can say to the Senator from South Carolina I am convinced at least that regardless of the vehicle on which it is placed, it will be subject to a Presidential veto, and the real question is whether the proponents can muster sufficient votes to override a veto in both Houses of Congress. It is important to release Micronesia and get it passed or else we are going to be facing some very, very strong possibilities of money loss and serious problems in terms of our Defense Department and our national security. I do not think anyone wants that. It does not prevent anyone in this Chamber from coming back on any bill and, as the Senator from New Mexico suggested, trying again and again and again to put this bill through. The place for it is on the bill that came over from the House. It is not to put it on the reconciliation bill. It is not to put it on Micronesia. It is to get this opportunity to get it over and done with, which I would like to do.

Mr. HOLLINGS. Mr. President, just one minute. The distinguished Senator from Washington should realize that I had this on the Micronesia bill back in July and was willing to call it up and pass it before we had the August recess. I so informed the majority leader, so informed the chairman of the Interior Committee and the ranking member. We did not stand in the way. They just did not want to call it up. The Senator knows the game being played. Now we have acceded to the majority leader's wishes to try to get moving and not really take up this initial time next Tuesday, which we will because the pending motion now is not only just on textiles but the Danforth amendment to it and, I take it, other amendments the distinguished Senator from Washington will present.

But we have solved that problem. We just cannot solve all the problems. I think the Senator is really talking about Micronesia. It seems to me a good strategy. Put us to the test and let us get an up or down vote on textiles, and then he might have some merit in his argument. But at the present time we have worked with the majority of the Senate with up or down votes on Micronesia and we are there. We have had three votes up or down on reconciliation and we are there. So we not holding up anything. All I want is final passage on textiles and not all of this other stuff that has come up. But we even agreed to all the stuff being considered. Let us consider it and not hold up reconciliation.

I have no objection to the majority leader's request.

Mr. DOLE. Mr. President, I think the distinguished Senator from North Carolina wanted to suggest the absence of a quorum very briefly.

There are other ways we could proceed. We could call up H.R. 1562, the House textile bill. If we could not get consent to proceed, we could file cloture tonight on a motion to proceed to that bill. Then we would vote on cloture on Tuesday. Then we could be on the House-passed textile bill. But I am not certain that saves any time. I guess the larger concern is when we break this logjam. We have a farm bill, a reconciliation bill, and the textile bill blocking the road toward adjournment. And if we are not in on Monday, we will probably have 3½ days next week. We would like at least to dispose of the textile bill and the reconciliation bill, and then stay on the farm bill until it is passed, which would be sometime the following week before the Thanksgiving recess.

I suggest the absence of a quorum, briefly, Mr. President.

The PRESIDING OFFICER (Mr. MCCONNELL). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. DOLE. Mr. President, I am going to propound a unanimous con-

sent request, and I hope that we can agree to it.

I thank my colleagues for their patience and willingness to make a compromise in an effort to dispose of the reconciliation bill and the textile bill as well as, hopefully getting back and staying on the farm bill until it is completed.

So I ask unanimous consent that on Tuesday, November 12, at the hour of 10 a.m. the Senate proceed to the consideration of S. 1730, the reconciliation bill, and that the Hollings-Thurmond amendment dealing with textiles be temporarily laid aside, for the consideration of other amendments until the hour of 10 a.m., on Wednesday November 13.

I further ask unanimous consent that at the hour of 10 a.m. Wednesday November 13, the Senate proceed to vote on the question, "Is the sense of the Senate that debate be brought to a close on H.R. 1562, the House textile bill?" and that if three-fifths of the Senators duly chosen and sworn, vote in the affirmative, H.R. 1562 shall be the unfinished business to the exclusion of all other business until disposed of, the language of a Hollings-Thurmond amendment be considered germane, the amendment subject to a time limit of 1 hour, not subject to any motions, and the following amendments be the only other amendments in order, and limited to the following time agreements: and final passage time be in effect.

Three Gramm textiles amendments, 20 minutes each; the Matsunaga coverage to all countries, 30 minutes; Danforth, section 201, 30 minutes; Baucus, $400 million floor for agricultural exports, 30 minutes; Hatfield, athletic shoes, 20 minutes; Evans, eliminate import licensing, 30 minutes; Evans, additional customs officials (if first Evans does not pass), 30 minutes; Boschwitz, dealing with agricultural exports, 30 minutes; Domenici, copper, 30 minutes; Lautenberg, relating to textile handbags, 20 minutes; Lautenberg, relating to silk, 20 minutes; Lautenberg, relating to textile toys for dogs and cats, 20 minutes; Dole, sunset in January 1987, 10 minutes; Harkin, ag exports, 30 minutes; Levin, trade deficits, 30 minutes; Johnston, necktimes, 20 minutes.

Then there are some others that came in late.

Inouye, U.S. insular possessions, 30 minutes; Inouye, omit import licenses, 30 minutes; Inouye, limit quota restrictions to finished apparel, 30 minutes; Baucus, wage rates, 30 minutes.

I further ask unanimous consent that final passage of H.R. 1562, as amended, if amended, occur, without intervening motion, no later than 12 noon on Thursday, November 14, and that paragraph 4 of rule XII be waived and the agreement be in the usual form.

Further, I ask unanimous consent that immediately following disposition of H.R. 1562 that the amendments regarding textiles to S. 1730, the reconciliation bill, and amendments Nos. 719 and 724 to Senate Resolution 77 be considered withdrawn.

I also ask unanimous consent that following final disposition of H.R. 1562 the Senate return to the consideration of S. 1730, the reconciliation bill, or any other needed to send the reconciliation bill to the House.

I ask unanimous consent that third reading of the reconciliation bill, and that is not going to happen, not be in order prior to disposition of H.R. 1562.

Mr. MITCHELL. Mr. President, I really wish to inquire to make certain that my understanding of the unanimous consent request that has been propounded is correct. I understand that in the second paragraph on the first page the cloture vote will be on the House textile bill, and I want to make my intention clear. The House textile bill does not include shoes; whereas, the Hollings-Thurmond amendment in the Senate does include shoes, and it is my interest to see that the vote that occurs following the cloture vote be on that amendment which does include shoes.

I inquire as to whether or not my understanding is correct so that the vote here will be on the bill that includes textiles and shoes?

Mr. THRUMOND. That is our understanding, it would include shoes.

Mr. DOLE. That is my understanding. I conferred with both Senators from South Carolina and the Senator from North Carolina, and it would include that amendment.

Mr. MITCHELL. May I inquire of the distinguished chairman of the Budget Committee—I asked him in a conversation earlier—is that his understanding?

Mr. DOMENICI. That is my understanding.

Mr. MITCHELL. I thank the Senator.

Mr. BYRD. Mr. President, reserving the right to object, I would ask that the distinguished majority leader put in a quorum.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, before yielding to the distinguished minority leader, let me add one additional amendment by Senator MATSUNAGA to exempt imports to noncontiguous areas, with a time limit of 30 minutes.

Let me clarify the last part of the unanimous-consent request.

After disposition of H.R. 1562, that the amendments regarding textiles to S. 1730, the reconciliation bill, and amendment No. 719 and amendment No. 724 to S.J. Res. 77 be considered withdrawn; and after disposition of H.R. 1562 on Thursday, November 14, unless disposed of earlier, the Senate resume consideration of S. 1730, the reconciliation bill, or H.R. 3128. That is the bill that will come from the House.

Then finally, I have stricken the next paragraph because we will probably not complete action until Thursday. I was trying to figure out the three-track system including the farm bill.

Then the last paragraph I do not think will be operative, but we will leave in. We will ask unanimous consent that third reading of the reconiliation bill not be in order prior to disposition of H.R. 1562.

Mr. HOLLINGS. No objection.

Mr. BYRD. Mr. President, I withdraw my reservation.

Mr. CRANSTON addressed the Chair.

Mr. DOLE. Let me accommodate the Senator from California who has a request indirectly related to this request.

Mr. CRANSTON. If the majority leader pursuant to our conversation will simply add to that agreement that at 9 a.m. on Wednesday, H.R. 505 will be taken up and disposed of finally by 10 o'clock with the necessary rollcall to commence at 9:45.

Mr. DOLE. I have no objection to that because that will not interfere with this unanimous-consent agreement. I think we may need to proceed to the question on H.R. 1562; that it is the sense of the Senate that debate be brought to a close. We will proceed to that question at 10 a.m. on November 13.

I have no objection on that.

Mr. CRANSTON. That will be incorporated into the agreement.

I thank the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

Ordered, That on Tuesday, November 12th at the hour of 10:00 A.M., the Senate proceed to the consideration of S. 1730, the Reconciliation Bill, and that the Hollings-Thurmond amendment dealing with textiles be temporarily laid aside, for the consideration of other amendments until the hour of 10:00 A.M. on November 13th.

Ordered further, That at the hour of 10:00 A.M. on November 13th, the Senate proceed to vote on the question, "Is it the sense of the Senate that debate be brought to a close on H.R. 1562, the Textile and Apparel Bill", and that if three-fifths of the Senators duly chosen and sworn, vote in the affirmative, H.R. 1562 shall be the unfinished business to the exclusion of all other business until disposed of, the language of a Hollings-Thurmond amendment be considered ger-

mane, and that amendment subject to a time limit of 1 hour, not subject to any motions, and the following amendments be the only other amendments in order, and limited to the following time agreements and the time for final passage will become effective.

1.	Gramm—Textiles	20 minutes.
2.	Gramm—Textiles	20 minutes.
3.	Gramm—Textiles	20 minutes.
4.	Matsunaga—coverage to all countries.	30 minutes.
5.	Danforth—Sec. 201	30 minutes.
6.	Baucus—$400 million floor for agricultural exports.	30 minutes.
7.	Hatfield—Athletic Shoes.	20 minutes.
8.	Evans—eliminate import licensing.	30 minutes.
9.	Evans—additional customs officials (If 1st Evans does not pass).	30 minutes.
10.	Boschwitz—dealing with agricultural exports.	30 minutes.
11.	Domenici—copper	30 minutes.
12.	Lautenberg—relating to textile handbags.	20 minutes.
13.	Lautenberg—relating to silk.	20 minutes.
14.	Lautenberg—relating to textile toys for dogs and cats.	20 minutes.
15.	Dole—Sunset in January 1987.	10 minutes.
16.	Harkin—Ag Exports	30 minutes.
17.	Levin—Trade deficits	30 minutes.
18.	Johnston—Neckties	20 minutes.
19.	Inouye—strike references to U.S. insular possessions.	30 minutes.
20.	Inouye—omit import licenses.	30 minutes.
21.	Inouye—limit open quota restrictions to finished apparel only.	30 minutes.
22.	Baucus—wage rates	30 minutes.
23.	Matsunaga—imports—non-contiguous areas.	30 minutes.

Ordered further, That final passage of H.R. 1562, as amended, if amended, occur, without intervening motion, no later than 12 noon, Thursday, November 14th, and that Paragraph 4 of Rule XII of the Standing Rules of the Senate be waived and the agreement be in the usual form.

Ordered further, That immediately following disposition of H.R. 1562, that the amendment regarding Textiles to S. 1730, the reconciliation bill, and amendments Nos. 719 and 724 to S.J. Res. 77 be considered withdrawn.

Ordered further, That following disposition of H.R. 1562 on Thursday, November 14th, the Senate resume consideration of S. 1730, the reconciliation bill, or H.R. 3128, deficit reduction amendments bill.

Ordered further, That third reading on the reconciliation bill not be in order prior to disposition of H.R. 1562. *(Nov. 7, 1985.)*

Ordered, That at 9 A.M., Wednesday, November 13, 1985, H.R. 505 House message on veterans health care will be taken up and disposed of finally by 10 o'clock, with the necessary rollcall to commence at 9:45 A.M. *(Nov. 7, 1985.)*

Mr. DOLE. Again, let me thank my colleagues. I think this will help us break the logjam.

Mr. President, let me inquire of the distinguished Senator from California because I had not cleared that agreement with one Senator on this side. If for some reason we cannot work it out in that period of time, I hope the distinguished Senator from California might give us additional time, say, on the following date. I have not cleared that amendment.

Mr. CRANSTON. Senator DENTON has agreed with me that we will dispose of it Wednesday.

Mr. DOLE. Staff indicated earlier we could dispose of it with 5 minutes' debate.

Mr. CRANSTON. I think we probably can.

Mr. DOLE. It might involve two votes. If we can reduce it to one vote——

Mr. CRANSTON. We may not need any vote at all.

Mr. DOLE. That is my hope. If not, I will assume the Senator from California will help me work it out.

Mr. CRANSTON. Absolutely. If the majority leader will help me work it out, I will help him work it out.

Mr. DOMENICI. If the majority leader will yield, I, too, want to thank everyone. I think this will expedite the completion of the reconciliation bill. I want to share with the Senators who are here what I understand the situation to be reference to Tuesday morning and the commencement of reconciliation.

As it now stands before the Senate, we have an hour and 16 minutes on reconciliation.

The PRESIDING OFFICER. An hour and 12 minutes.

Mr. DOMENICI. We will proceed. As I understand it, we will be off of the textile amendments and onto whatever amendment anyone wants to offer. I do know there are 45 amendments that people have talked about. We have no extension of the hour and 12 minutes as of tonight, no agreement with reference to any of these 45, any time limits on them, or any disposition of the germane and nongermane amendments.

We do intend on Tuesday morning—the distinguished Senator from Florida and myself—to attempt to work out a time agreement for all of the amendments that people have suggested to us. We will not do that tonight. But perhaps after the first vote when we have the attention of the Senators we will circulate and offer a time agreement for all of the amendments that we are aware of. We will seek to further clarify the list of amendments over the weekend.

That would at least give us a time certain on reconciliation. At this point, the time certain is that time will run out, but there is no time certain because all amendments are in order to be called up and voted on and that time does not count.

I assume these 35 to 40 would want those kinds of votes with no debate if the 1 hour 12 minutes runs out. That is not our desire, but that is the present parliamentary situation, as I understand.

Mr. BYRD. Will the distinguished Senator yield for a question?

Mr. DOMENICI. I will be pleased to.

Mr. BYRD. Would the distinguished Senator be in a position to let us see the amendments he has? This might be helpful to us in the interim.

Mr. DOMENICI. I would say to the distinguished minority leader we have been working with his staff and the staff of Senator CHILES. We can make them available tonight, right now, in detail and go through them. I understand your side has asked informally and ours has, too. We hope to finish that with your help and Senator DOLE's help sometime Tuesday morning so everyone knows where we are.

Mr. BYRD. If the distinguished Senator will yield, I am informed by the staff that we have seen nothing. I am talking about the floor staff. I am advised that it could be that someone has been working with other staff members.

Mr. DOMENICI. There is no question we have been working with somebody. We will make them available.

Mr. HOLLINGS. Maybe we can put reconciliation on textiles.

Mr. DOMENICI. We might be able to do that.

Mr. DOLE. Mr. President, I think the moral is do not be absent on Tuesday, Wednesday, or Thursday of next week. There will be a lot of votes. I am not certain we need any additional time. I think 1 hour 12 minutes ought to be enough to dispose of those 40 amendments. Hopefully, many of the amendments can be disposed of by voice vote. I understand there will still be 10 or 15 that will require rollcall votes.

I will alert my colleagues and members of their staffs that Tuesday would be a good day to be in town, as will Wednesday and Thursday also be. We hope to conclude action on these two matters in those 3 days and then move to the farm bill maybe later Thursday and part of Friday.

TO ESTABLISH AN AD HOC COMMITTEE OF THE SENATE

Mr. DOLE. Mr. President, it had been my intention earlier today to ask unanimous consent that we might proceed to a resolution which would establish an ad hoc committee of the Senate so that we might pursue the attendance of Mr. Medvid before the full Senate. I am advised by Members on both sides that they would object to the immediate consideration of that resolution.

I will simply ask that the resolution be printed in the RECORD, that an explanation of the resolution be includ-

ed, and that it be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. The resolution is not being offered.

The PRESIDING OFFICER. The Senator is correct.

There being no objection, the resolution and statement of explanation were ordered to be printed in the RECORD, as follows:

S. RES. 256

Resolved,

(1) There is hereby established an Ad Hoc Committee of the Senate consisting of all members of the Senate duly chosen and sworn. The Majority Leader shall designate a chairman and the Minority Leader shall designate a Vice-chairman. A quorum shall consist of 6 members no more than three of which shall be from one party.

(2) The President Pro Tempore of the Senate or his designee is hereby authorized to issue a subpoena to require the attendance of Miroslav Medvid at a hearing before the Ad Hoc Committee to be held at 9:30 a.m. November 12, 1985, in S. 207 of the U.S. Capitol, Washington, D.C. or at such other time or times and places as the chairman of the Ad Hoc Committee shall designate. The Sergeant of Arms, or his designee, is authorized and directed to serve such subpoena forthwith.

(3) The appropriate agencies are requested to assist the Senate in the service of the subpoena referred to in paragraph one and in obtaining the presence of Mr. Miroslav Medvid before the Ad Hoc Committee.

SUMMARY OF RESOLUTION

The resolution authorizes the issuance of a subpoena requiring the attendance of Miroslav Medvid before the full Senate and requests executive branch agencies to provide whatever assistance might be necessary in serving the subpoena and securing Medvid's appearance.

It is being offered in response to the serious questions that have been raised about the handling of the Medvid case and whether justice has been done with regard to Medvid's apparent expressed desire to seek political asylum in this country.

The Senate Agriculture Committee has already authorized the issuance of a subpoena requesting Medvid's appearance, invoking its oversight responsibilities with regard to the U.S.-Soviet trade agreement. However, in light of the kinds of issues raised by the Medvid incident, it would also be fitting and appropriate if a subpoena were to be issued under the authority of the entire Senate.

ORDER FOR RECESS UNTIL 10 A.M. FRIDAY

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today it stand in recess until the hour of 10 a.m. on Friday, November 8, 1985, for a pro forma session only, and no business to be transacted during Friday's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY, NOVEMBER 12, 1985

ADJOURNMENT UNTIL 8:45 A.M., TUESDAY

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate convenes on Friday, it immediately stand in adjournment until 8:45 a.m., Tuesday, November 12, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO DISPENSE WITH READING OF THE JOURNAL

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate convenes at 8:45 a.m. on Tuesday, November 12, 1985, that reading of the Journal be dispensed with, no resolutions come over under the rule, and that the call of the calendar be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators CHAFEE, DANFORTH, PROXMIRE, MELCHER, and GORE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m. with statements therein limited to 5 minutes each, and provided, further, that the morning hour be deemed as expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS ON TUESDAY FROM 12 NOON UNTIL 1:30 P.M.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate stand in recess between the hours of 12 noon and 1:30 p.m. on Tuesday, November 12, for the weekly party caucuses.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL TOMORROW AT 10 A.M.

Mr. DOLE. Mr. President, I move that the Senate now stand in recess until 10 a.m., Friday, November 8, 1985, for a pro forma session only.

The motion was agreed to; and the Senate, at 9:08 p.m., recessed until Friday, November 8, 1985, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate November 7, 1985:

THE JUDICIARY

J. Spencer Letts, of California, to be U.S. district judge for the central district of California vice a new position created by Public Law 98-353, approved July 10, 1984.

Dickran M. Tevrizian, Jr., of California, to be U.S. district judge for the central district of California vice a new position created by Public Law 98-353, approved July 10, 1984.

Harry D. Leinenweber, of Illinois, to be U.S. district judge for the northern district of Illinois vice a new position created by Public Law 98-353, approved July 10, 1984.

George H. Revercomb, of Virginia, to be U.S. district judge for the District of Columbia vice Thomas A. Flannery, retired.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 7, 1985:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Ronald E. Robertson, of Virginia, to be general counsel of the Department of Health and Human Services.

EXECUTIVE OFFICE OF THE PRESIDENT

M. Alan Woods, of the District of Columbia, to be a Deputy U.S. Trade Representative, with the rank of Ambassador.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

Alex Kozinski, of California, to be U.S. circuit judge for the ninth circuit.

PANAMA CANAL COMMISSION

Richard N. Holwill, of the District of Columbia, to be a member of the Board of the Panama Canal Commission.

EXTENSION OF REMARKS

ANOTHER BRACERO PROGRAM?

HON. ROBERT GARCIA
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. GARCIA. Mr. Speaker, Mr. Speaker, the Arizona farmworkers Washington representative, Mr. Arnold Torres, has put together a paper analyzing the myths surrounding the need for temporary agricultural workers in this country. In my mind, the Wilson amendment contained in S. 1200 is a thinly disguised Bracero Program. If we are to have immigration reform, let's not have a double standard for growers.

I submit for the RECORD an excerpt from Mr. Torres study of this issue.

ANALYSIS OF S. 1200 AND WILSON AMENDMENT AND RESPONSES TO GROWER MYTHS CONCERNING THE NEED FOR AGRICULTURAL WORKER PROGRAMS

S. 1200 has three major provisons designed to expedite and increase the importation of foreign agricultural workers. In addition, Senator Pete Wilson (R.C.A.) is sponsoring an amendment which would provide a temporary agricultural worker program for perishable crops. These provisions establish three new temporary worker programs which will allow between an estimated 500,000 to 800,000 foreign workers annually to enter the U.S.

A. Specifically, S. 1200 would:

(1) Establish a three year agricultural labor transition program which will have the effect of legalizing the existing undocumented workforce of growers by phasing out their use over three years. A grower will be allowed to retain 100 percent of their undocumented workforce the first year after passage, 67 percent the second year and 33 percent the third year.

Negative Impact:

There is no mechanism to monitor and protect against U.S. workers being displaced,

No procedures to insure that employers not inflate the number of undocumented workers,

No mechanism to monitor and insure compliance by employer with existing labor standards and wage laws,

Complete control of worker is in the hands of employer which can and has always led to severe abuses of worker rights.

(2) Establish a special agricultural worker program (N visa) within the existing H-2 worker program which:

Negative impact:

Significantly reduces the requirement that growers recruit U.S. workers by not requiring minimum recruitment period.

Significantly weakens the statutory preference for hiring U.S. workers as contained in current law,

Eliminates current law requiring H-2 growers to provide employment to any qualified worker who seeks employment during first half of contract period,

Eliminates current law's requirement that free housing be provided to each worker,

Eliminates the U.S. Department of Labor (DOL) ability to suspend certification of H-2 grower during strike of U.S. workers,

(3) Establishes a series of expedited review procedures of applications requesting foreign workers:

Negative Impact:

Assures that any denial of H-2 certification will be subject to multiple avenues of challenge,

Despite the amount of foreign workers being requested and the variation in crops, DOL is required to resolve appeals no later than 72 hours,

Grants authority to U.S. Attorney General to review denials by DOL not later than 72 hours after requested,

Establishes a legal presumption that grower applications will be considered acceptable unless DOL identifies deficiencies within 14 days. This is granting certification by default.

ESTIMATED ANNUAL FOREIGN WORKFORCE UNDER S. 1200

According to testimony by noted economist David North, an estimated 10% of the total undocumented population is employed in the agricultural industry. The recently published report by the National Academy of Sciences concluded that while no range can be soundly defended, "A population of 1.5 million to 3.5 million illegal aliens in 1980 appears reasonably consistent with most studies." Using the figure of 3.5 million undocumented in the U.S., ten percent or 350,000 are employed in agriculture. Accordingly, 625,000 temporary workers would participate in the transitional program over three years.

In addition to this program, the special "N visa" program and the expedited review procedures would allow based on estimates growers have over the last few years some 300,000 temporary workers annually.

These two programs combined over a three year period would allow an estimated 500,000 temporary workers annually to enter the U.S. and work in agriculture.

(II) Wilson Temporary Worker Program for Perishable Crops

This temporary agricultural worker program is intended to provide a free flowing supply of un-regulated foreign temporary workers to the agricultural industry. Despite the fact that provision in S. 1200 virtually repeal all current law, growers from California insist that these provisions are burdensome and impractical for their use.

In essence, many California growers who propose the Wilson amendment are committed to maintaining a status quo of a continued over-supply of farmworkers. Instead of hiring undocumented workers they propose to legitimize their present practices and insulate themselves from any serious review.

Specifically, the Wilson amendment would:

Omit statutory preference for hiring U.S. workers,

Omit establishing effective recruitment requirements of U.S. workers,

Establish a legal presumption that grower applications will be considered acceptable unless the U.S. Attorney General prove otherwise. In the event the A.G. is unable to process all certifications before harvest time, growers will be presumed to have complied with program terms.

Establish all substantive powers with the A.G. while giving limited responsibilities to the U.S. Department of Labor (DOL).

Provide no real penalties nor debarment of growers violating labor laws, working conditions, provisions of bill.

Elevate violation standard to "substantively violating." This will have the practical effect of never finding any violations. In the case of violations, disqualification from program may not be denied more than 1 year.

COMBINED TEMPORARY WORK FORCE RESULTING FROM S. 1200 AND WILSON AMENDMENT

We have previously estimated that some 500,000 to 600,000 workers would be allowed to be imported under the three year labor transitional program and the newly constituted expedited procedures of the H-2 Program-N visa. Proponents of the Wilson Amendment represented to various Senators that they would be willing to accept a cap of 350,000 temporary agricultural workers annually for perishable crops annually. The combined total of all three temporary agricultural worker programs would be approximately 800,000 foreign workers a year for three years and approximately 500,000 to 600,000 there after.

These estimates would more than double the existing estimates of 10 percent of the total undocumented workers in the U.S. of 3.5 million which are said to work in the agricultural industry. This is being proposed at a time when unemployment amongst U.S. Farmworkers has been over 20% for the last three years.

FACTS ABOUT GROWER MYTHS

The following information is based on a study—California's Farmworkers conducted by the University of California (UC) and the California State Employment Development Department (EDD). It provides important facts on the farmworker population of California. Most importantly, these facts are from the state whose growers have been the major proponents of cheap temporary worker programs.

Myth No. 1. Growers fear that a legalization/Amnesty program would phase out their undocumented workforce who would choose to leave farmwork for urban jobs.

Fact. "According to the VC-EDD survey, more farmworkers have contacts to rural employment than to city jobs in the U.S. Moreover, there appears to be little difference according to legal status. Most of the undocumented, like immigrant farmworkers as a whole, do not have urban job contacts. Survey results demonstrate clearly that workers are restrained from moving to city jobs for reasons other than their legal status. Among the undocumented only 12 percent reported that lack of legal papers was their motivation for staying in rural areas. Most cannot move to cities because they have no contacts to jobs or housing. Instead, they prefer to stay in an area where their skills are salable.

Myth No. 2. Growers contend that a dominant portion of agricultural labor force is

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

undocumented and therefore temporary worker programs are needed.

Fact. The UC-EDD survey found that a central characteristic of California farm labor markets is the availability of a large pool of workers who individually experience long spells of unemployment. The survey found an average period of unemployment of over 20 weeks for farmworkers heads of household. Corroboration of the existence of this pool is shown by comparing the demand for farmworkers with the numbers of individuals actually doing the work. For example, in the late 1970's total demand for in-field labor was approximately 128,000 workers working year-round. But in 1976 there were 298,000 farmworkers who earned more than $800 in 1978 implying the existence of a labor pool with over twice as many workers as there were available jobs. Overall employers in California face a very stable supply of workers. Scarcities are rare for almost all crop activities.

Myth No. 4. A legalization/Amnesty program will not provide a sufficient work-force for the agricultural industry and therefore temporary worker programs are necessary.

Fact. The UC-EDD report concluded that "A generous amnesty would actually alleviate the short-run, if faced with a permanently curtailed labor supply, employers might be obliged to improve working conditions, offer year around employment, and implement technologies which lighten farm tasks. These changes could lengthen farm work careers, attract more women and domestic workers to farmwork, and lessen the need for a uncontrolled influx of Mexican workers." The approximately 70 percent had resided in the U.S. for up to 10 years and would thus qualify for either House-Senate legalization program.

Wilson Amendment and its False Representations

Myth. Proponents of the Wilson Amendment have emphasized that this program will not result in increasing the flows of undocumented workers and that the workers will have adequate rights and privileges. They believe that by requiring the undocumented to have 20% of their salaries kept in a fund not refundable unless they return after contract period will prove a sufficient safeguard.

Fact. The staff Report of the U.S. Commission on Immigration and Refugee Policy, the Commission which Senator Simpson and others have taken their guidance from in drafting S. 1200, indicated that all previous temporary agricultural worker programs authorized employer to hire temporary workers and to insure that INS was notified. However, because of lack of adequate enforcement many workers deserted their contracts and found higher paying jobs elsewhere. It was found that "a total 72,862 temporary workers had been admitted from 1917 to 1921, of which 21,400" deserted their employment and disappeared."

The report highlights the observations of the famous Bracero program by historian Otey Scruggs who said, "The basic weakness of the program was lack of adequate enforcement machinery. Too much reliance was placed on the good faith of the parties involved. In the case of the farmers, most of whom were haunted by the fear of labor shortage, and who had come to regard the use of Mexican labor as a natural right, an appeal to good faith plainly was chimerical." Once again we find the Wilson Amendment depending on the "good faith" of growers to insure recruitment of domestic workers and compliance with labor law and working condition standards.

Furthermore, the report found that the after the first temporary worker program a drastic increase in Mexican immigration, legal and illegal occurred, increasing from 221,915 in 1910 to 484,418 in 1920 and 890,746 in 1926.

In 1942 when the infamous Bracero program commenced it carried with it many of the same provisions and more than the Wilson Amendment is proposing. The report found that "Despite these strict guarantees, however, workers rights and privileges under the Bracero program were not generally upheld and abuses were common. Such rights were not commonly granted to domestic farmworkers and there were no enforcement mechanisms. Futher illegal entry continued unabated as U.S. employers continued to hire undocumented/illegal workers to protest the terms of the Bracero program. During the 22 year history of the program 4.5 million workers came in as Braceros, but 5 million were apprehended as illegals.

Today, while some things have changed such as farmworker having more rights then as before, sadly but true, there is no serious enforcement of these rights. While Wilson is being proposed along with sanctions it must be noted that less than 5% of all growers in California and in the U.S. are reviewed by INS agents for hiring undocumented. The hiring of the undocumented by the agricultural industry will undoubtely continue. The Wilson Amendment makes absolutely no serious effort to ensure aqusation displacement, insure worker's rights and insure equity. It is a grower's program as all others have been in the past.

SOVIET/AMERICAN BALANCE OF POWER

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. LIPINSKI. Mr. Speaker, we are all acutely aware of recent events which have put a new twist to our relations with the Soviet Union. With the historic summit meeting between President Reagan and Chairman Gorbachev coming up soon, the balance of power between our two nations is even more crucial. On October 19, I had the privilege of presenting my view on this critical issue to the Ilinois Nuclear Freeze proponents. I would like to share that speech with my colleagues today.

The text of the speech follows:

SPEECH BEFORE ILLINOIS NUCLEAR WEAPONS FREEZE CAMPAIGN

I am happy to be here today to give you my views on the United States-Soviet relations, with an emphasis on nuclear weaponry. The awesome destructive power of nuclear weapons is known to almost everyone on this planet. Most of us could agree that mankind might well have been better off if the atom had never been split, but it has been and we must deal with it in the real world. To be perfectly objective, we must remember that nuclear weapons ended World War II, have prevented World War III, helped to win the Korean War, and played a decisive role in deterring Soviet aggression in crisis in Europe, the Middle East, and the Caribbean. This positive role is most dramatically illustrated by the fact that two superpowers, with diametrically opposed political philosophies and geopolitical interests, have not resorted to arms to settle their differences. Of course, the prospect of nuclear destruction has certainly encouraged that restraint. We must also keep in mind that the major danger to the United States and the West is not nuclear war but surrender to nuclear coercion or blackmail. As Joseph Stalin once said, nuclear weapons are things that can be used to frighten people with weak nerves. The question before us now is where do we go from here. We do have several options. Some advocate that we seek to regain overwhelming nuclear superiority once again. A strong theoretical case can be made for doing so. But it is not politically realistic and I do not believe that it is the way to go. Those individuals that advocate this position assume that because of our superior technology and our far stronger economy, the United States would win an accelerated arms race. But this is not necessarily the case. It is very true that our technology, and our much stronger economic base, is a great asset to us, but the Soviet Union has demonstrated by the speed with which it developed the H-bomb, the cruise missiles, nerve technology, and missile accuracy that its ability to concentrate its limited resources and manpower can compensate for its technological weaknesses and its poor economic base. Another alternative is banning the bomb as a peace initiative. Those that approve this are simply not in tune to the facts of international life. Even if the Soviet Union and the United States agreed to abolish their weapons, the world would not be safe from nuclear war. Nuclear weapons are simply too easy to make and building them would be within the capacity of a number of smaller powers that have not signed the nuclear proliferation treaty. Radical governments such as Libya and Iran who have maintained a strong anti-American posture have vocally expressed their desire to acquire, at any cost, nuclear weaponry.

Today's greatest danger is what happens when these nuclear weapons come into the hands of smaller powers. If a nuclear weapon is going to be used in anger, it will probably be in the Third World.

In any event, it is unlikely that the Soviet Union would ever agree to abolish nuclear weapons. Without these arms, the Soviet Union's conventional forces could be overmatched by those of the United States and Europe, which have populations more than twice that of the Soviet Union. Without nuclear weapons, the Soviet Union's claim to superpower status would be seriously questioned.

There are those who have suggested that it might be to our advantage to allow U.S. nuclear superiority to fade away. When each has the power to destroy the other many times over, what difference does superiority make?

Those who take this view fail to understand that the United States and the Soviet Union have diametrically opposed foreign policy goals. The Soviet Union is an offensive power with the goal of extending its domination over noncommunist nations. The United States is a defensive power with the goal of preserving peace and freedom. Thus, the Soviets nuclear planning is based on recognizing the possibility of war, initiating it, and winning it. Our nuclear planning is based on retaining a retaliatory capability that will deter a war.

Those who claim that the Soviet Union, too, is basically a defensive power and it only builds up its nuclear arsenal because we do, are fostering an illusion that cannot stand up to the historical record.

In 1946, when the United States had a monopoly on nuclear weapons, the Soviets rejected the Baruch Plan, under which the U.S. would have agreed to turn over to the United Nations control of all nuclear energy and five years later, our weapons technology as well. At that time, the use of nuclear weapons would be banned.

In 1953, the Soviets rejected Eisenhower's Atoms for Peace plan, under which all nuclear nations would turn over fissionable material to the United Nations for scientific research. Since our programs were more advanced, we offered to turn over five times as much material as the Soviet Union.

In 1955, the Soviets rejected President Eisenhower's Open Skies Proposal, which called on both sides to exchange blue prints of their military establishments and to permit aerial surveillance.

In the 1960's, the Soviets responded to Secretary McNamara's decision to stop our deployment of land-based missiles at one thousand by moving ahead of us and deploying sixteen hundred and twenty.

In the late 1970's, the Soviets responded to President Carter's cutbacks in nuclear-weapons programs by sharply increasing spending on their own.

In every case, the Soviet answer to U.S. nuclear restraint has been an escalation of their own weaponry.

One indication of the Soviet's strategic thinking is that they are spending as much on population defense as on offense weapons and twice as much as we spend on defensive weapons.

The Kremlin's prime nuclear goal has been to develop an offensive first-strike capability against the United States. The Soviets' SS-18's and their new SS-24's and SS-25's will have the capacity to take out our entire land-based missile force with enough left over to take out all our major cities. While our MX missiles are powerful and accurate enough to take out Soviet missile silos, our present planned deployment of forty missiles will not provide a first-strike capability nor will they provide an effective bargaining chip in the upcoming Geneva negotiations. The Soviets will not cut back over 300 SS-18's to only 40 without getting something in return.

That is why it is my contention that the President's strategic defense initiative (Star Wars) remains as an integral part of our defense system.

The SDI Program consists of research development and testing to determine whether a viable defense system can be developed in the event a missile attack occurs from space. A vast range of technologies are currently being investigated including lasers, X-ray weapons, and other high technology.

The fact that most funds authorized last year have not been spent is typical of programs involving research that are spread over many years. Any new research program takes months for planning, awarding contracts, and the actual paying out of funds. The slow expenditure rate clearly reflect planned procedures and not excessive spending. In addition, our economy will realize enormous benefits from this research, both as a result of funding poured into hundreds of companies and universities, and from scientific discoveries that result from the research.

Moreover, it is again worth noting that this program strictly provides for scientific studies. None of the ongoing SDI research has been, or will in the immediate future, be near the point when it can be turned into building weapons.

The Soviets, on the other hand, have maintained their own equivalent of the SDI Program which many experts believe is ahead of the U.S. program. It clearly makes no sense to reduce our research efforts, given Soviet advances and the fact that the feasibility of the SDI defense has yet to be scientifically determined.

The SDI Program is in its infant stage and it may or may not work, however, it is imperative that the United States maintain and actively pursue a high level of research in this field both in the interests of national security and for the continued growth of our economy.

The SDI provides us with a necessary and powerful deterrent to any future Soviet aggression. The overriding importance of the strategic defense initiative, however, is the promise it offers of moving to a better, more stable basis for deterrence in the future and of providing new and compelling incentives to the Soviet Union to agree to progressively deeper negotiated reduction in offensive nuclear arms.

Our forces are designed for retaliation; theirs is for a first strike that will assure victory. This does not mean that the Soviets want war. They do want war! They are realists, they know a victorious nuclear war will greatly damage their country and make the prizes of Europe and the United States less than desirable. Their primary goal is to achieve superiority in order to have the political leverage to suppport their expansionist foreign policy.

The new Soviet leader, Miklai Gorbachev, is a young, charismatic and extremely popular figure in his country and he will be a formidable negotiator. Soviet leaders may change but the policies remain the same. Like his predecessors, Gorbachev is dedicated to the communist movement. Like them, he is committed not only to defending the Soviet empire but to extending communist domination to the non-communist world.

Although Gorbachev has assumed the lion's share of power in the Soviet Union, he has also inherited enormous problems. Soviet troops are bogged in Afghanistan. Freedom fighters threaten Soviet allies in Ethiopia, Angola, Nicaragua, and Mozambique. Forces of dissent are rising not only in Poland but throughout Eastern Europe. The Soviet economy has been steadily failing—Japan with half the population, hardly any natural resources, and one-sixtieth of the territory has replaced the Soviet Union as the second strongest economy in the world. The Soviet Union has no allies among the world's major nations. Western Europe, Japan, China and the United States are all aligned against it.

Gorbachev needs a relaxation of tensions with the U.S. and the West, and the time may be right for serious negotiations.

There are, however, a number of fundamental sources of tension in the U.S. Soviet relations. Perhaps the foremost of these is Soviet militarism. The Soviet military buildup is far in excess of that required merely for defense. Even those who attribute essentially defense motives to the Soviet arms buildup, complain that Moscow's obsessive pursuit of absolute military security for itself creates insecurity for nearly everyone else. In addition, the Soviet Union is inherently interventionist and expansionist. The Soviet invasion of Afghanistan, its support of Vietnam in Cambodia, and its role in the suppression of solidarity in Poland are prime examples. A third underlying source of tension between our governments has been the Soviet's systematic suppression of human rights, i.e. freedom of conscience, religious worship, and the right to emigrate. All of these factors have contributed significantly to the deterioration in U.S. Soviet relations.

U.S. Soviet relations must be based on the hard reality of mutual respect and not the illusion of mutual affection. A meaningful dialogue for peace is only possible if both superpowers recognize at the outset that they do have profound differences some of which will never be settled, but also that there is a fundamental agreement to develop rules of engagement for living with these differences.

Our position in negotiations with the Soviet Union must first begin from a position of American strength—not militarily, but political and economic strength as well—in order to achieve a lasting peace. The necessity of such a position is clear both from our past experience and because we want to negotiate equitable agreements in the future.

If we are to have substantive negotiations with the Soviet Union on nuclear disarmament, we must recognize the inherent adversarial nature of our relationship. We cannot expect a quick fix to problems which have remained with us for decades. Our policy must be, rather, a steady, long-term approach which is rooted in a realistic appraisal of superpower relations.

The only major common interest the United States and the Soviet Union have is survival. Nuclear weapons mean war is no longer an option for settling our differences. Our only option is peace—not the peace of surrender of the peace following nuclear destruction but real peace in which each pursues its interests but avoids actions that would force the other to resort to arms.

In review, I believe the United States must act in three main areas to protect our national security and preserve stability on the international front:

First, we must at least maintain if not modernize some of our offensive nuclear weapons in order to ensure an essential military balance while providing the Soviet Union with the necessary incentives to join us in negotiating equitable and verifiable nuclear arms reductions.

Second, we must continue our research efforts to examine the potential for future effective defenses against ballistic missiles. The strategic defense initiative is a prudent and necessary response to the ongoing extensive Soviet anti-ballistic effort including the existing Soviet deployments permitted under the ABM Treaty.

Lastly, we must pursue negotiation and diplomacy. We are now looking forward to a transition to a more stable world, with greatly reduced levels of nuclear arms and enhanced ability to deter war based upon the increasing contribution of non-nuclear defenses against offensive nuclear arms. Toward those ends, we must embark on a course of serious negotiations with the Soviets if we are to ultimately achieve significant, equitable and verifiable reductions in our respective nuclear arsenals.

What I envision is not an arms race or a search for military superiority but instead a defense reliant approach that would serve and protect the security interests of the United States, our allies, the Soviet Union, and most importantly, the world as a whole.

URGING AN AD HOC COMMITTEE ON TRADE

HON. DON BONKER
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. BONKER. Mr. Speaker, every Member of this Congress in now familiar with the issues surrounding the current trade policy debate.

At the center of this debate stands the trade deficit, now projected to reach another record of $150 billion this year. The trade deficit is a sobering commentary on what's occurring in our domestic and global economies. As a nation, we are experiencing export stagnation and a loss of our competitive position. We are also confronted with numerous import-related problems, such as plant closures, and millions of lost jobs.

In short, we are witnessing fundamental change in our domestic economy. While some of these changes may have been inevitable, they are devastating in their impact upon our communities and many of us in Congress feel the administration has no coherent policy to deal with the sweeping economic changes we are experiencing.

Perhaps the most troubling statistics are those which indicate that consumer spending is rising at a strong rate, but that U.S. industrial output nevertheless continues to fall. America's basic industries are withering away.

Until recently, the Reagan administration has appeared to take pride in this new economic order. White House officials have extolled the strong dollar, praised the trade imbalance for holding down inflation, and proclaimed the current state of affairs as a validation of their supply-side economic policies. While the administration has taken several positive actions in recent weeks, it still appears to be concerned more about public perceptions on the trade issue than doing something concrete to address our trade deficit.

For the past 6 months, I have had the honor of chairing the Democratic Trade Task Force, a select group of key Democrats on trade issues. The purpose of the task force is to develop a comprehensive legislative package for the leadership. On October 17, the task force released its recommendations, and I believe the package represents an in-depth, aggressive, yet responsible way to deal with the trade deficit. Specifically, the package calls for measures to bring down the overvalued dollar and stabilize exchange rates, enhance U.S. export promotion and export financing programs, strengthen out trade laws to counteract unfair trading practices employed by other nations, provide retraining and other assistance to workers and businesses affected by increased imports.

EMERGING CONSENSUS ON TRADE ISSUES

In recent weeks, several other major trade packages have emerged from the party leaderships in both the House and Senate.

After carefully scrutinizing all of these various packages, I believe there is an emerging consensus on what needs to be done about our Nation's current trade crisis. To be sure, there are important differences between all of these packages. But every package seems to similar core elements—monetary reform, export promotion, dealing with unfair trade practices, and trade adjustment assistance.

In many ways, it's surprising how close the major packages are on the substance of these major issues.

The problem no longer appears to be in the realm of policy; the real problems now are in the area of process.

Neither the administration nor the Congress are prepared to deal with trade matters in a coherent and timely manner. The White House is badly divided along ideological lines, with the supply-side ideologues on one side and the pragmatists on the other. The disjointed trade organization among the various agencies of the executive branch is like a football team with three quarterbacks.

Here in the Congress, we must acknowledge our own organizational difficulties. The balkanized committee jurisdictions on this issue make swift action on any comprehensive trade measure next to impossible. The major committees include Ways and Means, Foreign Affairs, Banking, and Energy and Commerce, as well as others. To cite an extreme example, legislation which I introduced last year to reform trade organization within the executive branch was referred to no less than eight different standing committees.

AN AD HOC COMMITTEE ON TRADE

In an effort to facilitate passage of comprehensive trade legislation and at the same time maintain the vital input and jurisdictions of the standing committees, I have proposed the establishment of an Ad Hoc Committee on Trade.

This special panel would be patterned after the Ad Hoc Select Committee on Energy established by the Speaker in 1977 to deal with the energy crisis and President Carter's Energy Program.

Such an Ad Hoc Trade Committee would not preempt the existing statutory committees which deal with trade policy. They would retain primary jurisdiction and initial referral of trade measures. The Ad Hoc Energy Committee, for example, was composed of key members of the standing committees with jurisdiction over energy issues. Its staff also was primarily drawn from the various standing committees.

The Ad Hoc Trade Committee would oversee the process, set timetables, and facilitate speedy action by the House. In the late 1970's, the standing committees received primary referral of the major energy legislation, had the opportunity to hold hearings and to make any changes they wished, but were required to report the legislation within 90 days to the Ad Hoc Energy Committee.

Establishment of an Ad Hoc Committee on Trade would not alter the current jurisdictions in the House nor undermine our ability to deal with today's complex trade questions in a responsible, measured way. Creation of an ad hoc committee would, however, enable the House to move more forcefully on a comprehensive solution to our Nation's pressing trade problems.

At this point, Mr. Speaker, I would like to enter into the RECORD, a copy of the letter which I sent yesterday proposing the establishment of an Ad Hoc Committee on Trade.

HOUSE OF REPRESENTATIVES,
Washington, DC, November 5, 1985.
Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
H-204 Capitol.

DEAR MR. SPEAKER: The trade deficit and a troubled trade policy continue to threaten the long run economic strength of the United States. In response to the trade crisis, you have already taken an important first step by establishing the Democratic Trade Task Force. The Task Force has met your initial goal of developing a comprehensive trade program that commands broad support within the Democratic Party. The Task Force's recommendations have been complemented by the Democratic Caucus, which has urged the House to take a comprehensive, rather than piecemeal, approach to trade.

I believe it is now time to consider a second step—the creation of an ad hoc committee on trade to coordinate and speed the consideration of trade legislation in 1986. The Committee could be modeled after the highly successful Ad Hoc Committee on Energy that you established in 1977, under the authority of House Rule X, clause 5. There are many similarities between today's situation and that which prevailed in 1977.

The current trade crisis rivals the energy crisis of the 1970s. Until the dollar soared to recent heights, one in three acres were planted for export and one in six industrial jobs depended on overseas sales. The bulk of American manufacturing firms now face stiff foreign competition both at home and abroad.

In part because of lost overseas markets, much of American agriculture faces severe economic problems. Manufacturing employment has failed to regain its pre-recession level. Since the beginning of the year, an additional 300,000 manufacturing jobs have been lost. More and more industrial firms are closing plants in America and opening facilities overseas.

Members from all parts of the country and of all political persuasions report a growing concern about the lack of a comprehensive trade policy.

There is significant overlapping of trade jurisdiction in the House. Many committees have a longstanding involvement in trade legislation. Because trade policy increasingly includes such disparate elements as taxes, monetary policy, and worker training, even more committees are likely to become involved. Omnibus proposals are frequently referred to several committees.

There are already hundreds of trade bills before the House with more on their way. The sheer volume and range of the trade proposals have added to the difficulties of moving quickly on major trade legislation. The already crowded calendars of the standing committees have only made this problem worse.

In 1977, the Ad Hoc Committee on Energy drew together the separate pieces of legislation after they had been considered by the standing committees. The Committee was

then able to consider and report to the House a comprehensive package without disrupting the traditional roles or jurisdictional prerogatives of the standing committees.

Mr. Speaker, you have already taken the lead in responding to the trade crisis. Further action is the clearest possible way of indicating to the country and the Congress that dealing with the trade crisis is a top priority for the House. The very success of your Ad Hoc Committee on Energy recommends forming a similar Ad Hoc Committee on Trade. The Trade Committee would facilitate the consideration of complex trade legislation without limiting the House's ability to draw on the expertise of the standing committees. It would create a mechanism to consolidate individual committee action for unified consideration, provide a forum for the development of any needed amendments, and expedite action on a comprehensive trade bill. I respectfully urge your consideration of this proposal.

With kindest regards.

Sincerely,

DON BONKER,
Member of Congress.

DIVISION IN THE SANCTUARY RANKS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. LAFALCE. Mr. Speaker, for 3½ years an affiliation of religious congregations known as the "Sanctuary Movement" has offered refuge to illegal aliens from Central America, especially from El Salvador. Eleven participants in that movement are now being tried for their activities in Tucson, AZ, and their trial has brought national attention to American policy toward undocumented Salvadorans.

This issue is of particular interest to Congress because the House is considering a bill introduced by Mr. MOAKLEY, H.R. 822, which would suspend the deportation of Salvadorans until the General Accounting Office had reported on Salvadorans who are displaced in Central America, illegally in the United States, or deported from the United States back to El Salvador, and until the appropriate committees in Congress had considered this report and reported their own findings to their respective Houses. A hearing on H.R. 822 is being conducted today by the House Judiciary Committee's Subcommittee on Immigration, Refugees, and International Law.

Each side of the sanctuary debate has accused the other of subordinating immigration policy to foreign policy, and of ignoring or distorting the facts that should determine whether sanctuary is justified by purely humanitarian considerations. To evaluate these arguments, it may be useful to read an article by Miriam Davidson from the Christian Science Monitor of October 22. The article describes the sharp split within the sanctuary movement itself between participants with humanitarian goals and those whose goals are political. It shows that these goals are indeed distinct, and I believe we should keep the distinction in mind in our deliberations over sanctuary for Salvadorans.

The article follows.

SANCTUARY MOVEMENT UNDER FIRE

(By Miriam Davidson)

TUCSON, ARIZ.—Not 10 feet from the barbed-wire fence two women sit under a tree having lunch. They share cheese, crackers, and an orange and pass a canteen of lukewarm watez back and(forth. All the while they watch the mesquite bushes on the Mexican side of the fence. The women talk—and wait.

The people they are supposed to meet are late. It doesn't matter, though. Both are experienced border crossers who know in this business anything can happen.

These women are in the business of sanctuary—a four-year-old movement among American churches to shelter and transport Central American refugees. Sanctuary activists insist that the people they help are either bona fide political refugees—people facing death or torture because of their beliefs—or refugees fleeing a war zone, and so are entitled to at least temporary asylum in this country.

The government disagrees, saying that the refugees come for economic, not political, reasons and therefore cannot stay. With very few exceptions, Salvadoreans or Guatemalans who encounter the border patrol are deported.

Since war broke out in El Salvador in 1980, almost one-third of that country's 5 million people have become refugees. It is estimated that half a million of these live in the United States, most without legal status. Another 200,000 live in Mexico, where their presence is also illegal.

The US Congress has been slow to act on resolving the problem. The DeConcini-Moakley bill, meant to give Salvadoreans already here extended voluntary departure status (which would allow them to stay in this country until hostilities in their own country ceased), is stalled as the Senate Judiciary Committee waits for the Justice Department to review it. Meanwhile, more and more churches sign up to give sanctuary—some 225 at last count, representing nearly 30 Protestant denominations as well as Roman Catholic and Jewish groups.

The Justice Department is in no rush to help put the DeConcini-Moakley bill into law, since it is in the middle of the government's first systematic prosecution of sanctuary workers. The movement has operated more or less openly since March 24, 1982 (the day when one church in Tucson and four in the San Francisco Bay Area first announced they were giving sanctuary).

During the summer of 1984, an informant named Jesus Cruz posed as a sanctuary supporter and secretly recorded church meetings around Tucson and Phoenix. Based on the information that Cruz collected, the Justice Department last January indicted 16 people, many of them founders of the movement. Eleven will stand trial here in Tucson, with proceedings scheduled to begin today.

Despite the crackdown, sanctuary work goes on. The two women at the fence are part of an underground railroad that can move the refugees all the way from a camp in southern Mexico to a church in Boston, provided they don't get caught in between. These women are making just one leg of the trip—from the fence to Tucson—but in many ways, it is the most dangerous part. Not only do they have to look out for the border patrol; they risk stumbling across drug smugglers who carry guns and aren't afraid to use them.

What kind of people volunteer for such a job? Sanctuary activists generally share respect for life and a willingness to lay their own on the line, but beyond that they all have their own motivations. These two, for example, offer very different reasons for their involvement.

Gray-haired Marjorie (a pseudonym) says she is here because she believes that God calls us to care for the neediest and most despised in our midst. A widow, a registered Republican, and a churchgoing Presbyterian, Marjorie doesn't consider herself political. In fact, she worries about "that element" taking over the movement.

Laura (also a pseudonym), lying next to Marjorie, says she's not religious. Laura is a young woman active in a variety of leftist political causes around Tucson. Most recently, she joined a sit-in at Arizona Sen. Dennis DeConcini's office because he voted to fund the "contras" fighting the Sandinista regime in Nicaragua. To Laura, sanctuary is a good way, but one of many, that people can mobilize to stop the killing in Central America.

It may seem odd that people with opposite views are found risking their hides together, but that's the nature of sanctuary. It's a movement of contradictions: conservative, churchgoing Americans doing things their government considers illegal, clergy engaging in "subversive activities," aiding the suffering who are seen as a threat to US foreign policy. No wonder sanctuary is hard to categorize, existing as it does in the gray area where both humanitarian and political motives are present.

Currently, a debate is raging within the movement itself. Some sanctuary activists want to organize around a specific goal, that of ending US intervention in Central America. Others are stubbornly resisting politicization. As a result, even as it's gaining momentum, the sanctuary movement may be splitting into two camps.

Those who seek to avoid labels have found an advocate in Jim Corbett, the retired rancher who began the underground railroad for Central Americans in 1981. Corbett, a Quaker and one of the 16 indicted, has written many philosophical tracts on sanctuary over the years. In them he has resisted naming goals or purposes for the movement. Sanctuary—as Jim Corbett defines it—exists to care for refugees, period. Should political change come about as a result of helping them, fine, but to establish sanctuary on a defined platform, such as ending US intervention in Central America, in Corbett's view would reduce it to the level of just another political pressure group.

Corbett's insistence that sanctuary is simply a response to suffering is not just expedient or tactical. He genuinely believes that sanctuary can be an alternative to political power. Corbett's wife, Pat, put it best last year, in her acceptance speech on behalf of the sanctuary movement for the 1984 Letelier-Moffitt Memorial Human Rights Award of the Institute for Policy Studies.

She said: "Sanctuary is independent of traditional political activism because the covenant people [the term Corbett uses to indicate that those who give sanctuary carry on the Biblical covenant between God and His people] is formed by creative service rather than competitive struggle. As a result, the movement is politically as well as religiously ecumenical. . . ."

Corbett's position rankles Renny Golden, a former nun who has co-written a book on sanctuary to be published soon by Orbis

Books. "It's simply not true that sanctuary transcends the political," Golden says. "We have a responsibility not to take what could be the most beautiful position—what could be possible in other worlds—but to do what is historically possible."

Golden is a founding member of the Chicago Religious Task Force on Central America, a group that best represents Corbett's opposition within the movement. According to its newsletter Basta! (Spanish for Enough!), the task force was formed in January 1981 to "organize people of all religious persuasions to understand and challenge US foreign policy towards Central America." The task force got involved in sanctuary at Corbett's request, as a refugee placement coordinator in September 1982. Since then, a series of disagreements over policy and direction has resulted in a schism between Tucson and Chicago.

In its newsletter and elsewhere, the Chicago group has said that it believes sanctuary should be organized around the goal of ending US intervention in Central America. Anything short of that is a "humanitarian band-aid." Through sanctuary, churches can be brought around to a more radical point of view, it says, but the Chicago group has no use for a church that offers sanctuary and then "continues its support [by silence or vote] for US policies in Central America."

The Chicago group recognizes that the number of refugees who have actually been helped by the movement is small (at most 3,000) compared with the numbers here and south of the border who need help. For that reason they see sanctuary as primarily symbolic—a gesture of solidarity with the refugees as well as a way to increase public awareness about the situation. Renny Golden says the refugees in sanctuary are spokesmen for "a people in a liberation struggle."

Sanctuary workers in Tucson think that view has hampered Chicago's ability to act as a coordinator for refugee placement. In December 1983 the Chicago task force sent a letter to the Tucson Ecumenical Council Task Force on Central America saying that only refugees who were going to a public sanctuary should be allowed to use the underground railroad. In response, the Tucson group sent a letter that asserted its intention to help refugees "regardless of the political origins of their persecution or their usefulness in promoting preconceived political purposes."

Counselors in Tucson say that only about one in 20 refugees wants to go live in a church sanctuary and be a public spokesman. Most prefer to join their families or go to cities with large Central American communities, such as Los Angeles or Houston. Many are too frightened to make themselves available to the media. In any case, once a refugee has been screened in Mexico and determined to be at risk there and in his home country, the railroad helps him get where he wants to go.

After the disagreement over the railroad, Tucson's relationship with Chicago deteriorated. The low point came in October 1984, when the Chicago group refused to share with Tucson its mailing list of network. At that time, Chicago had the only complete list, and, after repeated requests from the Tucson group (which wanted the list both to place refugees and to set up a symposium it was planning), Chicago decided not to release it.

The Tucson group took Chicago's refusal as an attempt to take over the movement. Corbett fired off a letter, published in the January 1985 *Basta!*, that said he was proud to be the first heretic excommunicated from the "Chicago Creed." The mailing list, in Corbett's view, was a "litmus test" that Chicago failed. Saying he did not want to get involved in an organizational struggle, Corbett also announced he was resigning from the Tucson group's board and withdrawing from a public role in the sanctuary movement. He hasn't, however, withdrawn completely. Journalists still seek him out; Corbett is too well known to withdraw, even if he wanted to.

In recent months, the ideological split in the movement has shifted from Jim Corbett vs. Chicago to Jim Corbett vs. the National Sanctuary Movement. This time, the question is how (and whether) sanctuary should be organized. Last spring, a gathering of 200 people from around the country formed the National Communications Council (NCC), a 12-member body intended to give the movement some focus and direction. The council has no policymaking powers; and it is unclear how representative it is of all the sanctuary congregations, since many did not even know the meeting was held. The NCC has joined the National Sanctuary Defense Fund (NSDF), an independent San Francisco-based fund-raising organization created in the summer of 1984, to form a third group, the National Sanctuary Movement.

Predictably Corbett and most of the Tucson group are not part of the National Sanctuary Movement. Corbett is all in favor of "horizontal" organization of sanctuary sites, that is, a network where no one group or individual has power over any other. But as a Quaker, he believes that a hierarchical power structure like the NCC subjugates the will of the minority to that of the majority, and is thus inherently violent.

But not only Quakers are wary of the National Sanctuary Movement. Tucson minister John Fife has worked in the hierarchical organization of the Presbyterian Church for most of his life, so he is not opposed on principle. He is concerned, though, about people making statements and directives for what is essentially an informal collection of faith communities. Mostly, he and Corbett don't want the "Chicago Creed" (the idea that the purpose of sanctuary is to end U.S. intervention in Central America) identified in the public mind as in the goal of the entire movement.

The result of all this has been the almost two-track development of the sanctuary movement. On one level, sanctuary is big business. The NSDF has, so far, put out two mailings and raised well over half a million dollars for legal defenses. It also hired a Washington, D.C., public relations firm that created a "sanctuary media packet." The Chicago task force and other national groups organize caravans, demonstrations, and speeches.

At the same time, the chronically underfunded, unglamorous day-to-day work with the refugees goes on.

Arguably both parts of the sanctuary movement are necessary. But Corbett worries that emphasis on public actions—including his own trial—takes attention and resources from the needs of the refugees.

He wants the movement to get back into "affirmative filing," a process by which a person who has entered the country "without inspection" can go into an Immigration and Naturalization Service [INS] office, apply for political asylum, and be released on his own recognizance. This was the practice among Tucson sanctuary workers until June 1981, when the INS abruptly changed its policy and arrested two Salvandoreans Corbett had brought in to file for asylum. But a Texas court and two Arizona immigration officials have recently stated that sanctuary workers and refugees would not be arrested if they were on their way to apply for asylum.

Corbett also hopes that the sanctuary movement will succeed in influencing Congress to grant extended voluntary departure status to Salvadoreans.

In this respect as well, the Chicago task force takes a different view. "What Jim [Corbett] doesn't realize is, we cannot get ourselves legitimized or win in the courts," Golden says. "The North American church must choose sides," Golden has written. "Either it stands with the United States government or it stands with the refugees."

Ironically, Jim Corbett wrote a sentence similar to that when he first started helping refugees to enter the country and hide from the Immigration and Naturalization Service. "We can serve the Kingdom of Love or the Kingdom of Money, but we cannot serve both," he wrote. The difference is, Corbett believes, that subjugating sanctuary to a political goal—no matter how valuable—places it back in the coercive, power-serving world. Sanctuary cannot propose answers for Central America. The only answer is for each community to become a sanctuary—to live, here and now, as a "Kingdom of Love."

The opposing points of view haven't paralyzed the work of sanctuary volunteers. The women at the fence finally hear a shout from the other side two hours after sitting down. They jump up to greet an American couple—fellow sanctuary workers—and the four Salvandoreans with them. The refugees offer their goodbyes and thanks; then they climb through the barbed wire that separates the two countries. Marjorie and Laura welcome the three women and the teen-age boy with hugs. The refugees smile, but they are flushed and nervous.

Together, the refugees and their new guides start toward the road. Laura scans the sky and the rocky hillside, looking for a plane, a car, or people. Everyone must be ready to run for cover in an instant. Marjorie and Laura exchange glances. They may not agree on everything, but they know that helping these lost, desperate people is what sanctuary's all about.

WILLIAM RANDOLPH HEARST, JR.: SOVIET RHETORIC ON U.S. DEFENSE POLICIES

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. DUNCAN. Mr. Speaker, the following article by William Randolph Hearst, Jr., is worthy of thoughtful consideration as we prepare for negotiations with the Soviets in November. I believe the United States must keep its defenses strong. The Soviets do not always approach such negotiations in as forthright and honest a manner as we might hope. I therefore commend the article and wish to reiterate Mr. Hearst's hope for a feasible arms control agreement.

The article follows:

PROOF OF SOVIET LIES

(By William Randolph Hearst, Jr.)

NEW YORK.—In the Soviet propaganda blitz now under way against President Reagan's strategic defense program, we are witnessing the carrying out of Lenin's dogma that communists are duty bound to be deceitful in dealing with the capitalist world.

Using his visit to Paris last week as a sounding board, Russia's new smooth-talking leader, Mikhail Gorbachev, sought to create the impression it is only the United States which is moving to "militarize space."

In New York last week, his foreign minister told the United Nations the president is threatening a "nuclear winter" by developing a defense against nuclear weapons.

A couple of weeks ago, Gorbachev assured The Union of Concerned Scientists that the Soviet Union "is not laying the foundation of a strategic defense capability."

A Soviet Foreign Ministry spokesman tells the world the Soviets have no space weapons and it is the United States, not Russia, that is violating the ABM (anti-ballistic missile) Treaty.

All lies, as you will be able to see by reading the rest of this report.

In response to my request for his reaction to the Soviet contention that we alone want to develop a strategic defense system, Robert McFarlane, the president's national security adviser, sent me the following message:

"Soviet doctrine in practice—backed up by spending at levels equal to what is spent on offense—makes it clear the Soviet leadership views building strategic defense as perhaps its highest priority program."

Defense Secretary Caspar Weinberger said the other day in Philadelphia that the U.S.S.R. was the first to drop reliance on deterrence. The Soviets, according to the defense secretary, keep rushing ahead with their own anti-missile program even while denouncing American research into a similar program.

"If we stop our work on strategic defense, and give it away at the negotiating table, we will forever lose one of history's best chances to end the shadow and the fear of nuclear weapons," Weinberger said. "We must seek and secure a defensive capability that could ultimately lead to the end of nuclear missiles."

Tom Dearmore, editorial writer for our San Francisco Examiner, reported that it was revealed just last Tuesday that the Soviets had tested high-energy laser weapons in space which caused an occasional loss of information from orbiting U.S. sensors.

It is no secret that the Soviets have been working on development of an anti-missile system for the past 20 years. A Pentagon report issued earlier this year said more than 10,000 scientists are engaged in laser weaponry research. Only the Soviets have deployed in space a low-orbiting anti-satellite weapons system. A booklet recently published in Moscow by the Military Publishing House admitted that "certainly military space research is being done in the Soviet Union."

As for Soviet leader Gorbachev's contention that the non-nuclear weapons the president wants to develop to defend our country against nuclear attack would be an aggressive weapon aimed at giving the United States first-strike capability, let me quote you the past Soviet position on defense against nuclear weapons as recorded in official State Department documents.

At the 1967 conference between President Lyndon Johnson and Soviet Premier Alexei Kosygin at Glassboro, N.J., the Soviet leader said an anti-missile system "is not a weapon of aggression, of attack. It is a defensive system . . . and, if the money is used to build up offensive missile systems, mankind will not stand to gain anything." Kosygin had been told at that time that if the Soviets developed a defense against nuclear missiles, the United States would have to build up its offensive nuclear weapons, which ironically is just what the Soviets are now threatening to do if we proceed with our anti-missile defense program.

As for the Soviet charge that our program violates the ABM treaty, here is what then Defense Minister Marshal Grechko told the Soviet parliament in September 1972:

"The treaty does not place any limitation on carrying out research and experimental work directed toward solving the problems of defense of the country against missile attack."

So much for the lies we and the rest of the world are now being told by the current Soviet regime. The Soviets fear that successful American development of a defense system against nuclear missiles headed our way through space would deprive them of the strategic superiority and first-strike capability which the president and his military chiefs are convinced they presently possess.

The problem of concluding agreements with the Soviets is that one cannot rely on them to keep their word if they feel it is not in their interest to do so. Last month, the Pentagon informed Congress the Soviets were continuing to violate arms control agreements. A White House report in June documented 19 Soviet violations of the SALT II agreement.

The duty of communists to violate any agreements made with the capitalist governments is another one of Lenin's precepts. Addressing the Bolshevik Party Congress in March 1918, Lenin spelled out the theory that treaties are made to be broken when they no longer serve Soviet interest. He said he had broken the treaty of Brest-Litovsk "30 or 40 times."

Let us hope that if the president succeeds in getting a nuclear arms control agreement with the present Soviet leaders, they and their successors will consider it in Russia's interests to respect it.

Personally, I doubt it.

THE ANGUISH OF APARTHEID: BLACKS AND WHITES FEEL TRAPPED BY EXTREMISTS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. SOLARZ. Mr. Speaker, before the South African Government was able to close down opportunities for American journalists to report on the current wave of unrest and political ferment gripping that nation, an extremely talented reporter, Ms. Karen House, was able to visit South Africa.

Today's Wall Street Journal carries a perceptive article on South Africa by Ms. House which provides special insight into the particular tragedy of this racially split society. Because of the importance of what is happening in South Africa, I ask that Ms. House's article be reprinted in today's CONGRESSIONAL RECORD.

IN SOUTH AFRICA'S RIFT, BLACKS AND WHITES FEEL TRAPPED BY EXTREMISTS

(By Karen Elliott House)

JOHANNESBURG—South Africa is a nation imprisoned by its history and frightened that it may have no future.

It is a land divided in a dozen ways not only black and white but also rich and poor, urban and rural, modern and primitive, rigid and flexible. Afrikaner and English, Zulu and Xhosa.

The extremes are the Afrikaner hardliners who steadfastly defend apartheid and the black youths who throw rocks and petrol bombs at government personnel carriers. But the surprising thing to a first time visitor isn't so much the passion of the extremists but rather the desire for some sort of compromise and conciliation among the great majority of South Africans representing the spectrum in between.

It is one of South Africa's many sad paradoxes that this political center, while surprisingly broad, seems also increasingly impotent. Afrikaner hard-liners hold the power here, and the opposition increasingly is dominated by young urban blacks who seek to topple the system rather than enter it. This street dialogue of bullets and bottles all but drowns out the calmer conversations.

During two weeks of crisscrossing this large land that is twice the size of Texas, a visitor encounters South Africans of many hues and views. The most poignant are the people trapped in the middle.

GRANDSON OF APARTHEID

Wilhelm Verwoerd, 22 years old, is a graduate student in theology at Stellenbosch University, both the Harvard and the Heartland U. of Afrikaners. Wilhelm's late grandfather, Hendrik Verwoerd, taught there and went on to become the prime minister of South Africa and the architect of apartheid. This system of racial separation today troubles even many young Afrikaners, including his grandson.

"For 18 years, apartheid was for me a very positive word—until I talked to other people," says the slight, sandy-haired and soft-spoken Wilhelm. It was at age 19 that Wilhelm first met an educated black. "I discovered blacks were just people," he says with the sense of awe and accomplishment that a child might feel on learning that the moon isn't made of green cheese.

Since then Wilhelm has become a modest missionary seeking somehow to do good and to undo his grandfather's policies. In doing so, he has broken with his own family, yet he remains a world apart from blacks. Like liberals of all colors here, he finds himself trying to build bridges across a gulf that is becoming increasingly wide.

"We want to get to know blacks as people. To have picnics. To play volleyball. But they are so frustrated that when they get a chance at a white they only want to talk politics, not play volleyball," he says, genuinely baffled.

Meanwhile, Wilhelm is having a hard time with friends and family. "It's exhausting trying to explain to white people like my grandmother about the blacks," he says. "If you talk favorably about blacks, people say you are a 'kaffir boetie' [nigger lover]. And some blacks can ony see me as the grandson of apartheid. Blacks must have rights, but I don't know how to do it. I don't know how to end the unfairness. It is hard not to be irrelevant."

GANDHI'S GRANDDAUGHTER

She stands, head bowed in painful reverie, amid the chared ruins of her grandfather's house. Ela Ramgobin, a plump, middle-aged Indian, points plaintively at the bare foundation. "I was born in that house," she says softly. "I remember as a child making mud for the bricks to build the house next door," which is also a burnt shell.

These are the ruins of the home of Mahatma Gandhi, who lived in South Africa for many years before he returned to lead India to its independence. It is one of South Africa's many ironies that among the casualties of its violence is the home of one of history's leading apostles of nonviolence. Last summer, mobs of young Zulus, the largest black tribe here, burned and looted the neighborhood in an effort to drive out Indians.

Next to the ruins of the Gandhi ancestral home is a small museum. The only contents left these days are an antiquated old press on which Mr. Gandhi printed his newspaper, Indian Opinion. The press was too heavy to loot. Only one thing is left hanging on the museum wall, a sign saying: "Do Not Touch."

Mrs. Ramgobin seems to blame this misfortune more on the political and social system than on the particular youths who wreaked this havoc. "You just can't have an island of nonviolence in such a violent country," she says sadly.

CHILD OF VIOLENCE

For many youths in black townships from Johannesburg's Soweto to Port Elizabeth's New Brighton, nonviolence is no longer an option.

The blacks of New Brighton are among the most tense and violent in South Africa. White soldiers periodically roll down the bleak, garbage-strewn and unpaved streets in armored personnel carriers. Groups of black youths stand on street corners watching them in sullen defiance. The previous night, a white soldier was hacked to death not far from here.

Sicelo Duze, a squat, powerful man in his early 20's who wears a black knit cap pulled low over his forehead, is encountered on a street corner. "Before any change will come, we must have confrontation," he says. "No one will free us. We have to free ourselves. Civil war is not far away, and whitey is going to get hurt." Mr. Duze speaks the words matter-of-factly, without apparent anger and with the absolute assurance of someone who believes history is on his side.

SWORD OF GOD

It is Sunday morning in Krugersdorf, a small community of working-class whites on the outskirts of Johannesburg, and the Rev. Kalman Papp is preaching. A thin man with graying hair, he stands stiffly erect in the pulpit of his Dutch Reformed Church, as he has every Sunday for 34 years. He reads from St. Matthew: "Seek ye first the Kingdom of God and his righteousness and all these things shall be added unto you."

After services he explains: "There's so much worry in our community these days about economics and politics that I try to tell our people to think first about God and then all else will work out."

But, as he sips a cup of tea, Mr. Papp reveals that he isn't leaving quite everything in the hands of the Almighty. The Papp home, it turns out, contains no fewer than 25 guns.

"I understand blacks' desire for freedom," he says. "But they're not ready for it yet. If they try to take it, we will have to fight. I'm a peace-loving man," he continues, warming to the subject, "but anyone who attacks me better be prepared to get a bullet."

NO MAN'S LAND

Donald Ncube, a suave, handsome black man in his mid-30's, has achieved all the trappings of success—a middle-management job at a major corporation, a nice home and two sons attending racially mixed private schools. But his very success now threatens him.

Sitting in a racially mixed restaurant in downtown Johannesburg, Mr. Ncube appears to be a man caught between cultures. He is clearly at home here in a white man's world, but he isn't allowed to stay overnight.

Angry gangs of black youths in Soweto, the black township where by law he must return each night, hurl stones at fancy cars like his. "They see people like me as part of the lost generation," he says. "They say I am a disgrace. 'You don't control anything,' they say to me. 'You're a stooge. It's better to die for liberation.' "

Mr. Ncube insists that he doesn't apologize for working at Anglo American, a diversified mining concern that is South Africa's largest corporation. "I want to show whitey that blacks aren't inferior. I want to be a symbol to my black brothers and sisters."

But, paradoxically, as a few blacks like Mr. Ncube manage to overcome white suspicion and hostility to achieve a measure of prosperity and prominence, they find they must now fear black suspicion and hostility. Mr. Ncube says he understands the hostility, even as he fears it.

MOTHER AND SON

Chasms of color are only the beginning of South Africa's divisions. Phetole Lipson Letsie, a tall black man who looks much younger than his 50 years, serves as a wine waiter at a Johannesburg luxury hotel, where he earns 200 rand a month, or about $80. Mr. Letsie stands in the middle of the hotel dining room alternately discussing with patrons the virtues of a 1983 Pinotage wine and the inequities of apartheid.

He is particularly upset about wage discrimination because he must send money home to support a large family in his tribal village of Mpepule.

Mpepule is both a six-hour drive and several centuries distant from Johannesburg. At the end of a bumpy dirt road, flanked by fields turned to dust by drought, sits a clump of conical mud huts with pointed straw roofs. From one of them emerges Mr. Letsie's mother. She is barefoot, with a dozen silver bangles jangling on her ankle. Her clothes are in tatters and her few remaining teeth are blackened. Like all mothers, she simply wonders why her son doesn't come home.

Her concerns are those of food and family. Neither she nor anyone else in this village seems aware of the political and economic crises dominating South Africa. Three years without rain have reduced this village to a few dozen families with their scrawny chickens and goats. Here, survival, not politics, is the issue.

FARM FAMILY

Elizabeth de Wilde, a middle-aged Afrikaner farm wife, also believes she is fighting for survival—not from the vagaries of weather but from the ravages of blacks. A strong, stern woman, she says she and her husband are so frightened that they are trying to sell a farm that represents two lifetimes of labor.

"It's too dangerous living out in the country alone among all these blacks," she explains. "If we have equal rights when we go to the ballot box, they will put in their people and they will murder us.

"It's communism that's pushing the blacks," she adds. "We are fighting for our very survival."

Her son, Marius, a shy, red-faced worker on the railroad in Nylstroom, feels threatened, too. Like a number of poor whites pinched by the worsening economy, he thinks the government is coddling blacks at his expense. "They take our jobs and our money," he says. "We pay taxes so they can burn schools. Enough is enough. Savages are savages."

At 33, he has already done three stints in the military and says he is ready to go again. "I'll kill 'em if necessary," he says.

BIG-BUSINESS MAN

The future looks much brighter from the high-rise offices of corporate South Africa. Here men whose personal wealth is assured worry not about their personal futures but rather about the future of South African capitalism. Zach de Beer, a director of Anglo American, says, "If one is intelligent and realistic, he has to conclude we are going to have a black government within 10 years. I accept that blacks will be calling the shots. What concerns me is the extent to which we get socialism."

Unlike most South Africans, Mr. de Beer has lived under black rule before. From 1972 to 1974, he ran Anglo American's mines in Zambia before the government nationalized them. "We were making a million dollars a day under a black government," he says. "Look at Zimbabwer [President Robert] Mugabe is the most out-spoken Marxist in Africa and he hasn't nationalized anything, so that gives me hope."

PROSPECTIVE EMIGRANT

Like thousands of less confident South African whites, Peter Anton is thinking of leaving. "I ask myself 30 times a day, 'Do I want to live through another civil war?' "

Mr. Anton, 39, was wounded three times during seven years of war in neighboring Zimbabwe. Eventually he immigrated to South Africa. But now he is contemplating returning to black-ruled Zimbabwe. "The bloodshed and destruction isn't worth it, but it's hard to convince people here of that," he says.

Indeed, 2,200 South Africans are emigrating to Australia this year, the destination of first choice for whites without links to Britain. Almost everyone has a friend or acquaintance leaving or hoping to leave. The first to go are the young, educated South Africans whose capital is in their heads. The government allows emigres to take only 100,000 rand, or $36,000 at today's rates. Less tomorrow.

A joke making the rounds at white dinner parties captures the mood of impending doom. "What's the difference between an emigrant and a refugee?" asks Mr. Anton. The answer: "Timing."

THE CHIEF

Drums beat. Little black girls in thigh-high yellow dresses strut ahead like drum majorettes. Out of a gray BMW steps Chief Mangosuthu Buthelezi, smiling, swaying to the rhythm, waving a small wooden mace above his head.

Mr. Buthelezi, still boyish-looking at 57, is the chief of the Zulus, the largest ethnic group in South Africa. By many estimates, this makes him the most powerful South

African black leader and almost surely the most powerful one who is not either in jail or in exile.

Today he is addressing a conference of 5,000, mostly Zulu women, crammed into a large tent. Surprisingly, Chief Buthelezi's strongest criticism is directed not at white leaders like President P.W. Botha but rather at black South Africans in the exiled African National Congress. "We do not go to bed with jackals, hyenas and serpents," he says. "We must not abide them. We must eradicate them."

Chief Buthelezi objects to the ANC's call for the violent overthrow of the white government. It is not that he is a proponent of nonviolence but rather that he believes blacks mustn't destroy the country they inevitably will inherit. "If my people will be worse off after liberation than before, I cannot support," he says. Or, as he tells the Zulu women, "When a hippo comes to your field to eat your crops, you do not destroy your crops to chase the hippo away."

Chief Buthelezi, like so many of his countrymen of all colors, finds himself a man in the middle—too radical for P.W. Botha and his Afrikaner constituency, not radical enough for the black urban youths who follow the violent line of the ANC. South Africa, meanwhile, continues to see its crops of every sort devoured by the hippos.

PALESTINIAN LIFE IN THE OCCUPIED TERRITORIES

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. CONYERS. Mr. Speaker, a member of my staff recently participated in an annual 2-week work camp in the West Bank and Gaza Strip. The purpose of the camp, attended by delegations from throughout the world, is to provide an opportunity to observe and experience first-hand Palestinian culture, history, and life under occupation.

The work consists of building roads and schools, cleaning streets, and other community-oriented activities which the Palestinians, either because of a lack of money, manpower, or for other reasons, cannot accomplish alone. The delegation also had the opportunity to meet with various community leaders and to tour the ancient cities and religious sites of the Holy Land.

Gina Aranki has written a personal account of her experiences and impressions of Palestinian life in the Occupied Territories, which was recently published in the Detroit Advocate. I would like to share this article with my colleagues. It provides a perspective that we don't often have the opportunity to hear.

PALESTINIAN LIFE IN THE OCCUPIED TERRITORIES

FOREWORD

I participated in a two-week international work camp in the Israeli-occupied West Bank and Gaza Strip from August 4-18, 1985. The following is a summary of the experiences our delegation encountered—things neither acknowledged by the Israeli government nor publicized in the American media. The information presented is only a small and informal sample of the injustices and forms of oppression committed against the Palestinian people; in this vein I hope that the readers of this piece will take it upon themselves to learn the details and statistics concerning these occurrences, and attempt to understand that the Palestinian people, like our South African brothers and sisters, are fighting for their very existence. I believe that this fact is important to the larger understanding of the motivations of those who are called "terrorists." While it is certainly wrong to use the lives of innocent people as pawns for political gain, it is important that we address not only the subject of bringing these people to justice, but the subject of why they act in the first place.

This is dedicated to the memory of Alex Odeh, the late Director of the West Coast Chapter of the American-Arab Anti-Discrimination Committee, who lost his life to terrorism here in America. While we are concerned with bringing the Palestinian hijackers of the Achille Lauro to justice, let us also concern ourselves with those whose actions ended Alex's life.

It is difficult for any individual—Palestinian or otherwise—not subjected to it to comprehend life under occupation. Even what I considered to be my own above-average understanding of its conditions and consequences did not prepare me for its utter pervasiveness—in aspects of daily life that we take so much for granted. And while we would certainly resist anything similar were it to take place in America, the Palestinians' resistance is labeled terrorism, and we are supposed to accept the hypocritical suggestion that victims of violence and injustice are tragic only when the violence is random and not when it is systematic and institutionalized; that concentation camps are intolerable anywhere in the world except the West Bank and Gaza, or Lebanon.

Synonymous with both the tragedy and the hope of the Palestinian people throughout the occupied territories was Dheisheh Camp, the largest refugee camp, population-wise, in the West Bank. As we walked through the streets to our respective work sites, children hollered "shalom"; the more bashful hid behind their mothers or older children. Their eyes widened when we answered them in Arabic, and suddenly we were surrounded by these beautiful little beings—old for their ages, judging from the intelligent questions and their surprisingly accurate knowledge of America and our government. Some of them led us along the dusty pathways to their shelters—for it is difficult to call the bare stone rooms which they shared with anywhere from eight to 20 people homes—where we were greeted by the hospitality of those who have little to share but the stories of their lives. And we heard many of those stories—of martyred sons and daughters whose photographs were taken from their places of honor for us to touch and gaze upon, and wonder, like their families, what they would have been like today. We heard about the homes and farms and fields and lives away from Dheisneh, many nearly 40 years ago, in various towns and villages that no longer exist. Destroyed by the Israeli military to make room for the new settlements and Jewish cities, those towns and villages only live on in the memories of the people of the camps. And despite the dense population, the lack of electricity and plumbing and medical care, those memories remain as fresh as if they were yesterday, and give the people hope for the future. When asked why they continue to raise large families in such difficult conditions, the parents said that they considered it an honor and a responsibility to have many children who will grow up and fight for their freedom.

Our days in Safa and Al-Isaweya, two towns not far from Jerusalem, are typical of most towns and villages of the West Bank. Many of the wage-earners commute to Israel to work at factory jobs, and have been involved in various battles with regard to equal pay and the right to unionize for Palestinian workers. The towns themselves are considered pockets of resistance, and we witnessed in them the kinds of attempts the occupiers frequently use to quell that resistance—the bulldozing of homes, without cause or notice.

In Safa, a family of 12 lives in what was once a shed behind the ruins of their home. They told us that two of their sons had been detained for allegedly belonging to a faction of the PLO: later they were told that they had been detained for stone-throwing. Even the authorities were unclear on what those charges were, and the sons had yet to even be arrested when a group of Israeli soldiers appeared at the house in the middle of the night to announce that they had 15 minutes to clear themselves and anything of their belongings they wished to save before the house would be demolished. They were then forbidden to rebuild on the site, and were refused when they sought to rent the heavy equipment needed to remove the rubble from their land. In Isaweya, we watched as the military demolished another residence while we simultaneously cleared the rubble from a third site, the former home of a suspected labor organizer. That afternoon there was little talk and no song, as we were prone to during our work in other places—only quiet anger and bitterness.

We made two trips to Gaza during our stay, although only one was originally planned. The first 3½ hour bus ride from our camp at Bir Zeit culminated in a quick denial to enter at the checkpoint. While a few of us sitting near the front of the bus were questioned by the guard, someone whispered that Meir Kahane was in the booth to the right of the entrance. Whether that ominous presence had anything to do with our being turned back, none was sure. For myself, the look of insolence and condescension on the face of a young soldier who eyed our bus as it turned back and brandished his Uzi, was explanation enough.

It was decided unanimously among our group that since there was something or someone in Gaza that the occupiers didn't want us to see, we were going to see it—the Palestinian will was contagious that day—and two days later, with a bit more planning on our part we were allowed to enter. Our anticipated work in Jabalya and other refugee camps in the thoroughly militarized strip was held to quick bus rides through them and only one stop to talk with the people, because of recent violence and the presence of the military.

Adnan, the leader of our host committee from Bir Zeit, was able to find Dr. Hader Abdul Shafie and ask him to speak with us. We gathered in a beautiful park just inside Gaza City, near the Mediterranean, and sat under the shade of a huge fig tree while the doctor, the director of the Palestine Red Crescent Society (similar to the Red Cross) lectured. As he spoke, however, a trio of soldiers entered the park.

They walked around our circle and stopped behind us, watching Dr. Abdul Shafie intently. He continued his discussion of the Red Crescent and answered our ques-

tions, but it was obvious that he was not providing as much information as he would have under other circumstances. He smiled often, but his gaze wandered to the soldiers who themselves never took their eyes from him. One of our delegation asked if there might be trouble for him after we were gone, and he said probably, but that would certainly not be unusual; they cause trouble every day of our lives.

And indeed, they did not even wait until we were gone to further attempt to intimidate both the doctor and our group. As we filed out of the park through a narrow, alley-like road, a jeep rumbled past, guns cocked from both sides of the windshield, forcing us to quickly move against the fences as it followed Dr. Abdul Shafie's car. We were frightened for him but utterly helpless, and it was a most frustrating feeling that we experienced often during our two weeks.

The day we were turned back at Gaza, we made an alternative trip to Khalil, or Hebron, its Jewish name. Khalil is considered by the military to be even more of a problem area than Safa or Isaweya because of the proximity of the central marketplace to a settlement called Kiryat Arba. Kiryat Arba is almost fully occupied by Kahane-followers who espouse vigilantism in alarmingly increasing incidents. Two days prior to our visit, a settler had been knifed, and it was believed by many that other settlers had done the deed so that the military's presence would become more pronounced and apparent as a result. Whatever the motive and whoever the perpetrator, a stronger military presence—presumably directed against the Palestinian population of Khalil only—was exactly the result. It came in the form of troops, of hastily erected watchtowers, of barricades and barbed wire around the marketplace which was closed indefinitely, and of a curfew imposed on the entire town until further notice. As a result of this latest intimidation there was an atypically small number of Palestinians out that day; those who were moved quickly, with their eyes averted from the soldiers who outnumbered them easily.

The situations we experienced, of course, were incomparable to those experienced by our brothers and sisters who live with—or rather, in spite of—the occupation. The first hand accounts of detainment, arrest, and torture, the censure and closure of Palestinian universities and media for opinions not espoused by the Israeli government, town and house arrest of leaders like Bassam Shakaa, the former mayor of Nablus, and deportation of others—the list is endless, and the incidents almost daily. But against every form of oppression, the Palestinian people struggle with a determination that is awe-inspiring. They obtain and read the some 3,000 banned books, hold classes censored by the military in private homes, relay information to the outside through the mail using false addresses, and in increasing cases are taking their grievances to the usually farcical Israeli courts—and winning.

I have written solely about the bittersweet during our two weeks in Palestine, but that is not to say that there was a lack of sweet experiences. The beauty of the land and the smell of the air were daily exhilarations; it was easy to understand the Palestinians' love for their country and why they have fought so long and so hard to remain a part of it. The desire within myself to stay and become a part of them was intense, and in that sense the two weeks were much too short.

There was just enough time, however, to begin lasting friendships, to come to love and respect the Palestinian people as a whole, and to be proud to be a part of them and their struggle, even thousands of miles away. If anything positive could be said about the occupation. It is this: it has created a marvelous strength of will within the Palestinian people, a strength that has persisted and grown in the face of tremendous odds against them. It will not be destroyed by anything tangible to which they may be subjected because of their belief—and now my belief as well—in the justice that will ultimately be theirs.

DEMOCRACY IN ARGENTINA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. GARCIA. Mr. Speaker, the New York Times ran an editorial yesterday on Argentine midterm elections. While that nation continues to face problems, the people of Argentina showed their support, not only for President Alfonsin, but for democracy.

Right-wing terrorists have been attempting to undermine the Argentine democracy, but neither Mr. Alfonsin nor the people of Argentina are going to let that happen. But as the Times editorial states:

To complete the democratization of Argentina, he (Pres. Alfonsin) will need a lot more help from his friends, starting with significant financial relief from Washington.

Amen.

I submit the editorial for the RECORD.

[From the New York Times, Nov. 6, 1985]

DEMOCRACY UNFOLDS IN ARGENTINA

President Raúl Alfonsín fell short of a sweeping vote of confidence in Argentina's midterm elections, but his democratic cause nonetheless gained while the most backward-looking Peronists lost ground. Still, friends of freedom can scarcely afford to relax; the foreign debt problem remains dangerous and Washington's help on this issue remains essential.

Just getting to the election was a milestone. It has been 20 years since any constitutional government lasted long enough to reach a midterm vote. Argentine politics is a rough sport, peopled with demagogic Peronists and undemocratic generals. Mr. Alfonsín has rebuilt his traditionally middle-class Radical Party into a national coalition. He has insisted on legal accountability for leaders from the lawless past. And he has aggressively challenged the hyperinflation that has repeatedly undermined politics.

His greatest success has been on the political front. For the second time now, his Radicals have outpolled the once-invincible Peronists. And this time Peronism's least democratic faction, built around ultranationalists and labor bosses, was thoroughly repudiated.

Mr. Alfonsín's legal and economic initiatives have had a rougher time. Rightist terrorists are trying to block the pending verdicts in the junta trials. Unable to count on judges mostly appointed by the military to detain the terror suspects, he was forced to declare a state of siege just days before the midterm vote. His original economic program was derailed largely by resistance from the Peronist labor hierarchy. He was forced to drastic I.M.F.-style austerity, which has sharply reduced inflation—but also real income. That probably cost the Radicals some votes.

Though he has now gained a little breathing room, President Alfonsín remains in a tight spot. He has pushed back the ultranationalists, but still faces the crushing foreign debt. He has confronted but not yet vanquished terrorism, even with a worrisome state of siege. To complete the democratization of Argentina, he will need a lot more help from his friends, starting with significant financial relief from Washington.

LOCAL ANTI-TERRORISM PLANNING ACT

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. SMITH of Florida. Mr. Speaker, international terrorists have declared war on the United States, and it is only a matter of time before the battleground shifts to our country itself.

In recent years, we have given more than $1 trillion to the Armed Forces to protect us from the enemy without. Yet, we are quite unprepared to meet a threat directed against our people or vital public services within our own country.

On October 23, 1985, the Foreign Affairs Committee held a hearing on maritime security. I asked the witnesses from the Coast Guard, Federal Maritime Administration, and Department of State whether they had a plan for dealing with domestic terrorism. They told me of an interagency working group that is studying the problem but also admitted that no current plan exists for aiding States or localities.

Despite this lack of Federal initiative in this area, several local law enforcement agencies are working on their own to develop plans that would permit them to deal with a terrorist threat that might affect their jurisdiction.

I believe that the Federal Government must help these efforts. I, therefore, am introducing legislation that I am calling the Local Anti-Terrorism Planning Act. This bill authorizes the Attorney General to make grants for 3 years to local governments for the development and implementation of innovative antiterrorism plans. The money would come from existing discretionary grants under the Justice Assistance Act and would require no additional authorization or appropriation.

Certain parts of this country are more vulnerable to terrorist threats than others because of the public facilities they contain. For example, the concentration of major transportation and energy facilities in a small area would be a greater prize for terrorists than widely dispersed facilities.

I believe, therefore, that antiterrorism plans first should be drafted for these jurisdictions. Once these plans are implemented properly, other communities with fewer

strategic facilities could modify and use appropriate provisions. For this reason, my bill would limit these initial grants to units of local government that contain important public facilities in a limited area. In the future, these antiterrorism plans would be funded and used like other innovative plans of proven effectiveness.

Let me illustrate my point by looking at Broward County, FL. South Florida contains many refugees and emigrees, some of whom come from countries that support or harbor terrorists. Given the laws of probability, some of these residents might themselves be potential terrorists or might be willing to support such terrorists.

We also have within a mile of each other a major airport and deep water port, electricity generators, and storage facilities for most of the fossil fuels consumed in south Florida.

In 1984, the Fort Lauderdale/Hollywood International Airport handled 6.4 million passengers on 300 domestic and international daily flights. Two major air freight carriers also use this facility. The airport is projected to have a 5-percent annual growth.

Also in 1984, Port Everglades handled 437 ships, many of which carried containerized cargo, plus 713 petroleum tankers or barges; an additional 190 naval vessels visited the port. Finally, this year an estimated 20 cruise ships will carry 330,000 passengers in and out of Port Everglades. As a target for terrorism, this region must rank high.

Because of this combination of people and public facilities, this region must rank high as a potential target for terrorism. This, in turn, poses a definite problem for law enforcement. The Broward sheriff's office [BSO] is but one of three police agencies and two separate security forces that have jurisdiction over these facilities. Rather than having to deal with a terrorist threat in a reactive manner, BSO would like to expand the services it already provides to create a proactive deterrent to any terrorist threat.

BSO, therefore, is proposing a three-phased program. It includes obtaining additional bomb dogs; reorganizing its SWAT section into a hostage rescue/antiterrorist squad; and establishing a management team to extend these services to other law enforcement and security personnel.

This is a necessary local attempt to solve what is a national problem. Properly implemented and supported, this limited program could be expanded to create a plan that would deter terrorism in south Florida and elsewhere.

We must not wait until after terrorists have struck at home to protect our fellow citizens. Ad hoc solutions are not the answer in a time of war. Proper planning, however, is essential. My bill would enable us to develop a limited number of workable plans that could then be utilized by jurisdictions throughout the country. Antiterrorism plans are needed now. Tomorrow may be too late.

RAINBOW NAVIGATION AND MILITARY CARGO PREFERENCE

HON. FRANK McCLOSKEY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. McCLOSKEY. Mr. Speaker, recent calls for a comprehensive reorganization of the Department of Defense have underscored the importance of rebuilding American maritime capability. Practically none of our missions in defense of allies and national interest make sense without a substantial improvement in our current sealift capacity. It is estimated that the minimum requirement to sustain the operations of a single mechanized division is 1,000 tons per day delivered: 100,000 tons are required to deploy such a division. As my colleagues know, the United States depends on U.S.-flag ships to augment our military sealift capacity during a time of war, or national emergency. But the number of U.S. ships under construction has declined steadily, dwindling from a recent high of 96 one decade ago to only six in 1985.

It's therefore, most disturbing to find the Department of Defense and the Department of State attempting to undercut what little sealift capacity we now have for foreign policy reasons which have been found contrary to longstanding DOD cargo preference law. I refer here to the case of Rainbow Navigation, a small American-flag shipping company which operates the only U.S.-flag vessel in the carriage of U.S. defense cargoes between the United States and Iceland.

In August of this year, the Secretary of the Navy initiated action to effectively scuttle Rainbow Navigation's ability to continue to conduct military commerce between the United States and Iceland by declaring this small company's rates to be excessive and otherwise unreasonable. But the Department of Defense did not stop 'here and determined to divert military cargo which could be more efficiently carried by Rainbow Navigation to transport by military aircraft, effectively obstructing any westbound trade for Rainbow Navigation. Rainbow Navigation filed suit in the U.S. district court for declaratory and injunctive relief on the grounds that the Navy Secretary's action violated the 1904 Military Cargo Preference Act. On October 15, the court ruled in favor of Rainbow Navigation.

I have expressed my concern about the Navy's actions to the House Armed Services Subcommittee on Seapower. It is most disturbing to me that the Department of Defense would seek to eliminate the sole surviving United States-flag carrier of DOD cargo between the United States and Iceland. Moreover, the apparent subsidy of the Icelandic shipping industry as the result of these actions at the expense of an American-flag carrier contrary to provisions of law is neither good policy nor good politics.

The importance of Iceland to the NATO alliance is understood and appreciated by all who support our treaty commitments. What is not part of our treaty commitment to NATO is the manner in which an American shipping company is targeted to pay the price for harmony in our relations. Given our need to keep what potential sealift assets we have, I believe we are being pennywise and pound foolish by undertaking these actions which only hurt the U.S. maritime industry.

Forgetting what one is doing in the middle of doing it is the classic definition of stupidity. It is tempting to say that the Department of the Navy forgets the case that it makes to the Armed Services Committee year after year for building up our sealift capability.

What I hope that the case of Rainbow Navigation will do is to set right the thinking of the Navy on matters of law. We should explore avenues of solving our foreign policy problems with a foreign friend other than offering up for sacrifice a competent American shipping firm. Common sense and the courts are on the side of Rainbow Navigation. The Department of Defense should be as well.

FLEXIBLE FOREST MANAGEMENT

HON. FREDERICK C. BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. BOUCHER. Mr. Speaker, proper forest management is an ongoing debate in my heavily forested congressional district. The various benefits of a forest—economic, recreational, wildlife, and aesthetic—must be considered when determining forest management policy. To contribute to the debate, I am pleased to submit the following comments by a forester in my district, Leon Minckler, who argues for flexible forest management.

ECOSYSTEM MANAGEMENT REQUIRES FLEXIBLE SILVICULTURE IN EASTERN HARDWOOD FORESTS

(By Leon Minckler)

Ecosystem management treats each part of the forest in harmony with ecological principles to produce multiple uses and maintain forest productivity. Application involves the use of flexible silviculture consistent with site-type-forest condition-climatic characteristics. This looks toward seldom used practices especially applicable to public forests and nonindustrial private ownerships. Adoption of these practices would involve some major changes in present forest management policies and would affect forest planning.

Central to this thesis are the functions of forests in our modern society. In simple terms, a forest is a biomass factory and it is an environment with all the attendant values. The art and science of the forestry profession must be concerned with both. To do this we must treat our forests, or significant portions of them, as natural ecosystems sensitive to outside influences.

How does this relate to silvicultural (ecological) practices? Traditionally, foresters have talked mostly about timber productivity, and forest economists have tended to

place high emphasis on timber values. This has affected management practices in both obvious and subtle ways. But land should be seen as a priceless resource and man's management oriented toward the health, beauty, and permanence of this resource. Maintaining productivity, then, follows as a necessary consequence when productivity includes all values, materialistic and environmental, over the long term.

Ecosystem management requires a recognition of the unified and flexible nature of all silvicultural practices. Practices should not be considered separately, as often done in textbooks, but treated as an interrelated whole.

The practice of silvaculture includes three funtionally different but related activities. These are the modification of existing stands, the creation of conditions favoring new regeneration, and establishment of new forests by artificial regeneration. Modification of forests include the familiar thinning, improvement cutting, release cutting, and weeding. But this can and should often be done at the same time (and in the same area) as the creating of space for new regeneration by cutting mature trees. Actually, these processes complement each other as more space is provided fo regeneration at the same time existing good growing stock trees are freed from undesirable competition. We cut mature trees before they become decadent; we thin dense stands to save mortality; we provide space for regeneration that is adequate and effective. It emulates nature but saves waste of wood and saves time by shortening rotations.

One of the most important forestry research projects in this country is development of methods, skills, and machinery for logging to develop and maintain reasonably natural forests while still producing high yields of quality timber products. So far, much of our effort has been in the other direction; heavy efficient machinery for short-term timber profits.

Some foresters will protest that a managed forest cannot be "natural". In the strict sense only a wilderness area untouched by humans can be natural. But we can emulate nature by ecosystem management or produce forests with most of the characteristics we consider natural. For eastern mixed hardwood, the following characteristics should usually be present:

1. Species composition similar to forests for that climate and site but not necessarily those present after past management abuses or disease epidemics. These are species and proportions of species which have become adapted over geologic time to these conditions.

2. The stand structure, diameter distribution and tree size range, should be similar to the original, except for fewer very large trees.

3. There should be a scattering of den trees for wildlife.

4. There should be a few dead trees, especially of medium and large size.

5. The understory should be typical of the original forest.

6. The diversity within the forest will include species composition and tree size usually arranged in a mosaic of small groups of openings. This contrasts with external diversity where large blocks are clearcut as now being done in most national forests. For some species, nature can be emulated by clearcutting with proper measures for regeneration.

These characteristics are not incompatible with timber production. We are on ecologically sound ground, and if practices are continued, we know where we will be 100 years from now. Widespread clearcutting of eastern mixed hardwoods, with many species and tree sizes and for many sites, types, and climatic conditions, is an ecological puzzle. We don't know what will happen and we don't know where we will be 100 years from now. Repeated clearcutting will change the ecosystem and degrade the sites on moderate and steep slopes. We are doing it now.

A TRIBUTE TO THOMAS A. DINE

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. LEVINE of California. Mr. Speaker, I call to your attention and to the attention of the House an article which appeared in the National Journal of November 2, 1985. Written by Christopher Madison for the "In Person," page, this piece profiles Thomas A. Dine, executive director of the American Israel Public Affairs Committee, or AIPAC.

The headline on the page reads, "He's Got Charisma, Credibility, and He Wins Battles for Israel." Mr. Speaker, all of that is true, but it does not go far enough. In fact, Tom Dine is one of the most eloquent voices in this country fighting for a strong and secure United States-Israel relationship. His superb grasp of the issues, his persuasive and straightforward style, and his engaging personality, have combined to elicit the respect of every Member of this body who has been lobbied by him.

I am pleased to consider Tom a friend of long standing. I, as well as many of my colleagues, seek advice from him on the numerous issues that arise involving American foreign policy in the Middle East. We can always count on a cogent and well-reasoned response.

Under his stewardship, AIPAC has earned a reputation as one of the most effective foreign policy lobbies in Washington. Not only does this stem from Tom himself and from the professional staff at AIPAC that Tom as assembled, not only does this stem from the convincing case to be made on behalf of strong United States support for Israel, but it also stems from Tom's insistence on local political participation by all who believe that a strong United States-Israel relationship is in the best interests of both countries. As Tom is fond of saying:

We in Washington are only as strong as you at the grassroots.

Mr. Speaker, I applaud Tom's emphasis on citizen involvement; it helps enrich the political process and serves to strengthen our democracy. It is an element of AIPAC's success too often overlooked.

The article on Tom Dine from National Journal follows:

[From the National Journal, Nov. 2, 1985]

He's Got Charisma, Credibility and He Wins Battles for Israel

(By Christopher Madison)

Accuse Thomas A. Dine, executive director of the American Israel Public Affairs Committee (AIPAC), of carrying water for Israel and he will throw, well, cold water on the idea.

He still remembers that day in early September 1982 when he was quoted on the front page of *The New York Times* as saying there were positive elements in President Reagan's Middle East peace proposal.

Dine's remarks were controversial—they were used in the *Times* as a sign of dissension in the Israeli ranks—because Israel had already called the peace proposal unacceptable. After the article appeared, a Member of Congress offered to provide Dine a "safe house," and Israeli diplomats at a dinner that week at the Israeli ambassador's house assured him he was safe—as long as he did not stand under the chandelier.

But that declaration of independence from Prime Minister Menachem Begin probably still gives Dine added credibility when he goes to Members of Congress and argues the pro-Israeli side of foreign policy issues, as he did in late October, when Congress delayed the Reagan Administration's proposal to sell arms to Jordan until March 1.

The delay was something of a coup for Dine and AIPAC because the Administration had pressed the argument that Jordan's King Hussein needed the arms sale to continue his participation in the Middle East peace process.

Dine's two-part reply to this argument—an argument also heard on the Senate floor, where the delay was approved, 97-1—was that "arms don't lead to negotiations" and that Hussein must prove he is willing to sit down at the peace table with Israel before getting weapons. "Deeds, not words," he said.

Dine, 45, joined AIPAC in 1980 with 10 years of Capitol Hill experience—he had worked for Sen. Edward M. Kennedy, D-Mass., and former Sens. Frank Church, D-Idaho, and Edmund S. Muskie, D-Maine—as well as at the Brookings Institution and the Institute of Politics at Harvard University.

Where his predecessor, Morris J. Amitay, had a reputation as being abrasive in his dealings with Congress, Dine is smooth, low-keyed, even intellectual. He had good credentials, and he was politically astute. A former AIPAC staffer said Dine was "the best possible person" to replace Amitay.

He has charisma and is a bit of a cheerleader, and he presides over an organization that has developed into one of the most effective lobbies in town.

Fresh from the arms sale victory, Dine was eager in an interview to tackle the charge that AIPAC distorts the U.S. political system because it represents the interests of the Israeli government even though the organization is backed by American constituents.

"I feel our whole approach is based on our concept and pursuit of American foreign policy. It is not based on the concept of Israeli foreign policy per se," Dine said.

To those who question whether ethnic lobbies serve the U.S. national interest, Dine responded: "No one knows what the national interest is. We're all trying to find the national interest. It's a confluence of an enormous number of influences."

While Dine denies that he lobbies for the Israeli government, he does not pretend

that AIPAC does not use political leverage to maximize its impact. He acknowledged the "crucial" role played by the 22 Republican Senators up for reelection next year in the Jordan arms sale victory.

Dine visited about three-fourths of the Senators on the arms sale issue, and, all together, AIPAC lobbyists met with 99—the exception being John C. Stennis, D-Miss., who has been ill for some time. But Dine denied threatening political retribution against those voting for the sale.

He is proud of two new converts to the pro-Israeli contingent in the Senate—Jesse A. Helms, R-N.C., who began building ties to AIPAC and Israel when he was mentioned as a potential Foreign Relations Committee chairman in early 1985, and Thad Cochran, R-Miss., another southern conservative.

AIPAC may have won last month's battle, but the war is never over. The resolution the Senate passed would allow the arms sale to go through next March unless Congress stops it. It could go sooner if peace talks begin between Israel and Jordan.

Dine said his team will support another resolution disapproving the arms sale early next year if there are no signs of peace talks. "The burden is really on Hussein now," he said. "If he does not go along" with peace talks with Israel, "he will not get the arms."

THE SATURDAY NIGHT SPECIAL CRIME CONTROL ACT OF 1985

HON. CHARLES A. HAYES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. HAYES. Mr. Speaker, I along with Representative SALA BURTON introduced today, the Saturday Night Special Crime Control Act of 1985, which, when enacted will extend to those handguns manufactured in the United States the same standards that now apply to imported handguns under the terms of the 1968 Gun Control Act [GCA]. We believe that this legislative initiative strengthens our law enforcement response to violent crime.

The incidence of violence in which these handguns are used had continued to be a problem even though the cheap imports have been eliminated. Many of the foreign manufacturers have been able to evade the intent of the GCA by establishing subsidiaries in the United States where the constituent parts are imported and assembled. These handguns are cheap, easily concealable, poorly made, inaccurate and useless for any legitimate purpose.

The issue of the availability of these handguns has been raised again in recent weeks. The most important development is a decision by the Maryland Court of Appeals (*Olen J. Kelley, et al.* v. *R. G. Industries, Inc., et al.*, filed October 3, 1985) in which they held that manufacturers and sellers of Saturday night specials can be held liable for their criminal misuse. The decision cited the long history of criminal misuse of these handguns and the absence of any legitimate use. This decision could have far-reaching impact in other States and could conceivably stop the manufacture of these handguns due to the potentially vast liability on the part of the manufacturers and sellers of Saturday night specials.

We believe that our bill is reasonable, modest, and balances the approach to sale of Saturday night specials in our country and improves the method for keeping handguns out of the hands of criminals.

We believe that by this legislation Congress can deal with the critical problem of handgun violence perpetrated by criminals who have easy access to cheap, easily concealable handguns. This particular aspect of handgun violence has plagued our society for many years and which has heretofore defied effective solutions. The problem has persisted despite the efforts to control the flow of handguns through the Gun Control Act of 1968 and other measures. We propose to again try and address an aspect of the problem which now exists and which we are confident is solvable.

The Saturday Night Special Crime Control Act of 1985, contains the moderate, sensible steps necessary at the Federal level to reduce the appalling handgun crime figures without infringing upon the legitimate needs of hunters and sportsmen. The handguns we address in this bill have long been recognized as particularly prone to criminal misue and virtually worthless for any legitimate purpose.

Our bill is narrowly drafted to accomplish a simple yet very important purpose. It would extend to those handguns manufactured domestically the same manufacturing criteria currently required of foreign manufactured handguns under the terms of the Gun Control Act of 1968.

This criteria, with each aspect assigned a numerical value, includes such things as length, quality of materials, caliber, safety features, type of sight, and barrel length. Additionally, certain drop tests intended to determine the handguns safety under adverse conditions are applied. The result of these criteria and tests is to produce a numerical score which determines whether or not the handgun may be imported. We propose to extend to all domestic handguns these same requirements. The effect of our bill will be to remove from the market, easily concealable, cheap, unsafe handguns which have no legitimate sporting purpose.

We recognize that handgun control legislation is not the whole answer to the problems of handgun violence. Other steps to address the problem must and are being taken. But this legislation is moderate, well-reasoned and addresses the serious problems presented by cheap, easily concealable handguns. We cannot ignore the fact that these handguns pose a serious and continuous threat to our law enforcement officers and those citizens unfortunate enough to be a victim of criminal assault.

We believe that our bill will have a significant impact on reducing the availability of the Saturday night specials in our country. A copy of our bill is attached. We hope that the majority of our colleagues agree and will join us and support our bill.

The bill follows:

H.R. 3706

A bill to amend chapter 44 (relating to firearms) of title 18, United States Code, to prohibit the sale of handguns commonly called Saturday night specials

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 922(b) of title 18, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (4);

(2) by striking out the period at the end of paragraph (5) and inserting "; and" in lieu thereof; and

(3) by inserting paragraph (5) the following:

"(6) any firearm, other than a rifle or shotgun, to any person, if the Secretary determines such firearm to be unsuitable for lawful sporting purposes based upon standards established under section 925 (d)(3) of the title."

OPPOSE REPUBLICAN DISINVESTMENT OF SOCIAL SECURITY FUNDS

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. COLEMAN of Texas. Mr. Speaker, I strongly oppose the recent action of the Treasury Department to disinvest the Social Security trust funds to finance the national debt. Because the Treasury accelerated the redemption of trust fund securities, there will now be a substantial loss of interest to these funds for years to come.

Tragically, this action was not even necessary. The Democratic House approved a debt-ceiling extension that precluded the need to dip into the Social Security Trust Fund, but the Senate turned its back on the House legislation and said, in effect, "full speed ahead." I join with Congressmen JONES and PICKLE in their lawsuit, filed just hours after the Republican raid on Social Security began, to prevent the Treasury from using the trust funds to back the Government's debt.

This ill-advised and illegal action goes beyond the financial loss and will create a loss of trust by the American people in the Government's commitment to Social Security. To restore that trust, Congress must take every necessary measure to make sure that this disinvestment can never happen again. The President himself said that Social Security does not contribute to the deficit, but the administration's budget-cutting knife continually looks to this program for major reductions. Now they are drawing from the trust funds, without the consent of Congress, to meet the financial considerations of the Federal Government.

I do not think anyone needs to be reminded that the Democrats created the Social Security Program, and the Democrats protected it throughout the years from constant Republican-sponsored assaults. The Social Security Program was established in 1935 by a Democratic President as a protective measure against "pov-

erty-ridden old age." Fifty years later, this legacy of Franklin Delano Roosevelt has allowed many of our Nation's elderly, poor, and disabled to live a more secure life than their counterparts did 50 years ago.

Despite continuous promises by the President to never reduce Social Security, he and the Republicans have tried continually to do just that. If we examine the Republicans' track record, it is evident that they have breached their promise to the American people. In the 1980 campaign, the Republicans promised to protect Social Security and Medicare, the two programs the elderly rely on the most. This promise, however, did not prevent the Republicans from seeking large benefit cuts as soon as they took office in 1981. Although they have tried to implement large spending cuts in both Social Security and Medicare, the Congress has repeatedly rejected their proposals.

And who, Mr. Speaker, can forget in 1982 when the chairman of the National Republican Congressional Committee suggested in a letter that Social Security might be made voluntary?

1984 was no different. During his bid for a second term in office, the President stated that "* * * no one presently dependent on Social Security is going to have the rug pulled out from under them and not get their check." But shortly after his reelection, the President requested that the Senate include a freeze in the Social Security cost-of-living adjustment in this year's budget proposal. Once again, the Democrats in the House beat back the Republican attacks on the Social Security system.

And today, Mr. Speaker, "there they go again." The original Gramm-Rudman proposal targeted Social Security for automatic budget cuts, which could have reduced the retirement fund by up to 20 percent. I for one am proud that the Democrats refused to even consider the measure until the authors exempted Social Security from the dramatic cuts that would result from the implementation of the Gramm-Rudman proposal.

Mr. Speaker, given the Republicans' track record over the last 5 years, is it any wonder that this Congress spends days on end debating whether or not to cut Social Security? Why is it that whenever the discussion turns to budget cutting, the Republicans automatically assume that Social Security is at the top of the list? Why is the debate always framed in such a manner that they demand that we Democrats have to find a good reason not to cut Social Security or else it will automatically be considered for cutting?

Mr. Speaker, I am tired of seeing Social Security at the top of the Republican hit list. It is shameful that we have to continually fend off Republican attacks on Social Security, attacks that always and automatically assume that Social Security is the prime candidate for budget cutting. Some things in the American tradition have worked so well that they have become part of the foundation of trust between the American people and their Government. This foundation is made up of cornerstones such as the Constitution, the Bill of Rights, the Civil War amendments to the Constitution, and yes; I will say to my Republican colleagues, the Social Security Act is one of these cornerstones. It is time that we uphold the trust placed in us by the American people to take necessary action to prevent the administration and the Republicans from invading the Social Security trust funds for political gain.

INTRODUCTION OF H.R. 3684 AND H.R. 3685

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. RICHARDSON. Mr. Speaker, I want to take this opportunity to share with you and my distinguished colleagues two legislative initiatives that I have introduced to stimulate economic activity and protect environmentally sensitive areas in west central New Mexico.

My two bills—El Malpais National Monument and Chaco National Historical Park—are carefully balanced compromises in the best interest of our Nation. The legislation will protect some of this country's most sensitive and unique environmental areas and at the same time provide some much needed relief to an area of New Mexico that has been blighted with high unemployment due to the decline of domestic mining industries.

My El Malpais National Monument bill would provide protection to 351,000 environmentally sensitive acres; 193,000 acres would receive well-deserved permanent wilderness status protection. The Bureau of Land Management (BLM) would continue their management role over the national monument area, protect its unique resources, provide for recreation, public education, and research through the creation of a visitors center.

El Malpais lava field and neighboring public lands include a collection of u que treasures and some of our country's finest environmental sites: Cinder cones, lava tubes, ice caves, pine forests, sandstone formations, and a natural archway—an area that has been preserved in its natural condition since 1974 by the Bureau of Land Management.

E. Malpais (The Badlands) is the historic Spanish name given to the lava field. The area is located in west central New Mexico just south of the city of Grants. The area contains one of the most outstanding examples of volcanic landscape in the continental United States. The four lava flows in the El Malpais area occurred over the last 3,000 years. Indian legends relay a tale about a river of fire covering fields that their ancestors tilled. The area contains several unique assets that deserve protection for future generations to enjoy.

In 1976, the BLM received its first mandate to look at the Malpais area as wilderness. Since that time, BLM has exchanged more than 60,000 acres of land it had in northwestern New Mexico for private land in the Malpais so they could make the area a showcase for the public. The second phase of that land transfer was just completed. BLM is still working with mining concerns to acquire the mineral rights. All BLM plans have included the creation of a visitors center. For the past 10 years, BLM has gone through a methodical process to try and bring it to a point where El Malpais can be managed for the enjoyment of the public.

Back in 1970, the National Park Service conducted a feasibility study for the Malpais area. That study concluded that the area was suitable for recreational development but that BLM was working on a proposal. We already know the area is worthy of environmental protection and we already know that the area is suitable for recreational development. The time for action is now.

Mr. Speaker, my second bill, the Chaco Culture National Historical Park, will improve on the overall management of the area and its archaeological protection sites by directing the National Park Service to administer the lands. The bill provides for the development of one archaeological preservation site in the vicinity of Grants, NM, to be used as a detached, interpretive unit.

Chaco Canyon is an area of major significance in the cultural history of North America, as it contains spectacular archaeological remains of the native American past which has long been recognized as representing an architectural peak in Anasazi Indian prehistory.

The significance of the 33 identified Chacoan outliers has only recently been appreciated; many of the archaeological features received little protection in the past. Cultural values such as: Roadways, water control systems, and concentrations of pottery, weapons, tools, refuse, perishable material, and human materials have experienced looting and vandalism at some Chacoan outlier sites. One of the problems, I believe, has been with the management of the area.

On December 19, 1980, Public Law 96–550 was adopted to create a system of Chaco culture archaeological protection sites composed by outlying Chaco sites that were connected to the main complex in Chaco Canyon by a system of prehistoric roads. Thirty-three of these sites (31 are in New Mexico) were designated to be protected by the National Park Service, the Bureau of Land Management, and the Bureau of Indian Affairs. A joint management team was mandated to come up with a plan.

That was 5 years ago and to date, none of the three Federal agencies mandated under the act have protected a single site that was not already protected at the time of its enactment.

Further, the Secretary of the Interior was required to submit recommendations to Congress by December 12, 1982, on his suggestions for additions to, or deletion from, the list of archaeological protection sites. This has not happened. The final joint management plan for the Chaco cul-

ture archaeological protection site system was adopted in July 1983, but was not published in the Federal Register until November 1984. The plan calls for a very awkward system of management by the three Federal agencies.

Mr. Speaker, it is clear to me that the compromise Congress adopted in the 1980 legislation to protect these Chaco outliers has been a complete failure. My bill will ensure the protection and proper management of the Chaco outliers. One agency should be designated to protect and manage this internationally important resource—that agency should be the National Park Service, since it has the legislative mandate and the expertise to do the job right.

A majority of the Chaco outliers are now owned by the Navajo Nation. Clearly, the Bureau of Indian Affairs should not be the agency to manage archaeological sites—the BIA is not a land management agency. My bill directs the Secretary whenever possible to acquire by exchange or purchase those sites in question or whenever possible to negotiate a cooperative agreement with the Navajo Nation.

Chaco Canyon is one of our Nation's most important resources. It is scheduled to be designated as a world heritage site by the United Nations in 1985.

It is important that the Congress act now to ensure that the malpais and Chacoan outliers are properly protected and managed and that there are interpretive sites available for the public to enjoy these archaeological and natural wonders. At the same time, the creation of two new tourism centers would provide much-needed employment relief to an economically depressed area of New Mexico and an opportunity for a traditional mining community to diversify their economic base. I hope that my colleagues will take the time to review these legislative initiatives—H.R. 3684 and H.R. 3685—and support their swift enactment.

INTIMIDATION THROUGH COMPUTERS

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. DORGAN of North Dakota. Mr. Speaker, in the old days, pirates were characterized as those who operated fast ships, wore unusual bandanas and eye patches and tried to relieve unsuspecting victims of their valuables.

These days we still have some pirating going on, but the pirates operate a little differently. They still get your money, but they get it through intimidation with computer solicitions.

A recent column by Mike Royko tells of an 85-year-old lady in a nursing home who got a letter signed by a Rodney A. Smith, treasurer of the Republican Presidential Task Force, who told the elderly woman that if she did not contribute money to the Presidential Leadership Task Force, "in exactly 30 days he would be instructed to submit a membership status report to President Reagan * * * " He said further, "I've had our comptroller enclose a statement showing our recent attempts to renew your membership. I want you to know that an updated copy of this statement will be reflected in my report to the President," He said, "Unless I hear back from you immediately, I will be forced to place your name on the delinquent member ledger that I send to the President."

Mr. Speaker, this is just one example of a Republican fundraising letter that, in effect, threatens to report an elderly woman to the President that she was delinquent in her responsibilities to give money to the Republican Party.

This example is one from the Republican Party, but these mail solicitations that try to intimidate are occurring all too frequently by many groups—Republicans, Democrats, religious groups, and others.

It's time for this con game with computers to bilk people out of their money to stop. I'm especially outraged at this example. I don't know who Rodney A. Smith is, but whoever he is, wherever he is, he ought to be ashamed of himself. This kind of intimidating mail is inexcusable.

The article follows:

A REPUBLICAN COMPUTER SHAKEDOWN

(By Mike Royko)

The Republicans have a well-deserved reputation for being masters at raising money through the mails.

The party's numerous fund-raising arms have developed the computerized letters and mass mailings to an art form.

They know just what buzzwords to use to raise the frightful specter of liberals and other peacemongers rising up and seizing the White House, the Senate, the House and the local sheriff's office and giving it all away to the Russians.

As I've written in the past, they can be so persuasive that they occasionally stampede people into contributing more than they can afford.

There was, as an example, the senile old guy in California who managed to land on just about every Republican computer list in the country, causing him to be bombarded with pleas and demands for more and more money.

He gave and gave until he wiped out his savings and was down to writing bad checks and foraging in garbage cans before his family found out what happened.

After the case was publicized, a few of the Republican groups refunded his money, but some just said they didn't trust his relatives to spend it as wisely as they would.

Now, we have the case of an old lady being almost frightened out of her wits by the threat of her name being turned over to President Reagan himself if she failed to send in a contribution.

The letter was from the Republican Presidential Task Force, which is a formal sounding name for political hustlers who raise money for Senate races.

Not long ago, this elderly lady who lives in a nursing home and once contributed to the fund, received their most recent letter. And it had her in a dither.

The letter, signed by Rodney A. Smith, treasurer, said:

"In exactly 30 days I have been instructed to submit a Membership Status Report to President Reagan on the Presidential Task Force.

"And unless I hear back from you immediately I will be forced to place your name on the Delinquent Member Ledger that I send to the president.

"President Reagan and the leadership of the Republican Party are extremely concerned about the Task Force. They know that 100 percent active membership is absolutely essential if we are to maintain our razor-thin Senate majority.

"I've had our Comptroller enclose a statement showing our recent attempts to renew your membership. I want you to know that an updated copy of this statement will have to be reflected in my report to the President." It went on to tell her that if she sent in $10 immediately, she could avoid being tattled on to the Prez.

Before the old lady could go into shock at being on a Delinquent Member Ledger that would be seen by the president himself, one of her relatives calmed her down.

But the relative sent the letter on to me with a few angry comments:

"This letter is absolutely inexcusable . . . I'm sure my 85-year-old mother-in-law expected to be rushed off to jail if she did not immediately send money . . . Even the most sophisticated and intelligent seniors can be absolutely terrified by the government."

So, we called the Republican Presidential Task Force office in Washington and asked them why they were scaring little old ladies. Or at least this particular little old lady.

"That was an attempt," a spokesperson said, "to get former members who had not renewed to renew right away. We wanted to indicate the urgency of their donation."

But it sounded so intimidating.

"I admit the wording is rather strong. But its purpose is to emphasize the urgency. It's not meant to imply that we're going to penalize them."

Who wrote the letter, the guy who signed it and said he was going to turn the old doll's name over to President Reagan if she didn't send in a ten-spot?

"No, we have direct-mail people who write these things."

Ah, so it is basically a fraud. Instead of a "Task Force," what we have is some hired wordsmith, sitting at a computer terminal, composing sneaky-mean letters.

You know, people have always made fun of the imaginative ways that Chicago politicians raise money.

But I've never once heard of a Chicago alderman trying to shake somebody down with a computer.

THE FEDERAL CRIME INSURANCE PROGRAM MUST BE CONTINUED

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. MANTON. Mr. Speaker, since 1970, the Federal Crime Insurance Program has provided affordable insurance against burglary and robbery to small businesses and homeowners situated in high crime areas. In short, the program promotes economic stability and provides financial security in

urban areas deemed "uninsurable" by the private market.

The Federal Crime Insurance Program is particularly important in the economically distressed areas of New York City, including portions of the Ninth Congressional District which I represent. Last year, New York accounted for about 60 percent of commercial and residential policies and claims nationwide. Ninety-seven percent of all New York policies cover New York City neighborhoods. The Crime Insurance Program has enabled small businesses to remain in these urban neighborhoods providing much needed jobs and services. Without Federal crime insurance, these businesses would be forced to close their doors.

Mr. Speaker, the Federal Crime Insurance Program is operated at minimal cost to the Federal Government. Last year, the program cost the Federal Government only $10 million. In addition, the cost of the program has been steadily declining over the past few years. Nevertheless, the Reagan administration is fighting to kill the Federal Crime Insurance Program. Evidently, preventing the decay of our urban neighborhoods is not high on the administration's priority list.

The House recently passed reconciliation legislation which included the text of H.R. 1, the Housing Act of 1985. A provision of this landmark housing bill extends the Federal Crime Insurance Program for 1 year. Unless Congress acts further, the Federal Crime Insurance Program will expire on November 14.

I commend to my colleagues the following New York Times editorial of November 3 which strongly makes the case for continuation of the Federal Crime Insurance Program.

The article follows:

[From the New York Times, Nov. 3, 1985]

KEEP CRIME INSURANCE ALIVE

Though its oratory occasionally acknowledges the needs of cities, the Reagan Administration has no urban policy. Now it wants to eliminate Federal crime insurance, which helps stabilize neighborhoods plagued by crime. Only quick Congressional action can save this modest, worthwhile program.

Federal crime insurance began in 1970, after racial rioting devastated urban neighborhoods. It provides reimbursement for property losses that result from crime to residents and small businesses in areas that have been "redlined"—ruled off-limits—by private insurers. The program insures up to $10,000 for residences and $15,000 for businesses against losses from robbery, theft, burglary or vandalism.

Such coverage may be crucial to keeping small businesses from fleeing marginal urban areas. This year, the program provided $332 million in crime coverage to 40,000 residents and businesses in 26 states. The actual cost to the Government was only about $5 million.

Still, critics of the program in the Administration complain that all taxpayers shouldn't have to support insurance that mostly benefits poor urban neighborhoods. They want to turn responsibility for crime insurance back to the states. But shifting the burden to the states would likely result in higher premiums that would deal the program a fatal blow.

The Administration has no trouble supporting the $1.5 billion Federal flood insurance program. Indeed, it wants to extend that for six years. Yet flood insurance requires all taxpayers to bear the cost of coverage for a risk group every bit as narrow as the one vulnerable in urban crime. When the cost is so modest, the benefit of national insurance far outweighs any conceivable harm, whether the insured are victims of floods or crime.

The Administration is willing to let Federal crime insurance expire on Nov. 14. There is hope of extending it for another year, however, with an amendment now attached to the House budget resolution. Helping to preserve urban neighborhoods is the legitimate business of the Federal Government. It's up to Congress to make that clear.

THE 100TH ANNIVERSARY OF THE BIRTH OF GENERAL PATTON

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. CHAPPIE. Mr. Speaker, as we all know, Monday is Veterans' Day, a day set aside to honor and remember those who served and protected our Nation. This day is especially significant to me, and others who served in World War II, because it marks the 100th anniversary of the birth of one of our Nation's most famous military heros, Gen. George S. Patton. This extraordinary coincidence of events was recently brought to my attention by a constituent and General Patton admirer, Dan Mertens of Chico, CA.

General Patton is well known for the great spirit of camaraderie he encouraged between the officers and troops under his command. His energy and intelligence while serving the United States brought him the Distinguished Service Cross, the Distinguished Service Medal, the Silver Star, and the Purple Heart. I, like many others who served our country in World War II, was inspired by General Patton's courage, patriotism, and dedication to the men and women he led to victory.

General Patton's leadership in Africa and Sicily during World War II contributed to Allied victory, world peace, and the preservation of our democratic way of life. It is appropriate that the anniversary of his 100th birthday falls on Veterans' Day, November 11, 1985, and I urge all my colleagues to join me in remembering this great man and the contribution he made to our country.

BLACK REVOLUTIONARY WAR PATRIOTS MEMORIAL

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. FORD of Tennessee. Mr. Speaker, yesterday we made a very honorable and worthy decision. I am referring to our decision to establish a memorial in honor of the more than 5,000 black persons who served in the American Revolution.

Of the many thousands of blacks who fought for American independence, very little was done to preserve the contributions of black Americans. In fact, knowledge of their contributions is not widespread. More often than not, the contributions of black Americans were hardly recognized. Although blacks died and gave brave, honorable service, none were given recognition or declared national heroes. Often the only record of a black soldier's existence is a name on a "muster roll," or an entry in a ship's log. Many blacks who enlisted were enrolled without specific names.

However, we made it possible to memorialize in perpetuity their service, their dedication and their sacrifices.

Mr. Speaker, my black American brothers and sisters fought with honor and distinction, in every branch of the Armed Services. They gave their all in the hope that America would become free and that they too could share in this freedom.

Therefore, it is only fitting that we establish a memorial in their honor that will perpetuate a memory in the minds of all Americans.

HARRIET AND LAURENCE WEISS HONORED BY YM-YWHA

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. DWYER of New Jersey. Mr. Speaker, on Sunday, November 17, 1985, the Perth Amboy, NJ YM-YWHA will be celebrating its 75th anniversary at a diamond jubilee celebration. As part of this very special occasion, Harriet Weiss and her son, Senator Laurence Weiss, will be honored by the "Y" as "Woman and Man of the Year."

Honoring these two individuals is certainly appropriate as the Perth Amboy "Y" celebrates its 75th year. They have both made vast contributions to the community and beyond, giving unselfishly of their time and knowledge for the benefit of their fellow citizens.

Mrs. Weiss is a talented and creative individual who has been able to combine an active career as a full partner and tailor in the family cleaning business, with her participation in countless worthwhile projects and extensive volunteer work.

During the 1950's she and her husband served as volunteer interpreters for many of the Hungarian-born immigrants who came to this country as a result of the Hungarian uprising. She has also served as a volunteer at Perth Amboy General Hospital and at the thrift shop at Shaarey Tefiloh.

Mrs. Weiss' son, Laurence, has continued the family tradition of dedicated to service to the community. He was elected to the New Jersey State Senate in 1977, and in 1981, Senator Weiss became chairman of the important Joint Appropriations Committee—a tribute to his excellent leadership and fine record of service.

Senator Weiss has served as a member, and twice as chairman, of United Jewish Appeal Committees. He has served on several local boards, including the township of Woodbridge Library Board, and the Middlesex County Planning Board, and is a director of the JFK Medical Center in Edison, NJ. He is a member of VFW Post 1352 in Hopelawn.

Mrs. Weiss and Senator Weiss exemplify the kind of individuals whose contributions over the years have made our Nation a proud one, and we are grateful to them.

The Perth Amboy "Y" has much to be proud of as it celebrates its diamond anniversary—people such as the 1985 man and woman of the year, and countless others who have made this organization the truly fine one that it has been during its 75 years.

The YM-YWHA in Perth Amboy has been distinguished by dedicated service, thoughtful action and excellent learning opportunities. We warmly congratulate the Perth Amboy "Y" as it celebrates its 75th anniversary, and express our deep appreciation for its enduring presence in our community.

TERRORISM IN COLOMBIA

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. FASCELL. Mr. Speaker, we have both good and bad news coming out of Colombia today. On the positive side, it has been reported that the Government of Colombia has successfully negotiated the release of the two Americans being held by the FARC. We are grateful to the Colombian Government for securing their release and happy for the two individuals and their families.

Unfortunately, this news is overshadowed by the account in the press today regarding the M-19 attack on the Palace of Justice in Bogota. Facts on the situation are sketchy, but, while many individuals have escaped, the terrorists are still holding hostages and the situation has yet to be resolved.

This is the type of terrorist action which the United States must stand four-square against. Our sympathies are with the Colombian Government and people in this moment of difficulty and we must stand with them in confronting this handful of ruthless terrorists. This is the purpose of congressional enactment of the antiterrorism assistance program, which is designed to help other countries prevent such despicable acts.

The Government of Colombia has a commendable human rights record. It is a nation characterized by an open and free political process. The President and his government have worked hard to eradicate illicit drugs and have cooperated extensively with the United States to halt drug trafficking. The assault by terrorists on Colombia's judiciary is an attack on that country's democracy and on those who stand in the front lines of the struggle to end drug trafficking. All who cherish democratic ideals and respect human values are outraged by this vicious attack.

PRESIDENT EXPECTED TO NAME DR. OTIS BOWEN AS NEXT SECRETARY OF HEALTH AND HUMAN SERVICES

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. HILLIS. Mr. Speaker, President Reagan is expected today to name Dr. Otis Bowen, former Governor of my home State of Indiana, to be the next Secretary of Health and Human Services. He could not have made a better choice.

In his years as speaker of the Indiana House of Representatives and two terms as Governor, Doc Bowen distinguished himself not only as a strong and capable leader but as a man of compassion and integrity.

He will bring to the President's Cabinet a solid background of sound fiscal management. When Otis Bowen left office after 8 years as Governor of Indiana, the State Treasury, despite the economic recession, held a $15 billion surplus. Can you think of anyone more suited to run one of the Government's largest bureaucracies and a budget of $348 million?

The people of Indiana know the outstanding job Otis Bowen did as Governor. We cheered him on when he ushered in a sweeping tax reform package, stood with him as the State faced a serious coal shortage during the 1977 UMW strike. We cried with him when his wife, Beth, died shortly before he left office.

And now we will proudly share him, with the rest of America.

STUDENTS GIVE SEQUESTERING AN "F"

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. STARK. Mr. Speaker, a package of letters I have just received has called to my attention yet another group of Americans unfairly affected by the sequestering portion of the Gramm-Rudman amendment. The package contained a fistful of post cards from students who attend the University of California at Berkeley and are afraid of losing their financial aid. The letters also came from students who do not receive any aid but still are equally concerned for their fellow students who would be deprived of an education if the bill passed.

We have all received letters from bankers, members of the Education and Labor Committee, and others that if the idea of sequestering is adopted, then the student loan program may die, since it will become an administrative and contractual nightmare which will no longer be supported by the private lenders. Sequestering of Pell grants and work-study assistance will also play havoc with students who will suddenly find that their income is no longer in line with their tuition, room, and board commitments.

I would like to share with you all some of the more moving quotes which I feel truly represent a voice we shouldn't be shutting out. One young man explains,

While fortunate enough to have parents able to pay for my education, I still know of many people who can attend the University solely by virtue of Pell Grants and/or Guaranteed Student Loans. While the debt problem of this country is enormous, the ramifications of denying so many people an education are far more serious.

Again, a student expresses a general concern for all students,

Because many programs will be exempt from cuts under the proposal, the aid that students at my university depend on will be cut disproportionately. Many students here will be unable to continue their education. Please don't let this happen. Education is one of the most valuable assets in life. It is unfair to deprive students of this privilege for financial reasons.

Some of the responses reflected their agitation on a more personal and individual level. One woman writes.

I am very disturbed about the potential of the Gramm-Rudman budget amendment to unfairly damage student financial aid * * *. School is too expensive for us to get by without Pell grants, college work-study programs and loans. please don't take them away from us * * *. This amendment will hurt our country more than help it. If people can't get educated how can the U.S. compete economically with foreign countries?

And finally, a Berkeley student who was a congressional award recipient had a few words expressing what he feels is a threat to his future. In his letter he explains his situation.

I have a guaranteed student loan. I pay for my room and board by working as a staff member in the residence halls. I'm also working (college work study) as a maintenance man in the dormitories. I average, between my two jobs, 35-40 hours per week. I also have 14 units, and those are a full-time job in themselves * * *. I wouldn't be here at UC Berkeley if I hadn't worked extremely hard. Financial aid gives me, or provides the opportunity, to stay at UC through hard work * * *. You've seen what I'm capa-

ble of. You've awarded me the Congressional Award-the highest award given by Congress to a young person for outstanding service (for non-military action). Please don't cut financial aid. Please don't take away my opportunities.

I'm sure you'll agree, these quotes reflect the flaws in the Gramm-Rudman proposal we all should consider. It would be my hope that sequestering would never occur. But that is just a hope—and the students of our country deserve a better solution.

OCS MORATORIUM

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. BOSCO. Mr. Speaker, last July, after 6 weeks of good faith negotiations between Interior Secretary Donald Hodel and members of the California delegation, a preliminary agreement was reached permitting oil and gas leasing in 150 tracts along the California coast. These negotiations were initiated by last year's conference report accompanying the fiscal year 1985 Interior appropriations bill. I believe the negotiations represented an important step toward restoring balance and certainty to the process of developing, while protecting, California's offshore resources.

Unfortunately, 6 weeks after the announcement of this preliminary agreement, Secretary Hodel unexpectedly backed off the agreement and stated that he could no longer support the original terms of the agreement. Subsequently, Secretary Hodel has written the California delegation requesting the establishment of a new negotiating team to start the process over. A team has been appointed by Messrs. DON EDWARDS and CARLOS MOORHEAD and both sides are now looking forward to beginning anew.

In good faith compliance with the Interior/California agreement, I and other members of the delegation did not seek a continuance of the 1-year moratorium on OCS oil and gas leasing activity off California. However, in light of Secretary Hodel's about-face, the delegation will be attempting to secure a continuation of the moratorium in the fiscal year 1986 continuing resolution. This moratorium is urgently needed to protect the integrity of the negotiation process by ensuring meaningful negotiations and providing time for Congress to thoroughly consider the complex issues surrounding leasing in this area. As we are all well aware, no one should be expected to go to the bargaining table empty handed.

Mr. Speaker, I would like to share with my colleagues a November 2 Washington Post editorial that eloquently speaks to this very issue. The editorial follows:

[From the Washington Post, Nov. 2, 1985]

DRILLING OFF CALIFORNIA

Congress must shortly decide whether to continue the moratorium that has been in effect on oil and gas drilling off the California coast since the earliest months of the Reagan administration. There is growing impatience in both houses with the plea of Californians that their coast be favored in this way. The understandable view is that California ought to be able to work out a compromise with the administration and the oil industry, as other states have, in which energy, commercial and environmental interests all would be represented and partly served. Certainly that is the right goal. But given where the parties now stand, a one-year extension of the moratorium may be more help than hindrance in achieving it.

The moratorium was a protective reaction to the leasing instincts of the administration's first Interior secretary, James Watt. The combative Mr. Watt's stated sense of the matter was pretty much that whatever the government owned and industry wanted, industry ought to have. He overreached and produced overreaction in turn. The tracts off California are among the more important U.S. energy fields still largely unexplored. What Mr. Watt mostly achieved was to have them locked up.

This year the new Interior secretary, Donald Hodel, tried to end the polarization. He negotiated with the California delegation and in July reached a "preliminary agreement" to open 150 of the 6,460 offshore California tracts to drilling over the rest of this century. On the strength of that the House passed an Interior appropriations bill without a moratorium rider. But Mr. Hodel then renounced the agreement, in part under industry pressure. The Californians, who had already given up their customary legislative vehicle, had to rush to have a moratorium attached to the continuing resolution under which most of the government is being funded for the first 45 days of this fiscal year.

The Californians and Mr. Hodel are now moving back to the bargaining table. Meanwhile, the continuing resolution and the moratorium both come up for renewal on Nov. 14. The Californians say they will be in a much weaker position at the bargaining table without a moratorium, and there are two reasons for giving in to them. One has to do with fairness: to some extent they were misled into giving up their leverage when the appropriations bill was around. The other is practical. The affected communities can fight all kinds of rear-guard actions against a drilling program if there is no political resolution of the problem. The Californians should be given a chance to bargain without a gun at their head.

HONORING REV. NATHANIEL TYLER-LLOYD

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. WEISS. Mr. Speaker, I am pleased to join the members of Trinity Baptist Church in honoring the Reverend Nathaniel Tyler-Lloyd on the celebration of his silver anniversary as pastor of his congregation. The Reverend Tyler-Lloyd is being honored by his beloved congregation in recognition of his undaunted spiritual leadership over the past 25 years.

One of Reverend Tyler-Lloyd's major accomplishments has been his effort to realize the construction of the beautiful edifice in which he leads his congregation in solemn worship each week.

Reverend Tyler-Lloyd, a native New Yorker, attended the public schools of Brooklyn, Music and Art High School in Manhattan, Brooklyn College, and New York Theological Seminary. While in Brooklyn College he was converted through the influence of Inter-Varsity Fellowship and the powerful preaching of the Reverend Dr. Sandy F. Ray at the Cornerstone Baptist Church. He served in the U.S. Army as troop information and education instructor and also as an assistant to an Episcopal chaplain.

Reverend Tyler-Lloyd entered the New York Theological Seminary and in June 1957 was licensed to preach. He was ordained in June 1959 at the Cornerstone Baptist Church and graduated from the seminary in May 1960.

Reverend Tyler-Lloyd serves as the ministers seminar leader of the Empire Baptist Convention; assistant dean, Sunday School and Baptist Training Union, Congress of Christian Education, Empire Baptist Convention; general board member of the American Baptist Convention; vice president of the Lott Carey Foreign Mission Society; and in numerous other organizations needing his expertise.

I want to take this opportunity to extend my sincere congratulations to Reverend Tyler-Lloyd in recognition of his 25 years of faithful service, his untiring commitment, and his devotion to his congregation and the Bronx community.

REMEMBERING THE VETERANS AND THE VICTIMS OF BEIRUT

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. DONNELLY. Mr. Speaker, 2 years have passed since a terrorist bomb claimed the lives of 241 American Marines in Beirut. One of the survivors of the blast at the Marine compound, Cpl. John L'Heureux of Randolph, MA, recently gave an important reminder to his neighbors in Massachusetts: "We weren't over there serving the Lebanese. We were over there serving the United States. We were over there serving you."

Massachusetts is taking his words to heart. Under the leadership of the parents of the Marines killed in Beirut, and the parents of the survivors as well, Massachusetts is working toward erecting a monument to the veterans of that peacekeeping effort.

I would like to call the attention of this House to a poignant reminder of the Beirut bombing and its aftermath, a column by Steven Austin that appeared recently in the Enterprise of Brockton, MA.

HIS PAST MEMORIES ARE UNCLEAR; HIS AIMS FOR THE FUTURE CERTAIN

(By Steven Austin)

His name is John L'Heureux and now, more than two years after 241 Marines died in the bombing of their Beirut compound, he has little memory of his wounding.

He sat on the roof of the compound directing Naval gunfire on Oct. 23, 1983, and the force of the blast from the explosive-laden truck drove the leg of a steel stool through his rectum and into his stomach. He remembers only trying to climb up as the roof fell away beneath him.

Later, after he had been moved to a hospital in Germany, the Marines who rescued him told him he was conscious and coherent through it all.

"Nothing has come back," said L'Heureux, who lives in Randolph. "After the blast, I didn't wake up for seven days. They told me I knew my name and that I'd responded to orders."

What followed was a series of hospitals and doctors and an operation to repair a damaged kidney. He will feel the effects of the explosion for the rest of his life. There are headaches and nerve damage and back pain. There is the damage to his senses of hearing and taste and smell.

"I'm trying to learn to live with it," L'Heureux said. "That's the big thing, living with it. There are 241 Marines who aren't living with it."

That day in Beirut changed L'Heureux's life forever.

"I can't really notice any major changes, but of course, I guess no one does about themselves. My family tells me I've changed, that I sometimes get quiet, that I'm just there. Sometimes it's hard to believe there was anything before it happened. I guess you couldn't be the same after something like that. How could it be after losing so many lives?

He came home again in time for Christmas 1983 and was welcomed as who he was, a Marine who'd served his country and almost died in the process. There was a time sponsored by the Elks. The town's VFW post was also instrumental in welcoming L'Heureux home.

One of those who died was John L'Heureux's best friend, a Marine who trained with him in Japan and North Carolina, who shared the same quarters with him in Beirut.

"We had all sorts of plans," L'Heureux said. "We'd planned to visit each other's families. I wrote mine about him and he'd written his about me."

L'Heureux met his friend's family again last week in Philadelphia where a monument to those who died in the blast was unveiled. L'Heureux and four other survivors were a part of those ceremonies.

"They called my mother after the service," L'Heureux said, "to say they were glad I was there, that it meant a lot to them that I was there."

Remembering is a great deal on L'Heureux's mind now—remembering that, in his words, "peace has a price."

"A lot of people forget that," he said. "We weren't over there serving the Lebanese. We were over there serving the United States. We were over there serving you."

He pauses for a moment.

"I saw a T-shirt once that had the message 'The smell of death and fear is something the protected will never know.'"

L'Heureux voices sentiments that seem much too old for him.

He speaks of the contributions veterans have made and uses words you might expect to hear from someone much older.

"If it wasn't for veterans," he said, "we'd all be speaking German or Japanese now. People forget those things. Those who forget it most are those who didn't serve. When we were in Lebanon, we got the newspapers from home. There were pictures of people protesting the fact that we were there. How was that supposed to make us feel? The guys with signs that said to get out of Beirut."

There have been some efforts to honor those who were wounded or died. Randolph's Memorial Drive will be renamed Peace Keeper's Way every Oct. 23. Two local contractors, Richard Pontius and William Kelly, are naming a street Corp. John L'Heureux Circle.

L'Heureux has made efforts of his own. He worked with the Vietnam Combat Veterans Combined Armed Forces group in the erection of a monument to Vietnam-era veterans in Dorchester.

But for John L'Heureux, there is something else.

What he wants most is for those who died in Beirut not to go unremembered. He, his mother, Mary Wells, and his stepfather, Dick, are now working to establish a monument for those who served in Lebanon. Parents of both the survivors and the dead from Massachusetts will meet Nov. 24 to begin planning for the monument.

John L'Heureux wants everyone involved in the monument campaign. He wants the Marine Corps there. He wants the government involved. Most of all, he wants the "protected" to involve themselves with the building.

He is happy that the town of Randolph took a stand, that the town's service organizations remembered the price that was paid.

"I'd still go," L'Heureux said. "Even if I knew what was going to happen, I'd still go. I made it out of there—241 Marines didn't.

He pauses again.

"At the Memorial service in Philadelphia last week," he said, "written on the program was 'If you forget my death, then I died in vain'"

THE INTERLOCHEN CENTER FOR THE ARTS

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. SCHUETTE. Mr. Speaker, my warmest congratulations to the Interlochen Center for the Arts on the achievement of a $200,000 grant from the National Endowment for the Arts. I know that these moneys will enable many students to receive scholarships to the center. It is during this time, when many families suffer financial difficulties, that assistance can literally make or break a student's education. I firmly believe that we all must work to continue support for the education of our many talented fine arts students in Michigan. Interlochen Center for the Arts provides outstanding training, education, and skills to our gifted students in mid-Michigan. I wish you all the success possible in continuing your unparalleled achievements.

Once again, my congratulations.

THE 20TH ANNIVERSARY OF THE HIGHER EDUCATION ACT

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. FUQUA. Mr. Speaker, the history of higher education in America began with the formation of a number of essentially private institutions during the colonial period designed to prepare males primarily for the ministry and teaching. Today the system has evolved into a mosaic of colleges and multipurpose universities preparing students both male and female for careers in hundreds of fields.

Since 1965 the Higher Education Act has been the principal legislative vehicle for providing Federal financial aid to postsecondary students and institutions, except in the area of Federal support for university-based research. This significant act has been amended four times and numerous statutes have amended or otherwise affected the Higher Education Act. The comprehensive reauthorization of the Higher Education Act expanded the scope of Federal student grant and loan programs, restructured the largest program of direct support for disadvantaged postsecondary institutions and focused new attention on the nontraditional college students and on urban institutions.

The Higher Education Act authorizes a broad range of postsecondary educational assistance programs that benefit American students and institutions. However, it also makes special provisions concerning the treatment of Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands. The act also provides funds to support the cost of postsecondary programs on Guam for nonresidents from the other outlaying territories of the Pacific.

America's system of higher education has made major contributions to the social and economic development of our Nation. Our National and State governments have relied heavily upon America's higher education system in times of crises. The system has demonstrated the capacity to respond to changing economic conditions and provides a continous supply of well-trained individuals to assist our country as we face new challenges during this period of reduced economic growth.

Funds provided under the Higher Education Act have made it possible for many students to attend college who, without this financial assistance, would find the ability to obtain such an education next to impossible. Federal assistance for higher education is directed mainly at particular national purposes, such as aid to low-income students and support for scientific research. These are purposes which the Nation cannot overlook and must make every effort to continue.

Today marks the 20th anniversary of the Higher Education Act of 1965. The contributions made to our Nation directly and indirectly by this landmark legislation are infinite. If we are to continue meeting the challenges facing our Nation we must continue to provide assistance to higher education and those programs designed to produce individuals capable of meeting the challenges of these changing times.

THE ENERGY CRISIS

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. CLINGER. Mr. Speaker, former Secretary of the Interior Don Hodel said last week there is a good possibility the United States will be faced with an energy crisis by 1995 unless we begin to develop new energy supplies. He said the issue confronting us is not tomorrow's oil supply, but the supply we expect to have in 1995. Americans do not expect an energy crunch because right now there is plenty of competitively priced gasoline and other forms of fuel available. But this could change at any time.

In my congressional district, in Scrubgrass Township in Venango County, PA, there have been efforts to create a synthetic fuels plant using otherwise unusable high-sulphur coal and turning it into environmentally safe fuel. Those efforts have met with skepticism and rejection. We have plenty of fuel now we are told. So why worry?

I hope each and every Member of Congress who drives a car remembers what we say here today while they are sitting in the gas lines of the 1990's. I would hope that the U.S. Congress will reverse itself from its recent erroneous decision to eliminate funding for the U.S. Synthetic Fuels Corporation, so that projects like the one in Venango County, PA can move forward to meet the energy needs of the next decade.

AN EXPRESSION OF SYMPATHY TO RAYMOND ROEBUCK ON THE DEATH OF HIS FATHER

HON. GUS SAVAGE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. SAVAGE. Mr. Speaker, today I wish to pay my respects and offer my deepest sympathy and condolences to Raymond Roebuck upon the death of his father, John H. Roebuck.

As most of us know, Raymond has run the snack bar in the Democratic Cloakroom for 22 years. His patience and good nature have touched many of us on many occasions.

I understand that John Roebuck was similarly noted for his compassion and thoughtfulness. As a leading member of his community and church, he drew many to him and inspired the affectionate nicknames "Papa Roebuck" and "Daddy John."

John H. Roebuck will surely be missed, but his contributions to his family and community will always be remembered.

A TRIBUTE TO DR. HARLOW SHAPELY

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. WHEAT. Mr. Speaker, this month marks the centennial of the birth of a great Missourian and one of the great American astronomers of this century, Dr. Harlow Shapely. It is a privilege to share with my colleagues the achievements of one Missouri's favorite sons.

Dr. Shapely is considered the American Copernicus for his contribution in determining the Earth's location in our galaxy, the Milky Way system. He was also a great humanitarian and one of the founders of UNESCO, the United Nations Educational, Scientific, and Cultural Organization.

Born in Nashville, MO, on November 2, 1885, Harlow Shapely received his doctorate from Princeton University in 1913 and began research the following year at the Mount Wilson Observatory in Pasadena, CA. At Mount Wilson, Dr. Shapely made some of his most significant contributions to astronomical science. It was there that he determined the distance of numerous stars from Earth and, through this work, was able to locate the center of our galaxy. In so doing, Dr. Shapely shifted our perspective of our solar system, much the same as Copernicus had shattered the myth that the Earth rested at the center of the universe four centuries before.

Dr. Shapely's contributions to his fellow man were not limited to his contributions to scientific knowledge. During World War II, he was instrumental in bringing hundreds of refugees to our country from Nazi Germany. After the war, Dr. Shapely helped start UNESCO, which is dedicated to international cooperation in the pursuit and promotion of scientific and cultural knowledge.

Dr. Harlow Shapely was a modern-day renaissance man and a great American. His contributions, including both his scientific and humanitarian efforts, were invaluable to improving humanity. Dr. Shapely died on October 20, 1972, but his legacy still lives. He provided his Nation and his world with solid foundations for others to build upon.

THE GROWING POWER OF ASIAN AMERICANS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. GARCIA. Mr. Speaker, for those of us who have been fortunate enough to have gotten to know our Nation's Asian American community, it comes as no surprise that members of that community from Indian Americans to Koreans have begun to mobilize themselves politically.

There are more than 4.5 million Asian Pacific Americans in the United States, and their political power is fast becoming a reality. This weekend the Asian Voters Coalition is holding a conference in Washington. I am submitting for the RECORD a press release from the coalition, describing their activities and their goals, as well as an excerpt from an article published in the New York Times on their upcoming conference. I am certain that the coalition will play an important role in the future of this Nation.

ABOUT THE COALITION

The Asian American Voters Coalition was established in October, 1983. The Coalition consists of twelve national organizations and seven local groups in the Washington, D.C. area. Its members represent grassroots organizations of various ethnic groups, including Chinese Americans, Korean Americans, Japanese Americans, Phillippine Americans, Indian Americans, Thais, Vietnamese and Guamanian Americans. The objectives of the Coalition are to promote active participation of Asian Americans in local and national elections through voter registration and education.

The Coalition is non-partisan and does not support or oppose any candidate or political party; however, the Coalition evaluates the issues and policies affecting Asian Pacific American interests and declare the position of the Coalition. The Coalition sponsors educational programs and community activities which encourage every member to be a constructive American who will participate actively in the democratic process of this country.

There are about 5,000,000 Asian Pacific Americans in the United States. Most are living in key metropolitan cities and states such as California, Hawaii, Washington, Illinois, Massachusetts, New York and New Jersey. Now they are pushing for voter registration. Asian Pacific votes could make the difference and swing the election results in many important states.

Regional Coalitions will be formed in Chicago, New York, Dallas, Los Angeles and other areas where the Asian and Pacific American populations are high and there are active chapters of our national organizations. From now on, Asian Pacific Americans will not be the silent minority of minorities; they have combined their forces and united their voices to express their concerns and to protect their interest. Through the united effort of the Coalition, they will participate actively in local and national affairs of this great country.

[From the New York Times, Oct. 23, 1985]

ASIAN AMERICANS

A potentially powerful new political bloc of five million Americans of Asian descent is serving notice that it intends to raise an audible voice in coming elections and work for the interests of members of its varied minorities. Today at the National Press Club, the Asian American Voters Coalition will announce a national conference on "political awareness and participation" to be held in Arlington, Va., Nov. 7-9.

Including 13 national and six local organizations, the coalition seeks to represent Japanese, Chinese, Indian, Phillippine, Korean,

Vietnamese, Thai and Guamanian Americans. The group is nonpartisan and says it will not support or oppose parties or candidates, but it will take a position on issues that affect "Asian-Pacific-American interests." The coalition notes that "Asian Pacific votes could make the difference and swing the election in many important states."

TRIBUTE TO MANUEL B. ALCON

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. RICHARDSON. Mr. Speaker, I rise to salute an outstanding American and educator, Manuel B. Alcon. Mr. Alcon has served as a teacher, coach, superintendent, and principal for 33 years in the New Mexico school system.

Mr. Alcon started his teaching career in a one-room schoolhouse in Monte Aplanado. He continued to teach in Mora County at Holman Grade School. For the next 6 years he taught and coached at West Las Vegas North Public School and then returned to Holman.

Mr. Alcon became a principal in 1960 at Mora Elementary School and was elected superintendent of Mora County the following year. Mr. Alcon also taught at Guadalupita School, Mora High School, and Wagon Mound School.

He has received several awards that have noted him as an outstanding citizen of New Mexico and as an educator. Mr. Alcon's contribution to the New Mexico public school system will last for generations.

Mr. Speaker, I am sure that my colleagues will join me in thanking this educator for his dedication to the teaching profession.

HONORING OTTO J. LACAYO

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. TORRES. Mr. Speaker, I would like to bring to the attention of my colleagues, a personal friend and an outstanding community leader who has dedicated 15 years of his life to making the city of Cypress, CA, a healthy and pleasurable place to live.

Otto Lacayo has demonstrated his ability to work hard and master his professional responsibilities in every task he has tackled throughout his career. After enrolling in college, Otto applied, and was accepted, to an engineering department at Douglas Aircraft in California. Within 2 years, Otto was managing one of the company's most innovative computer projects. After 2 years of running his own computer consulting business in addition to working for Douglas Aircraft, Otto began a successful political career as Cypress city councilman.

Proving himself through four successful terms as city councilman of Cypress, Otto has strived to make the city a better place to live, work, and play. Because of Councilman Lacayo's efforts, growth in the commercial and light industrial business park has established Cypress as one of the leading employers in Orange County. Otto approaches his responsibilities as councilman as he approaches his successful businesses—with diligence and commitment.

Mr. Speaker, I rise here in the House today to recognize the contribution Otto has made to the community of Cypress and to wish him well in his future endeavors as a recently elected member of the board of trustees of the North Orange County Community College. I am proud to know Otto and to know that through his efforts and accomplishments, he will continue to serve his community and its residents.

THE JICARILLA INN

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. RICHARDSON. Mr. Speaker, as an example of a successful economic development initiative by the Indian people, I would like to insert in the RECORD two articles about the Jicarilla Inn in Dulce, NM.

Tom Vigil, a Jicarilla Apache, has put this successful enterprise together with the help of the Jicarilla Apache tribal administration.

Those who are critical of the self-reliance of the Indian people can see first-hand this success story.

The articles follow:

APACHE INDIAN HERITAGE IS HEART OF NEW INN

(By Skip Boyer)

DULCE, NM.—They came up to the surface of the earth from an ancient underworld where all living things dwelled. Seeking light, they were guided by Hac ct'cin, the ultimate power.

After many trials, they reached the surface and began traveling, all people and animals. Small groups broke off and settled while others continued their travels. At last, there was only one group left, continually circling the world.

Hac ct'cin asked, "Where do you want to live?" The last travelers replied, "Near the center of the earth." Hac ct'cin considered this and created four sacred rivers to outline the land at the center of the earth. According to their own story of the creation of mankind, this land became holy and the people were known henceforth as the Jicarilla Apaches (pronounced hekare'ya).

This, of course, happened a long time ago—in the days when animals still spoke with humans, before good and evil.

Today, the Jicarilla Apache Tribe lives on a reservation of 780,000 acres in northcentral New Mexico—still near the center of the earth. In the years between their emergence from the underworld and today is a story of the growth of a culture. It is the story of a people with infinite patience, flexibility and imagination. It is a story of survival, despite Spanish conquerors, mountainmen, miners, settlers and a capricious federal government.

THE BEST WESTERN JICARILLA INN

You don't have to know all that history, of course, when you check in to the Best Western Jicarilla Inn. It is a Best Western. You already know what to expect: good service and quality lodgings at a fair price. You can enjoy this remarkably beautiful land with its abundant hunting and fishing without even knowing how to pronounce the name of the hotel.

If you miss the history, however, you miss the thing that makes this new Best Western member so special. Located on the northeastern corner of the tribal reservation, the Best Western Jicarilla Inn was financed by the Jicarilla Apache Tribe for Jicarilla Apache owners and operators. Their heritage has influenced everything from interior design to management philosophy.

At the heart of Best Western's only American Indian-owned property is B. Thomas "Tom" Vigil, president of Vigil Family Enterprises, Inc. With his brother, Fred, and wife, Irene, Vigil (pronounced Veehill) heads the family group that envisioned the 42-room property two years ago.

In late July, Tribal and Best Western dignitaries helped mark the grand opening of the new property. It is already making an impact in Dulce, a community of 3,200 people.

"We've made a terrific impact in a short time," Vigil notes. "This community is proud of the hotel. I think they want us to succeed. The measure we use of our local acceptance is the trade we do in our restaurant—we've served a tremendous number of meals since we opened."

Vigil is proud of his Hill Crest Restaurant. Its unusual decor reflects the Jicarilla heritage in a striking way. Rough cut poles form abstract arbors over the tables throughout the main dining room. Similar arbors stand throughout the reservation and are used for ceremonial purposes. Large, framed black and white photographs recalling tribal history hang throughout the dining room and coffee shop.

While the growing regional reputation of the Hill Crest is playing an important role in the Inn's early success, it is not the only reason.

A FAMILY OPERATION

"The real reason we have come so far in such a short time," Vigil says, "is this: I have a brother who is partner in this operation. We have two other brothers working with us, a sister who is our secretary and a number of other relatives—including my grandmother—working in other capacities here. I sprinkle the staff with people who have hotel experience but basically, we are a family operation."

Vigil is also pleased with his "silent" partner. The Jicarilla Apache Tribe. Through the tribal council, the Tribe is financing the $2.3 million facility. "The Tribe is playing the role normally played by a bank," explains Vigil. "We undertook this joint endeavor to fulfill a local need, to curb the leakage of dollars off the reservation, to be able to accommodate our guests and business associates in comfort and convenience and, most importantly, to gain a profitable return on our investment. The Tribe is a good business partner.

That works both ways: Tom Vigil is a good man to have as a partner, himself.

Like most of his people, this land along the Continental Divide is his home. He loves it, even though he has spent most of his adult life living in Los Angeles and Washington, D.C.

In the early 1950s, oil and gas were discovered on our reservation," he explains. "The proceeds from those discoveries were used to establish a scholarship fund to send our young people to college. I was among the first to go."

The scholarship program began to bear fruit in the 1960s when young people like Tom Vigil started coming home with their shiny new college degrees.

"When I came home, the tribal council told me to go out into the world and succeed, then I could come back. I would be more valuable to them if I did."

Vigil took his new accounting degree, moved to Los Angeles and got involved in what he calls "big time politics." His work in city government eventually took him to the legendary home of the Great White Father—Washington, D.C.—and a position with the Department of the Interior. Nearly 20 years passed before he brought his wife and family home to the center of the earth in 1982.

YOU CAN GO HOME AGAIN

Vigil's home is one of the last unspoiled wilderness areas in the Southwest. The reservation is nearly 63 miles long, from north to south, about 25 miles wide. Elevations range from 6,500 feet to more than 8,500 and includes areas of heavy timber, mountains, deep canyons and rolling meadows. It is an unfenced paradise. Deer, elk, bear, turkey and water fowl, as well as trout up to 29 inches in length, make the reservation a natural hunting and fishing center. A variety of ancient ruins, cliff dwellings and pictographs serve as a reminder of the "ancient ones" who made the first climb to the earth's surface. This remarkable land is what brought Tom Vigil vack to New Mexico.

"It's not the coming back that is important," he says, thoughtfully. "It's what you bring back and the feeling you bring back. I came back wanting to protect this land."

Years spent away from his Indian heritage and living in the midst of another culture haven't dimmed his feelings for his home or his people. "I can say that I love this place, that I love being an Indian," he says. "In many ways, it hasn't made a difference. You have certain values that are given to you at a young age and you live with them, no matter what society you live in. Good and bad are much the same everywhere. The idea of culture shock is overplayed. It's an excuse for not doing something you are capable of doing."

LEARNING THE BUSINESS

Vigil's current goal is learning the art of innkeeping and how to market a property in one of America's most remote areas.

"That's our biggest problem," he confirms. "We must let people know that we are here and what this area has to offer. We think that with the help of Best Western and good marketing, we can make it work.

"We have to create a regional economy in this part of New Mexico," he continues. "We can't afford to be parochial any more. One little community can't compete with another. We must work together to market this entire area. We want to be leaders in that approach. If we can work together, we can all prosper. If not, well, it's just a crap shoot."

The area that Vigil wants to promote includes much of the northcentral New Mexico—the Jicarilla Apache Reservation, the Chama Valley and the Rio Brazos. Hunting, fishing, camping, hiking, skiing and spectacular scenery are the drawing cards he hopes to use. The Cumbres and Toltec Scenic Railroad, a steam-powered narrow-gauge line built a century ago, is already a major tourist attraction in nearby Chama. Special events on the reservation are also attracting visitors. The Stone Lake Fiesta, in mid-September, includes an all-Indian rodeo, traditional dances and foot races. In July, the two-day Little Beaver Roundup combines a rodeo and carnival with traditional Indian dances. The Tribal Arts and Crafts Shop and Museum spotlights the work of Jicarilla artisans. Of special interest are a wide variety of delicately made baskets that remind visitors of the meaning of the word Jicarilla—little basket or basketmaker. During the winter months, a special area of the reservation is set aside for skiing and snowmobiling.

A few miles away, on the Rio Chama, fishing and whitewater rafting are popular sports. Heron Lake even offers sailing. And, of course, the annual Pack Burro Race in Charma is a must for summer visitors.

For Tom Vigil, this land doesn't have everything—just those things of value, the things that really matter. It is this land that he hopes the Best Western Jicarilla Inn will help others discover. It is, after all, a special place—a holy place. It is the land near the center of the earth.

THE JICARILLA INN

(By Talli Nauman)

DULCE.—Tom Vigil figures he could have been rich and famous by now.

Instead he is working seven days a week running a small motel in his hometown.

In his college days, he was in line to make big bucks; a classmate at the University of Southern California offered to cut him in on a lucrative shopping mall development strategy.

"If I'd have stayed there I'd have been very wealthy," he says. "I had friends and connections."

But he went into public administration instead.

"I wanted to do something for my people," he says.

He rose to prominence in Washington, D.C., as a key designer of the Social and Economic Development Strategies program instituted by the Administration for Native Americans; the conceiver of the Indian Self-Determination Act; and the planner of Bureau of Indian Affairs reorganization during the Carter administration.

He had a suburban home, a two-car garage, and his children went to the best schools.

But that wasn't his idea of success. "It's too easy to get co-opted," he concludes.

And he gave it all up to go home to the Jicarilla Apache Reservation in northwestern New Mexico.

He opened the Jicarilla Inn just a little more than a year ago. Ever since then, he and his family have been working around the clock to make their Vigil Family Enterprises, Inc., a success.

None of the family, Vigil included, makes any more than an hourly wage. The constant commitment is wearing, Vigil observes. But he keeps hoping some day it will pay off.

He is still concerned about making money and gaining fame. "I'm very patriotic. I think whenever you can, you should be able to do it," he says.

And he still wants to help his people, he claims.

The 42-room Best Western motel, his own business, is the way to achieve those goals, he believes.

"What I'm trying to do here is practice what I preached," he says, in reference to the federal programs he wrote. "I went around the country taking the old supply-and-demand government theory and applying it to the Indian environment," he says.

"Everybody has a dream. It's no different for Indians than any other community," he maintains.

The Jicarilla Inn is the first private enterprise on the Jicarilla Reservation to receive backing from the tribal government.

The tribe financed its $2.4 million construction.

So the inn represents a significant shift in philosophy away from tribal enterprises, in which all profits are returned to a tribe and its members.

With Vigil's motel, the tribal government receives 40 percent of any profit and Vigil's family receives 60 percent. After 30 years, Vigil has an option to take over 100 percent of the operation, he says.

He hopes the hotel will be just the beginning of a vital business community in Dulce.

Right now, 78 percent of the income generated in the community is spent in Farmington, off the reserve, 91 miles away.

Average annual Jicarilla family income, including wages and dividends from petroleum royalties, approaches $25,000. So Vigil and tribal leaders contend, if a few other private businesses could be developed to keep that money in the community, the effort could snowball, creating a healthy private sector on the reservation.

The motel mainly caters to business clients of the tribe, as well as wealthy vacationers looking for a peaceful, rural retreat.

His operation is breaking even right now, and with 10 percent more volume Vigil hopes to generate this year through promoting recreation, it could stand as a testament to perseverance in the difficult quest for corporate success in tribal America.

PENN STATE HEART

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. CLINGER. Mr. Speaker, I rise today to commend the physicians at the Hershey Medical Center, which is the hospital facility of Penn State University in my congressional district, for developing and for the first time, implanting a new type of temporary artificial heart.

The "Penn State heart," as it is commonly known, is similar to the commonly used Jarvik-7 artificial heart, however, the differences are designed to significantly reduce the chance of blood clots and strokes in the recipient, a dangerous risk in previous artificial heart patients. Dr. William S. Pierce and Dr. John L. Pennock designed the Penn State heart to be used for only 1 or 2 weeks during which the patient would, ideally, be given a chance to regain strength before undergoing a heart transplant.

Mr. Speaker, the success of the revolutionary Penn State heart is a testament to the dedication of Drs. Pierce and Pennock

and a source of pride for Penn State University and the 23d district—I salute them in their historical achievement.

IKE'S TWIN PILLARS OF STRENGTH

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. DORGAN of North Dakota. Mr. Speaker, during the recent debate on 5 year deficit reduction packages we heard some long-winded promises, too many of which were short on common sense.

I believe that we have failed here in Congress to face some hard facts about deficits and defense. One is that you cannot combine the largest defense buildup in peacetime and simultaneously make the biggest tax cut in our history and still keep the budget balanced. If we need to make a bigger investment in defense for our national security, then we should also pay the defense tab.

But the White House has pretended that we can have it both ways: Big spending for defense with a tax cut for good measure. That's the main reason why the country is now saddled with $200 billion deficits and a $2 trillion national debt.

We have also forgotten that a strong economy must stand beside a strong defense as the twin pillars of our national security. President Eisenhower understood this and we would do well to remember his advice.

I recently read an article by Dr. Robert H. Johnson, who has served both Republican and Democratic Presidents on the National Security Council and the Policy Planning Council, which lays out clearly and concisely these and other arguments about the strength of America. I commend his timely and wise article to my colleagues.

[From the Christian Science Monitor, Nov. 5, 1985]

REAGAN AND THE DECLINE OF AMERICAN POWER

(By Robert H. Johnson)

As Congress continues to look at various elements of the defense budget—and the operation of the Pentagon—it ought to reflect on a fundamental irony at the heart of the Reagan administration's national security strategy: Though the administration came to office determined to reverse the deterioration of American power and to reassert American global primacy, its policies are more likely to accelerate the American decline.

President Reagan believed that American power had suffered because of a failure to sustain American military strength and to respond decisively to the Soviet threat. But the sources of decline are—as most analysts have long recognized—much deeper, being rooted in a variety of changes that have produced a broader diffusion of global power.

The Nixon, Ford, and Carter administrations tried seriously to accommodate to this reality while preserving and enhancing the remaining substantial margin of American influence. That required a reassessment of the American role in the world, ideological flexibility, and the skillful use of diplomacy.

The Reagan administration has rejected the idea that the diffusion of power represents a fundamental change in the international landscape and has relied almost exclusively upon the buildup of U.S. military power to reverse it. Diplomacy has been little valued and the administration has demonstrated little aptitude for it. It has lacked the ideological adaptability and top-level direction to play the complex game of international politics attempted by its predecessors.

Reagan's approach to defense spending is based, in important part, on the notion that the sheer magnitude of the defense budget counts most in the power equation. Our decline is seen as growing out of our failure to match Soviet military spending. In reality, the US and its allies have always spent more than the Soviets and their allies. More important, the administration does not seem to recognize that the very international and domestic constraints that have made it cautious about actually using military force have broader negative implications for the US capacity to translate the Reagan buildup into increased power.

The buildup has also produced proportionately little power because much of it has gone into pay increases, research and development, and modernization of strategic nuclear forces which cannot, by their nature, be transformed into international influence.

More fundamental, the size of the program, in combination with the unwillingness of the administration to raise taxes, is likely to produce serious economic difficulties that will strike at the very base of American power. Defense and tax policies have played a major role in creating the massive budget deficits, overpriced dollar, and record-breaking trade imbalances that make the American economy so fragile.

Although prediction is difficult, some likely effects of these economic imbalances on American power are reasonably clear. While the imminent transformation of the US into the world's largest debtor is not going to make America into another Mexico, it will reduce the US ability to play a leading role in the global economy, making US economic progress and welfare more the hostage of the interests and actions of others.

Since much of our borrowing is not increasing US non-military productive capacity, the need to service the debt and to reduce the trade gap will make us poorer. (Annual service on overseas debt could be upward of $100 billion by 1990 at present rates of growth.) In this situation our capacity to finance foreign aid, NATO troop deployments, and other overseas activities will be severely constrained.

The effects of our debtor status upon US domestic politics could include a neo-nationalist tendency, ever-increasing protectionism, and pressures to monetize the US debt through inflationary policies. Concessions to such pressures will reduce the capacity of the US for constructive international influence.

Recent action to drive down the dollar, if not accompanied by fundamental changes on defense spending, tax policy, and developing-country debt, is unlikely to forestall a major global economic adjustment that could include such elements as a worldwide economic contraction, detonation of the "debt bomb," and a large rise in US inflation. Such developments could be devastating for American power.

We need to return to President Eisenhower's recognition that national security must rest upon the twin pillars of a strong defense and a strong economy and that too much emphasis upon the first can undermine the second.

THE SANDINISTAS AND CHRISTIANITY

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 7, 1985

Mr. LaFALCE. Mr. Speaker, our improvement of American policy toward Nicaragua depends on our familiarity with balanced information about conditions in that country. As a source of such information, I commend to my colleagues an article by Karen M. Franz which appeared in the Rochester Courier-Journal of October 31.

Ms. Franz' article reports on a recent lecture at St. John Fisher College by Humberto Belli, a former supporter of the Sandinista Front. Mr. Belli eventually became disenchanted with the Sandinistas and wrote a book entitled "Nicaragua: Christians Under Fire." Mr. Belli does not endorse the anti-Sandinista Contras, but he describes the conflict he sees between Sandinism and Christianity. His well-informed views deserve our attention.

The article follows:

[From the Rochester (NY) Courier-Journal, Oct. 31, 1985]

FORMER SANDINISTA SAYS PARTY MISLEADS NICARAGUAN VISITORS

(By Karen M. Franz)

Humberto Belli, author of the book "Nicaragua: Christians Under Fire," explains that he was for many years a member of the Sandinista Party and, therefore, knows whereof he speaks.

Nicaragua under the Sandinistas is not a utopia, he claims. The Sandinistas are communists, and they intend to create a communist state in which there are no religions, no freedoms. But, he adds because of the religious character of the Nicaraguan populace, the Sandinistas are moving slowly toward communism, progressing cautiously to consolidate their power.

Many who visit Nicaragua for a few weeks come back with the impression that all would be well in Nicaragua if it were not for the intervention of the United States. Those visitors are being misled, Belli told a small audience at St. John Fisher College last Thursday evening.

"There is a clear pattern of commitment to Marxist-Leninist ideals in the documents of the Sandinistas since the 1960s," he said. "You will listen very often to people who have been in Nicaragua for one, two or three weeks, who do not even speak the language or understand the culture. They come back as experts on Nicaragua. I have been in this country for three years, and I still don't think I understand American politics," he said.

Most of the American groups that go to Nicaragua are hosted by CEPAD, an evangelical Protestant group Belli claimed is really a propaganda tool of the Sandinista government. The political pilgrims, he said,

return to this country prepared to convince the public of the wonders of the revolution.

"These people want to find out what they want to find out," he said, "and they find it because they are blind to anything else." Belli noted that it is easy for Americans to speak glowingly of conditions in Nicaragua because they will not have to live with the consequences. "I wish all the ones who go to Nicaragua and say it's great would stay there and never leave," he said.

Belli conceded, however, that the Sandinistas might have good intentions. But he said, "I think Stalin might have had good intentions of establishing a new world justice. Anyone who opposes the Sandinistas is the enemy and should be crushed. That's the danger with totalitarianistic ideologies. They are so messianic. Hitler probably wanted a wonderful Germany, too, but he was a fanatic."

A onetime editorial writer for Nicaragua's opposition newspaper *La Prensa*, Belli holds a law degree from the University of Madrid and a master's degree in sociology from the University of Pennsylvania. He had become involved with the Sandinistas in 1966 and was acquainted with several of the men who assumed power after the Sandinistas took control of the liberal coalition that overthrew Anastasio Somoza.

For 10 years, Belli sympathized with and aided the efforts of the Sandinistas. After a "personal encounter with Jesus Christ" in 1975, he lost faith in the communist ideology of the party. "Now I see things differently. The presence of Jesus Christ has convinced me that Marxism is not the answer—that you can't just change the economic structure, you have to change people's hearts," he said.

But this is not the case, he said, and events in Nicaragua cannot properly be understood unless people realize that the Sandinistas have an "ideological script or hidden agenda" that is not in keeping with the democratic principles they often claim.

"Who are the Sandinistas?" he asked the audience. "The implicit interpretation that is so widespread is that the Sandinistas are people who have basic democratic ideals," he said, adding that many believe the Sandinistas will follow a policy of nonalignment if they are not pressured by the United States.

Bellie's primary topic in the lecture was what he termed the Sandinistas' subtle repression of the Church in Nicaragua. Eighty percent of the Nicaraguan populace is Roman Catholic, he noted, and the remaining 20 percent is divided among various Protestant denominations. He said that the Sandinistas are moving slowly toward their goal of eliminating religion because they have a shrewd understanding of their country.

"The Sandinistas knew that Nicaragua was one of the very religious countries," he said. "It was their strategy not to antagonize the Church too soon after the revolution. They could not openly disclose their Marxist-Leninist nature because they would alienate their supporters."

Belli noted that when asked if he is a communist, Sandinista President Daniel Ortega answered, "I am an Sandinista." That, Belli noted, was not a denial of Ortega's communist leanings, because communism is an inherent principle of Sandinism. "You cannot be a Sandinista without being a Marxist-Leninist."

Similarly, Belli said, Ortega claims to support religious freedom and points to four priests in the Sandinista government as proof. Belli claims, however, that the priests do not demonstrate Sandinistan religious freedom, but instead indicate the creation of a new state religion.

Rather than challenging religion directly, the Sandinistas have set about to change the signs and beliefs of Christianity to correspond with communism, Belli said, citing an official Sandinista document he secretly obtained. The document, issued shortly before the first Christmas following the revolution of 1979, urged regional party officials not to discourage celebration of the religious holiday but to use the event to reorient children to a new meaning of Christmas, one that was fundamentally political.

The document advised that it would be foolish only five months after the revolution to challenge a tradition nearly 2,000 years old. Instead, the government printed thousands of posters showing the Christ child surrounded by armed militia men, depicting the "Birth of the new man of the revolution," Belli said.

The Sandinistas' attempt to convert Christianity to a Marxist-Leninist state religion is aided, he claimed, by the efforts of a group of "minority Christians" who espouse liberation theology, an interpretation of the gospels which is currently popular in Latin America. This theology praises Marxist revolution as the way to liberate people and to create a new world justice.

The Sandinistas, Belli said, have embraced the liberation theologists, giving them access to the government-controlled media and funds for Cursillo activities and retreats.

These liberation theologists teach that in order to be a true Christian, you must be a Sandinista, Belli claimed. He showed slides taken from his book to illustrate the ways in which he believes Christianity is being manipulated to promote support of the Sandinista government. In one example, a pamphlet Belli said was published by a promarxist Jesuit organization, the figure of Christ crucified is superimposed on a larger drawing of an armed guerilla fighter. In another, a drawing of a cross is combined with a hammer and sickle.

Thus, the pro-Sandinista clergy teach that the path to "salvation is not fighting against sin for holiness, but fighting against the system," Belli said. The Sandinista Party has become the new messiah, he asserts. The kingdoms of God and Nicaragua under the Sandinistas are treated as synonomous.

According to Belli, Father Ernesto Cardenal, Sandinistan minister of culture, furthers this idea with the statement: "You cannot encounter man and you cannot encounter God unless you embrace Marx." The belief that Christ came to liberate humanity is taken literally—a liberation from worldly chains, not the chains of sin, Belli said. He explained that the message of Sandinistan Christianity is that if Christ were to be reincarnated in Nicaragua today He would be a guerilla fighter, and Ronald Reagan would be Pontius Pilate.

"Instead of denying Jesus Christ, the new strategy is to change Him, to change what He means, which is a subtle way of denying Him," Belli said.

The Sandinistas also claim that there are two churches in Nicaragua: the "church of the poor," which supports the government, and the "church of the rich," which opposes it. Ironically, Belli explains, the poor of Nicaragua hold to the so-called church of the rich, while the intellectual and economic elite support the "church of the poor." Belli noted that both Fathers Cardenal and Miguel D'Escoto, Sandinistan minister of foreign affairs, come from Nicaragua's upper class. Liberation theology is supported, he said, by the "theological jet set."

Belli explained that the Sandinista government has gone to great lengths to discredit or silence churchmen—including Nicaraguan Cardinal Miguel Obando y Bravo—who oppose their policies, and in one instance, confiscated the printing press of one parish so that it could not publish a parish bulletin.

Belli urged the audience to "work inside your churches so that people become aware of the other side of what is going on in Nicaragua." He cited in particular the merit of writing to the editors of newspapers.

Belli conceded, however, that there is little hope of constraining the Sandinistas, short of another revolution. And despite all the evidence he presented to demonstrate Sandinista repression, he said he was not sure that life would be any better for Nicaraguans if the U.S.-supported contra forces were to gain control. The result of a contra takeover, he acknowledged, might well be a right-wing totalitarian regime even more repressive than that of the Sandinistas.

SENATE—*Friday, November 8, 1985*

(Legislative day of Monday, November 4, 1985)

The Senate met at 10 a.m. on the expiration of the recess, and was called to order by Hon. MACK MATTINGLY, a Senator from the State of Georgia.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, November 8, 1985.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MACK MATTINGLY, a Senator from the State of Georgia, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. MATTINGLY thereupon assumed the chair as Acting President pro tempore.

ADJOURNMENT UNTIL TUESDAY, NOVEMBER 12, 1985

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will stand in adjournment until Tuesday, November 12, 1985, at 8:45 a.m.

Thereupon, at 10 o'clock and 20 seconds a.m., the Senate adjourned until Tuesday, November 12, 1985, at 8:45 a.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

HOUSE OF REPRESENTATIVES— *Friday, November 8, 1985*

The House met at 10 a.m. and was called to order by the Speaker pro tempore [Mr. RANGEL].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
November 7, 1985.

I hereby designate the Honorable CHARLES B. RANGEL to act as Speaker pro tempore on Friday, November 8, 1985.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Rev. Henry L. Reinewald, pastor, United Church of Christ, Covington, OH, offered the following prayer:

Our Father and our God, we invoke Your grace and blessing upon this session of the House of Representatives of the United States of America. Bless each Congressman with the fulness of Your Holy Spirit. Lord God Almighty may the labors of this day by the Congress of the United States of America prove to be a blessing to our land and its people. We pray Lord, Your holy blessing upon our land and its people. By Your grace let us ever be the land of the free and the home of the brave. Help us, Lord, as a nation to work with all nations to bring peace and justice in our world.

We pray Almighty God, in Your holy name. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 207. Concurrent resolution to recognize the 20th anniversary of the Higher Education Act of 1965 and reaffirm its purpose.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3036) "An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1986, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 19, 68, 71, 97, and 98 to the above-entitled bill.

The message also announced that the Senate recedes from its amendment numbered 3 to the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1570) "An act to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that act to volunteers, and for other purposes."

The message also announced that the Senate insists upon its amendments to the amendments of the House to the amendments of the Senate numbered 1 and 2 to the joint resolution (H.J. Res. 372) "Joint resolution increasing the statutory limit on the public debt," disagreed to by the House, and agree to a further conference asked by the House on the disagreeing votes of two Houses thereon, and appoints Mr. PACKWOOD, Mr. DOMENICI, Mr. ROTH, Mr. DANFORTH, Mr. ARMSTRONG, Mr. GRAMM, Mr. RUDMAN, Mr. LONG, Mr. BENTSEN, Mr. CHILES, Mr. LEVIN, Mr. BOREN, and Mr. HOLLINGS to be the conferees on the part of the Senate.

REV. HENRY L. REINEWALD, PASTOR, UNITED CHURCH OF CHRIST, COVINGTON, OH

(Mr. DEWINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEWINE. Mr. Speaker, our guest chaplain today is the Reverend Henry L. Reinewald, pastor of the United Church of Christ in Covington, OH.

Reverend Reinewald is a graduate of Wagner Lutheran College in Staten Island, NY, where he received a B.A. degree in 1951. In 1955, he was awarded the degree of master of divinity by the New Brunswick Theological Seminary in New Brunswick, NJ, and that same year was ordained into the ministry by the Reverend Classis of New York Reformed Church of America.

He has served churches in New York, Michigan, and Indiana, and now in Ohio. Reverend Reinewald also serves as supreme chaplain of the Military Order of the Cootie, and this weekend will join some 3,000 other Veterans of Foreign Wars in their annual visit to the Tomb of the Unknown Soldier.

Reverend Reinewald is joined in his visit to the U.S. House of Representatives by his wife, Berna Mae. Mr. Speaker, I am honored to welcome the Reinewalds.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3038, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES, APPROPRIATION ACT, 1986

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled joint resolutions on Thursday, November 7, 1985:

S.J. Res. 29. Joint resolution designating the week of November 11 through November 17, 1985, as "National Reye's Syndrome Week";

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week"; and

S.J. Res. 130. Joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

SPEECH CONTEST FOR SEVENTH AND EIGHTH GRADERS

The SPEAKER pro tempore. Under a previous order of the House, the gen-

51-059 O-87-36 (Pt. 22)

tleman from Illinois [Mr. LIPINSKI] is recognized for 15 minutes.

Mr. LIPINSKI. Mr. Speaker, on October 28, I conducted an essay/speech contest in my district for seventh- and eighth-grade students. Over 750 youngsters participated; our judges selected 15 in each grade to be presented orally. I was so impressed with these speeches, titled "What America Means To Me," that I would like to share the first-place speeches in each age group with my colleagues. I would also like to place the second- and third-place speeches of each age group in the CONGRESSIONAL RECORD.

Mr. Speaker, the first-place winner in seventh grade is from Epiphany Grammar School in the city of Chicago. His name is Osvaldo A. Rubio.

WHAT AMERICA MEANS TO ME

When I first heard of this contest I wondered if I could express my feelings in five hundred words or more I also wondered if I could express my feelings correctly. I entered the contest and when I put that pen in my hand, I listened to my heart and mind and wrote the following thoughts.

America to me is primarily "the land of opportunity." I have other opinions on what America is, but this one is more prominent than the others. The reason for this particular belief is because of my father's early experience in America.

In 1966 my dad decided to come to America because he had heard that it was "the land of opportunity." Dad trudged the whole family to Chicago, Illinois, America. It was a big "risk" he was taking. He left everything he had in hope of a better life. There were many dangers in this "venture". He had heard of Chicago gangsters, and there was the language barrier. If he didn't find a job, he would have to go back to Mexico penniless. But this was America and he found a job. He worked continuously, bought his own home, and put his children through school. He worked until he became self-employed. At that time his daughter became a teacher, two of his sons had good jobs and got married, his other son was studying to become a priest and the youngest was in elementary school. My father tells me this story and says "I owe my life to this great country, this 'land of opportunity'!"

My other opinion is that democracy is at its best in America. Other countries claim to have a democracy and in some ways they do. But only in America is democracy practiced the best. In America you can do anything you want, become anything you want, or purchase anything you can afford.

The main word in the past sentences is you, which expresses the tremendous democracy we have. Other countries that have different forms of government say that America is too liberal with its people. Well, this is the way democracy works in America. America allows its people to do what they want as long as it is within the law. If you go to any of those other countries, to ask the people how they feel about the way they are being governed (which the country will usually not let you do) the overall opinion will be dissatisfaction. Most Americans can say they are satisfied about the way democracy works for them.

Another opinion I have is that America is a melting pot. Nowhere else on the face of the earth will you see so many different races living so harmoniously. Take a ride in any city in America and you will see races from all over the earth. There is an American store, next to a Mexican restaurant, next to a Japanese electronics store, next to an Italian shoe store. Or go down a residential street and listen to the children's playful voices or hear the neighbors' relaxing conversations. It is good to have different races about you. You can learn something different from each one, for example, I have black, white, Mexican, Polish, Italian, and Vietnamese friends. It is these people and many more who actually make up America.

America in another sense means strength It also means strength to other countries. During World War I America joined the allies and they won. In World War II, again America joined the allies and they were victorious.

Countries on the verge of financial disaster rely on America for help. Countries in personal disaster like Africa or Mexico are helped by America. Not only is America known as a financial and powerful country, but also as a peacemaker. For example, the United Nations, with Secretary General Dag Hammarskjold intervened in the Suez dispute and stopped a possible war. Anytime two or more countries are in dispute, America tries to help.

America is also known as a world leader in the field of new technology, ideas, or inventions. Whether it was with the invention of the automobile, the development of the Sabin vaccine or the making of the computer, America is a leader in practically all fields of products in the world. America also first developed many of the conveniences we have today.

America has also revolutionized modern warfare with the introduction of the atomic bomb and space weapons. No matter what the field of endeavor, America is a leader.

I would like to say that I know people who are desperate to come to this country. Many times they are forced by poverty and other reasons to come to this country illegally. Others come in small boats across dangerous waters and sometimes they never see America. Their hopes go down with the boat. Sometimes when I visit another country people ask me, "Where do you come from?" and I respond, "America". "From America!" They say excitedly "I would give anything to be in America". "Why do you want to go to America?" I inquire. "We have heard that it is a wonderful and plentiful land," they answer. I respond, "I guess you are right. It is a wonderful land and I am glad I live there."

I look at these people and I see all the people in the world who wish they were in America. Down deep in my heart I wish that there was another America but there isn't, there's only one.

My heart and mind have told me that this is America and my hand has made sure that I have expressed my feelings correctly. From opportunity to democracy, I believe that is America's real backbone. America isn't just power and money as many foreign people believe. In this essay I hope to have cleared up some of these rumors. I may not be able to read this to other countries, but even in America some people don't know what America is. Even up to now I didn't know exactly what America is. I feel a sense of knowledge and pride in my expressions, I hope you do too.—OSVALDO RUBIO.

□ 1010

Mr. Speaker, that concludes this essay, and, as I say, that was the first-place essay in our seventh-grade contest.

Now we will go on to the essay that took first place in our eighth-grade contest:

Dear George (or should I call you Mr. Washington?): I bet you're wondering how everything around here turned out. Well, it's just great.

As you know, it all started about 500 years ago, in the year 1492. Christopher Columbus discovered what he called "The New World". Which was later renamed "America".

Indians were living there until through dealing and dueling, our forefathers won the land.

In time, we grew from colonies and towns to cities and states, and into a single great country with millions of people.

Here we get the right to vote. We can work and pray as we please. Each one of us gets his chance to grow and improve like America did.

This nation to me is really grand. It has people who care and people who help. There are many schools in which you can learn and jobs where you can work. No matter what nationality, color or creed, we all live together peacefully.

Thanks to the Declaration of Independence that you signed, we now are independent and free.

We now have factories and machines to make life easier for us. We make things here in half the time. And our technology is super.

Another good thing about America besides independence, liberty and happiness is that we hardly ever fight. We did have a few major wars but only to preserve our country or its ideals. We work well with other countries. You may find it hard to believe George, but in these days we even get along with Great Britain.

We now have a Statue of Liberty. It's a beautiful monument that welcomes strangers and tells them we are a friendly and free nation. We are so friendly that this monument was actually a gift.

It is a statue of a woman holding a lighted torch that was given to us by France. It stands on Liberty Island located in New York Harbor.

The beautiful statue is a popular tourist sight and makes Americans proud to have it as a sign of freedom and opportunity.

Well, Mr. Washington, I bet you're wondering what I think of America. So I'll tell you.

I think that America is a splendid place to live. It is peaceful, free, and independent, thanks to you and many others.

I enjoy living here and meeting such friendly people each day. We care about and help each other with any problems we may have. This, more than anything keeps our country strong.

Sometimes things may get out of hand and need to be stopped. Things like fighting and killing. But at least this country has courts, judges, policemen and lawyers to solve these problems.

We are not a totally perfect nation yet, but certainly one of the best.

Being in politics, George, one of the most interesting developments, I can tell you about is that now-a-days women can vote, that's how truly equal we have become.

To me America is the land of everyone's dream.

Well, Mr. President, I've got to sign off now. And I truly hope you get to read this

letter someday. After all, you are the father of this country, and we kids have a knack for making our fathers proud.

Sincerely yours,

SHANON LUSZCZEWSKI.

Mr. Speaker, the other essays to which I referred are as follows:

"WHAT AMERICA MEANS TO ME"

(By Joanne Pastores Boy)

Compared to all the major countries and smaller nations in the world today, America is the most unique combination of ideals, customs, cultures, and most of all, peoples.

America is a giant melting-pot, as many of you have already heard some time in your life. It's a place where people can escape the problems and tragedies of their distant and troubled homelands. Here, people can find the freedom they have longed for all their lives, for in such nations like Russia and Poland, people are sometimes restrained from doing even the normal everyday activities, which we take for granted. It is here that people from all walks of life come to worship God, and participate in the religion of their choice. As I said before, America offers freedom to all those, no matter who you are, who truly want it. In the United States you are free to conduct yourself anyway you please, as long as what you do doesn't harm or endanger anyone else's freedom. Most Americans use their freedom to honor America and all the graces she has bestowed upon us.

America is a land of pride and devotion. Many Americans devote their lives to the service of our country. Young men and women enlist each year to serve and defend our country as members of our armed forces; the Navy, the Army, the Marines, and the Air Corps. We have holidays devoted to the men and women who gave their lives for the honor and freedom of the United States of America. These heroes and heroines are the backbone of our illustrious nation, of which we are proud. These people are from our recent history, but there are others. The names of these people go back as far as the beginning of our nation. Some of these historical names are the names of the founders, presidents, political figures, and most of all the American people. Some of these names include George Washington, Thomas Jefferson, or even Abraham Lincoln. These are not only the names of men long-gone, but the names of the men who founded, freed, and most of all set the marker of achievement, pride, and excellence each American should strive for, because of the fact that you are an American.

America is a land of diversity and contradictions. People in the United States believe in different ways of life, religion, and political views. Different people have different views. We in America have this right and privilege. We do things in America that contradict the beliefs of our own society. We differ in fashion, generations, music, and in many, many more areas, but generally we have one thing in common, the belief in the strength of the United States.

America is a nation of love and concern. The United States has been involved in all types of missions of mercy and love. Many Americans have participated in bringing aid to starving nations, undernourished children, and poor underdeveloped countries. America has been associated with the words aid, concern, and help for many years, and probably will be for many more years.

I have explained what America means to me. America is freedom, pride, devotion, people, diversity, contradiction, love, and concern. America is that and more. Its meaning is beyond words. America is a part of all of us and we are a part of it. "She is our friend and we are Hers." America's arms will always be open to all those in need.

WHAT AMERICA MEANS TO ME

(By Natalie Pietura)

To really explain what America means to me, to give my innermost feelings, is the purpose of my essay.

I am foreign parents born in a foreign country. As long as I can remember my parents spoke of coming to America. That was their dream and it became mine. Finally the day came and we arrived.

The beauty of its shores, the forests, huge mountains, the farms, the meadows just takes my breath away.

No more must we fear a police state—no more do we have to explain where we go—or why.

This America is a our dream to be able to vote as we see fit for whoever is the candidate. To go to church and worship God in our own private way.

I am able to speak freely. In America I can enjoy visiting other states besides my own without special passes or visas. I have no fear of moving about freely. I can write to whomever I please without fear of censorship I can read any book as well as read any newspapers.

Perhaps some Americans can take what America offers for granted but for me this land of the free is paradise for me. I can't wait until I become a full fledged American citizen so that I too can say "I am an American."

The many opportunities that America offers to all people is something to behold. We read of people who although poor became people of means, the many races of people that are here and people of all countries, all living in this land. It is no wonder that America is known as the "melting pot."

A person can travel short distances and experience many tradition of many ethnic people. The beauty of all this, is that they all get along.

"Freedom"! What a beautiful word but oh so lighty taken. We must always be on the alert that this shall not be taken away from us by enemies either within or without.

The Constitution was written many years ago and its spelled out this freedom.

America the champion of many nations—always willing to lend a hand to any oppressed nation.

We are a republic; governed by people we elect. America is "Hollywood" to many people of other nations.

Just look around you and see the rich resources of America. The rich farm lauds which produce wheat, oats, corn, barley, and other staples—the factories, the many universities—the large ranches; all of this takes ones breath away. America means riches to me, not riches in the sense of money but riches in it's determination to be the best.

In all America is the land of "Oz" to me a fairyland of fairy tales, a God fearing nation who tries the most for all of its people. America to me, is sugar and spice and everything nice.

Whenever I hear the Preamble and see the Flag I rise with pride. When I hear the "Star Spangled Banner" or "God Bless America" I'm thrilled and I thank my God for letting me be here. This is my America!

WHAT AMERICA MEANS TO ME

(By Douglas W. Ingersoll)

America is known as the land of the free and also known as the land of opportunity. That saying is famous around the world. But, that is not what America means to me. What America really means to me is a land where troubled people can go for love and support. To make it easier to understand, America is sort of like our mother who loves and cares for us. America is very dear to me because it is the land that I came to for love and support.

Before I came to America, I lived in an orphanage in Seoul, Korea. Soon, a loving family adopted me. When I arrived in my new home it was quite scary. To me it was a strange land to be in and I had to learn to cope with the new environment. My mother and father did all they could to help me get along easier in the new world. I learned to speak a new language, eat new foods, go to school and learn the history of the United States.

When I first learned about the equal rights of all men, I knew this country was going to be the place for me. I asked my teacher what equal rights meant. She said, that equal rights means the chance to do whatever anybody wishes. I still didn't quite know what the words meant, but I knew it had to mean something good.

Soon, I was going to be an American citizen and I was very nervous. All I could think of was becoming one of the people who had freedom. The happiest day of my life was October 21, 1982, when I saw the papers that said I was now a true American citizen.

A kid like me is pretty lucky to have a loving family and a land that I love. My parents soon found out I had muscular dystrophy. Mom and dad were pretty upset, but that wouldn't stop me from going ahead with my life. I have a whole future ahead of me in this great land, and the disease in my legs isn't going to stop me.

So, today I am proud to be an American Citizen and I alway will be proud of who I am. Also, I will try to make this great land of ours a place for all people of all races to come and live. I will always love and be thankful to the Statue of Liberty, the American Flag and the United States for all the loving, caring and inspiration it has given to me.

Besides a land of freedom and a land of opportunity, America is a lot more than most people think. I know that this land of the free will welcome people with open arms and will always give liberty to all mankind. The United States, or better known as America is a great place to live. This is what America has done for me and what it means to me.

WHAT AMERICA MEANS TO ME

(By Jim Jannece)

Being an American means many things to me. It means a ball game on a hot, summer day when you're eating a hot dog. It means turkey on Thanksgiving Day while watching a football game. The United States means so much to me that I would give life for it.

Now, in the 1980's, a renewal of patriotism is sweeping across our great land. Movies such as "Rambo" and "Red Dawn" have only added to the wave of patriotism. Also, who would have thought during the Vietnam War that the number one selling album in 1985 would be Bruce Springsteen's "Born in the USA"? Who also would have become a person to sing the song "Born in

the USA" would be a cult song among today's terms? An American flag within sight of any Vietnam protester would be burned and spit on about fifteen years ago. So why is this happening? I don't know, but I'm sure glad that it is happening.

Back in the 1930's, before World War II, the US was a nation at ease with itself. The growing threats of Hitler and the Japanese were only considered minor problems. But then on Dec. 7, 1941, America was thrust into the war. Young men lined up around the block to be recruited into the military. Morality in the USA reached its peak after Japan surrendered. Later, in the late 1960's, morality reached an all-time low. When the USA pulled out of Vietnam in 1975, the US remained in a short of limbo for five years. In 1980 the Iranians took control of the US Embassy in Teheran and the Soviets invaded Afghanistan. The US a nation ready and waiting for something to explode about. Then, a simple little hockey game in Lake Placid, New York during the 1980 Winter Olympics began to change the morale. The young, upstart U.S. Olympic hockey team pulled one of the biggest upsets in sports history by defeating the powerful, once-invincible Soviet team 4-3. Although I was only eight years old, I'll never forget that moment as long as I live. I remember it like it was yesterday. After the game, a crowd of 9,975 made noise that could have been heard at the Canadian border 45 miles away. You didn't have to be a hockey fan to enjoy the game—but only a proud American. When the final score was announced at a college basketball game in Ohio, the crowd, of which many had never seen a hockey game stood up and chanted U.S.A., U.S.A! A doctor in Atlanta came up with a drink named after the U.S.A. goalie, Jim Craig. He called it "The Craig Cocktail". He said it contained everything but the Vodka.

Ever since that moment, national morale has been on the upswing. People are once again proud to say that they are Americans.

What I've stated in this essay is not even one-fourth of what America means to me. I couldn't possibly name them all.

□ 1020

VETERANS DAY: REMEMBERING OUR PAST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. SKELTON] is recognized for 30 minutes.

Mr. SKELTON. Mr. Speaker, on the 11th hour of the 11th day of the 11th month in the year 1918, the guns on the western front finally fell silent, bringing to an end more than 4 years of war. The cost was staggering. More than 15 million had died, many in the muddy trenches that came to symbolize the agony of that conflict. Most people who had lived through the war prayed that such a massive and bitter conflict could never take place again.

When I was 9 years old, I was in the fifth grade. It was 44 years ago today. I remember as if it were yesterday. My father, who was considered the best orator in the country, took me out of school and drove me to Odessa so I could hear him deliver the Armistice Day address to the high school assembly. I remember sitting there in the audience and hearing him tell about the World War of which he was a veteran and how it was fought by his generation of American young men to preserve our freedom.

I remember him speaking about freedom and liberty and the importance of keeping them alive in our country. I also remember him telling that student body that there might come a time when freedom would have to be defended again and that there were those in the audience who might well have to fight to preserve it.

Less than a month later, his prophecy came true. Just 26 days after his speech, December 7, 1941—that date that lives in infamy—the attack on Pearl Harbor brought World War II upon us.

If the idealistic hope had been realized for World War I to have been "the war to end all wars," November 11 might still be called Armistice Day; but the war that engulfed the world from 1939 to 1945 shattered the dream.

In 1954, Congress passed, and President Eisenhower signed, a bill specifying that Armistice Day would thereafter be known as Veterans Day. As we observe the holiday, it often has the face of strife, of suffering and bloodshed, of terror, of destruction and mutilation, and of death; but, and we should not forget this, it is really a day of peace. It should also be a day of hope and remembrance when we honor those Americans who gave their lives in the ongoing struggle for freedom. It is also a day of respect and appreciation for those 30 million of our veterans who survived, to whom we owe the blessings of liberty. While the initial promise for Armistice Day proved faulty, the idealism behind the aspiration must not be forsaken.

Of all God's creatures, only man has a sense of history. It is this gift which allows us to gather here today and to look back.

First, it is important to remember that it has been the youngest and the best who have borne in disproportionate measure the responsibilities incumbent on a great nation. More than 600,000 of our countrymen have paid freedom's supreme sacrifice in the four wars we have fought this century.

Second, it is important to underscore that every generation of Americans has owed a debt to the past and that every generation that comes after us will, in turn, inherit that debt. Veterans know best the price of peace and freedom we enjoy today. Those who have made the ultimate sacrifice, or put their lives on the line for their country, reflect the fact that democracy is not a gift, but a constant challenge.

Finally, there is one supremely important task we must do. We must teach our children and every future generation to value the freedoms we enjoy and the pride of being an American. We must instill in them a strong sense of duty, honor, and conviction toward our country. We must ensure that they continue to recognize and honor the great sacrifices made by previous generations of Americans—Americans who gave their lives so that we could live free from tyranny and oppression.

It was the Irish writer, John Curran, who wrote: "The condition upon which God hath given liberty to man is eternal vigilance; which condition if he break, servitude is at once the consequence of his crime and the punishment of his guilt."

There are reminders of those who paid the price of that eternal vigilance. I have seen the superstructure of the U.S.S. *Arizona*—the ship which lies on the bottom of Pearl Harbor, the tomb of hundreds of American sailors. I have seen the ruins of Corregidor where the soldiers, sailors, and marines under Gen. Jonathan Wainwright defended the small island fortress against overwhelming odds.

This past March, I visited the American cemetery at Hamm, Belgium, where Gen. George S. Patton, Jr., is buried. This is not far from Bastogne, the scene of much bloodied fighting in December 1944, remembered to history as the Battle of the Bulge. Though there was snow on the ground, I walked among the crosses denoting each grave, looking for those from our State of Missouri. As I did so, I remembered some young men from my hometown, several years older than I, who did not return from World War II. I also recall three of my schoolmates who never returned from Korea. They were gone, never to enjoy what I did, never again to experience friendship, never again to know a warm embrace, never to work to make their young aspirations and ambitions come true, never to return. As I left that Belgian cemetery, it was the resolve not to forget them or my friends or my schoolmates who had given their lives at another time, at another place.

These scenes of yesterday's sacrifices still speak to us and call down to this generation. What is being done to preserve that freedom? In answer, I can say that I have seen the young people today committed to maintain our way of life. I have seen it in the determined eyes of the sailors as they climbed aboard a submarine at Norfolk. I have watched Missouri National Guardsmen skillfully building a road in Panama. I have seen the pride of marine recruits as they graduate from boot camp at Parris Island. I have watched the enthusiasm of the troops, the airborne troops at Fort Benning.

Today we live in an unsettled world. As a nation, we are on guard all over the globe, still searching for what we

thought we had won permanently in 1918—everlasting freedom and peace and justice. We had become the great world leader, the bastion of freedom. People from other countries are attracted to our shores. Thus, the responsibility placed upon us as a Nation and as a people continues to be great. We are still the last and best hope for people who revere liberty on this Earth.

This is a heavy responsibility. It requires us to assist our friends and allies. It causes us to work hard to set the example for peace-loving people everywhere.

Peace has its victories, no less than wars, but to maintain the peace we must remain vigilant and remember; for if we remember the greatness of yesteryear and we are inspired by heroic deeds of days gone by, we not only will have received the torch of freedom from those who have gone before, but we will have held it high.

Of our living veterans, we can say they willingly bore the burden of defense; they kept freedom's lonely vigil and were the guardians of the Nation's values, yet became neither oppressor nor oppressed.

Of our dead, we can say as Lincoln did in his Gettysburg Address: "It is rather for us to be here dedicated to the great task remaining before us—that from those honored dead we take increased devotion to that cause for which they gave the last full measure of devotion."

Today we voice again the gratitude of liberty to all who have suffered to protect that liberty.

In that address to the Odessa High School assembly on November 11, 1941, I also remember my father concluding his talk with a poem that came out of World War I. Those poetic words still speak to us today with the same message as when it was first written in 1918, as when it was recited in 1941, and as it is heard today:

In Flanders Fields the poppies blow; Between the crosses, row on row,
That mark our place; and in the sky the larks still bravely singing fly,
Scarce heard amid the guns below. We are the dead, short days ago, we
Lived, Felt dawn, saw sunset glow; Loved, and were loved; And now,
We lie in Flanders Fields. Take up our quarrel with the foe, To you,
from failing hands, we throw the torch; Be yours to hold it high,
If ye break faith with us (who die) We shall not sleep, tho'
Poppies grow In Flanders Fields.

AMENDMENT TO HOUSE JOINT RESOLUTION 441

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington [Mr. FOLEY] is recognized for 5 minutes.

Mr. FOLEY. Mr. Speaker, pursuant to House Resolution 312 I am submitting for the RECORD the amendment which I intend to offer to House Joint Resolution 441, the resolution making further continuing appropriations for the fiscal year 1986:

At the end of the joint resolution add the following new section:

SEC. 2. Such joint resolution is further amended by adding the following new section:

SEC. 107. In order to achieve the necessary savings in appropriated accounts, in conjunction with savings in reconciliation and other legislative measures, which would reduce the estimated deficit to the $161,000,000,000 maximum deficit amount for the fiscal year 1986 as specified in the Balanced Budget and Emergency Deficit Control Act of 1985 as adopted by the House of Representatives on November 1, 1985, all amounts, except as otherwise specified hereafter, provided by this joint resolution shall be reduced by 3.8 percent: *Provided*, That programs and activities listed in sections 253, 254(o), and 255(l) of such Act as passed by the House of Representatives on November 1, 1985, shall be exempt from reduction under this section: *Provided further*, That reductions for programs listed in sections 254(g), (i), (j), (l), (m), and (n) of the Balanced Budget and Emergency Deficit Control Act of 1985 as passed the House of Representatives on November 1, 1985, shall be made in accordance with the provisions of section 254 assuming a uniform budget authority sequestration of 3.8 percent: *Provided further*, That programs, projects, and activities reduced pursuant to this section shall be reduced in a uniform and proportional manner as provided in the Balanced Budget and Emergency Deficit Control Act of 1985 as passed the House of Representatives on November 1, 1985: *Provided further*, That no program, project, or activity shall be terminated pursuant to this section.

CONFERENCE REPORT ON H.R. 3038

Mr. BOLAND submitted the following conference report and statement on the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-363)

The committee on conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 5, 6, 8, 11, 14, 15, 19, 21, 26, 27, 28, 29, 31, 36, 37, 39, 40, 45, 47, 48, 51, 53, 56, 57, 58, 59, 62, 64, 65, 67, 73, 75, 85, and 93.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 13, 22, 23, 24, 25, 32, 34, 44, 49, 52, 60, 77, 78, 80, 81, 82, 86, 87, 89, and 90, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$838,803,547;* and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$922,500,000;* and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$851,225,000;* and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: *:Provided further, That up to 20 per centum of the $978,900,000 provided herein for assistance in financing the development or acquisition cost of public housing shall be made available for major reconstruction of obsolete public housing projects;* and the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$587,831,000;* and the Senate agree to the same.

Amendment numbered 33:

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$36,000,000;* and the Senate agree to the same.

Amendment numbered 35:

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$14,615,442;* and the Senate agree to the same.

Amendment numbered 38:

That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as follows:

In lieu of the sum named, insert: *$5,000,000;* and the Senate agree to the same.

Amendment numbered 41:

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$4,000,000;* and the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$46,000,000*; and the Senate agree to the same.

Amendment numbered 50:

That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,500*; and the Senate agree to the same.

Amendment numbered 61:

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,397,900,000*; and the Senate agree to the same.

Amendment numbered 69:

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,352,205,000*; and the Senate agree to the same.

Amendment numbered 70:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$72,500,000*; and the Senate agree to the same.

Amendment numbered 71:

That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,450,000*; and the Senate agree to the same.

Amendment numbered 72:

That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as follows:

In lieu of the sum named, insert *$9,000,000*; and the Senate agree to the same.

Amendment numbered 74:

That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$55,550,000*; and the Senate agree to the same.

Amendment numbered 76:

That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided, That, notwithstanding the provisions of 31 U.S.C. 6701-6724, payments to local governments from this appropriation shall not exceed $4,185,000,000 and this appropriation is hereby reduced by $381,700,000 through a reduction in the payment for the final quarter of the entitlement beginning October 1, 1985 and ending September 30, 1986*; and the Senate agree to the same.

Amendment numbered 79:

That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,255,694,000*; and the Senate agree to the same.

Amendment numbered 83:

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided, That in the Veterans Administration not to exceed 53 full-time equivalent employment shall be available for the Office of Planning and Program Evaluation*; and the Senate agree to the same.

Amendment numbered 84:

That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$507,360,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 2, 3, 10, 12, 16, 17, 20, 43, 46, 54, 55, 63, 66, 68, 88, 91, 92, and 94.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference of the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Amendment No. 1: Appropriates $838,803,547 in annual contract authority for annual contributions for assisted housing, instead of $756,897,547 as proposed by the House and $872,191,547 as proposed by the Senate.

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $9,965,607,781 in budget authority for annual contributions for assisted housing, instead of $9,200,902,781 as proposed by the House and $8,108,355,781 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The conferees expect the Department and the Office of Management and Budget to adhere to the 1986 program detailed in the following table. The Department is expected to continue to utilize the regular reprogramming procedure if any changes are required to the agreed upon program contained in the table.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING FISCAL YEAR 1986—GROSS RESERVATIONS

	Units	Cost	Contract authority	Term	Budget authority

Total	NA	NA	891,683,661		10,015,894,500

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will offer to recede and concur in the amendment of the Senate with an amendment as follows: *$1,306,500,000 shall be for assistance in financing the development or acquisition cost of public housing, of which $327,600,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 4: Earmarks $1,500,000,000 in budget authority for long-term debt financing of public housing modernization as proposed by the Senate, instead of $735,295,000 in budget authority as an appropriation for public housing modernization as proposed by the House.

The conferees strongly reaffirm previous committee and conference directives to the Internal Revenue Service to promptly clarify the tax status of all public housing debt instruments.

Amendment No. 5: Deletes language proposed by the Senate earmarking $50,000,000 of modernization funds for the purpose of assisting public housing agencies to reduce the hazards of lead-based paint in public housing.

The conferees have deleted this language without prejudice. The Committee of Confernce has been advised of a growing concern over the serious potential health risk represented by lead-based painted housing occupied by young children. When this paint is improperly maintained and allowed to blister or peel, it represents a major hazard if ingested by children. In view of this ongoing, serious health risk, the conferees direct the Department and, through the Department, the public housing authorities, to immediately identify resources to address the removal of lead-based paint. The conferees note that substantial federal assistance is annually appropriated for the maintenance of public housing units and strongly suggests that those funds should be put to use *now* to prevent the exposure of children to lead-based paint. The conferees further direct that the Department report to the Committees on Appropriations by March 30, 1986 on the level of funds that have been allocated to address this problem at the local level.

Amendment No. 6: Earmarks $2,468,160,000 in budget authority for the section 8 existing housing program as proposed by the House, instead of $2,056,800,000 as proposed by the Senate.

Amendment No. 7: Earmarks $922,500,000 in budget authority for the section 8 moderate rehabilitation program, instead of $1,286,100,000 as proposed by the House and $428,700,000 as proposed by the Senate.

Amendment No. 8: Restores language proposed by the House and stricken by the Senate earmarking $75,000,000 in new budget authority as an appropriation for rental rehabilitation grants and $75,000,000 in new budget authority as an appropriation for housing development grants.

Amendment No. 9: Earmarks $851,225,000 in budget authority for the housing voucher program, instead of $672,177,500 as proposed by the House and $937,642,500 as proposed by the Senate.

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: , *for use, notwithstanding the limitations in section 8(o)(1) of such Act that the Secretary conduct a demonstration, and in section 8(o)(4) of such Act that the Secretary use substantially all authority in connection with certain programs, in connection with the rental rehabilitation program under Section 17 of such Act and for any other purposes as determined by the Secretary*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 11: Deletes language proposed by the Senate limiting section 8 existing contracts to not more than 10 years.

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate exempting authority previously provided for the section 235 homeownership assistance program, rental rehabilitation grants and housing development grants from the merger and recapture provisions carried in this paragraph.

Amendment No. 13: Deletes word proposed by the House and stricken by the Senate clarifying the amounts available for obligation not subject to certain allocation of funds provisions.

Amendment No. 14: Deletes language proposed by the Senate earmarking up to $100,000,000 in recaptured budget authority as an appropriation for rental rehabilitation grants and up to $50,000,000 in recaptured budget authority as an appropriation for housing development grants.

Amendment No. 15: Deletes language proposed by the Senate further defining which authorities recaptured in 1986 shall be rescinded.

Amendment No. 16: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate specifically excepting recaptured authorities for the section 235 homeownership assistance program, rental rehabilitation grants and housing development grants from rescission in fiscal year 1986.

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *section 6(b) of the United States Housing Act of 1937 is repealed.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 18: Restores language proposed by the House and stricken by the Senate providing that up to 20 percent of the $990,000,000 provided for public housing development shall be available for major reconstruction of obsolete public housing projects, amended to earmark 20 percent of $978,900,000.

Amendment No. 19: Appropriates $1,210,600,000 for payments for operation of low-income housing projects as proposed by the House, instead of $1,240,600,000 as proposed by the Senate.

Amendment No 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing for the carryover of any operating subsidy funds in excess of established performance funding system requirements.

Amendment No. 21: Deletes language proposed by the Senate earmarking $30,000,000 of operating subsidy funds for increases in the costs of insurance premiums.

While the Committee of Conference has deleted the specific earmarking for cost of insurance premiums, it recognizes that many public housing authorities that have recently renewed property and casualty insurance policies have confronted premium increases averaging 400 percent. In that connection, the conferees expect that the Department should assess the extent and nature of the rapidly escalating insurance cost of housing authorities and explore a long-term solution to this serious problem. Clearly, the increasing insurance premiums highlight an underlying concern over the adequacy of the performance funding system mechanism to fully and fairly reflect the actual cost of operating public housing. Therefore, the conferees direct that HUD review the existing formula and make the needed adjustments to update PFS to accurately reflect the true costs of operating public housing.

Amendment No. 22: Appropriates $3,500,000 for housing counseling assistance as proposed by the Senate, instead of $4,000,000 as proposed by the House. Amendment numbered 94 reduces the appropriation by $38,500 to $3,461,500.

Amendment No. 23: Establishes the 1986 limitation on Federal Housing Administration mortgage and loan insurance commitments at $60,000,000,000 as proposed by the Senate, instead of $50,900,000,000 as proposed by the House.

Amendment No. 24: Establishes the 1986 limitation on nonprofit sponsor assistance direct loans at $1,000,000 as proposed by the Senate, instead of $500,000 as proposed by the House.

Amendment No. 25: Deletes language proposed by the House and stricken by the Senate appropriating $20,000,000 for the solar energy and energy conservation bank. Extremely tight overall budget constraints and the bill have forced the conferees to eliminate funding for the solar bank in 1986. The conferees understand that between $5,000,000 as $7,000,000 will be available from recaptures and other funds in 1986 and direct that HUD allocate all such funds on the normal annual schedule using a performance based distribution.

Amendment No. 26: Appropriates $3,124,800,000 for community development grants as proposed by the House, instead of $3,024,800,000 as proposed by the Senate. The Committee of Conference is in agreement that $60,500,000 shall be available for the Secretary's Discretionary Fund.

Amendment No. 27: Appropriates $330,000,000 for urban development action grants as proposed by the House, instead of $352,000,000 as proposed by the Senate.

Amendment No. 28: Deletes language proposed by the Senate appropriating $2,000,000 for a neighborhood development demonstration.

Amendment No. 29: Appropriates $16,900,000 for research and technology as proposed by the House, instead of $18,900,000 as proposed by the Senate.

Amendment No. 30: Appropriates $587,831,000 for salaries and expenses, instead of $592,831,000 as proposed by the House and $586,686,000 as proposed by the Senate.

The Committee of Conference is in agreement with the following reductions from the House recommendations:

−$3,000,000 of the $11,300,000 increase for additional staff years to maintain staffing for recommended program levels.

−$2,000,000 of the $5,100,000 increase to be distributed at HUD's discretion for additional staff years to begin rebuilding the public housing development program and public housing staff training.

Amendment No. 31: Transfers $251,404,000 from the various funds of the Federal Housing Administration as proposed by the House, instead of $254,366,000 as proposed by the Senate.

Amendment No. 32: Deletes language proposed by the House and stricken by the Senate limiting the Office of Public Affairs to 16 permanent positions and 18 staff years. The House language has been deleted because it is too restrictive. However, the conferees expect staffing reductions in this office to be accomplished through attrition.

TITLE II—INDEPENDENT AGENCIES

Consumer Product Safety Commission

Amendment No. 33: Appropriates $36,000,000 for salaries and expenses, instead of $37,000,000 as proposed by the House and $34,900,000 as proposed by the Senate. The conferees agree that $1,000,000 of the additional funds provided to CPSC shall be used to support the study on cigarette fire safety, with $70,000 available for travel expenses related to meetings of the technical study group. If additional resources are required in 1986 to complete the cigarette fire safety study, the conferees expect the Administration to make such funds available from the budgets of other participating Federal agencies. Finally, the conferees agree on the following additions to the budget request: +$250,000 and 2 FTE for indoor air pollution; +$100,000 for chain saw safety; and +$75,000 for laboratory equipment replacement.

Amendment No. 34: Deletes language proposed by the House and stricken by the Senate earmarking $1,000,000 for activities authorized by the Cigarette Safety Act of 1984. As indicated above, the Committee of Conference directs that $1,000,000 be devoted to completion of this study.

Department of Defense—Civil

Cemeterial Expenses, Army

Amendment No 35: Appropriates $14,615,442 for salaries and expenses, instead of $7,759,000 as proposed by the House and $14,778,000 as proposed by the Senate.

Environmental Protection Agency

Amendment No. 36: Appropriates $690,176,000 for salaries and expenses as proposed by the House, instead of $688,376,000 as proposed by the Senate. Amendment numbered 94 reduces this appropriation by $6,000,000 to $684,176,000.

The conferees agree on the following changes from the budget request:

−$6,000,000 as a general reduction to be allocated at the discretion of the Administrator,

+$6,000,000 and 100 FTE for RCRA regulations, permitting and enforcement,

+$4,500,000 and 75 FTE for hazardous air pollutants. The conferees have not included funds for the air program epidemiological and extrapolation studies described in the Senate report because they understand that these activities are already being performed by the Agency. The Committee of Conference directs that a portion of these additional funds be used for regulatory development of all the hazardous air pollutants that the Administrator states his intent to list in fiscal year 1986. The conferees also direct the Agency to use a portion of these funds for the pre-regulatory evaluations needed to meet the Agency's program objectives for listing of hazardous air pollutants in future years.

+$3,000,000 and 60 FTE for enforcement activities. The conferees direct that a portion of these funds be used by the Agency to insure that high priority expired NPDES permits are reissued. They direct the Agency in its program plan to describe the priority setting method it has used to determine which permits will reissued.

+$2,260,000 for intramural research equipment and support costs,

+$1,500,000 and 30 FTE for NSPS reviews. The conferees expect these funds to be used so that work on the remaining new source performance standards will begin in 1986,

+$1,500,000 for the national emissions data system to support acid rain data collection and analysis, and

+$1,000,000 and 20 FTE for contracting and financial management.

The conferees understand that the budget request provides sufficient resources to support headquarters review of advanced wastewater treatment projects over $3,000,000 in cost. Evaluation of State and regional AT reviews should continue, with special emphasis on the trial delegation of reviews to regions IV, V and VI.

Amendment No. 37: Appropriates $223,400,000 for research and development as proposed by the House, instead of $218,750,000 as proposed by the Senate. The conferees agree on the following changes from the budget request:

−$9,000,000 reduction from acid rain research, including work funded by other agencies,

−$5,500,000 general reduction, to be applied at the Administrator's discretion to areas other than those augmented,

+$5,000,000 for the limestone injection multistage burner (LIMB) demonstration,

+$4,000,000 for grants and centers,

+$3,000,000 for air toxics total exposure assessment studies,

+$3,500,000 for indoor air pollution, including $1,500,000 for radon,

+$3,000,000 for hazardous waste and groundwater research,

+$2,500,000 for the hazardous waste management center,

+$1,400,000 for Great Lakes research to maintain the 1985 program level of $2,300,000. The Conferees direct that $300,000 of these funds be used in concert with the program office to begin biochemis-

try and engineering studies at the highest priority Class A areas of concern identified by the International Joint Commission.

+$1,100,000 for exposure validation models,

+$1,000,000 for the American Water Works Research Foundation, as the final Federal payment,

+$750,000 for research to support hazardous air pollutant regulations. The funds are included to cover the costs under this account of the NESHAP pre-regulatory activities described in amendment numbered 36.

+$250,000 for a health effects study of the Kanawha Valley in West Virginia.

The Committee of Conference has not funded the other NSPS and pesticide activities described in the Senate report. Finally, the conferees direct that EPA make no final decision or take no action on terminating the non-ionizing radiation health effects research program before January 1, 1986.

Amendment No. 38: Restores language proposed by the House and stricken by the Senate amended to earmark $5,000,000 for a full scale demonstration of limestone injection multistage burner (LIMB) technology in a tangentially fired boiler on an equal cost sharing basis with the electric power industry, instead of $6,000,000 as proposed by the House.

The conferees view this demonstration as a high priority, given its potential for cost effectively reducing power plant emissions related to acid rain. The conferees are fully aware that this $5,000,000 will cover only about one-half the Federal cost of demonstrating this technology in a 200 megawatt boiler. At the same time, however, the conferees are aware that the Department of Energy may be undertaking related technology demonstrations under the "clean coal initiatives." Because of the similarity in the technologies and the potential for overlap, the conferees believe the closest coordination is required between EPA LIMB activities and any demonstrations under a clean coal initiatives program. In hearings on the 1987 budget, EPA should provide a progress report on the coordination of relevant technical, management and funding issues.

Amendment No. 39: Deletes provisions proposed by the Senate earmarking $1,000,000 for a study of lead and other fuel additives in gasoline engines in agricultural equipment and prohibiting the use of funds to modify the regulations on gasoline lead content made final on March 7, 1985 (50 FR 9386) or to provide exemptions for users or classes of users from such regulations. Both the House and Senate reports call for this study on the effects of changes in leaded fuel regulations on farm equipment. The conferees understand that EPA plans to conduct this study and agree that up to $1,000,000 of abatement, control, and compliance funds may be reprogrammed for this purpose.

The conferees are supportive of EPA's efforts to better understand and analyze the effects of environmental pollutants on the aging process, as demonstrated by the agency's recent conference on toxicity and aging. Of particular concern is how environmental pollutants contribute to chronic impairments and illnesses. In light of recent reports by the Office of Technology Assessment on the need for better environmental analysis and assessment related to aging, the conferees urge EPA to continue its efforts in this area working with its quality assurance support laboratory and in consultation with appropriate public health agencies.

Amendment No. 40: Appropriates $577,600,000 for abatement, control, and compliance as proposed by the House, instead of $572,600,000 as proposed by the Senate. The conferees are in agreement on the following changes from the budget request:

+$50,000,000 for the school asbestos abatement program.

+$5,000,000 for additional hazardous air pollution and NSPS activities. These funds will provide the abatement, control, and compliance costs of the NESHAP and NSPS regulatory work funded in amendment numbered 36.

+$5,000,000 for air toxics State grants,

+$5,000,000 for clean lakes,

+$4,750,000 for hazardous waste innovative State grants. The conferees direct that these funds be used to support innovative hazardous waste activities and approaches sponsored directly by local, State, regional and interstate governments.

+$4,000,000 for water quality State grants,

+$2,350,000 for the Rural Water Association,

+$2,000,000 for comprehensive estuarine management,

+$2,000,000 for academic training,

+$2,000,000 for wastewater treatment operator training. The conferees strongly support this activity and understand that the current level of effort can be maintained using carryover funds and this addition.

Amendment No. 41: Limits funds available for administrative expenses for the school asbestos abatement program to $4,000,000, instead of $5,000,000 as proposed by the House and $2,500,000 as proposed by the Senate. The conferees direct that $500,000 of these funds be used for asbestos air monitoring studies as specified in the House report. The bill includes requirements for Federally funded school absestos abatement projects to be conducted by trained, certified individuals. The conferees strongly support EPA's efforts to encourage State certification and training programs and urge the Agency to expand its absestos information and training program from three to six centers.

Amendment No. 42: Makes available $46,000,000 for school asbestos abatement loans and grants, instead of $45,000,000 as proposed by the House and $47,500,000 as proposed by Senate.

Amendment No. 43: Reported in technical disagreement. The managers in the part of the House will offer a motion to recede and concur in the amendment of the Senate substituting the word "persons" for the word "contractors" as proposed by the House.

Amendment No. 44: Deletes the words "by employees" proposed by the House and stricken by the Senate.

Amendment No. 45: Deletes provision proposed by the Senate earmarking $300,000 of safe drinking water State grants for the purchase of essential equipment by State agencies. The conferees understand that some States are experiencing a critical shortage of complex equipment needed to enforce the drinking water standards. They urge the Agency to be flexible in addressing these concerns.

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

PAYMENT TO THE HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

For payment, as repayable advances to the Hazardous Substance Response Trust Fund, when specifically authorized by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, such borrowed funds as may be necessary to carry out the purposes of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended.

HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

For necessary expenses to carry out the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, including sections 111(c)(3), (c)(5), (c)(6), and (e)(4) (42 U.S.C. 9611), $900,000,000, to be derived from the Hazardous Substance Response Trust Fund, to remain available until expended: Provided, That funds appropriated under this account may be allocated to other Federal agencies in accordance with section 111(a) of Public Law 96-510: Provided further, That for performance of specific activities in accordance with section 104(i) of Public Law 96-510, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, $21,000,000 shall be made available to the Department of Health and Human Services, to be derived by transfer from the Hazardous Substance Response Trust Fund, of which no less than $5,125,000 shall be available for toxicological testing of hazardous substances. For necessary expenses to carry out the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, not to exceed $90,000,000 shall be available for administrative expenses.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are in agreement that $900,000,000 be appropriated for the Hazardous Substance Response Trust Fund (Superfund) program for 1986. The House deferred all action on Superfund and the Senate amendment appropriated $1,200,000,000. This appropriation has been provided in advance of reauthorizing legislation because of the Conferee's concern that additional Superfund obligational authority be available immediately upon enactment of new legislation. The Superfund program has suffered from disruptions related to the lapse in authorization and the conferees wanted to avoid further possible delays in waiting for a supplemental appropriations Act. The conferees want to make clear, however, that except for approximately $60,000,000 of prior tax receipts, cost recoveries and interest due to the trust fund, the $900,000,000 appropriation cannot be obligated until taxing authority is enacted.

The conferees have agreed to the $900,000,000 level based on the Superfund program's ability to effectively use funds in 1986, given this year's unique circumstances. The delays in reauthorization have led to a "slowdown" of work at many sites, hiring has been frozen, and several months of the fall construction season have been lost. The $900,000,000 level does not in any manner suggest appropriate funding levels for future years. Once reauthorization is in place and the program's momentum regained, the conferees expect to provide funds to meet program needs that can be effectively absorbed in 1987 and beyond. Within the $900,000,000 provided, the conferees direct that an additional 100 workyears be provided to be evenly divided be-

tween enforcement and program management activities. These additional FTE should assist EPA in building its management capacity, integrating the requirements of new legislation, and setting the stage for an expanded and more effecitve Superfund program.

The administrative expense ceiling has also been increased by $90,000,000. This limitation increase will avoid possible furloughs or reductions-in-force of EPA staff or terminations of Superfund contracts, pending reauthorization in the near future. This level will also support all necessary administrative expenses for the $900,000,000 1986 program level, once legislation is enacted. The Senate proviso has also been included earmarking $21,000,000 for transfer to the Department of Health and Human Services, of which $5,125,000 is intended for toxicological testing.

The conferees have also adopted, with technical corrections, the Senate's provision on the payment to the hazardous substance response trust fund. This language provides appropriation authority for repayable advances to be made from the general fund to the hazardous substance response trust fund after specific authority is enacted in legislation. Once new Superfund taxes are imposed, there may be a several month lag before receipts are actually deposited in the hazardous substance response trust fund. Repayable advances will allow temporary borrowing from the Treasury, so that site cleanup work is not delayed. The conferees emphasize, however, that such repayable advances may not be made until specific authority is enacted.

EXECUTIVE OFFICE OF THE PRESIDENT

Amendment No. 47: Deletes language proposed by the Senate raising the travel ceiling for the Council on Environmental Quality to $16,000.

Amendment No. 48: Appropriates $700,000 for the Council on Environmental Quality as proposed by the House, instead of $732,000 as proposed by the Senate.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Amendment No. 49: Appropriates $120,000,000 for disaster relief as proposed by the Senate, instead of $194,000,000 as proposed by the House. Amendment numbered 94 reduces the appropriation by $20,000,000 to $100,000,000. The conferees agree to this reduction due to an increase of approximately $125,000,000 above the anticipated unobligated balance carried forward from fiscal year 1985. Expeditious consideration in a subsequent appropriations bill will be given should additional sums be necessary.

Amendment No. 50: Establishes the limitation on official reception and representation expenses at $1,500, instead of $1,000 as proposed by the House and $2,000 as proposed by the Senate.

Amendment No. 51: Appropriates $118,746,000 for salaries and expenses as proposed by the House, instead of $122,000,000 as proposed by the Senate. Amendment numbered 94 reduces the appropriation by $4,000,000 to $114,746,000. The conferees agreement includes funding for six positions to administer the emergency food and shelter program.

Amendment No. 52: Deletes language proposed by the House and stricken by the Senate establishing total and quarterly limitations on salary funds, limiting funds for headquarter management and administration activities, and listing the number of full-time equivalent employment by office. The Committee of Conference is aware of the Agency management's record of inadequate controls of funds and staff. In deleting the aforementioned provisions, the conferees agree that the Agency should not depart from the following limitations without the approval of the Committees on Appropriations:

a limitation of $92,545,000 on obligations for personnel compensation and benefits object classifications, including $24,001,000 for the first quarter and $22,848,000 for each of the three remaining quarters.

a limitation of $30,650,000 for headquarters management and administration activities.

a limitation on full-time equivalent employment of not less than 42 for the Office of Inspector General, and not more than 8 in the Office of the Director, 19 in the Office of General Counsel, 2 in Special Programs, 5 in the Executive Administrator's Office, 9 in the Office of Public Affairs, 6 in the Office of Congressional Relations, 6 in the Office of International Affairs, 5 in the Office of Equal Opportunity, 12 in the Office of Security, 32 in the Office of Acquisition Management, 43 in the Office of Personnel, 76 in the Office of the Comptroller, 8 in the Office of Program Analysis and Evaluation, 61 in the Office of Administration, 65 in Automatic Data Processing and 7 in the Office of Regional Operations.

The conferees are aware that some reductions in field employment may be necessary. The Agency is to consult with the Committees on Appropriations prior to any reductions in field employment.

Amendment No. 53: Appropriates $248,910,000 for emergency management planning and assistance as proposed by the House, instead of $271,182,000 as proposed by the Senate.

The Committee of Conference is in agreement with the following changes from the budget request:

+$6,700,000 for emergency management assistance grants.

+$3,800,000 for radiological defense grants to States.

+$5,852,000 for population protection.

+$4,000,000 for telecommunications and warning.

+$4,848,000 for civil defense training and education and training and fire programs. In receding to the House increase for civil defense training and education and training and fire programs, the conferees wish to make clear that the Agency has discretion as to how the funds are to be distributed and whether or not to establish a western training center.

−$8,652,000 as a general reduction to be applied at FEMA's discretion to civil defense, comprehensive emergency preparedness planning, Federal preparedness and training and fire programs, other than grants to States.

The Committee of Conference agrees that $1,000,000 of the national residential sprinkler program funds be used for retrofitting residential buildings. Of that amount, $500,000 is to be allocated to non-profit community based, national technical assistance, and housing development organizations with proven experience in arson prevention and housing development and $500,000 for projects to be directed at youth, elderly and handicapped (high-risk) populations.

Amendment No. 54: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate concerning the determination of premium rates under the National Flood Insurance program for Winfield, Kansas.

The Committee of Conference is aware of certain rate and regulatory changes proposed for the National Flood Insurance program. The conferees direct that the premium rate changes for flood insurance under any program established pursuant to the National Flood Insurance Act not be increased above five percent during fiscal year 1986. The conferees further direct that proposed regulations, which would permit imposition of a ten-percent copayment when a claimant files more than two claims in a ten-year period not be issued during fiscal year 1986. The conferees approve the Federal Insurance Administration's decision to advise all policyholders in a community placed on probation that a $25 surcharge will be imposed three months later if the community has not come into compliance with flood plain management requirements.

Amendment No. 55: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

NATIONAL INSURANCE DEVELOPMENT FUND

For one-time payments from the National Insurance Development Fund to participating Federal Crime Insurance Program States, as authorized by section 1242 of the Urban Property Protection and Reinsurance Act of 1968 as amended, not to exceed $10,000,000. Eligibility for payment under this appropriation shall be contingent upon certification by a State that it shall develop, on an expeditious basis, an alternative mechanism for providing access to crime insurance to all current Federal Crime Insurance policyholders in that State who apply. Such certification shall be made not later than 30 days following the effective date of this paragraph. Payments to each State shall be determined by the proportionate share of this amount based on the number of policies in force in each State, as of July 31, 1985. The Administrator of the Federal Insurance Administration, Federal Emergency Management Agency, shall provide such funds no later than 60 days following the effective date of this paragraph. This paragraph shall become effective on January 1, 1986: Provided, That the provisions of this paragraph, and eligibility for payments hereunder, shall not become effective or shall cease to be effective during any period that the authority of the Federal Crime Insurance Program for issuance of insurance policies is effective.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees recognize that a temporary reauthorization of the federal crime insurance program presently exists until November 14 and that a full reauthorization may be enacted by the Congress. The conferees agree that a reauthorization would have primacy, and that the funds and provisions in the appropriations Act would take effect only if no reauthorization is enacted prior to January 1, 1986.

Amendment No. 56: Deletes language proposed by the Senate appropriating $5,000,000 for a transition to independence demonstration project.

Amendment No. 57: Restores language proposed by the House and stricken by the Senate providing the terms and conditions for distributing the emergency food and shelter funds only through the Federal Emergency Management Agency, instead of

through the Federal Emergency Management Agency and subsequently transitioning to the Department of Housing and Urban Development as proposed by the Senate.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Amendment No. 58: Appropriates $1,988,000 for the Office of Consumer Affairs as proposed by the House, instead of $2,028,000 as proposed by the Senate.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Amendment No. 59: Appropriates $2,756,800,000 for research and development as proposed by the House, instead of $2,775,800,000 as proposed by the Senate. The conferees agree that within this amount the following reductions are made from the budget request:

Space Station— −$25,000,000. The conferees have included a total of $205,000,000 for space station activities including $5,000,000 which is available only for automation and robotic activities. Specifically, the Committee of Conference directs that the $5,000,000 be used for delivery of a flight telerobotic system at the time of initial space station operational capability for a mobile remote manipulator for station assembly and maintenance and a smart front end on the orbital maneuvering vehicle for remote operations and servicing.

Solar Optical Telescope— −$25,000,000. The conferees agree that the agency may reallocate up to an additional $5,000,000 for solar optical telescope with the approval of the Committees on Appropriations.

Life Sciences— −$4,000,000.

Mars Observer— −$5,000,000.

Scatterometer— −$17,000,000.

Upper Atmospheric Research Satellite— −$10,000,000.

Advanced Communications Technology Satellite— −$5,000,000.

Commercial Programs— −$13,000,000.

The conferees agree that within the $41,100,000 requested for commercial programs the agency may, at its discretion, apply the reduction to the commercial use of space and the technology utilization subactivities.

Orbital Maneuvering Vehicle— −$15,000,000.

Space Transportation System—Capability Development— −$5,000,000.

General Reduction— −$1,000,000.

The Committee of Conference also agrees to "cap" the fiscal year 1986 amounts for a number of programs. In accordance with the agreement as outlined in a letter from NASA to the Committees dated August 9, 1984, these "caps", may not be lifted without the approval of the Committee on Appropriations.

Space Station—$205,000,000.

Upper Stages—$122,000,000.

Orbital Maneuvering Vehicle—$10,000,000.

Space Telescope—$127,800,000.

Solar Optical Telescope—$5,000,000 with an additional $5,000,000 available with the approval of the Committees on Appropriations.

Gamma Ray Observatory—$87,300,000.

Galileo—$39,700,000.

Scatterometer—$14,000,000.

Upper Atmospheric Research Satellite—$124,000,000.

Commercial Programs—$28,100,000.

Amendment No. 60: Deletes language proposed by the House "capping" space station expenditures in fiscal year 1986 at $200,000,000.

Amendment No. 61: Appropriates $3,397,900,000 for space flight, control and data communications instead of $3,402,900,000 as proposed by the House and $3,382,900,000 as proposed by the Senate. The conferees agree that the reduction from the budget request should be applied as follows:

1. −$107,000,000 from the repayment of the loan principal to the Federal Financial Bank for the tracking and data relay satellite system

2. −$5,000,000 as a general reduction to be applied at the discretion of the agency.

Amendment No. 62: Appropriates $139,300,000 for construction of facilities as proposed by the House instead of $141,300,000 as proposed by the Senate. The conferees agree that of the $10,000,000 reduction from the budget request the agency must apply such reduction to the $8,000,000 requested for construction of a spacecraft systems development innovation facility at the Goddard Space Flight Center, or the $8,900,000 requested for construction of a microdevices laboratory at the Jet Propulsion Laboratory, or an alternative discrete project of approximately the same funding level. The balance of the reduction may be applied at the agency's discretion.

The National Space Technology Laboratories (NSTL) was established more than 20 years ago to handle all of NASA heavy lift rocket engine acceptance testing in the foreseeable future. Therefore, the conferees prohibit the expenditure of any funds in this bill for modification of a test stand at Marshall Space Flight Center (MSFC) until the Administrator of NASA verifies to the Committees in both the House and the Senate that the modifications will, in no way, alter the role of NSTL as the only heavy lift liquid rocket engine test facility and, further, that these and other modifications at MSFC will never be for the purpose of acceptance testing at that facility.

Amendment No. 63: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *: Provided further, That the Administrator may authorize such facility lease or construction, if he determines, in consultation with the Committees on Appropriations, that deferral of such action until the enactment of the next appropriation Act would be inconsistent with the interest of the Nation in aeronautical and space activities*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree that no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use and support of a contract or contracts with the National Aeronautics and Space Administration without the approval of the Committees on Appropriations.

Amendment No. 64: Appropriates $1,367,000,000 for research and program management as proposed by the House instead of $1,370,000,000 as proposed by the Senate. Amendment numbered 94 reduces the appropriation by an additional $5,000,000 to $1,362,000,000. The conferees urge that the reduction be taken in non-personnel compensation and benefits object classes and request that a report be submitted to the Committees on Appropriations by December 1, 1985 indicating how the offsetting reduction will be applied.

Amendment No. 65: Deletes language proposed by the Senate providing for continuation of a flat rate per diem system for employee travel of the National Aeronautics and Space Administration.

Amendment No. 66: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *: Provided further, That of funds provided for the National Aeronautics and Space Administration under this or any other account, $400,000 shall be available for the activities of the National Commission on Space, established by the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361; 98 Stat. 422)*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 67: Deletes language proposed by the Senate extending the authority of the National Commission on Space from 12 months to 18 months.

Amendment No. 68: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing for the transfer of title of the Mississippi Technology Transfer center to the Government of the United States for operation by the Government of the United States.

NATIONAL SCIENCE FOUNDATION

Amendment No. 69: Appropriates $1,352,205,000 for research and related activities instead of $1,347,205,000 as proposed by the House and $1,361,000,000 as proposed by the Senate. The conferees agree that within the funds provided sufficient resources shall be made available to maintain the advance scientific computing program, the ocean drilling program, and research programs that enhance minority and women's participation at the fiscal year 1986 budget request. In addition, $5,000,000 has been included above the amount provided by the House for other activities selected at the agency's discretion, provided that such activities be submitted for approval of the Committees on Appropriations.

The conferees further agree that not to exceed $500,000 shall be made available for *programmatic support* for the International Institute for Applied Systems Analysis (IIASA). Any funding provided above that level must be made available through the normal peer review process. In that context, the conferees note that the competitive merit based peer review process is the primary means by which the NSF makes project award decisions. This approach helps maintain the health of this Nation's basic research enterprise by supporting the most promising fundamental research. The conferees reaffirm their support for this review process as the primary mechanism for selection of research and instrumentation proposals for large scale centers or facilities.

Amendment No. 70: Provides $72,500,000 for program development and management instead of $71,743,000 as proposed by the House and $73,000,000 as proposed by the Senate.

Amendment No. 71: Provides $3,450,000 for travel expenses of the National Science Foundation instead of $3,300,000 as proposed by the House $3,600,000 as proposed by the Senate.

Amendment No. 72: Restores matter inserted by the House and stricken by the Senate providing that not to exceed $8,000,000 shall be available for the very

long baseline array; amended to provide not to exceed $9,000,000.

The bill includes language providing for permanent authority to indemnify various entities associated with the ocean drilling program. The conferees understand that the authorization committees intend to review the necessity and effectiveness of the NSF indemnification policy. Therefore, the conferees agree that this language may be amended after consultation with the legislative committees to provide that such indemnification will be available only during fiscal year 1986.

Amendment No. 73: Appropriates $115,100,000 for the United States Antarctic Program activities as proposed by the House instead of $113,100,000 as proposed by the Senate.

Amendment No. 74: Appropriates $55,550,000 for science education activities instead of $60,550,000 as proposed by the House and $50,550,000 as proposed by the Senate. The conferees agree that no funds shall be made available for a congressional merit scholarship program.

NEIGHBORHOOD REINVESTMENT CORPORATION

Amendment No. 75: Appropriates $17,669,000 for payment to the Neighborhood Reinvestment Corporation as proposed by the House instead of $16,669,000 as proposed by the Senate.

DEPARTMENT OF THE TREASURY

Amendment No. 76: Restores language proposed by the House and stricken by the Senate reducing the $4,566,700,000 appropriation for general revenue sharing payments by $1,141,675,000 to $3,425,025,000 through elimination of the fourth quarter payment, amended to reduce the appropriation by $381,700,000 to $4,185,000,000 through a reduction in the fourth quarter payment.

Amendment No. 77: Appropriates $7,800,000 for the Office of Revenue Sharing, Salaries and Expenses, as proposed by the Senate instead of $8,000,000 as proposed by the House. Amendment numbered 94 reduces the appropriation by $85,800 to $7,714,200.

VETERANS ADMINISTRATION

Amendment No. 78: Appropriates $826,000,000 for readjustment benefits as proposed by the Senate, instead of $1,026,000,000 as proposed by the House.

Amendment No. 79: Appropriates $9,255,694,000 for medical care instead of $9,368,694,000 as proposed by the House and $9,162,694,000 as proposed by the Senate.

The conferees agree that the funding provided will support an average employment of 193,941 and direct the VA to immediately distribute the funds and personnel ceilings to the hospital directors. While the specific areas of reduction are to be taken at the discretion of the VA, the committee of conference is aware of a number of areas in which savings from the assumptions in the budget request are possible.

Areas of consideration in effecting savings include:

over $30,000,000 in funds carried forward for 1985

an estimated savings of $16,000,000 due to lower than anticipated employee health benefits costs

an estimated savings of $20,000,000 by postponing the upgrading of telephone equipment

savings realized from the implementation of a means test

savings resulting from a trend in lower average salary costs which began in 1985

The conferees agree with the concept of the Senate report establishing a separate activity for the purchase of advanced technology medical equipment in excess of $500,000. Up to $10,000,000 is provided for the pilot program. This is in addition to the existing equipment programs and is restricted to VA facilities where other non-federal sources commit to financing at least 50 percent of the acquisition costs.

The amount of funding is specifically intended to support 193,941 full-time equivalent employees (FTEEs) with the understanding that, in accordance with established Congressional practice, any additional pay costs necessary to support that FTEE level will be borne by the VA, using funds made available by this measure, funds made available through the enactment of supplemental appropriations, or through absorption of the costs, or some combination thereof. This FTEE level does not include common services FTEEs.

Amendment No. 80: Appropriates $191,370,000 for medical and prosthetic research as proposed by the Senate, instead of $195,840,000 as proposed by the House. Amendment numbered 94 reduces the appropriation by $2,105,070 to $189,264,930. The conferees agree that $1,500,000 of the $3,800,000 requested for the Agent Orange Study be conducted by the Centers for Disease Control is not required in 1986. The VA may use the potential savings to offset required reductions.

This amount of funding is specifically intended to support not more than 4,348 full-time equivalent employees (FTEEs) with the understanding that, in accordance with established Congressional practice, any additional pay costs necessary to support that FTEE level will be borne by the VA, using funds made available by this measure, funds made available through the enactment of supplemental appropriations, or through absorption of the costs, or some combination thereof. This FTEE level does not include common services FTEEs.

Amendment No. 81: Appropriates $57,119,000 for medical administration and miscellaneous operating expenses as proposed by the Senate, instead of $61,119,000 as proposed by the House. Amendment numbered 94 reduces the appropriation by $3,595,309 to $53,523,619.

This amount of funding is specifically intended to support not more than 753 full-time equivalent employees (FTEEs) with the understanding that, in accordance with established Congressional practice, any additional pay costs necessary to support that FTEE level will be borne by the VA, using funds made available by this measure, funds made available through the enactment of supplemental appropriations, or through absorption of the costs, or some combination thereof. This FTEE level does not include common services FTEEs.

Amendment No. 82: Appropriates $760,060,000 for general operating expenses as proposed by the Senate, instead of $760,547,000 as proposed by the House. Amendment numbered 94 reduces the appropriation by $23,195,660 to $736,864,340. The reduction in funding is to be applied at the discretion of the Veterans Administration to activities other than the Board of Contract Appeals and the Board of Veterans Appeals.

Amendment No. 83: Restores language proposed by the House and stricken by the Senate providing not to exceed 40 full-time equivalent employment for the Office of Planning and Program Evaluation, amended to limit employment to 53 FTEEs.

Amendment No. 84: Appropriates $507,360,000 for construction, major projects, instead of $516,160,000 as proposed by the House and $486,600,000 as proposed by the Senate.

The approved major construction projects are the same as carried in House Report 99-212, except for the clinical addition project at Philadelphia. The conference agreement reduces the increase for the Philadelphia project by $8,800,000 (the estimated cost of the parking garage) to $89,600,000. This amount, together with $17,700,000 appropriated in 1985 will provide for a total of $119,300,000. While the funding for the parking garage component of the overall project has been deleted, the conferees agree that the parking garage may be built providing it can be accomplished within the total available for the project.

The conferees direct the VA to proceed with the design of a 60-bed nursing home care unit at Wilkes-Barre and the research and education facility at White River Junction in 1986. It is anticipated that the funds for construction of both projects will be included in the fiscal year 1987 budget request for major construction.

Amendment No. 85: Appropriates $144,400,000 for construction, minor projects as proposed by the House, instead of $145,406,000 as proposed by the Senate. Amendment numbered 94 reduces the appropriation by $7,449,908 to $136,950,092.

Amendment No. 86: Appropriates $200,000,000 for the loan guaranty revolving fund as proposed by the Senate, instead of $235,000,000 as proposed by the House.

FEDERAL HOME LOAN BANK BOARD

Amendment No. 87: Establishes $26,877,000 as the limitation on administrative expenses of the Federal Home Loan Bank Board as proposed by the Senate, instead of $26,213,000 as proposed by the House.

Amendment No. 88: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate limiting funds available for State examiner training to $500,000 and funds available for official reception and representation expenses to $1,500.

Amendment No. 89: Deletes provisos proposed by the House and stricken by the Senate limiting funds available for official reception and representation expenses to $1,500 and requiring that not less than $500,000 shall be available for State examiner training.

Amendment No. 90: Establishes $1,440,000 as the limitation on administrative expenses of the Federal Savings and Loan Insurance Corporation as proposed by the Senate, instead of $1,404,000 as proposed by the House.

Amendment No. 91: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *to site-related travel under the Solid Waste Disposal Act as amended;*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees believe that the unpredictable demands and emergency nature of work at many RCRA facilities justifies the exclusion of such site-related travel from the statutory ceiling.

Amendment No. 92: Reported in technical disagreement. The managers on the part of

the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *: Provided further, That if appropriations in titles I and II exceed the amounts set forth in budget estimates initially submitted for such appropriations, the expenditures for travel may correspondingly exceed the amounts therefor set forth in the estimates in the same proportion*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are in agreement that as appropriation add-ons are made for programs above the budget request, the corresponding travel ceilings shall be increased proportionally.

Amendment No. 93: Deletes language proposed by the Senate providing authority for up to two percent transfers among appropriation accounts in the Environmental Protection Agency's operating budget accounts. The conferees understand that funding constraints are most severe in EPA's intramural research program. This problem has been addressed specifically in amendment numbered 36, with an increase of $2,260,000 provided for intramural research equipment and support costs.

The conferees remain concerned that continuing budgeting constraints and reductions, especially in administrative accounts, may force agency managers to institute personnel actions involving furloughs or reductions-in-force. Generally, such actions result in greater program inefficiencies through loss of morale as well as added separation costs. Furthermore, shifts in program fund utilization to cover personnel costs to avoid such personnel impacts may also yield a less than optimal application of available budgeting resources.

The conferees therefore direct each agency to prepare revised financial plans, including object class analyses, for the utilization of the budgetary resources provided in this bill for fiscal year 1986. The Committees on Appropriations of the House of Representatives and the Senate expect prompt notification of any substantial administrative or programmatic problem which may require Congressional adjustment during the balance of this fiscal year.

While the conferees would prefer to provide some measure of flexibility to transfer budgeting resources between discretionary administrative and program accounts, such authority is Constitutionally impermissible if subject to statutory Congressional approval. Absent and authorized to be drawn from the Federal Treasury, following enactment of appropriating legislation, the conferees cannot view as advisable or appropriate such transfer authority.

Amendment No. 94: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

SEC. 416. Notwithstanding any other provision of this Act, amounts otherwise provided by this Act for the following accounts and activities are reduced by the following amounts:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

"Congregate services", $29,700;

"Housing counseling assistance", $38,500;

"Federal housing administration fund (limitation on gross obligations for direct loans under section 230(a) of the National Housing Act, as amended)", $981,442;

COMMUNITY PLANNING AND DEVELOPMENT

"Community development grants (limitation on total commitments to guarantee loans)", $2,475,000;

"Urban homesteading", $132,000;

FAIR HOUSING AND EQUAL OPPORTUNITY

"Fair Housing assistance", $73,700;

INDEPENDENT AGENCIES

AMERICAN BATTLE MONUMENTS COMMISSION

"Salaries and expenses", $120,494;

ENVIRONMENTAL PROTECTION AGENCY

"Salaries and expenses", $6,000,000;

EXECUTIVE OFFICE OF THE PRESIDENT

"Office of science and technology policy", $25,773;

FEDERAL EMERGENCY MANAGEMENT AGENCY

"Disaster relief", $20,000,000;

"Salaries and expenses", $4,000,000;

"National flood insurance fund (appropriation)", $1,021,372;

"National flood insurance fund (transfer to 'Salaries and expenses')", $96,360;

"National flood insurance fund (transfer to 'Emergency management planning and assistance')", $503,250;

"National flood insurance fund (earmark, of transfered funds, for expenses under section 1362 of the National Flood Insurance Act of 1968, as amended)", $52,558;

GENERAL SERVICES ADMINISTRATION

"Consumer information center (appropriation)", $13,739;

"Consumer information center (limitation on administrative expenses)", $17,941;

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

"Research and program management", $5,000,000;

NATIONAL CREDIT UNION ADMINISTRATION

"Central liquidity facility (limitation on new loans)", $6,600,000;

"Central liquidity facility (limitation on administrative expenses)", $9,350;

SELECTIVE SERVICE SYSTEM

"Salaries and expenses", $305,580;

DEPARTMENT OF THE TREASURY

"Office of revenue sharing, salaries and expenses", $85,800;

VETERANS ADMINISTRATION

"Medical and prosthetic research", $2,105,070;

"Medical administration and miscellaneous operating expenses", $3,595,309;

"General operating expenses", $23,195,660;

"Construction, minor projects (appropriations)", $7,449,908;

"Construction, minor projects (limitation on expenses of the office of construction)", $399,443;

"Grants for construction of State extended care facilities", $242,000;

"Grants for construction of State veterans cemeteries", $33,000;

"Grants to the Republic of the Philippines", $5,500;

"Direct loan revolving fund (limitation on direct loans)", $11,000.

SEC. 417. Any funds appropriated in a previous Act for construction grants under Title II of the Clean Water Act shall be made available immediately and shall not be limited to phases or segments of previously funded projects.

This Act may be cited as the "Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1986 recommended by the Committee of Conference, with comparisons to the fiscal year 1985 amount, the 1986 budget estimates, and the House and Senate bills for 1986 follow:

New budget (obligational) authority, fiscal year 1985	$60,410,060,775
Budget estimates of new (obligational) authority, fiscal year 1986	50,144,230,000
House bill, fiscal year 1986	55,402,513,781
Senate bill, fiscal year 1986	55,593,663,572
Conference agreement, fiscal year 1986	57,290,141,490
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1985	−3,119,919,285
Budget estimates of new (obligational) authority, fiscal year 1986	+7,145,911,490
House bill, fiscal year 1986	+1,887,627,709
Senate bill, fiscal year 1986	+1,696,477,918

EDWARD P. BOLAND,

Managers on the Part of the Senate.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LIPINSKI) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. NELSON of Florida, for 5 minutes today.

Mr. GONZALEZ, for 60 minutes, today.

Mr. LIPINSKI, for 15 minutes, today.

Mr. SKELTON, for 30 minutes, today.
Mr. GAYDOS for 30 minutes, on November 12.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. WEBER) and to include extraneous matter:)

Mr. LOTT.
Mr. JEFFORDS.
Mr. BROYHILL.
Mr. LEWIS of Florida in two instances.
Mr. COURTER.

(The following Members (at the request of Mr. LIPINSKI) and to include extraneous matter:)

Mr. STALLINGS.
Mr. SOLARZ in two instances.
Mr. SAVAGE.
Mr. TORRES.
Mr. LELAND.
Mr. MAVROULES.
Mr. MATSUI.

SENATE ENROLLED JOINT RESOLUTIONS SIGNED

The SPEAKER pro tempore announced his signature to enrolled joint resolutions of the Senate of the following title:

S.J. Res. 29. Joint resolution designating the week of November 11 through November 17, 1985, as "National Reye's Syndrome Week";

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week"; and

S.J. Res. 130. Joint resolution designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week."

ADJOURNMENT

Mr. SKELTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 32 minutes a.m.) under its previous order, the House adjourned until Tuesday, November 12, 1985, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2231. A letter from the Acting Secretary of Defense (Force Management and Personnel), transmitting the annual report and audit of the American National Red Cross, pursuant to 36 U.S.C. 6; to the Committee on Armed Services.

2232. A letter from the Secretary of Energy transmitting the annual report for fiscal year 1984 on Federal Government energy management, pursuant to Public Law 95-619, section 550; to the Committee on Energy and Commerce.

2233. A letter from the Secretary, Interstate Commerce Commission, transmitting notice of the Commission's determination to extend the time periods for acting on the appeals in Nos. 39669, *Newell Enterprises, Inc., et al* v. *The Atchison, Topeka and Santa Fe Railway Company et. al.*, and No. 39706, *U.S. Reduction Co.* v. *Louisville & Nashville Railroad Co. et al.*, pursuant to 49 U.S.C. 10327(k)(2); to the Committee on Energy and Commerce.

2234. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of the political contributions by Paul M. Cleveland, of Florida, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to New Zealand, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2235. A letter from the Adjutant General, Veterans of Foreign Wars of the United States, transmitting a report and financial audit, pursuant to Public Law 88-504, section 3(36 U.S.C. 1103); to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLAND: Committee of conference. Conference report on H.R. 3038 (Rept. 99-363). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BILIRAKIS:

H.R. 3715. A bill to amend title II of the Social Security Act to provide in certain cases for the payment of widow's, widower's, mother's, or father's insurance benefits to an otherwise eligible person who would qualify for such benefits as the insured individual's widow or widower except for the fact that (at the time of their marriage) such individual already had a legal spouse of whose existence such person was unaware; to the Committee on Ways and Means.

By Mr. FAUNTROY:

H.R. 3716. A bill to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds for nonprofit projects; to the Committee on the District of Columbia.

H.R. 3717. A bill to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds; to the Committee on the District of Columbia.

By Mr. FAUNTROY (for himself, Mr. DELLUMS, Mr. MCKINNEY, Mr. BLILEY, Mr. BARNES, Mr. PARRIS, and Mr. DYMALLY):

H.R. 3718. A bill to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds; to the Committee on the District of Columbia.

By Mr. YOUNG of Missouri:

H.J. Res. 447. Joint resolution to designate the week of January 19, 1986, through January 25, 1986, as National Jaycee Week; to the Committee on Post Office and Civil Service.

By BROYHILL (for himself, Mr. SYNAR, Mr. WRIGHT, Mr. MICHEL, Mr. DINGELL, Mr. SHARP, Mr. DANNEMEYER, Mr. FLORIO, Mr. RITTER, Mr. TAUZIN, Mr. RALPH M. HALL, Mr. WOLPE, Mr. FIELDS, Mr. TALLON, Mr. DURBIN, Mr. RICHARDSON, Mr. TAUKE, Mr. OBERSTAR, Mr. MCMILLAN, and Mr. BRYANT):

H. Res. 315. Resolution expressing the sense of the House of Representatives that natural gas pipelines should transport natural gas for any person, and should do so in a nondiscriminatory manner; to the Committee on Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII,

280. The SPEAKER presented a memorial of the Senate of the State of Michigan, relative to Miroslav Medvid; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. EVANS of Iowa:

H.R. 3719. A bill to extend the patent numbered 3,408,747 for a period of 10 years; to the Committee on the Judiciary.

By Mr. OWENS:

H.R. 3720. A bill for the relief of Epifanio de Guzman; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 468: Mr. DENNY SMITH.

H.R. 864: Mr. PERKINS.

H.R. 1207: Mr. VALENTINE, Mr. GINGRICH, Mr. KEMP, Mr. FOLEY, and Mr. LEWIS of California.

H.R. 2440: Mr. MAZZOLI and Mr. NELSON of Florida.

H.R. 2684: Mr. WYDEN, Mr. GILMAN, Mr. SOLOMON, Mr. ROBINSON, Mr. WHITLEY, Mr. ROTH, Mr. HATCHER, Mr. ROWLAND of Georgia, Mr. BREAUX, Mr. HARTNETT, Mr. BOULTER, Mr. LUNDINE, and Mr. CAMPBELL.

H.R. 2700: Mr. LEVINE of California, Mr. HAWKINS, Mr. ATKINS, Mr. ERDREICH, and Mr. HERTEL of Michigan.

H.R. 3024: Mr. BADHAM, Mr. SABO, Mr. BIAGGI, Ms. MIKULSKI, Mr. SWEENEY, Mr. FIELDS, Mr. WISE, Mr. DWYER of New Jersey, Mr. BATES, Mr. SKELTON, Mr. WHITEHURST, Mr. DELAY, Mr. FUSTER, and Mr. BOUCHER.

H.R. 3692: Mr. CALLAHAN.

H.J. Res. 421: Mr. BILIRAKIS, Mr. YOUNG of Alaska, Mrs. LLOYD, Mr. DARDEN, Mr. STENHOLM, and Mr. SUNIA.

H. Con. Res. 213: Mr. LUKEN and Mr. REID.

H. Con. Res. 227: Mr. DASCHLE, Mr. PENNY, Mr. CARR, Mr. BRYANT, Mr. BIAGGI, Ms. OAKAR, Mr. BARNES, Mr. KANJORSKI, Mr. SHAW, Mr. MOAKLEY, Mr. BOUCHER, Mr. CONYERS, Mrs. BENTLEY, Mr. MILLER of California, Mr. SEIBERLING, Mr. CHAPMAN, Mr. PANETTA, Mr. SPRATT, Ms. MIKULSKI, Mr. APPLEGATE, and Mr. STUDDS.

H. Con. Res. 228: Mr. BARNES, Mr. ZSCHAU, and Mr. SOLOMON.

H. Res. 12: Mr. KILDEE.

H. Res. 310: Mr. HERTEL of Michigan, Ms. FIEDLER, Mr. PURSELL, Ms. OAKAR, Mr. PARRIS, Mr. BROOMFIELD, Mr. MCEWEN, Mrs. BYRON, Mr. FOGLIETTA, Mr. MOLLOHAN, Mr. SILJANDER, Mr. COBEY, Mr. ECKERT of New York, Mr. LEWIS of California, Mr. MCKERNAN, and Mr. MCCAIN.

H. Res. 314: Mr. HAMILTON, Mr. LEVINE of California, Mr. FASCELL, Mr. WOLPE, Ms. SNOWE, Mr. HYDE, Mr. LAGOMARSINO, Mr. SMITH of Florida, Mr. SMITH of New Jersey, Mr. WEISS, Mr. ZSCHAU, and Mr. BEREUTER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

248. By the SPEAKER: Petition of Levy P. Asuncion, Quezon City, Philippines, relative to citizenship; to the Committee on the Judiciary.

249. Also, petition of Manuel G. Brasileno, Kalibo, Aklan, Philippines, relative to citizenship; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

ENERGY INDEPENDENCE AND THE NEGATIVE IMPACT OF CHANGES IN THE INTERNAL REVENUE CODE

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. BRYANT. Mr. Speaker, yesterday during an Energy and Commerce Subcommittee on Fossils and Synthetic Fuels, the members heard testimony from representatives of the independent oil and gas producers who told us that the proposals put forth by both the Treasury and the Ways and Means Committee staff would devastate the industry. Among the witnesses was the Honorable Mack Wallace, the chairman of the Texas Railroad Commission. I commend his comments to my colleagues for their serious consideration when we are asked to make choices to change our Tax Code. We must ask ourselves the question: Are we willing to sacrifice energy independence as the price of tax reform?

The comments follow:

Mr. Chairman, Members of the Committee: My name is Mack Wallace. I am a member of the Railroad Commission of Texas. I am also Co-Chairman of the Council for a Secure America and I am pleased to have this opportunity to submit testimony on behalf of the Council regarding the impact tax reform proposals would have on our energy resources as they relate to our national security.

When I speak of U.S. national security throughout my remarks, I must include in that term the security of the state of Israel—that small but strategic stretch of earth which embodies those staunchly democratic ideals we hold so dear in America. Israel is the only truly democratic ally we have in the Middle East and its geographic location makes its destiny akin to our own. Our futures and the security of our respective nations are intertwined. Our concerns for the development of a viable domestic oil and gas industry is mutual. Our security at home and our foreign policy abroad depend on America's ability to supply the vast majority of its own energy requirements in times of world crisis.

America currently is absorbed in a rather intense national debate over tax reform. While I certainly claim no special expertise with our country's complex tax code, I do know something about energy and I can tell you that regardless of long-term merits of revising this current tax code, this is most definitely not the time to make substantive changes that will effect the nation's energy portfolio. It is the worst time.

These tax proposals will have a tremendous impact on the nation's ability to produce oil and gas.

If implemented, any changes in existing energy tax treatment will do irreparable damage to our national security by crippling one of our most basic and strategic industries.

The existing code, as it is applied to the search for and production of energy, from its inception demonstrated our government's support and recognition of the need to preserve an industry that is absolutely essential to this nation's security.

It has allowed America to drill almost 80 percent of all the oil and gas wells drilled in the world.

Absent this recognition by our government, we will not see much, if any, meaningful exploration.

Today, the plight of the small farmer in the United States who fed this nation for so long is the analogue of the small, independent driller who has drilled almost 90 percent of the exploratory or wildcat wells in this country.

Does this government really want to kill the goose that laid the golden egg? I refuse to believe it.

There is far more at stake than just the survival of an oil and gas industry. The entire American consuming public will suffer needlessly and the security of the nation will be placed in jeopardy.

Any governmental action that has the effect of hindering or stopping the exploration for needed oil and gas reserves will be nothing short of a national disaster.

The public interest is best served by thoughtful policies that will assure a growing, rather than a dwindling, supply of the nation's primary energy resources.

As this debate continues, we face a most serious problem and our responsibility to the people is, indeed, a heavy one.

Seventy-five percent of the crude oil produced in the world is produced by governments—not oil companies. The production of oil and gas, therefore, becomes an instrument of foreign policy.

Do we want to inflict injury upon ourselves by so crippling our own domestic industry to the point of furthering our dependence on unstable, foreign sources of crude oil and crude oil products? I think, most emphatically, not.

The nation also currently is struggling over our trade deficit—almost 50 percent of which comes from crude oil and crude oil products.

Crude oil and crude oil product imports into this nation at a rate of approximately 5 million barrels a day continue to enhance our dependence on unstable, foreign sources.

Since 1972, the cost of crude oil and crude oil product imports into the United States has totaled $548.92 billion.

If this amount had been expended on domestic exploration budgets, we would have had much greater production at home.

The distinguished geologist, Dr. William L. Fisher, a former Assistant Secretary of Interior and present Director of the Bureau of Economic Geology at the University of Texas, said recently that the natural gas situation is "bleak" in Texas, noting that "a generation of government intrusion into the market from the 1950's on through the NGPA of 1978 has taken its toll."

In the last dozen years, we have experienced curtailments of supply twice and surpluses twice. The result has been a severe erosion of market confidence in natural gas as a reliable supply source.

In 1950, one of my predecessors on the Railroad Commission, Lt. Gen. Ernest O. Thompson, warned the House Ways and Means Committee about the national security significance of government incentives for domestic exploration.

Here, more than 30 years later, Congress is considering tampering with it again.

The bottom line is that domestic oil and gas keep our nation protected. In the past, it was said an army traveled on its stomach. Today, an army travels on gasoline, jet fuel and oil. Our ships, planes, tanks, trucks and missiles are worthless pieces of junk without oil and gasoline.

I consider it indisputable that our national security requires an active, prosperous domestic oil and gas producing industry.

Of course, we all know that foreign oil could, and probably would, be denied us in time of a national security crisis.

Congressmen, it is my considered judgment that we cannot afford as a Nation to tamper with a proven system of incentives.

We simply do not have the ready reserve oil producing capacity for our national security.

In times of crisis or war, there will be no time to drill oil and gas wells. To be useful, those wells must have already been drilled.

Reserves lying undrilled are of little value in time of emergency. These wells must have already been drilled, equipped and ready to produce. They must be hooked up and connected to pipelines and to refineries of ample capacity, ready to make the products required in sufficient quantities and of proper quality.

I urge this Committee and Congress to take no action that would remove incentives for the small operators to continue in the oil and gas industry. The small operator is a critical element of today's oil and gas industry because much of our exploration and development is shifting from hunts for the giant, or elephant fields, to a universe populated with many smaller fields.

Ninety-eight percent of these fields are less than 1 million barrels of oil or oil equivalent and most are no more than 500,000 barrels in size.

While we may be beyond elephant hunting, these smaller deposits have aided materially in leveling out the decline in production; in sum, they can provide a substantial boost in this country's oil and gas reserves.

Typically, these small deposits are developed by the small operator since they are suited to his operations and interests. And the tax incentives under consideration may spell the difference in survival for those operators.

Present incentives are absolutely necessary, for it is simply the case that a domestic producer—no matter how efficient he may be—cannot compete with his 12 barrel per day oil well with a 30,000 barrel per day well produced by a government lease.

The roots of this nation's—and any nation's—wealth is in agriculture, minerals and energy. Fundamentally, the drafters of these proposed revisions would apparently

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

have Congress ignore these resources and the fact that we produced ourselves to greatness. It is these resources that form the real basis for a sound balanced economy and a good life for our citizens. Thus, I cannot agree with those who state that we are in a post-industrial society where those in the service industry reign supreme.

How can such a modern society function? Are we to survive by taking in each other's laundry? By directing the operation of a national hamburger chain? By developing a new formula for frying chicken?

To the contrary, rather than moving toward an exclusively service-oriented society here in the United States, I urge that we take those steps necessary to retain our basic industries and to provide them with incentives to remain strong and viable. Otherwise, it is my great concern that we will end up having exported all of our fundamental industries, including manufacturing, with the result that ultimately, we will be exporting our basic raw commodities and important finished goods.

I urge this distinguished Committee and the members on it to help this country return to its earlier goal of energy independence by recognizing the strategic importance of our energy resources to our national security.

AMERICA—THE BEACON OF HUMANITY

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. FUQUA. Mr. Speaker, one of the most outstanding members of the Federal judiciary is the Honorable William H. Stafford, Jr., chief judge of the U.S. District Court for the Northern District of Florida.

In the November issue of "The New Age," the national publication of the Scottish Rite Masonry in the Southern Jurisdiction, an article authored by Judge Stafford was presented. It is outstanding.

I am asking that this article entitled "America—The Beacon of Humanity" be reprinted in these pages for truly that which Judge Stafford has to say is timeless. I commend it to you for your reading and reflection.

[From the New Age, November 1985]

AMERICA—THE BEACON OF HUMANITY

(By William H. Stafford, Jr., Chief Judge, U.S. District Court for the Northern District of Florida, United States Courthouse, 110 E. Park Avenue, Tallahassee, Florida 32301

America is the beacon for humanity because we live here under the rule of law. Our enemies are the enemies of freedom, who through tyranny compel obedience to the rule of man, to whatever individual or group is then in despotic control. Consider if you will how many people have tried to sail into Cuba. When was the last time anyone was caught going east over the Berlin Wall? Who was the last person to flee to the Soviet Union?

As we see oppressed peoples continue to seek entry into America, even illegally, we must know that our system of government, made strong by free enterprise and assured of continued leadership through public education, is what draws these people to our shores. So, it is well that we should take stock of what we have, whence we came and where we are going.

The Declaration of Independence boldly pronounced:

"We hold these truths to be self-evident that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed."

The challenge remained to translate these beliefs into a workable form of government. The Constitutional Convention which met in 1787 produced a basic document for a new experience—a new system in which the government recevies its only powers from the consent of the governed.

There are many ways in which we can make an appraisal of how well this system has worked. We are still the strongest, richest and the most charitable nation on Earth. Our citizens have more freedom than has ever been known in the history of civilization. Our public school system, while certainly not perfect, has provided each citizen with opportunity for all the education any of us could desire, to free us from the illiteracy prevailing in much of the world. We care about our young, our old and our sick, and manifest this concern through various programs, both public and private. We are free to worship according to our particular religious beliefs—or not to have any religion at all—absolutely without fear of government interference. The press and other forms of the media are free to criticize the government, and those in government, without the bridle of government censorship.

It is well for us to remember that the Constitution—the basic document itself—did not become a reality until the State conventions ratified it. So, at the outset, the American people, themselves, decided what kind of government they would have.

Those wise men who declared independence and then drafted the framework for our system of government were also practical men who realized that all wisdom would not die with them. They built into the Constitution a method to change it—when the people wanted it changed.

Thus, this noble experiment, self-government, began with a built-in system for orderly change. The new Nation grew and prospered. Contrasting economies, lifestyles and attitudes, fueled by the slavery issue, plunged our Country into a terrible Civil War. Abraham Lincoln said: "No man is good enough to govern another man without that other's consent." The Nation weathered the agony of that war between its own States, freed its slaves and gave them the right to vote.

The United States continued its growth and emerged from World War I as a world power. Like many other countries, it suffered through a worldwide business depression, but recovered to lead the free world to victory in World War II.

George Washington said: "There is a rank due to the United States among nations, which will be withheld, if not absolutely lost, by the reputation of weakness." No sooner, it seemed, had our brave men and women returned from Europe and the Pacific, when our international commitments sent them, and their younger brothers and sisters, far away to help a small country called South Korea maintain its freedom and independence from the Communists invading from the north.

As America continued to spread its influence over this planet, and in space, the last three decades have seen changes at home, too. The words "civil rights" took on a different meaning. A Roman Catholic was elected President. A black man and a woman were appointed to the Supreme Court. Separate but equal school facilities were declared unconstitutional. America kept its treaty commitments in Southeast Asia.

As various groups pressed for more rights, the system responded when the people through their elected and appointed officials deemed the change was needed.

The poll tax, arbitrarily used to deny some citizens their right to vote, so shocked the conscience of the American public that the people abolised it by the 24th Amendment in 1964.

The young people of this Country, who through the years had contended that the Nation which had so many times called on them to fight its wars abroad should give them the right to vote at home, found their dream realized when the 26th Amendment was adopted on July 5, 1971. This, like all other Amendments to the Constitution, came about only through ratification by three-fourths of the States.

This brief trip back through American history demonstrates that the Constitution, while giving this Nation the stability it needs, also provides the means to make the changes in our framework when the people feel those changes are needed. Chief Justice John Marshall observed in 1821: "The people made the Constitution, and the people can unmake it. It is the creature of their own will, and lives only by their will."

Each generation of Americans has had its own challenges and problems. The events of the past several years, while unique in our Country's history, have nevertheless been resolved within the framework of a system of laws. These events might have caused other nations to collapse; but here the rule of law prevailed and our Republic survives. The greatness that is America is that we have been able to resolve our conflicts and deal with our problems in an orderly society governed by the rule of law.

Those brave men 200 years ago pledged their lives, their fortunes and their sacred honor in the cause of independence. Because of their sacrifices, we received our freedom as a birthright and we have a duty to preserve it for those who will follow us.

In summary, the words that President and Brother Gerald Ford spoke during the Nation's Bicentennial, are equally appropriate today.

"Liberty is a living flame to be fed, not dead ashes to be revered . . . though prosperity is a good thing, though compassionate charity is a good thing, though institutional reform is a good thing, a nation survives only so long as the spirit of sacrifice and self-discipline is strong within its people. . . . Independence has to be defended as well as declared; freedom is always worth fighting for, and liberty ultimately belongs only to those willing to fight for it."

EDUCATION SAVINGS ACCOUNTS

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. JEFFORDS. Mr. Speaker, I am introducing a bill that will encourage self-help and long-range financial planning for parents who will face the ever-increasing costs of higher education. Our Federal tax policy has few incentives for savings and investment, and our citizens save significantly less of their earnings than their counterparts in other major industrialized nations. We must look for ways to reverse these trends. This bill is a step in that direction.

Studies indicate that most parents don't start anticipating college costs until they actually have to pay the bills. According to a recent report published by the American Council on Education, only about half of those families with incomes between $20,000 and $30,000 are currently saving for their children's education, and they are saving on average of only $466 per year. A second report indicated that just over two-fifths of the families of college students had saved for college costs, and the median amount saved was only $2,500. A substantial amount of those who saved did not begin to put money aside until their college-bound children were already in high school.

Putting children through college isn't getting any easier. Despite a decline in inflation, college costs have continued to rise. In 1985, the average increase was between 7 and 9 percent, despite an inflation rate of less than half that amount. Some parents face college costs as high as $15,000 or more. Most families simply do not have the wherewithal to pay college costs out of pocket. Unless we can create incentives for families to save for these costs over a period of years, higher education—especially private colleges and universities—could become the domain of the wealthy.

The bill provides for the creation of an education savings account. The underlying structure for this custodial account is based on the IRA model, a savings vehicle which is widely understood and has been widely used by the public. An education savings account is not a revolutionary idea. In his State of the Union Address on January 25, 1983, President Reagan announced that he favored legislation authorizing the establishment of such accounts. In addition, during this session of Congress, seven other bills have been introduced which establish such accounts.

Generally, these other bills allow taxpayers to deduct from income amounts contributed to accounts set aside for later payment of college expenses. My bill differs from these others because it allows for a credit—rather than a deduction—for the amounts set aside. As a rule, deductions tend to favor higher bracket taxpayers. For a taxpayer in the 50-percent bracket, for example, a deduction of $1,000 represents a tax savings of $500; but for a taxpayer in the 33-percent tax bracket, a $1,000 deduction represents only $330 in taxes saved. Unlike a deduction, a credit has the same net effect on all taxpayers, high-bracket or low-bracket.

This legislation would give a tax credit of up to $500 per year for amounts contributed to education savings accounts established on behalf of a taxpayer's children. A taxpayer figuring his tax liability on April 14 and finding that he owed the Government $600 could contribute $500 to an education savings account, claim the tax credit, and pay the Internal Revenue Service the remaining $100. The $500 figure is indexed for inflation.

Deposits in the education savings account would accumulate interest tax free; they would not be included in the income of the student when used to pay for costs of attendance at a postsecondary institution—a college, university, or vocational school. Funds must be distributed by the time the beneficiary of the account attains the age of 26. At that time the trust assets revert to the contributor, who becomes liable for income tax on amounts remaining in the account, together with a 10-percent penalty. These accounts may continue to exist past the year in which the beneficiary reaches age 26 if the beneficiary has served time in the Armed Forces, the Peace Corps, or VISTA. The bill also permits rollovers of any excess amounts remaining in an educational savings account to an account established on behalf of another child.

To insure that the credit doesn't become a vehicle for wealthy taxpayers to shelter income, my bill makes the credit unavailable for taxpayers with taxable income in excess of $60,000. This figure is also adjusted for inflation. In addition, to encourage lower income taxpayers to establish such an account, the bill provides that amounts contributed to such accounts shall not be considered as part of the needs analysis in determining a student's eligibility for financial assistance under title IV of the Higher Education Act of 1965. Needs analysis has had the incongruous result of providing greater Federal assistance for families who have accumulated no savings for college expenses than for families who have had the foresight to save. My bill attempts to remedy that inequity with respect to moneys set aside in education savings accounts.

Accumulation of interest in education savings accounts placed with financial institutions should have a beneficial effect on our Nation's savings rate. Through competitive advertising and promotion, these institutions will play an important role in educating the public and encouraging savings. Because of the widespread current use of IRA's, public acceptance should be readily forthcoming. Taxpayers will not need the services of tax lawyers or accountants to establish the education savings account.

I am introducing this bill now for very important reasons. The House and Senate currently are involved in tax reform. So far, however, I have been extremely disappointed in the proposals I have seen because they would reduce tax expenditures for education significantly, from $15 billion down to as low as $1.5 billion.

I am hopeful that the committees in the House will recognize that this is no time to cut back on tax expenditures in the education area. It is possible they may disagree over exactly where those tax expenditures should be placed. That alone is one reason they should consider this an important element of tax reform.

The argument for considering this now is all the more buttressed by the fact the Federal Government is being confronted with more and more people trying to rely on Federal assistance to provide college educations. It is my strong hope that, in providing a tax incentive for people to save, that trend can be changed—and, therefore, costs to the taxpayers substantially reduced.

Mr. Speaker, between 1979 and 1984, the average annual costs at public colleges rose 50 percent. At private colleges, the increase was 63 percent. Meeting these costs is a major burden for the American family. An educated populace is of critical importance to our Nation's future. High quality postsecondary education is essential to our future role as a world leader. It is time we took the necessary steps to help families meet the burdens imposed by the costs of higher education. It's time we looked for ways to use the Tax Code to work for education. I urge my colleagues to join me in sponsoring this bill.

U.S. POSTAL SERVICE IS A BARGAIN

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. HUBBARD. Mr. Speaker, I represent 24 counties in western Kentucky. The First Congressional District is filled with small towns and rural areas, all of which are expertly taken care of by the post offices and their employees.

I would like to take this opportunity to share with my colleagues the excellent letter that I received from Ardell Fields, postmaster of Hickman, KY. Ardell has written to me about his strong opposition to any proposals that would permit the delivery of first-class mail by private commercial carriers.

I agree with Postmaster Ardell Fields and with the many others who have contacted me about this issue. I urge my colleagues to read his letter and reflect upon just how much of a bargain it really is to mail a first-class letter for 22 cents. The letter to me from Ardell Fields follows:

HICKMAN, KY,
September 17, 1985.

Hon. CARROLL HUBBARD, Jr.,
House of Representatives,
Washington, DC.

DEAR CARROLL: President Reagan's new budget director, Mr. Miller, has the idea of permitting the delivery of first-class mail by private commercial carriers. This greatly disturbes me. I do not believe that he nor anyone who may believe in this is aware of

the facts regarding this matter and the bargain the American public is now receiving from the U.S. Postal Service.

A twenty-two-cent, first-class letter is now getting delivery to any spot in this United States, whether it be from Bangor, Maine, to San Diego, California; Hickman, Kentucky, to Pikeville, Kentucky, or just one block down the street in New York City. Your newsletter is getting delivery to every constituent in your district. All of these services are performed by the U.S. Postal Service for a small fee.

But, if a private carrier begins raking off the cream of this worldwide service by targeting selective areas, then the mail service to rural America will suffer a sad blow indeed.

This selective service was given to the private parcel carriers; this selective service is rendered by the private overnight delivery carrier; but the U.S. Postal Service is the only carrier that serves all of the people of America, regardless of where they live.

Mr. Miller's statement that the U.S. Postal Service is a deficit problem is a gross error. The Postal Service is self-sustaining and will remain so without subsidy. If he is to be our policy maker, we should never allow him to crucify our worthiness.

Carroll, there are many more benefits from the U.S. Postal Service. I hope and know that you will give this concern of mine your consideration and support us in our effort to give the American public, our customers, the best postal service that a dollar can buy. This well balanced, conservative priced service can only be continued by the U.S. Postal Service retaining the Private Express Statute.

Many thanks for your past services and looking forward to many more. If I can be of any help, please call.

Sincerely yours,

ANDRELL FIELDS,
Postmaster.

"STAR WARS" THE BATTLE INTENSIFIES

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. FRANK. Mr. Speaker, we tend to throw the term "distinguished" around in this institution rather lightly. But when Members refer to the gentleman from Florida [Mr. BENNETT], as our "distinguished colleague", we do so with deep sincerity. CHARLES BENNETT from Florida has been an exemplary Member of this institution: His seriousness of purpose, his dedication, and his commitment to the national interest as he sees it are models for all of us to follow. Many of us have been particularly impressed by his willingness to look clearly at issues of national security, drawing on his own considerable expertise about the military, and his long years of service on the Armed Services Committee.

No one can deny that CHARLIE BENNETT has been a staunch defender of measures necessary to keep America strong. He has an outstanding record as an advocate of a solid American defense. But characteristically, although he has been a strong advocate of building our defenses, CHARLIE BENNETT has not hesitated to speak out against Pentagon plans—or plans of a President—when he believes them to be an unwise expenditure of national resource, or when he thinks that they may endanger rather than enhance our security.

On Monday of this week, Mr. BENNETT published in The Christian Science Monitor an excellent article making the case against the President's current posture regarding the strategic defense initiative. I ask that Mr. BENNETT's excellent analysis of the flaws in the President's position be printed here.

[From the Christian Science Monitor, Nov. 4, 1985]

"STAR WARS": THE BATTLE INTENSIFIES

(By Charles E. Bennett)

(Charles E. Bennett (D) of Florida is a senior member of the House Armed Services Committee and a member of the Research and Development Subcommittee, which authorizes SDI funds)

The national debate over the Strategic Defense Initiative (SDI) has been gaining momentum since President Reagan's 1983 "star wars" speech. Now it seems to be entering a new, more-intensive phase.

Confusion in the administration as to the various meanings of the ABM Treaty has now raised fundamental questions among our NATO allies and within the Congress about the United States' commitment to international treaties. This has added to existing concern about the feasibility, survivability, and cost of President Reagan's vision for SDI. This is so because the SDI is an outgrowth of the antiballistic missile systems covered by the ABM Treaty, namely systems that can destroy in coming warheads.

On Oct. 6, national-security adviser Robert McFarlane dropped a bombshell when he asserted that the US was not legally bound by the ABM Treaty from developing the new, exotic ABM weapons envisaged in the SDI program. The zigzagging that followed now seems to have resolved into a curious, and as far as I know, unique position. The administration has told Congress and our allies that a new interpretation of the 13-year-old treaty shows that a "broad" interpretation is justified, which would allow the testing and development of ABM systems based on lasers and particle beams. The administration, however, says that while it could legally go beyond basic research, it will not. That could change, it is implied, after the Geneva summit, or after the 1986 elections, or after the first SDI weapon is ready for tests.

State Department legal adviser Abraham Sofaer conceded to Congress that he could not name another instance where the official US interpretation of an international treaty and the US policy with regard to that treaty were at variance. Beyond the immediate arms control implications, the allies are understandably worried that if the United States can reinterpret this treaty, it could do the same with other international agreements, including whatever may come from Geneva.

While there may be some legalistic arguments about what exactly the ABM treaty says, the more basic question is: Why is the administration raising this issue now? Why should we question one of the few working arms control treaties weeks before President Reagan's first meeting with the Soviet leader? Would it not be better to suggest changes or clarifications at these talks?

At least one faction of the administration has little regard for arms control treaties and wants to base the future security of the country on space weapons. This view is receiving strong support from the defense industries. With the scent of a possible trillion-dollar program in the air, defense contractors are scrambling to get a piece of the action. Foreign support is being sought with the temptation of overseas contracts. Industry here and abroad knows that if the government pumps enough money fast enough into this program, within a few years there will be a strong lobby which will make SDI hard to stop, even if it is not in the best national interest.

So even though the SDI is officially a research program, there seem to be many people who have already decided star wars can work. Congress has not; the scientific data are not yet that sanguine.

Many members of Congress are increasingly concerned about SDI. New studies, such as that recently done by the nonpartisan Office of Technology Assessment, seriously question the feasibility and advisability of the system. The OTA report concludes that the popularized notion of star wars as a "shield" that could render nuclear weapons "impotent and obsolete" is simply not possible. More likely, the SDI program could develop futuristic weapons for a new version of the ABM system proposed in the 1960s—a system that could protect our missiles against Soviet warheads.

But even this more-limited goal might not be worth the effort. The OTA and other analysts note that if both the US and the Soviet Union had ABM systems that worked, we might actually *reduce* our retaliatory capacity to respond to a Soviet first strike. Our defenses might protect most of our missiles over here, but they would be destroyed over there by Soviet defenses. The net result would be fewer US warheads striking their targets than if there were no defenses at all.

Moreover, if a space weapon can shoot down missiles, it can also shoot down other space weapons. Defense Secretary Caspar Weinberger contended in this newspaper recently that SDI is stabilizing and it "could provide defensive security with resulting reduction in nuclear risk." The OTA report reached the opposite conclusion. It indicated that if both sides had space weapons, "an extremely unstable situation would arise." Each side would have an incentive to "use or lose" its weapons.

There is also the question of money. The first, seven years of SDI research are planned to cost $33 billion (fiscal year 1984-90). Full deployment of the system could cost $1 trillion. Where are we going to get these funds? Mr. Weinberger argues in the Monitor, "Techonologies developed through SDI research could be useful in European defense and have implications for conventional defenses . . . SDI capability against intermediate nuclear forces would enhance conventional deterrence by increasing survivability of NATO defenses in Europe." While some of this may be true, I am concerned, along with former Secretary of Defense James Schlesinger and the NATO commander, Gen. Bernard Rogers, that SDI directly competes for the resources needed for our conventional forces. Is the dream of an ABM system worth cutting our ability to meet the more likely threat of a conventional attack in Europe?

I am worried about possible violations by the Soviets of the ABM Treaty, such as their radar at Krasnoyarsk. But I am also

worried about handing the Soviets a convenient loophole to deploy new ABM systems by our new "reinterpretation" of the treaty. Last month Weinberger sent all members of Congress a pamphlet on the Soviets' ABM program which warned of this threat. Now we seem to be giving them legal grounds to do so.

What happens now? Congress has trimmed the President's SDI budget this year, and future restrictions can be expected. There is broad support for a reasonable research program, and I agree with that. There is wariness over testing and deployment, and I agree with that as well. Budgetary and diplomatic consideration may weaken congressional support for SDI even as the administration and the defense industry to build it.

President Reagan should use his present strong barganing position to negotiate at Geneva a limit on the development of space weapons on both sides. In return he could get Soviet agreement for serious reductions in offensive nuclear forces. Mr. Gorbachev has indicated a willingness to do so, and Soviet concern over the administration's new interpretation of the ABM Treaty might encourage additional Soviet concessions.

If the present administration maneuvering is designed to gain negotiating leverage, it is brilliant. If it is the successful effort of a handful of officials to scuttle arms control talks in favor of SDI deployment, it is a tragedy not only for the United States, but for the world.

PIPELINES SHOULD TRANSPORT NATURAL GAS ON A NONDISCRIMINATORY BASIS

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. BROYHILL. Mr. Speaker, today, I am introducing a resolution expressing the sense of the House that natural gas pipelines should transport natural gas for any person, and should do so in a nondiscriminatory manner. Since November 1, hundreds of consumers all across the country have been deprived of transportation service for low-cost natural gas. These consumers are being required to pay more for natural gas, in some cases as much as 100 percent more, because interstate natural gas pipelines do not wish to transport natural gas for others on a nondiscriminatory basis. The purpose of this resolution is to let these pipelines know that this House does not look with favor upon the decisions they have made.

The U.S. Court of Appeals for the District of Columbia Circuit determined last May that the transportation programs being carried out by interstate pipelines violated the Natural Gas Act because only certain producers and consumers could use those programs. The Federal Energy Regulatory Commission was given until November 1 to promulgate a new transportation program that would provide nondiscriminatory access to natural gas transportation. The Commission issued order 436 on October 9 in compliance with the Natural Gas Act, the Natural Gas Policy Act of 1978, and the decisions of the court in Maryland People's Counsel versus FERC, Nos. 84-1019, 84-1029, and 84-1090.

Order 436 provides that, with a few exceptions, if a pipeline transports natural gas for anyone, it must transport natural gas for everyone on the same general terms and conditions. Unfortunately, when faced with the choice of transporting for everyone on a nondiscriminatory basis, or transporting for virtually no one, most major pipelines are choosing not to transport. Those receiving transportation under the old, illegal programs have been cut off abruptly. Consumers previously unable to get low-cost natural gas supplies because they were ineligible for transportation remain shut out of the market for low-cost gas.

This situation is intolerable. Independent producers are producing only 60 percent of the natural gas they could produce while some steel companies will be forced to switch to oil or shut down entirely. The high natural gas prices these plants face make them unable to compete with foreign manufacturers.

Now, when the trade deficit is running at record levels, is no time to handicap American industries. Now, as we enter the winter heating season, is no time to tell consumers that they cannot have low-priced natural gas.

As the list of those Members joining me in introducing this resolution reveals, this is not a partisan issue. This is not a producer versus consumer issue. This is an issue vital to the commerce and well being of the entire Nation. I urge all of my colleagues to cosponsor this resolution and to let the interstate pipelines know that the House expects them to provide transportation service for all, without discrimination and without further delay.

RETIREMENT INCOME POLICY ACT OF 1985

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. CHANDLER. Mr. Speaker, I have become increasingly concerned about the lack of an articulated national retirement policy. This concern is growing as more emphasis is placed on deficit reduction. Good tax policy is not necessarily good retirement income policy. We must reevaluate where we are and where we are going in terms of our ultimate goal—a good retirement income for all Americans to live in dignity and economic security.

Because of my deep interest in this subject and my belief that this country must fashion a sound retirement policy, I am cosponsoring the Retirement Income Policy Act of 1985. We have a policy of sorts now, but its one that has simply evolved over the years. This patchwork approach came about in recent years as a result of tax legislation with little coordinated attempt to take into consideration the effects on retirement income.

New policy should be set, not by taking narrow, short-sighted approaches to retirement issues, but by fully recognizing the impact that retirement decisions have on the economy as a whole and the implications that today's retirement decisions will have for the decades ahead. Retirement policies should not create financial burdens which will become unacceptable and unsupportable by future workers, but instead should encourage savings, investment and productivity in a fiscally sound manner.

The Education and Labor Committee and its Subcommittee on Labor-Management, on which I serve, completed hearings earlier this year focusing on what business, organized labor and pension groups think should be included in a national retirement income policy. Meetings were held with similar groups in creating the Retirement Income Policy Act of 1985.

This legislation provides a framework to discuss future objectives. A sound retirement plan rests upon Social Security, an employer-sponsored plan and personal savings—the so-called three-legged stool. This bill recognizes the importance of such an approach and encourages the growth of the current voluntary system of employer-sponsored retirement plans. It increases the number of people covered under private pension plans and opens the door to address portability. When the baby-boom generation begins to retire shortly after the start of the next century, retirement income sources, especially Social Security, will be strained to the breaking point. We must take steps to provide incentives for increased retirement savings. This legislation further begins the discussion of ways for all businesses, including smaller companies, to have private pension plans.

Recently legislated changes in tax policy relating to pension plans have not only caused confusion, but have not increased tax revenue significantly—for example, reductions in dollar contributions and benefits in the Tax Equity and Fiscal Responsibility Act of 1982. On the other hand, expansion of the IRA's in the Economic Recovery Act of 1981 have added to revenue losses. These examples indicate the need to step back and form a policy.

It is time for Congress to adopt a comprehensive and consistent national retirement income policy. There appears to be a national consensus for programs that provide economic security and protection against economic risks. There is also a national consensus for tax incentives to encourage employer provision of these programs and individual savings. The challenge is to clearly articulate how various programs fit into the economic security system. The challenge is ours. The Retirement Income Security Act of 1985 can provide the vital first step.

THE 1 DAY PLUS PROGRAM

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. LELAND. Mr. Speaker, in March of this year the city of Houston initiated a program designed to hire black youth. The Houston chapter of the NAACP launched 1 Day Plus to put teenagers to work for at least 1 day, with the hope that 1 day's employment would lead to a month, an entire summer and ideally the beginning of a career.

The 1 Day Plus Program was designed to better understand the complications and programs of black youth unemployment and to establish an effective program to minimize these problems.

My Houston office participated in the 1 Day Plus Program by hiring Cheryl Green, a Houston resident, for the month of July. I hope that the experience was beneficial for Cheryl and I know that it was for the staff in my Houston office.

I would like to share a copy of the resolution creating the 1 Day Plus Appreciation Day in Houston and I have submitted it in the CONGRESSIONAL RECORD. I believe this is an exciting idea and I hope that my colleagues would consider a similar program in their communities.

The resolution follows:

ONE DAY PLUS COMMITTEE APPRECIATION DAY

Whereas, according to the Bureau of Labor Statistics the unemployment rate among Black youth in Houston currently stands at 38.9 percent, and in recognition of the need for a program that would encourage the increased hiring of Black youth, the Houston Chapter of the NAACP launched One Day Plus in March, 1985, to put teenagers into the work force for at least one day, with the hope that one day's employment will lead to a month, an entire summer or even the beginning of a career; and

Whereas, the goals of the program are to target and understand complications and problems of Black youth unemployment, to establish an effective and meaningful program of employment to combat and minimize the effects of those problems, to provide counseling and job preparation and to establish a liaison between Black youths and those businesses and individuals willing to provide meaningful employment; and

Now, therefore, be it Resolved that the Mayor and the City Council of the City of Houston do hereby cite and commend the NAACP, the many businesses and individuals and the following volunteers: Yvette Chargois, Arva Brackins, Keith Branch, Anita Dabney, Gloria Cooke, Walt Jeter, Sylvester Turner, Ann LaDee, Ann Bonner, Vivian Bradford, Ed Banks, Vernice Bell, Charles Davis, Judson Robinson, III, Vivian Stewart, Nelson Jones, Simone Capers, Gregori Grantham, Donald Hodo, Rusty Sanford, Mr. and Mrs. Moses Lery and Bob Dean, who donated their time, talent and energies to make this program a success.

TRIBUTE TO CHINESE WORKERS OF 19TH CENTURY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. MATSUI. Mr. Speaker, I rise today to call attention to a group of workers who, despite years of back-breaking labor for the benefit of our land and people, have remained anonymous and relatively unnoticed in the course of our history. I refer, Mr. Speaker, to the Chinese farmers and levee builders of only one century ago.

On November 12, 1985, Mr. Peter Leung, in cooperation with the Chinese community and with support from the University of California at Davis Chancellor's Arts & Humanities Award, is honoring these devoted laborers by opening an historic exhibition entitled, "A Documentary Photographic Project of the Early Chinese Farming Experience in the Sacramento River Delta." The exhibition is the culmination of Mr. Leung's meticulous investigation of workers through sparse and scanty records and the recollections of the Chinese elderly.

Ordinarily, when one is asked about the role of the Chinese in the 19th century, he conjures images of countless transcontinental railroad workmen. This, however, is only a fraction of the story. Between 1850 and 1880, hundreds of Chinese laborers picked, shoveled and wheelbarrowed throughout the Sacramento-San Joaquin Delta, erecting the first levees that reclaimed some 88,000 acres from the tule swamps and freed the land to become what is today one of the most productive agricultural centers of the world.

Famine in China in the 1850's drove the Chinese to America. Chasing the same myths of golden mountains that triggered the American gold rush, Chinese men came to California seeking riches. What they found was work, and a pay of 13½ cents for every cubic yard of earth they picked and hauled.

Arduously they labored until 1892, when the clamshell dredge revolutionized levee construction by digging earth faster and more cheaply than paid labor. Suddenly unemployed, many of the Chinese went back through the rugged mountain passes of the Sierra, the Rockies, and the Cascades to complete the railroad. Others, lonely for their homeland and families, went back to China.

Mr. Speaker, this great Nation was built by the sweat and muscle of people from all over the world. On behalf of the people of Sacramento, I pay tribute to the industrious, indefatigable Chinese workers of the Sacramento Delta. I also thank and commend Mr. Leung, UC Davis and the Chinese community for their commitment to the recognition of the Chinese levee builders of the 19th century and for providing the people of the United States with this vital exhibition.

A CALL TO REMEMBRANCE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. SOLARZ. Mr. Speaker, it was 6 months ago that the United States celebrated the 40th anniversary of our victory in Europe in World War II. While our country and our World War II Allies were recalling V-E Day, people in the Federal Republic of Germany were also reflecting upon the decisive importance of May 8, 1945.

As part of West Germany's commemoration of the end of the war in Europe, the President of the Federal Republic, Richard Von Weizsacker, delivered a very meaningful and moving address on the Holocaust and the Second World War:

Anyone who closes his eyes to the past is blind to the present.

Mr. Von Weizsacker said:

Whoever refuses to remember the inhumanity is prone to risks of new infection. The Jewish nation remembers and will always remember. We seek reconciliation. Precisely for this reason, we must understand that there can be no reconciliation without remembrance.

With the recent groundbreaking for the U.S. Holocaust Memorial Museum, our country has rededicated itself to the task of remembrance. I would like to submit for the RECORD an eloquent appeal to remembrance, the speech given by President Richard Von Weizsacker in the Bundestag on May 8, 1985.

SPEECH BY RICHARD VON WEIZSACKER, PRESIDENT OF THE FEDERAL REPUBLIC OF GERMANY

I

Many nations are today commemorating the date on which World War II ended in Europe. Every nation is doing so with different feelings, depending on its fate. Be it victory or defeat, liberation from injustice and alien rule or transition to new dependence, division, new alliances, vast shifts of power—May 8, 1945, is a date of decisive historical importance for Europe.

We Germans are commemorating that date amongst ourselves, as is indeed necessary. We must find our own standards. We are not assisted in this task if we or others spare our feelings. We need and we have the strength to look truth straight in the eye—without embellishment and without distortion.

For us, the 8th of May is above all a date to remember what people had to suffer. It is also a date to reflect on the course taken by our history. The greater honesty we show in commemorating this day, the freer we are to face the consequences with due responsibility. For us Germans, May 8 is not a day of celebration. Those who actually witnessed that day in 1945 think back on highly personal and hence highly different experiences. Some returned home, others lost their homes. Some were liberated, while for others it was the start of captivity. Many were simply grateful that the bombing at night and fear had passed and that they had survived. Others felt first and foremost grief at the complete defeat suf-

fered by their country. Some Germans felt bitterness about their shattered illusions, while others were grateful for the gift of a new start.

It was difficult to find one's bearings straightaway. Uncertainty prevailed throughout the country. The military capitulation was unconditional, placing out destiny in the hands of our enemies. The past had been terrible, especially for many of those enemies, too. Would they not make us pay many times over for what we had done to them? Most Germans had believed that they were fighting and suffering for the good of their country. And now it turned out that their efforts were not only in vain and futile, but had served the inhuman goals of a criminal regime. The feelings of most people were those of exhaustion, despair and new anxiety. Had one's next of kin survived? Did a new start from those ruins make sense at all? Looking back, they saw the dark abyss of the past and, looking forward, they saw and uncertain, dark future.

Yet with every day something became clearer, and this must be stated on behalf of all of us today. The 8th of May was a day of liberation. It liberated all of us from the inhumanity and tyranny of the National Socialist regime.

Nobody will, because of that liberation, forget the grave suffering that only started for many people on May 8. But we must not regard the end of the war as the cause of flight, expulsion and deprivation of freedom. The cause goes back to the start of the tyranny that brought about war. We must not separate May 8, 1985, from January 30, 1933.

There is truly no reason for us today to participate in victory celebrations. But there is every reason for us to perceive May 8, 1985, as the end of an aberration in German history, and end bearing seeds of hope for a better future.

II

May 8 is a day of remembrance. Remembering means recalling an occurrence honestly and undistortedly so that it becomes a part of our very beings. This places high demands on our truthfulness.

Today we mourn all the dead of the war and the tyranny. In particular we commemorate the six million Jews who were murdered in German concentration camps. We commemorate all nations who suffered in the war, especially the countless citizens of the Soviet Union and Poland who lost their lives. As Germans, we mourn our own compatriots who perished as soldiers, during air raids at home, in captivity or during expulsion. We commemorate the Sinti and Romany Gypsies, the homosexuals and the mentally ill who were killed, as well as the people who had to die for their religious or political beliefs. We commemorate the hostages who were executed. We recall the victims of the resistance movements in all the countries occupied by us. As Germans, we pay homage to the victims of the German resistance—among the public, the military, the churches, the workers and trade unions, and the Communists. We commemorate those who did not actively resist, but preferred to die instead of violating their consciences.

Alongside the endless army of the dead, mountains of human suffering arise—grief over the dead, suffering from injury or crippling or barbarous compulsory sterilization, suffering during the air raids, during flight and expulsion, suffering because of rape and pillage, forced labor, injustice and torture, hunger and hardship, suffering because of fear of arrest and death, grief at the loss of everything which one had wrongly believed in and worked for. Today we sorrowfully recall all this human suffering.

Perhaps the greatest burden was borne by the women of all nations. Their suffering, renunciation and silent strength are all too easily forgotten by history. Filled with fear, they worked, bore human life and protected it. They mourned their fallen fathers and sons, husbands, brothers and friends. In the years of darkness, they ensured that the light of humanity was not extinguished. After the war, with no prospect of a secure future, women everywhere were the first to set about building homes again, the "rubble women" in Berlin and elsewhere. When the men who had survived returned, women had to take a back seat again. Because of the war, many women were left alone and spent their lives in solitude. Yet it is first and foremost thanks to the women that nations did not disintegrate spiritually on account of the destruction, devastation, atrocities and inhumanity and that they gradually regained their foothold after the war.

III

At the root of the tyranny was Hitler's immeasurable hatred against our Jewish compatriots. Hitler had never concealed this hatred from the public, but made the entire nation a tool of it. Only a day before his death, on April 30, 1945, he concluded his so-called will with the words: "Above all, I call upon the leaders of the nation and their followers to observe painstakingly the race laws and to oppose ruthlessly the poisoners of all nations: international Jewry." Hardly any country has in its history always remained free from blame for war or violence. The genocide of the Jews is, however, unparalleled in history.

The perpetration of this crime was in the hands of a few people. It was concealed from the eyes of the public, but every German was able to experience what his Jewish compatriots had to suffer, ranging from plain apathy and hidden intolerance to outright hatred. Who could remain unsuspecting after the burning of the synagogues, the plundering, the stigmatization with the Star of David, the deprivation of rights, the ceaseless violation of human dignity? Whoever opened his eyes and ears and sought information could not fail to notice that Jews were being deported. The nature and scope of the destruction may have exceeded human imagination, but in reality there was, apart from the crime itself, the attempt by too many people, including those of my generation, who were young and were not involved in planning the events and carrying them out, not to take note of what was happening. There were many ways of not burdening one's conscience, of shunning responsibility, looking away, keeping mum. When the unspeakable truth of the holocaust then became known at the end of the war, all too many of us claimed that they had not known anything about it or even suspected anything.

There is no such thing as the guilt or innocence of an entire nation. Guilt is, like innocence, not collective, but personal. There is discovered or concealed individual guilt. There is guilt which people acknowledge or deny. Everyone who directly experienced that era should today quietly ask himself about his involvement then.

The vast majority of today's population were either children then or had not been born. They cannot profess a quilt of their own for crimes that they did not commit. No discerning person can expect them to wear a penitential robe simply because they are Germans. But their forefathers have left them a grave legacy. All of us, whether guilty or not, whether old or young, must accept the past. We are all affected by its consequences and liable for it. The young and old generations must and can help each other to understand why it is vital to keep alive the memories. It is not a case of coming to term with the past. That is not possible. It cannot be subsequently modified or made not to have happend. However, anyone who closes his eyes to the past is blind to the present. Whoever refuses to remember the inhumanity is prone to new risks of infection.

The Jewish nation remembers and will always remember. We seek reconciliation. Precisely for this reason we must understand that there can be no reconciliation without remembrance. The experience of millionfold death is part of the very being of every Jew in the world, not only because people cannot forget such atrocities, but also because remembrance is part of the Jewish faith.

"Seeking to forget makes exile all the longer. The secret of redemption lies in remembrance." This oft-quoted Jewish adage surely expresses the idea that faith in God is faith in the work of God in history. Remembrance is experience of the work of God in history. It is the source of faith in redemption. This experience creates hope, creates faith in redemption, in reunification of the divided, in reconciliation. Whoever forgets this experience loses his faith.

If we for our part sought to forget what has occurred, instead of remembering it, this would not only be inhuman. We would also impinge upon the faith of the Jews who survived and destroy the basis of reconciliation. We must erect a memorial to thoughts and feelings in our own hearts.

IV

The 8th of May marks a deep cut not only in German history but in the history of Europe as a whole. The European civil war had come to an end the old world of Europe lay in ruins. "Europe had fought itself to a standstill" (M. Stürmer). The meeting of American and Soviet Russian soldiers on the Elbe became a symbol for the temporary end of a European era.

True, all this was deeply rooted in history. For a century, Europe had suffered under the clash of extreme nationalistic aspirations, at the end of the First World War peace treaties were signed but they lacked the power to foster peace. Once more nationalistic passions flared up and were fanned by the distress of the people at that time.

Along the road to disaster Hitler became the driving force. He whipped up and exploited mass hysteria. A weak democracy was incapable of stopping him. And even the powers of Western Europe—in Churchill's judgment unsuspecting but not without guilt—contributed through their weakness to this fateful trend. After the First World War America had withdrawn and in the thirties had no influence on Europe.

Hitler wanted to dominate Europe and to do so through war. He looked for and found an excuse in Poland. On May 23, 1939, he told the German generals: "No further successes can be gained without bloodshed . . . Danzig is not the objective. Our aim is to extend our Lebensruam in the East and safeguard food supplies . . . so there is no question of sparing Poland. And there re-

mains the decison to attack Poland at the first suitable opportunity . . . the object is to deliver the enemy a blow, or the annihilating blow, at the start. In this, law, injustice or treaties do not matter."

On August 23, 1939, Germany and the Soviet Union signed a non-aggression pact. The secret supplementary protocol made provision for the impending partition of Poland. That pact was made to give Hitler an opportunity to invade Poland. The Soviet leaders at the time were fully aware of this. And all who understood politics realized that the implications of the German-Soviet pact were Hitler's invasion of Poland and hence the Second World War.

That does not mitigate Germany's responsibility for the outbreak of the Second World War. The Soviet Union was prepared to allow other nations to fight one another so that it could have a share of the spoils. The initiative for the war, however, came from Germany, not from the Soviet Union. It was Hitler who resorted to the use of force. The outbreak of the Second World War remains linked with the name of Germany.

In the course of that war the Nazi regime tormented and defiled many nations. At the end of it all only one nation remained to be tormented, enslaved and defiled: the German nation. Time and again Hitler had declared that if the German nation was not capable of winning the war it should be left to perish. The other nations first became victims of a war started by Germany before we became the victims of our own war.

The division of Germany into zones began on May 8. In the meantime the Soviet Union had taken control in all countries of Eastern and South Eastern Europe that had been occupied by Germany during the war. All of them, with the exception of Greece, became socialist states. The division of Europe into two different political systems took its course. True, it was the postwar developments which cemented that division, but without the war started by Hitler it would not have happened at all. That is what first comes to the minds of the nations concerned when they recall the war unleashed by the German leaders. And we think of that too when we ponder the division of our own country and the loss of huge sections of German territory. In a sermon in East Berlin commemorating the 8th of May, Cardinal Meissner said: "the pathetic result of sin is always division."

The arbitrariness of destruction continued to be felt in the arbitrary distribution of burdens. There were innocent people who were persecuted and guilty ones who got away. Some were lucky to be able to begin life all over again at home in familiar surroundings. Others were expelled from the lands of their fathers. We in what was to become the Federal Republic of Germany were given the priceless opportunity to live in freedom. Many millions of our countrymen have been denied that opportunity to this day.

Learning to accept mentally this arbitrary allocation of fate was the first task, alongside the material task of rebuilding the country. That had to be the test of the human strength to recognize the burdens of others, to help bear them over time, not to forget them. It had to be the test of our ability to work for peace, of our willingness to foster the spirit of reconciliation both at home and in our external relations, an ability and a readiness which not only others expected of us but which we most of all demanded of ourselves.

We cannot commemorate the 8th of May without being conscious of the great effort required on the part of our former enemies to set out on the road of reconciliation with us. Can we really place ourselves in the position of relatives of the victims of the Warsaw Ghetto or of the Lidice massacre? And how hard must it have been for the citizens of Rotterdam or London to support the rebuilding of our country from where the bombs came which not long before had been dropped on their cities? To be able to do so they had gradually to gain the assurance that the Germans would not again try to make good their defeat by use of force.

In our country the biggest sacrifice was demanded of those who had been driven out of their homeland. They were to experience suffering and injustice long after the 8th of May. Those of us who were born here often do not have the imagination or the open heart with which to grasp the real meaning of their harsh fate.

But soon there were great signs of readiness to help. Many millions of refugees and expellees were taken in who over the years were able to strike new roots. Their children and grandchildren have in many different ways formed a loving attachment to the culture and the homeland of their ancestors. That is a great treasure in their lives. But they themselves have found a new home where they are growing up and integrating with the local people of the same age, sharing their dialect and their customs. Their young life is proof of their ability to be at peace with themselves. Their grandparents or parents were once driven out. They themselves, however, are now at home.

Very soon and in exemplary fashion the expellees identified themselves with the renunciation of force. That was no passing declaration in the early stages of helplessness but a commitment which has retained its validity. Renouncing the use of force means allowing trust to grow on all sides. It means that a Germany that has regained its strength remains bound by it. The expellees' own homeland has meanwhile become a homeland for others. In many of the old cemeteries in Eastern Europe you will today find more Polish than German graves. The compulsory migration of millions of Germans to the West was followed by the migration of millions of Poles and, in their wake, millions of Russians. These are all people who were not asked, people who suffered injustice, people who became defenseless objects of political events and to whom no compensation for those injustices and no offsetting of claims can make up for what has been done to them.

Renouncing force today means giving them lasting security, unchallenged on political grounds, for their future in the place where fate drove them after the 8th of May and where they have been living in the decades since. It means placing the dictate of understanding above conflicting legal claims. That is the true, the human contribution to a peaceful order in Europe which we can provide.

The new beginning in Europe after 1945 has brought both victory and defeat for the notion of freedom and self-determination. Our aim is to seize the opportunity to draw a line under a long period of European history in which to every country peace seemed conceivable and safe only as a result of its own supremacy, and in which peace meant a period of preparation for the next war.

The peoples of Europe love their homelands. The germans are no different. Who could trust in a people's love of peace if it were capable of forgetting its homeland? No, love of peace manifests itself precisely in the fact that one does not forget one's homeland and is for that very reason resolved to do everything in one's power to live together with others in lasting peace. An expellee's love for his homeland is in no way revanchism.

VI

The last war has aroused a stronger desire for peace in the hearts of men than in times past. The work of the churches in promoting reconciliation met with a tremendous response. The "Aktion Sühnezeichen", a campaign in which young people carry out atonement activity in Poland and Israel, is one example of such practical efforts to promote understanding. Recently, the town of Kleve on the Lower Rhine received loaves of bread from Polish towns as a token of reconciliation and fellowship. The town council sent one of those loaves to a teacher in England because he had discarded his anomymity and written to say that as a member of a bomber crew during the war he had destroyed the church and houses in Kleve and wanted to take part in some gesture of reconciliation. In seeking peace it is a tremendous help if, instead of waiting for the other to come to us, we go toward him, as this man did.

In the wake of the war, old enemies were brought closer together. As early as 1946, the American Secretary of State, James F. Byrnes, called in his memorable Stuttgart address for understanding in Europe and for assistance to the German nation on its way to a free and peaceful future. Innumerable Americans assisted us Germans, who had lost the war, with their own private means so as to heal the wounds of war. Thanks to the vision of the Frenchmen Jean Monnet and Robert Schuman and their cooperation with Konrad Adenauer, the traditional enmity between the French and Germans was buried forever.

A new will and energy to reconstuct Germany surged through the country. Many an old trench was filled in, religious differences and social strains were defused. People set to work in a spirit of partnership.

There was no "zero hour," but we had the opportunity to make a fresh start. We have used this opportunity as well as we could.

We have put democratic freedom in the place of oppression. Four years after the end of the war, on this May 8, in 1949, the Parliamentary Council adopted our Basic Law. Transcending party differences, the democrats on the council gave their answer to war and tyranny an Article 1 of our constitution: "The German people acknowledge inviolable and inalienable human rights as the basis of any community, of peace and of justice in the world." This further significance of May 8 should also be remembered today.

The Federal Republic of Germany has become an internationally respected state. It is one of the most highly developed industrial countries in the world. It knows that its economic strength commits it to share responsibility for the struggle against hunger and need in the world and for social adjustment between nations. For 40 years we have been living in peace and freedom, to which we, through our policy in union with the free nations of the Atlantic alliance and the European Community, have ourselves rendered a major contribution. The freedom of the individual has never received better protection in Germany than it

does today. A comprehensive system of social welfare that can stand comparison with any other ensures the subsistence of the population. Whereas at the end of the war many Germans tried to hide their passports or to exchange them for another one, German nationality today is highly valued.

We certainly have no reason to be arrogant and self-righteous. But we may look back with gratitude on our development over these 40 years, if we use the memory of our own history as a guideline for our future behavior.

If we remember that mentally disturbed persons were put to death in the Third Reich, we will see care of people with psychiatric disorders as our own responsibility.

If we remember how people persecuted on grounds of race, religion and politics and threatened with certain death often stood before the closed borders with other countries, we shall not close the door today on those who are genuinely persecuted and seek protection with us.

If we reflect on the penalties for free thinking under the dictatorship, we will protect the freedom of every idea and every criticism, however much it may be directed against ourselves.

Whoever criticizes the situation in the Middle East should think of the fate to which Germans condemned their Jewish fellow human beings, a fate that led to the establishment of the state of Israel under conditions which continue to burden people in that region even today.

If we think of what our Eastern neighbors had to suffer during the war, we will find it easier to understand that accommodation and peaceful neighborly relations with these countries remain central tasks of German foreign policy. It is important that both sides remember and that both sides respect each other. Mikhail Gorbachev, General Secretary of the Soviet Communist Party, declared that it was not the intention of the Soviet leaders at the 40th anniversary of the end of the war to stir up anti-German feelings. The Soviet Union, he said, was committed to friendship between nations. Particularly if we have doubts about Soviet contributions to understanding between East and West and about respect for human rights in all parts of Europe, we must not ignore this signal from Moscow. We seek friendship with the peoples of the Soviet Union.

Forty years after the end of the war, the German nation remains divided.

At a commemorative service in the Church of the Holy Cross in Dresden held in February of this year, Bishop Hempel said: "It is a burden and a scourge that two German states have emerged with their harsh border. The very multitude of borders is a burden and a scourge. Weapons are a burden."

Recently in Baltimore in the United States, an exhibition on "Jews in Germany" was opened. The ambassadors of both German states accepted the invitation to attend. The host, the President of the Johns Hopkins University, welcomed them together. He stated all Germans share the same historical development. Their joint past is a bond that links them. Such a bond, he said, could be a blessing or a problem, but was always a source of hope.

We Germans are one people and one nation. We feel that we belong together because we have lived through the same past. We also experienced the 8th of May 1945 as part of the common fate of our nation, which unites us. We feel bound together in our desire for peace. Peace and good neighborly relations with all countries should radiate from the German soil in both states. And no other states should let that soil become a source of danger to peace, either. The people of Germany are united in desiring a peace that encompasses justice and human rights for all peoples, including our own. Reconciliation that transcends boundaries cannot be provided by a walled Europe but only by a continent that removes the divisive elements from its borders. That is the exhortation given us by the end of the Second World War. We are confident that the 8th of May is not the last date in the common history of all Germans.

Many young people have in recent months asked themselves and us why such animated discussions about the past have arisen 40 years after the end of the war. Why are they more animated than after 25 or 30 years? What is the inherent necessity of this development?

It is not easy to answer such questions. But we should not seek the reasons primarily in external influences. In the life span of men and in the destiny of nations, 40 years play a great role. Permit me at this point to return again to the Old Testament, which contains deep insights for every person, irrespective of his own faith. There, 40 years frequently play a vital part. The Israelites were to remain in the desert for 40 years before a new stage in their history began with their arrival in the Promised Land. 40 years were required for a complete transfer of responsibility from the generation of the fathers.

Elsewhere, too (in the Book of Judges), it is described how often the memory of experienced assistance and rescue lasted only for 40 years. When their memory faded, tranquility was at an end. Forty years invariably constitute a significant time span. Man perceives them as the end of a dark age bringing hope for a new and prosperous future, or as the onset of danger that the past might be forgotten and a warning of the consequences. It is worth reflecting on both of these perceptions.

In our country, a new generation has grown up to assume political responsibility. Our young people are not responsible for what happened over 40 years ago. But they are responsible for the historical consequences.

We in the older generation owe to young people not the fulfillment of dreams but honesty. We must help younger people to understand why it is vital to keep memories alive. We want to help them to accept historical truth soberly, not one-sidedly, without taking refuge in utopian doctrines, but also without moral arrogance. From our own history we learn what man is capable of. For that reason we must not imagine that we are quite different and have become better. There is no ultimately achievable moral perfection. We have learned as human beings, and as human beings we remain in danger. But we have the strength to overcome such danger again and again.

Hitler's constant approach was to stir up prejudices, enmity and hatred. What is asked of young people today is this: do not let yourselves be forced into enmity and hatred of other people, of Russians or Americans, Jews or Turks, of alternatives or conservatives, blacks or whites.

Let us honor freedom.

Let us work for peace.

Let us respect the rule of law.

Let us be true to our own conception of justice.

On this 8th of May, let us face up as well as we can to the truth.

BERNARD J. ROSENSHEIN TO RECEIVE YOUTH SERVICES MAN OF THE YEAR AWARD

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. DioGUARDI. Mr. Speaker, this Sunday the Tom Paine of New Rochelle Lodge of B'nai B'rith will present its annual Youth Services Man of the Year Award to Bernard J. Rosenshein.

I do not believe that you could find an individual more deserving of this award than Bernie. His list of accomplishments and community service are endless. As president of Rosenshein Associates, his company has become one of the largest shopping center developers. Bernie also serves as the vice president of the eastern division of the International Council of Shopping Centers. However, these accomplishments pale in comparison to the dedication Bernie has shown to the entire Westchester community.

Bernie has been an active participant in the Beth El Synagogue community for 18 years and serves on their board of trustees. He is also the founder of American Friends for the Hebrew University. As president of the board of governors of the Mamaroneck Beach and Yacht Club, he has hosted several fundraising events for Jewish philanthropies and educational causes.

Bernie truly symbolizes what I believe to be the greatest asset of Americans, volunteerism and the desire to help others. It is people like Bernie that make the world a better place for all of us.

His wife, Carol and his daughters, Michele, Julie and Lisa should be proud of him. As a personal friend, I would like to extend my deepest congratulations to Bernie and wish him the best of success in all of his future endeavors.

LEGISLATION TO DESIGNATE NAPLES, FL, TO HOLD FEDERAL COURT

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. LEWIS of Florida. Mr. Speaker, I am pleased to join with my friend and colleague from Florida [Mr. MACK], in introducing legislation to designate the city of Naples as a place to hold Federal court in Florida's southern district.

Currently, the nearest Federal court for individuals in the Naples area is located in Miami, FL—over 200 miles from Naples. No doubt, this makes access to the Federal court for the citizens in and around the area of Naples extremely difficult and costly.

With each passing day, south Florida's population grows at an astonishing rate. In fact, estimates indicate that Collier County, which includes Naples, will grow approximately 74 percent over the next 15 years. The increased growth has placed a tremendous burden on the Florida court system and could endanger its effectiveness in the future. For example, the southern Florida district with 12 judges handles approximately 1,500 new criminal cases filed each year, involving 2,700 defendants. Compare this to the Georgia district court in Atlanta, with 11 judges disposing of 423 cases last year and the Federal district court in New York City which handled a total of 817 cases with 27 Federal judges.

Of particular concern to south Floridians is the problem of expeditiously prosecuting those involved in illicit narcotics. It is no secret that Florida, particularly south Florida, is the major point of entry for illegal narcotics coming into the United States. In fact, over 80 percent of the cocaine entering the United States during the last year moved through south Florida, where more than 80 percent of the seizures occurred. Clearly, these statistics indicate a need to address this problem immediately.

Under the law, Congress must act to authorize an area as a place to hold court. Should Naples be designated such an area, the Federal Government must either find appropriate space in existing facilities or construct a building in which court can be held. Since Collier County is in the process of developing a new judicial center, the possibility exists to include the needed space in this new facility. This could save time and money for both the residents and the Federal Government—a concept which is most welcome given the fiscal problems faced by Government today.

I want to commend my good friend, Senator CHILES, for introducing identical legislation in the other body. This timely and necessary legislation will greatly assist southwest Florida in resolving a difficult and frustrating situation and I ask for my colleagues support.

VETERANS DAY

HON. RICHARD STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. STALLINGS. Mr. Speaker, on November 11, at 11 a.m., a combined color guard representing all military services, will present arms at the Tomb of the Unknown Soldier at Arlington National Cemetery. A wreath will be placed at the tomb, honoring over 1 million veterans who sacrificed their lives for the freedom and honor of this great Nation.

Some 2,400 miles away, communities across the great State of Idaho gather to pay tribute to the brave men and women who proudly served our country, and in all too many instances, sacrificed their lives to give us a future free of oppression, and rich with freedom and liberty.

All across this Nation, there will be parades and speeches and celebrations. Veterans Day is a day for all Americans to pause in commemoration—to sharpen memories of the past, and to dream of the future. It is a day to honor those veterans who sacrificed in the struggle for peace, and a day to respect those who survive.

I take special pride in honoring the more than 122,000 veterans who live in Idaho, and the countless thousands who died in the service of our Nation. Seeing the names of 237 young Idahoans inscribed on the starkness of the Vietnam Memorial brought the realities of war even closer home.

We are charged with keeping alive and vivid the memory of war, of its participants, and of their bravery. Certainly we cannot live in the past, or in the ugliness of war, but we must never forget.

For these veterans, certain values, certain principles, and certain eternal truths were more precious than life itself. The causes for which they fought—freedom, democracy, peace, family—must never be forgotten. We must teach our children and every future generation to value the rights and freedoms we enjoy, instilling a sense of honor, conviction, and duty to our country.

On November 11, Veterans Day 1985, we can sustain these important memories November 11 is a day of appreciation, a day of pride, and above all, a day of peace.

A TRIBUTE TO R. MANNING BROWN

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. COURTER. Mr. Speaker, I rise today in tribute to R. Manning Brown who passed away on October 19, 1985. Mr. Brown served for 15 years as chairman of the executive committee of Princeton University's board of trustees, completing in June the longest term ever served in that position.

Mr. Brown retired in 1981 as chairman of the board of New York Life Insurance Co. At the time of his death he was also director of Associated Dry Goods Corp., Union Camp Corp., and Union Carbide Corp. He had recently retired from the boards of J.P. Morgan and Co., Inc., Louisiana Land and Exploration Co., and Avon Products.

During his 5-year service in the Army during World War II, Mr. Brown achieved the rank of major, and he was appointed to command an infantry company during action in the European Theater. He was decorated five times for service during the war, receiving the Purple Heart and a Bronze Star with three clusters.

To his wife Margrette, his son Ralph, and his daughter Anne Brown Durney, I give my deepest condolences. R. Manning Brown was a great American and his leadership will be sorely missed by the community of Princeton, the State of New Jersey, and the country.

HONORING THE 32D ANNUAL VETERANS DAY

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. DYMALLY. Mr. Speaker, today I rise to honor the 28 million living veterans, and to remember the more than 1 million that died defending this great Nation. Veterans Day is a day for all Americans to pay special tribute to these men and women who risked their lives to safeguard our freedom and democracy. This day should also serve as a reminder to Members of Congress of our responsibility and commitment to these citizens.

I am very proud of our country's record in caring for its veterans through responsible programs. It saddens me, however, that we are comtemplating under our newly acquired budget-balancing courage the possibility of tainting this record. I hope that in the midst of the intellectual exchanges on Gramm-Rudman, some common sense is restored to preserve our veterans' benefits.

It would be remiss on the part of our membership and constituencies if we do not recognize that all veterans are not necessarily American citizens; although they all fought under the same flag. I am referring to the 1,600 Filipino veterans of World War II in California who were promised naturalization and saw that promise later denied due to political concerns. It saddens me that responsible Members have not seen fit to move a measure (H.R. 1302) I introduced to fulfill the reneged promise. I hope that on a Veterans Day in the near future, these veterans are properly honored as citizens.

November 11, 1985 marks the 32d annual observance of Veterans Day. No doubt the pains of tragedy will be felt. But, this day should really be for our appreciation of our veterans' service and deeds. We in Congress have an opportunity to overcome any sad notes and rejoice in the peace for which these selfless veterans fought and died. Let us not forget to protect our veterans' benefits and honor all those who fought for these United States.

Mr. Speaker, I urge all Members and other Americans to be thankful and proud of what our veterans contributed to our children's futures. They did not forget us in times of adversity; let us not now do so in our times of adversity. We should all be able to thank our veterans with pride and honor, with sincerity and integrity.

TRIBUTE TO GEN. GEORGE S. PATTON, JR.

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. MAVROULES. Mr. Speaker, I come before my colleagues in the House today to

honor a man who was one of America's finest citizens.

On Monday, November 11, we will have the annual opportunity to remember and honor our veterans. These individuals, throughout the years, have served and fought valiantly to protect our liberties and freedoms. Also on this day, we will have the opportunity to celebrate the centennial of the birth of Gen. George S. Patton, Jr.

Today I address the House in remembrance of General Patton, one of our greatest military leaders and strategists. General Patton's military legacy will long be remembered and revered by free people everywhere. With his Third Army, General Patton succeeded in eradicating an oppressive tyranny from Europe. He was responsible for leading the Third Army to Bastogne, where they freed numerous Allied troops, and took more prisoners than any other army during World War II.

Historian Andrew Metropolis has said that:

Patton's military ability and leadership are considered by many to be unequaled. He took the Third Army through Europe, many times without the aid of supply lines. As a motivator and strategist he was unsurpassed.

This quote exemplifies General Patton's drive and determination. His love for his country, especially for his home in Hamilton, MA, was considerable. Because of his belief in the American way of life, General Patton brought his army to the front, and helped bring about the demize of the Nazi Third Reich and Facists.

General Patton's friends and family, many of whom still reside in Hamilton, MA, deserve to be proud. I personally experience a great deal of pride in recognizing this patriotic and courageous American. And I believe that all free men living in Europe, who rise each morning without the fear of nazism, owe a great deal to General Patton.

Today I call upon my colleagues in the House, as well as the free people across the globe, to pay special tribute to General Patton, this Monday, the 100th anniversary of his birth. We must all take a moment in our Veterans Day celebrations, and pause to remember and honor General Patton.

Men such as he, who gave their heart and souls to the protection of democracy, cannot be forgotten. Let us remember this son of Massachusetts on Monday, November 11.

H.R. 3692 DESERVES QUICK PASSAGE

HON. VIRGINIA SMITH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in strong support of H.R. 3692, introduced by the gentleman from North Carolina [Mr. BROYHILL]. This legislation is a fair response to a problem faced by companies in my district and throughout the country.

The Hazardous and Solid Waste Amendments of 1984 imposed a deadline for compliance with requirements that land disposal facilities operating under interim status comply with ground water monitoring and financial responsibility requirements. The landfill sites must comply with these requirements by November 8 or close down.

To comply with the financial responsibility requirements, the EPA has determined that a facility must either obtain liability insurance or meet self-insurance requirements. But many of the firms are small, and meeting self-insurance requirements is an impossibility. And other facilities have found it equally impossible to obtain a liability policy from an outside insurance firm.

In a meeting here in my Washington office, a representative from a firm operating a landfill site located in my district explained that his firm was too small to self-insure, so he has been seeking a liability policy with an outside insurance firm. He has contacted almost a dozen insurance companies and has been turned down by them all.

Although the firm has made every effort to comply with the insurance requirement and has spent a good deal of money to meet the other legal requirements, the firm will now have to close down its land disposal operation.

Mr. Speaker, Mr. Broyhill's legislation offers a short-term solution to this problem by providing a 1-year extension on the insurance requirement to those firms that have complied with the other legal requirements and have made a good-faith effort to obtain liability insurance.

Because the November 8 deadline is upon us, it is vital that H.R. 3692 be given consideration in a timely manner. I strongly urge my colleagues to support this measure.

THE COUNCIL FOR A SECURE AMERICA: NATIONAL SECURITY, ENERGY INDEPENDENCE AND THE SECURITY OF THE ISRAELI STATE

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. BRYANT. Mr. Speaker, during hearings yesterday on the impact of changes in the Internal Revenue Code with respect to energy production tax incentives, the Council for a Secure America, represented by Mr. Samuel Eisenstat, presented testimony tying such changes to national security and the security of the State of Israel. I respectfully request this statement be inserted in the RECORD so my colleagues may benefit from Mr. Eisenstat's excellent insight and understanding of the issues of national security, the security of the State of Israel and our own energy independence. Thank you.

TESTIMONY OF THE COUNCIL FOR A SECURE AMERICA BEFORE THE HOUSE SUBCOMMITTEE ON FOSSILE AND SYNTHETIC FUELS OF THE COMMITTEE ON ENERGY AND COMMERCE, NOVEMBER 7, 1985

Mr. Chairman, Members of the Committee: My name is Samuel Eisenstat. I am pleased to be here in my capacity as President of a recently organized group called "The Council for a Secure America." With me is my esteemed colleague, the Honorable Mack Wallace, the Co-Chairman of the Council and one of its founding members. Commissioner Wallace, as immediate past Chairman and now one of three members of the Railroad Commission of Texas, is particularly well qualified to represent the Council here today. As you are no doubt aware, the Railroad Commission of Texas is the state agency chartered with the oversight and regulatory responsibility for the exploration, drilling and production for all oil and natural gas in the State of Texas.

Since this is the Council's maiden voyage before a House Committee, I would like to take a few minutes to introduce the Council to you and to discuss the reasons for the Council's core concerns with U.S. energy and tax policies. Commissioner Wallace will thereafter talk with you about the inextricable and precarious linkage between energy and national security.

The Council for a Secure America was created less than a year ago to educate the American public and its officials of the pressing need to bolster U.S. national security and provide for a forthright and unfettered U.S. foreign policy. In pursuit of this aim, a coalition of two key American constituencies emerged. Members of the domestic oil and gas industry and friends of the State of Israel in the U.S. came together to espouse the following inescapable truths.

1. Neither the United States of America nor the State of Israel can afford the threat to U.S. national security imposed by unacceptable levels of imported crude oil and refined products from often hostile and unstable foreign governments.

2. To insure independence from the intolerable risk of foreign imports, the domestic oil and gas industry must remain vital enough to explore for, produce, and refine reserves sufficient to replace and add to current domestic production.

3. The key to preserving and maintaining a thriving domestic oil and gas industry is the independent oil and gas operator who drills 89 percent of the exploratory or wildcat wells in the United States. This activity locates the new reserves of oil and natural gas we have to be constantly finding to maintain and increase our rate of production.

4. Finally, tax policy will make or break the goal of energy independence. Tax law that allows the development of U.S. crude oil, natural gas, and natural gas liquids is every bit as justified today as it ever was. Independent oil and gas operators are especially sensitive to tax law. Their capital is not cash in the bank but oil and natural gas in the ground. From the revenues of the sale of their production and investments they attract, venture capital is generated for their drilling programs. Thus, tax policy decrees whether critically needed venture capital will be available to keep the rigs running.

On April 11, 1870, Robert Lowe, Viscount of Sherbrooke, testified before the House of Commons on tax matters. He is said to have referred to the Chancellor of the Exchequer

as a ". . . man whose duties make him more or less of a taxing machine . . . intrusted with a certain amount of misery which it is his duty to distribute as fairly as he can."

I know you gentlemen must be able to empathize with the sentiment expressed, and the Council surely believes that the issue of fairness is important to tax policy. But, fairness must be viewed in a broader light when the national security is at stake.

Let's take a look at the domestic industry today. Energy is the lifeblood of our industrial society. And oil and natural gas provide 70 percent of that energy. This will be true for decades to come.

Thus, the need for precious oil and gas resources is of no short-term duration. The trend, however, shows we are not moving forward; we are moving backward. The number of active drilling rigs in the country has dropped by 40 percent since 1981.

Some argue that drilling is down because demand is down. That is certainly contrary to the fact that we imported over 5 million barrels of crude oil and refined products per day in 1984. These imports cost over 54 billion dollars, which constituted 45 percent of the total foreign trade deficit. The size and growth of this deficit is considered by many as the most dangerous trend in our economy today.

The large trade deficit, however, is not the only unfortunte consequence. As recent events, particularly the hijacking of the *Achille Lauro*, should remind us, all the terrorist groups in the Middle East, without exception, likely receive their major funding from petro-dollars—dollars that the free world must pay for oil from the Gulf area. Without the hundreds of millions of dollars they receive annually from the oil exporting countries, these terrorists could not have acquired huge bank accounts, limitless quantities of sophisticated modern weapons, and freedom of travel throughout the world.

Now let's move to ask, what about energy demand in the future?

Charles Ebinger, Director of the Energy and Strategic Resources Program at Georgetown University's Center for Strategic and International Studies, recently said that after several years of decline, energy consumption is on the rise again and will keep rising as the current economic recovery spreads within the U.S. and to other countries.

Others argue that drilling is down because there is little left in the United States to be found. The truth is that vast supplies of oil and natural gas remain to be produced. A map, prepared under the auspices of another distinguished colleague and Council Board Member, Mr. Frank Pitts, and attached as an exhibit to the Council's testimony, shows that 98 percent of our prospective sediments for the accumulation of oil and natural gas remain untouched by drilling. Only 3 percent of our offshore acreage has even been leased.

The present tax law regarding intangible drilling costs is the independent's jugular vein. It, along with percentage depletion, has made it possible for independent producers to serve the energy interests of this nation by increasing their drilling activities and finding more reserves. The Administration's plan proposes to spare the artery from the knife. If the treatment of IDC's is not preserved in their current form, and if depletion allowance is eliminated in its entirety, the nation's drilling activity will plummet by 30 to 40 percent and new reserves will decline by a like amount. This would be totally unconscionable.

The Council considers America's national security through energy independence a sine qua non. Without the independent producers, it cannot be achieved; without present tax provisions, they cannot survive. To forfeit these provisions is tantamount to an abdication of national responsibility.

At this time, I will turn the floor over to Commissioner Wallace to share with you the Council's view of the geopolitics of energy and the vulnerability of the U.S. in the area of national security.

ADDITIONAL POSITIONS FOR U.S. CUSTOMS PROVIDED IN CONFERENCE REPORT

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. LEWIS of Florida. Mr. Speaker, I am pleased that the House voted to approve the conference report to H.R. 3036, which provided funds for fiscal year 1986 operations of the Treasury Department and the U.S. Postal Service.

One of the most important aspects of this bill is language that provides for an additional 473 positions in the U.S. Customs Service. No reduction is easy to support, Mr. Speaker, but cutting over 800 customs positions would have proven fatal to drug interdiction efforts in all areas of the United States. The other body has already adopted a separate proposal which would reduce Coast Guard funding by $230 million. By combining these reductions, the U.S. Congress would have cleared the way for major increases in illicit narcotics distribution and other drug-related crimes.

Stepping up our enforcement against illegal drugs benefits more than just select areas of the country. Hazardous drugs often pass through several dealers before they come into the possession of many young children who do not realize what they are getting into. I appreciate the support of my colleagues who realize that reducing our force against the trade of illegal drugs will only stimulate attempts to dump these substances on American soil.

PRAISE FOR EXCELLENCE IN THE CONGRESSIONAL LEGIS FELLOWS AND FOR ITS PROGRAM DIRECTOR, TOM GARCIA

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. DYMALLY. Mr. Speaker, I am certain that many Members of the House join me in praising the excellence of our Congressional LEGIS Program, which over 6 years since its inception, has provided invaluable staffs of experts and legislative analysts to both our personal offices and committees. On the occasion of the departure of Dr. Thomas Garcia, the first Director of the LEGIS Program in the Office of Personnel Management [OPM], all Members who have come to learn firsthand about the LEGIS fellows stand and applaud the professional excellence and dedication that Tom has brought to this program now operating on the Hill.

Indeed, we have been the beneficiaries and recipients of these outstanding midlevel and senior civil servants, who have come to assist each of our offices in order to address the heavy legislative agenda that we have come to experience in both the House and Senate. The excellent record of the literally hundreds of fellows who have graduated speak eloquently about the creative design, preparation and execution of this special Congressional Fellows Program which has been nurtured by Tom Garcia by working with all Federal executive agencies and the individual employees in meeting the special needs of our offices. The fellows, in turn, have labored and learned the ways of the Hill and how we conduct business in the legislative branch. The program has therefore provided a two-way learning process where the fellows have learned and absorbed a great deal themselves—even during their short tenure of 6 months to 1 year.

A descriptive word about this important program: The LEGIS fellows come from all agencies of the executive branch; they come from all disciplines, including but not limited to fellows with science and technical backgrounds; management, budgetary, and tax backgrounds; social scientists as well as civilian analysts who are experts in our military programs. Thus, they have come to serve professionally, not only in addressing our full legislative calendars, but also in the many subcommittees and full committees where the major business of the House is conducted. The nomination and selection of these LEGIS fellows is quite competitive, requiring their agency nomination to be in ranked order with the final selection accomplished through OPM. Their salaries and any travel incurred during their tenure are provided by the sending Federal agency, which is godsend to all our congressional offices laboring under both limited budget and staff capability in covering an ever-increasing legislative calender with many complex issues to be addressed by our staffs. The program includes an intensive 3-week orientation period in which the fellow is exposed to the legislative process and office procedures and he/she uses this period to interview and select the most appropriate work setting or office that the fellow can negotiate with Members or their committee staffs. The results have been overwhelmingly successful in that hundreds of fellows have been placed and have served with distinction; the total investment of funds and human effort expended on this program have certainly provided viable cost-benefit results.

Finally, may I say a word about Tom Garcia under whose guidance the LEGIS Program has evolved into the highly professional talent bank that it is today:

Tom Garcia has spent the past 20 years as a dedicated civil servant in the Office of

Personnel Management, formerly the U.S. Civil Service Commission, where he has been intimately involved with executive training and development programs. With the establishment of the Congressional LEGIS Fellows Program, created through the hard and thoughtful work of Dr. Garcia, the latter became its first program director in 1979. Prior to the period of his outstanding Government service at OPM, Tom developed strong leadership and teaching skills in academia at the University of Georgia, Athens; University of Massachusetts, Amherst; and at Louisiana State University, Baton Rouge. He served honorably in the U.S. Army and is a recipient of many outstanding achievement awards from the U.S. Office of Personnel Management and from academic institutions.

Members assuredly join me in expressing to Tom Garcia our deep appreciation for his stewardship and fine public service in bringing to fruition our Congressional LEGIS Fellows Program, as well as for the leadership and excellence he has personally exemplified in his work with the Federal executive agencies and here on the Hill. We wish him well in his professional career and personal life. He leaves a legacy of excellence in public service.

TRIBUTE TO PRESIDENT SPENCER W. KIMBALL

HON. RICHARD STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 8, 1985

Mr. STALLINGS. Mr. Speaker, I would like to take this opportunity today to pay tribute to President Spencer W. Kimball, who died Tuesday after serving as president of the Church of Jesus Christ of Latter-day Saints for 12 years.

President Kimball's death represents a great loss for members of the Mormon Church, as well as for me personally.

President Kimball, who was born in Salt Lake City, UT, and grew up in Thatcher, AZ, dedicated his life to service in the church. His leadership will be greatly missed. He showed great love and compassion as he served in his many leadership capacities, yet his leadership style was decisive. He was known for his humility; his ability to disarm people and make them feel comfortable.

Many aspects of his leadership of the Mormon Church stand out.

In 1957 he underwent an operation for cancer of the throat. One and one-half vocal chords were removed. Despite this, President Kimball continued in his calling as an apostle, meeting and speaking to members of the church around the world.

Rapid church growth was recorded during President Kimball's leadership of the church. In a church seminar in 1974, President Kimball encouraged church members to "lengthen their stride" in missionary work. This phrase became a challenge echoed throughout the rest of his service as president of the church.

He was interested in work with young people, Indian programs, health and education programs and welfare programs. These themes were repeated again and again during his years of service.

President Kimball performed my marriage 22 years ago, which makes his death a personal loss for me.

I join with others throughout the world in paying tribute to this great leader.

SENATE—*Tuesday, November 12, 1985*

The Senate met at 8:45 a.m. and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

If any of you lacks wisdom, let him ask of God, who gives to all generously, and without reproaching, and it will be given him.—James 1:5.

Eternal God, wisdom of the ages, momentous challenge confronts the Senate. Agriculture, trade balance, national defense, budget deficit, national debt—with few exceptions every issue requiring legislation is critical.

Wise as the Senators are, they need a higher wisdom which is relevant and available. Powerful people in positions of power find it difficult to ask for help, Lord. Probably some are not fully convinced that an invisible God is a viable resource. God of all power and wisdom, manifest Thyself to them and help them understand that there is nothing on Earth which is a matter of indifference to Thee. Give the Senators grace to be humble and acknowledge their inadequacy and ask Thee for guidance. Grant to them the will and the courage to tackle these cosmic issues and find solutions. For Thy glory and the sake of the Nation's future. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

Mr. TRIBLE. Mr. President, on behalf of the distinguished majority leader, who is en route to the White House, let me outline the day's activities for the U.S. Senate.

SCHEDULE

Mr. TRIBLE. Under the standing order, the two leaders will be recognized for 10 minutes each. Following that recognition there will be special orders for not to exceed 15 minutes each in favor of Senators CHAFEE, DANFORTH, PROXMIRE, MELCHER, and GORE.

Then, Mr. President, there will be a period for the transaction of routine morning business not to extend beyond the hour of 10 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

At 10 a.m., by unanimous consent, the Senate will resume consideration on S. 1730, the reconciliation measure, with the Thurmond-Hollings textiles amendment laid aside. Consideration of other amendments will occur throughout the day and there is a possibility that a time agreement will be reached to dispose of other amendments.

The Senate will then stand in recess between the hours of 12 noon and 1:30 p.m. in order for the weekly party caucuses to meet.

At 1:30 p.m., the Senate will resume consideration of the reconciliation bill. Rollcall votes may be expected to occur throughout the day.

RESERVATION OF MAJORITY LEADER'S TIME

Mr. TRIBLE. Mr. President, I ask unanimous consent to reserve the remainder of the majority leader's time under the standing order.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting minority leader is recognized.

Mr. PROXMIRE. I thank the Chair.

SHOULD THE COURTS ABOLISH THE INDEPENDENT AGENCIES?

Mr. PROXMIRE. Mr. President, I want to call to the attention of the Senate this morning something that I think many of us have missed.

Mr. President, it will come as a shock to many Members of this body to learn that there may be a real possibility that some of the most crucial agencies of this Government—in fact, all of the independent regulatory agencies—could either be abolished or lose their independent status and come under the direct and complete control of the President. In an article in the New York Times on November 6, Stuart Taylor has called attention to a speech by Attorney General Edwin Meese that "the entire system of independent regulatory agencies may be unconstitutional." Attorney General Meese argues that the Constitution gives the President and his executive branch the exclusive power to enforce the law. Unfortunately, Mr. Meese is not alone. Another administration powerhouse, the Director of the Office of Management and Budget, James Miller, joins him. Miller contends: "There is no such thing as an independent agency, at least as far as rulemaking is concerned." What makes this view of Mr. Miller particularly impressive is that Mr. Miller has just left the chairmanship of the Federal Trade Commission.

Mr. President, this is not just the product of a bull session on constitutional powers. A suit pending in Federall district court here in the District of Columbia could end in the effective abolition of the Federal Trade Commission as an independent agency. Six title insurance companies have argued that the Federal Trade Commission should be barred from bringing price fixing charges against them because it has operated unconstitutionally since its creation in 1914. Ironically, Mr. Meese's Justice Department is representing the FTC in this case. But the New York Times reports that the Justice Department is seriously considering a switch. It might decide to support the companies if the court decides to resolve the constitutional issue.

What would happen if the court decides in favor of the firms suing the FTC? The FTC would lose its law enforcement power. How about the Securities and Exchange Commission? Would they lose their authority to act against corporations that failed to disclose crucial information to investors in accordance with the law? That would certainly follow. And how about the National Labor Relations Board? Would they be able to enforce the law with respect to disputes between management and labor unions? They would not. These agencies would have to give up their prosecutorial power to the executive branch. That, of course, means to Mr. Meese's Department of Justice. The consequences would be much greater. Even as lofty and respected an agency as the Federal Reserve Board would be compelled to surrender its regulatory power to the President.

What kind of a legal case could Attorney General Meese have to advance his view that the executive branch, and specifically the Justice Department, has the only rightful power under the Constitution to enforce Federal law? In 1935 the Supreme Court upheld the authority of the Federal Trade Commission as independent of the President, when it ruled that President Roosevelt did not have the right to dismiss a member of the Federal Trade Commission for "political or policy" reasons. But now Mr. Meese argues that two 1983 rulings by the Supreme Court have reasserted the sole law enforcement authority of the President when it struck down "legislative vetoes" and emphasized the exclusive allocation as well as division of powers between the Congress, the

President, and the Judiciary. With this recent decision in mind the Attorney General contends that if Federal agencies perform executive functions, they are under the control and direction of the executive. They are not quasi-judicial. They are not independent. There is no fourth branch of Government mentioned in the Constitution. There are three branches, three distinct branches. Any agency that enforces or executes the law, argues Mr. Meese, must fall within the power and authority of the executive branch of Government.

Given the track record of the Reagan administration and especially of Attorney General Edwin Meese, this itch for more power for the President and his Attorney General has appalling implications. For instance, the Justice Department has a notoriously weak record of acting against defense contractors. For years this Senator has been observing case after case where the Navy has referred cases to the Justice Department for investigation and prosecution. Prosecution has often been recommended by Justice Department investigators, but they rarely take place. The recent Justice Department prosecution of former Navy Assistant Secretary Sawyer who later became a vice president of General Dynamics is a rare, very rare, exception. This administration has a well earned reputation for refusing to pursue white collar criminals. I will concede it is true that many of the so-called independent agencies have been weakened in recent years by appointments to the top policymaking positions of officials who share the administration's aversion to cracking down on powerful corporation officials. Nevertheless, the agencies have been far more forceful in this respect than the Department of Justice.

In the past 50 years, the independent agencies have provided a very useful balance wheel for the immense power concentrated in the executive branch. The independent boards are required by law in most cases to be bipartisan. Appointments are for staggered terms. That means most top policymakers in the agency have either been appointed by a former Presidential administration or they will serve in a term that does not expire until the current Presidential administration has left office. This pluralism is reinforced by bipartisan congressional oversight. What has been the result? The Government regulates and administers many phases of American life without relying on the centralized, exclusive, total power of a single administration. Agencies like the Federal Reserve Board and the Securities and Exchange Commission are held in very high regard by the Congress, the public and the regulated industry. Why? Because, by and large, they have been insulated from political pressure. They have been fair, but they have also been vigorous and prompt in enforcing the law. All of this would be lost if the courts decide, as Messrs. Meese and Miller have argued, that the executive branch and the executive branch alone has the exclusive and total right to enforce every law and regulation of this vast and complex American economy. Suppose the view of Attorney General Meese prevails. Then what? Then Mr. Meese and his Department of Justice will have the power, and the only power, to enforce the law in this vast, rambling complex Federal Government. Would anyone except the administration really want that?

Mr. President, if the opinion of Mr. Meese and Mr. Miller prevail, there could be swift and sudden social and economic revolution in this country. Consider the agencies that would fall completely under the administration's control and the kind of power the administration would have in many cases simply by inaction. The administration and Mr. Meese would decide when and whether to enforce action with regard to the media in this country as they would take over the enforcement authority of the Federal Communications Commission. The country's financial institutions would be in the hands of Mr. Meese as he took over the enforcing powers of the Federal Deposit Insurance Corporation as well as the Federal Reserve Board. Transportation policies now adjudicated and enforced by the Interstate Commerce Commission would come under the authority of Attorney General Meese. The Attorney General would take the exclusive power to prosecute or not prosecute violations of the environmental protection laws. EPA would surrender its authority. And how about this one? The Equal Employment Opportunity Commission would hand over its responsibilities to the not so tender mercies of Mr. Meese. For a windfall of political power consider that the referee in the intensely partisan area of elections, the Federal Elections Commission, would surrender to Mr. Meese and the Justice Department control over Federal elections. Other agencies that have important enforcement powers that they would lose to the Department of Justice are the Federal Labor Relations Authority, the Federal Trade Commission, the National Labor Relations Board, the National Transportation Safety Board, the Occupational Safety and Health Administration [OSHA], the International Trade Commission, the SEC and the Veterans' Administration.

In a nation that prides itself on its pluralism and its checks and balances system of limiting power, this would break all records for backward steps.

Mr. President, I ask unanimous consent that the article to which I referred from the November 6 issue of the New York Times written by Stuart Taylor and headlined: "A Question of Power, a Powerful Questioner," be printed in the RECORD.

There being no objection, the article ordered to be printed in the RECORD, as follows:

A QUESTION OF POWER, A POWERFUL QUESTIONER

(By Stuart Taylor, Jr.)

WASHINGTON, Nov. 5.—Over the years Congress has decreed that more than a dozen agencies it created, beginning in 1890 with the Interstate Commerce Commission and today including the Federal Reserve Board and the Federal Trade Commission, must be independent of Presidential control.

The Supreme Court upheld such laws in 1935, ruling that President Roosevelt had no authority to dismiss a member of the F.T.C. for political or policy reasons.

Now Attorney General Edwin Meese 3d has suggested, in a speech that went largely unnoticed when he gave it Sept. 13, that the entire system of independent agencies may be unconstitutional.

Mr. Meese said his suggestion might at first "sound like new or even radical." But he said the framers of the Constitution did not intend Federal agencies to be independent of the President or to be run by bureaucrats who are not politically accountable. The clear implication was that a President should be free to remove all Federal officials exercising law-enforcement powers.

SHOULD BE UP TO THE PRESIDENT

"Power granted to Congress should be properly understood as power granted to the Executive," Mr. Meese said. "It should be up to the President to enforce the law."

He did not mention any particular agency. Asked whether Mr. Meese thought the Constitution required Presidential control of agencies like the Federal Reserve, Terry Eastland, chief Justice Department spokesman, said, "The specific question of whether any particular agency is properly constituted would depend upon a discrete analysis."

This may seem like an academic issue about the separation of powers between the executive and legislative branches. But more than a speech by a top Reagan Administration official is involved. The issue also has been raised in a lawsuit that may be headed for the Supreme Court.

And if views like Mr. Meese's prevail, it would work a major expansion of Presidential authority. For example, many Presidents have tried to influence the Federal Reserve Board in its control over the money supply to shape the direction of the economy, but no President has yet had legal authority to dictate to the Reserve.

In the suit, pending in Federal District Court here, six title insurance companies have argued that the Federal Trade Commission should be barred from bringing price-fixing charges against them because it has operated unconstitutionally since its creation in 1914.

"The Constitution does not permit law-enforcement power to be granted by Congress to officials who are beyond the ongoing supervisory control of the President," the companies contend.

The Justice Department, which represents the F.T.C. in the case, has sought to dismiss the suit on procedural grounds. But the department, headed by Mr. Meese, is also con-

sidering whether to side with the companies if the court decides to try to resolve the constitutional issue.

Despite the public attention drawn by Mr. Meese's outspoken attacks on other constitutional precedents in recent months, most members of congress are unaware of his Sept. 13 speech in Detroit before the Federal Bar Association, perhaps because of the somewhat technical subject matter. But after being given a copy last week, Representative John D. Dingell, chairman of the House Energy and Commerce Committee, denounced it as "a novel interpretation of 200 years of constitutional history."

"This looks to me like the culmination of a long-planned raid on the independent agencies," the Michigan Democrat said. "It also means that he challenges the very powers and the rights to existence of these agencies."

Mr. Meese and the insurance companies are not alone in their views, however. The director of the budget, James C. Miller 3d, a former F.T.C. chairman, contends that recent Supreme Court rulings suggest "there is no such thing as an independent agency, at least as far as rule-making is concerned."

The companies' position, if accepted by the courts, would bring to a halt the law-enforcement activities of the F.T.C. and of other independent agencies such as the Securities and Exchange Commission and the National Labor Relations Board unless and until Congress placed their prosecutorial powers under Presidential control.

FOURTH BRANCH OF GOVERNMENT

Most independent government agencies are authorized by Congress to carry out, under one roof, the so-called "quasi-legislative" function of issuing rules and regulations, the "quasi-prosecutorial" function of bringing charges against suspected violators and the "quasi-judicial" function of deciding whether violations have occurred.

Mr. Meese said in his September speech that the constitutionality of "a fourth branch of government" made up of such independent agencies was undermined by two 1983 rulings in which the Supreme Court struck down "legislative vetoes" and stressed the division of powers between Congress, the President and the judiciary.

"Federal agencies performing executive functions," he added, "are themselves property agents of the executive. They are not 'quasi' this or 'independent' that. In the tripartite scheme of government, a body with enforcement powers is part of the executive branch of government."

Although the argument being made by the insurance companies challenges the power of any official independent of the President to initiate an enforcement action, the companies do not seek to bar independent officials from the "quasi-judicial" role of deciding cases, subject to review by the courts.

Mr. Meese, on the other hand, argues more broadly that "we should abandon the idea that there are such things as 'quasi-legislative' or 'quasi-judicial' functions that can be properly delegated to independent agencies."

Mr. Meese's analysis might also cast doubt on a provision of the 1978 Ethics in Government Act under which top executive branch officials, including Mr. Meese have been criminally investigated and cleared by court-appointed "independent counsel." The purpose of that provision is to provide for investigations of criminal allegations against top officials by prosecutors who are independent of the President and the Attorney General.

The argument being used by the six title insurers in their suit against the F.T.C. was crafted by Theodore B. Olson, who was head of the Justice Department's Office of Legal Counsel until last year, and by Larry L. Simms, who was his deputy. They were the chief architects of the Reagan Administration's attack on legislative vetoes, which led to the 1983 Supreme Court rulings.

Both are now in the Washington office of Gibson, Dunn & Crutcher, a large Los Angeles law firm of which William French Smith, Mr. Meese's predecessor as Attorney General, is also a member. The firm represents the Ticor Title Insurance Company, one of the plaintiffs in the suit.

COULD GORBACHEV BE RIGHT AND REAGAN WRONG ON ARMS CONTROL?

Mr. PROXMIRE. Mr. President, this is a highly political body. Every Member of the Senate has won election to office, usually after struggling for it for years. This job becomes our pride and joy. We treasure it. We cherish it. We will literally work night and day to defend our right to it. We know we can lose this job by making a self-destructive statement. So just as an exercise let me ask my colleagues what is the most foolish, self-destructive action an incumbent Senator can take to jeopardize his office? What can a Senator say that would, at least, begin to put him in jeopardy the next time he faces the voters for re-election? How can we blow it all?

How about this scenario? The President of the United States is very popular, in fact, a beloved figure. At this moment he is about to go to the summit for the first time with the tough, sharp new Soviet Secretary Mikhail Gorbachev. Virtually every American, regardless of party or political persuasion, will be rooting for the President. He is our boy. Sure, the summit meeting is a meeting, a conference. It is not a contest or a contact sport. But many Americans will view this as a contest with the two leaders symbolizing our two countries. If Gorbachev wins, we win. If Reagan loses, we lose. Do the leaders differ on any crucial issue? Indeed, they do. That issue goes right to the heart of arms control. The very crux of arms control is the testing of nuclear weapons. As long as the superpowers continue nuclear weapons testing, regardless of agreements on any other issue, the arms race plunges on. If the leaders agree to a treaty providing a mutual, verifiable end to nuclear testing, the first big and absolutely quintessential step to end the arms race has been taken.

Assume you, as a Senator, believe this from the heart. Do you see the dilemma? All right, here it is: Gorbachev announced last July that the Soviet Union will stop nuclear weapons testing unilaterally until the end of the calendar year. Meanwhile, he asks that the Soviet Union and the United States enter into a treaty that would end testing.

What does an American Senator who believes that nuclear arms control cannot succeed without ending nuclear arms testing do? Can he count on sympathetic support from an American media which may view the American-Russian dispute with objectivity? Does the American media also support the Soviet proposal to end testing? Consider: the American media with few exceptions has greeted the Soviet proposal to end testing as a public relations ploy. In fact, at least two of the most influential and independent newspapers—the New York Times and the Washington Post—have dismissed the Gorbachev proposal as self-serving and calculated in a way that would embarrass the United States but not inconvenience the Soviet nuclear juggernaut. The papers even charge that the Soviets had stepped up their tests this year before July and planned to resume testing in 1986, assuming the United States turned down their proposal.

Was the media right? Did the Soviets increase their testing in the first 6 months of 1985? Let us take a look at the record. Data from the Department of Energy and the Swedish National Defense Research Institute disclose that in 1985 there have been 7 military nuclear explosions by the U.S.S.R. Does that constitute a step up in Soviet military nuclear explosions? Last year—1984—the same sources disclose that the Soviets conducted 8 military explosions in January through July period. In 1983 they conducted 6. Between 1980 and 1984, the Soviets were reported by available data to have averaged about 25 military nuclear explosions per year. This year the Soviets will conduct not 25 but 7 military nuclear explosions. And yet the New York Times reported that the Soviet offer "would ring hollow even if it had not come immediately after an energetic series of Soviet test explosions."

So, Mr. President, I ask again what does a Senator do if he deeply believes that our popular President is wrong, and on this issue the dictator of that prison camp known as the Soviet Union is right? Does he keep quiet? After all, the Senate plays no role in negotiating an arms control treaty. Or does he recognize that nuclear peace is the most critical issue on Earth and speak his mind in favor of negotiating an end to nuclear arms testing now?

Mr. President, I ask unanimous consent that an editorial and article on this subject in the October issue of the Bulletin of American Scientists be printed in the RECORD. The editorial is entitled: "Stop Testing." The article is

headlined: "How Many Soviet Tests Make a Flurry?"

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

STOP TESTING

Just days after the unilateral Soviet moratorium on nuclear weapons testing went into effect on August 6, the United States conducted its tenth underground nuclear test of the year—thus flaunting by deed the moratorium proposal it already had rejected by word. Then, less than two weeks later, the Reagan Administration announced that it would proceed with the first test of a U.S. antisatellite (ASAT) weapon against an object in space.

To justify each decision, the Administration used the blatantly specious arguments that the United States must catch up to the Soviet lead and that these actions will give the Soviet Union an incentive to negotiate more seriously. This is no way to brake the arms race, much less to stop it.

In the case of the test moratorium, Jeffrey Duncan describes in this issue how the Administration first tried to take the public opinion initiative by preempting the Soviet offer (which it had already learned about) by inviting Soviet observers to a U.S. test in Nevada. Then, decrying the moratorium as "propaganda," Administration spokesmen trotted out the bogus claims that the Soviet Union has an advantage in strategic forces and had just completed an accelerated testing program which put them ahead of the United States. While such deception from this Administration is not unusual, it was disturbing to see how quickly these distortions were picked up and disseminated by major U.S. news media—despite the availability of contradictory evidence.

The August 20 announcement that the United States would continue testing its antisatellite weapon was also accompanied by hollow Administration claims. White House spokesman Larry Speakes used the old argument that the Soviets already have an operational ASAT system and the United States thus must redress this imbalance. Knowledgeable weapons scientists have repeatedly pointed out, in the pages of this magazine and elsewhere, the primitive nature of the Soviet ASAT and the fact that the United States demonstrated a similar technical capability during a test in the summer of 1984.

Moreover, since the U.S. ASAT weapon undergoing tests in highly sophisticated, it is likely to spur the Soviets to speed development of a similar weapon. Ironically, an initial result of this race will be that the United States—which is much more dependent on satellites for its communications, command, and control systems than is the Soviet Union—could find itself in greater jeopardy by pushing development of ASAT technology.

The White House concluded its August 29 testing announcement by stating: "We believe that ASAT testing can constitute an incentive to the Soviet Union to reach agreement on a wide range of issues." Not only does this display an incredible lack of understanding of the history of the arms race, but, as Leon Signal points out in this issue, a failure to negotiate on ASATs will prevent an accord on "Star Wars" systems. Such defensive systems, Daniel Arbess emphasizes, already are proscribed by international treaties now in effect. And, in a penetrating analysis of Star Wars, Gerald Marsh shows how even the flimsiest version of such a system could cause instability in superpower relations and lead to another senseless, expensive, and dangerous escalation of the arms race.

HOW MANY SOVIET TESTS MAKE A FLURRY?

(By Jeffrey S. Duncan)

In a July 29 briefing, White House Press Secretary Larry Speakes suddenly announced that President Reagan was making an "unconditional" and "unilateral" offer to the Soviet Union to come to the United States to monitor a U.S. nuclear weapons test. "As a demonstration of our seriousness," Speakes explained, the president was inviting "a Soviet team to observe and to measure a nuclear test at our Nevada test site." The Soviet team would be allowed to "bring any instrumentation devices the Soviet Union deems necessary to measure the yield of this test." Such an offer, Speakes concluded, "clearly demonstrates the U.S. intention to go the extra mile" to begin addressing the "serious problem" of "putting into place truly verifiable and durable limits on nuclear testing."

Following this unexpected announcement, National Security Adviser Robert McFarlane revealed that—by sheer coincidence—the Soviet Union was unveiling a nuclear weapons testing moratorium proposal that same day. The Soviet proposal, privately communicated to the United States the day before, initiated a five-month unilateral moratorium on all Soviet nuclear testing, which could be extended indefinitely if the United States was willing to suspend its underground nuclear explosions.

Denying that the U.S. inspection proposal was designed to defuse the impact of General Secretary Gorbachev's offer, McFarlane announced that the Administration had no intention of entering into a nuclear explosion halt until it had redressed what it believed to be a Soviet advantage in strategic forces.

He then went on to issue a charge that would play a prominent role in subsequent Administration efforts to discredit the Soviet offer: that just prior to initiation of its unilateral testing halt the Soviets had actually accelerated their nuclear testing program. "Clearly, this was designed to put the Soviet Union in a position not to need to test over the next five months . . . and to break out on an accelerated schedule." Drawing an analogy between the current Soviet offer and a bilateral halt that had ended in 1961 with "the largest series of high yield explosions in history," McFarlane warned that within a few months, the Soviets might "break out on an accelerated schedule—as they did in 1961—after that time, if they choose, without real cost to the Soviet programs."

In an ABC "Nightline" interview, McFarlane expanded on this theme, declaring: "In fact, the appearance, the reality that this was a contrivance is proven, I think, by the fact that in the past few weeks they've accelerated the number of tests that they've had so that they wouldn't need to test for the next five months or so." He cited CIA figures indicating that the Soviets had conducted three nuclear explosions "in a matter of days from this broadcast." Hinting that these tests were only the tip of an iceberg, McFarlane then quickly invoked classification to avoid any further questioning on the subject, explaining that "what we know about Soviet testing is not a matter that we would normally make public."

Although McFarlane's interviewer, Ted Koppel, had the current Department of Energy figures listing four Soviet tests in 1985, he did not press McFarlane to explain the discrepancy between what the CIA and the Department of Energy were saying about Soviet nuclear explosions. Instead, he conceded the point, saying, "Well, let's assume—and we have good reason to assume it because you say so . . . that indeed the Soviets have been jamming it all in and that they've now done whatever they want to do for the time being."

Much of the national media adopted the same unquestioning attitude. Editorial writers around the country quickly seized on the reported flurry to Soviet nuclear explosions to discount the significance of Gorbachev's offer. In an editorial which poured scorn upon the notion of a testing moratorium, the New York Times wrote that the Soviet offer "would ring hollow even if it had not come immediately after an energetic series of Soviet test explosions." The Philadelphia Inquirer, while favoring an eventual ban on all nuclear explosions, pointed to the Soviets' having "just completed a round of tests" as evidence that their offer was pure propaganda.

In Congress, Administration supporters were quick to use the reported testing flurry to discredit Gorbachev's initiative. The morning after the "Nightline" interview, Representative William Broomfield of Michigan, ranking Republican on the House Foreign Affairs Committee, denounced the moratorium offer as "another exercise in Soviet dishonesty." Describing it as something that "smells like leftover borsht," Broomfield concluded that "coming just a week after the Soviets set off three nuclear explosions, it makes you wonder if there really is anything new in Moscow other than the smiling face of Gorbachev."

Within a few days, the Department of Energy increased the number of announced Soviet nuclear tests from four to five, lending further credence to McFarlane's claim of a July testing acceleration. CIA liaison officer Pat McGowan confirmed that at least three Soviet test explosions had been detected in July but would give no further details about what was now being described as an "orgy" of Soviet testing.

But data available from the Department of Energy and the Swedish National Defense Research Institute (which monitors nuclear explosions for the Swedish government) show that there was no sudden acceleration in Soviet nuclear explosions. The Soviet Union conducted three nuclear test explosions in July. Two of these were conducted at the Soviet test site in East Kazakhstan near Semipalatinsk and are undoubtedly part of their military program. The other test was conducted in the northeastern part of the Soviet Union, outside the normal military testing sites. This test is believe to be a "peaceful nuclear explosion" (PNE). The Soviets have long had an active PNE program, and according to a Swedish expert, "It is the first time they have carried out a peaceful explosion there. . . . It is difficult to tell, but the explosion may be part of a project to store natural gas."

Three tests in one month hardly constitute a sudden acceleration in the Soviet testing program, nor do they bring the yearly total to a level consistent with previous years. By way of comparison, at the same time last year, the Soviets had already conducted 11 tests, consisting of eight presumed weapons tests and three PNEs. Between January and July of 1983, they conducted 13 tests, six of them military explosions and seven PNEs. Between 1980 and

1984, the Soviets have averaged about 25 nuclear explosions per year. If anything, this year's Soviet testing program is less energetic than previous years.

The Administration cannot seriously believe that three tests in one month represent a sudden acceleration in the Soviet program, or that in stopping at seven tests the Soviets have completed their program for the year. Nor can it plausibly argue that the Soviets are ahead of the United States in nuclear testing. Overall, the United States continues to lead the Soviets by 754 to 561 nuclear explosions. The United States conducted nine nuclear explosions in the first seven months of 1985, to the Soviets' seven, and the new U.S. warheads being tested represent more sophisticated technologies than their Soviet counterparts. [The United States conducted a tenth test on August 17, after the Soviet moratorium had gone into effect.] As the Republican chairman of the Senate Intelligence Committee, David Durenberger of Minnesota, recently remarked: "If the United States and the Soviet Union could not test their nuclear devices, neither country could make potentially destabilizing qualitative improvements in their nuclear weapons. . . . A Comprehensive Test Ban Treaty would stop menacing Soviet developments while preserving the technological edge the United States enjoys in their nuclear warheads."

McFarlane's mythical testing flurry represents the same kind of disregard for the facts that has characterized much of the Reagan Administration's response to previous calls for arms control. Three years ago, when support for a nuclear weapons freeze began sweeping across the country, the Administration responded with patently ridiculous declarations that a freeze would threaten U.S. security since, in Reagan's words, "On balance the Soviet Union does have a definite margin of superiority." Today, unable to justify its opposition to a simple halt in nuclear explosive testing and unwilling to resume negotiations for a comprehensive test ban treaty, the Administration is again resorting to scare tactics and disinformation.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that the American labor movement has no future. Last week, I showed that the American labor movement is alive, well, and contributing to virtually every important aspect of American life. Today, I intend to challenge the notion that organized labor is entrenched in its past and has no vision of the future. Critics maintain that unions are not up to the task of meeting the challenges of a changing economy or of even recognizing that the economy is in fact changing. The truth of the matter is that the AFL-CIO is taking a hard look at itself, its members, and the changing American and international workplace. New strategies are being developed to meet these challenges. Recently, the AFL-CIO Committee on the Evolution of Work published a report that was the culmination of 2½ years of close study and self-evaluation. Entitled "The Changing Situation of Workers and Their Unions," the report directly faces not only the problems of today but also the opportunities that the future holds for the American labor movement.

In its report, the AFL-CIO has proposed creating new categories of membership for those workers who have lost their jobs in declining industries. Heretofore, when a union member was separated from his job and subsequently went to work in a nonunion setting, the union lost all contact with its member. For those workers, the report recommended the creation of an associate membership whereby the worker will continue to receive union publications and participate in union political and community activities.

This is not a trivial recommendation, for 27 million workers, or 28 percent of the nonunion labor force, are former union members, most of whom left the union simply because they changed jobs.

Just last week, at the AFL-CIO's biennial convention, approval was given to offering associate memberships to millions of nonunion workers.

Despite the obstacles placed in the path of unions in the United States today, organized labor has made significant gains into growing areas of the economy—the public and service sectors.

The public sector, which comprises Federal, State, county, and city workers, has grown tremendously since the end of World War II. The AFL-CIO's success in organizing these public servants has been phenomenal. In the early 1960's, only 5 percent of these workers were unionized. Today, 50 percent are.

Just this ygar, the AFL-CIO's industrial union department has won an overwhelming majority of the organizing elections held in eight Southern States.

Internationally, the AFL-CIO is trying to develop free trade movements in the underdeveloped nations and has been an avid supporter of the Solidarity Trade Movement in Poland.

Clearly, the American labor movement can reply to its critics that accounts of its death have been greatly exaggerated.

Mr. President, I am pleased that the American labor movement is still vigorous, because I believe the enduring strength and vitality of unions and unionism is essential to the continued prosperity of our Nation.

NAZI WAR CRIMINALS, A CONSTANT REMINDER OF GENOCIDE

Mr. PROXMIRE. Mr. President, the search for Nazi war criminals continues. The hunt for the perpetrators of the horrible crime of genocide serves as a constant reminder of the Holocaust and our need to ratify the Genocide Convention to make genocide an international crime.

According to an article in the October 27 Washington Post "Parade" section, Nazi hunters will now concentrate on apprehending Alois Brunner, the most notorious Nazi criminal known to be alive.

Alois Brunner was responsible for sending over 100,000 people to Nazi death camps. As one of Adolf Eichman's top aides Brunner rounded up and deported Jews and others from Austria, Greece, and France. Dr. Mary Felstiner, an expert on Brunner, estimates that he sent 47,000 Jews from Vienna to the Nazi camps, of whom only a few thousand survived. He also rounded up and deported 44,000 Jews and non-Jews from Greece, of whom an estimated 1,475 survived; of his 23,500 victims from France, less than 10 percent survived.

Dr. Felstiner believes that Brunner is still alive today and a resident of Damascus, Syria, where he once worked for the secret police. Now that Mengele is presumed dead by most authorities, the Simon Wiesenthal Center hopes to use the $1 million reward money they had originally offered for information leading to the capture of Mengele to capture Brunner and others like him.

Abraham Cooper, associate dean of the Wiesenthal Center, explains that the center is currently trying to get France to extradite Brunner from Syria. According to Cooper:

> Several other countries, including West Germany, have tried and failed (to extradite Brunner), but the French have a special relationship with Syria.

Mr. President, it is an outrage that Alois Brunner has escaped trial for 40 years. What is still more outrageous is that he is widely suspected to be living in Syria where he continues to escape extradition.

The fact that Nazi war criminals continue to evade trial for their crimes is further evidence supporting the need for ratification of the Genocide Convention. Article IV of the convention specifically states that:

> Persons committing genocide or any of the acts in article III shall be punished, whether they are constitutional responsible rulers, public officials, or private individuals.

Let us hold the perpetrators of this horrible crime responsible for their crime. We cannot afford to allow notorious criminals like Alois Brunner to escape punishment. We must take action to prevent future Alois Brunners from escaping trial. We must ratify the Genocide Convention.

ORDER OF PROCEDURE

Mr. PROXMIRE. Mr. President, I have 15 minutes reserved, but in view of the fact that I took the leader's time this morning, I am going to yield that time to my good friend from Ten-

51-059 O-87-37 (Pt. 22)

nessee [Mr. GORE], which he may use or yield to other Senators. I understand Senator GORE is speaking on behalf of the ABM Treaty, a noble cause. I was one of 88 Senators who voted to affirm that treaty in 1972. If he would like to use any part of my time he is welcome.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR GORE

The PRESIDING OFFICER (Mr. SYMMS). The Senator from Tennessee is recognized.

ARMS CONTROL

Mr. GORE. Mr. President, I appreciate the courtesy of the Senator from Wisconsin. I have reserved time later this morning for a speech on the subject of stability and the role of the single-warhead missile in achieving stability. I will speak a little later on that subject. But on this occasion, I want to join in a special order organized principally by the Senator from Rhode Island [Mr. CHAFEE], who is on his way to the floor, as one of a series of speakers on the subject of the ABM Treaty, which was, and stands as the single most important achievement of arms control in the latter half of this century.

Obviously, Mr. President, any comment made about arms control on the floor of the Senate today has to take account of the hopes and chances for progress at the summit meeting. The prayers of all Americans will accompany President Reagan as he travels to Geneva for his important discussions with General Secretary Gorbachev.

No one is going to suggest that the administration is to blame for lack of progress at that summit meeting if it comes to the summit prepared to make a strong case for its own vision and to resist Soviet demands that are patently unacceptable.

For example, Soviet efforts to equate their radar at Krasnoyarsk with modernization of existing United States facilities should be rebuffed. Soviet demands for the total suppression of United States research in fields related to SDI should also be rebuffed. And, if it turns out that progress cannot be made because of Soviet intransigence on these points, then so be it. But our own position at Geneva must be forthcoming and constructive, and in some respects I fear that it is not.

The President's recent redefinition of the meaning of the ABM Treaty has, I fear, effectively destroyed its value as a means of controlling new technologies that can undermine arms control. And the new interpretation of agreed statement D is preposterous. Taken to its logical conclusion, just to cite one example, this new reading of the treaty would have us believe that land-based ABM components are banned, but if either superpower can arrange for these land-based components or this analogs to be based in space, then they are permitted. Such a result is patently ridiculous and patently foreign to the understandings of those who negotiated the treaty, of those who presented its terms to the Senate in asking for ratification, and of those who have guided our policies in adherence to the treaty for these past 13 years.

The fact that Secretary Shultz managed to wrangle a de facto policy of strict compliance from the administration has distracted our attention. Even if we wanted to press the new limits implicit in the President's version of the ABM Treaty, we could not do so for years.

What matters is that the de jure meaning of the treaty has been changed out of all recognition. Notwithstanding testimony before Congress at the time of ratification, notwithstanding the confirmation of that view by all succeeding administrations, including even this one, all that has been swept away. This treaty is now held to mean that, while the ground-based designs favored by the Soviet Union are strictly limited so long as they are fixed in location, nothing whatsoever governs the space-based plans of the administration—that research and development and production of components may occur without legal restraint, the final barrier being only an obligation to consult prior to deployment.

One needs only to have an American sense of balance and equity to see that this stand lacks merit. It would be equitable for the administration to seek to reinforce and restore constraints on research, testing, and development, and it would be in the national interest as well. Instead, however, as we approach the summit, the administration, in the very design of the latest counterproposal, seems intent on forcing Soviet acceptance of a regime where space-based antimissile weapons can be developed without the kind of constraints that the ABM Treaty was written to provide.

One of our most perspicacious journalists has observed that much of the public support for SDI derives not from faith in the goals of the system but from a belief that it is the ultimate bargaining chip—provided that the President cashes it in at the right moment. Many people believe that, despite every appearance to the contrary, he will do that. Until recently, I was among that number.

It is extremely hard to retain any such confidence, in view of recent events. Many still do; but if, in the end, the President, by his actions, convinces them that he will cling to SDI despite any other possibilities for gain in arms control, they will draw certain conclusions. Their conclusions might well be that the legislative branch of our Government must act to enforce a restrained pace of development in SDI that will allow a rational decision, only after the next national election, as to whether or not we wish to go forward full speed in this new acceleration of the arms race.

The President goes to Geneva with the control of events in the palm of his hand. One hopes that he will use that power wisely, and one prays that there will be constructive results on the issue of arms control in Geneva.

I wonder at times, however, what force language has for the administration on the subject of arms control. Not only have we seen this recent reinterpretation of agreed statement D; we have also seen wavering on the definition of the SDI program itself.

Many are confused as to whether it is intended to be near-perfect defense of our people or a limited defense of our missile silos. Is it intended to defend this country or all our allies as well? Is it to replace deterrence or strengthen deterrence?

And yet, despite confusing, contradictory administration statements about SDI, two points at least have seemed clear: First, the President has been consistent in his desire that SDI become a near perfect defense of the country, rendering nuclear weapons impotent and obsolete. In the last week, however, the President's own exposition of the purpose of SDI have been so far afield as to require several interventions by the White House press office to expunge the record.

Second, we have had the famous criteria laid down by Paul Nitze, the senior arms control specialist in this administration; and one of those criteria has been that the SDI system must be cost effective. In other words, the expense of its deployment must be proved to be less than the expense of offensive countermeasures with the capability fo overcoming SDI.

This particular criterion has been particularly significant because in theory it is the counterargument to those who say that introduction of defenses will trigger the kind of double arms race which the ABM Treaty was created to prevent. So, in theory, the supporters of SDI have had an answer for that concern.

Recently, however, we have seen a willingness by Secretary Weinberger and his assistant, Richard Perle, to discard the Nitze criteria out of hand, in an almost contemptuous manner—as if the requirement for cost effectiveness is well meaning but inconvenient and unworkable.

There have even been statements coming out of the Department of Defense that if we could deploy SDI for $100 billion and the Soviets could

deploy offensive countermeasures capable of overwhelming it for only $80 billion, then we should go forward anyway. Mr. President, any such assertion involves a form of madness. Truly.

The ABM Treaty was based more than anything else on the realization that an open-ended double arms race, both in offensive weapons and in defensive weapons, would quickly follow a decision by the superpowers to begin supplementing their offensive arsenals with defenses of their missiles.

Some in this administration, and one hopes the President will ultimately not be among them—present evidence to the contrary—seem to be all too willing to discard that central wisdom which led to the ABM Treaty along with the clean meaning of its words.

The latest counterproposal which I will discuss a little bit more at a later time this morning has just such implications for our policy toward defenses and offenses.

In closing my portion of this special order, Mr. President, I call the attention of my colleagues to an editorial which appeared recently in the Boston Globe which I ask unanimous consent to have printed in full at the conclusion of these remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Nov. 6, 1985]

THE MOBILE-MISSILE PLOY

A worm was in the arms-control apple President Reagan proferred to Moscow last week: an unexpected stipulation that both the United States and the Soviet Union should abandon plans to convert their land-based missiles to a mobile force.

The attempt to outlaw two Soviet mobile missiles, SS-24s and SS-25s, and to kill the US Midgetman program, which Congress has backed, is a ploy by Pentagon hawks to shore up their arguments for pushing ahead with "star wars" space defenses.

The nuclear balance is most stable if both sides have missiles that are not likely to provoke, or to be used in, a surprise attack. Mobile ICBMs have one of the vital advantages of submarines: they cannot be confidently targeted by an aggressor.

Pentagon hawks who want to avoid arms curbs that would cut into US production plans have opposed mobile missiles for several reasons. One apparent goal is to throw an unexpected curve that the Soviets will be sure to reject. Their SS-24s and SS-25s are far along in development.

There is an even more important reason: the hawks' desire to build momentum for "star wars," Reagan's Strategic Defense Initiative.

The president's original notion of building an impermeable space shield that could protect cities and populations has been widely debunked. As that has happened, "star wars" advocates have switched to the argument that space defenses "enhance deterrence" by making fixed-base missiles "survivable."

Mobile missiles are survivable by virtue of staying on the move. They do not require antiballastic missile defenses. This eliminates the residual case for building "star wars."

Dropping mobile missiles means scrapping the US strategic doctrine so painstakingly hammered out in 1983 by the Scowcroft Commission. It reneges on the deal between the administration and Congress to permit a small production run of MX missiles in return for redesigning the US deterrent in a more stable configuration.

Sen. Albert Gore (D-Tenn.) immediately attacked the administration's double cross, saying: "This throws our consensus rationale for strategic planning into total disarray. In a democracy one cannot carelessly discard something so valuable and fragile as a strategic consensus."

It is not surprising that Pentagon hawks would sacrifice consensus in order to enhance the arguments for "star wars." It is alarming, however, that Robert McFarlane, President Reagan's national security adviser, placed himself in this camp. McFarlane alternates between flying with the hawks and facing the facts of national security. His own shifting influence is at times "destabilizing."

The mobile-missile ploy perpetuates the questions about good faith that have dogged the administration on arms control from the start and will continue to do so, apparently until the opening bell of the summit at Geneva, and possibly beyond that.

Mr. GORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR CHAFEE

The PRESIDING OFFICER. Under the previous order, the Senator from Rhode Island [Mr. CHAFEE] is recognized for not to exceed 15 minutes.

REAFFIRMATION OF THE ORIGINAL ABM TREATY INTERPRETATION

Mr. CHAFEE. Mr. President, first of all, I thank my colleagues for joining in this colloquy today, this discussion on the ABM. I thank Senator DANFORTH, Senator GORE, and any others who choose to participate.

Mr. President, this is the second colloquy we have sponsored on the Senate floor concerning the adverse implications of the administration's recent reinterpretation of the ABM Treaty. Last month, National Security Advisor Robert McFarlane made a sudden announcement of a reinterpretation of the Anti-Ballistic Missile Treaty, which has become administration policy. The administration now claims that the ABM Treaty permits development and testing of ABM systems "based on other physical principles." In other words, the U.S. Government now insists that the ABM Treaty would allow the strategic defense initiative to proceed beyond research to unlimited development and testing of new space-based weapons. Such a viewpoint flies in the face of the legal interpretations of past administrations, the negotiators of the ABM Treaty and the Members of the Senate who voted—88 to 2—for that treaty in 1972.

Mr. President, let us listen to what the chief negotiator said about the treaty. Ambassador Gerard Smith, who was our negotiator for the ABM Treaty, said in a letter to the editor of the New York Times, dated October 23 of this year:

It was not our (the ABM Treaty negotiating team) intention that any type of technology for space-based ABM systems could be developed or tested under the treaty.

The Senate's approval of the treaty in 1972 was based on that interpretation. Senator James Buckley voted against the treaty because he understood Smith's interpretation to be correct. And Senator Buckley disapproved of that interpretation and, therefore, voted against the treaty and said at the time:

Article 5 would have the effect, for example, of prohibiting the development and testing of a laser type system based in space. . . .

Senator Buckley voted against it because he recognized that limitation was in the treaty and, therefore, he was opposed to it.

Therefore, if the administration sticks to its new interpretation of the treaty, it is tantamount to overriding the understanding of the ABM Treaty on which the Senate acted in 1972. While I believe the treaty to be very clear, if the administration wishes clarification of the language they should utilize the Standing Consultative Committee which was set up in the treaty for just such an event. This seems to be a more prudent way of doing business than merely announcing a new interpretation.

Ambassador Smith, whose views deserve special weight since he was the principal negotiator, has said the new interpretation, "reduces the treaty to a dead letter." If the new interpretation stands, we will be off to the races in yet another area of weapons. He went on to say that, "this radical change in a central provision of the treaty, which is the supreme law of the United States, was apparently accomplished in secrecy without consultation with the Congress or U.S. allies for which this treaty has security significance."

This new version of the treaty is a complete reversal of the view held by every administration since the treaty was signed, including the present administration. The 1985 Arms Control Impact Statement, submitted by President Reagan to Congress, specifically stated:

The ABM Treaty prohibition on development, testing and systems, applies to directed energy technology (or other technology) used for this purpose.

Even the Soviets have explicitly confirmed their view that article V of the ABM Treaty completely bans development of space-based ABM systems. As Marshall Akhromeyev, Chief of the Soviet General Staff, stated in a recent article:

Article V of the Treaty absolutely, unambiguously bans the development, testing and deployment of ABM systems or components of space or mobile ground basing and, moreover, regardless of whether these systems are based on existing or "future" technologies.

In the face of vigorous opposition from the allies, Congress and arms control advocates, the administration has retreated somewhat—claiming that since SDI has so far been limited to research— the new interpretation is a "moot point." Yet, the administration continues to claim that the new interpretation is the "fully justified" official version of the treaty. This viewpoint puts the treaty in serious jeopardy, since the administration could adopt the new version at any time, proceed with the SDI beyond research, and render the treaty meaningless.

There has been broad bipartisan support in the Senate for a prudent level of research on ballistic missile defense technology, including research on exotic technologies. I just heard Sentor DANFORTH state that he supports the research. I support such research. I do not know anybody in the Senate who is opposed to research. We are supportive of research because it is permitted by the treaty and, furthermore, it is a subject that is not verifiable. For the United States not to proceed with research, in my judgment, would be a great mistake. It makes no sense to undo the ABM Treaty, especially when the research needed to achieve a high-confidence defense against the Soviet missiles and bombers has not been identified, much less studied.

The importance of the ABM Treaty cannot be underestimated, Mr. President. As I said in the first colloquy, the ABM Treaty is important not only to us but to our allies.

I am a little bit disturbed about some of the comments we hear that we do not care what our allies think; that we are the big boys on the block and we should proceed on our own regardless of what our allies think. Well, Mr. President, I think that is a great mistake.

The sudden reinterpretation of the treaty came prior to the November 1 Dutch decision date concerning deployment of our 48 ground launched cruise missiles. Even though the Dutch decided to deploy—this sudden reinterpretation did not help the United States-Netherlands relationship. And, as you know, after the interpretation was announced by Mr. McFarlane, the backstepping came, headed by Secretary Shultz, and I think it was fortunate that that took place.

The existing situation—that we read the treaty permissively in principle not in practice—will continue to create friction with U.S. allies, as well as with the Soviet Union.

I once again call on the President to reaffirm in unambiguous language, the longstanding, traditional interpretation of the ABM Treaty which has been the cornerstone of our arms control policy for the past 13 years. Now is not the time to tamper with the most successful arms control agreement of the postwar era.

Mr. President, on October 31, Leonard Meeker and Pete Didisheim of the Union of Concerned Scientists testified on the subject of the ABM Treaty and the SDI before the House Foreign Affairs Subcommittee on Arms Control, International Security and Science.

Their testimony was a thorough examination of the need to reaffirm the intent of the 1972 treaty and the need to define the threshold between permitted research and prohibited testing. They came to many of the same conclusions as I that we must limit antisatellite weapons and clarify radar restrictions if we are to move forward in the delicate arms negotiations with the Soviets.

Mr. President, I commend this testimony to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

THE 1972 ABM TREATY AND THE SDI

(Statement submitted by Leonard C. Meeker, UCS Board Member, and Peter Didisheim, UCS Research Associate)

Mr. Chairman and members of the subcommittee, the administration's recent "discovery" of a new interpretation of the 1972 ABM Treaty represents a serious attack on one of the most important standing agreements between the United States and the Soviet Union. While it has been obvious that the SDI program would eventually come into conflict with the ABM Treaty, few observers expected such a direct attack as this attempt to revise the treaty. The wording of the treaty, the way it was presented to the Congress, the manner in which it has been observed in practice, and the relationship of the treaty to international treaty law make clear that the ABM Treaty's prohibition on development and testing of sea-based, air-based, space-based and mobile land-based ABM systems applies to *all* ABM technologies, and not simply to those in existence at the time the treaty was signed.

The objective of the ABM Treaty is clear; as stated in Article I(2), neither signatory to the treaty is to deploy an ABM system for the defense of its territory and not to provide a base for such a defense. The treaty is proscriptive in its approach; first it places a general ban on ABM system deployments, then it permits as a single exception the deployment of one limited system by each country (Article III, as modified by the 1974 Protocol). To argue that Agreed Statement D amounts to a further exception, one allowing *unrestricted* testing and development of exotic space-based ABM systems, is untenable given the basic approach taken by the negotiators in drafting the treaty.

The treaty interpretation now proffered by the Administration is clearly not the one presented to the Senate and endorsed by it in 1972, in connection with the Treaty's ratification. This was recently explained to your subcommittee by John Rhinelander, who served as legal adviser to the SALT delegation. Rhinelander's testimony states that top Pentagon officials, including then Secretary of Defense Melvin Laird, informed Congress in plain terms that the ABM Treaty would *ban* the development, testing, and deployment of space-based "exotic systems." The Senate approved the treaty, 88-2, in the understanding that there would be strict limitations on existing *and* future ABM technologies. Senator James Buckley (R-NY), one of the two dissenters, voted against the treaty largely because of his objection to the prohibition it contained against "the development and testing of a laser type [ABM] system based in space."

The US and USSR have both abided by Article V's complete proscription of air-based, sea-based, space-based, and mobile land-based ABM systems Until Robert McFarlane's October 6, 1985, announcement of a new treaty interpretation, the Reagan Administration was unequivocal in its acknowledgment that space-based ABM systems based on "other physical principles" cannot be developed, tested, or deployed without amendment to or withdrawal from the treaty. As explained in the Fiscal Year 1985 Arms Control Impact Statement (ACIS):

"The ABM Treaty prohibition on development, testing, and deployment of space-based ABM systems, or components for such systems, applies to directed energy technology (or any other technology) used for this purpose. Thus, when such directed energy programs enter the field testing phase they become constrained by these ABM Treaty obligations."

ACIS reports are cleared by the top levels of the Executive Branch and represent the Administration's official policy on treaty compliance. For 13 years the United States has adhered to a policy that placed strict constraints on space-based ABMs of all forms.

The Soviet Union has had a similar interpretation of Article V(1). While there have been few official Soviet statements regarding the ABM Treaty since 1972, recent commentary by General Secretary Mikhail Gorbachev and Marshal Sergei Akhromeyev confirms the standard view of the ABM Treaty. Marshall Akhromeyev stated on October 19, 1985: "the treaty absolutely unambiguously bans the development, testing and deployment of ABM systems or components of space or mobile ground basing and, moreover, regardless of whether these systems are based on existing or 'future' technologies."

The actual practice of both signatories in applying the treaty is plain. That practice bears importantly on the proper interpretation of the treaty. According to the Vienna Convention on Treaties, negotiated in 1968 and recognized by the U.S. as an authoritative statement on customary international

law, subsequent practice of the parties shall be taken into account in interpreting a treaty (Article 31, paragraph 3).

The Vienna Convention provides further guidance for a case of disputed treaty interpretation. Article 31, paragraph 1, states that "a treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given the terms of the treaty in their context and in the light of its object and purpose."

As indicated earlier, the object and purpose of the ABM treaty is clear; it is to prohibit the deployment of ABM systems for the territory of the United States and the Soviet Union and to prohibit the development and testing of sea-based, air-based, space-based and mobile land-based ABM systems. The ordinary meaning of the treaty's terms are self-evident. The Administration's argument that the treaty permits the development and field testing of ABM weapons and components based on new physical principles cannot qualify as an interpretation "in good faith."

Rather than respect the "object and purpose" of the ABM Treaty, the Administration has created a barn-door loophole that would serve to nullify the treaty's basic purpose. Good faith does not permit the invention of a destructive gimmick—years after the treaty was concluded—for the purpose of permitting outlawed activities.

While the Administration has stated "as a matter of policy" that it will not now avail itself of the reinterpretation, the Administration still maintains that the new reading of the treaty is legally justified. Administration officials have tried to cover over the issue by declaring it "moot." This effort to paper over the destructive effects of the new treaty interpretation has not been successful. The Administration's new position regarding the ABM Treaty led to immediate criticisms and protests within the NATO alliance. It will continue to cause damage to American security interests until the matter is resolved bilaterally with the Soviet Union.

The pending situation calls for action. The optimal approach would be a resolution of the question through explicit U.S.-Soviet agreement on the authentic reading of the ABM agreement in the Standing Consultative Commission (SCC), at the Geneva arms control negotiations, or at the November summit.

Inaction on the question is not a viable option, for it would leave in the public domain an erroneous treaty interpretation. A number of dangers would stem from this split-level policy of following one interpretation in practice while sanctioning a second, broader interpretation as a matter of law.

First, the Administration's current position will encourage the Soviets' own efforts to stretch the treaty's meaning unreasonably and could free them from treaty constraints on the development of advanced missile defenses. Under the reading of the treaty that the Administration has now advanced, the Soviets could place a laser weapon in orbit and begin testing it against ICBMs. The US would be unable to invoke the ABM treaty against such plainly illegal and threatening activities. To invite this risk is incongruous for an administration that increasingly seeks public support for the SDI by pointing to an alleged Soviet advantage in directed energy weapons.

Equally important, an unravelling of the treaty would put the Soviet Union in a position to deploy a nation-wide missile defense based on traditional ABM technologies in the near-term—an option that the United States had not maintained. While such a Soviet defense would be of limited effectiveness, it would require the US to invest in new offensive systems and could weaken Western deterrence. Even after deployment several years later of a limited US defense, it is likely that the US would suffer a net loss in retaliatory capability.

Deployments of limited defenses by the Soviet Union would doom any long-range hopes for the highly effective defenses sought by the President, since—as the Administration acknowledges—such defenses would require close superpower cooperation and large cuts in offensive nuclear weapons during the transition to a defense-dominant world.

A final danger emerging from the Administration's present policy is that it will be (and already has been) interpreted as meaning the Administration has bound itself to strict limitations under the ABM Treaty—which it has not done. Prior to this recent episode of reinterpreting the ABM Treaty, the Administration was already promoting a deliberately and dangerously lax interpretation of the treaty in order to permit the testing of ABM components in space under the guise of subcomponent testing.

As the 1985 Report to Congress on the Strategic Defense Initiative makes clear, the Administration intends to exploit to the fullest the treaty's ASAT loophole, and its ambiguities regarding the definition of "development" and "component," in order to rationalize SDI field tests that raise serious questions of treaty compliance. This strategy approaches the treaty as an inconvenient obstacle to be circumvented. This should not be overlooked in the current controversy over the even more egregious assault on the ABM treaty recently attempted.

In sum, the Administration's presentation of a new interpretation of the ABM Treaty, even though temporarily withdrawn as a tactical matter, has resulted in a severe challenge to the continued viability of the ABM Treaty regime in a fashion that will impair US national security if left uncorrected.

In our view, Congress has an essential role to play in resolving this issue. One constructive step has already been taken by the House Appropriations Committee in accepting an amendment offered by Representative Norman Dicks (D-WA) which calls for a "resolution of this question of Treaty interpretation through the SCC or other appropriate forum." Congress should continue to insist that the Administration promptly resolve the question directly with the Soviets. Congress should also incorporate into its defense funding bills language that confirms and supports the commitment made by the United States when it concluded the ABM Treaty in 1972. For example, Congress could insert the following statement into each of its defense bills:

"No funds in this or any other act shall be used for the development, testing, or deployment of ABM systems or components that are air-based, sea-based, space-based or mobile land-based, regardless of the form of technology involved."

Six further steps are needed to salvage the ABM Treaty regime in the face of present policies, both US and Soviet, that threaten it.

1. POLITICAL REAFFIRMATION OF THE TREATY

The United States and the Soviet Union should affirm their continued commitment to the treaty's limitations. A reaffirmation of the treaty could take the form of an agreed communique released at the upcoming Geneva summit. Without such a statement, a self-reinforcing cycle of mutual breakout fears could lead to protective actions by both parties that would ultimately undermine the treaty.

2. DEFINE THRESHOLD BETWEEN PERMITTED RESEARCH AND PROHIBITED TESTING

This distinction is inherently imprecise, but it is crucial, given that a total ban on ABM research is not verifiable. According to the US interpretation offered during the Senate ratification hearings, "The prohibitions on development contained in the ABM Treaty would start at the part of the development process where field testing is initiated on either a prototype or breadboard model. It was understood by both sides that the prohibition on 'development' applies to activities involved after a component moves from the laboratory development and testing stage to the field testing stage, wherever performed." However, the current SDI program plan includes a number of technology demonstrations or "experiments" that are, in effect, field tests. A clearer, agreed definition of the threshold between permitted and proscribed activities should be worked out among the negotiators at Geneva or in the Standing Consultative Commission (SCC).

3. THE GENEVA NEGOTIATIONS OR SCC SHOULD ALSO EXPLICITLY DEFINE ABM COMPONENTS ON THE BASIS OF CURRENT TECHNOLOGY

The Reagan Administration has attempted to reconcile the SDI technology demonstrations with the ABM Treaty provisions in part by defining the systems to be tested as "subcomponents" or "adjuncts" rather than ABM components per se. Use of the first term implies that the treaty restrictions on development and testing apply only to the largest components of ABM systems, in particular interceptors, launchers, and radar. The term "adjunct" implies that a given technology is intended to operate in conjunction with a major ABM component (e.g., an airborne optical sensor working in conjunction with a ground-based radar) rather than substituting for it. Legal specialists knowledgeable about the ABM Treaty negotiations dispute the Administration view and regard some of the planned SDI tests as inconsistent with the treaty. At the very least, these tests would move the United States deep into gray areas of the treaty, and they would certainly be perceived as violations by the Soviets.

4. RESTRICT TACTICAL BALLISTIC MISSILE DEFENSES

The treaty defines ABM as a system "to counter strategic ballistic missiles or their elements in flight trajectory," and thus implicitly allows the deployment of defenses against short-range ballistic missiles. This loophole was originally sought by the United States to accommodate a NATO ATM system, but it is the Soviets who have taken best advantage of it in practice. The newest Soviet air defense system, the SA-12, is assumed to have some effectiveness against tactical and theater-range ballistic missiles, and has reportedly been tested against the former. The NATO Patriot system now in development is intended to have a similar dual capability. The treaty forbids giving such systems ABM capacilities or testing them in an ABM mode, but these restrictions are in practice very imprecise, especially for defense against intermediate-range missiles whose trajectories may be quite similar to those of SLBMs. Because ATMs seem destined to erode the effective-

ness of the ABM Treaty and to invite growing controversies over compliance, they should be prohibited by agreement.

5. LIMIT ANTI-SATELLITE WEAPONS

ASATs are another increasingly relevant loophole in the ABM Treaty. Given the substantial overlap between ASAT and advanced ABM technologies, the development and testing of anti-satellite weapons offers a stepping stone to missle defenses within the formal constraints of the ABM Treaty. Reagan Administration officials have explicitly acknowledged that the SDI will exploit this loophole, and this is of course one reason for the current US opposition to an ASAT treaty. However, ASAT restrictions are an essential part of any serious effort to shore up the ABM Treaty. A ban on the testing of dedicated ASAT weapons would significantly strengthen the treaty (in addition to capping the development of US and Soviet ASAT capabilities before these weapons become a dangerous destabilizing addition to the arms race). A test ban could be adequately verified (in contrast to a total ban on ASAT possession) given the characteristics of the existing US and Soviet ASAT systems. While new ASAT technologies could be researched under such a treaty, these would not be reliable, operational weapons in the absence of extensive testing.

6. CLARIFY RADAR RESTRICTIONS

The United States and the Soviet Union have each challenged the legality of the other's construction programs of large phased-array radars. The US has been critical of the Krasnoyarsk radar being built in Siberia, and the Soviets have questioned the construction of American "PAVE PAWS" radars in Georgia and Texas, and the upgrading of radars in Greenland and Britain. The ABM Treaty forbids the construction of these large radars except when located on the periphery of each nation and oriented outwards. Resolution of the Krasnoyark issue has been a central concern of the Reagan Administration. An agreement on this issue is critical to any reestablishment of long-term confidence in the treaty, and it appears that a resolution is within reach if the issue is taken up seriously by the Geneva negotiators and/or the SCC members.

Mr. CHAFEE. Mr. President, again I wish to thank my colleagues who participated in this colloquy reaffirming the 1972 ABM Treaty. I think the purpose of this is to call attention to the other Members of the Senate and the public on how we feel, and to point out what seems to me the logic of our position and the importance of adhering to the judicial interpretation of the treaty.

RECOGNITION OF SENATOR DANFORTH

The PRESIDING OFFICER. Under the previous order, the Senator from Missouri [Mr. DANFORTH] is recognized for not to exceed 15 minutes.

THE ABM TREATY

Mr. DANFORTH. Mr. President, I express my appreciation to the Senator from Rhode Island [Mr. CHAFEE] for organizing this debate.

For 13 years the United States has maintained that the ABM Treaty bans the testing and development of space-based lasers, particle-beam weapons and other exotic weapons. Several weeks ago, however, the administration placed this longstanding policy in question by arguing that the treaty in fact "authorized and approved" the testing and development of these weapons, prohibiting only their deployment. This revision sets a dangerous precedent in our handling of international agreements and threatens the future of arms control.

Secretary of State Shultz, in attempting to clarify this change in policy, has emphasized that the United States will continue to adhere to the traditional, more restrictive interpretation of the treaty in its research under the strategic defense initiative, even though the administration has concluded that "a broader interpretation of our authority is fully justified." That this reversal of U.S. policy has been allowed to stand at all, however, is disturbing.

Under the broader interpretation, the treaty would not limit testing or development of space-based weapons that use lasers, particle beams, or other exotic principles. This interpretation is based on "Agreed Statement D" to the ABM Treaty, which states that if ABM systems "based on other physical principles" are created, limitations on them would be subject to further discussions.

Proponents of the stricter interpretation, including the treaty's negotiators in the Nixon administration, argue that article V of the treaty itself takes precedence. This provision states that "each party undertakes not to develop, test, or deploy ABM systems or components which are sea-based, air-based, space-based, or mobile land-based." Such a ban encompasses many of the systems envisioned under SDI.

The administration's reinterpretation of the treaty runs counter to both the intent and the text of the treaty. The central purpose of the treaty is the prevention of nationwide ABM systems. The treaty is, in places, ambiguous about how to achieve this goal. But to say that those ambiguities justify overturning one of the principal provisions of the treaty is wrong.

Mr. President, my concern about this revision goes beyond the technical question of what the treaty does or does not allow. The revision in itself has serious consequences for all arms control agreements.

It has been the hallmark of U.S. efforts in arms control to insist on precise language in agreements and strict adherence to that language. Time and again, United States and Soviet negotiators have agreed on broad goals, only to have the Soviets balk at putting those agreements into specific binding language. Disagreements about adequate verification provisions are perhaps the most prominent example. This revision renounces that history. Unilaterally redefining the terms of the ABM Treaty, because we now find it convenient to do so, endangers our credibility on a range of arms control issues.

Our concerns about alleged Soviet violations of arms control treaties—not to mention the clearly illegal construction of an ABM radar at Krasnoyarsk in central Siberia—rest on narrow and consistent interpretations of those treaties. If we abandon similar interpretations now, the Soviets will have no reason to adhere to the careful system of rights and obligations these treaties represent.

If the United States condones smudging the lines of a treaty by either side, there is no point in drawing careful lines. There is no point in signing treaties at all.

It is important to point out that this debate is not about the merits of the strategic defense initiative. I continue to support vigorous research in that area. Any decision to deploy a defensive system would require a fundamental change in our approach to deterrence and in our strategic policy. It would require far greater understanding of defensive weapons and capabilities then we now have. And most of all, it would require extensive discussion and agreement with our allies and with the Soviet Union.

That debate goes on today and will continue. Strategic defense will not eliminate the need for arms control agreements and, in fact, cannot survive without them. Any deployed strategic defense system will require a base of agreements on offensive and defensive arms to make it effective. If we destroy that base now, we will destroy the prospects for strategic defense in the process.

Mr. President, the United States has committed itself to a treaty, and for 13 years has held to a consistent view of its obligations under that treaty. To reverse that interpretation suddenly, and in a manner that fundamentally repudiates the intent of the treaty, is to make our word invalid, to threaten all of our international agreements, and to give license to other nations to follow suit. Few actions could have graver consequences.

RECOGNITION OF SENATOR GORE

The PRESIDING OFFICER. Under the previous order, the Senator from Tennessee is recognized for not to exceed 15 minutes.

Mr. GORE. Thank you, Mr. President.

STRATEGIC STABILITY

Mr. GORE. Mr. President, last week I made a series of speeches on the subject of strategic stability and I wish to continue that series this week.

Mr. President, in my last speech, I attempted to define the concept of price to attack, and to explain how it can be applied in the search for solutions to the problem of strategic stability. Today, I want to take that concept and suggest what it shows us, when used to analyze the possibilities inherent in the Soviet proposal.

Before getting on into that subject, however, I feel compelled to return briefly to the subject of my speech of last Wednesday, which dealt with the implications of the President's theories about SDI, as relayed by him to Soviet journalists.

I noted in that speech that it would not be long before the White House would have to correct the President's remark that we should not deploy SDI until all nuclear weapons had been destroyed.

That was, in fact, promptly done. However, the press spokesman left in place a much more important observation the President made; namely, that defense can be destabilizing. The President, moreover, has not abandoned that idea. Indeed, after the interview, he said it again.

I refer my colleagues to the New York Times on November 7, for the account of the President's news conference with reporters from news agencies. What he said was:

> * * * rather than add to the distrust in the world and appear to be seeking the potential for a first strike by rushing to implement a strategic defensive system, my concept has always been that we sit down with the other nuclear powers, our allies and our adversaries, and see if we cannot use that weapon to bring about the elimination—of that defensive system, for the elimination of nuclear weapons.

Let us look closely at the meaning of these words, before we are again told to disregard what the President says as "nonoperative," or as "Presidential shorthand." He has reaffirmed his view that combining defenses with offenses is dangerous. Proceeding from that premise, he has again suggested that we should not deploy SDI until all offensive nuclear weapons are gone, including those of the British and the French.

If the White House staff is pressed to explain this statement, they would probably again encourage us to assume that the President was momentarily confused, as he frequently seems to be when discussing the adventuresome new strategic policy he is charting for the country. But his basic instinct that the combination of limited defenses with formidable offenses is destabilizing is correct.

Mr. President, I shall now return to what I said at the outset was my main theme: using the idea of price-to-attack as a device for evaluating our possibilities in arms control.

The way this can be done is as follows. You begin with the provisions of a particular arms control proposal—and here I will use the latest Soviet proposal as reported in the press. From those provisions one can derive a set of nuclear forces which each side would have after they had brought themselves into compliance with the terms of the agreement.

I made such calculations, and they led to three illustrative force postures for the Soviets and three for ourselves. These force postures were consistent with the Soviet proposal, but with one major difference.

My analysis assumed rejection of the Soviet demands that we count forward based systems and that we give up all plans for modernizing our ICBM's. It assumed, in other words, that if the Soviets are serious, we could end up applying their ideas about how much to cut, to our idea about what to cut. The President is trying such an approach now, but with an important difference, as we shall see.

The next step is to analyze these United States and Soviet forces in terms of mutual stability. This can be done using price-to-attack methodology. The standard for a stable outcome would be one in which the price to carry out a first strike, whether measured in warheads of throw-weight exceeds the gains measured in warheads or throw-weight destroyed.

When these calculations are run, the results are clear. The same number of missiles and warheads can either be unstable or not, depending upon whether one has deployed mobile, single-numbered systems. If such systems are not deployed, then it remains possible even after major reductions, for one side to easily destroy the land-based missiles of the other, retaining a large force in reserve for other purposes. Introduce mobility, and the price to attack is so high as to compel the use of virtually all of one side's missile force in order to destroy only a component of the other's.

Mr. President, I prepared such calculations and, as I said in my speech last Tuesday, briefed them privately to Mr. McFarlane and others in the administration. I ask unanimous consent that these calculations be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. GORE. What these calculations show is that the Midgetman system provides a way to achieve radically smaller nuclear deployments that are stable—deployments, that is, which make it impossible for either side to gain even a theoretical advantage from a first strike, and this is the outcome which we have supposedly been pursuing for 3 years now.

Nevertheless, at a time when the President seemingly recognizes the risks to stability of moving toward defenses, he has offered to the Soviets a proposal that bans the right answer to this problem—the Midgetman—and embraces more firmly than ever, the very approach whose dangers he has acknowledged.

Mr. SIMON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Mr. President, I ask unanimous consent to use some of the unused time of a previous speaker.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SUMMIT

Mr. SIMON. Mr. President, I want to take a few minutes to comment on the summit, where we are going, and the importance of it.

I was one of those who last week was protesting the way we handled the Medvid sailor situation. I think it was unfortunate.

I want to make clear that I felt that it was mishandled because of the desire to see the summit not interrupted, and I think it could have been handled without interruption.

Our colleague from New Hampshire, Senator HUMPHREY, said the sailor could have been turned over to a neutral country, Switzerland or a country like that. I think that could have been done and we would have complied with our traditions.

But the importance of the summit can hardly be overestimated. Never before in all of human history has it been so important that two nations understand each other and that they get along. We are not going to like their system of government and they are not going to like our system of government. But let us not miscalculate because we can literally destroy everything.

In that connection, I am concerned that we seem to be taking steps to abrogate the ABM Treaty, to read it in terms that are clearly contrary to the terms of that treaty. I will later today or tomorrow enter a statement into the RECORD about my concerns in that direction.

One of the questions here is the question that was raised in this body by our colleague, Senator GOLDWATER, before the courts in the case of the Taiwan treaty: Can an administration unilaterally abrogate a treaty that this body has ratified?

Legal answers are unclear. I think it would be a disaster for our country, for our country's economy, for our country's security, for the world's security, if we were to move away from the ABM Treaty. I hope we will watch carefully what happens here.

I would point out to the administration that the congressional intent is very, very clear. It has been reiterated in conference language recently. We do not want to move away from that ABM Treaty.

If we were to move away from the ABM Treaty we would be in a rapidly escalating arms race. We already are in an arms race that is insane by any rules of logic. It is dangerous beyond the point that any of us can even understand.

Finally, I would add I have some hope for the summit. I think the very fact that people get together—and I wish it had taken place some time ago—the fact that the President of the United States and the leader of the Soviet Union are getting together is important so that they get some small areas of understanding, so we take some small steps forward.

I do not anticipate anything massively significant to come out of it. I think we would fool ourselves to expect that.

But some small steps forward I think can come out of it.

I hope among others there can be some small steps forward by our friends in the Soviet Union in this area of human rights. I was pleased that they are letting Mrs. Bonner come to the West for medical treatment, but it ought to go much beyond that—the Shcharansky case, the Sakharov case.

I have been working for some years now for a gentleman I met there, Prof. Naum Meiman, who is now 70 years old and retired. He is not in good health. His wife has had her fourth cancer operation. They want to emigrate to Israel. They want to live their last few days in freedom. Why not let them go? Those small gestures by the Soviet Union could mean a great deal.

In that same connection, we now have 29 divided spouses that we are aware of, American citizens who are married to Soviet citizens. The Soviet citizens want to emigrate to the United States. Even Mr. Gorbachev in Paris indicated they wanted to solve these issues. Why not make that small gesture as a right direction for the summit?

It would be in everyone's interest.

When I was last in Moscow, I visited with Roman Kupperman. His wife lives in the Chicago area. She is pregnant. Why cannot these two people who want to be together at this important time in their lives, be together?

In two cases, I have visited with the sons, small sons, of people and their own spouses have never seen those sons. That should not be.

Mr. President, someone the other day said to me, "Well, Americans ought to have more sense than to marry Soviet citizens." The reality is that love crosses barriers of religion, race, nationality, and citizen status and it always will. We are richer and better for that happening. Americans are going to fall in love with Soviet citizens, Soviet citizens are going to fall in love with American citizens. Let us let them marry and live together and do what every family wants to do by having a happy family life.

I hope the summit could make some small progress in that area. But most important of all is that the President and the Soviet leader meet and start

getting some minimum level of understanding—not pie-in-the-sky kind of thing; I hope no one has illusions on that—but some practical things where we can take some small steps forward. I think that is extremely important and I hope we can move in that direction.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

RECOGNITION OF SENATOR MELCHER

The PRESIDING OFFICER. Under the previous order, the Senator from Montana is recognized for not to exceed 15 minutes.

U.S. PHILIPPINE POLICY

Mr. MELCHER. Mr. President, after visiting the Philippines in 1983 I was bold to say to President Marcos and the State Department that unemployed Filipino families should have U.S. food aid; that assuring free elections, personal freedoms and the exercise of the democratic process was vital for the Filipinos; and that General Ramos' authority over the military should be strengthened.

President Marcos may have thought I was meddling and the State Department may have been miffed, but the times are critical, and I have persisted in efforts to arouse U.S. awareness of the slippage of our Philippine policy. In February of this year I again visited the Philippines and renewed my efforts with both President Marcos and the State Department on these same key policies.

The State Department may now well admit these three dominant factors in a successful relationship with the Philippines but to date the State Department has been bungling or ineffective meddling with the Government and business and structure. The decision by President Marcos to request to the Philippine Batasan—their parliament—for a new election for President and Vice President early in 1986 and his invitation for foreign observers to view the election is the right step. Opposition political leaders and their parties say they are ready.

The elections in 1984 for the Batasan were judged to be among the most successful in Filipino history in terms of participation and honesty. The ruling party, the KBL, held virtually every seat in the 180-member legislative body but the election of May of last year resulted in about one-third of the seats being gained by members of opposition parties. This past summer opposition leadership both within and without the Batasan pressured for a quick Presidential election. This spurred polling by both sides, which indicated widespread support in the countryside for retention of President Marcos over any of the opposition candidates. However, the economic conditions encouraging the growth of the insurgents is not in favor of the Government and subsequent polling may well reflect gains by the opposition.

I have several observations to make in regard to the electoral process in the Philippines. First, the 53 million Filipinos are firmly dedicated to practicing a free democracy. The dissatisfaction with the Government exists because of economic downturns, military abuses and the Government's use of extraordinary constitutional powers against individual rights.

Second, the question of succession of Marcos has been of great concern and was only partially resolved by the legislation placing the speaker of the Batasan in line of succession to the Presidency in case of death, incapacitation or impeachment. The Filipinos believe, as we do, that an elected Vice President is the more acceptable method of providing Presidential succession.

Third, the military abuses have resulted in innocent citizens being killed, wounded or oppressed. In addition, along with severe economic problems, military abuse has led to the increase in the numbers of insurgents. Some of the insurgents are of Communist ideology, but the bulk of them are in resistance forces because of the aforementioned circumstances and the armaments that they have are almost all stolen, bought or captured from segments of the Filipino military. Hence, it is urgent that the head of the Philippine military have the confidence and trust of Filipinos in all walks of life. General Maleos has that; he fills the bill.

I believe that the National Movement for Free Election [NAMFREL] should not only be certified but also encouraged to be active during the campaign. Also, appointments of two independent minded people to COMELEC should be made to fill this very important Filipino election commission.

I believe that the invitation extended for observance of the election should be accepted by the United States and other countries, particularly Asian neighbors. And, for our part, we should not only have observers from the Congress but objective election observers from the League of Women Voters and the U.S. Federal Election Commission.

The depressed economic conditions of the Philippines and particularly the need for food among Filipino families should not be held in abeyance by the United States awaiting the outcome of the election; 42 percent of the Filipino population is under the age of 15 and the food needs are pressing. The Filipino poor should not be held as hostage while great matters of state are resolved.

A consistent U.S. Philippine policy is not only desirable but absolutely essential for the strategic, cultural and trade needs of our two countries. The delay in establishing good policy has been thwarted by a fumbling State Department. Senator LAXALT's mission to establish clear U.S. policy will be wasted unless the State Department establishes clear intentions on military and election policies and prompt economic and food aid to the Philippines.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business with statements therein limited to 5 minutes each.

VETERANS DAY 1985

Mr. DOLE. Mr. President, there is no finer commemorative day on our calendar than Veterans Day, November 11, when we salute some of our Nation's best citizens.

CENTURIES OF SERVICE

November 11 was first proclaimed a national holiday in 1919, as an occasion to commemorate the signing a year earlier of the armistice that brought an end to World War I. For that reason, it was then called Armistice Day. In 1958 the name was changed to Veterans Day, in order to honor all former members of all branches of our armed services—to recall their sacrifices in war and to note their contributions to our peace and security.

Throughout our history, men and women of all ages, races and religions have been called upon to serve their country in the armed services. They have responded faithfully and proudly, from our first war, the American Revolution, until our most recent and hopefully our last, the Vietnam war.

Over that period of more than two centuries, 38 million men and women have served in the armed services during wartime. More than 90 percent of those served in this century. And there are now more than 28 million veterans living in the United States.

We honor all of them today, the living and those who have passed on. Each of them did his duty.

OUR NATIONAL RESPONSIBILITY

But we owe them more than just honor. These men and women have sacrificed much in the service of their country. Millions of them made the supreme sacrifice of their lives. Many

more millions were wounded or suffered injuries, often permanent and disabling. Tens of millions have risked their lives, and virtually all have suffered hardship and privation.

One important way we have tried to recognize their contribution and sacrifice is through our veterans' benefits programs. Benefits were started by the Continental Congress in 1776, and they have been expanded and improved throughout the years since. In his second inaugural, President Lincoln called upon the American people "to care for who shall have borne the battle, and for his widow and his orphan." That has become the motto of the Veterans' Administration, and it remains our national responsibility today.

So let us mark this Veterans Day by noting again the vital contributions of our millions of veterans and by rededicating ourselves to fulfill Lincoln's solemn pledge to the men and women who have served us so well.

EUROPEAN AFFAIRS SUBCOMMITTEE HEARINGS ON THE FUTURE OF NATO

Mr. PRESSLER. Mr. President, from September 13 to October 3, the European Affairs Subcommittee of the Senate Foreign Relations Committee held a series of seven hearings under the general title, "Is NATO Still the Centerpiece of U.S. Foreign Policy? Should it Be?" This extremely stimulating set of hearings, which I chaired, produced a variety of useful insights at a critical juncture, in the weeks before the summit.

Our distinguished colleagues might like to be made aware of these insights. I am convinced that they will find them authoritative and helpful. The complete transcript of our testimony will be published as a committee print in mid-December. USIA will be distributing the hearing record to our 200 embassies and consulates abroad, and the hearings were carried live by Radio Free Europe/Radio Liberty in 17 languages in Europe. VOA broadcast several hearings in 30 languages around the world. In addition, NPR, AP, UPI, Reuters, foreign embassies, and newspapers covered the hearings.

I commend my colleagues for their participation in these hearings as well as for their excellent questions.

We were extremely fortunate to hear from an excellent slate of witnesses that included the very best academic and policy expertise in the United States. Among the distinguished Government witnesses were Richard A. Smith, Administrator of the Foreign Agricultural Service of the U.S. Department of Agriculture, Geza Feketekuty, counselor of the Office of the U.S. Trade Representative, Stanton H. Burnett, counselor of the U.S. Information Agency, and the Deputy Directors of the Central Intelligence Agency and the Federal Bureau of Investigation. The distinguished panels of academics included Dr. Jeane Kirkpatrick, senior fellow at the American Enterprise Institute and Dr. Zbigniew Brzezinski, counselor at the Center for Strategic and International Studies at Georgetown University and Herbert Lehman, professor of Government at Columbia University, among many others.

The seven NATO hearings attempted to project NATO's greatest challenges for the 1990's. The analyses provided at these hearings will go a long way toward preparing the Senate for the challenges that shortly will face us. It behooves us to anticipate the tides of history, and to project the currents that will affect us all. We are extremely fortunate to have received 48 informed projections of what the future might bring.

Session 1 discussed "Soviet imperatives for the 1990's." It focused on the critical factors—diplomatic, political, economic, and military—that will be driving the Soviets to adjust their strategies and policies by the 1990's. Zbigniew Brzezinski gave us a tour d'horizon, followed by a panel addressing the Soviet "guns versus butter" dilemma. We often forget that the Soviets suffer from this dilemma far worse than does the United States.

Sessions 2 and 3 focused on "Soviet active measures." Session 2 was closed, with classified testimony presented. The testimony presented at the closed session has been declassified and will be included in our hearing record. Both sessions focused on the political and social means by which the Soviets foster their grand strategy outside the purely military realm. Included was a discussion of "front" organizations, and Soviet "targets" in the West: peace movements, the church, the media, journalists, parliaments, mass public opinion, trade unions, and youth groups, among others.

Session 4 was entitled, "The Crisis of Will in the NATO Alliance." The issues covered were broad, but tended to concentrate upon items that affect the unity and determination of the alliance. These included the differing perceptions of the Soviet threat and how to handle it, attitudinal differences between young and old in Europe on the utility of the alliance, and problems sapping the economic strength of the alliance: structural unemployment, inflation, an inability to innovate, and trade barriers.

Session 5 was entitled, "Crisis of Will in the Warsaw Pact." It focused on the problems the Soviets face within their alliance. These included distrust, problems with coordination and planning, economic rivalries, shortages, and severe military uncertainties. The effect of these difficulties upon the Soviet capacity to plan its strategy was analyzed, as were the opportunities thus created for the West.

Session 6 concerned "a NATO strategy for the 1990's." We dealt with a particularly difficult issue here: Given a host of threats and opportunities, should NATO's structure or mode of operations be altered to better meet changing world conditions?

Session 7 examined "NATO as a competing priority in U.S. policy." We asked a series of important questions. They included a most basic one: Given important and competing U.S. agendas in Europe stemming from trade imbalances and U.S. concerns over competitiveness and the common agricultural policy, how long can NATO's security policies remain sheltered from these strains? A second question was equally provocative: Given the growing importance of the Pacific Rim States, is NATO inevitably to be overshadowed in U.S. policy? Should it be? Can we do anything to stop that natural evolution? Finally, we asked: Given the other competing agendas the U.S. faces, how can the U.S. balance its commitment to NATO and still properly address the international debt crisis, the Soviet threat in the developing world, international economic changes, and regional crises?

I hope that all of us will further examine these important issues, and urge an examination of the testimony that we are so fortunate to have collected, and to distribute it as widely as possible. If we are to meet the challenges of the 1990's, and if we are to remain free and secure in a world full of uncertainty, we must remember that there is no substitute for informed analysis and rigorous study. I believe that we have taken a major step in that direction, but we must not relax our guard. The Soviets think and plan in terms of decades; we must move beyond a month-to-month and year-to-year frame of mind as we develop policy. We have made an excellent beginning in the Senate Foreign Relations Committee under Senator LUGAR's strong leadership. Let us continue that effort as we plan our national strategy for the 1990's.

AIDING THE ANGOLAN FREEDOM FIGHTERS

Mr. TRIBLE. Mr. President, during the past several weeks, the public debate over whether America will keep faith with the Angolan Freedom Fighters has intensified. Richard Bissell, of the Georgetown Center for Strategic and International Studies recently made a valuable contribution to this debate, and I ask unanimous consent that a copy of his column from the Washington Post appear in the RECORD at the conclusion of my remarks.

Few debates, in Congress or out, are as important as those focusing on America's obligation to the world's freedom fighters. Few debates pose such a challenge to America's commitment to foster democracy around the world.

In strategic terms, the United States cannot remain idle while Communist regimes entrench themselves in Afghanistan, in Nicaragua, or in Angola. The strategic importance of the Middle East, Central America, and Southern Africa is simply too important to the West to give the Communists free rein.

Moreover, as the exemplar of freedom, can the United States simply stand by, knowing that our lack of resolve might well consign hundreds of thousands of people to the permanent bonds of communism?

Regrettably this is the approach that the United States has taken toward Angola. For the past decade, America's hands were tied by the Clark amendment, which prohibited U.S. assistance to the UNITA rebels under Jonas Savimbi. During that time, the Soviet Union and Cuba poured troops, weapons, and financial support into Angola to prop up the Marxist government.

Earlier this year, as a signal of our concern about the Communists' military buildup and the trampling of human rights in Angola, the Congress wisely repealed the Clark amendment. The Congress is likely to consider legislation soon that authorizes $27 million in humanitarian aid to the UNITA forces, a sum smaller than that which the Soviets turned over to the Marxist government in the first month after it seized power in Angola.

The simple question we must ask ourselves is whether this is too high a price for the freedom of Angola and its citizens. I believe it is not too high a price, and I hope my colleagues will agree that Jonas Savimbi and his UNITA troops are well worth the investment.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 8, 1985]

AID TO UNITA MEANS PEACE

(By Richard E. Bissell)

The debate over U.S. policy toward Angola has taken a sharp drift toward polarization in recent weeks—typified by the contributions to this page by Jeane Kirkpatrick [Oct. 27] and Randall Robinson [Nov. 3]. In their unveiled partisanship toward the two parties in the Angolan civil war—UNITA and MPLA—they unintentionally increase the likelihood of a win-lose confrontation over U.S. policy. That strengthens the image abroad of a United States divided over foreign policy and, probably, extends the suffering of the Angolan people in this civil war.

The bottom line for U.S. policy on Angola should be the interests of the United States and the Angolans. And the need for peace and democracy in Angola should be manifest: not the peace of the graveyard, but the peace of a growing and open society.

Translated into policy choices, that means the U.S. government should provide aid to UNITA. Many people find this an unfashionable thought, mistakenly believing that aid to insurgents universally encourages wars. For Angola, a better case can be made that aid to UNITA is the pathway to a lasting peace.

Real understanding of the role aid might pay lies in the realities in Angola. The ruling MPLA in Luanda has proven itself unable to put together a "national" government in its 10 years in nominal power. Even with the assistance of Gulf Oil on the economic side and East Bloc advisers for the rest of the government, the MPLA is a formula for bad government. But is has to be counted into the peace process.

On the other hand, UNITA is unlikely to overthrow the MPLA government. Driving 35,000 Cuban soldiers into the sea is an unlikely prospect for any black African army. Jonas Savimbi, the president of UNITA, has demonstrated his staying power and his political skills by governing roughly a third of the country. At the same time, he has unavoidably come to depend on South Africa for much of his "power of last resort"—causing an unfortunate injection of black-white politics into Angolan politics. Still, UNITA has earned a central place in a peace process.

The challenge is to wean UNITA from South Africa and the MPLA from the Cubans. So far, the United States has talked only of getting the MPLA to change course. To be evenhanded, this country should also be proposing aid to UNITA, in order to get Savimbi to loosen his ties with South Africa. When both tracks—with the MPLA and UNITA—have been successful, we shall begin to see the factions for conciliation on both sides willing to discuss seriously a coalition government.

What, after all, is the peace process in Angola? It is the establishment of trust between ethnic groups that have always been at odds. It is a set of careful steps meant to introduce gradually more open modes of governing. It may even involve the devolution of some powers from a potentially dictatorial central government to the various "nations" that make up Angola.

The first steps in establishing that mutual trust will have to be the elimination of Soviet and Cuban force deployments from the MPLA side and of South African forces from support of UNITA. Both can be accomplished; Washington knows that from conversations with sensible individuals on each side. But the United States will have to move to establish more tangible ties with UNITA for it to be accomplished. And its aid will have to be sufficiently open to increase, rather than reduce, the trust between Angolan factions.

We are not talking about a lot of aid. From UNITA's point of view, the amount and cost of military assistance is not a big issue. Its side of the war is not generally fought with great expenditures of hardware; much of UNITA's military supplies are captured from the MPLA. And what has to be supplied from elsewhere could be purchased from trickles of private donations and small amounts of U.S. covert aid. The United States needs to be primarily in the business of social/economic aid.

Jonas Savimbi has major needs. For instance, food aid has not been evenly distributed in Angola, and indications of malnutrition in UNITA-held areas are simply punishment inflicted on future generations. In the peace process, as a military truce takes hold, the economy will need to be placed back on the development path.

The proposal to aid UNITA encounters great skepticism. The State Department is clearly hesitant to get involved, but apparently ready to announce its willingness to go along with some humanitarian assistance. Some people who have spent much time on the Angolan issue are doubtful that shared power can ever be achieved in such a poisoned environment. And others see American "meddling"; but would they prefer the current meddling and a continuation of the destructive warfare that Angola has known for too long?

MEMORIAL TO WOMEN VETERANS

Mr. EAGLETON. Mr. President, today I am pleased to cosponsor Senate Joint Resolution 156, which would authorize a memorial to women who served in the Armed Forces to be erected in the District of Columbia.

I commend Congresswoman MARY ROSE OAKAR for introducing the bill and getting the ball rolling for recognition of this forgotten group of veterans—women veterans.

Yesterday, we, as a Nation, stopped to remember those veterans that have served our country so bravely throughout the years. I believe that too often the more than 1.2 million women veterans are often forgotten heroines. Only recently have these veterans begun to receive pensions, veterans preference in government jobs, education under G.I. bills, and medical treatment from the Veterans' Administration.

The St. Louis Post-Dispatch has written a fine article, "'Invisible Veterans' Still Struggling for Recognition." I am proud to add my name to the growing list of cosponsors in the Senate, and urge for its quick passage.

Mr. President, I ask that the text of the Post Dispatch article be printed in its entirety.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

'INVISIBLE VETERANS' STILL STRUGGLING FOR RECOGNITION

(By Charlotte Grimes)

"Women veterans. Isn't that a contradiction in terms? Men are veterans, not women. Men are drafted; men bear the burden of national defense. Women can provide some support services: They can fold bandages and answer telephones. But who thinks of women as veterans?"—June Willenz in "Women Veterans: American's Forgotten Heroines"

WASHINGTON.—Like a lot of young, gung-ho Marines in World War II, then-Pvt. Georgia Rahmoeller of Des Peres greeted a parole from nearby Quantico Marine base for Washington with a mixture of excitement and terror.

Wartime Washington, for a recruit fresh from stern training, was the glittering end

of the rainbow, a city of lights and liberty, the City of Brass.

"I go in and here were all these officials and I'm just a private," recalled Rahmoeller, with warm laughter. "They'd been so strict at Quantico and you were so scared you weren't going to do the right thing. The first person I see is a nun—and I SALUTE her!"

Now, 40 years later, Rahmoeller looks forward to someday returning to Washington with her daughter, and maybe granddaughters, to see something that doesn't—so far—exist: a memorial to the women who, like herself, are veterans of America's wars, from the Revolution to Vietnam.

U.S. Rep. Mary Rose Oakar, D-Ohio, leading a contingent of other congresswomen, couldn't agree more.

She has penned a bill that authorizes a memorial to what she calls "women under fire." The idea has support from all the service branches, many veterans organizations, and women still serving in the military. Last week, the House unanimously approved Oakar's bill.

But, in an unusual move that has outraged the congresswomen, the Department of the Interior has come out against the memorial for women veterans. Officials at the department maintain that the memorial doesn't fit new guidelines and simply isn't necessary in a city close to being overcome by monuments to special military groups and causes. At the same time, the department is supporting a memorial to blacks who served in the American Revolution—a gesture that the congresswoman see as hypocritical and bigoted.

It is symbolic, they and other supporters say, of the disregard—even contempt—that the country has always shown to an unacknowledged group of veterans.

"It's the most forgotten group in America," said U.S. Rep. Patricia Schroeder, D-Colo.

If the men who served in Korea are the silent veterans, she and the other supporters, say, the women who served in all America's wars are the invisible veterans.

Today, more than 1.2 million women are veterans of the U.S. service branches. They account for 4.1 percent of all living veterans. And their numbers are growing as record numbers of women—once segregated in their own units and called WAVES, WACS, WAFS and SPARS—pursue careers in the all-volunteer military.

They get pensions, veterans preference in government jobs, education under G.I. bills and medical treatment—though it's generally agreed to be not all they need—from the Veteran's Administration. But almost all of those benefits are recent developments.

As the idea of a memorial for women veterans has grown in Congress, the movement for it has become a short course in women's history.

In wartime, women have been spies, couriers, clerks, nurses and fighters, doing, as Schroeder puts it, "whatever they could, or whatever they were allowed. They have been wounded, captured, shelled, gassed. And sometimes they have been killed."

As many as 20,000 women actively joined the American Revolution. Many were unofficial members of the ragtag Continental Army, tending the wounded, huddling in the snows of Valley Forge and subsisting on half-rations. Some, as several hundred would do later in the Civil War, dressed as men and fought with gun and bayonet. A few, like Margaret Corbin, became legends.

Corbin, who is the prototype for the mythical Molly Pitcher, took her dead husband's place at the cannon as the British charged. Later, at George Washington's request, she commanded a watch on the Hudson River. Wounded, surviving with only one arm, Corbin lived out her days as an invalid at the Army's academy, where she insisted that cadets salute her.

She is the only soldier from the American Revolution buried at West Point.

In World War I, when they still couldn't vote in their homeland, women ran communications for the Army in Europe. In World War II, women landed on Normandy 38 days after the D-Day invasion. They were part of the beachhead on Anzio, on the Bataan death march.

In World War I, 296 American nurses died; 100 of them are still buried in France. On the granite wall of the Vietnam Memorial here are inscribed the names of eight women.

But for those who survived, say supporters of the women veterans memorial, the hardest battles sometimes came after the war.

When Dr. Mary E. Walker, one of the first women to graduate from a medical school, couldn't get an officer's commission in the Union Army, she signed on as a nurse. As a spy for her side in the Civil War, she was captured and imprisoned for four months. For her uncommon valor, she was given the Congressional Medal of Honor. In 1916, a review board tried to take it back, dispatching men to her home to reclaim it.

Walker met them at the door with a shotgun.

And when she died in 1919, at the age of 86, she was still wearing the medal that was not acknowledged by her country until 1977, when President Jimmy Carter reinstated her name on the roll of recipients.

Among other, oft-cited examples:

Edna Gardner Whyte, who taught men to be pilots in World War II, wasn't allowed a pilot's ratings or rank for her work. Instead, she only got veteran's status as a member of the nurses corps and benefits far less than the male pilots she taught.

The 800 women known as WASP's (Women's Air Force Service Pilots) delivered planes around the world, served as test pilots and also taught men to fly in combat in World War II. But they were acknowledged as veterans and eligible for benefits only after a 30-year fight with the government.

The 7,000 or so nurses who served in Vietnam returned home from battlefield hospitals with no ideas that they, too, could be victims of delayed stress. And those who, after a year of patching together mangled bodies and watching the dying had nightmares, anxiety and breakdowns found that the Veterans Administration was ill-equipped to treat them.

For the most part, the women were simply ignored. Indeed, until the 1980 Census, there were not even any reliable figures on the number of women veterans. And the number of women who served in Vietnam remains an estimate—the Pentagon has no firm official figures.

Outside the government and the military, women veterans also found themselves in a shadow world.

Rahmoeller, who eventually became a Marine Corps sergeant, joined two brothers serving in World War II. "I felt I had an equal obligation," she said. And her father was proud to put three stars—the symbol of families with children in the war—in the window of their home.

But when the war was over and the stars came down, no one wanted to listen to her war stories. She, like a lot of other women in what was a national pattern, thought about joining a veterans organization.

"We thought about going in with the male Marines," said Rahmoeller, who is now head of the St. Louis chapter of the Women's Marines Association. She laughed. "They didn't want us so we formed our own organization."

Advocates for women's rights, like Oakar and Schroeder, shudder at what they see as the unfair and hypocritical way American women have been treated as members of the service and as veterans.

Schroeder takes particular aim at the traditional notion that women shouldn't be combatants—a policy that still keeps women out of some military occupations and is often criticized as a way of preventing them from advancing in their service careers. At best, she and others say, the policy is a fuzzy, paradoxical form of protection. Often it has simply meant that women could be put where they could be shot at, but they weren't supposed to shoot back.

The relationship between the U.S. Cavalry and women in frontier forts, says Schroeder, is a good example.

Army regulations of the time, she said, required that every fort have at least one women for every 7½ men.

"What was the purpose of these women in the fort?" she said to her fellow House members last week. "Well, they were there to do the laundry.

"It was really very interesting that when it came down to whether or not the men had to do laundry or to put a woman in a combat zone, we put women in combat zones, and thank you very much. They were not going to have detergent hands for male soldiers."

Under Oakar's bill, a memorial to women veterans would be funded by private donations and turned over to the government.

But meanwhile, the Senate still has to approve the memorial. And there is still the opposition of the Interior Department.

The Department, through the National Park Service, decides where memorials, once they are authorized by Congress, will go and takes care of them once they are built. The National Capital Memorial Advisory Committee, a quasi-governmental body of appointed citizens and headed by a Park Service official, also has some say by giving recommendations to the secretary of the interior on styles and locations for monuments and memorials.

This week, the advisory committee has a regular meeting. Oakar, armed with letters from congresswomen and other supporters, plans to be there to argue their case. But John Parsons, chairman of the committee and associate regional director of the National Park Service, expects to tell her that, in effect, as far as the Interior Department is concerned she's wasting her time.

The Interior Department, Parsons said, is only acting under new guidelines that limit memorials to individual wars or branches of the service.

The department, Parsons said, supports the Korean Veterans Memorial, because it fits the new guidelines, and a memorial for the blacks who fought in the Revolution. "We do not consider the black American Patriots a war memorial, frankly," said Parsons. Asked why the department was making a distinction between the memorial for blacks and the one for women veterans, he said: "Here were slaves and free black persons who participated in a revolutionary war in one fashion or another, and my feel-

ing is that is completely different from the other scenario being played."

The congresswomen who support the memorial for blacks and Korean veterans don't buy that at all.

"It's just totally outrageous that they should take such a stand," said Oakar. "We are outraged at the Interior Department's bigoted notion that they couldn't support all three memorials. That is just pettiness."

What she and Schroeder fear is that the advisory committee, to go along with the interior secretary, will delay the memorial with questions and paperwork. Or worse, I could consign the memorial to the kind of invisibility in which the women veterans themselves have existed.

"They could," Schroeder said angrily, "put it under the 14th Street Bridge or someplace else it won't be seen."

BURN AWARENESS WEEK

Mr. D'AMATO Mr. President, I rise today in support of Senate Joint Resolution 234, worthy legislation introduced by my distinguished colleague from California, to recognize one of the most common, but overlooked, medical tragedies—fire and burn-related deaths.

Every hour of every day 2 people die, 114 people are injured, and $2.5 million is lost because of fire and burn-related incidents. Each day 55 people die and 2,740 people are injured from smoke and burn-related causes. These statistics clearly point out the severity and prevalence of fire hazards.

Fire hazards affect two specific populations, children and the elderly, 35 percent of all deaths and injuries from fire and burn-related causes are children. Over 80 percent of fire deaths occur at home. Many children are unprepared to avoid fire, and too many parents do not have the education or resources to effectively respond to fire and smoke.

Over one-fourth of all fire deaths involve the elderly. These deaths usually occur because of carelessness with cigarettes and smoking materials; 40 percent of the victims are 55 years or older.

Senior citizens are unprepared to deal with fire hazards; 66 percent of the elderly do not have smoke detectors installed in their residences, compared to only 34 percent of the entire population which have failed to install detectors. Clearly, our senior citizens are not equipped to handle fire hazards, leaving these individuals vulnerable to catastrophe.

The public has done very little to address this issue. Information and education relating to fire and burn-related deaths has been minimal and scanty. Undoubtedly, the two populations most affected by fire have not been targeted for preventative education.

National Burn Awareness Week will bring the significance of this issue to the forefront, encouraging individuals to seek out information relating to fire hazards. It is my hope that a broader awareness of this problem will lead to more actions to alleviate the causes of the deaths of the many vulnerable victims who die from fire and burn-related causes each year. I encourage my colleagues to join me in this effort.

SYMMS VETERANS DAY SPEECH

Mr. SYMMS. Mr. President, yesterday the United States observed Veterans Day. I would like, for a moment, to focus the Senate's attention on the importance of that holiday.

Veterans Day, marks the date when, in 1918, the guns of the Great War fell silent. The "war to end all wars" was over and the world's relief was expressed in great celebrations on both sides of the Atlantic. In the United States, Armistice Day was also a day on which to remember the contributions of those whose bravery and sacrifice made victory possible: the members of this Nation's Armed Forces. This remains the reason for our observance of Veterans Day.

Often, busy schedules divert our time and attention from the real meaning of this holiday. On Veterans Day we took time to reflect upon the sacrifices of those Americans who have risked their lives to preserve freedom and human rights in this country and around the world.

There are many nations and cultures in the world today which suffer internal turmoil and violence as inherent elements of their political and social framework. The problems in Central America and Middle East frequently remind us of the fragility of peace. Many nations throughout the world still suffer under totalitarian regimes. Whether under right wing or Communist dictatorships, millions of people in these lands are denied the inalienable rights recognized by our Founding Fathers and guaranteed by our Constitution. Often, however, we take for granted the extreme sacrifices which have been made to preserve these fundamental human freedoms which we so deeply cherish.

American dedication to these ideals on which our Nation was founded, and the selfless sacrifice of the veterans of our Armed Forces who defend them with their lives, allows us to enjoy and preserve freedom in our society. Our stability and liberty continue because our people have had the strength to meet the challenges of totalitarianism and violence; a strength which springs from the vision of freedom expressed by the founders of our Nation. This same vision has remained within and emboldened our veterans through countless battles on our own shores and abroad.

At Saratoga, New Orleans, and Gettysburg their strength and dedication did not waver. At Reims, Marne, and the Somme they fought and many of them died for their country. At Midway, Iwo Jima, and Normandy their courage in the defense of liberty won them victory and the respect of the world. And at Inchon, Khe Sahn, and Hue their valor and commitment to their country's just cause was unshakable.

Veterans Day is a time to take stock in our freedoms and privileges, to recognize their origins and the sacrifices which are needed to preserve them. The burden borne by the veterans of the U.S. Armed Forces while protecting these liberties deserves not only our recognition, but our deep appreciation.

Yesterday, I joined all Americans in saluting our veterans, whose bravery allows our social fabric to remain intact and whose commitment to peace and liberty has brought a higher standard of living and human rights to millions of other people as well. We as Americans can never diminish the importance of the contributions made by our veterans. All veterans from every battle in every war share equally in their claim to our respect and gratitude. We must never forget our debt to them for their sacrifice; a debt which we formally recognize on Veterans Day, but which we will always owe.

NATIONAL BIBLE WEEK, NOVEMBER 24 TO DECEMBER 1, 1985

Mr. BRADLEY. Mr President, the 45th annual nonsectarian National Bible Week will be observed from November 24 to December 1, 1985. This celebration is sponsored by an autonomous interfaith laity organization, the Laymen's National Bible Committee.

The purpose of National Bible Week, which has been observed each year since 1941, is to remind all Americans of the place of the Bible in the development of Western civilization, in the history of America, and in the lives of all people.

Representative RALPH REGULA of Ohio and I are currently serving as congressional cochairman for National Bible Week. We invite you to join us by making your constituents and States aware of National Bible Week. Governors and mayors across the Nation are proclaiming Bible Week and calling for observances.

Recent Gallup studies show that between 1944 and 1983 daily Bible reading by Americans increased 50 percent. This uptrend coincides with the years in which National Bible Week has been observed. By informing more people of the Bible Week observance we may be able to increase the percentage of daily readers of the all-time best seller that Presidents such as Jefferson, Lincoln, Jackson, and Theodore Roosevelt held up before the public as a resource for knowledge.

A public service advertising campaign has been crafted for the 1985 observance of National Bible Week by Grey Advertising as a pro bono service. The ads include this description of the Bible's place in contemporary life: "The history of Western Civilization begins in these pages. Our laws. Our sense of justice and charity. Our standards of ethics and social responsibility. Our familiarity with the Bible's remarkable people whose lives still enrich our literature, our art, our music, even our travels. If you don't know who they are, you are missing much of the glory that's all around you. Knowledge—like faith—is a joyful possession."

CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

S. 1730—CONSOLIDATED OMNIBUS BUDGET RECONCILIATION ACT OF 1985

The PRESIDING OFFICER. Under the previous order, the hour of 10 a.m. having arrived, the Senate will now proceed to the consideration of S. 1730, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Congress).

The Senate resumed consideration of the bill.

Mr. METZENBAUM and Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

AMENDMENT NO. 995

(Purpose: Striking the provision relating to research and experimental expenditures)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 995:

On page 334, strike out lines 1 through 5.

Mr. METZENBAUM. Mr. President, the amendment I am offering today is designed to eliminate a provision of this reconciliation bill that subsidizes the wholesale export to foreign countries of American jobs.

We have had a considerable amount of discussion about the trade issue and about the importing of products made on foreign soil. Today, we have a provision before us which literally provides for the exporting of American jobs, and that is in the budget reconciliation bill.

What is this provision? It is a provision included in the bill by the Finance Committee to reimpose through August 1986 a moratorium on enforcement of a 1977 Treasury Department regulation. That regulation establishes guidelines to allocating research and development expenses to determine taxable income from foreign and domestic sources.

The moratorium, enacted in 1981 and extended last year, expired on August 1, 1985.

The effect of this moratorium, Mr. President, is to subsidize 24 major multinational corporations, to the tune of $244 million a year, by allowing them to deduct from their U.S. income R&D expenditures that support foreign-based manufacturing operations. It is, in other words, a positive incentive for major companies to export manufacturing jobs to low-wage tax havens like Hong Kong and Taiwan—and to allow the taxpayers of the United States to pay the tab for R&D work conducted in this country.

How does that work?

In order to avoid double taxation by the United States and foreign governments, the Tax Code allows American companies to credit taxes paid to foreign governments on a dollar-for-dollar basis against income earned aboard. That obviously makes it necessary to segregate foreign-earned income from profits generated here in the United States.

In 1977, Mr. President, the Treasury issued regulations on the allocation of R&D expenditures between foreign and domestic operations. In general, the 1977 regulations required multinational corporations to allocate a greater percentage of their R&D investments against their foreign source income than had previously been required.

For most companies, these regulations would have had no effect.

But for a few—those with excess foreign tax credits and, therefore, with no U.S. tax liability on foreign income—these regulations would have a real impact. The regulations would increase their total U.S. tax liability.

These are large companies—large enough to export jobs and to accumulate an excess of foreign tax credits. The 24 main beneficiaries of the moratorium are, in fact, cited by Fortune magazine among the top 100 companies in the country.

How do we know this? Because the Treasury Department's report on the impact of the moratorium found that 85 percent of the subsidy—or $244 million—will go to 24 of the largest 100 U.S. corporations.

Are these small, high-technology firms? No, they are not.

They do not benefit, says the Treasury Department study, because they are not large enough to have begun exporting their manufacturing jobs.

And how about stimulating R&D?

According to the Treasury Department study, the moratorium's $287 million price tag buys only $40 to $260 million in R&D. Listen to that: The moratorium's $287 million price tag buys only $40 million to $260 million in research and development. That is not even a dollar-for-dollar value. That is not much of a bargain for the U.S. taxpayer. In addition, the Treasury concluded that its regulation would not result in any R&D moving abroad.

Mr. President, I ask unanimous consent that the conclusions of the Treasury Department study be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE IMPACT OF THE SECTION 861-8 REGULATION ON U.S. RESEARCH AND DEVELOPMENT

Compared to the Regulation, the section 223 ERTA moratorium reduces U.S. tax liabilities. If the R&D rules in the Regulation had been in effect in calendar 1982 instead of the ERTA provision, U.S. tax liabilities of U.S. firms would have been $100 million to $240 million higher.

All firms are not affected uniformly by the moratorium. It only reduces the tax liabilities of firms in an excess credit position. These firms earn from 16 percent to 22 percent of the worldwide income of U.S. manufacturing corporations. Whether or not a firm is in an excess credit position does not seem to be closely related to the level of its R&D effort. The moratorium has its most significant effect on large, mature multinationals, as opposed to small, relatively young, high-technology companies. It affects those R&D oriented taxpayers with relatively large amounts of foreign production and income, as opposed to those taxpayers exploiting their R&D primarily for domestic production. Of the Regulation's $100 million to $240 million estimated increase in additional U.S. tax liabilities, about 85 percent is estimated to be accounted for by 24 U.S. firms on the list of the 100 largest U.S. industrial corporations compiled by Fortune magazine.

This $100 million to $240 million increase in tax liabilities would have increased the cost of privately-financed U.S. R&D by between .27 and .65 percent, or by less than 1.0 percent. Based on assumed responses of both the overall level and geographical location of R&D to this range of cost increases, the $37 billion in privately-financed domestic R&D spending in 1982 would have been reduced by about $40 million to $260 million. Most of the reduction represents a net reduction in overall R&D undertaken by U.S. corporations and their foreign affiliates, because U.S. R&D has become somewhat more expensive, rather than a transfer of R&D abroad.

Mr. METZENBAUM. Mr. President, R&D for job export is not, I think, what Congress had in mind when we wrote into the Tax Code incentives for this type of business expenditure. But that is what the Finance Committee provision subsidizes.

Mr. President, I believe that in the interest of fairness to taxpayers, to working people, and to the rising firms

that are trying to compete in high technology with the corporate behemoths, we should not revive this deal.

We should terminate it now.

We should keep for the Treasury the $277 million a year it will cost us.

I have difficulty in comprehending why the Finance Committee would send us a proposal, a provision, that will cost the Treasury $277 million this year—$277 million is the price tag—and all we get for it is the right to export jobs to foreign countries.

My amendment would strike the moratorium provision. I urge my colleagues to support it.

Let me point out an article from the Washington Post entitled "Is High Tech Unpatriotic?" The subtitle is "We're giving tax breaks so Atari can ship jobs overseas."

The article starts off as follows:

Public opinion poll (multiple choice): Do you think it makes sense for U.S. tax laws to encourage high-tech American firms to move their manufacturing plants abroad?

(a) yes.

(b) No.

(c) Hell, no!

Don't spend too long trying to choose between (b) and (c). The official correct answer—or at least the apparent consensus among elected officials in Washington—is (a).

To be sure, most of our representatives don't want to encourage a shift of manufacturing jobs overseas. Instead, they think they're promoting American research and technology.

So-called "Atari Democrats," along with most Republicans, are the leaders in inadvertently promoting answer (a), so it's appropriate that last spring's decision by Atari, Inc. to lay off 1,700 American workers and transfer its computer assembly operations to Hong Kong offers an apt illustration of the perverse impact of current tax rules.

The article goes on to say:

U.S. companies can defer taxes on foreign profits while still taking advantage of generous tax breaks for the R&D investments which create that income.

Mr. President, I ask unanimous consent that the entire article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IS HIGH TECH UNPATRIOTIC?—WE'RE GIVING TAX BREAKS SO ATARI CAN SHIP JOBS OVERSEAS

(By George W. McEntee)

Public opinion poll (multiple choice): Do you think it makes sense for U.S. tax laws to encourage high-tech American firms to move their manufacturing plants abroad?

(a) Yes.

(b) No.

(c) Hell, no!

Don't spend too long trying to choose between (b) and (c). The official correct answer—or at least the apparent consensus among elected officials in Washington—is (a).

To be sure, most of our representatives don't want to encourage a shift of manufacturing jobs overseas. Instead, they think they're promoting Ameircan research and technology.

So-called "Atari Democrats," along with most Republicans, are the leaders in inadvertently promoting answer (a), so it's appropriate that last spring's decision by Atari, Inc. to lay off 1,700 American workers and transfer is computer assembly operations to Hong Kong offers an apt illustration of the perverse impact of current tax rules.

Certainly the lure of cheap labor was a factor on Atari's going abroad. But the tax code clearly provided additional incentives.

U.S. companies can defer taxes on foreign profits while still taking advantage of generous tax breaks for the R&D investments which create that income.

Consider Atari, which invests lots of money researching and developing new products in this country. It is allowed tax deductions for those costs, and in some cases also gets a federal R&D tax credit. The deduction saves Atari about 50 cents in federal and states taxes for every dollar invested, and the credit can add another 25 cents in tax savings. This leaves Atari's put-of-pocket cost for a dollar's worth of R&D somewhere between 25 and 50 cents.

If Atari uses its know-how to manufacture products in California the government will tax the profits. But it's still a sweet deal for Atari. The company keeps at least half the profits, while putting up as little as a quarter of the capital outlays.

By shifting its production offshore, however, Atari has found a way to do even better. The government will continue to pay for 50 to 75 percent of Atari's R&D, but now it will get no share of the profits the R&D generates. As long as Atari reinvests its earnings abroad, U.S. taxes are indefinitely deferred. And, since Atari has carefully chosen to put its runaway plants in low-tax or tax-haven countries like Hong Kong, Ireland, and Taiwan, it won't have to pay any significant foreign taxes either.

But, you may say, now that the Atari situation is a cause celebre, the administration and Congress will certainly figure out what's going on and crack down on tax subsidies for exporting jobs. Don't bet on it. Our lawmakers seem intent on making things worse.

Last month, the Treasury Department recommended giving a couple of hundred million dollars a year in extra foreign tax credits to multinational firms that—you guessed it—do research in the United States to support foreign manufacturing operations.

The purpose of this tax break, its numerous congressional supporters claim, is to stimulate R&D here at home. What they fail to consider, however, is that the real incentive can be to shift manufacturing jobs offshore. By definition, the added tax credits are available only to companies with large foreign operations.

The foreign tax credit bonus at issue would extend a "temporary" measure enacted in 1981 and scheduled to exp,re this year. Pushed by Atari Democrats and ITT, this measure blocked the IRS for two years from enforcing its "Section 861" regulations—rules promulgated in 1977 to try to curb tax subsidies for foreign manufacturing.

The 1981 law required the Treasury to analyze the impact of suspending the 861 regulations and report its findings to Congress this year. In May, Treasury staff dutifully completed a draft study that found the loophole unjustified. But then politics intervened.

Under pressure from congressional Republicans and multinational companies, Treasury Secretary Donald Regan ordered a last minute reversal of the report's conclusion.

Among other things, Treasury's analysis shows that almost all the money from the tax subsidies goes to 24 giant corporations and that the extra tax credits provide minimal stimulus to American R&D.

Treasury also found that the loophole is of virtually no value to "small, relatively young high-technology companies." These firms don't benefit because they haven't yet started exporting jobs.

If we wanted to stop paying companies to ship jobs overseas, the best first step would be to repeal the rule allowing deferral of taxes on foreign profits, as suggested by Presidents Kennedy, Carter and the AFL-CIO. Short of that, we could at last stop Atari-USA from transferring its patent and know-how to Atari-Hong Kong tax-free. Current law is vaguely supposed to limit such tax-avoiding transfers, but in practice it rarely succeeds.

In addition, Congress should allow the IRS to enforce its suspended foreign tax credit regulations—preferably in strengthened form.

Preserving American jobs ought to be politically popular, but, unfortunately, subsidies for "high tech" are the current rage in Washington.

Mr. METZENBAUM. Mr. President, in addition, I want to point out some language in the article:

Last month, the Treasury Department recommended giving a couple of hundred million dollars a year in extra foreign tax credits to multinational firms that—you guessed it—do research in the United States to support foreign manufacturing operations.

The purpose of this tax break, its numerous congressional supporters claim, is to stimulate R&D here at home. What they fail to consider, however is that the real incentive can be to shift manufacturing jobs offshore. By definition, the added tax credits are available only to companies with large foreign operations.

Continuing on, the article says:

The foreign tax credit bonus at issue would extend a "temporary" measure enacted in 1981 and scheduled to expire this year. Pushed by Atari Democrats and ITT, this measure blocked the IRS for two years from enforcing its "Section 861" regulations—rules promulgated in 1977 to try to curb tax subsidies for foreign manufacturing.

The 1981 law required the Treasury to analyze the impact of suspending the 861 regulations and report its findings to Congress this year. In May, Treasury staff dutifully completed a draft study that found the loophole unjustified. But then politics intervened.

Under pressure from congressional Republicans and multinational companies, Treasury Secretary Donald Regan ordered at last minute reversal of the report's conclusion.

Mr. President, in my opinion, the U.S. Treasury needs this $277 million a year. It would help us substantially in attempting to balance the budget. There is no economic justification for permitting this mind of a tax subsidy for research done here for jobs that are being shipped overseas. The Treasury was right in the first instance and

the Finance Committee is wrong in attempting to deprive the Treasury of $277 million a year in income.

If ever there were a situation that is odd, it is one where we find the Finance Committee bringing a bill to the floor of the Senate that will cost the Treasury $277 million a year and the net result of which would be that 24 large multinational corporations in this country would have the opportunity to ship more American jobs overseas.

This body indicated overwhelmingly our concern about foreign competition in a vote we had on the floor recently. I think today we have an opportunity to stand up and be counted and save the Treasury $277 million a year and save American jobs for American workers.

Mr. President, there is no one on the floor.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, it is my understanding when there is no opposition to an amendment that is pending we have to yield back time.

Mr. President, I am prepared on this side to yield back the remainder of my time if those on the other side are prepared to yield back the remainder of their time and bring the matter to a vote.

The PRESIDING OFFICER. Does the Senator from New Mexico yield back time?

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum on my time.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I am going to oppose the amendment of my good friend from Ohio.

Basically in a nutshell let me tell you the dilemma into which he puts a number of U.S. corporations. Let us assume Caterpillar—which does sell a fair amount of equipment overseas—does research and development in the United States, genuinely does it in the United States and sells 100 dollars' worth of their product here based upon their research and 100 dollars' worth of product overseas based upon the research that was done in the United States.

The Treasury Department is attempting to require Caterpillar to allocate part of the research and development costs overseas and offset it against their foreign tax credits because they sold products overseas, even though all of the research and development was genuinely done here.

It is going to work to the disadvantage of U.S. exporters. There is no question about it, and especially those companies that go overseas to manufacture products for overseas markets. They are not sending them back to the United States. The Treasury Department in one way or another has attempted to devise regulations on this subject since 1981 never to the satisfaction of the Congress.

We have put a moratorium on the Treasury from imposing these regulations since 1981. We are asking for that moratorium to continue until Treasury can come up with some workable regulations.

And, therefore, at an appropriate time, I would move to table the amendment of the Senator from Ohio.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I would like to point out to my colleague that he talks about the R&D being used for goods manufactured overseas that are sold overseas.

Even accepting that point, I do not believe it makes a very valid argument as to why there should be an American tax credit for that kind of a situation. Let the other nations provide the tax subsidy.

But what we have here is not even in accord with these facts because you get the foreign tax credit for goods manufactured overseas, and those goods can be shipped back into the United States and take American workers' jobs.

Most of these American companies that manufacture in Hong Kong, Taiwan, Korea, and other places are not selling their products overseas to a great extent. They are manufacturing over there, bringing it back into this country, and taking American jobs.

What kind of silliness is this—to provide a tax writeoff against American earnings for jobs to be exported to other nations of this world?

The chairman of the Finance Committee says that at an appropriate time he will move to table. I urge him not to do that. I urge him to give the Senate an opportunity to vote up or down on this issue. I have no problem about debate time because very shortly I am prepared, if he is prepared, to yield back the time, ask for the yeas and nays, and go to a vote.

The issue is a simple one. Do we or do we not give away $277 million to 24 multinational corporations whose products are being manufactured overseas? This is R&D in connection with the jobs that are being exported to other countries.

The real question is: When we are trying so hard to balance the budget—when we stand here on the floor and fight to pick up $50 million or $100 million in connection with some particular program—what conceivable justification can the U.S. Senate have for contradicting the past position of the Treasury Department of the United States which recognizes how inappropriate this is?

There was talk about having a study. Study time is past. There have been delays over a period of 4 years. Four years have elapsed since we imposed a moratorium on the 1977 Treasury regulations. Let us stand up and be counted. Let us say we are for or against this measure.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time? The Senator from Oregon.

Mr. PACKWOOD. Mr. President, before I make a motion to table, let me simply say that the Treasury regulations go into effect when the company is going to have an alternative to cut, or shift, research and development overseas. Neither is beneficial to American companies in this country, or American countries involved in foreign markets.

Therefore, I move to lay on the table the amendment of my good friend from Ohio, and ask for the yeas and nays.

Mr. METZENBAUM. Mr. President, I ask my colleague to withhold his motion in view of his statement in order that I may respond.

Mr. PACKWOOD. Mr. President, I am willing to withhold. I know the chairman of the Budget Committee is up against a time constraint.

The PRESIDING OFFICER. The motion to table is a nondebatable motion.

Mr. DOMENICI. Mr. President, we are prepared to yield back our time, and we thought the distinguished Senator from Ohio was prepared to do the same.

Mr. METZENBAUM. Mr. President, I dc not intend to delay this matter. I think it is important that I point out what the Treasury says itself on this subject.

Let me just read one paragraph from that Treasury Department statement.

This $100 million to $240 million increase in tax liabilities would have increased the cost of privately financed U.S. R&D by between .27—.27; not 27; .27—and .65 percent or by less than 1 percent. Based on assumed responses of both the overall level and geographical location of R&D to this range of cost of increases the $37 billion in privately financed domestic R&D spending in 1982 would have been reduced by about $40 million to $260 million.

Most of the reduction represents a net reduction in overall research and development undertaken by U.S. corporations and their foreign affiliates because U.S. R&D has

become somewhat more expensive rather than a transfer of R&D abroad.

So I want to emphasize that what we are doing is making it possible to deduct $277 million for about $40 million to $260 million of privately-financed domestic R&D. We do not even get a dollar-for-dollar value in this reduction.

Under those circumstances, I would hope that my colleagues would see fit, particularly those who traditionally consider themselves budget balancers, and conservatives to recognize that in this budget reconciliation measure there is not any justification whatsoever to giving $277 million to 24 major corporations who are shipping their jobs overseas.

Mr. President, if the manager is prepared to yield back his time, I am prepared to yield back my time with the understanding there will be no further debate.

Mr. DOMENICI. I will be prepared in a moment. I yield myself 1 minute.

I hope Senators and their staffs who are listening now will understand that for the entire reconciliation bill we have about 38 minutes left, equally divided. We are aware of 41 amendments to the bill. To the chairmen of the various committees, and there are more amendments from the finance and agriculture committees than from any others, we have a list. When you come down to vote on this tabling motion, I hope you will take a look at the list, because if you are not here to defend your provisions, clearly, the chairman of the budget committee will do his best, but occasionally I might agree with the chairmen of the committee.

If you want to defend against motions to strike, whether they are motions to strike the tobacco, Medicare, food stamps, or AFDC provisions, you should arrange to be around for the next couple of hours. We will probably vote one after another in about 45 minutes.

I yield back the remainder of our time on this side.

Mr. METZENBAUM. Mr. President, I yield 2 minutes to the Senator from Illinois.

Mr. SIMON. I thank my colleague for yielding.

Things happen rapidly around here. All of a sudden I heard what was going on over here. Frankly, the amendment of the Senator from Ohio is one that really ought to be adopted. Why we should subsidize people for moving their products overseas and their jobs overseas—that is basically what we are doing unless we modify the law—just absolutely defies rationality.

I heartly concur with my colleague. We already have a trade deficit from last year of $123 billion. It is going to be $150 billion or close to it this year.

This amendment will not work wonders, but it is a small step in a direction that really makes sense. I commend my colleague for offering this amendment. I certainly will vote for it.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Is the Senator prepared to yield back his time?

I am prepared to yield back my time if the Senator from New Mexico is prepared to yield back his time.

Mr. DOMENICI. I yield back the remainder of my time.

Mr. PACKWOOD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Ohio. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from South Dakota [Mr. ABDNOR], the Senator from New York [Mr. D'AMATO], the Senator from Alabama [Mr. DENTON], the Senator from Florida [Mrs. HAWKINS], the Senator from Wisconsin [Mr. KASTEN], and the Senator from New Hampshire [Mr. RUDMAN] are necessarily absent.

I further announce that, if present and voting, the Senator from Wisconsin [Mr. KASTEN] would vote "nay."

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from Hawaii [Mr. INOUYE], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from New York [Mr. MOYNIHAN], the Senator from Rhode Island [Mr. PELL], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Maryland [Mr. SARBANES] are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "nay."

The PRESIDING OFFICER (Mr. PRESSLER). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 53, nays 32, as follows:

[Rollcall Vote No. 293 Leg.]

YEAS—53

Andrews	Goldwater	Nickles
Armstrong	Grassley	Packwood
Baucus	Hatch	Pressler
Bentsen	Hecht	Pryor
Biden	Heflin	Quayle

NOT VOTING—15

Abdnor	Denton	Moynihan
Boren	Hawkins	Pell
Bumpers	Inouye	Rockefeller
Burdick	Kasten	Rudman
D'Amato	Matsunaga	Sarbanes

So the motion to lay on the table amendment No. 995 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 996

(Purpose: To Eliminate the Trade Adjustment Assistance Provisions)

Mr. GRAMM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read the follows:

The Senator from Texas [Mr. GRAMM] proposes an amendment numbered 996:

On page 287, beginning with line 5, strike out all through page 306, line 17.

Mr. GRAMM. Mr. President, as we are all aware, we are short on time. Many of us have to go over to a conference with the House on the debt ceiling and Balanced Budget Emergency Deficit Control Act. I think I can be brief. The amendment that I have offered strikes a major change in permanent law that is contained in the reconciliation bill. It strikes a provision that imposes a new tax which could be, under the provisions of the bill, as high as $3.5 billion a year. This tax would be imposed as an across-the-board import fee on goods and services coming into the United States at a level to fund an extension of the Trade Adjustment Assistance Act. In addition, this tax would create new benefits for the first time covering employees of suppliers and employees of companies that are providing services for those that are affected by foreign competition.

The author of this provision claims savings but does so only by extending the Trade Adjustment Assistance Program for 5 years in a bill that is aimed at saving $11 million by extending the Trade Adjustment Assistance Act, which expires in 1985 and costs $110 million a year. The only savings claimed in this provision are $5 million this year and $6 million the next year.

Mr. President, I do not want to debate that portion of it. If you are for trade adjustment assistance, you will at some point, when it comes up for reauthorization, vote for it. If you favor these provisions, they ought to be offered as an amendment to the reauthorization of the Trade Adjustment Assistance Program. We ought not to, as part of reconciliation, be imposing a new tax that could be as high as $3.5 billion a year to add a new entitlement benefit to a program that has historically not been very successful. This provision which I seek to strike violates the agreement under GATT. It would allow those countries affected to engage in reciprocity where they can impose tariffs against American goods, and they would have an opportunity to focus those tariffs not on an across-the-board tariff but protection against those very areas where we are competitive—in the high-tech area, for example.

Not only does the provision I seek to strike violate GATT, but it also violates the clear intent of the Carribbean Basin Initiative and violates the free-trade-zone-with Israel provisions that was adopted by Congress only recently.

The real question we have to answer is not about reconciliation at all. We are talking about spending money because we are reauthorizing a bill that is expiring. If you want to extend it, you can vote to do that in reauthorization. But even with an extension, with a $110 million add-on through the extension, this bill claims only $11 million of savings over the next 2 years. The question is, do we want to impose a new tax that the American people will pay that could be as high as $3.5 billion. Do we want to establish a protective act that will allow our trading partners on a selected basis to reciprocate by raising their tariffs against our goods on a selected basis, perhaps against high-tech goods in the areas where we are competitive.

Finally, do we really want to add a new, major entitlement that will be driven by a tax that will vastly expand eligibility and will produce an expenditure at a level that we clearly cannot measure today and that clearly would entail bringing much of the economy under trade adjustment assistance, because anyone supplying or servicing a person or a company that can claim to be affected by foreign trade and claim to be losing employment can qualify for this benefit.

Finally, this provision—protectionist, in violation of GATT—will clearly be one of the items the President will look at in trying to decide whether to sign or to veto this bill. I will not vote for reconciliation if this provision is not struck.

Mr. President, in order to save time, I yield the floor, and I reserve the remainder of my time.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. How much time does the Senator wish?

Mr. ROTH. Mr. President, a parliamentary inquiry. How much time does our side have?

The PRESIDING OFFICER. The opponents have up to 25 minutes.

Mr. GORTON. There is up to 25 minutes on this amendment. I believe there are only about 35 minutes remaining on the bill.

Will 5 minutes suffice?

Mr. ROTH. I have several Senators on both sides of the aisle who want to address this question. I want to give them the opportunity to speak, and I wish to speak.

Mr. GORTON. Is the Senator speaking for or against the amendment?

Mr. ROTH. I am speaking against the amendment. I am the principal supporter of the legislation.

What I am asking is this: We have a number of Senators who want to speak against the proposition, the proposed amendment by the Senator from Texas. I would like to have enough time to yield to each Senator at least 1 minute.

Mr. GORTON. The Senator from Delaware may have 1 minute to yield to any such Senator.

Mr. ROTH. I would like to have roughly 5 minutes.

Mr. BRADLEY. Mr. President, will the Senator yield?

Mr. ROTH. I yield one minute to the distinguished Senator from Missouri.

Mr. DANFORTH. Mr. President, I oppose the amendment offered by the Senator from Texas.

The issue here is whether or not we are going to extend the trade adjustment assistance program. At a time when the trade deficit is reaching the neighborhood of $150 billion, it seems to me that this is exactly the time when we should have a trade adjustment assistance program.

We have an administration which has adopted a free-trade position, commendable in the minds of many people. It seems to me that we, as a Government, cannot just say to people who are losing their jobs that there is absolutely no relief of any kind for them, no future of any kind for them.

This legislation, which was authored by Senator ROTH and Senator MOYNIHAN, was considered carefully by the Finance Committee. It pays for itself. I commend the Senator from Delaware and the Senator from New York for their efforts, and I join them in opposition to this amendment.

Mr. ROTH. I yield 1 minute to the distinguished Senator from New Jersey.

Mr. JOHNSTON. Mr. President, a point of order.

I think we inadvertently failed to claim on this side our ability to control half of the time, and we would like to yield time at this time. I would like to yield to Senator MITCHELL to control time on this side.

The PRESIDING OFFICER. If the Senator is in favor of the amendment——

Mr. GORTON. The Senator from Washington is in favor of the amendment.

The PRESIDING OFFICER. Then, he has no time to yield.

The time is under the control of the minority leader.

Mr. ROTH. I say to the distinguished Senator from Maine that I was going to yield 1 minute to the distinguished Senator from New Jersey on his time, if that is all right.

Mr. MITCHELL. That is fine.

Mr. BRADLEY. Mr. President, I oppose the amendment offered by the distinguished Senator from Texas. The Senator from Texas is a persuasive exponent of ideological free trade.

We know that the theory of comparative advantage does have merit. We know that the farmer knows how to farm and that the tailor knows how to sew, and that each can produce more by cooperating and trading with each other. Free trade makes good economic sense. But the reality of the world is more complicated—and cluttered—than the economist's mind.

The fact is that enterprises and their workers cannot move instantly and painlessly into whatever industry is favored by comparative advantage. Workers need time, and sometimes help, to change jobs. That is what this bill does. It gives workers some time and help to change jobs.

I argue strongly that this Government could and should take this bill and its import fee to GATT and argue that it is GATT legal—that it is a price we pay for a free and open trading system.

Mr. President, recently I talked to a number of people from Southeast Asia who confront the same adjustment problem in their developing economies as we confront in our economy—how to move to higher value-added industries. In that part of the world, workers need some adjustment help. We need adjustment help in this economy. This bill will provide that help. This proposal has been deliberated in the Finance Committee with lengthy hearings.

In many ways, the bill is similar to the job security bank I introduced. It has bipartisan support. I hope the Senate will reject the amendment offered by the Senator from Texas.

The PRESIDING OFFICER. One minute has expired.

Mr. ROTH. I yield 1 minute to the distinguished Senator from Rhode Island.

The PRESIDING OFFICER. The Senator has no time to yield. The time

is under the control of the Senator from Texas.

Mr. MITCHELL. Mr. President, that responsibility was delegated to me, and I yield 1 minute to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, the United States for the last 2 years has been in the midst of a healthy and robust economy. Yet, despite the glowing reports on the overall economy, the trading sector has not fared so well. Congress is besieged these days by protectionist pressures from import-competing industries.

Industry after industry has come to Congress seeking protection from imports, and these industries assume that we have more to lose to world trade than we have to benefit from it. I do not agree with that thesis. I think an open market serves the United States very well in a host of tangible ways. Unfettered trade gives consumers access to a greater variety of products at lower prices. So it is a plus.

On the other hand, there are some losers, and the losers are the workers in those industries that have been buffeted by the imports.

Mr. President, I do not think we can turn our backs on those workers. This legislation has been tightened up from the Trade Adjustment Assistance Act we are used to in the past. It does something for the workers.

It requires them to go into retraining and it helps them make up in some ways for the sacrifice that they have had to make, because we all benefit from increased trade.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CHAFEE. Mr. President, I hope that that amendment will not be accepted. Thank you.

Mr. MITCHELL. Mr. President, I yield 1 minute to the Senator from Arkansas.

Mr. PRYOR. Mr. President, I will just briefly make one or two points.

I do oppose Senator GRAMM's amendment.

I think that the trade adjustment provision that has been carefully crafted by the Finance Committee is to the liking of the great majority of this Senate, and I hope that it will prevail in conference. It is very different from the House bill.

The amendment offered in the committee by the Senator from Delaware and the Senator from New York, Senator MOYNIHAN, requires that before receiving any benefits a worker has to agree to participate in a retraining program. We think that that is a proper step.

We also think that this is absolutely the wrong time for an amendment like the one offered by the Senator from Texas to prevail. I should also like to point out to my colleagues that in the Finance Committee, after a great deal of deliberation and debate, this measure as it is now before the Senate was approved without opposition.

I yield the remainder of my time.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. MITCHELL. Mr. President, I yield myself 1 minute in opposition to the proposal.

At precisely the time that the policies of this administration are encouraging imports across a broad sector of the American economy, causing the loss of millions of American manufacturing jobs in textiles in North Carolina and South Carolina, in shoes in Maine and Missouri, and in many other areas, at precisely the time when an adjustment assistance program to enable those workers thrown out of work through no fault of their own and no fault of the owners and operators of their companies are necessary when we need to improve and expand the program, we now have a proposal to terminate it. Thus, American workers are being faced with a double whammy. First, international trade policies which dramatically increase the number of workers who lost their jobs as a result of imports, and, secondly, eliminate the program that is intended to help those workers get training to get new jobs.

This could not possibly come at a worse time. It compounds the problem in our economy rather than solves one.

So, Mr. President, I urge the Members of the Senate to join as the members of the Finance Committee did in a bipartisan fashion to overwhelmingly defeat this unwise, unsound, and illtimes proposal.

I commend the Senator from Delaware for the leadership he has shown on this in the committee, trying to deal with that is a serious national problem.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. GORTON. Mr. President, I yield such time as he desires to the Senator from Texas.

Mr. GRAMM. Mr. President, I guess one thing I can do is count votes, and I wish to make my points here and that is why I offered the amendment.

The issue here is not trade adjustment assistance. I am not killing anything with this amendment. We are supposed to be debating saving money. We are supposed to be debating reconciliation.

What we have here in reconciliation is a proposal that imposes a major new tax, up to $3.5 billion a year, that is in violation of GATT, and that if adopted would provide our trading partners with the ability to selectively raise their tariffs against goods that are competitive in selling abroad. This is a 5-year extension of an entitlement program and it vastly broadens the entitlement program.

I never have deceived myself here that we were going to vote this down. But our problem is that we ought not to be granting 5-year extensions of entitlement programs in a bill that is supposed to be saving money. We ought not to be broadening the base of benefits in a bill that is supposed to be saving money. We ought not to be raising taxes in violation of GATT, setting the very industries that are competitive in this country up for a selective increase in tariffs that will hurt their ability to compete.

If the Senator had brought this provision up in a reauthorization of trade adjustment assistance, I think it would have been a legitimate issue.

The problem is we are not legislating any more on any kind of authorizing basis. We pack everything into one bill that was aimed for another purpose and as a result if the President signs this bill, trying to save roughly $12 billion out of $17 billion we promised, we are starting literally dozens of new spending programs, new taxes, new provisions of law that have nothing to do with reconciliation in terms of saving money.

In fact, while this provision does save $11 million over 2 years, it reauthorizes 5 years of spending and the expansion of a new entitlement. It does not belong on this bill, and what we are doing with these kinds of provisions is destroying the reconciliation process.

I am hoping that the bill that we are now discussing with the House of Representatives will pass and it will then take a 60-percent vote to bring these kinds of provisions to the floor.

I do not intend to ask for a record vote.

I yield the floor.

Mr. MITCHELL. Mr. President, I am going to yield in a moment to the Senator from Delaware to wind up.

But I yield myself 30 seconds. I cannot help but note the supreme irony of the Senator from Texas commenting on others attempting to tack one bit of legislation on another.

Mr. GRAMM. No, I am not.

Mr. MITCHELL. Especially the reconciliation bill which is, of course, something that occurred in 1981 and 1982 and now we, of course, spent the last several weeks dealing with putting one piece of legislation on another piece of legislation.

I yield to the Senator from Delaware.

Mr. ROTH. I thank the distinguished Senator for yielding to me.

First of all, I emphasize that this legislation has been carefully crafted in the Finance Committee which has jurisdiction over the matter. I think it is important to understand that it was unanimously reported out. It had broad bipartisan support, including Senator DANFORTH, the chairman of

the Trade Subcommittee, Senator CHAFEE, Senator HEINZ, Senator GRASSLEY, Senator SYMMS, Senator BAUCUS, Senator MITCHELL, Senator BRADLEY, and Senator MATSUNAGA. Other cosponsors include Senators COHEN, KERRY, GORE, DODD, and KENNEDY.

I also emphasize that the distinguished chairman of the Finance Committee has authorized me to say that he is opposed to the amendment to strike the TAA Program.

Why is there such broad support for this legislation? Let me say I think there are several reasons.

First of all, it represents reform, strengthening the TAA, taking care of the current weaknesses.

No. 2, it is financially sound. We are providing in what I think is an imaginative way for the financing of this program.

Third, I think it is important to understand this is not the time to do away with TAA when our trade deficit is increasing.

Let me point out that the key reform in this legislation is the requirement that workers be in training in order to receive cash benefits. This is a tough new proposal that we think is sound and has the support of the unions and general support of the community.

This change will transform the program into a true adjustment program.

Our country is experiencing a trade shock that is devastating our manufacturing sector and creating increased problems in the farm community.

I want to say that at the behest of Senator GRASSLEY this legislation provides an explicit confirmation that the TAA program covers workers in agricultural firms.

Mr. GRASSLEY. Mr. President, I rise in opposition to the Gramm amendment and to support the Roth/Moynihan trade adjustment assistance legislation. From the early 1960's through 1980 there was widespread bipartisan agreement in the United States that the Government had an obligation to help the relatively few firms and workers adversely affected by imports. TAA was created by President Kennedy in 1962, implemented for the first time under President Nixon, 1969-70, substantially liberalized under President Ford, in the Trade Act of 1974, and used most extensively by President Carter—during the 1980 recession.

With the need to reduce spending, no one can argue with eliminating programs that don't work. It may be that the TAA Program which expired at the end of September of this year may or may not fall into that category. However, what we are looking at with the Roth/Moynihan legislation is not a budget buster, but rather a creative approach to keeping the program in place without the Government picking up the tab. As a result, I feel this legislation is not only timely, but vastly improved over the previous program. Vastly improved in that the very cause of worker and firm displacement, namely foreign imports, will finance the program. With the bill putting a cap of 1 percent on the value of imports and requiring the President to apply such a duty after getting GATT approval, we will be able to assist these displaced workers without any additional cost to the U.S. Treasury within the next couple of years.

I am pleased that this bill also includes an amendment that was offered by myself that would make it explicit that agricultural workers are eligible for the program. Those of us in the heartland of the country, as most of you know, are experiencing a great economic hardship at the present time. For this reason, it is my strong belief that we in the Congress need to look at individuals, whether in manufacturing or agriculture, and see that they are equipped with the new skills rooted in both humanitarian and economic concerns. For every displaced worker is one more addition to unemployment, one less taxpayer, and one less consumer—not to mention the ripple effect as unemployment throws entire families, communities, and industries into chaos.

During my tenure in the Senate, I have, as most of you are aware, spent a great deal of my time and energy trying to reduce the budget deficit. If I felt strongly that this proposal which was accepted in the Finance Committee was either a budget buster or nongermane as offered, I would not be standing up here offering my support. It would be my hope that each of you will feel as strongly as I do, and support this legislation.

Mr. ROTH. The distinguished Senator from Texas has reflected the administration's criticism of the import fee.

It is a myth to see this fee as a threat to the administration's free trade position. As a matter of fact, Hong Kong, the freest of trading nations, uses a similar fee to finance its trade promotion programs.

I also point out that the administration in its own budget proposal calls for Customs user fees, in other words, import fees, on all imports dutiable or nondutiable.

Let me emphasize that this "adjustment fee" is small. It is estimated that it will be 0.1 percent, and this is indeed a small price to pay for an open trading system.

It seems to me it just makes common sense that, if we are going to have liberal trade policies that permit imports, those who benefit from that policy ought to be willing to pay something to help those who are adversely impacted. I think this is a strong new proposal to make this legislation financially sound.

I would also point out that this proposal is relevant to the reconciliation bill because, whether you like the program or not, this legislation does provide savings beginning in fiscal year 1986. We do away with loans and loan guarantees to firms immediately. The President is given the responsibility of negotiating an import fee with our trading partners, and the third year it comes into place.

Mr. President, I urge everyone to support this legislation. I think it is sound. I think it lays the groundwork for us to develop the kind of trade policies we need for the future prosperity of this Nation.

I yield the floor.

Mr. GORTON. Mr. President, I yield 1 minute to the Senator from Texas.

Mr. GRAMM. Mr. President, I wish to respond on only one issue. I am certainly in favor of amendments that are relevant to the subject, that save money—that is what we are here for—and that deal with the problem we are trying to address, the budget. I supported the amendment of the Senator from Ohio [Mr. METZENBAUM], because it was an amendment aimed at addressing a problem. I supported the Balanced Budget Emergency Deficit Control Act, trying to see that it raises the debt ceiling this week—I am hopeful that we will—and that we are not going, 5 years from now, to allow it to go to $3 trillion.

The question, however, is what are we trying to do on reconciliation? What we are trying to do is save money, not reauthorize programs, not impose new taxes to pay for new benefits. I think that is the issue.

Mr. MOYNIHAN. Mr. President, I rise today to oppose the amendment by the junior Senator from Texas, who would have us end the Trade Adjustment Assistance Program [TAA].

Mr. President, America's free trade policies have brought the Nation great benefits, but at certain costs focused on those industries and workers affected most adversely by import competition—textiles, footwear, steel, to name a few.

Trade Adjustment Assistance was designed to help those workers—American men and women who have lost their jobs due to import competition. It helps them pay the bills while unemployed and receive training for new jobs in different industries of the economy. This program represents a commitment of two decades duration to the American worker, made at the time of the Kennedy round of GATT negotiations. TAA was a condition of those talks—just as it was for the Tokyo round in the 1970's.

The need for Trade Adjustment Assistance has never been greater. Between January 1981 and June 1985, we

imported $346 billion more in goods than it has exported. This means that since 1981—according to the Commissioner of the International Trade Commission, Alfred Eckes—as many as 2.3 million new job opportunities have been lost to imports.

The situation continues to deteriorate. The trade deficit for the first 6 months of 1985 was greater than the entire deficit for all of 1983, and the trade deficit for September—$15.5 billion—was the largest monthly deficit ever.

The Roth/Moynihan bill will reform TAA and increase its effectiveness.

First, the bill would immediately eliminate further loans and loan guarantees to firms, because this part of the program simply hasn't worked. And, I might note, this change will provide immediate savings of $5 to $7 million per year.

Second, the bill will require workers to participate in retraining in order to be eligible for extended unemployment benefits.

Finally, the bill expands the number and types of programs that a worker can choose for retraining and gives him a $4,000 voucher so that he can select the program best suited to his background and needs.

The revised TAA Program will be funded through a small fee on imports. As estimated by the Congressional Budget Office, the fee will be between 0.1 and 0.25 percent, but in any event, the fee is capped at 1 percent. The idea behind the fee is simple: those that benefit from a liberalized trading system should help those who are hurt.

May I add that in all likelihood, this fee will be imposed with GATT approval. Our bill gives the President 2 years to obtain GATT approval for the fee and we have every reason to expect that such approval will be forthcoming. Developed countries all need adjustment programs and developing countries understand that such programs must be adequately funded if developed countries are to avoid more protectionist measures. Simply, a small fee levied on imports for adjustment purposes can perhaps avoid the passage of a significant import surcharge.

Mr. President, the need to reauthorize the TAA Program is pressing. As we all know, the TAA Program was last reauthorized in 1983 for 2 years. The program was scheduled to expire September 30, but was reauthorized until November 15—by H.R. 3128—and appropriations were provided in the continuing resolution. The House included a 4-year reauthorization of TAA in its reconciliation bill, and we should similarly extend the TAA Program as part of S. 1730.

Mr. President, the Gramm amendment would eliminate this vital program. Yet a constructive, responsible, trade policy requires an explicit, identifiable adjustment program for trade impacted workers.

We understood this at the time of the Kennedy and Tokyo rounds of GATT negotiations. We understood then that agreement to liberalize and expand trade required helping those who would be hurt by increased foreign competition. Do we no longer understand this most basic point?

Mr. President, the premise on which trade adjustment assistance was based has not changed, and the need for such a program has increased. We cannot let TAA die.

I urge my colleagues to defeat the Gramm amendment.

Mr. GORTON. Mr. President, is the manager on the minority side prepared to yield back all of his time? This side is prepared to yield back all time.

Mr. BRADLEY. Will the Senator yield 1 minute to me?

Mr. MITCHELL. I yield 1 minute to the Senate from New Jersey.

Mr. BRADLEY. Mr. President, let me say to the distinguished Senator from Texas, who proposed the amendment, that I think he is wise not to call for a record vote. I think that the Finance Committee has spoken very clearly on this issue. I hope the Senate will support the Finance Committee and will support a policy of open trade that is caring and sensitive toward workers who lose their jobs because of that open trade. That is what this amendment is trying to restrict and eliminate, and that is why we must oppose it. I hope the Senate will reject the Gramm amendment.

Mr. GORTON. Mr. President, is the Senator from Maine prepared to yield back the balance of his time?

Mr. MITCHELL. Yes.

Mr. GORTON. This side yields back all time.

The PRESIDING OFFICER. Does the Senator from Texas yield back his time?

Mr. GRAMM. Yes.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (No. 996) was rejected.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 997

(Purpose: To make technical and other changes to the Trade Adjustment Assistance provisions)

Mr. ROTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Delaware [Mr. ROTH], for himself and Mr. MOYNIHAN, proposes an amendment numbered 997.

Mr. ROTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 302, strike out lines 19 through 24, and insert in lieu thereof the following:

"(d) AMOUNTS IN THE TRUST FUND SHALL ONLY BE AVAILABLE.—

"(1) for the payment of drawbacks and refunds of the duty imposed by section 287 that are allowable under any provisions of Federal law, and

"(2) to the extent and in such amounts as may be provided by appropriation Acts, for making expenditures to carry out the provisions of chapters 2 and 3.

None of the amounts in the Trust Funds shall be available for the payment of loans guaranteed under chapter 3 or for any other expenses relating to financial assistance provided under chapter 3.".

On page 303, strike out lines 1 through 10.

On page 303, line 11, strike out "(d)" and insert in lieu thereof "(c)".

On page 305, strike out lines 1 through 4, and insert in lieu thereof the following:

"(c)(1) Except as otherwise provided in this subsection, duty-free treatment provided with respect to any article under any other provision of law shall not prevent the imposition of duty with respect to such article by subsection (a).

"(2) No duty shall be imposed by subsection (a) with respect to any article that is treated as duty free under part 148 of title 19 of the Code of Federal Regulations.".

On page 305, line 23, strike out "(d)" and insert in lieu thereof "(c)".

On page 306, line 3, strike out "the date that is 30 days after".

On page 306, line 6, strike out "778D, and 778G(c)" and insert in lieu thereof "and 778D".

Mr. ROTH. Mr. President, this amendment has three objectives. First, it includes the addition of language to the bill requested by the Appropriations Committee that would continue the current practice of subjecting the Trade Adjustment Assistance Program to the annual appropriations process. I am introducing this amendment for the Appropriations Committee, with the expectation that yearly appropriations will be forthcoming to cover certified workers within the limits set by this legislation, that is, up to the financial limits of the 1-percent fee on imports.

The second part of the amendment concerns the operation of the duty drawback of the import fee. When an importer exports a product he has imported, he can obtain a drawback, in essence, a refund of duties he has paid. The drawback of the small import fee proposed in this bill would also take place. This amendment would provide for funds to be taken from the trade adjustment trust fund, rather than

general revenues for the drawback of this import fee.

Third, and finally, this amendment clarifies that the import fee would not apply to goods entering the United States under part 148 of title 19 of the Code of Federal Regulations. The amendment is necessary to clarify that tourists will not be assessed this import fee on the merchandise they purchased abroad and Americans who live abroad will not be assessed this fee on their belongings when they return to this country.

It was never our intention to make these kinds of imports subject to the import fee in this bill.

Mr. President, this amendment has been approved by the chairman of the Finance Committee and, it is my understanding, by the managers of the bill, as well.

Mr. GORTON. Mr. President, the amendment is cleared on this side.

Mr. JOHNSTON. Mr. President, I am advised by staff that it has not been formally cleared on this side, but I am also advised that it is principally technical in nature. So, while I am not at liberty to accept the amendment, I know of no objections at this time and I am advised by Senator BRADLEY that he knows of no objections, so we will not require a rollcall vote.

The PRESIDING OFFICER. Is all time yielded back?

Mr. GORTON. I yield back the remainder of our time.

Mr. JOHNSTON. I yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (No. 997) was agreed to.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 998

(Purpose: Add provision regarding minimum drinking age)

Mr. LAUTENBERG. Mr. President, on behalf of myself and Senator DANFORTH, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for himself and Mr. DANFORTH, proposes an amendment numbered 998.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

At the end of the bill, add the following:

SEC. . Section 158 of title 23, United States Code, is amended—

(1) in subsection (a)(2), by striking "the fiscal year" and inserting in lieu thereof "each fiscal year"; and

(2) in subsection (b), by striking "in fiscal year if in any succeeding fiscal year" and inserting in lieu thereof "in the fiscal year beginning after September 30, 1986, or the fiscal year beginning after September 30, 1987, if before the end of the period for which such funds would be available for expenditure under section 118(b) of this title".

Mr. LAUTENBERG. Mr. President, the amendment I am offering along with my colleague, Senator DANFORTH, will reaffirm the intent of Congress to achieve a uniform minimum drinking age nationwide of 21. This amendment is necessary to make clear to the States that we are serious about this matter and that we will not stand by and see the States circumvent the intent of the Senate and the Congress. It is essentially the text of S. 1428, which I introduced, with Senator DANFORTH, on July 11, 1985, and which was approved unanimously by the Senate on July 31.

In July of last year, President Reagan signed into law a bill that would withhold highway construction funds from those States that failed to raise their minimum drinking age to 21 by October 1, 1986. Five percent of fiscal year 1987 funding would be withheld from four highway programs on October 1, 1986 if a State has a minimum drinking age lower than 21. On October 1, 1987, if a State has not taken action, another 10 percent of highway funds would be withheld. At the close of fiscal year 1988, under current law, the withholding will end.

States which take action to raise their minimum drinking age before October 1, 1986, under current law, will have the funds that have been withheld reimbursed.

Mr. President, the law passed by the Congress last June constituted a restrained use of Federal authority to address an interstate problem. Across the Nation, we have blood borders: A State with a higher drinking age bordered by one with a lower minimum drinking age. In these situations, young people have a clear incentive to drive in order to drink. After purchasing and consuming alcohol in a neighboring State, they try to make it home. Too many don't make it.

A uniform minimum drinking age of 21 will solve this problem by removing the incentive to cross State borders in order to drink.

In the last year, 14 States have taken action to raise their minimum drinking ages to 21. Thirteen States and the District of Columbia have yet to take action. Of the States which acted this past year, most did so in a manner consistent with both the letter and spirit of the law. In a few cases, however, State legislatures exploited technical loopholes in existing law in an attempt to circumvent the will of Congress. In these cases, the States would sunset their 21 minimum drinking age when the Federal withholding of highway funds ends on 1988.

Mr. President, Congress did not pass Public Law 98-363, in order to withhold highway funds. We passed the Uniform Minimum Drinking Age Act in order to reduce the deaths and crippling injuries attributed to drunk driving by those 16 to 21 years of age. Drunk driving is the No. 1 killer of our Nation's young people. This critical age group is the only one in our society that has not increased its life expectancy in the last 20 years. The reason is drunk driving.

A uniform minimum drinking age of 21 will save over 1,000 lives per year. While this act alone will not rid our highways of drunk driving, it will go far to preserving our most precious resource: our children.

The amendment I propose will deal with those States that have exploited technical loopholes in existing law. My amendment will make the 10 percent withholding of highway funds, scheduled to end on September 30, 1988, permanent. This change will conform the statute to that used to enforce the 55-mile-per-hour speed limit. In addition, my amendment will end the reimbursement of highway funds at the close of fiscal year 1988. This change will essentially establish September 30, 1988, as the date by which the Congress wants to see uniformity in minimum drinking ages across the Nation. If uniformity is not achieved by that date, Congress, under this amendment, is prepared to take stronger action. Funds would continue to be reimbursed for fiscal years 1987 and 1988 so long as those funds have not lapsed.

Mr. President, last year we sent a strong signal to the States that there was national support for a minimum drinking age of 21 nationwide. A few States have questioned the seriousness of our intent. If we are serious about a uniform minimum drinking age, we must pass this legislation. As a fiscal matter, this amendment will have no adverse impact on those 37 States that now have 21 as their minimum drinking age. In those States which have tied their minimum drinking age to the existence or nonexistence of Federal sanctions, no highway funds will be withheld, because, through this amendment, we will be making the sanctions permanent. My amendment will not affect their highway funds, it will keep their minimum drinking age at 21.

When Congress passed the Uniform Minimum Drinking Age Act, Mr. President, it contemplated long-term change in minimum drinking ages across the country. It did not contemplate returning to the patchwork quilt

of differing State laws after 2 years had passed. If we fail to adopt this amendment, we will find ourselves in 1988 with exactly the situation we sought to avoid when we passed the Uniform Minimum Drinking Age Act of 1984.

Mr. President, the Uniform Minimum Drinking Age Act of 1984 had the support of some 81 Senators on final passage. My distinguished colleague, Senator DANFORTH, was the floor manager of the bill to which it was attached. The bill had the support of groups such as the Mothers Against Drunk Driving, the National Council on Alcoholism, the National Safety Council, and National PTA. Today, I again join with Senator DANFORTH to reaffirm Congress' support for this vital initiative.

Mr. President, this amendment which was unanimously adopted by the Senate on July 31 of this year, reaffirms the intent of Congress in passing the Uniform Minimum Drinking Age Act of 1984. The amendment closes a loophole exploited by a small number of States in an effort to circumvent the intent of Congress. Passage of the amendment is necessary to affirm to the States that Congress was and is serious about achieving a uniform minimum drinking age of 21 nationwide.

Mr. DANFORTH. Mr. President, I ask unanimous consent that Senator BOSCHWITZ be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, Congress in recent years has taken important steps to address the drunk driving problem in this country. In 1982, I sponsored legislation which encouraged States to take more effective action against drunk drivers by providing Federal grants to States with tough drunk driving laws. This Incentive Grant Program is working well and, throughout the country, States are enacting tougher drunk driving laws. At times, however, more forceful action is necessary to achieve the desired result; this has been the case with the 21-year minimum legal drinking age.

Last year, legislation sponsored by my distinguished colleague, Senator LAUTENBERG, Public Law 98-363, was enacted to encourage States to set their minimum legal drinking ages at 21. Specifically, this legislation directs the Department of Transportation [DOT] to withhold 5 percent of the fiscal 1987 and 10 percent of the fiscal 1988 Federal-aid highway funds from any State that permits the purchase or public possession of alcohol by persons under the age of 21. This was, and is, very important legislation.

Studies have shown that a uniform drinking age of 21 is one of the most effective means of reducing drunk driving deaths and injuries. Unfortunately, in the years immediately prior to the enactment of the 1984 legislation, most States which did not have already a 21-year drinking age chose not to raise their drinking ages to 21. In the months following the enactment of Public Law 98-363 last July, however, several States have taken this important step; we now have 37 States with a minimum legal drinking age of 21. The legislation clearly is working and having its desired effect.

I am concerned, however, about attempts made by some States to circumvent the intent of this important legislation. The 1984 bill requires DOT to withhold highway construction funds from States with drinking ages below 21 for fiscal years 1987 and 1988. This sanction was intended to render long-term benefits. Some States, however, may thwart this important goal by such means as establishing a 21-year drinking age only for the period during which highway funds are to be withheld; after that time, the States drinking age would revert back to a lower level. Clearly, this violates the intent of last year's legislation.

Mr. President, the amendment being offered today by Senator LAUTENBERG and myself would remedy this situation by requiring DOT to withhold 10 percent of a States highway construction funds in each fiscal year following fiscal 1987 if that States minimum legal drinking age is less than 21. This amendment is consistent with the intent of Public Law 98-363 and will go a long way toward ensuring that the "blood border" problem of recent years will not reemerge.

Mr. President, this amendment will help save lives by reducing drunk driving accidents. I urge my colleagues to join me in support of this important amendment.

Mr. President, I wish to congratulate Senator LAUTENBERG on his leadership in the whole area of combating drunk driving. He really has been the leader in the Senate in this area and this is yet another step in his long-standing initiative.

Mr. GORTON. Mr. President, this amendment is obviously totally nongermane to a reconciliation bill. There have not been any objections to it raised on this side, however. I believe that we are prepared to yield back the balance of our time.

Mr. JOHNSTON. Mr. President, the amendment has not been cleared on this side, so far as I know.

But I have no objection, nor has any objection been voiced to me or to the staff. I, therefore, will not require a record vote.

The PRESIDING OFFICER. Is all time yielded back?

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that Senator BRADLEY be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUTENBERG. Mr. President, I move the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. JOHNSTON. I yield back the balance of our time.

Mr. GORTON. We yield back the balance of our time.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (No. 998) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 999

(Purpose: To make technical changes relating to the repeal of revenue sharing)

Mr. GORTON. Mr. President, Mr. PACKWOOD has an amendment at the desk which I call up on his behalf. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Washington [Mr. GORTON], for Mr. PACKWOOD, proposed an amendment numbered 999.

Mr. GORTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 306, beginning with line 18, strike out all through page 308, line 11, and insert in lieu thereof the following:

SUBTITLE G—REVENUE SHARING

SEC. 779. TERMINATION OF GENERAL REVENUE SHARING.

(a)(1) Except as otherwise provided in this section, the provisions of chapter 67 of title 31, United States Code, are hereby repealed.

(2) The Secretary of the Treasury shall continue to be the trustee of the Trust Fund, which shall remain in existence until amounts in the Trust Fund are expended for entitlement payments to local governments in accordance with the terms of the Revenue Sharing Act.

(3) The Secretary is authorized to take such necessary or appropriate actions, to carry out the requirements of this Act with respect to funds appropriated to the Trust Fund, as were authorized under the terms of the Revenue Sharing Act, including but not limited to enforcement of the regulatory provisions concerning nondiscrimination, audits, accounting procedures, public hearings, expenditures in accordance with State and local law, and cooperation with reasonable requests for information.

(4) The Secretary may increase or decrease a payment to a unit of general local government under the Revenue Sharing Act to account for a prior underpayment or overpayment only if the increase or de-

crease is demanded by the Secretary or such unit of general local government before March 1, 1986.

(5) Amounts paid to units of general local governments from the Trust Fund shall be used, obligated, or appropriated by the units of general local governments before April 1, 1987, and these funds shall continue to be subject to the terms of the Revenue Sharing Act.

(6) Subsection (a)(1) of this section shall not have the effect of releasing or extinguishing any fiscal sanction, finding, determination, compliance agreement, or other duly authorized action for the purpose of sustaining any proper action or prosecution for enforcement authorized under the terms of the Revenue Sharing Act.

(7) The Attorney General, and persons adversely affected by a practice of a local government, may bring a civil action in an appropriate district court of the United States against the applicable unit of general local government as was authorized under the Revenue Sharing Act. The court is authorized to grant such relief as was authorized under the terms of the Revenue Sharing Act.

(8) The Secretary shall report to Congress on the operation and status of the Trust Fund and the implementation of this section not later than December 1 of each year the Trust Fund remains on the books of the Department of the Treasury.

(b)(1) The table of chapters for subtitle V of title 31, United States Code, is amended by striking out the item relating to chapter 67.

(2) Paragraph (2) of section 1115(b) of the Social Security Act (42 U.S.C. 1315(b)(2)) is amended—

(A) by adding "and" at the end of subparagraph (A),

(B) by striking out "; and" at the end of subparagraph (B) and inserting in lieu thereof a period, and

(C) by striking out subparagraph (C).

(3) Section 501(b)(6) of the Housing Act of 1949 (42 U.S.C. 1471(b)(6)) and section 102(a)(17) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(17)) are each amended by striking out "under the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512)" and inserting in lieu thereof ", prior to October 1, 1986, under chapter 67 of title 31, United States Code".

(4) Section 302 of the Age Discrimination Act of 1975 (42 U.S.C. 6101) is amended by striking out ", including programs or activities receiving funds under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221 et seq.)".

(5) Paragraph (3) of section 3 of the Coastal Barrier Resources Act (16 U.S.C. 3502(3)) is amended by striking out subparagraph (A) and redesignating subparagraphs (B), (C), (D), and (E) as subparagraphs (A), (B), (C), and (D), respectively.

(6) Subparagraph (B) of section 119(n)(2) of the Housing and Community Development Act of 1974 (42 U.S.C. 5318(n)(2)(B)) is amended by striking out "is an eligible recipient" and inserting in lieu thereof "was an eligible recipient, prior to October 1, 1986,".

(7) Paragraph (1) of section 248(h) of the National Housing Act (12 U.S.C. 1715z-13(h)(1)) is amended by striking out "is an eligible recipient" and inserting in lieu thereoff "was an eligible recipient, prior to October 1, 1986,".

(c) For purposes of this section—

(1) The term "Trust Fund" means the State and Local Assistance Trust Fund established under the Revenue Sharing Act.

(2) The term "Revenue Sharing Act" means the provisions of chapter 67 of title 31, United States Code, as in effect on the day before the date of enactment of this Act and subject to the terms of any appropriation Act of fiscal year 1986.

(3) The term "Secretary" means the Secretary of the Treasury.

(d) There are hereby authorized to be appropriated for fiscal year 1987, such sums as may be necessary to administer the provisions of this section, and to provide for the orderly phaseout of the Revenue Sharing Program.

(e)(1) Except as otherwise provided in this subsection, the repeal and amendments made by this section, and the provisions of this section, shall take effect on October 1, 1986.

(2) The provisions of subsections (a)(4), (c), and (d) shall take effect on the date of enactment of this Act.

Mr. GORTON. Mr. President, section 779A of the reconciliation bill terminates the Revenue Sharing Program when its authorization expires—on October 1, 1986.

This technical amendment does not change that. But in repealing the revenue sharing, we want to make sure that the rules and regulations which are now in place will continue in force until the program is completely wound down. This technical amendment, which has been cleared with the Treasury, the managers of the bill on both sides, and with the ranking member of the Finance Committee, does the following:

First, it ensures that the Secretary of the Treasury will continue to be able to enforce compliance with civil rights; audit, and other requirements which exist now under the Revenue Sharing Act.

Second, it preserves the right of private parties and the Attorney General to enforce the law in court; and

Third, it requires recipient governments to have the funds "used, obligated or appropriated" by April 1, 1987. This is consistent with having the Office of Revenue Sharing wind down within a year.

Mr. President, I am not aware of any objection to this technical amendment. Therefore, I move its adoption.

Mr. President, the amendment is technical in nature. It has been cleared on both sides.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Oregon.

The amendment (No. 999) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1000

(Purpose: To limit the amount of customs fees covered into the general fund of the Treasury and to continue to provide that a portion of such fees be deposited as a refund to the customs appropriation)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS] proposes an amendment numbered 1000.

Mr. BAUCUS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 285, beginning with line 24, strike out all through page 286, line 13, and insert in lieu thereof the following:

(f)(1) Notwithstanding section 524 of the Tariff Act of 1930 (19 U.S.C. 1524), all the fees collected under subsection (a) shall be deposited in a separate account within the general fund of the Treasury of the United States. Such account shall be known as the "Customers User Fee Account".

(2)(A) The Secretary of the Treasury is authorized and directed to refund out of the Customer User Fee Account expenses incurred by the Secretary of the Treasury in providing overtime customs inspectional services in an amount determined by the Secretary of the Treasury to be equivalent to the amount of such expenses.

(B) The amounts which are required to be refunded under subparagraph (A) shall be refunded at least quarterly on the basis of estimates made by the Secretary of the Treasury of the expenses referred to in subparagraph (A). Proper adjustment shall be made in the amounts subsequently refunded under subparagraph (A) to the extent prior estimates were in excess of, or less than, the amounts required to be refunded under subparagraph (A).

On page 286, strike out lines 17 and 18.

On page 286, line 19, strike out "(2)" and insert in lieu thereof "(h)(1)".

On page 286, line 22, strike out "(3)" and insert in lieu thereof "(2)".

Mr. BAUCUS. Mr. President, this amendment has been cleared on both sides. It simply reinstates an account used by the U.S. Customs Service for depositing fees that are directly reimbursed to Customs for performing certain inspection and training services.

Mr. President, my amendment restores a section of law which the Finance Committee repealed before completely understanding the implications.

Section 1524 of the Tariff Act of 1930 allowed for the deposit of reimbursable charges, such as inspection or training services paid for by airlines, shippers and other agencies or governments, to be deposited as refunds to the appropriation rather than deposited into the Treasury.

This section of law, it is now apparent, serves both the Government and industry well. The account is only

used for certain services, such as inspections, which are paid for solely by the industries required to use the services.

It is a self-sustaining account which requires the authorization and oversight of Congress and the administration but does not require an appropriation.

For example, inspections are required of passengers and certain cargo regardless of the time of night—or holiday. The U.S. Government requires businesses to use these services and to pay for their full cost. Since industry is simply reimbursing the Government for its expense, an appropriation is not necessary.

The U.S. Customs Service also collects duty and other fees on behalf of Puerto Rico and the Virgin Islands. From these funds we reimburse ourselves for the expense of the collection and then turn the remainder over to the territory.

Customs also provides, through an international agreement, certain training to the Government of Saudi Arabia for which we are completely reimbursed.

These are a few of the reimbursable activities Customs performs at no cost to the Government because we require the users to pay for them up front.

Mr. President, my amendment will reinstate the reimbursable accounting for these services because both Government and the private sector are best served in this way.

Without this section of law, Congress and the administration will be required to set up and fund an appropriated account thereby subjecting the people depending on these services to the vagaries of budget cycles, fiscal year-end shortages and unintentional across-the-board budget cuts.

These accounts, however, do not lend themselves easily to budget forecasting. Inspections are a result of international trade environment and domestic economy.

Nor would any purpose be served by including them in across-the-board deficit reductions or budget cuts since it would result in absolutely no savings—only restricted access to services businesses are required to use.

Mr. President, all we agree to do here is continue to let industry pay for the services we require them to use and let those payments be directly reimbursed to an account which provides those services.

I always liked the old saying, "if it ain't broke don't fix it." In this case, if we don't restore the old law we will be needlessly breaking something that is working. And we'll be back later to fix it.

I am pleased that both sides of the aisle here in the Senate, and, I understand, in the House, agree that we need to take this step back and fix what we both did in committee. I also understand that all of the industries using Customs services are in agreement.

This account was abolished in the Finance Committee before we fully understood the implications.

It is now apparent that retaining this account best serves the needs of the Federal Government and the industries that pay for these services. It also assures that inspections and training will continue uninterrupted.

Mr. President, I know there are many more amendments and since this is cleared by both sides of the aisle in the Senate as well as the House, I will not take up any more time.

Given the unanimity in this issue, Mr. President, I hope we can save the time of the Senate and approve this amendment by unanimous consent.

I want to thank the floor leaders and the leadership of both the Finance Committee and the Ways and Means Committee for their support.

Mr. GORTON. Mr. President, the amendment of the Senator from Montana has been cleared on this side.

Mr. CHILES. Mr. President, the amendment is cleared on our side.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Montana.

The amendment (No. 1000) was agreed to.

Mr. BAUCUS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1001

(Purpose: To delete section 807)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 1001.

Beginning on page 441, line 22, strike out through line 14 on page 442.

Mr. DOLE. Mr. President, the amendment being offered simply strikes a provision which erroneously removes the postal subsidy for any mailing of any organization not qualifying for tax exempt status as a 501(c)3 organization.

As CBO was unable to assign any savings to the provision, the amendment results in no loss in savings.

The Senator from Kansas is sympathetic with the original intent of the committee which was to remove subsidies for only those pieces of mail sent by certain organizations that lobby for legislation or raise money or support for a specific candidate, however, the actual result of the provision is much broader.

It is my understanding that both the distinguished chairman of the committee, Senator ROTH, and the distinguished chairman of the subcommittee, Senator STEVENS, are prepared to accept the amendment.

The PRESIDING OFFICER. All time for debate has expired.

Mr. DOLE. I understand this amendment has been discussed on each side. It is acceptable.

Mr. CHILES. Mr. President, it is acceptable on this side.

Mr. GORTON. It is acceptable.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment (No. 1001) was agreed to.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1002

(Purpose: To express the sense of the Senate with respect to the medicare hospital deductible.)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] for himself and Senators BYRD, RIEGLE, MELCHER, KERRY, SARBANES, MATSUNAGA, CRANSTON, CHILES, and SIMON proposes an amendment numbered 1002.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 164, after line 25, insert the following:

SEC. 711A. SENSE OF THE SENATE WITH RESPECT TO INPATIENT HOSPITAL DEDUCTIBLE.

In view of the $92 Medicare hospital deductible increase that will go into effect January 1, 1986, it is the sense of the Senate that the Committee on Finance should report legislation which will reform calculation of the annual increase in such deductible so that it is more consistent with annual increases in Medicare payments to hospitals.

Mr. KENNEDY. Mr. President, the Department of Health and Human Services announced on September 30 that the Medicare hospital deductible will increase by $92 on January 1, 1986—the largest increase in the deductible in the history of Medicare. This whopping increase has been a source of distress and outrage to senior citizens all over the country.

The Medicare hospital deductible is the amount that each elderly and disabled Medicare beneficiary must pay

out of his own pocket or his own insurance when he enters the hospital. Eight million of our senior citizens must pay this deductible every year, and this scheduled $92 increase will bring the total deductible to a staggering $492, an increase of 173 percent just since 1980.

The exorbitant increase in the hospital deductible was not intended by anyone. It is an unintended consequence of the new Medicare prospective payment system and of Congress' failure to modify the method calculating the deductible to reflect the new payment system.

Since the beginning of the Medicare Program, the deductible has been calculated on the basis of the cost of an average day of care. Increases in the deductible were supposed to reflect increases in the cost to Medicare of a typical hospitalization, and as long as Medicare paid hospitals for services to Medicare beneficiaries on a daily cost basis, the annual increases in the deductible were reasonably fair.

But today, Medicare no longer pays for hospital care on a daily cost basis. Beginning with legislation enacted in 1982, Medicare began to pay a fixed price—set in advance—for each Medicare admission. The fixed price varied depending on the diagnosis that was treated, but the key feature of this prospective payment system was that the price was set in advance and was based on admissions and diagnoses, not days of care.

The prospective payment system has reaped enormous savings for the Federal budget and has had a major impact in slowing the growth in health care costs. In the next 5 years alone, prospective payment will reduce the deficit an estimated $37 billion, and that is without assuming any savings from this year's reconciliation bill.

But, while prospective payment has brought relief to the Federal budget, it has created heavy additional costs for senior citizens already burdened with high health-care expenses. Prospective payment encourages hospitals to economize by reducing length of stay. Between 1982 and 1985, average hospitalization for Medicare beneficiaries dropped from 10.24 days to a projected 8.75 days. Between 1983 and 1984 alone, length of stay dropped almost a full day, from 9.84 to 9.05.

The result of this drop in length of stay—combined with the fact that hospital occupancy rates are now at historic lows—has been that hospitals' costs are concentrated in fewer days of care. The rate of increase in total costs and costs per admission has slowed dramatically, while the costs of care per day have soared.

There is nothing that better illustrates the unreasonableness of Congress' failure to reform the old method of calculating the hospital deductible than what will happen next year. That horrendous $92 dollar increase in the hospital deductible translates into a 23-percent rate of inflation. That is three times as high as the increase in Medicare's per-admission payment in 1984, the base year on which the deductible is calculated.

It is 46 times as high as the increase in per-admission payment to hospitals that is included in the reconciliation legislation that we are considering today.

Mr. President, I say it is time for Medicare beneficiaries to share in the savings from prospective reimbursement rather than being saddled with additional costs. I announced legislation to correct this problem 4 months ago. If that legislation had been included in the bill we are considering today, sick Medicare beneficiaries would not face a $92 dollar tax increase every time they enter the hospital next year.

The amendment that I am offering today would express the sense of the Senate that the Finance Committee should report to this body legislation which will reform the method of calculating the Medicare deductible so that it is more consistent with annual increases in Medicare payments to hospitals. Enactment of this resolution will send a message loud and clear that the Senate believes that our Nation's senior citizens should not be faced with that excessive, unfair increase in the Medicare hospital deductible on January 1, 1986.

I urge my colleagues in this body to join me in casting a vote for fairness for our senior citizens.

Mr. President, I have talked to the chairman of the committee and floor managers about this amendment and they have indicated their consent to it.

I ask unanimous consent that the Senator from Florida [Mr. CHILES] be made a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, the amendment has been cleared on this side.

Mr. CHILES. It is cleared on our side.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1002) was agreed to.

Mr. CHILES. I move to reconsider the vote, Mr. President.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECESS UNTIL 1:30 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 1:30 p.m.

Thereupon, at 12 noon, the Senate recessed until 1:30 p.m., whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. LAXALT].

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. GORTON. Mr. President, we are on the reconciliation bill. Am I to understand there is no further time for debate on amendments?

The PRESIDING OFFICER. The Senator is correct.

Mr. GORTON. It is the intention of the chairman of the Budget Committee, if at all possible, to finish all amendments by some time between 4 and 5 this afternoon. Senators who have amendments which are ready to be called up are urged to come to the floor and present them. Votes will follow almost immediately upon the amendments being called up.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GRASSLEY). Without objection, it is so ordered.

Mr. GORTON. Mr. President, I understand that the distinguished Senators from Vermont and Massachusetts have an amendment, though there is no time left for debate. I ask unanimous consent that there be 10 minutes on the Stafford-Kennedy amendment equally divided.

Mr. JOHNSTON. Will the Senator repeat the unanimous-consent request?

Mr. GORTON. That there be 10 minutes for debate of the Stafford-Kennedy amendment equally divided.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Vermont.

AMENDMENT NO. 1003

(Purpose: To remove certain requirements relating to the treatment of energy assistance payments for purposes of calculating excess shelter expense deductions under the food stamp program)

Mr. STAFFORD. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. STAFFORD] proposes an amendment numbered 1003:

Beginning on page 10, strike out the dash on line 23 and all that follows through "(2)" on line 4 of page 11.

On page 11, strike out "a" on line 6 and all that follows through "or" on line 10.

On page 11, strike out "In" on line 11 and all that follows through "Act." on line 15.

Mr. STAFFORD. Mr. President, I understand that there are 10 minutes available, 5 minutes to a side.

Mr. President, I offer this amendment to correct what I think is a serious problem with this bill. I am joined in support of this amendment by my distinguished colleagues, Mr. KENNEDY, Mr. HEINZ, Mr. GLENN, Mr. DANFORTH, Mr. LEAHY, Mr. D'AMATO, Mr. EAGLETON, Mr. BURDICK, Mr. COHEN, Mr. HATFIELD, Mr. MOYNIHAN, Mr. LAUTENBERG, Mr. HART, Mr. ANDREWS, and Mr. RIEGLE.

The bill as written would fundamentally alter the treatment of energy assistance payments for food stamp purposes. Congressional intent in reauthorizing the energy assistance program only last year, made it clear that energy assistance should not be counted as income for food stamps. In stark contrast, under the bill before us some people would have their food stamp benefit cut because they received energy assistance benefits.

Unless this provision is removed from the pending bill, as many as 11 million low-income Americans could possibly face reductions in food stamp benefits during winter months, when good nutrition is important for good health.

For instance, two elderly persons living together who receive a $519 monthly Social Security check would have their food stamp allotment reduced by more than 76 percent—from the present $77 to $18 monthly—during the 5-month heating season.

Congress never intended for this to happen, and I do not think that we should permit it to happen now. My amendment would simply strike the energy assistance language from the bill.

We often hear of people faced with the "heat or eat" dilemma. I can think of no instance when this dilemma has been clearer. I certainly do not think we should be in the position of sanctioning it.

It is claimed that the food stamp cuts for households receiving energy assistance benefits are minimal; but in fact, in many colder regions they are very significant and very painful. On average, Vermonters will lose $28.30 of groceries each winter month. Alaskans and Minnesotans lose over $32. North Dakotans lose $41 each month. Pennsylvanians lose $21.20 monthly, while Iowans lose $18.90. The poorest households, of course, get higher energy benefits and will, therefore, lose more food stamps. For example maximum losses in Minnesota can be $61.30 a month, in Vermont $79.30.

The monthly reduction in food stamp benefits over the 5-month heating season averages $14.70 nationally. Since a meal for a food stamp recipient costs 70 cents, he or she will lose an entire week's meals. Poorer households in colder states could lose as much as a whole month's meals for two household members.

Another important point is that some elderly and disabled households will become ineligible for food stamps under the provisions of the committee bill. These households' eligibility is based solely on net income after deductions, unlike that of other households.

Moreover, I am concerned that the committee's action strays into the jurisdiction of the Committee on Labor and Human Resources.

As I mentioned, Congress only last year reenacted the Energy Assistance Program. The committee again included the language prohibiting energy assistance benefits from being counted as income or resources for any purpose under any Federal or State law.

Despite this clear intent, the Department of Agriculture is currently trying to include energy assistance payments in the calculation of food stamp benefits.

To date, USDA's policy has been challenged in three courts. USDA has lost each case, and is prohibited in those States affected from enforcing this policy. I think they should ultimately be adopted nationwide.

The amendment I am offering is not costly but it will correct a serious inequity in the bill. This amendment is consistent with the Reconciliation Act requirements. It does not break the Budget. It does not increase the deficit. The Agriculture Committee reduced outlays by $184 million more than was required by the reconciliation instructions. This amendment, which costs $165 million, over 3 years—33 million first year, which still leaves the bill $19 million below the permissible ceiling. It has broad support, not only within Congress, but outside it as well.

Let us not force people to heat or eat. Let us continue to recognize energy assistance as a supplemental program. And let us not undo what we did only last year and what we will probably do again next year.

Mr. President, I urge my colleagues to give their full support to this amendment.

Mr. President, basically, the bill before the Senate would do very serious harm in the winter months to elderly poor people in the Snow Belt States by forcing them to count funds for low-income home energy assistance against their food stamp allowances.

Mr. President, I yield to the Senator from North Dakota [Mr. ANDREWS].

Mr. ANDREWS. Mr. President, I cosponsor the amendment offered by my good friends, the senior Senators from Vermont and Massachusetts, to strike the committee provision regarding the inclusion of low-income energy assistance payments as countable income when determining the level of food stamp benefits a household may be eligible for. Implementation of this proposal will result in a substantial reduction in food stamp benefits for these households. Perhaps even more disconcerting, Mr. President, is that the most vulnerable members of our society—the elderly and disabled—are among those who will ultimately suffer, unless we act to correct what can only be viewed as an agregious error. The fact is that elderly individuals just under or over 130 percent of the poverty line, currently receiving food stamp benefits, will more than likely lose their eligibility for food stamps if the committee amendment is enacted into law.

Mr. President, I do not believe that this legislative body, while striving to maintain fiscal integrity, need relinquish our social conscience in the process. I am sure that even the most pragmatic of my colleagues would agree with me on this point. Furthermore, the Food Stamp Program has been credited as representing the last viable safety net that remains available to the poor. I ask my colleagues: At a time when the need for food assistance continues to increase, are we to shorten the net and subsequently cut some recipients off—all in the name of the almighty dollar?

North Dakotans will be hit especially hard. It is estimated that the average reduction in food stamp benefits to a household also receiving low-income energy assistance will be roughly $41 per month. Mr. President, to say that the winter climate in North Dakota is severe would be an understatement of the nth degree. In fact, it is not uncommon for temperatures to drop to 80 below. It seems, therefore, an act of cruelty to force some households to make the decision whether to eat or stay warm.

As a member of the Senate Budget and Appropriations Committees, I am deeply concerned over the Federal deficit. My vote for the Gramm-Rudman amendment reflects my commitment to bring about an end to the Federal Government's spending spree. However, Mr. President, I do not believe that savings to the Government should come unnecessarily off the backs of the less fortunate members of society or those not equipped to fight back for themselves. Therefore, I urge my colleagues to support the amendment offered by Senators STAFFORD and KENNEDY.

Mr. STAFFORD. Mr. President, I yield to the Senator from Massachusetts [Mr. KENNEDY].

Mr. KENNEDY. Mr. President, I am pleased to join Senator STAFFORD and many of my distinguished colleagues in offering this amendment to remove the detrimental provision in S. 1730 that will reduce food stamp benefits for up to 12 million Americans who also receive Federal energy assistance.

I want to thank Senator STAFFORD for his leadership and hard work on this important amendment. Should this dangerous provision remain, any senior citizen, any disabled individual, any poor family that receives low income energy assistance benefits to heat their homes will be denied a portion of their food stamp benefits because they receive this Federal assistance to stay warm in the winter. To make this absolutely clear to all my colleagues in the Senate, should this dangerous provision remain in the reconciliation legislation, we will be forcing up to 12 million people to decide whether they will eat this winter or whether they will heat their homes.

The loss of food stamp benefits will be significant and will be very painful for low-income Americans, particularly those who live in cold regions of the country. In Massachusetts, food stamp benefits will be cut an average of up to $37.40 per person per month. That translates into a loss of up to 53 meals per month should my constituents chose to accept low income energy assistance to stay warm. Food stamp recipients in Kansas could lose up to $44.40 in food assistance or 3 weeks worth of food stamp assistance each month over the coming winter months. The elderly and disabled in North Carolina could lose an average of 17 meals per month this winter because they need heating assistance. Not only will our country's senior citizens see their food and nutrition benefits reduced, many elderly and disabled Americans could lose their food stamp benefits entirely.

Last year, the Congress passed and the President signed into law, the reauthorization of the Low-Income Energy Assistance Program that included specific language reiterating the will of Congress that low-income home energy benefits not be counted as income when calculating food stamp benefits. Before we ignore this action, I would like to have an opportunity to look more closely at all the effects that a change in this congressional intent will have on our low-income citizens. I would like to afford all my colleagues on the Labor and Human Resources Committee the same opportunity.

This amendment, which represents a return to current law, will add back a total of $165 million to the Agriculture Committee's budget. It is my understanding that the Agriculture Committee went above and beyond their savings mark by $184 million. I commend their zeal and enthusiasm in striving for maximum savings. However, I cannot concur with such action when it means that 6 million of our citizens will go hungry and without heat.

Mr. President, there are 33 million individuals who are poor in this country. One in every four of our young children is living in poverty. The Food Stamp Program is the first line of defense against hunger for the 10 million children who are lucky enough to get benefits. Study upon study tells us that millions of women, children and elderly Americans are suffering from hunger in the United States. We know that the Food Stamp Program has been cut $7 billion since 1981. We know that monthly food stamp allotments do not last through the entire month. And, we know that more and more people are going to the local food pantry and soup kitchen to fill in that gap. A recent Bread for the World study entitled "Unfed America 1985." reported an average monthly increase of 16.25 percent in the number of people seeking emergency food assistance from 1984 to 1985. Hunger and undernutrition in the United States continues to grow and continues to inflict unnecessary human suffering on our citizens. It is unconscionable to allow language that further reduces nutrition assistance to millions of our elderly, our disabled and our struggling families to remain in the budget reconciliation bill. Adequate food and shelter are basic human needs. It is our moral responsibility to provide nutrition and warmth for our citizens in need and it is our obligation to address these human needs in a compassionate manner.

I call on the Senate to remove this devastating provision and allow the poor of this Nation to stay warm and to eat this winter. And, I would like to notify my colleagues that I intend to pursue this same issue when the farm bill comes before the Senate.

● Mr. GLENN. Mr. President, I am pleased to cosponsor this amendment to strike provisions of the budget reconciliation bill that will reduce or eliminate food stamp benefits for our poorest citizens. I urge my colleagues to support this amendment.

The Low-Income Energy Assistance Act has always stated that energy assistance payments shall not be counted as income or resources for purposes of any other Federal or State program, including food stamps. It is the intent of Congress that energy assistance payments will supplement, rather than supplant, other forms of assistance. Our poor and elderly citizens should not be penalized for accepting assistance to pay skyrocketing utility bills.

A provision in the budget reconciliation bill changes this long-standing policy. This provision would not allow the food stamp applicant to include any energy assistance payments in their shelter cost deduction. This means that the applicant's deduction will be lower, thus resulting in a higher net income and reduced food stamp benefits.

Unless this provision is removed from the budget reconciliation legislation, 5.5 million low-income Americans face reduction in food stamp benefits during the winter months, when good nutrition is especially important for good health. The average monthly reduction in food stamp benefits over the 5-month heating season is $14.70. The impact of this change in Ohio would mean an average reduction in food stamp benefits of $10 per month during the 5-month heating season, and a maximum reduction of $26.70 per month. The number of affected households in Ohio would be a staggering 270,000. In colder regions of our country the impact is even more severe. On average, Vermont recipients will lose $28.30 each winter month, recipients in Alaska and Minnesota will lose over $32 each month, and in North Dakota, the average loss will be $41 each month.

This provision will strike hardest at our elderly and disabled citizens, and could mean not just a reduction in food stamp benefits but a loss in eligibility for them. Unlike other applicants for food stamps, eligibility for the elderly and disabled is based solely on net income after deductions. The change in shelter cost deductions could eliminate eligibility for elderly households near the 130 percent poverty level. Winter weather has already arrived in my State of Ohio and other parts of the country. It is unconscionable to force poor Americans, particularly those who are elderly or disabled, into a "heat or eat" choice.

Mr. President, such a major change in policy should not be enacted without carefully considering its serious impact on our poor and elderly citizens. I urge my colleagues to support this amendment.●

● Mr. BOSCHWITZ. Mr. President, I rise today in support of the Agriculture Committee's shelter deduction provision in the Food Stamp Program reauthorization, specifically its treatment of payments under the Low Income Energy Assistance Act and utility costs. Senator STAFFORD's amendment would strike the committee provision. The amendment would have the effect of increasing food stamp benefits to reflect energy expenses which are already being paid by another Federal program.

The current situation is this: In 40 States and the District of Columbia there is an arbitrary distinction on the deductibility of utility expenses based on whether the payments are "cash" (paid directly to the recipient) or "vendor" (paid to the utility company). If the low income energy assistance payment is made to the vendor, the recipients are not allowed to deduct their utility bills covered by that payment. If the low income energy assistance payment is made to the recipient the recipients are allowed to deduct all of their utility expenses, even those paid for by low

income energy assistance. In the other 10 States (the eighth circuit, Idaho, Indiana, and Montana), because of court decisions, recipients are allowed to deduct utility costs when covered by either cash or vendor low income energy assistance payments.

We felt it was irresponsible and inequitable to leave these arbitrary discrepancies in place during committee consideration of the food stamp reauthorization. But that is exactly what the proposed amendment is asking us to do.

The Senate Agriculture Committee by a vote of 17 to 0 adopted a bipartisan provision that brings equity to the treatment of low income energy assistance payments in the Food Stamp Program. Under the committee bill, out-of-pocket expenses for energy costs are allowed as household expenses in determining the excess shelter deduction, but shelter expenses paid by low income energy assistance payments are not deductible.

This provision in no way changes the long-standing policy that federally funded energy assistance payments are not counted as income for purposes of determining eligibility or benefit levels in other programs. The only issue the Agriculture Committee addressed was how the Food Stamp Program should treat expenses paid for by low income energy assistance payments. We decided not to allow food stamp recipients to deduct utility expenses they were not incurring.

These payments would not be deductible regardless of whether they are paid directly to the household or to the utility company. If a recipient receives low income energy assistance payments, utility costs would be deductible only to the extent they exceed that payment and there are out-of-pocket expenses.

States will still be allowed to establish standard utility allowances and deduct a set amount for utility expenses to ease administrative complexity. If expenses exceed the standard utility allowance, recipients are allowed to deduct actual expenses, as under current law. Therefore, the States have set the standard utility allowance somewhat higher than the average utility expenses so they don't have to deal with actual expenses. For example in Minnesota the standard utility allowance is set at $200, in Vermont $552. The only change the committee made in the standard utility allowance was to require that, in calculating their standard utility allowance, States take into account only out-of-pocket utility expense. This could lead to a lowering of the standard utility allowances—not drastic reductions.

The information that has been circulated on this provision has greatly overstated the effect of the committee's proposal. The State-by-State impact that was presented, if totaled, indicates a cumulative impact of the provision at $300 million. However, the Congressional Budget Office has estimated total annual savings of $65 million. The figures cited, therefore, overstate the effect of the provision by almost five times.

Some of the overstatements seem to result from a misunderstanding of the existing Food Stamp Program. Opponents of the committee's provision neglect the fact that approximately one-half of all energy assistance is provided in vendor payments directly to the utility company, and the committee simply restates current regulatory policy. The analyses also seem to miss the fact that the States would still be able to use a standard utility allowance and that there is a ceiling on the shelter deduction, which many households are already hitting, so that a slight adjustment in the standard utility allowance will have no effect.

I recognize that the committee's provision addresses a complicated issue. However, the committee arrived at what was universally regarded as a fair and reasonable solution which I would urge you to uphold.●

● Mr. LEAHY. Mr. President, I want to point out that when the food stamp provisions were acted on by the Agriculture Committee, the Boschwitz/Leahy package contained the LIHEAP provision which we are now trying to amend. It was designed at the time to meet food stamp savings request by the Senate budget resolution. The subsequent final budget resolution gives us more flexibility in the food stamp area.

I reluctantly went along with the LIHEAP provision to facilitate getting the bill out of committee and to meet the budget targets, which were exceeded by $200 million.

This leaves plenty of room to correct a bad situation and to save poor people from losing food stamp benefits because of the energy assistance they may receive.

I have seen the figures for each State, as to how many households will be affected and how seriously they will be affected, if we do not pass this amendment. In Vermont, 12,022 households will lose monthly benefits, from an average of $28.30 per household and up to $79.30 for some households. Vermont has long, cold winters and I am not willing to let poor children and families go cold for the sake of making a greater savings than the Congress requires in the budget resolution.

Mr. President, I will vote for this amendment and I hope others will join me in passing this humanitarian provision.●

Mr. HEINZ. Mr. President, I strongly support the amendment to the reconciliation bill, S. 1730, offered by my distinguished colleague from Vermont. Simply stated, it will keep the status quo for calculating food stamp benefits for individuals also receiving benefits from the Low Income Home Energy Assistance Program [LIHEAP]. Without this important amendment, this bill would make the poorest in our society decide between eating or heating, and that is cruel and unfair, and is not the way this Senator chooses to balance the budget.

It was never the intent of Congress to penalize persons who received energy assistance, yet the food stamp provisions of this bill would do exactly that. These provisions would disallow recipients of energy assistance from continuing to deduct their total energy costs from their gross income for the purposes of determining eligibility for the food stamp program.

Mr. President, this is not a new issue to the Senate. Congress passed the energy Assistance Act as part of the oil windfall profit tax legislation in 1980, and under LIHEAP the Secretary of Health and Human Services provides grants to States for the purpose of making energy assistance available to low-income households with home energy costs that are excessive in relation to household income. It is not difficult to understand how several months of high energy costs could break the backs of the poor, and the Low Income Energy Assistance Act of 1981 explicitly states that payments made under LIHEAP to help low-income families through the disastrous effects of high energy bills shall not be considered "income or resources" for food stamp purposes. The conference report accompanying the act states that "benefits will be computed as if the total cost of the fuel, including the amount of assistance provided, had been paid by the household."

Mr. President, when determining countable income for food stamp eligibility and benefit purposes, certain income is not counted. One catagory of income that is not counted is income derived from LIHEAP, and under the reconciliation bill this is not changed. The Food Stamp Program also allows household expenses to affect the way income is calculated for eligibility and benefit purposes. Current law allows households to deduct utility expenses from their countable income. This makes eligibility more likely and increases benefit levels. But both the farm bill, S. 1714, and the reconciliation bill, S. 1730, include provisions that would disallow the deduction of energy assistance payments. This legislation draws a distinction between energy assistance payments as "income" and as "deductions."

This distinction is a back door approach to considering LIHEAP benefits as income in order to cut Food Stamp Program benefits. It was the

intent of Congress to provide relief from the high cost of energy to low-income individuals without affecting their eligibility or any other program, but if the deduction of energy costs paid by LIHEAP, which would have otherwise been paid by the individual and be considered deductable, are disallowed, and individual's net income will be higher and result in decreased food stamp benefits.

The Congressional Budget Office estimates that approximately $65 million will be saved each year for the next 4 years as a result of this provision. But I ask my colleagues to consider the number of low-income individuals and families that will receive fewer food stamps or none at all as a result of this bill simply because they receive assistance in paying their high energy bills. This $65 million per year cut will hurt human beings, Americans who are struggling to keep food on the table for their children, and older Americans. As chairman of the Special Committee on Aging, I have a special interest in the future of LIHEAP. LIHEAP gives priority to elderly citizens, and the Department of Health and Human Services estimates that about 40 percent of the households receiving energy assistance funds have a family member 65 years of age or older. Although there are no official CBO estimates of how many persons would experience a loss or reduction of food stamp benefits, we estimate that some 5.5 million individuals could be affected by this provision. Isn't it typical that we put as our priority the estimates of how much will be saved and not how many we will hurt?

Mr. President, the Agriculture Committee based its action on the inequity under current law, which prohibits individuals receiving indirect benefits from LIHEAP—benefits paid directly to the vendor, from deducting those expenses for the purpose of calculating food stamp benefits. As I have discussed, an individual who receives his or her benefits directly may deduct these as expenses incurred. I agree with the committee that the current system is inequitable, but another wrong does not right the current inequity. To right the current inequity the committee should have allowed those receiving indirect LIHEAP payments to make these deductions as well. In fact, all court rulings to date regarding this inequity have favored allowing the indirect recipient of LIHEAP to deduct the assistance as an expense.

I understand very well the extremely difficult budget situation Congress and we as Americans must face, and it is not my intention to right this inequity today by extending the ability to deduct these energy expenses to indirect LIHEAP beneficiaries. But I will not stand quietly by while the intent of Congress and the quality of life of our low-income citizens is ignored. The provisions of this bill effectively succeed in diminishing the food stamp recipient's benefits by eliminating the deduction and this is wrong.

Mr. President, in conclusion, I challenge my colleagues to: First, consider the original intent of Congress to provide assistance to low-income Americans who face excessive energy bills, without reducing their other bare minimum benefits; and second, to approach our deficit reduction efforts with integrity. I believe it is wrong to place the burden of our deficit on the backs of those Americans, both young and old, who have the least to give up.

Mr. DURENBERGER. Mr. President I rise in support of the pending amendment of the Senator from Vermont to this reconciliation bill because I share his concern over the Agriculture Committee's treatment of food stamps and low-income energy assistance. I support his effort to delete this language, while we may disagree on the reasons for doing so.

Mr. President, the Low-Income Energy Assistance Program was created as part of the windfall profits tax of 1979. Its purpose at that time was to cushion the disadvantaged segments of our society against the shock of energy price increases due to deregulation. That was a sound and compassionate judgment by the Congress to provide a mechanism for economic adjustment to the ERA of higher, and I might add, more realistic energy prices.

But low-income energy assistance was never intended to become an integral or permanent part of this Nation's welfare system. This 3-year, economic buffer program has been sustained over the last 3 years and threatens to become a permanent fixture in our public assistance policy, along with food stamps, AFDC and SSI. I believe that would be a serious mistake.

My quarrel with the Agriculture Committee is that in establishing reduction in food stamp benefits for funds received through low-income energy assistance, the latter program takes on a permanent character, equivalent to that of the Food Stamp Program.

I would hope that regardless of the outcome on this amendment, that this measure is not interpreted to indicate the judgment of the Senate that Low-Income Energy Assistance Program become a permanent temporary program.

Mr. STAFFORD. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STAFFORD. I yield the floor.

The PRESIDING OFFICER. The time of the Senator from Vermont has expired.

Mr. HELMS. Mr. President, I regret that the Senator wishes to strike this provision of the Agriculture Committee's reconciliation provisions. It is one of the most logical and reasonable provisions we could have adopted. Its widespread support is indicated by the 17-0 vote in favor of its adoption during committee consideration.

The amendment was proposed by the Senator from Iowa [Mr. HARKIN] and was included in a bipartisan proposal being advanced by Senators BOSCHWITZ and LEAHY.

Let me briefly explain the committee's provision and the need for its inclusion in this package.

There are several issues involved. First, let me make it clear and emphasize this point: the committee in no way changed the policy with respect to counting low income energy assistance payments as income. The food stamp policy has long been that these federally funded energy assistance payments are not counted as income for purposes of determining either food stamp eligibility or benefit levels.

The only issue addressed by the Agriculture Committee was how to treat expenses paid for by income—from the Low-Income Home Energy Assistance Program—that is excluded from counting as income.

Frankly, committee members were, I think, astounded to learn of the present, illogical food stamp policy. The committee did an excellent job in untangling present policy and recommending a consistent and logical policy.

There are generally two types of low income energy assistance payments—direct payments made to individuals and indirect, so-called vendor, payments made to energy companies on behalf of individuals. Food stamp policy currently states that food stamp recipients who are also recipients of energy assistance vendor payments may not count energy costs paid to an energy company on behalf of the household as an expense for purposes of determining the household's deductible shelter expenses in the Food Stamp Program. This is a logical position because the household incurred no out-of-pocket expenses of its own. Rather, the Low-Income Energy Assistance Program paid for those expenses. A recent court ruling has overturned this interpretation and stated that such vendor payments must be counted as part of the household's expenses determining the household's deductible shelter expenses. Thus, the committee's bill explicitly puts into law the present regulatory policy in order to reverse the court ruling.

The committee bill goes a step further. The administration's treatment

of direct energy assistance payments is as illogical as the vendor payment is logical. While vendor payments do not count toward the household's deductible shelter expenses, direct payments made under the Low-Income Home Energy Assistance Program are permitted to count as deductible expenses. There is no reasonable rationale for this divergent treatment of such payments. The underlying principle should remain the same—that is, that expenses paid from excluded income should not be permitted as deductible shelter expenses. To remedy this situation, the committee has taken the step of providing that both direct and indirect payments for energy assistance may not be included by the household in determining permissible shelter expenses.

While it is true that some households may have a reduction in benefits, this reduction results solely from correcting this inconsistency in present law. I should emphasize that, at a maximum, the change would reduce food stamp benefits by a maximum of 30 percent of the value of energy assistance payments in those situations in which such payments are now being counted as allowable expenses.

I regret that the present policy has been in effect this long. It was drawn to the attention of the committee by our efforts to correct the initial court decision dealing with vendor payments.

I should point out that the pending amendment would eliminate $65 million in annual savings resulting from the Agriculture Committee's provision and potentially add another $57 million—if the eighth circuit court ruling were to be applied nationally.

For these reasons, I believe we must reject the pending amendment.

Mr. President, I yield to the majority leader.

Mr. DOLE. Mr. President, here we go again. We are talking about another cost of about $165 million over a 3-year period. What we are trying to do through the committee action is close a loophole. I am chairman of the Nutrition Subcommittee and have a pretty good record in the food stamp area.

Mr. President, I rise in opposition to the amendment offered by the Senators from Vermont and Massachusetts. This amendment would reverse a significant provision adopted by a unanimous vote of 17 to 0 during Agriculture Committee consideration of a bipartisan food stamp reauthorization package offered by Senators BOSCHWITZ and LEAHY. Mr. President, this amendment has the effect of increasing food stamp benefits to reflect energy expenses which are already being paid by another Federal program.

COMMITTEE ACTION

The committee adopted an amendment which we believe corrects the anomaly that presently exists where food stamp recipients may deduct shelter expenses even when those costs were paid for by federally funded energy assistance payments. The Agriculture Committee's provision establishes the rational, straightforward policy that deductions for shelter expenses in the Food Stamp Program should not be allowed for expenses that are covered by either direct or indirect payments that are excluded as income.

ENERGY ASSISTANCE POLICY

Mr. President, the committee in no way changes the current policy that federally funded energy assistance payments may not be counted as income for purposes of determining either food stamp eligibility or benefit levels. The only issue addressed by the Agriculture Committee was how to treat expenses paid for by the Low Income Home Energy Assistance Program [LIHEAP].

The committee bill does not restrict the States ability to use standard utility allowances. The only provision in this regard is that standard utility allowances, which reflect average utility expenses instead of using each recipient's actual utility bills, must reflect only actual "out of pocket" expenses—not any Federal energy assistance payments received by the household. Further, under current law, which was not modified by the committee, recipients may deduct actual expenses for energy costs rather than using the standard utility allowance.

TREATMENT OF LOW-INCOME ENERGY ASSISTANCE PAYMENTS

Generally speaking, there are two types of low income energy assistance payments—direct payments made to individuals and indirect, so-called vendor payments made to utility companies on behalf of individuals. Food stamp policy currently provides that food stamp recipients who also benefit from Federal energy assistance vendor payments may not count energy costs as deductible shelter expenses in determining their eligibility for food stamps when LIHEAP payments are made to a utility company on behalf of a household for purposes of determining the household's deductible shelter expenses in the Food Stamp Program. The Senator from Kansas believes this is a very reasonable, equitable policy approach, because the household incurred no "out-of-pocket" expenses of its own. Rather, the Low Income Energy Assistance Program paid for those expenses.

EFFECT OF EIGHTH CIRCUIT COURT RULING

A recent court ruling by the eight circuit has overturned this interpretation, stating that such vendor payments must be counted as part of a household's expenses when determining the household's deductible shelter expenses. The committee's action explicitly puts into law the present regulatory policy in order to reverse the court ruling. Otherwise the States in eighth circuit territory would be treating these payments differently than those in the rest of the country. The amendment would eliminate $65 million in annual savings resulting from the Agriculture Committee's provision and potentially add another $57 million annually—if the eighth circuit court ruling were to be applied nationally.

To the extent the amendment leaves the Food Stamp Program open to future court decisions like the ones already in place in 10 States, there will be benefit increases in any State now implementing the Department's rules regarding vendor recipients. Further, in a State not covered by a court decision that implements the Department's rules on vendor recipients in the future, there will be benefit reductions. In effect, the amendment leaves the program open to being run by court decisions and administrative rulings in this area, rather than by a policy of equity explicitly established by Congress.

The Stafford-Kennedy amendment would retain the inequities of current rules. Current regulations and policy interpretations discriminate against LIHEAP recipients who get their LIHEAP benefit in the form of a vendor payment to their utility provider in States not covered by court decisions by not allowing them to claim a "standard utility allowance." Recipients of cash LIHEAP payments are allowed this option and the committee provisions would extend it to vendor recipients, although the standard utility allowance available to LIHEAP recipients would be adjusted to reflect their having LIHEAP benefits to help pay their energy expenses.

The other inequity retained would be the different treatment of LIHEAP recipients, depending on whether or not they are in a State under a Federal court decision. In the 10 States covered by court decisions, all LIHEAP recipients have access to the standard utility allowance and may claim expenses paid for under the LIHEAP as a deduction. In other States, current regulations and policy interpretations require that only cash recipients have such access to the allowance and the right to claim expenses covered under the LIHEAP. The committee provisions attempt to establish equity by simultaneously allowing all LIHEAP recipients who have any utility expenses above the value of LIHEAP assistance the right to claim a standard utility allowance, which may be significantly above their actual expenses.

TREATMENT OF DIRECT ENERGY PAYMENTS

Mr. President, the committee bill includes another improvement over current policy. The present treatment of direct energy assistance payments is as illogical as the vendor payment policy is logical. While vendor payments do not count toward the household's deductible shelter expenses, direct payments made under LIHEAP are permitted to count as deductible expenses. There is no reasonable rationale for this divergent treatment of such payments. The underlying policy should remain the same—expenses paid from excluded income should not be permitted as deductible shelter expenses. To remedy this situation, the committees has taken the step of providing that both direct and indirect payments for energy assistance may not be included by the household in determining allowable shelter expenses.

Opponents of the committee's provision claim that the committee provisions would require lowering standard utility allowances by the amount of LIHEAP benefits for all LIHEAP recipients. However, this is incorrect. The committee provisions do not specify the method by which any standard utility allowance applied to LIHEAP recipients is to be adjusted to reflect the receipt of LIHEAP benefits. The dollar-for-dollar reduction method suggested by sponsors of this amendment is the most dramatic possible method. There is little to support a claim that this is the way States would respond. In fact, since States use standard utility allowances to ease the administrative burden of dealing with an avalanche of monthly utility bills, there is every reason to believe that they will adjust them as little as possible in response to the committee provision in order to avoid additional administrative complexity.

Further, for a significant number of recipients—those at the $139-a-month ceiling on shelter expense deductions—a lowering of standard utility allowances would have little or no effect, because they cannot take full advantage of the allowance anyway. The sponsors of this amendment recognize this effect when they State that the committee provision would result in a benefit cut—in Minnesota and Vermont—of up to $32 and $29 a month—the maximum potential effect.

AMENDMENT WOULD LEAD TO INEQUITIES

Mr. President, this amendment to strike the food stamp provisions relating to expenses paid with benefits received under LIHEAP would leave in place current inequities in the system. These are the inequities that the Reconciliation provisions attempt to correct.

Although low-income home energy assistance payments are not counted as income for food stamp purposes and would continue to be disregarded under the reconciliation provisions, food stamp households, in many instances, would be able to deduct all utility expenses—even those paid for out of—uncounted—LIHEAP benefits—as though they were paid for out of pocket. It is simply not fair that expenses paid for with income that presumably reduces a household's need for food assistance by freeing up other income, and yet is uncounted by food stamps, should also be allowed as a deduction that increases food stamp benefits. Of course, to the extent that households have actual out-of-pocket energy expenses not covered by their LIHEAP benefits, they should be allowed to deduct them—as the farm bill provisions stipulate.

This inequity would be exacerbated under the Stafford/Kennedy amendment, because households that receive their LIHEAP benefits in the form of payments made directly to their energy provider—so-called "vendor payments"—would not be allowed to claim the expenses covered by the LIHEAP benefits as a deduction—in contrast to those who receive it in cash. This situation would apply in all but the several States covered by current Federal court decisions.

EXAGGERATION OF IMPACT FIGURES

Mr. President, there are some figures which have been circulated which greatly exaggerate the impact of the committee's provision. One such listing purported to demonstrate the State-by-State impact of the committee's action. However, a careful analysis of the figures indicates that the cumulative impact adds up to almost five times the total estimated by the Congressional Budget Office—definitely a worst case scenario. If Congress is to make sensible policy decisions, we need to be able to depend upon facts. The State-by-State analysis presents the maximum impact on recipients—not the average anticipated impact.

Many of the overstatements seem to result from miscalculations or misunderstandings of the existing Food Stamp Program deduction procedures. Opponents of the committee's provision neglect the fact that an estimated one-half of all energy assistance is provided in vendor payments directly to the utility company; the committee's provision merely reinforces current regulatory policy. These analysis also miss the fact that, because some States have significantly high energy costs and standard utility allowances, the committee's provision would have less impact in those States. Actually, the provision would probably have little or no impact on a State like Vermont, one of the States cited as an example. Also, opponents of the committee provision neglect to calculate that not all shelter costs are deductible now—a factor which the committee provision does not change.

EQUITY OF FARM BILL PROVISIONS

Mr. President, the reconciliation provisions have a feature that mitigates the potential benefit reduction effect of requring that utility expenses covered by LIHEAP benefits not be allowed as food stamp deductions. Recipients may still claim a standard utility allowance as long as they pay something toward their heating or cooling bills. This means that many LIHEAP beneficiaries could continue to claim utility expense deductions at a level comparable to that allowed under present rules for those who do not receive payments under LIHEAP. The reconciliation provisions actually expand the availability of this standard allowance to households that cannot now claim it—that is those who receive their LIHEAP benefit in the form of a vendor payment to their utility provider but still have some out-of-pocket expense of their own.

CONCLUDING REMARKS

Mr. President, food stamp treatment of low income home energy assistance payments is a very complex issue. For this reason, the Senator from Kansas believes that it is best resolved by the authorizing committee, which has the expertise to deal with the complexity of the Food Stamp Program. The Agriculture Committee has carefully considered potential options in the treatment of LIHEAP payments, and their recommendation is the proposal contained in the 1985 farm bill and reconciliation measure—passed by a unanimous vote of 17 to 0.

I strongly urge my colleagues to vote against the Stafford/Kennedy amendment for all of the reasons that I have outlined previously. Most importantly, the effect of this amendment would be to increase food stamp benefits to reflect energy expenses which are already being paid by another Federal program. The equity of the committee-endorsed provision speaks for itself.

All we did was provide that people should not be eligible for energy expenses unless they incur them, unless they actually pay the money. This is a loophole that should be closed.

If you want to throw away about $65 million annually, you should support the amendment.

Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. DOLE. There is no time left.

Mr. KENNEDY. Does the Senator from Vermont have time remaining?

The PRESIDING OFFICER. The Senator from Vermont has no time remaining. All time has expired.

51-059 O-87-38 (Pt. 22)

The question is on agreeing to the motion to table the amendment of the Senator from Vermont. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER] and the Senator from Florida [Mrs. HAWKINS] are necessarily absent.

I further announce that, if present and voting, the Senator from Florida [Mrs. HAWKINS] would vote "nay."

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN] and the Senator from Missouri [Mr. EAGLETON] are necessarily absent.

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 37, nays 59, as follows:

[Rollcall Vote No. 294 Leg.]

YEAS—37

Armstrong	Hecht	Packwood
Bentsen	Heflin	Pressler

NOT VOTING—4

Boren	Goldwater
Eagleton	Hawkins

So the motion to lay on the table was rejected.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the motion to table was rejected.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment.

Mr. STAFFORD. Mr. President, I ask unanimous consent that the order for the rollcall vote on the Stafford amendment be vitiated and that the matter be disposed of by a voice vote.

Mr. HELMS. Mr. President, I object. I think we ought to decide whether we are going to cut spending around this place.

The PRESIDING OFFICER. Objection is heard.

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is this an amendment to the Stafford amendment?

Mr. DECONCINI. No, it is not.

The PRESIDING OFFICER. We have not disposed of the Stafford amendment.

The question is on agreeing to the amendments of the Senator from Vermont [Mr. STAFFORD]. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS] is necessarily absent.

I further announce that, if present and voting, the Senator from Florida [Mrs. HAWKINS] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN] and the Senator from Illinois [Mr. SIMON] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 60, nays 37, as follows:

[Rollcall Vote No. 295 Leg.]

YEAS—60

Abdnor	Exon	Matsunaga
Andrews	Ford	Melcher
Baucus	Glenn	Metzenbaum

NOT VOTING—3

Boren	Hawkins	Simon

So the amendment (No. 1003) was agreed to.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOSCHWITZ and Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

AMENDMENT NO. 1004

(Purpose: To limit the fees charged for arrivals of private vessels and aircraft, and to limit the fee for the arrival of trucks)

Mr. DECONCINI. Mr. President, I have an amendment at the desk.

Mr. President, I ask unanimous consent that 6 minutes equally divided be permitted on the amendment.

The PRESIDING OFFICER. Is there objection?

Mr. BOSCHWITZ. Reserving the right to object, Mr. President—

Mr. DOLE. Three minutes on a side?

Mr. DECONCINI. Three minutes on a side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Arizona [Mr. DECONCINI] proposes an amendment numbered 1004.

Mr. DECONCINI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 283, after line 256, add the following:

(3) No fee shall be charged under subsection (a)(3) for the arrival of a commercial truck during any calendar year after a total of $100 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such commercial truck during such calendar year.

(4) No fee shall be charged under subsection (a)(4) for the arrival of a railroad car whether passenger or freight during any calendar year after a total of $100 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such passenger or freight rail car during such calendar year.

(5) No fee shall be charged under subsection (a)(5) for the arrival of a private vessel or private aircraft during any calendar year after a total of $500 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such private vessel or private aircraft during such calendar year.

Mr. DECONCINI. Mr. President, the amendment I am proposing will improve the section in the bill on Customs Service users fees. To be frank, I believe this section is unfair and would have a detrimental impact on international commerce. I recognize that the Finance Committee was directed to find increased revenues and I recog-

nize the pressures that they were under to do do without raising taxes. But this Customs Service users fee provision differs very little from a tax since the revenues generated go back to the Treasury and do not go to improving or upgrading the customs service.

My amendment addresses two problems. The first would alter the schedule of users fees for commercial trucks and rail cars; the second affects private vessels and general aviation.

Under the bill as presently written, every time a commercial truck or railcar enters the United States from Mexico or Canada it would be assessed a $5 charge. Perhaps $5 doesn't sound like much to those of us in Washington who are used to speaking in millions, billions, and of late trillions of dollars. However, to Arizona border communities, the imposition of a $5 charge for every commercial truck or railcar crossing the border could be devastating. In order to mitigate the impact of this proposal my amendment would place a $100 ceiling on that charge.

Our Arizona border communities have suffered serious economic setbacks in recent years due to a number of conditions outside of their control. The peso devaluation has hurt merchants on the Arizona side of the border. Likewise, the closure of some border crossing stations, and shortened hours of others, inhibited the flow of traffic across the board, resulting in severe economic damage to Arizona. Additionally, the Federal Government acted capriciously earlier this year when they insisted on indepth, meticulous searches of all vehicles crossing from Mexico into the United States following the murder of Agent Camarena. While this action was aimed at penalizing the Mexican Government, it resulted in an additional economic burden on Arizona towns and cities and was not effective retribution for the death of our agent.

I hasten to add that this situation is not unique to Arizona. A similar situation has hurt border communities in Texas, New Mexico, and California. And my colleagues to the north along the Canadian border certainly can relate their own stories of economic distress in their border communities. Like the peso devaluation to the south, the strong U.S. dollar has had a detrimental effect on commerce with Canada resulting in an unfavorable exchange rate for Canadians entering the United States and a reduction in income for many border communities.

In recent years our border communities have sought innovative ways to increase employment on both sides of the border recognizing that their economies are closely interrelated. One such innovation is the twin plant concept or Maquiladora. In 1983 there were 585 twin plants in Mexico employing 125,000 workers. In Nogales, AZ, alone there are 59 twin plants which have resulted in increased employment on both sides of the border. An additional custom fee for commercial truck crossings could devastate these industries whose profit margin is at best tenuous.

The twin plants are not the only enterprises that would be negatively affected by this new tax. The fresh winter vegetable trade is another example of an industry that may be hurt. But this is not just a matter of economic damage to an industry, but of damage to a community.

I am concerned that these prohibitive fees could result in alternative means of transporting goods into this country. Under the bill as proposed, commercial ships under 100 tons would pay a $25 fee. It may well be that economy of scale will convince shippers that this is more economical than sending individual truckloads. If that happens the economic vitality of the border communities of this country would be seriously threatened.

The second part of my amendment concerns the user fees section on private vessels and general aviation. The House reconciliation bill calls for a $25 annual fee on private vessels and general aviation. The Senate bill, in contrast, calls for this same $25 fee to be levied for every arrival. The cost of this will quickly become prohibitive for small businessmen. My amendment places a cap of $500 per calendar year on the $25 per arrival fee.

A simple look at a map will tell my colleagues I have no personal axe to grind on the issue of private boats. In the entire history of Arizona we have never had a boat enter Arizona waters from Mexican waters. And, Mr. President, since Arizona lacks a single natural lake and has no ocean port it is highly unlikely that we ever will. Nonetheless, I pursue this in the interest of fairness. It simply isn't fair to charge such an exorbitant fee for processing. If we want to place a tax on these individuals, fine. But let's be honest and call a tax a tax. Let's not attempt to do so by calling it a user fee.

The question my colleagues are now going to be asking is "what is the revenue impact of all of this?" Let me be honest, I do not know, nor does anyone else. I have been told that there will be no revenue impact by changing the private vessels and general aviation provisions to annually rather than per arrival. Frankly, I find that hard to believe. However, the CBO revenue estimate for the House bill—which has an annual fee—and the Senate bill—which has a per arrival fee—are the same. On the issue of commercial trucks, it is more confusing. The Congressional Budget Office has tried hard to come up with a revenue estimate for this amendment as it pertains to commercial trucks. However, they have been unsuccessful.

Customs has been unable to make any estimate on how many trucks make how many visits to the United States. We know that there are 4,200,000 truck arrivals in the United States a year, but customs is unable to tell us which are repeat visits. However, I would like to remind my colleagues that in earlier consideration of the reconciliation bill, I added a provision which will save the Government $235 million over 3 years, and the total revenue impact of the commercial truck fee is $16 million for fiscal year 1986 if it were unchanged.

In conclusion, I urge my colleagues to support the amendment of the Senators from Texas, New York, and myself. I believe it is a fair, conservative approach to this problem.

Mr. BENTSEN. Mr. President, I wholeheartedly endorse Senator DECONCINI's amendment, of which I am a cosponsor, to limit fees charged for the arrival of both commercial trucks and railroad cars, whether passenger or freight. The Texas border community like the Arizona border community continues to suffer from high unemployment and a depressed economy.

In Laredo, TX, alone, unemployment has hovered at between 20 and 25 percent, Brownsville, and McAllen have similar figures of high unemployment. El Paso also has jobless rates above the national average. Mr. President, I recognize the need to raise revenues to offset the deficit and I support the use of user fees; however I do not believe that we should place this burden on a business community fighting daily to regain its economic balance.

During the Finance Committee markup of these customs user fees I successfully fought to remove a proposed $1 head tax for persons crossing the land border. The initial revenues estimated from this one sole fee was $152.88 million or almost half of the revenue package requested. Fair is fair, but where is the safety net for families hard hit by trade and commercial business failures?

The twin-plant industry, also known as the Maquiladora industry, along the Texas and Arizona borders carry many of their products, on a highly continuous basis, utilizing both rail and trucks along the border. Some of the commodities manufactured in the twin-plants include: auto parts, electronic components, toy parts, oil and gas hardware and packaging operations. Additionally, the border transit also includes the carriage of perishable goods, frozen vegetables, minerals, chemicals, food stuffs, and steel.

In Laredo for example, easily 200 trucks and 100 rail cars crossing the border daily are involved in the interi-

or trade of the Maquiladora industry. The interior trade along the United States-Mexico border relies on fast and efficient transfer of goods. The most logical and expedient mode of transit is therefore both truck and rail. I believe that the limitation of customs user fees on both trucks and rail traffic along the border is fair. Mr. President, I urge my colleagues to support this amendment.

Mr. BOSCHWITZ. Mr. President, this side has no objection to the amendment by the Senator from Arizona and we are prepared to accept it.

The PRESIDING OFFICER. Has all time been yielded back?

Mr. DECONCINI. I yield back the remainder of my time.

Mr. BOSCHWITZ. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

The amendment (No. 1004) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1005

Mr. HECHT. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Nevada [Mr. HECHT] proposes an amendment numbered 1005.

Mr. HECHT. Mr. President, I ask unanimous consent that further reading of the amendment be suspended.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 440, line 13, after the period, insert the following: The Commission's study shall also include former sections 4355 (a) and (b), former section 4358 (d) and former sections 4554 (b) and (c).

Mr. HECHT. Mr. President, I ask unanimous consent for 1 minute to explain the amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HECHT. Mr. President, in the interest of the limited amount of time available on this bill, I will be brief. The amendment I am offering today is simple in nature. As part of its reconciliation report, the Governmental Affairs Committee authorized the Postal Rate Commission to conduct a study of third-class, nonprofit mail subsidies. My amendment, Mr. President, will simply include in that study second- and fourth-class mail.

Mr. President, this matter has been discussed by both sides and I ask that it be accepted.

Mr. BOSCHWITZ. Mr. President, there is no objection on this side to the amendment. The amendment has been cleared on the other side as well.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1005) was agreed to.

AMENDMENT NO. 1006

(Purpose: Expressing the sense of the Senate that the Superfund excise tax be deleted in conference)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS] proposes an amendment numbered 1006.

Mr. HELMS. Mr. President, if the clerk will read slowly, then there will be no need for debate.

The assistant legislative clerk read as follows:

On page 372, after line 2, insert the following new section:

SEC. 789H. SENSE OF THE SENATE THAT THE VALUE ADDED TAX SHOULD BE DELETED IN CONFERENCE.

(a) FINDINGS.—The Senate finds that—

(1) the value added tax added by this part is a regressive tax which places the burden of paying for pollution on persons other than those responsible for it;

(2) such tax represents a dangerous shift toward the principle of a broad-based tax on sales;

(3) such tax has escalated rapidly in virtually every country in which it has been implemented;

(4) the Administration has stated, in a September 16, 1985 statement of Administration policy that "(t)he President's senior advisors will recommend disapproval of any legislation containing a value added or other broadbased tax.";

(5) the House of Representatives is expected to adopt a financing mechanism for the Superfund bill which will not include such tax;

(6) the Administration will not be prepared to release its alternative to such tax after the Senate has completed action on the reconciliation legislation; and

(7) prolonged debate on the floor of the Senate concerning an alternative to such tax would unduly delay consideration of this legislation.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the committee on conference on H.R. 2005 or any comparable legislation should submit a conference report which contains a reliable financing mechanism for the Superfund program which does not include any value added tax, and

(2) that the committee on conference on this Act or any comparable legislation should submit a conference report which does not include any value added tax.

Mr. HELMS. Mr. President, by now we are all familiar with the new tax in the Superfund bill passed by the Senate a few weeks ago. Along with others, I have called this tax a value added tax because it imposes a tax of $8 on every $10,000 of manufacturing value. In being confined to manufacturing, it may differ from the widely known VAT's in Europe, but is still in fact a type of value added tax.

Some quibble that this new tax is not a VAT but a "broad-based tax." Others wants to apply to it their chosen name of "Manufacturers' Environmental Excise Tax," or "MEET" for short.

But, Mr. President, if we really wanted to be accurate, we would call it the "Consumers' Pickpocket Tax" because it is a hidden tax as far as American consumers are concerned.

Mr. President, this tax on manufactured and imported goods will be incorporated into the price of the goods, and then passed on to the consumer in the form of higher prices, not as a tax on the sales slip. The taxpayer will never know how much he's paying for the goods and how much he's paying to feed the sacred cow known as Superfund—and the politicians here in Washington can continue to fund the program without the taxpayers ever knowing it. In a very real sense, Mr. President, with this new value added tax, politicians can pick the pockets of American consumers.

Despite strong opposition to the VAT, I am still hearing whispers from its proponents that it is so negligible the taxpayers won't even feel the pinch. That may be true. The MEET, is only 0.08 percent or $8 on every $10,000. But, Mr. President, haven't we all heard that argument before? Our other two Federal revenue sources, Social Security and Federal income tax, started out at a very negligible rate, but just look at how the rates have skyrocketed! In 1937, the American taxpayer paid an average tax of $79. In 1983, the taxpayer paid an average tax of $3,536, an increase of more than 4,475 percent. In 1937, the American taxpayer paid a maximum Social Security tax of $30, and in 1983 he paid a maximum of $2,391, an increase of almost 8,000 percent.

Inevitably, Mr. President, this VAT will follow the same course. We should not and must not thrust an additional tax burden on the American worker.

Clearly, Mr. President, with the exception of a few individuals, no one wants a value added tax. On September 17, 1985, the White House sent a letter to me threatening a veto if the Superfund bill contains a value added tax. On September 24, 1985, the Senate adopted an amendment to the Superfund bill expressing the sense of the Senate that the conferees "should report legislation containing a reliable financing mechanism for the Superfund Program which does not include a value added tax." Furthermore, Mr. President, although the House Ways and Means Committee has not report-

ed out the language for a funding mechanism for Superfund, it is highly unlikely that the bill will contain a value added tax. The administration doesn't want it. The Senate doesn't want it. The House doesn't want it. The taxpayer doesn't want it. Yet, if ths value added tax remains in this reconciliation bill, Mr. President, the VAT tax may become a funding mechanism for Superfund, even if the Superfund bill doesn't contain the tax. We must stop what everyone has objected to coming in the front door on S. 51 from sailing in the back door on the wings of the Senate reconciliation bill.

Mr. President, my amendment would simply close up all the loopholes and bury the VAT once and for all. I ask my colleagues to support me in this endeavor.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I have just been advised that the distinguished Senator from Oregon [Mr. PACKWOOD] would like to be on the floor in connection with this amendment. If it meets the convenience of the Senate, I would suggest we lay this amendment aside in accommodation of the Senator, but that will be up to the manager of the bill.

Mr. BRADLEY. Mr. President, I ask unanimous consent to speak on this amendment for up to 1 minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I think we should understand why the amendment by the distinguished Senator from North Carolina is being offered. The passage of this amendment, would urge the conferees to essentially reject the Superfund bill that was passed and financed by this body just a short time ago. The Senate bill finances Superfund by a broad-based tax and, if the conference decides that it will not accept a broad-based tax to finance Superfund, then the conferees are left with the option of spending out of general funds or taxing the chemical and oil industry by larger amounts.

Mr. President, during last year's consideration of Superfund, we found neither general revenues nor the chemical industry as routes to finance Superfund. Therefore, we were pushed to adopt a broad-based tax. Senators should understand if they vote to accept this amendment, they are pulling the financing out from under the Superfund bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. BOSCHWITZ. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, as an accommodation to the distinguished Senator from Oregon, who is tied up in a conference and who desires that the pending amendment be modified, I ask unanimous consent that, notwithstanding the fact that the yeas and nays have been ordered on the amendment, I be allowed to amend it on page 2, line 20: "and which does not increase the Federal budget deficit."

Mr. BRADLEY. Mr. President, reserving the right to object, the distinguished Senator from North Carolina has offered an amendment which would essentially instruct the conferees to eliminate the funding mechanism that is now in the bill for Superfund—a broad-based tax.

The Senator's amendment says that the conference should find some other method of funding the Superfund. One other method I can think of, which is increasing the fund of the general Treasury, would increase the deficit, and the Senate has spoken clearly that it does not want to increase the deficit.

Another way to fund it would be to increase taxes on the chemical industry and the oil industry, and that has not been acceptable to the Senate on previous occasions when we considered the Superfund. That, indeed, is the basis for the present tax that is in the bill.

So I say to my distinguished colleague from North Carolina that although I would like to accommodate him on this occasion, I would be compelled to object to the modification, since the yeas and nays have been ordered.

The PRESIDING OFFICER. Objection is heard.

Mr. HELMS. Mr. President, I disagree with my friend from New Jersey, but I am ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN] is necessarily absent.

The PRESIDING OFFICER (Mr. ARMSTRONG). Are there any other Senators in the Chamber who desire to vote?

The result was announced—ayes 32, nays 66, as follows:

[Rollcall Vote No. 296 Leg.]

YEAS—32

Abdnor	Hatch	McConnell
Andrews	Hecht	Metzenbaum
Armstrong	Heflin	Pressler
Boschwitz	Helms	Proxmire
Denton	Humphrey	Quayle
Dixon	Kasten	Rudman

Evans	Matsunaga	Warner
Exon	Melcher	Weicker
Ford	Mitchell	Wilson

NOT VOTING—2

Boren	Hawkins

So the amendment (No. 1006) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, if I could have the attention of my colleagues just briefly, I am advised we still have 29 amendments pending on reconciliation. I hope that on many of these, where there is not any dispute, we could dispose of the amendments by voice vote. It would seem to me we could save a lot of time. I know a number of Members have plans for later on this afternoon, and we would like to make some real progress.

I urge my colleagues, if the managers are agreeable to accepting amendments, let us let them accept the amendments and not have a rollcall if we can avoid it.

Second, let me indicate—then I will yield to my friend from New York—that I have been asked by the distinguished Senator from Florida, Senator HAWKINS, who cannot be here today, to offer an amendment on disinvestment of Social Security Trust Funds. I am now advised that the Senator from New York has a similar amendment, and he has agreed that it would be Moynihan-Hawkins amendment, and I will not offer the amendment.

I yield to the distinguished Senator from New York and ask unanimous consent that Senator HAWKINS be added as a principal cosponsor.

The PRESIDING OFFICER. Without objection, the name of the Senator from Florida will be added as a principal cosponsor of the amendment at the time the amendment is offered.

AMENDMENT NO. 1007

(Purpose: To make whole the Social Security Trust Funds and other Funds for interest losses due to disinvestment, and for other purposes)

Mr. MOYNIHAN. Mr. President, I send an amendment to the desk on behalf of myself, Senator HAWKINS, Senator RIEGLE, Senator KENNEDY, Senator CHILES, Senator SASSER, Senator GRASSLEY, Senator BYRD, Senator HARKIN, Senator BENTSEN, Senator ROCKEFELLER, Senator GORE, Senator MITCHELL, Senator BAUCUS, Senator BRADLEY, Senator KERRY, Senator BUMPERS, Senator HEINZ, and Senator NICKLES, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New York [Mr. MOYNIHAN], for himself, Mrs. HAWKINS, Mr. RIEGLE, Mr. KENNEDY, Mr. CHILES, Mr. SASSER, Mr. GRASSLEY, Mr. BYRD, Mr. HARKIN, Mr. BENTSEN, Mr. ROCKEFELLER, Mr. GORE, Mr. MITCHELL, Mr. BAUCUS, Mr. BRADLEY, Mr. KERRY, Mr. BUMPERS, Mr. HEINZ, and Mr. NICKLES, proposes an amendment numbered 1007.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 265, between line 7 and 8, insert the following:

SEC. 769G. RESTORATION OF TRUST FUND INVESTMENTS.

(a) REISSUANCE OF OBLIGATIONS.—The Secretary of the Treasury shall immediately reissue to the Social Security Trust Funds and other retirement funds (as defined in subsection (d)) obligations under chapter 31 of title 31, United States Code, identical in all terms to public debt obligations redeemed on or after September 1, 1985, and on or before the date of the enactment of this Act that as determined by the Secretary on the basis of standard investment procedures for such funds in effect on September 1, 1985, would not have been redeemed if H.J. Res. 372 (99th Congress, 1st Session), as deemed passed by the House of Representatives on August 1, 1985, has been enacted into law on August 1, 1985. The uninvested balances of such funds shall be debited for the principal amount of such reissued obligations.

(b) APPROPRIATION TO TRUST FUNDS OF LOST INTEREST.—(1) The Secretary of the Treasury shall pay to the Social Security Trust Funds and other retirement funds (as defined in subsection (d)), from amounts in the general fund of the Treasury not otherwise appropriated, amounts determined, in accordance with paragraph (2), to be equal to the net amount of interest that would have accrued to each such fund but for non-investments, redemptions, and disinvestments of such funds—

(A) on or after September 1, 1985, and on or before the date of the enactment of this Act that would not have occurred if H.J. Res. 372 (99th Congress, 1st Session), as deemed passed by the House of Representatives on August 1, 1985, had been enacted into law on August 1, 1985, taking into account the reissuance of obligations as required by subsection (a); and

(B) on or after September 1, 1984, and prior to September 1, 1985, that would not have occurred but for limitations on the public debt, based on the present value of the permanent loss of such interest.

(2)(A) The determination of the amount of interest which would have accrued to the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, and the Federal Supplementary Medical Insurance Trust Fund shall be made jointly by the Secretary of the Treasury and the Commissioner of Social Security, and must be certified as accurate by the two public members of the Board of Trustees of the Trust Funds and by the Comptroller General.

(B) The determination of the amount of interest which would have accrued to the Railroad Retirement Account shall be made jointly by the Secretary of the Treasury and the Chairman of the Railroad Retirement Board, and must be certified as accurate by the Comptroller General.

(C) The determination of the amount of interest which would have accrued to the Civil Service Retirement and Disability Fund and the Department of Defense Military Retirement Fund shall be made by the Secretary of the Treasury, and must be certified as accurate by the Comptroller General.

(3) The payment required by paragraph (1) shall be made on June 30, 1986. Prior to April 1, 1986, the officials required to make all determinations under paragraph (2) shall do so, and shall report to the Congress any disagreements. The Comptroller General and the public members of the Board of Trustees of the Trust Funds shall report to the Congress any such determinations which they do not certify as being accurate, along with an explanation of why they do not certify such determination.

(c) NOTIFICATION OF DISINVESTMENT PLANS.—(1) The Secretary of the Treasury (as Managing Trustee of the Social Security Trust Funds) shall notify each member of the Board of Trustees of such Trust Funds, the Chairman of the House Committee on Ways and Means, and the Chairman of the Senate Committee on Finance, of any planned action, taken by reason of the limitation on the public debt, to—

(A) redeem or to disinvest any long-term bond held by the Trust Funds (specifying the amount, rate of interest, and date of redemption of each bond); or

(B) not make normalized tax transfers or not invest normalized tax transfers in interest bearing obligations, as required under sections 201, 1817, and 1841 of the Social Security Act.

(2) Notice under this subsection shall be made not less than 15 days prior to the planned action, and shall include an explanation of the necessity for the action.

(d) DEFINITION.—For purposes of this section, the term "Social Security Trust Funds and other retirement funds" means the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, the Federal Supplementary Medical Insurance Trust Fund, the Railroad Retirement Account, the Civil Service Retirement and Disability Fund, and the Department of Defense Military Retirement Fund.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that I may have 2 minutes to explain the amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York? Hearing none, it is so ordered.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the Senator from Tennessee [Mr. GORE] be added as a cosponor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, this amendment would make whole the Social Security and other retirement trust funds which were disinvested in 1984, and again on three occasions in 1985. For Social Security [OASDI], a total of $5.5 billion was disinvested last year and at least another $24.5 billion as of November 4 this year.

Under my amendment, the computations of lost interest are to be worked out between the Treasury and the administering agency of each fund, with the General Accounting Office certifying as to the accuracy of each computation.

In rough terms, Mr. President, without my amendment, Social Security will forfeit $1.3 billion in interest earnings over the next 15 years.

There is another provision in my amendment, Mr. President, which provides that in the future if the Treasury Department intends to disinvest the Social Security trust funds of long-term bonds, it will notify the Congress and it will notify the public trustees.

It is a matter of some regret that I must report—as the Presiding Officer, the distinguished Senator from Colorado knows—that we had to drag out of the Treasury in hearings on Thursday that they had not previously told Congress, nor had they told the public trustees of their disinvestment actions.

Mr. President, my amendment to the budget reconciliation bill, would make whole the Social Security trust funds and other retirement trust funds which have been improperly disinvested over recent months, in response to pressures of the debt ceiling. Most of the major Federal retirement funds have been affected, and now we must take the necessary steps to protect them all: old age, survivors, disability, Medicare, railroad retirement, military retirement, and civil service retirement.

First, my amendment would require that the Treasury reissue to these

funds bonds identical to those it redeemed from them—which is to say, disinvested from them—over the past 3 months. My amendment also would restore any interest lost to the trust funds from the Treasury's disinvestments, both recently—in September, October, and November 1985—and last year—in October, 1984. The precise calculations of lost interest will fall not only to the Treasury; the GAO and Boards of Trustees of each fund, including public trustees, would also certify the accuracy of these computations. And in times to come, Treasury would be required to provide 15-days prior notice to Congress and all members of the Social Security Board of Trustees—including the public members—of any intention to disinvest or not invest trust fund assets.

Mr. President, a review of the evidence would be instructive. Hearings held just last Thursday by the Senate Finance Subcommittee on Social Security and Income Maintenance revealed a pattern on wholesale disinvestment of Social Security's long-term bonds by the Treasury Department.

Information provided at the hearing by the Congressional Budget Office and the Social Security Administration made it all too apparent that since September—not November 1, as we had previously been led to believe—the Secretary of the Treasury has been cashing in substantial amounts of long-term bonds from the Social Security trust funds. At that hearing, we further learned that some $5.5 billion in long-term Social Security bonds were similarly redeemed over 1 year ago. in October, 1984, when a similar debt ceiling problem arose.

I ask unanimous consent that the CBO and SSA documents relating to such disinvestment be included in the RECORD at the end of my remarks.

These disinvestment procedures have largely been followed with no prior notice to Congress, and without the prior knowledge of the two public trustees of the Social Security trust funds. In fact, despite substantial evidence presented at Thursday's hearing, the Treasury representative there, Deputy Assistant Secretary John Niehenke, was not at all forthcoming with this basic information, nor did he offer any specific remedies to reimburse the trust funds.

Based on information provided at the hearing, we now know that in September, the Department cashed in $6.9 billion in long-term interest-bearing securities from the Social Security trust funds, another $4.8 billion in long-term securities in October, and at least $12.8 billion more this month. Under current law—which is to say, unless we approve this amendment—these moneys will be reinvested in short-term certificates of indebtedness when the debt limit impasse is resolved, and then, next June 30, shifted to new long-term bonds.

According to the most recent interest-rate forecast by the Office of Management and Budget, long-term interest rates will be nearly 1 percentage point lower next June than the rate paid on the cashed-in bonds. According to Social Security Administration [SSA] estimates, this will cost the trust funds some $875 million in lost interest income over the next 15 years. The earlier disinvestment, from October of last year, will cost the trust funds another $440 million over time. Together, the Treasury's disinvestment practices will cost Social Security some $1.3 billion.

The disinvestment of the last 3 months has been of a truly unprecedented scale. Total invested assets of the Social Security trust funds have fallen from $37 billion at the end of August to $10 billion on November 4—a $27 billion reduction. The Treasury claims to have credited the OASDI trust funds for substantial amounts of uninvested assets; but under debt limit pressures, these are essentially IOU's which cannot be used to pay benefits.

Social Security is a well-financed program. According to the most recent actuarial estimates, OASDHI held a surplus of $46.8 billion at the end of 1984, and expects this surplus to reach $58.5 billion by the end of this year. By 1990, the surplus will exceed $268 billion. It is wholly inappropriate to cash in—for 3 months in a row—the assets of a program that is well-financed and self-financed, to float the rest of Government which is in deep deficit.

It is also wholly improper—3 months in a row—to use up Social Security's invested assets to finance benefits, while making no attempt to use daily payroll tax receipts—the program's current cash income—for the same purpose. During this period, Social Security payroll tax receipts were apparently used to finance other, non-Social Security activities—while OASDI's assets were drawn down to pay benefits.

This is an especially complex matter, which we must turn to in the near future. Today, we must make certain that the trust funds are made whole for the substantial losses resulting from the Treasury's disinvestment practices, and that such shall never happen again without the prior knowledge of Congress and the public trustees of the trust funds.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NOVEMBER 7, 1985.

Memorandum

from: Harry C. Ballantyne, Chief Actuary, SSA.

Subject: Long-term effects of debt-limit problems in 1984 on the interest earnings of the Social Security Trust—Funds—Information.

In October of 1984, the total amount of advance tax transfers could not be invested at the beginning of the month because the total U.S. public debt was too close to the debt ceiling then. As a result, long-term bonds amounting to $5.1 billion were redeemed early in October for the payment of OASDI benefits at the beginning of the month. Of the total $5.5 billion redeemed in the month, $3.0 billion was in 10.75-percent bonds and $2.5 billion was in 13.75-percent bonds. The maturity dates of these bonds ranged from June 30, 1987, through June 30, 1991.

Later in October, the debt ceiling was increased, and the amount obtained from the disinvestment of long-term bonds was reinvested according to longstanding practices, initially in short-term certificates of indebtedness that, for October 1984, paid interest at a 12.625-percent rate. On June 30, 1985, these certificates were "rolled over" into long-term bonds bearing a 10.375-percent interest rate.

Because the interest rate payable on the new investments made in October 1984 and rolled over in June 1985 differed from the average rate payable on the long-term bonds that were disinvested earlier, the long-term interest earnings of the trust funds are affected. The table below shows the effect on interest earnings, year by year. The table shows direct effects only and not the indirect effects resulting from interest lost or gained because of the direct change in interest earnings, i.e., "interest on interest."

Effect on the interest earnings of the OASI and DI trust funds

[In millions]

Year ending June 30—	Amount
1985	−$7
1986	−100
1987	−100
1988	−99
1989	−85
1990	−35
1991	−14
Total	−440

Obviously, the amount that would need to be transferred to the trust funds today in order to offset the effects of the debt-ceiling problems in 1984 would be less than $440 million, because that amount would have been earned over a period of several years.

HARRY C. BALLANTYNE.

NOVEMBER 7, 1985.

Memorandum

From: Harry C. Ballantyne, Chief Actuary, SSA.

Subject: Long-term effects of Debt-limit problems on interest earnings of the Social Security Trust Funds—Information.

In September and October of this year, the total amount of advance tax transfers in each month could not be invested at the beginning of the month because the total U.S. public debt was too close to the debt ceiling. As a result, long-term bonds amounting to $6.9 billion and $4.8 billion were redeemed in September and October, respectively, for

the payment of OASDI benefits at the beginning of each month. Of the total $11.7 billion in bonds redeemed in the two months, $11.5 billion was in 10.375-percent bonds and $0.2 billion was in 10.75-percent bonds. The maturity dates of these bonds ranged from June 30, 1987, through June 30, 1991.

On November 1 and November 4, long-term bonds were again redeemed so that benefits could be paid at the beginning of November. The bond redemptions amounted to $9.3 billion on November 1 and $3.5 billion on November 4, for a total of $12.8 billion. These bonds had interest rates ranging from 8.75 percent through 10.75 percent and maturity dates ranging from June 30, 1991, through June 30, 2000.

Eventually the debt ceiling will be increased, at which time the amounts obtained from the disinvestment of long-term bonds in September, October, and early November will be reinvested. Under present investment practices, the amounts will be invested initially in short-term certificates of indebtedness. On June 30, 1986, however, these certificates will be "rolled over" into long-term bonds bearing a coupon rate to be determined by a formula in the Social Security Act. The yields on those bonds cannot be known at this time, but the rate assumed for purposes of estimating the future operations of the trust funds was 9.875 percent for the Mid-Session Review (MSR) of the President's 1986 Budget, and 10.75 percent for alternative II-B in the 1985 Trustees Report.

Because the interest rate payable on the new long-term investments made in June 1986 will almost certainly differ from the average rate payable on the long-term bonds that were disinvested earlier, the long-term interest earnings of the trust funds will be affected. This long-term effect will depend on the June 1986 interest rate. The attached table shows the estimated effect on interest earnings, year by year, on the basis of the two sets of assumptions—MSR and alternative II-B. The table shows direct effects only and not the indirect effects resulting from interest lost or gained because of the direct change in interest earnings, i.e., "interest on interest."

HARRY C. BALLANTYNE.

Source: Social Security Administration, Office of the Actuary, Nov. 7, 1985.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, November 6, 1985.

Memorandum to: Laurie Fiori.
From: Paul Cullinan.
Subject: Securities held by the Social Security Trust Funds.

As you requested, I am providing this memorandum that presents an analysis of the actual investments of the OASDI funds since June 30, 1985. It is not possible to describe the daily investment position of the funds, however, as this information is not readily available. Instead this memorandum describes changes in trust fund assets concentrating on the end of month balances. Trust fund investments are also presented for November 4, the latest date for which the data are available.

Redemptions for July through October. On June 30, 1985, the OASDI trust funds purchased $21.6 billion in 10.375 percent special issue bonds and held a total of $36.9 billion in invested assets. (See Table 1.) By the end of October, approximately $7.7 billion of the securities purchased on June 30 remained in the trust funds' portfolio, and the total investments of the trust funds amounted to $23.1 billion. An additional $15.9 billion of OASDI assets were uninvested on October 31.

The difference in the investments held at the end of June and at the end of October is primarily the result of the $6.9 billion redemption of the 10.375 bonds that took place in September, and the additional $4.6 billion in these bonds that were redeemed in October. These redemptions are much larger than those which might normally be expected to occur, and would seem to be the result of the inability to credit the trust fund for the full amount of the advanced tax transfers. On the other hand, the remaining difference of $2.4 billion resulted from transactions in July and August, and these appear to be the result of normal practices when trust fund outgo exceeds income.

TABLE 1.—ASSETS OF THE OASDI TRUST FUNDS, EXCLUDING MARKETABLE SECURITIES

[In billions of dollars]

	June 30	July 31	Aug. 31	Sept. 30	Oct. 31	Nov. 4
13.75%	5.2	5.2	5.2	5.2	5.2	5.2
10.75%	8.9	8.9	8.9	8.9	8.7	3.8
10.375%	21.6	21.0	19.2	12.3	7.7	1.0

Total assets	37.2	38.3	37.4	39.5	39.0	NA

NA: Not available.

Source: Monthly Statement of the Public Debt Outstanding, various issues, SSA's Office of the Actuary, and discussions with Treasury staff.

In addition to the redemptions of the 10.375 bonds, about $0.2 billion in 10.75 percent bonds were redeemed in October. These would not have been redeemed under normal investment practices, because even if the trust fund outgo exceeded income, the 10.375 percent securities would have been redeemed first after the normalized tax transfers and certificates of indebtedness (CD's) were cashed in.

Redemptions in November. Redemptions of long-term bonds were again required in November as a result of the inability to credit the normalized tax transfers, and amounted to about $9.3 billion on November 1, and $3.5 billion on November 4. Consequently, OASDI investments—excluding $261 million in marketable securities—at the end of November 4 consisted solely of $10.0 billion in long-term investments. Although I could not obtain estimates of the total univested assets, these are probably in the $28 billion to $30 billion range.

Two major differences distinguished the November redemptions from those that took place in the two proceding months. First, the redemptions on November 1 exceeded those that would have been necessary to cover the benefit payments that were directly deposited on that date, by between $2 and $3 billion. Second, the November 4 redemptions of $3.5 billion occurred 3-4 days earlier than they normally would have.

Mr. BUMPERS. Mr. President, I ask unanimous consent that I be added as a cosponsor to the Moynihan amendment dealing with Social Security Trust Funds which was accepted a few moments ago.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I rise to express in the strongest possible terms my support for the Moynihan amendment, of which I am an original cosponsor. The amendment will require the repayment with interest of all funds taken out of the Social Security Trust Fund on November 1.

I share the indignation of many Members of the Senate about the Treasury Department's transferring $17 billion out of the Social Security Trust Fund to pay its other bills on November 1. With the outcry that occurred about this incident, it soon became apparent that the Treasury Department had dipped into the trust fund four times in the past 2 years, not just once, and that as a result the trust fund may lose as much as $1.3 billion in interest payments over the next 15 years. This is an outrage, and it is doubly outrageous because until

the most recent incident I think it is safe to say that Congress was unaware that Treasury was dipping into the trust fund.

The sanctity of the Social Security Trust Fund had never been violated before 2 years ago and I believe strongly that these transfers of funds are illegal. They set a dangerous precedent and undermine the confidence in the trust fund by all those who currently draw benefits or ever hope to do so.

I have championed legislation to separate the Social Security Trust Fund from the unified Federal budget to ensure that trust fund receipts are never for any purpose other than payment of Social Security benefits. I am delighted that the Gramm-Rudman-Hollings deficit reduction proposal includes a provision which would do this immediately.

During the debate on the Gramm-Rudman-Hollings proposal, I have strongly opposed efforts to reduce the current budget deficit by cutting back on Social Security benefits. Fortunately, under this proposal Social Security benefits are exempt from the across-the-board cuts required if Congress does not reach the deficit reduction targets set in it.

When it become apparent that the Social Security Trust Fund was threatened last November 1, several of us worked to persuade our colleagues to adopt a House-passed bill, H.R. 3669, which would have barred the Treasury Department from tapping the Social Security Trust Fund that night. Unfortunately, the Senate leadership chose not to do so, paving the way for Treasury Secretary Baker to proceed with his plan.

Now it is even more apparent that we must take action on many fronts to prevent abuse of the Social Security Trust Fund.

Since November 1 my priority has been to ensure that these funds are returned to the trust fund as soon as possible and I am delighted to co-sponsor the pending amendment to do just that. We must act quickly; in September the trust fund balance stood at $35 billion but the recent actions have reduced it to only $8 billion. When this missing money is returned, it is vital that the Treasury Department repay every dime of interest lost due to the transfer of funds.

Once we have plugged all the holes in the dike, we can reassure all Social Security recipients that there will be no more shenanigans with the Social Security Trust Fund.

● Mr. KENNEDY. Mr. President, in recent weeks, the administration has employed a number of dubious expedients and shell games to evade the requirements of the debt ceiling. The most objectionable of these expedients is the raid on the Social Security Trust Funds that has unnecessarily alarmed senior citizens concerned about the integrity of their retirement benefits and the very future of the Social Security System itself.

The Social Security Trust Fund represents a sacred compact between the senior citizens of our Nation and the Federal Government. It is a promise that citizens who pay Social Security taxes during their working years will be able to count on stable, secure, inflation-protected income when they retire.

We all know that the present administration has made numerous attempts in recent years to violate the Social Security compact. Fortunately, each of these previous attempts has failed. Yet now the Treasury Department is seeking once again to invade the trust funds and use them artificially to reduce the massive budget deficits that the administration's policies have caused.

In my view, this latest cynical maneuver violates both the letter and the spirit of the Social Security Act, while doing nothing to address the real problem of the mushrooming Federal deficit. Litigation is currently under way to challenge the actions of the Secretary of the Treasury—and the courts may well rule that his action was illegal and in violation of his fiduciary responsibility to the Social Security System.

The revenues lost to the trust funds by these manipulations will total $875 million over the next 15 years. When the administration pulled the same trick last year, the Trust Funds lost over $400 million. Even more important than the direct monetary loss to Social Security is the violation of an important principle: neither this administration nor any other administration must be permitted to tamper with Social Security. The Trust Funds are there to pay the retirement income to our senior citizens, and their integrity must be respected.

No administration should be permitted to use the Social Security Trust Funds as a slush fund to cover failures and shortages in other branches of the Government. Our senior citizens who depend on Social Security deserve to know that Social Security is safe from manipulations of any kind.

The amendment I am introducing today will restore this lost interest in full to the trust funds. I recently introduced legislation to ensure that this tampering with the trust funds never happens again.

It is obvious that Congress bears its share of responsibility for the present impasse. Some in the Senate have made no secret of their willingness to prevent any increase in the debt ceiling unless their version of deficit reduction legislation is also enacted.

The American people will judge who has acted responsibly and who has acted irresponsibly in these circumstances. But at least we can enact legislation that tells the administration unequivocally—"If you are going to play High Noon with the debt ceiling and the very functioning of the Federal Government, at least keep your hands off Social Security."●

(By request of Mr. DOLE, the following statement was ordered to be printed in the RECORD:)

● Mrs HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. President, the inability of the Congress to increase the public debt limit hurts many of the programs that help our Nation's senior citizens. This occurs because, by law, all trust fund surpluses are invested in Federal securities and the securities are counted as part of the national debt. Since September 30, the Treasury Department has not invested all of the cash surpluses of the civil service retirement fund, the military retirement trust fund, the Social Security Trust Fund, and the supplemental medical insurance trust fund. This failure to fully invest the funds has caused the four funds listed above to lose a total of almost $7 million per day in interest payments.

Social Security is protected for some lost interest due to the way the Treasury transfers FICA tax receipts to the Social Security Trust Funds. The Treasury Department reconciles transfers with the trust funds at the end of each month. This normalized transfer method was part of the bipartisan solvency compromise of 1983. However, the fact that long-term securities with higher interest rates have been redeemed that otherwise would not have been redeemed had we not bumped up against the debt limit represents a serious loss to the funds.

This amendment is very simple and addresses all of the problems of the trust fund. First, rather than just paying back interest that has been lost, this amendment puts the Social Security portfolio back in the same condition as it was before.

Second, it provides an immediate transfer to the Federal old age and survivors insurance trust fund and the Federal disability insurance trust fund from amounts in the general fund of the Treasury an amount determined jointly by the Secretary of the Treasury and the Secretary of HHS sufficient to fully compensate such funds for interest losses arising from the premature redemption during October, 1984 of securities maturing from 1987 through 1991.

Mr. President, I see no reason why there would be any opposition to this amendment and I ask my colleagues to support it.●

● Mr. RIEGLE. Mr. President, the continuing failure of the Congress to raise the debt limit and the failure of

the administration to agree to a short-term extension of the debt limit has allowed Treasury to conduct unconscionable raids on the Social Security Trust Funds. The current debt limit crisis has created two critical problems relating to Social Security. The first is that since September, Treasury has been unable to invest the amounts they credit to the trust funds. This has meant that the surplus of revenues were not invested in the Social Security Trust Fund, but were used to pay for general Government operations while a non-interest-bearing credit was given to the trust fund. This has resulted a loss of interest, that should be repaid once the debt ceiling has been extended—our amendment would guarantee that repayment.

The more serious problem, however, Mr. President, is that because the debt limit had been reached early in September, Treasury was $2 billion short of the amount needed to advance fund Social Security for October. This is required as part of the normalized tax transfer, a provision included as part of the Social Security Amendments of 1983. Instead, it made a non-interest bearing-credit to the trust fund—a credit which cannot be used to make cash payments. This means that in order to make the October payments to beneficiaries, $15 billion worth of trust fund securities were redeemed, while Social Security revenues continued to go into the general fund and finance the rest of the Government.

In order to make the normalized tax transfer for the November payments to beneficiaries, this same kind of raid again took place. However, it was accelerated, so that up to $14 billion worth of the higher interest long-term trust fund reserves, some of which do not mature until the year 2000, were disinvested. This means that because the debt limit has not been raised, the Social Security revenues have been used to fund the activities of general government while the long-term investments of the Social Security Trust Fund have been liquidated to pay Social Security beneficiaries.

Mr. President, because this accelerated disinvestment is not a part of the ordinary process, the resulting loss of interest may represent a permanent loss to the trust funds. Both the Social Security Administration and CBO claim the loss may be as much as several hundred million dollars over the next 15 years.

Moreover, in response to our questions about these unauthorized raids, we discovered the astounding fact that the same thing had occurred when the debt ceiling was reached in 1984—resulting in a $440 billion loss of interest. Congress had not been informed of any of these episodes, nor had the Board of Trustees, nor had any steps been taken to ensure repayment of the lost interest.

Before this crisis began, the trust funds had long-term investments in excess of $37 billion, while now there is less than $10 billion in these reserve accounts.

I believe that this unconscionable raid on the trust funds calls for immediate action to ensure that these losses are not permanent ones for the future beneficiaries of Social Security, and that this will never happen again.

The amendment we are offering here today includes two crucial provisions:

First, it restores investments and lost interest to the Social Security Trust Funds by requiring repayment of the interest lost in 1984, and reissuance of bonds whose face value is identical to those that have been redeemed to circumvent the debt limit in September, October, and November of 1985;

Second, it requires a 15-day prior notification of Congress and all members of the Social Security board of trustees of any intention by the Secretary of the Treasury to disinvest or not invest Social Security Trust Fund assets; if we fail to act, we are permitting the health of these trust funds to be jeopardized. This is not what those who make regular contributions to this system expect to be occurring. This amendment would make sure that the trust funds be made whole again, so that future generations' benefits are not jeopardized by the present administration's borrowing to pay current debts.●

Mr. HARKIN. Mr. President, I am pleased to be a cosponsor of the Moynihan amendment. Under the policies followed by the Treasury Department, the Social Security Trust Fund is likely to lose more than $1 billion in the coming year unless Congress acts to prevent it.

The Treasury Department announced a few weeks ago that it would prematurely strip the interest paid on certain Social Security trust funds unless the debt limit was increased before November 1. What Treasury did not tell us, however, is that it had taken precisely that kind of action on a number of past occasions, without informing the public trustees of the fund or the Congress. In fact, over $24 billion has been disinvested so far this year, and more than $5 billion was disinvested in 1984.

The Social Security accounts have lost money from nonreceipt of interest on funds not invested. But they have lost far more as a result of the funds being eventually reinvested at lower rates of interest.

The amendment I am cosponsoring requires the Treasury Department to make the Social Security Trust Fund whole. Trust funds are accounted for separately in the budget from Federal funds and should be kept separate even in a fiscal crisis of the Government's own making. Social Security should not be required to pay for the inefficient method by which the Federal Government runs itself.

Adoption and passage by the Congress of this amendment will ensure fair and proper treatment of the Social Security Trust Fund. It will make up for the inappropriate treatment of the fund in the past, and will help avoid future invasions of the fund. I urge all Senators to support the Moynihan amendment.

● Mr. MITCHELL. Mr. President, I rise as a cosponsor of Senator MOYNIHAN's amendment to the budget reconciliation bill which would require that the Department of the Treasury reissue to the Social Security and other retirement trust funds all bonds that were redeemed during September, October, and November 1985 due to the debt-limit situation.

Beginning in September of this year, the Treasury faced a problem with the issuance of Social Security benefit checks because of the statutory debt limit. Congress' failure to raise the debt limit apparently led to the disinvestment of securities held in the Social Security trust funds in the amount of $7 billion in long-term bonds from the trust funds in September and another $4 billion in October.

This amendment would also require the Secretary to reimburse, on June 30, 1986, such trust funds for interest lost as a result of redemption, disinvestment, or noninvestment of the assets of these funds occurring during the most recent debt-limit situation occurring in October 1984.

Last week, during the hearing in the Senate Finance Committee on the Social Security Trust Fund Investment Policy, the members learned from the Social Security Administration, that there was no requirement that Congress or the public trustees be notified when Treasury disinvests Social Security assets to meet a debt-limit crisis.

I expressed my concern about the lack of a requirement to notify Congress and the public trustees of such significant action of the Treasury as the disinvestment of Social Security bonds.

I am pleased that this amendment I rise to support today will require a 15-day prior notification to Congress and the Social Security Board of Trustees of any intention by the Secretary of the Treasury to disinvest or not invest Social Security Trust Fund assets due to the debt limit.

Social Security is vital to the well-being of millions of senior citizens in our country. Those older Americans who have invested in the Social Security System throughout their working lives expect the Government to keep

its promise to them, to meet their end of the contract.

I hope that this amendment we are offering today will be a step toward greater communication between the Congress and the Department of the Treasury with regard to the Social Security Trust Funds.●

PROTECTING SOCIAL SECURITY ONCE AGAIN

Mr. BYRD. Mr. President, I support the amendment by the distinguished Senators from New York and Michigan and I ask that I be added as a cosponsor.

The Senate has taken action many times this year—many times these past 5 years—to protect Social Security from being used as a budget balancing tool. But, sadly, it seems that once again, we find ourselves in the position of having to take action in this body to protect the integrity of the Social Security Program and its commitment—our commitment—to the millions of American elderly and disabled persons, present and future. Just as we think our job may be finished, just as we think that the administration has finally received our message that we will not break our promise to America's Social Security recipients about their benefits, their cost-of-living adjustments, and the fiscal integrity of their program, we find there is more to do.

The Treasury Department has taken the "extraordinary" measure of disinvesting Social Security trust funds, in order to finance Government spending while the Congress has been contending with the Gramm-Rudman amendment to the debt-limit legislation. Apparently, Treasury now feels they have disinvested the maximum amount possible from the funds, and will have to turn to selling gold if the debt limit is not extended by this Thursday.

Well, I am not certain whether this is the very last avenue available to enable the Federal Government to pay its bills. Every time we have approached the "drop dead" day, as the distinguished majority leader has called it, the administration has found that, indeed, there is yet one more way for the Government to keep paying the bills. So, perhaps, there may be other options. There may not.

But the one thing we cannot do—and which we will not allow this administration to do—is to leave any question in the minds of Social Security recipients that the Government is raiding the trust fund with no intention of replacing the interest income it will lose. This amendment removes any doubt in this regard. It requires that the Secretary of the Treasury replace any interest income which would have accrued to the funds during the period in which they are disinvested.

The current and future beneficiaries must know unequivocally that we will not allow this program to be jeopardized—or to be used cynically to purchase political advantage at the price of lost confidence in Social Security. This amendment carefully and unmistakably lays out the Congress' rejection of such a course, and reaffirms that this program will be protected.

I urge my colleagues to support the amendment.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Mr. MITCHELL, Mr. BAUCUS, Mr. HEINZ, and Mr. NICKLES be added as consponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I move the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New York.

The amendment (No. 1007) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Is the Senator from Minnesota seeking recognition?

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I yield to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, did the Senator from Pennsylvania [Mr. HEINZ] have an amendment?

Mr. HEINZ. Yes.

Mr. DOMENICI. Mr. President, can the Senator tell me what it is?

Mr. HEINZ. It is an amendment which I will be offering on behalf of Senator PACKWOOD having to do with the Katie Beckett issue, the respirator-dependent people.

Mr. DOMENICI. Mr. President, I have two amendments.

Mr. President, I yield the floor.

AMENDMENT NO. 1008

(Purpose: To change the effective date for coverage of respiratory care, to increase funding for home and community-based care demonstration projects, and to increase funding for the independent living initiatives for children in foster care)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania, (Mr. HEINZ), for Mr. PACKWOOD, for himself and Mr. MOYNIHAN, Mr. HEINZ and Mr. BRADLEY, proposes an amendment numbered 1008.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 174, strike out lines 18 through 20, and insert in lieu thereof the following:

(c) Effective Dates.—(1) Except as otherwise provided in paragraph (2), the amendments made by this section shall apply to services furnished on or after the date of the enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by subsection (b), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State Legislature that begins after the date of the enactment of this Act.

On page 239, line 3, strike out "$700,000" and insert "$85,000,000".

On page 239, line 4, strike out "$800,000" and insert "$88,000,000".

On page 239, line 18, strike out "$150,000" and insert "$1,500,000".

On page 239, line 19, strike out "$200,000" and insert "$2,000,000".

On page 275, line 25, strike out "$500,000" and insert "$45,000,000".

Mr. HEINZ. Mr. President, I ask unanimous consent that I may be allowed to continue for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I am offering this amendment on behalf of Senator PACKWOOD, together with Senator MOYNIHAN and Senator BRADLEY.

This is an amendment that grows out of the deliberations of the Senate Finance Committee which had voted that we would offer such an amendment to achieve the full purposes of our original Katy Beckett bill to enable respirator-dependent children and adults who could be cared for at home to in fact go home and not have to be institutionalized in the hospital.

It was an amendment that was conditioned on obtaining the necessary savings overall as explained at some length in my full statement. We have done that.

I believe that the proposals that we have here are meritorious, and that they in fact will save money.

I hope the committee might be allowed to go ahead and fulfill its obligation to the other Members.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Senator from New Mexico have 2 minutes to inquire of the amendment.

The PRESIDING OFFICER. Without objection, the Senator is recognized.

Mr. DOMENICI. Mr. President, this is a new program that is not in the bill at this point. Is that correct?

Mr. HEINZ. Mr. President, that is not entirely correct. A version of this program, as I understand it, is in the bill at this point. The Senate Finance Committee had considered a number of variations of writing so-called Katy Beckett provisions.

One, there was substantial dispute over the cost of these provisions, and how we might adopt a no-cost provision. We agreed to offer as a committee this amendment on the Senate floor which achieves a nominal increase in outlays for the provisions adopted by the committee as we had previously, and the Senate agreed to modify the provisions of spend the tobacco subsidy savings of $235 million.

Therefore, this legislation includes my provision to expand the coverage of respiratory care services for dependent individuals, those persons on respirators—Senator MOYNIHAN's independent live-in care initiative, and Senator BRADLEY's home- and community-based demonstration proposals.

Those are the current provisions as I have earlier described, and are in the Finance Committee's package.

Indeed, I do offer this amendment for Senator PACKWOOD, and I am one of its cosponsors.

Mr. DOMENICI. Mr. President, it is my understanding that regardless of what you call it, this amendment adds $225 million in outlays to the bill pending before us.

Frankly, I am amazed. We were saying a few minutes ago that we should pass one amendment because we were saving too much in this bill. Now we have another one. I assume we have already saved enough so that we ought to add $225 million more.

I ask the Chair a parliamentary inquiry. Is this amendment subject to point of order on germaneness?

The PRESIDING OFFICER. In response to the Senator's inquiry, the amendment seeks to restrict a program which has not been in the purview of the bill at the present time, and therefore, it would be subject to a point of order.

Mr. DOMENICI. I make such point of order against the amendment.

The PRESIDING OFFICER. The point of order is well taken.

The amendment falls.

Mr. DOMENICI. Mr. President, I thank the Chair.

AMENDMENT NO. 1009

(Purpose: Making technical corrections to the cooperative provisions)

Mr. GRASSLEY. Mr. President, I send a technical corrections amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Iowa [Mr. GRASSLEY] proposes an amendment numbered 1009.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 330, strike out lines 20 through 24, and insert in lieu thereof the following:

"(2) CERTAIN NETTING NOT PERMITTED AFTER SECTION 381 TRANSACTIONS.—If such an organization acquires the assets of another such organization in a transaction described in section 381(a) and exercises its option under paragraph (1), the acquiring organization may not, in computing its net earnings for taxable years ending after the date of acquisition, offset losses of 1 or more allocation units of the acquiring or acquired organization against earnings of the acquired or acquiring organization, respectively, to the extent that—

"(A) such earnings are not properly allocable to periods after the date of acquisition, and

"(B) such earnings could not have been offset by such losses if such earnings and losses had been derived from allocation units of the same organization.

On page 331, line 6, strike out "each patron" and insert in lieu thereof "its patrons."

On page 331, lines 10 and 11, strike out ", or would have been distributed to such patron" and insert in lieu thereof "distributed to its patrons."

On page 331, line 15, strike out "such patron" and insert in lieu thereof "its patrons."

On page 332, lines 15 and 16, strike out "each patron" and insert in lieu thereof "its patrons."

On page 333, line 12, strike out "Rate" and insert in lieu thereof "Dates." On page 333, after line 21, insert the following:

(3) No inference.—Nothing in the amendments made by this section shall be construed to infer that a change in law is intended as to whether any patronage earnings may or may not be offset by nonpatronage losses, and any determination of such issue shall be made as if such amendments had not been enacted.

Mr. GRASSLEY. Mr. President, this amendment is a technical correction to a provision concerning treatment of net operating losses by farmer cooperatives exercising their option to net patronage earnings, and several other minor clarifications.

The PRESIDING OFFICER. The Chair regrets to inform the Senator that there is no time for debate. Is the Senator asking a unanimous consent for debate?

Mr. GRASSLEY. I do not think I need it. I believe these changes have been accepted on both sides. I thought I would explain in a few words what it was, if anyone had any questions.

Mr. BOSCHWITZ. Mr. President, I advise the Senator that we were not aware of this amendment.

Mr. GRASSLEY. Mr. President, it has been cleared with Senator PACKWOOD and minority staff because it is a Finance Committee provision.

Mr. THURMOND. Mr. President. I support the pending amendment. This measure would strengthen language in the reconciliation bill that would clarify the tax treatment of former cooperatives, a section critical to the future of our Nation's farmers.

Mr. President, over the last 20 years, the Internal Revenue Service [IRS] has tried again and again to prevent agricultural cooperatives from netting gains and losses of their various cooperative divisions. For other similar business entities, netting gains and losses between divisions is a normal business practice, unchallenged by the IRS. The taxation of farmer cooperatives with respect to this practice needs to be delineated.

S. 1585, introduced by Senator MATTINGLY with myself and others this past August, addresses and seeks to clarify the tax treatment of these cooperatives. Not allowing farm cooperatives to net their gains and losses restricts their growth and prevents them from competing effectively in the existing difficult agricultural climate. This situation could lead to a dismantling of this important component of the economic structure of our agriculture industry, possibly endangering the long-term future of farming in this country.

Mr. President, the Tax Court has repeatedly ruled against the IRS on this issue. Nevertheless, IRS officials continue to pursue these futile cases. This is a waste of both the taxpayers' and the farmers' time and money and an unnecessary harassment of our citizens.

The Finance Committee has acted wisely in including this clarification in the reconciliation bill. I commend them for their insightfulness and recognition of the need to explain the issue so that agricultural cooperatives may get on with the business of marketing their products without further interference from the IRS. I urge my colleagues to support this amendment.

● Mr. MATTINGLY. Mr. President, I rise today to express my great satisfaction with the action which my colleagues in the Senate are taking today regarding an issue which I first brought to their attention last June. The provision included in the Omnibus Budget Reconciliation Act relating to the netting of earnings and losses in calculating taxable income is almost identical to the language contained in S. 1585 which I introduced on August 1, along with 23 cosponsors. I commend our colleagues on the Finance Committee for their speedy consideration of this matter, and their foresight in having it included as part of the package which is now before us.

Mr. President, I especially want to express my heartfelt thanks to the chairman of the committee [Mr. PACKWOOD] for his unrelenting efforts in

moving this issue forward, and to Mr. CHAFEE, chairman of the subcommittee, for so promptly arranging hearings on the topic. I also extend my thanks to Mr. GRASSLEY, Mr. PRYOR, Mr. BOREN, and other members of the committee for their able assistance in reporting out this important provision which has such vital importance to the nearly 2 million members of America's farm cooperatives.

This section does not change existing law. It merely clarifies and codifies a series of Tax Court rulings which have earlier affirmed the right of farm cooperatives to offset losses from one area of business activity against earnings from other areas of activity in order to determine what tax liabilities they have. This is no different from the rule which is applied to any other business enterprise.

However, over the past several years, the IRS has repeatedly attempted to disallow this normal business practice on the part of cooperatives. On each occasion, IRS has been rebuffed by the courts. So, hundreds of thousands of dollars have gone to pay for legal expenses in defending a right which the courts have consistently upheld rather than going into the pockets of farm producers. This legislation will put an end to such administrative abuse in the future, and will ensure that IRS cannot go into past years in an effort to further harass cooperatives who have exercised their right to net gains and losses as provided by law.

A few members have questioned the propriety of this measure, since several cooperatives are currently at differing stages of ongoing IRS audits. I hasten to point out to my colleagues that if there is any reason for such audit other than the fact that the coop has practiced netting of gains and losses in the past, then this legislation would not have any effect on continuation of the audit process. However, if the sole reason for an audit is the past exercise of the right so to net gains and losses, then this measure will terminate such action because it clearly restates such right, just as the courts have continually reaffirmed it.

Again, Mr. President, I express my thanks for a job well done to all of my colleagues who have been so helpful in this effort. From the initial raising of the issue in June to adoption in October is progress around this place that could be equated with light speed. Seriously, there have been many who were extremely dedicated to seeing this vital piece of legislation succeed. To those many, I convey also the appreciation of our Nation's farmer-owned cooperative and their many members.

I would be remiss, Mr. President, if I did not also recognize the indispensable efforts of several Senate staff members and thank them as well as my colleagues. Outstanding among many are Mr. Greg Jenner of the Finance Committee professional staff, Mr. John Colvin, who is the staff director of the committee, and Ms. Julie Rabinowitz, who serves on Senator GRASSLEY's staff. These and many others have devoted literally hundreds of hours working on this piece of legislation, and I want to acknowledge their dedication and able assistance.●

COOPERATIVE NETTING PROVISION (SECTION 787, BUDGET RECONCILIATION ACT)

● Mr. GRASSLEY. I would like to clarify several aspects of section 787, which deals with netting of earnings and losses by cooperatives. First, am I correct that section 787 will not affect the ability of a cooperative to carry forward or back any net operating loss deduction in computing its taxable income.

● Mr. PACKWOOD. The Senator is correct. Section 787 of the bill does not affect the application of section 172 of the Internal Revenue Code which otherwise governs the treatment of net operating loss deductions.

● Mr. GRASSLEY. As the Senator knows, section 787 requires that a cooperative that nets earnings and losses provide a notice of such netting to certain patrons. Am I correct in stating that this requirement should not impose a substantial burden on the cooperative, and that the cooperative likely could satisfy the notice requirement with a one page written statement. In addition, if the cooperative so chooses, the cooperative could include the required information in an annual report, a newsletter or a similar publication of the cooperative, rather than in a separate mailing to each patron.

● Mr. PACKWOOD. The Senator is correct in his statement. So long as the publication containing the required information is mailed or delivered to each patron entitled to notice within the specified time limits, this form of notice would be effective. The required information should be set forth together within the publication rather than dispersed throughout and should not be presented in such a place or manner such that it would be easily overlooked. However, the notice requirement would not be satisfied by merely printing the notice in a publication of general circulation or by making such notice available to be picked up by a patron rather than delivered or mailed.

● Mr. GRASSLEY. Is it correct, that a patron would be entitled to receive notice if netting reduced—to any extent—the amount of any patronage dividend, qualified written notice of allocation, or per-unit retainage that the patron otherwise may have received.

● Mr. PACKWOOD. The statement of the Senator is correct.

● Mr. GRASSLEY. Is it true that to comply with the notice requirement, a cooperative need not provide an explanation or interpretation of the law governing the right to net income and losses, and that the cooperative need only inform the patron of the patron's rights to additional information under the laws of the state of incorporation of the cooperative.

● Mr. PACKWOOD. The Senator is correct. The committee does not expect the notice to patrons to become a treatise on the law of netting, but the notice should at least indicate what rights the patron has to additional information and how that information may be obtained.

● Mr. GRASSLEY. Is it also correct that the fact that section 787 addresses the netting by cooperatives of patronage earnings against patronage losses, but not the netting of nonpatronage losses against patronage earnings, reflects the fact that the committee has not had an adequate opportunity to consider the latter issue. No change in existing law is intended, and no inference should be drawn from the committee's decision.

● Mr. PACKWOOD. Once again, the Senator is correct. The committee intended no change in existing law as to whether nonpatronage losses can be netted against patronage earnings.

● Mr. GRASSLEY. I thank the distinguished chairman for this clarification.●

Mr. CHILES. Mr. President, we have no objection.

Mr. BOSCHWITZ. There is no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1009) was agreed to.

Mr. GRASSLEY. I move to reconsider the vote by which the amendment was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1010

(Purpose: To improve flexibility in the administration of training under Trade Adjustment Assistance and to improve coordination with the Job Training Partnership Act)

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE] for himself and Mr. KENNEDY, proposes an amendment numbered 1010.

On page 295, line 3, strike out "a training program" and insert in lieu thereof "training an adversely affected worker".

On page 295, line 7, strike out "a training program" and insert in lieu thereof "training an adversely affected worker".

On page 295, between lines 12 and 13, insert the following:

"(C) The provisions of this paragraph shall not apply to, or take into account, any

funds provided under any other provision of Federal law which are used for any purpose other than the direct payment of the costs incurred in training a particular adversely affected worker, even if such use has the effect of indirectly paying or reducing any portion of the costs involved in training the adversely affected worker.

On page 296, beginning with line 1, strike out all through page 297, line 9, and insert in lieu thereof the following:

"(c) The provisions of section 143(b) of the Job Training Partnership Act shall apply with respect to training provided under this chapter.

"(d) The Secretary may pay the costs of on-the-job training of an adversely affected worker under subsection (a)(1) only if—

"(1) such training is not for the same occupation from which the worker was separated and with respect to which such worker's group was certified pursuant to section 222,

"(2) the employer certifies to the Secretary that the employer will continue to employ such worker for at least 26 weeks after completion of such training if the worker desires to continue such employment and the employer does not have due cause to terminate such employment, and

"(3) the employer has not taken, at any time, any action which violated—

"(A) the provisions of section 143(b) of the Job Training Partnership Act, or

"(B) the terms of any certification described in paragraph (2) made by such employer,

with respect to any other on-the-job training provided by such employer for which the Secretary has made a payment under subsection (a)(1).".

On page 297, between lines 15 and 16, insert the following:

(c) Section 239 of the Trade Act of 1974 (19 U.S.C. 2311) is amended by adding at the end thereof the following new subsection:

"(e) Agreements entered into under this section may be made with one or more State or local agencies including—

"(1) the employment service agency of such State,

"(2) any State agency carrying out title III of the Job Training Partnership Act, or

"(3) any other State or local agency administering job training or related programs.".

Mr. QUAYLE. Mr. President, I have an amendment to the provisions in the Consolidated Omnibus Budget Reconciliation Act of 1985, S. 1730, that continue and expand the Trade Adjustment Assistance [TAA] Program. My amendment improves flexibility in the administration of TAA training and it improves coordination with the Job Training Partnership Act [JTPA]. It is effective upon enactment.

The changes I am making are basically for clarification and to achieve better coordination with the Dislocated Worker Program which is title III of JTPA. I want to make it clear that this amendment does not affect the level or type of benefits for certified workers. The TAA training funds will continue to be available only for workers that have been certified for benefits under the Trade Act.

My amendment makes some minor clarifying changes in language prohibiting double reimbursement of training costs to institutions. For on-the-job training [OJT], I also propose to substitute JTPA provisions for similar labor protections in S. 1730. This will ensure consistency in the implementation of the two programs.

A major thrust of my amendment is to increase flexibility in TAA Program administration by permitting the Secretary of Labor to enter into agreements with one or more State or local agencies for providing training services. These agencies could include the employment service, the State agency that administers title III, private industry councils [PIC's], or other training agencies.

I believe this amendment has been cleared with all interested parties and there is no objection to it. I ask my colleagues support to pass this amendment that will improve the administration of our dislocated worker programs.

Although I am not raising the issue in my amendment today, I am concerned about the proliferation of programs to serve different categories of dislocated workers. During a hearing before the Subcommittee on Employment and Productivity, which I chair, the Secretary of Labor, Bill Brock, concurred with my concern about the need to develop a single coherent, rational approach to meet the needs of all categories of dislocated workers.

The philosophical basis of title III of of JTPA is the same as for the TAA program authorized by the Trade Act: Dislocated workers should not carry the burden of economic changes that benefit society as a whole. I support this common principle and I also support the concept of linking unemployment benefits to training which is a second underlying principle of TAA provisions contained in S. 1730.

The committee report describes authorized TAA training activities to include:

. . . on-the-job training; training provided by a State pursuant to the Job Training Partnership Act; training approved by a private industry council under that act; and any other training approved by the Secretary. The committee considered that other approved training might include programs provided by community colleges, universities, business firms, and unions, and basic education programs such as English instruction and training that enables workers to complete a high school education.

All these activities are permissible under title III of JTPA.

Here are a few examples of title III programs that illustrate how it works and demonstrate that the same training is provided under title III that would be authorized through TAA.

For example, the Job Search Assistance Center in Gary, IN, is funded through the Secretary of Labor's discretionary funds. It is administered jointly by U.S. Steel and the United Steelworkers of America in cooperation with the Indiana Vocational-Technical College. The center solely assists former employees and their families in facing the challenge of finding new employment.

For the convenience of the steelworkers, the center is located at the plant site. The center offers extensive training in job search techniques through job search workshops and job search clubs. Counseling and occupational retraining are also available. The center is equipped with a phone bank and industrial directories and news sources from around the country. For on-the-job training, the center can defer labor costs during a negotiated training period. The center offers classes in preparation for the graduate equivalency degree [GED] and to teach English language skills.

The major programmatic problems are an ongoing search for continued funding and a need for economic development to create more jobs throughout the Gary area.

A second example is the Employment Assistance Services Program in Columbus, IN. Cummins Engine Co. applied for a grant through the Indiana Office of Occupational Development which administers JTPA funds for the Governor. Cummins received $1.5 million to operate a pilot program for dislocated workers from January 1, 1984 to June 30, 1985. Cummins subcontracted the administration of the program to a local, private, for-profit firm.

The Employment Assistance Services Program was available to laid off or terminated workers and other unemployed in a three-county area, including 1,200 former employees of Cummins Engine. The program focused on making the participants marketable through emphasizing existing skills or enrolling in training. The basic philosophy was to develop job hunting skills that could be used again, recognizing the possibility of future needs.

As of April 1985, statistics for the program showed: 937 enrolled; 236 accepted some type of training involving about 19 schools at an average cost of $921 per participant; 808 had some degree of participation in job clubs at an average cost of $207 per participant; 155 entered on-the-job training at a cost of $828 per participant, and two-thirds of these resulted in successful placement.

On June 30, at the time that funding for the program ceased, there were a total of 944 enrolled. At that time, about 600 had been placed in jobs. Returning to employment at Cummins was not considered a placement. The remaining 344 had either been referred to other programs, chose to leave the program, or had not yet found employment at the time the program ceased to exist.

Representatives of Cummins Engine Co. are very supportive of the Dislocated Worker Program and have made some aspects of the program a regular component of company operations. Their chief concern was that, to establish a successful relationship with the private sector, the State should reduce bureaucratic requirements.

These findings are the result of recent oversight hearings on JTPA that I conducted in Indiana. My goal was to investigate the need for amendments to this new program. I presented the findings from this oversight to my colleagues on October 1. They are printed in the RECORD for that day.

I will briefly review my findings in regard to title III. Support for the dislocated worker programs is strong among labor and management representatives who have been involved with the design and operation of these programs. The grant approval process at the Federal and State levels delays the timely implementation of programs. Also, there is concern that there has been a proliferation of administrative entities at the local level. These are some of the issues we will be examining next spring when we conduct oversight hearings to determine whether or not legislative changes are needed to improve title III.

It concerns me that, at a time when we are seeking to nurture and improve this innovative program, there are proposals to reduce its funding and establish a new Federal Dislocated Worker Program.

An editorial in the Washington Post on October 3 made this same point in discussing Federal initiatives for assisting dislocated workers:

> A better strategy might build upon the worker adjustment programs already being funded by the Department of Labor. While these programs are still quite new and generally lacking money for extensive retraining or worker stipends, they have encouraged considerable innovation by States and involvement by private companies. Unfortunately, even as Congress considers voting money for a new Displaced Worker Program under the heading of "trade," it is also in the process of approving a massive slash in funding for the existing programs. That doesn't make sense.

It does not make sense. I am hopeful that we will be able to work with the administration in developing a coordinated, effective approach to assist all dislocated workers.

Mr. President, this amendment has been worked out between the Labor Committee and the Finance Committee concerning trade adjustment assistance. It has been worked out on both sides with the Senators involved. I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1010) was agreed to.

AMENDMENT NO. 1011

(Purpose: To modify provisions relating to graduate medical education)

Mr. QUAYLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The legislative clerk read as follows:

The Senator from Indiana [Mr. QUAYLE], for himself, Mr. DURENBERGER, Mr. HATCH, Mr. KENNEDY, Mr. DOLE, Mr. BAUCUS, and Mr. HEINZ, proposes an amendment numbered 1011.

Beginning on page 517, line 14, strike out through page 529, line 10, and insert in lieu thereof the following:

COUNCIL ON GRADUATE MEDICAL EDUCATION

SEC. 986. Title VII of the Public Health Service Act is amended by adding at the end thereof the following new part:

"PART II—GRADUATE MEDICAL EDUCATION

"COUNCIL ON GRADUATE MEDICAL EDUCATION

"SEC. 799. (a) Establishment of Council.—There is established the Council on Graduate Medical Education (hereafter in this section referred to as the "Council"). Prior to July 1, 1988, and every three years thereafter, the Council shall provide advice and make recommendations to the Secretary with respect to—

"(1) the supply of physicians in the United States;

"(2) current and future needs for physicians to practice in primary care specialties and in medical specialties which the Council determines to have a relative shortage of physicians;

"(3) issues relating to foreign medical school graduates;

"(4) appropriate Federal policies with respect to the matters specified in paragraphs (1), (2), and (3), including policies concerning changes in the financing of undergraduate and graduate medical education programs and changes in the types of medical education training in graduate medical education programs, and

"(5) appropriate efforts to be carried out by hospitals, schools of medicine, and schools of osteopathy with respect to the matters specified in paragraphs (1), (2), and (3), including efforts for changes in undergraduate and graduate medical education programs.

"(b) MEMBERSHIP.—The Council shall be composed of—

"(1) the assistant Secretary for Health or the designee of the Assistant Secretary;

"(2) the Administrator of the Health Care Financing Administration;

"(3) the Chief Medical Director of the Veterans' Administration;

"(4) ten members appointed by the Secretary from representatives of health care providers, national and specialty physician organizations, schools of medicine, organizations, graduates of foreign medical schools, and hospitals which provide graduate medical education, and

"(5) four members appointed by the Secretary from representatives of health insurers, business, and labor.

"(c) TERMS.—(1) Members of the Council appointed under paragraphs (4) and (5) of subsection (b) shall be appointed for a term of four years, except that the term of office of the members first appointed shall expire, as designated by the Secretary at the time of appointment, four at the end of one year, four at the end of two years, three at the end of three years, and three at the end of four years.

"(2) The Secretary shall appoint the first members to the Council under paragraphs (4) and (5) of subsection (b) within 60 days after the date of enactment of this section.

"(d) CHAIRMAN.—The Council shall elect one of its members as Chairman of the Council.

"(3) QUORUM.—Nine members of the Council shall constitute a quorum, but a lesser number may hold hearings.

"(f) VACANCIES.—Any vacancy in the Council shall not affect its power to function.

"(g) COMPENSATION.—Each member of the Council who is not otherwise employed by the United States Government shall receive compensation at a rate equal to the daily rate prescribed by GS-18 under the General Schedule under section 5332 of title 5, United States Code, for each day, including traveltime, such member is engaged in the actual performance of duties as a member of the Council. A member of the Council who is an officer or employee of the United States Government shall serve without additional compensation. All members of the Council shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

"(h) POWERS.—In order to carry out the provisions of this section, the Council is authorized to—

"(1) collect such information, hold such hearings, and sit and act at such times and places, either as a whole or by subcommittee, and request the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents as the Council or such subcommittee may consider advisable; and

"(2) request the cooperation and assistance of Federal departments, agencies, and instrumentalities in carrying out the provisions of this section, and such departments, agencies, and instrumentalities are authorized to provide such cooperation and assistance.

"(i) REPORTS.—Prior to July 1, 1988, and every three years thereafter, the Council shall prepare and transmit a report to the Secretary and to the Congress which specifies the activities of the Council during the period for which the report is made and contains advice and recommendations as required under subsection (a).".

On page 156, beginning on line 9, strike out "increases," and all that follows through the end of line 12, and insert in lieu thereof the following: "changes, the number of years which the Secretary may specify, after consultation with the Accreditation Council on Graduate Medical Education and after review of the recommendations of the Council on Graduate Medical Education established under section 799 of the Public Health Service Act; except that (1) if such change increases the required number of years, the revised number of years specified by the Secretary may not be greater than such increased required number of years nor less than the number of years specified in the 1985-1986 Directory, and (2) if such change decreases the required number of years, the revised number of years specified by the Secretary may not be greater than the number of years specified in the 1985-1986 Directory nor less than such decreased required number of years.".

● Mr. QUAYLE. Mr. President, this is an amendment which would modify

the graduate medical education provisions in S. 1730 which were reported out by the Senate Finance Committee and the Labor and Human Resources Committee. I am very pleased that the distinguished gentleman from Minnesota and all the other members of both committees who have had a longstanding interest in this subject have agreed to cosponsor this compromise amendment.

This amendment retains the provisions reported out of the Labor and Human Resources Committee that provides authority for the establishment of a council on graduate medical education. This council would have the responsibility for assessing physician manpower needs on an ongoing basis and recommending the appropriate Federal and private sector efforts necessary to address these needs. In my view, this council is particularly important because it will provide a forum to enable thorough and fair consideration of changing medical personnel needs on a continuous basis. The history of our manpower policies over the past two decades have certainly taught us that an ongoing mechanism is needed to develop a flexible policy that can meet changing national health care needs.

In addition, the composition of the council has been modified to include representatives from the private sector responsible for financially supporting graduate medical education programs. I believe this is a particularly valuable modification since, for the first time, those who pay for the residency training of physicians will have a voice in developing and recommending policy.

Perhaps most importantly, this amendment modifies the Senate Finance Committee provisions by directing that, in making further changes in Medicare's payment policy for the direct costs of graduate medical education after July 1, 1989, the Secretary must consider the recommendations of the council. At present, payers exercise no influence over the numbers of training positions, or the distribution of these positions among the various medical specialties. There is no doubt that this system has created manpower training incentives that are counter to our Nation's health manpower goals. This amendment is significant in that it will work to change this. For the first time, the decisions concerning manpower policies and its financing will be made in an integrated fashion.

Finally, in light of the other modifications made by this amendment, the provisions establishing a teaching hospital registry are eliminated.

Mr. President, members of both committees have worked long and hard on the issues related to graduate medical education and I believe we all agree that this represents a satisfactory compromise that will work well toward reforming our Nation's system of graduate medical education. It establishes a clear mandate that the Federal Government is obligated to assume its fair share of the costs of training physicians and it puts the medical education community on notice that changes are required on its part in addressing problems of physician oversupply and overspecialization.

I thank my colleagues and their staffs for all their work on this issue, most particularly the chairman of the Finance Health Subcommittee and his staff, Chip Kahn, who have put forth a great deal of personal effort to develop a reasonable graduate medical education reform policy and to recognize the manpower policy concerns the Labor Committee has raised. I urge the other Members of the Senate to support this amendment.●

● Mr. DURENBERGER. Mr. President, I rise to join the distinguished Senator from Indiana [Mr. QUAYLE] and our colleagues on the Finance and the Labor and Human Resources Committees in sponsoring this amendment to S. 1730 to establish a Council on Graduate Medical Education. This measure represents an important step in the process of reforming Federal graduate medical education policy.

The amendment melds manpower and finance policies for intern and resident training which have been developed by the Senate's two committees.

The graduate medical education policy included in the reconciliation package, as reported by the Finance Committee, establishes three important principles.

First, it assures that Medicare will continue to finance an appropriate share of intern and resident training. Next, it sends a clear signal to the academic medical community that the economics of subspecialty physician training must change. The policy sets forth Medicare's responsibility to support basic physician training in teaching hospitals.

However, it also recognizes that we are in a time when virtually all major physician subspecialties are in surplus. Realistically, advanced training must become more the financial responsibility of those who seek such training, and of the medical faculty for whom those residents and fellows serve as apprentices.

And, finally, that in a time of general and growing physician surplus in America, as American medical schools are reducing class size, this Nation cannot afford the expense of supporting through Medicare the graduate training of doctors—foreign or American—who receive undergraduate medical training outside the United States or Canada, in institutions whose quality the Federal Government cannot assess.

Our new Medicare policy will have an influence on graduate medical education as will the changing environment of privately funded hospital services. Trends need to be monitored and mid-course corrections may be necessary.

The Finance Committee's reconciliation language on graduate medical education allows the Secretary of Health and Human Services to revisit Medicare's graduate medical education policy after July 1, 1989.

The amendment before us calls for the Council on Graduate Medical Education to report to the Secretary in 1988 in time to advise her on the development of Federal graduate medical education policy.

In closing, I would like to express my particular gratitude to my colleague from Indiana [Mr. QUAYLE]. He has spent a great deal of time on this issue. I respect the job he has done and his willingness to accommodate his initiative on GME to the Medicare graduate medical education policy which the Finance Committee developed this year.●

● Mr. HATCH. Mr. President, I would like to lend strong support of this amendment sponsored by my colleague Senator QUAYLE. I am very pleased to cosponsor this amendment which has been the result of a long and productive interchange between the Labor and Human Resources Committee which has responsibility for making manpower policy and the Finance Committee charged with the major financing of such education.

The most important principle that underlies this compromise is the recognition that our Nation's graduate medical education policy cannot be based solely on economics. This amendment would retain the Labor and Human Resources Committee's proposal to establish a Council on Graduate Medical Education which would be charged with making recommendations on national physician manpower policy. Further, the Secretary would be required to consider the recommendations of this body in making decisions concerning changes in Medicare's direct payment policy for graduate medical education. While I understand the urgency and support efforts to reduce Federal expenditures under the entitlement programs, I believe it is much more reasonable to make national medical education policy in the light of public deliberation, not as a consequence of funding cuts.

Right now there is consensus that we are training too many subspeciality physicians. I certainly agree with this view. However, this may not always be the case. We need a forum for discussing these issues and a mechanism to give those who actually pay for graduate medical education an opportunity to say how their dollars should be spent. The council will enable thoughtful and fair consideration of

these issues and allow us to assess our Nation's need for physicians on an ongoing basis.

Mr. President, I commend my distinguished colleagues from Indiana and Minnesota for their leadership in this important area. I urge my colleagues to lend their support to this amendment.●

● Mr. KENNEDY. Mr. President, this amendment addresses the important area of graduate medical education. I have had a long involvement in this area of Federal policy. I have personally chaired numerous hearings on this subject throughout the last decade. I am pleased to join my colleagues, Senators QUAYLE, DURENBERGER, HATCH, DOLE, BAUCUS, and HEINZ in this important contribution to our ongoing commitment to a national manpower policy.

It is the function of our graduate medical education system to meet the health manpower needs of the Nation. These needs have changed over time and continue to evolve. As far back as 1976, there were indications that we had an approaching surplus of physicians. This surplus is not imminent. Since early in the 1970's it has been clear that we have a maldistribution of physicians—by speciality and by location. That maldistribution has improved somewhat. We now have far more primary care physicians and fewer manpower shortage areas than we did 15 years ago. However, these problems are not completely solved. Our Nation's teaching hospitals continue to produce a disproportionate number of specialists. Many rural and inner-city areas continue to lack sufficient numbers of physicians.

Mr. President, I believe all of us who offer this amendment today understand that incentives in our reimbursement systems contribute heavily to overspecialization amongst our medical graduates. That reimbursement system is undergoing reform. But we must approach manpower policy through several avenues.

The amendment before us should have a rationalizing effect on our system of graduate medical education. Though there are also some dangers inherent in this amendment, on balance it will contribute to achieving the goals of reducing the total pool of physicians and shifting the balance of our graduate physicians toward primary care. It is entirely appropriate that the Federal Government support graduate medical education training through first certification only. It is also appropriate that support for foreign medical graduates be reduced.

Mr. President, if there is a danger in this approach, it is that while the number of residency positions nationwide exceed the total number of graduates of American medical schools, it will be impossible for inner city areas that currently rely on foreign medical graduates to provide physicians for their already underserved communities. This danger may be averted, Mr. President, if the total number of training slots decreases. This is a problem we must watch carefully. As this legislation takes effect, extraordinary solutions to protect these communities may be necessary.

Graduate medical education is only half of our system of medical education. The other half is our Nation's undergaduate medical schools. A comprehensive look at our manpower policy must include undergraduate medical education.

We hope that the council which is created by this legislation will provide guidance for future initiatives affecting both graduate and undergraduate medical education. This council will reassess the country's need for primary care and specialty physicians and will examine our system of undergraduate education.

Mr. President, this is a time of great ferment within our health delivery system. It is a time to watch carefully, analyze meticulously and move cautiously. This amendment will provide us with the information we will need for future action, and it begins the process of gradual reform. I look foward to continuing to work on this area of policy formation in the years to come.●

● Mr. HEINZ. Mr. President, I am pleased to be a cosponsor of this amendment which would create a Council on Graduate Medical Education to advise the Secretary of HHS in developing national physician manpower goals. I would particularly like to commend Chairman HATCH and the other distinguished members of the Labor and Human Resources for developing this farsighted proposal: the Federal Government has been influencing the production of physicians for years through Medicare reimbursement, NIH grants, title VII funds, and more. It's about time that the Federal Government acknowledged the role it has played in the production of physicians, and began to consciously and affirmatively tailor that role for the future.

We must face the fact that funding for all programs, even those as critical to the well-being of the American people as the development of high quality health professionals, will be limited in the future—and that, therefore, that funding cannot be dispersed in a haphazard or thoughtless manner. This amendment recognizes that Federal programs, funded by American taxpayers, must be designed to support the training of those types of physicians that will be needed by taxpayers. As Chairman of the Senate Committee on Aging, I particularly want to commend this amendment as the groundbreaking step upon which we can build to develop the supply of health professionals that will be needed to care for our growing elderly population.

By the year 2000, there will be more than 36 million Americans aged 65 or older. While representing 13 percent of the population, this group will account for over one-third of all personal health care expenditures in the year 2000, and for almost one-half of all personal health care expenditures by the year 2040. Today, physicians derive almost one-fifth of their income from patients aged 65 and over, and in the future elderly patients will make up an even larger component of the average physician's practice. Yet shockingly few physicians have the background in geriatric medicine needed to provide competent health care to these patients, and this shortage of appropriately trained practitioners will become even more pronounced as the elderly population grows.

This means that, unless we act now, Medicare will spend hundreds of billions of dollars to purchase services from physicians who have had little, if any, training in the specific needs of older patients. Services provided by these physicians will be expensive, inappropriate, and possibly dangerous for the patient. This is hardly the affordable, quality health care that Medicare was meant to provide for its beneficiaries.

Federal support for graduate medical education must be refocused so that it helps to satisfy the needs of Federal beneficiaries for appropriately trained physicians. I am confident that the creation of the Council on Graduate Medical Education will accomplish just that. Further, it will send a strong message to the medical community—a message which says that Federal support for the training of health practitioners will hereafter be provided in a way that maintains a specialty distribution of practitioners in this country which best serves the needs of our citizens.

I am working to communicate that message even more explicitly. At my request, the Finance Committee has included in S. 1730 a provision regarding reform of Medicare's contribution to the direct costs of graduate medical education. That provision will take effect in fiscal year 1987 when Medicare would limit such contributions to graduate medical education to the lesser of 5 years or the number of years required for specialty board eligibility. It exempts up to 2 years of geriatric fellowship training from that cutoff of Medicare reimbursement. This provision will prevent the reform of Medicare's contribution to direct costs of graduate medical education from squashing the development of geriatric medical faculty and expertise—the type of medical training

truly beneficial to the Medicare population, and truly in short supply. A recent survey of all medical school faculty uncovered only 250 to 300 full-time equivalent physicians teaching "some aspect" of geriatrics. Yet, the National Institute of Aging, and studies by the Rand Corp. and other organizations, warn that at least 1,300 medical faculty with geriatric expertise will be needed by the year 2000 if we are to provide appropriate, cost-effective, quality care for older Americans.

I am pleased to note that the Labor and Human Resources Committee shares my concern for geriatric education and that the committee increased the amount of funding originally provided for geriatric training in the Health Professions Training Assistance Act of 1985. I will work with the Appropriations Committee to see that this emphasis on geriatric training is continued.

The amendment which we are considering today which will establish the mechanism for achieving the manpower goals that will make appropriate and quality health care available to everyone. Again, I commend my distinguished colleague, Senator HATCH, and the other members of the Labor and Human Resources Committee for their fine work in drafting this amendment. It is just the kind of farsighted groundwork that must be laid now if we are to prepare to meet the needs of our elderly population in the future.●

Mr. QUAYLE. Mr. President, I ask unanimous consent that I may proceed for 30 seconds to explain the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. QUAYLE. This is an amendment concerning graduate medical education that both the Labor Committee and the Finance Committee passed. Sponsors of the amendment on both committees have signed off on it, it has been cleared on both sides, and I move its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1011) was agreed to.

Mr. QUAYLE. I move to reconsider the vote.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BOSCHWITZ. Mr. President, since there is no one seeking recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be recinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1012

(Purpose: To change the effective date for coverage of respiratory care, to increase funding for home and community-based care demonstration projects, and to increase funding for the independent living initiatives for children in foster care)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ] proposes an amendment numbered 1012.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 174, strike out lines 18 through 20, and insert in lieu thereof the following:

(c) EFFECTIVE DATES.—(1) Except as otherwise provided in paragraph (2), the amendments made by this section shall apply to services furnished on or after the date of the enactment of this Act.

On page 239, line 3, strike cut "$700,000" and insert "$85,000,000".

On page 239, line 4, strike cut "$800,000" and insert "$88,000,000".

On page 239, line 18, strike out "$150,000" and insert "$1,500,000".

On page 239, line 19, strike out "$200,000" and insert "$2,000,000".

On page 275, line 25, strike out "$500,000" and insert "$45,000,000".

Mr. HEINZ. I further ask unanimous consent that I be allowed to proceed for 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, this is a germane amendment I sent to the desk a moment ago. I will try to make clear to my colleagues with the time restraints that we are operating under what we are doing here.

Mr. BOSCHWITZ. Mr. President, has there been unanimous consent to obtain a time limit?

The PRESIDING OFFICER. The Senator is correct. The Senator from Pennsylvania has been recognized for not to exceed 3 minutes.

Mr. HEINZ. This amendment would allow respirator-dependent kids who are trapped in hospitals at as much as $30,000 or $40,000 a year but who medically could be cared for in a home setting at a substantially lower cost, as much as three-quarters lower, to do so. I might add that this is a provision which was in the bill as originally agreed to and reported by the Senate Finance Committee. At that point the Senate Finance Committee thought it met its reconciliation target.

We had put together what we believed to be a balanced package to get the votes necessary to report our reconciliation bill which saves a lot of money. What we then discovered was that there were some disagreements as to the estimates of the cost of this. Rather than burden the chairman of the Budget Committee with a reconciliation bill, the provisions of which were in dispute, the committee at that point agreed to pull those provisions from the bill with the understanding that were the estimates to work out as we believed they would ultimately, it would be not only in order but that the Senate would respect the judgment of the Finance Committee in offering back this amendment to the legislation.

That is essentially, Mr. President, where we are, and it is my hope that both in terms of the integrity of the work of the Finance Committee, where we have met our targets, in terms of the understandings that we believed we had reached both among ourselves and with our Senate colleagues, and with respect to the merits of the legislation, which I think I have described adequately, the Senate will adopt this provision. I reserve the remainder of my time.

Mr. DOMENICI. I ask unanimous consent that I be granted 2 minutes to respond.

The PRESIDING OFFICER. Without objection, the Senator from New Mexico is recognized for 2 minutes.

Mr. DOMENICI. Mr. President, I regretfully rise in opposition to this amendment. This is the same amendment that was found to be out of order just a few moments ago. Now it has been redrafted to make it, in order as I understand it, although I will ask the Chair that momentarily. But basically when we are finished with all of the discussion about what the understandings were and were not, this amendment will cost $225 million in outlays over the next 3 years. In addition to whatever else we are spending in our Government, and whatever savings we are making in reconciliation, this amendment will reduce that level of savings by $225 million.

Frankly, I really do not know where we are going with this bill. I am determined to get it finished and hopefully we will by Thursday. The more I look at it and see how we have added here, subtracted there and put three more in there, I am not so sure that it will not be the reconciliation bill of the century in that it may end up costing more than it saves. But frankly, I would like the Senate to vote on this so I am going to ask for the yeas and nays and merely state that these are marvelous programs, good reasoning on the part of Finance, but the question is, Should we add $225 million or not? Now, Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were agreed to.

Mr. HEINZ. Mr. President, I offer an amendment to S. 1730, the Consolidated Budget Reconciliation Act of 1985, on behalf of Senator PACKWOOD, the distinguished chair of the Finance Committee, and for Senator BRADLEY, Senator MOYNIHAN, and myself to provide additional support for three vitally important programs that are contained in the bill as reported by committee. This amendment has been agreed to by the ranking majority and minority members of the Finance Committee. I ask unanimous consent that it be adopted.

During markup of the Finance Committee deficit reduction bill, the committee overwhelmingly agreed that, using newly-generated tax revenues, we would authorize programs to provide home respiratory care to ventilator-dependent Medicare and Medicaid patients, establish a 3-year demonstration program for home and community based waivers, and establish a 2-year program to help foster children successfully make the difficult and important transition from foster care to independent living.

This amendment, which is fully in keeping with the decision of the Finance Committee and is made with the chairman's full support, would reestablish the committee's intent and authorize these cost-effective programs at the levels that were agreed to in markup.

Specifically, this amendment would immediately begin S. 1249, the Home Respiratory Care Act, as of the date the reconcilation bill is signed into law. The Congressional Budget Office estimated that this program would cost $49 million over 3 years.

The second part of this amendment would establish a 3-year demonstration program for home and community based waivers. Under this program, four States would be granted $22 million each to conduct a home and community based waiver program that would provide needed services to elderly and disabled residents. After the third year, the Department of Health and Human Services would be required to conduct a $2 million study of the effects of these demonstration programs had on State Medicaid programs, other Federal health care programs, and society at large. This demonstration program will give us a much better understanding of the true costs and benefits of these vital programs.

The third provision in this amendment would authorize $45 million in each year to establish a 2-year program of independent living initiatives to help foster children who are between the ages of 16 and 18 years old make the transition from foster care to independent living. The funds from this program would be used to provide vocational training, counseling, training in budgeting, housing, and career planning, outreach activities, and other necessary services.

I ask that my colleagues join in adopting this amendment.

Because of my special interest in the first of these provisions, that would enable Medicare and Medicaid ventilator-dependent patients to receive respiratory care in their own homes, I would like to add a few comments in support of this provision.

Nearly 4 years ago, President, Reagan, in a nationally televised press conference, brought to light the case of Katie Beckett. Katie was 3 years old and suffered from a medical condition that required her to receive ventilator care around the clock. Katie was medically able to go home, as long as she could still use her respirator. But the State Medicaid plan would only pay for Katie's respirator care as long as she was in the hospital.

The President, recognizing the hidebound nature of these regulations, interceded in Katie's behalf and gave her what amounted to Presidential permission to go home and receive the care she needed. As a result of this simple act of common sense, the Medicaid Program saved an estimated $200,000 in annual costs for Katie's hospital care and a 3-year-old girl was finally able to go home.

Over the last 4 years, about 200 people have made their way through the cumbersome and inequitable route to obtaining these waivers. But over 2,000 people are still confined to hospitals unnecessarily, at great strain to themselves and tremendous unnecessary costs to the Federal Government.

To correct this situation, I introduced legislation, S. 1249, the Home Respirator Care Act, which would enable hospitalized ventilator-dependent patients whose care is currently paid for by Medicare and Medicaid to receive care in their own homes—by far a more satisfactory and less costly option for most patients.

There are thousands of other individuals besides Katie Beckett that would benefit from this legislation. In my own State of Pennsylvania, one little girl in Philadelphia has been in the hospital on a ventilator for most of her 21 month old life, even though her care in the hospital costs $35,000 a month, while she could be cared for in her own home—among her family—for $16,000 a month. Similarly, there is an 18 month old in Pittsburgh who has only been home 1 day since she was born—the rest of her young life has been spent in a hospital on a respirator. Her family has been forced to live apart because she is hospitalized in Pittsburgh while her family lives in West Virginia. And her care in the hospital costs four times what it would cost in the home.

These cases are not merely anecdotal. They represent real life situations that people must endure every day in all too many cases. This legislation would encourage substitution of appropriate, lower cost home care for more costly, unnecessary hospital care, and will also help bridge the gap in the continuum of care.

I wish to extend by sincere thanks for the support that the chairman has provided me on this issue through this reconciliation process and I am hopeful that my colleagues will agreee that amending S. 1730 to make the Katie Beckett provisions effective upon enactment of the finance reconciliation package is not only good health policy, but a good deficit reduction tool.

Mr. DOMENICI. Now, Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the tabling motion.

Mr. BRADLEY. Mr. President, I ask unanimous consent to proceed for 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I rise as a cosponsor of this amendment to provide funding for three provisions included in the Finance Committee portion of the reconciliation bill. One of the three Finance Committee provisions relates to my amendment to provide for a four-State home and community-based services demonstration.

Mr. President, in June I introduced the Medicaid Home and Community-based Services Improvement Act of 1985, which is designed to give States much more flexibility in providing home care services to persons at high risk of institutionalization.

Mr. President, in 1981, the Congress established a program that was designed to help Medicaid recipients stay out of nursing homes and hospitals by promoting an expansion of home-based care. Section 2176 of the 1981 Omnibus Budget Reconciliation Act was designed to allow States to apply to HCFA for waivers to allow a limited number of people to be treated at home rather than in institutions through the provision of a wide range of home-health and community services that Medicaid had not previously covered.

To be eligible to run a Home and Community-based Waiver Program, States had to meet several criteria. First, safeguards had to be established to ensure that the health and welfare of recipients be protected and that persons would be given a choice between home care and nursing home care. In addition, States had to show that the costs of home care would not be any higher than they would be for institutional care if the waiver had not

been granted. Finally, by operating the program through the waiver approval process, it was believed that the Government would be able to adequately test the program and still keep control.

Mr. President, in March 1985, after nearly a 4-year delay, the Health Care Financing Administration issued final regulations on the Home and Community-based Waiver Program. It appears to me that OMB had a very heavy hand in drafting the regulations. The program has been tightened up in such a way as to subvert the congressional intent to expand home care services. The regulations put the States through so many hoops and reporting requirements that many States in the future will most likely not be able to get approval for new waivers or extensions for their current waivers.

Mr. President, the recent regulations are clearly trying to undermine the Home and Community-based Waiver Program. So long as this administration is in control of approving State waivers, congressional intent will be subverted. The administration will try to reduce, rather than expand, the current commitment to home care. Unless the administration is overruled, much of the good work that has been done developing this program over the past couple of years will be for naught.
